(k) That the harbor line at the quarantine station near Savannah was established for the purpose of compelling the City to sell rock to the contractor at low prices.

(l) That I made improper use of funds received from a man named Hirt.

(m) That I have had improper business relations with contractors.

(n) That I was sometimes absent from my station improperly.

(o) General insinuation of collusion between the contractor and myself.

For the purpose of discussion these charges and allegations may conveniently be grouped under two heads, First, matters

relating to the specifications and covering the first, second, third and fourth charges.

Second, irregularities pertaining to my office and insinuations against my private character, covering the residue of the charges, allegations and insinuations. Before beginning to discuss the charges made, I desire to state that there seems to be conveyed in the insinuations against me the impression that I received a money consideration from the contractors, in other words, that I was bribed. That insinuation is absolutely false. What is the evidence in support of it? Nothing whatever. The only thing which has been suggested as even lending a tinge of color to that insinuation is the fact that I have handled sums of money. I have produced testimony from the contractors that no money or other consideration has ever been given to me directly or indirectly (evidence). Further than this I have demonstrated to the Board exactly where the money did come from by the statement of my father-in-law, Mr. Westcott, who gave it to me, whose agent I was and under whose powers of attorney I was acting (R. F. W.), and by the broker who knew of these family relations and by whose advice I was largely guided in doing Mr. Westcott's business (R. & F.). A perusal of those powers will show that I did only what I was authorized to do under them, and the testimony shows that my transactions were solely for my father-in-law, and had no relation to my official acts. I therefore insist with confidence that this insinuation is not only without a scrap of evidence to support it, but has been proven by the evidence, documentary and oral, to be without foundation. This matter will be adverted to later, but now I will take up the charges in the order before given.

As to the First Head.

Matters relating to the specifications and covering the first, second, third and fourth charges.

It must be that those charges were made in ignorance of the provisions of the specifications, since in paragraph 36 of the specification, it is expressly provided that: "The work of construction will consist of brush "mattresses loaded with stone." Thus it appears that every bidder was given direct notice of the general character of the work to be done. As the second and third designs refer exclusively to brush mattresses and as the undisputed testimony is that the cost of building mattresses under those designs is about the same, it is evident that each contractor in making his bid knew exactly how to

make up his estimate. Indeed I am satisfied that if the attention of any one had been called to this paragraph he would have admitted that the specifications are clear on this point and that no bidder, even if distant, could have been deceived. But additionally, three designs of mattresses were called for for the reason that while Number 3 was to be used generally, a very few of the others might be needed, which could then be required at no extra cost to the United States, and without any trouble. As a matter of fact, there is very little, if any, difference in the cost of construction under any of these designs, as is shown by the testimony of engineers and experienced contractors familiar with mattress work, but in order that there should be no misunderstanding whatever it was explained fully to every bidder that mattresses of the third design only would be used, those of the first and second, if used at all, being very few in number. As all the bidders thoroughly understood this point and made their bids on the design actually used, the charge that the government lost the difference between an expensive and a cheap design has failed of proof, the fact being as shown conclusively by the statements of all the parties who bid on the work not only that the cost of each design is about the same but that they based their bids on the design actually used, and which they were informed was intended to be used. The contract was made on that design. Reference is made to the testimony of Lieut. Rees (P. 622), Mr. Rutherford (Page 533), Mr. Stewart (Page 401), of Mr. Ely (Page 419), and to the letters and affidavits of Mr. Friday, Mr. Ross and others appended hereto.

Referring to the question propounded to me before the Board, if a bidder were to make a contract under the specifications, what guarantee would he have that I would not require him to use single course log mattresses, and to my reply thereto that he would have no guarantee except my honor, it may be well to state that this question and reply and the entire discussion on that subject are pertinent only on the theory advanced by the prosecution that the specifications were faulty and that the bidders had to rely merely upon my statement. As a matter of fact, however, the projects contemplated brush mattresses generally, and the specifications expressly provided for brush mattresses, and when I drafted the specifications my idea was perfectly clear that only such mattresses were to be used, except in the limited quantities heretofore referred to. Every bidder and every one contemplating bidding knew thoroughly that mattresses of the third

design would be required and the prices actually bid were on that basis and the contract actually entered into was for such mattresses. Hence it is that on the basis of actual facts and not on the criticism of the prosecution the existing contract does not rest on personal guarantee but is absolutely binding on both parties to it.

The charge that the fascines used were nothing like those contemplated in the specifications and that the mattresses used were like none of the designs given, but that a mattress enormously cheaper was used without any reduction in price is based in main upon the testimony of Mr. Cooper, Mr. Hale, Mr. Keating and the two Twiggs. At the outset it should be borne in mind that all these witnesses are interested parties, being at present employed by the government under the orders and influence of my successor.

Besides being furnished with a copy of the specifications, each inspector or assistant engineer was furnished with a copy of the regulations for the government of employes of United States Engineer Department in the District of Savannah. Georgia, dated October 1st, 1892, a copy of which will be found with the testimony and which regulations contain the following specific instruction,—

“The general duties of an inspector are to inspect and measure material and report whether the material and work are in accordance with the contract or not. * * * Mattresses will be first carefully examined and the inspector must satisfy himself they are constructed in accordance with contract before he accepts them for measurement.” (Page 17).

In addition to these general printed instructions each inspector was ordered to see that all work was done properly and according to the specifications, so that he might be able to certify to the correctness of his report.

Referring to the testimony of Mr. Cooper, who cannot plead ignorance for the reason that in his letter attached to the original charges he claims credit for the magnificent result of the work done in Savannah under my administration, and who has been in the government employ for some years, it will be found that his statement substantially is, that from the time he entered upon his duties as inspector or assistant engineer up to the time that I left Savannah in 1897, the fascines used in the work were not built in accordance with the specifications; that they were not trimmed, that they were simply piled merely as they were found with the leaves and everything left on them; that there was not much choking

done at all; and that they were just tied up as well as they could be; but that he believed they were satisfactory to me and that he was so told when he first came to the work, &c., and here in parenthesis it may be noted that he does not state to the Board who told him so.

In refutation of this testimony of Mr. Cooper, I refer to his written tri-monthly reports, covering the entire period of his employment as inspector or assistant engineer, in which he unqualifiedly reports that the mattresses were built according to the third design of the specifications, (Design 3.), which is conclusive on him that the fascines and mats were considered by him at that time as properly constructed. He attempts now to escape this conclusion by suggesting that his report meant merely a statement of quantities irrespective of the method of construction and he makes this suggestion in the face of his own admission, that he has at times in his reports recommended deductions from mattresses because they did not come up to the requirements of the specifications. It would further seem that if his evidence is to be accepted as truth, then he has wilfully and continuously deceived officers of the government. He had in his possession at the very time he was making his reports a copy of the regulations above referred to, in which as inspector he is expressly required to make examinations for the purpose of satisfying himself that the mattresses are constructed according to the contract before he accepts them for measurement. He made report after report that they were so constructed, and now says that such reports were false and untrue. These observations will apply with equal force to the testimony of the other inspectors. The statements of the two Twiggs may be understood when it is remembered that a brother of Marion Twiggs is the dissatisfied contractor who did some work on the Savannah River near Augusta. Further, respecting Mr. Marion Twiggs, it may be stated that in his written reports made up to the time I left Savannah in July, 1897, he avers that the mattresses were "brush mattresses of the third design," which is what is called for by the specifications. In this connection I desire to invite special attention to a letter of Mr. Marion Twiggs, addressed to my successor, dated October 3, 1897, several days after the session of the Board at Savannah had closed, which letter is in evidence. It will be remembered that in his affidavit submitted to the Board this witness swears: "That in none of

the cases with which he is familiar have any mattresses been constructed in accordance with any of the three designs described in the specifications." In the letter referred to, which purports to be an answer to a letter from my successor of October 2nd, he says: "I believe that the mats sunk at Cumberland Sound were" (and then follows in quotation "mats of the third design modified by the Engineer officer in charge." He does not give the source from which this language was quoted. He then goes on to explain, "In order to explain this modification I inserted the word "brush" over the "third," the mats being built out of bundles of brush and not out of fascines," followed by the astounding statement: "When I stated this I had not read the specifications for Cumberland Sound mats." Here, then, is a man who signs himself Assistant Engineer, admitting that he made false official reports and that when he made them he had not read the very specifications by which alone he could determine whether the work was properly done. His flimsy and scandalous excuse that, "I believe my report suited Captain Carter as well as the mats did," speaks for itself and does not relieve him. Again he seems to think that there is some peculiar significance in the word "brush," whereas if he had read the specifications and the printed rules furnished to him for his guidance he must have known that the construction was to be of brush mattresses.

Since giving his testimony, he (Referring again to Mr. Cooper), has also been given an opportunity to explain his report, and so he also writes a letter to my successor, dated October 3, 1897, purporting to be an answer to a letter from that officer of October 2nd, in which he says that the word "third" was filled in under the heading "design of mats" because "that was the form of the report given me to fill out." "I did not mean to state by the words 'third design' that all the details mentioned in paragraph 37 of the specifications were carried out." (He evidently considers the construction of the mats a detail). "In fact, my understanding of my signature to all of these reports is that they were correct according to the directions given me by my superior officer, and that the specifications were only used in the absence of more explicit instructions," and here again it may be noted that nowhere in the testimony does he state that I gave him any more "explicit instructions." This is the same man who, on page 27 of the official testimony, states that he was ordered by Captain Carter to report as right something which he

knew to be wrong and that he declined to do it because "I would be certifying to something "that was not so, and yet, when asked in another place whether, if instructed to do anything wrong he would resign or do wrong, answered that he would do wrong (Page 47). And this is the same man who admits that a complaint to Captain Carter as to deficiencies of the contractors would be effective (Page 26). That if an inspector accepted any favors of the contractors he would not have Captain Carter know it (Page 50). That he received instructions from Captain Carter to show no favors to the contractors, which instructions were never modified (Page 47). That the fascines were not up to the specifications, but that he never saw a military fascine before my successor took charge (Page 44). That whilst in 1889 he began to suspect Captain Carter was doing wrong (Page 54), he yet accepted service under him again in 1893, and in the same year declared to Mr. Brown that the contractors were being held closely to the specifications without favor, and that good work was being done, which statement he reiterated in December, 1894, to Mr. Brown. This is also the witness who volunteered the political information that Captain Carter "has yielded to temptation and probably allowed the contractors or a particular contractor to do as he liked in exchange for their influence and power to boost him along;" and when asked in what manner they "boosted" him along, stated that they helped him to get the appointment on the Nicaragua Canal Commission and that to them he owed his appointment to London. In all fairness, I ask what credence can be given the statements of this star witness of the prosecution? He admits his official reports were false; that he paid no attention to the construction of the mats, but did make deductions because they were not properly constructed; that my instructions were to see that the specifications were fully carried out, and that these instructions were never modified. He says he disobeyed those instructions. He told me and others the work was properly done. He says now it was not. He says he would do wrong before he would resign. It is entirely possible that fear of a request to resign has led him to testify as he has. He contradicts himself, he is contradicted by others, and by his own report; and before dismissing this witness, it may be worthy of observation that Mr. P. E. Twiggs testifies that he is a liar (Page 8).

But additionally, the testimony of these assistants and

inspectors is further discredited by the fact that, in addition to reporting to me, they have admitted again and again to responsible parties during the progress of the work that it was well done and in accordance with the contract. The Editor of the *Fernandina Mirror* who was inquiring constantly after the work at Cumberland Sound, testifies that Mr. Twiggs said "the work was progressing well, &c.," and the President of the Board of Pilot Commissioners, who was often at the site of the work, testifies that Mr. Twiggs stated to him that the "work was being well and properly done, according to contract, and that the jetty was doing its work and standing well" (See affidavit). Mr. Gammont testifies to having heard both Mr. Twiggs and Mr. Cooper report to me that "the work was being done properly and according to the specifications," "the mats were being built properly, according to the specifications," and that Mr. Twiggs reported that the "mats were standing up all right without any change, and that the sand had filled up to their tops, that the work was in good shape, &c." (See affidavit). Mr. Laird testifies to having heard Mr. Cooper report to me that "the contractors were doing the work according to the specifications, &c." (See affidavit.) Mr. Brown testifies that Mr. Twiggs stated that it was not considered necessary to have an inspector there (at the mat camp), and that "as far as the mattresses were concerned, the contractors were obliged to build the mattresses better than the specification demanded" (Page 42).

At this point, permit me to say that I do not desire the Board to infer that I would have them believe that all of these men are perjured witnesses; not so; I appreciate too highly the embarrassing position in which they found themselves placed and, with the exception of Cooper and the two Twiggs, for whose unworthy conduct I can find no apology, I am not inclined to judge them over harshly.

Informed that the fascines and mattresses as built by them for years past had not been in accordance with the specifications and being shown a mattress of a design with which they were not familiar and instructed that this and this only was the design the specifications called for, it was not unnatural that they should have hastened to assure my successor that former work had not been done in accordance with the specifications, and not wishing to take the risk of bringing trouble upon themselves, their escape was by placing the responsibility elsewhere.

On the other hand, the evidence is overwhelming, that the fascines and mattresses were well and thoroughly built and were in accordance with the specifications as interpreted by the Engineer Officer, by the bidders and intended bidders, by the contractors, by inspectors, and in fine, by everybody in any manner or form connected with the work.

Mr. R. F. Ensey, a graduate of Johns Hopkins' University, and a man of considerable engineering experience, at present occupying a position of importance in Florida, and who was an inspector on the work in Savannah Harbor for some time in 1892 and 1893, and at the time during which the alleged change of method in construction was made—This gentleman testifies that the fascines were properly choked and made according to the specifications. (Page 152 to 168.) That the mattresses were also made according to the specifications (Page 150 to 175). He further testifies that every inspector had orders to see that the specifications were properly carried out and that they all understood this. (Page 156.) That work not done properly by the contractors was replaced at their own expense. He further testifies that any minor changes made in accordance with the provisions of the specifications were all for the benefit of the United States. That if a mattress fell below the requirements of the specifications, it was not sunk, and that the work generally was properly done in every respect (Page 155). This witness further states what is known to every intelligent engineer having experience on this class of work, that any proper examination by an inspector would reveal any material imperfections in the mattress, thus showing the usefulness of putting regular inspectors at the mattress camp. Mr. Brown, a capable engineer of experience, also testifies to the same effect (Page 43). I refer also to the testimony of Mr. J. T. Daniels, who has been employed at Savannah Harbor since 1882, and who has been an inspector on mattress work since about 1893. It seems that Mr. Daniels stated in a letter dated August 8, 1897, that the mattresses "were not build according to the specifications," but it appears that this statement was made by him based on incorrect information, for he testifies that that letter was brought about by being informed "that only mattresses constructed according to instructions given since Captain Carter's departure were in accordance with the specifications." It is not to be marveled at that he wrote this letter when it is remembered that even Mr. Cooper had never

seen a military fascine prior to the time of the advent of my successor. Mr. Daniels positively testifies that the fascines built under Captain Carter's administration were built according to the specifications, were properly choked and were built as well at the close as at the beginning of the work. He also states that the changes in the method of construction were not of any advantage to the contractor. He further says that the mattresses built by Captain Carter were in accordance with the specifications and that they were better adapted to the work for which they were intended than the mattresses built by his successor (Page 199). Mr. Daniels also states that there were general instructions to inspectors to have all work done according to specifications (Page 189). That if any inspector had done anything improper he would have been discharged (Page 190); that he never heard an intimation to the effect that the work was being done improperly (Page 192); and that deductions were made of all mattresses not properly built (Page 195). Lieutenant Rees, of the Corps of Engineers and who was my assistant from 1889 to April, 1893, states that he has been in the mattress camps and on the works and is thoroughly familiar with the work carried on, and who testifies that the fascines were properly choked (Page 636); that the type of mattress used does not differ from the method mentioned in the specifications and that it does not differ materially as to cost (Page 633). Mr. Burnett, who was one of my assistant engineers on the work from 1892, and who has had a most extensive experience in the construction of fascines and mats, testifies that the mats and fascines were well and properly made. (See affidavit.) Mr. Brown, who was also one of my assistant engineers, testifies without reservation that the fascines and mattresses were all properly built in accordance with the specifications; that the construction was as good in 1897 as formerly (pp. 39, 40, &c.). The superintendent and foremen of the Atlantic Contracting Company, who actually did the work, all swear that the fascines and mats were well and properly made and were in accordance with the specifications (See affidavits), and here it may be remarked, that all of these witnesses testify that the fascines and mattresses were built just as well at the close of the work as at the beginning, and that there was no deterioration in the construction thereof. At this point I would observe, that the specifications for constructing any work are intended as a guide both for the engineer and the con-

tractor, and the work desired To be done under the specifications in my district was understood so clearly by everybody connected with the work that never during the thirteen years I was engaged on this work was there any question not perfectly and thoroughly clear, and no method of construction followed which was not in accordance with the contract and understood by every one having any connection with the work. The specifications permit mattresses to be sunk in single courses, each course weighted with stone. That method was tried in 1892, was found to be improper in Savannah Harbor and would, if carried out, have increased largely the cost of the work to the United States and would have prevented the successful completion of the project of improvement. The specifications, however, were drawn with the view to provide for such contingencies, and state distinctly "that the United States reserves the right to make such alterations in the detail of construction or material as may be deemed best during the progress of the work, provided that should such alterations materially vary the cost of the mattress, the price to be paid shall be increased or diminished proportionately, such change of price being agreed upon before the alterations in the mattress are made." It is thus seen clearly that any alterations in detail of construction or material which do not materially vary the cost not only do not need any special agreement or supplemental contract, but that such work is in strict accordance with the specifications. Moreover, the method of constructing the mattresses were well known to the Division Engineer and to the Chief of Engineers, both of whom, as I have reason to believe, were as well satisfied with the success of the change as I was myself. I may be permitted to mention one incident in detail: In about the summer of 1894, M. le Baron Q. de Rochemont and M. H. Vétillart came to Savannah, bringing a letter from the Chief of Engineers. One the day of their visit a large multiple mattress, composed of several mattresses, was sunk successfully. They expressed themselves as much pleased with the method, which was novel to them, of building many mattresses together on top of each other and sinking with a single load of stone. The method of work was explained in detail to them and the experiences of that day were related in detail by them to the Division Engineer and to the Chief of Engineers, both of whom expressed themselves as gratified with what I had done. The method of construction was also ex-

plained during the progress of the work in June, 1895, if I remember, to the present Division Engineer.

To attempt to justify the allegation that enormous profits enured to the contractors from the alleged modification of the specifications in the construction of mattresses under the contract of 1892, estimates of cost of construction have been submitted by the prosecution, namely, those of

- (a) Mr. Gieseler,
- (b) Mr. Cooper, Mr. Hale and Mr. Keating,
- (c) Captain Black and Captain Gaillard.

In order to discuss this subject intelligently, it is necessary to define precisely the style of mattress which each man had in mind at the time he made his estimate. It would seem that Mr. Gieseler's estimate is based on purely imaginative and theoretical premises and is exceedingly inaccurate, as is illustrated by his figures on a log mattress, wherein he assumes that one hundred logs of not less than twelve inches average diameter can be laid side by side in a space seventy-five feet in length. His other estimates are of equal value. The estimates of the inspectors are made on the assumption that the fascines and mattresses used in the work were improperly made, or in other words that the work was bad and their estimate is to demonstrate the cost of bad work. The Engineer Officers reach their conclusions by assuming conditions which did not exist.

(a) Further comment on Mr. Gieseler's estimate is unnecessary. This man had charge of hydrographic surveys and office work and has had no practical experience on any of the works of construction, and his estimates are of no value whatever.

(b) Regarding the estimates of the inspectors, it may be stated that Mr. Cooper has not seen mattresses built. Mr. Hale was employed usually on surveys, and Mr. Keating, while sent once to the brush camp, and who reported that the work was so well done that he had worked himself out of a job (p. 180), is a boatman, whose education is not sufficient for him to have written the letter to which his name is signed. A further analysis of these estimates would result in no possible elucidation of the question of cost, unless it be further assumed that in addition to authorizing the alleged modification Captain Carter further directed or connived at bad work,—or in other words, the Board is asked to believe that he not only allowed the contractors by an unauthorized modification of the specifications to pocket thousands of dollars at

the expense of the government, but had so little regard for his own reputation that in order still further increase these enormous profits he was willing to risk the entire success of the work itself. Any such assumption is merely gratuitous and there is not a scintilla of evidence in the record upon which it can be founded. As a matter of fact, the inspectors all testify that they received no instructions to accept bad work, and yet if the fascines were constructed in accordance with their statements, namely, that they were piled merely as they were found, that there was not much choking done at all, then the work was bad and so bad, indeed, that it would not have answered for the purpose intended, and it could not have escaped detection. In passing, I would point with amusement, were it not a serious charge, to one of the items in the so-called estimate of Mr. Cooper, namely, "Lobbying River and Harbor Bill through Congress, \$25,000". No further comment is necessary.

(c) With respect to the estimates of Captain Black and Gaillard, I have but little to say. Those gentlemen obtained their information as to the character of the mats put in the work at Savannah and Fernandina from statements submitted by my successor and hence based their estimates on false data. Such being the case, assuming their reasoning correct, the conclusions must of necessity be incorrect and of no value. Taking a true description of the mattresses as actually constructed, Lieut. Rees estimates the cost at about eighty cents, Mr. Brown estimates the cost at eighty-six cents, Mr. Burnett at 81c and Mr. Daniels at from seventy-five to eighty-five cents, and Mr. Laird, at eighty cents per square yard.

Speaking generally, it is the experience of practical engineers and contractors that it is impracticable and almost impossible to arrive at estimates of cost in work of this kind with any considerable degree of exactitude. The varying conditions and elements which of necessity enter into the estimates are so many that figures in a large measure are merely theories. The location, the extent of the contract, the season of the year, the exposure, the risk of the elements, the cost of the plant, the experience of the contractor, the character of the labor and material, all these and many others are potent factors to be taken into consideration in making an estimate of cost; and hence, it is that it is so often found that no two experts will reach the same conclusion, and that the contractors themselves, in bidding on a work, differ ma-

terially in their prices. The record in this case gives ample illustration of this. Mr. Gieseler estimates log mattresses at about twice the cost per square yard of brush mattresses, while Captains Black and Gaillard estimate that the cost of the log mattress is much less per square yard than that of a brush mattress, and then come the contractors who for the most part are of the opinion that there is no material difference in the cost of brush and log mattresses. On the theory, however, that some importance may be attached to the estimates and opinions expressed by the witnesses for the prosecution on the cost of mattress work, I respectfully refer the Board to the estimates of Lieut. Rees, Mr. Brown and Mr. Burnett. I also refer to the affidavits of Captain Laird, Mr. Daniels and experienced contractors, competitors of the Atlantic Contracting Company and men who have done nearly all of the brush mattress work on the South Atlantic Coast and who know the cost.

Two of these men have done work both at Mayport and at Fernandina, and have furnished direct comparison of the cost of similar work at those two points. Mr. Ross, who did the work at Mayport under Captain Black, testifies (See affidavit) that the fascines at Fernandina were properly built and like those built by him at Mayport; that the mats at Fernandina were as well built, but cost a little more than at Mayport, on account of being in courses, and that in addition it cost ten per cent to twenty per cent more to do work at Fernandina than at Mayport. Mr. Ross is an experienced contractor, in whom Captain Black testifies he would have confidence, and Mr. Ross knows better than any other man the relative character and cost of the work at the two points. From all of the testimony, it is seen that no mattress of any character can be put into those works for less than sixty cents a square yard except at a loss. (R. Moore), and that the real cost per square yard of the mattresses actually constructed and used varies from sixty-five to ninety-five cents per square yard. These witnesses are all practically unanimous on one point, and that is, that there is no material difference in the price of constructing and in sinking them as they were actually constructed and sunk as allowed by myself. But more potent than this direct testimony is the incontrovertible fact that every bidder or proposed bidder on the work under the contract in 1896 all aver that they were fully advised that the mattresses to be used in the work under these contracts could be built and sunk as they had formerly

been built and sunk under the contract of 1892 and 1894. Not a single responsible party has come forward to testify that it was not thoroughly understood by the bidders that the mattresses could be built and sunk in courses. The allegations made by my successor that the specifications require each mattress to be sunk separately with rock on each layer, but that many were sunk at once, thus permitting an enormous saving, none of which accrued to the United States, is an error.

The only language of the specifications referring to the method of sinking, is as follows:

"No mattress will be accepted until properly placed in the works and secured there by a layer of stone of such thickness not exceeding one to two feet as may be required by the Engineer Officer in charge."

This language not only expressly permits the Engineer Officer in charge to sink a mattress without stone if he desires to do so, but to sink in any manner desired, either singly or in courses, depending on the depth of the water.

It was so worded with that very object in view, and to avoid giving an advantage to the Company owning the patent for sinking multiple mattresses, and as has already been demonstrated, every bidder understood this and the prices submitted by all the bidders were on that basis. The sworn statements of the bidders and the testimony of prospective bidders shows that the method was thoroughly understood, there was not and could not have been any loss to the government or unfairness to any bidder.

It is alleged that the fourth class stone used in the works is not the stone contemplated by the specifications, and it is insinuated that I arranged the specifications designedly that I might either accept or reject Florida stone. The insinuation is unqualifiedly false. On this point I would state that it is quite possible that a great deal of the Florida limestone has a specific gravity less than 2.4. Those figures were inserted in the specifications by me under the following circumstances:—is only within a comparatively recent date that stone has been discovered in Florida, but as soon as its use was begun it was found to be far better for Harbor work on the South Atlantic Coast than granite; first, for the reason that being lighter it does not sink so much into the sand or mud; second, being porous the growth of barnacles is facilitated, light riprap stone being converted in a short time by shell growth into a monolith. A piece of this limestone was

sent to a chemist in Savannah with instructions to determine its specific gravity, and the figure given by him was inserted in the specifications, not with the idea of determining the specific gravity of all rock used, but because the sample was like what was desired, because it was believed that the average of the stone would be about that weight, and because it was not desired that Florida stone should be specifically mentioned in the specifications, which would have been unjust to the stone of other States. That Florida stone was desired was understood, not only by me, but, as the record shows, by every one who took the specifications or who contemplated bidding on the work, and it is the uncontradicted evidence that the prices bid by the contractors for fourth-class stone was based on supplying it from Florida.

Further, if the determination of the specific gravity be an error, as is alleged, the actual sample should govern and not the figure in the specifications. Captain Abbot in his testimony supports this view. (Page .)

As to the Second Head.

(a) It is alleged that a written order for a certain load of stone on mattresses in Savannah Harbor was countermanded orally, thus permitting the contractor to sink his mattresses improperly. This allegation is not only false but the slightest investigation would have demonstrated that it was false. The only testimony which would lend any color to this statement is that of Mr. Cooper to the effect that I orally countermanded my order to Mr. Daniels requiring two hundred yards of stone. This statement of Cooper's is false. What I did say is, that on account of exposure and difficulty of sinking mattresses as compared with stone, the mattresses might go down with less than 200 yards of stone, but that they were at the contractor's risk until the 200 yards were put in. This Mr. Daniels understood and he testifies that I did not order the change as alleged by Mr. Cooper, but gave the instructions quoted above, and that it was those instructions that he repeated to Mr. Cooper (Page 194), and not the garbled and false version given by Mr. Cooper and used as evidence.

(b) It is alleged that the cost of mattresses per cubic yard at Cumberland Sound is \$13.69. I am unadvised as to whether this statement is intended as a criticism on my work as an engineer or as an insinuation of improper conduct. The charge purports to be based on a letter from Marion Twiggs of August 15th, 1897, transmitting a profile of a part

of the north jetty at Cumberland Sound. As to the falsity or truth of that profile I am not informed, but I respectfully refer to the various profiles transmitted to me by the same assistant, a blue print of all of which is filed with the record; from one of these it is to be seen that the cost per cubic yard is only \$3.07 per cubic yard. This same Mr. Twigg reported to me orally again, and again, the last time about June, a settling into the sand of about two feet for each mat, but no compression, and that the entire mattress courses were sanding to the crest. That condition was exceedingly gratifying to me and although the cost per cubic yard was large it was so much less than stone, where the subsidence would have been so great as to have increased the volume enormously, that it was satisfactory. Moreover the commerce of Fernandina was seriously interfered with by the unsatisfactory condition of the improvement due to the lack of necessary funds for prosecuting the work. Following the extension of the north jetty a new channel began to open exactly where desired, and to hasten that by the quickest method possible further mattress construction was necessary.

(c) It has also been charged that the amount of mattresses used in canvassing bids was largely increased where Gaynor, Bangs, the Atlantic Contracting Company, Walsh or Ely were the contractors, and decreased where Twigg was the contractor. As to this I have to say, in 1892 it was contemplated to use a certain amount of mattresses in Savannah Harbor. When the training walls were begun scour developed along their faces and it became imperatively necessary to stop that, which could only be done by brush mattresses. That method was economical and perfectly successful, but it increased largely the quantity of mattresses. When the work on the mattress training walls proper began the subsidence was so great that the total failure of the project of improvement for anything like the estimated cost was threatened, and it became necessary to devise a method of holding down the mattresses with less stone, which method, after long and perplexing trials, was successful. This change resulted in a saving to the United States but, of course, again largely increased the amount of mattresses. Again, near Pulaski, the bottom was soft, the pressure of water against the training walls was great and it became necessary to provide a wide structure. The shell growth was so rapid at that point and the silting up so satisfactory that it became possible to use mattresses there also, thus insuring the suc-

cess of the work but again increasing the quantity of mattresses. All former work in Savannah Harbor was in connection with spur dams and not in connection with training walls. Hence data from actual experience as to settlement that might be expected under those conditions were not in existence. At this point I desire to remind the Board that even under those conditions the work at Savannah was completed within the original estimate of cost and is successful. What might have resulted under other unknown, speculative and theoretical methods of construction, no one can tell. As the work progressed changes in quantities became necessary. Had the quantities of all materials been increased in the direct ratio indicated by the specifications, the cost to the government would have been increased and the work could not have been completed within the original estimate of cost. I invite the attention of the Board to the fact that such a condition is not new in the engineering profession.

At Fernandina under the present contract, it was feared that the sand would not follow well and the quantity of mattress work first thought necessary in making the project was reduced by me in preparing the specifications, but on statements from my assistant engineer that as the work progressed it was standing up well and covering with sand to its crest, and desiring to hasten the opening of the channel between the jetties, the mattress work was increased as provided for in the specifications.

No man living is wise enough to tell within anything like exact limits the absolute or even relative proportion of material necessary on a sandy coast like this, and the specifications hence provided for such changes in quantities as might be found necessary. It has been suggested by several members of my Corps who have testified in this investigation, that it might have been safer for me if I had executed supplementary contracts covering increased quantities. This suggestion would, be a proper criticism if I had had any reason to believe that by means of such contracts I could have secured anything to the government but under the existing conditions I felt then, as I do now, that I acted for the best interests of the government and I had every reason to believe that my action received the emphatic approval of my superior officers. These increases were reported monthly in writing both to the Division Engineer and to the Chief of Engineers and were spoken of in talking over the work with them and with any of my brother officers whom I chanced

to meet, and it did not occur to me that I was exceeding the latitude permitted me under the contract. The testimony relating to the relative profits on mattresses and stone at Ferdinandina of Grimm, Stewart, Friday and others, experienced contractors, competitors, and hence disinterested men, is proof that the increase was not for the benefit of the contractors. As to the statement that when Twiggs was the contractor the quantity of mattresses were decreased it may be well to say that Twiggs is the only man other than Gaynor, Bangs, etc., who has had a contract in this district since 1892, involving the use of mattresses; on that occasion proposals were asked for 7,500 square yards of mattresses and 7232.04 square yards were actually used. In the previous contract at the same point the contractor was John F. Gaynor. Proposals were asked for 7500 square yards but only 4861.4 square yards were actually used, a far greater decrease than in the case of Twiggs (See annual reports of Chief of Engineers). As to the charge that Twiggs lost money, that is entirely irrelevant. He was given opportunity to do the work well. The inspector Conant testifies that he did not take hold of the work with the right motive (page 102) and that his financial standing at the end of the work was about the same as when he began (page 111). The statement that the inspector received instructions to be hard on Twiggs and easy with Gaynor is absolutely false. The inspector admits that he was instructed simply to carry out the work as it was possible on the coast (page 108) and that it would not be possible to do as close work on an ocean bar as in a river (page 113).

(d) It is alleged that in my specifications for Savannah Harbor, 1896, I called for 200,000 square yards of mattresses, and that I later stated that new soundings showed that 300,000 square yards of mattresses would be required, but that no such soundings were taken. The statement that no such soundings were taken is not true: They were made along the site of the Breakwater where the mattresses were sunk in December, and learning from such new soundings that the mattresses did not stand up as high as I expected, the estimates were changed. The soundings referred to were not in the nature of a regular survey, were not located instrumentally and hence were not plotted.

(e) It is alleged that in my discussion of the inside route to Beaufort I made statements which must have deceived the Chief of Engineers and were intended to do so. This

charge is so glaringly false that I find it impossible to imagine why it was ever made. In discussing the various routes the old one along the Jones Island was not mentioned by me because no intelligent engineer familiar with the locality could consider it desirable. It was desired on account of its shortness by some steamboat men who knew nothing of engineering. My statement, "that nothing has been dumped in the steamboat channel back of the Long Island training wall" is true, and hence was not only not intended to deceive any one but could not have deceived any one. Careful orders were given to keep the old route open and no material was permitted to be dumped where it would interfere with it. It was dumped back of the training wall but not in the channel. (See affidavits of recorders of dumping, appended hereto.)

The statement that the old route "is shoaling and the shoaling has been hastened by the construction of the works of improvement" is true, but my successor's insinuation that enormous amounts of dredged material were being dumped into the channel is untrue, as is also his statement that two dumps were made on February 29th, 1897, where the tide would carry them into the channel. (See affidavit of Rossiter, the recorder of dumping of that date.) Had such dumping ever been done it was contrary to orders and would certainly have been known.

(f) My successor alleges that in a communication to the Chief of Engineers concerning Hutchinson's Island I stated that "people had been buying up lots for the purpose of charging exorbitant prices, etc.," and states that an examination shows that no lots have changed hands recently. As a matter of fact I did not make the statement alleged and my language has therefore been falsified. What I did say is that (as will be seen by reference to my letter-press book) excessive rentals were demanded by property owners, some of whom had taken possession of wharves as a speculation. At the time I made that statement and from the information then before me I believed it to be true, nor have I now any reason for believing otherwise. Regarding motives, however, I may have been in error.

(g) It is also alleged that I put in and paid for piles which were of no use whatever except to the contractor, the inference being that I intended thereby to defraud the government. In my statement to the Board I said that as I remembered I required certain piles to be put in at the

North Long Island training wall for which payment was made to the contractor. I find upon examination of the records that I was partly mistaken. While all piles after February 8th, 1894, were put in by my orders for the benefit of the United States, those put in before that date, 375 in number, although for the benefit of the United States, had already been put in without previous orders, and Mr. Cooper states they were put in at the contractor's request. Whether this assertion be true I cannot now remember, but I do know that the piles were necessary not only to mark the wall but to protect it and the small boats navigating the river, some of which had been upset and injured and the crews placed in danger of drowning, and for that reason and because the piles were put in properly they were paid for at a reasonable and just price, viz., the contract price. At the Cockspur Island training wall they were further necessary to force the fascines into one another, and to make a tight job of the double mattress work.

(h) It is alleged that many articles were improperly charged on pay rolls and that rolls and vouchers were improperly signed by me.

Until this investigation I never for a moment suspected that such a condition of things could have existed in my office. My first intimation was gathered from the testimony of Mr. Sterly, my former chief clerk. He stated to the Board that various articles were put on the pay roll, the amounts being added to the name of men thereon and in some instances that fictitious names were signed to the pay roll by him in obedience to my orders. That he did this is now an admitted fact, but that he did it with my knowledge or under my orders is a malicious falsehood. When I became a disbursing officer, I ordered that only labor or employment should be put on the pay rolls. At first these rolls were either made out or closely supervised by myself; later, however, when the amount of work I had to do had increased largely and when, as was often the case with busy men, I threw upon my chief clerk in whom I had the utmost confidence many of the minor details of my office, it happened that these rolls were made out by him, as I had every reason to suppose in the manner in which I had instructed him. In making articles for the office, for example, it was sometimes determined to buy the material and employ carpenters to make it into the form desired, rather than to ask authority for the specific purchase of the completed article. In such

cases instructions were given for a bill for the material to be submitted and for the pay rolls to be signed by the laborers who did the work, the foreman or dealer under whose instructions this work was done sending to the office upon the completion of the transaction a receipted bill for the entire amount, material and labor, as a check on the two divisions. It was supposed that these instructions were carried out strictly by my Chief Clerk, who informed me again and again that every thing was done properly, and whose statement to that effect I accepted as true. His statement that my instructions had not been complied with, that both material and labor had been put on the pay rolls, and that he had even signed thereto fictitious names, is the first intimation I have ever had that such a state of affairs ever existed, and his charge that such things were done in obedience to my instructions is absolutely false. The nature of this man, and the degree of credence which may be attached to any statements of his, may, perhaps, be illustrated by the following brief statement: In 1880 some officers of the Corps of Engineers took a fancy to this man who was then a private soldier in the engineer battalion and helped him along. When his term of enlistment expired I brought him to Savannah, took care of him and promoted him at last to be my Chief Clerk. He appeared to be devoted to me and I believed him to be truthful, honest and faithful to his duties. When I went away from Savannah I left everything I had in his charge; returning after an absence of only about a month, I find this man false to his trusts, untruthful as to his official acts, bringing up things which he did as my trusted clerk, declaring such things to have been fraudulent, and to have been known by him to be fraudulent at the time they were done, and stating that he had committed this crime at my instigation. A man who confesses himself to be a scoundrel and gives as his only excuse that somebody told him to be. In this connection I refer to the testimony of Lieutenants Rees and Burgess, both of whom testify that during their connection with my office at Savannah they became satisfied that they had every facility to obtain a complete knowledge of all papers connected with the office and to examine all the methods used in the office, and that they felt satisfied that all regulations in regard to pay rolls, vouchers and other papers were strictly carried out; and to the affidavits of my other clerks, who testify that my orders to this man were to

conform to the requirements of the regulations and that they have heard him assure me that my orders were obeyed.

(j) It has been insinuated by my successor that in my testimony in a certain case pending in the City Court of Savannah, entitled *Brown vs. The Atlantic Contracting Company*, I gave false evidence in favor of the contractors. In my testimony in this cause I stated that the stone which did not come up to the specifications was rejected and not paid for. My successor brings a letter from his Assistant Engineer, stating that very few deductions for improper stone were made during that period, claiming that that is evidence that rejected stone had been paid for. This statement or insinuation of his is absolutely false. The facts are that the stone below the specifications, so far as it could be ascertained, was thrown out by the contractor on the wharf, taken away or left on the cars so that he would not have to haul down on his barges stone which would certainly be rejected. The fact, if fact it be, that the rejections made at the work are small, demonstrates only that the contractor's rejections at the loading point have been properly made. (See statement of Edward H. Gaynor.)

(k) It is alleged that I established a harbor line at the quarantine station at Savannah for the purpose of compelling the city to sell rock to the contractor at low prices, and it is insinuated further that I recommended the removal of stone from certain government works in Savannah Harbor for the purpose of enabling the contractors to get the said stone. In support of this charge it has been stated that one of the jurors in the *Brown* case stated to him that my motives in establishing the harbor line were improper.

My successor says it is rumored that the reason of that order was to enable the Atlantic Contracting Company to purchase rock at a cheap price and force the city to sell it. When asked from whom those rumors came, he said that he had heard it from half a dozen different people, and when asked to particularize mentioned the names of Marion Twiggs and Mr. Cooper, whose untruthfulness has been established, and a member of the City Council, whose name he stated he had forgotten. When confronted with a list of the members of the Council he said that he did not mean the present Council, but that it was a member of a preceding Council who was also one of the jurors in the *Brown* case. I have submitted to the Board affidavits from all the jurors in the *Brown* case who expressly swear that this officer ap-

proached them to ascertain something about me, and the man from whom he obtained information relating to the quarantine matter, the Ex-Councilman, states on oath that he did not mean to give that officer the impression "that Capt. Carter's action on that occasion was actuated by any improper motive. Deponent did not make any such statement or charge and did not intend to be understood as charging Capt. Carter with any collusion with the contractors, in that the quarantine station was required to be changed for the purpose of enabling the contractors to purchase cheaper the stone ballast there." As a matter of fact, the contractors purchased at a cheaper price stone not requiring removal than the stone referred to. (See affidavit of E. H. Gaynor.)

With regard to the insinuation that the object of having rock taken from certain wing dams in the Savannah River that the Atlantic Contracting Company might obtain stone therefrom, such statement could only be made in ignorance of the tidal conditions of the Savannah River, the facts being that work on those dams is necessary for the protection of the tidal prism of the Savannah Harbor, and that if any rock were taken from those dams the work done there would cost any contractor at least what the rock obtained by him in any other way would cost, and perhaps would cost him more.

(1) It is charged that I made an improper use of funds received from a man named Hirt. As stated in my testimony, this matter arose under the following circumstances; Mr. Hirt had the use of the snag boat to try to raise his sunken steamer, the Santee. He deposited money for that purpose. The boat was dropped from the government rolls and taken up on his private payroll, one copy of which was sent him as a voucher. The boat returned to government work, but the money deposited by Hirt was expended before she was fully equipped for such work again, and as he had the diving outfit I estimated that as a matter of equity the boat should go on his rolls again for the amount of \$132.10, less a small sum of some \$11.00 paid out by me personally. After some correspondence, Mr. Hirt sent a check for the money, and as the boat was not then working on the Ocmulgee River I tried to convert his money into government funds for that stream, but was unable to do so, so I ordered my chief clerk to hold the money so that when the boat went out again she could be dropped from the government rolls

and taken up on Mr. Hirt's private rolls until the money was exhausted.

In this connection, I may state that I find an error in my statement before the Board. I there said that as I recollect it Mr. Sterly told me that he had used some of the money in going to Patchogue in the summer of 1896. The money was not received until December, 1896. I remember distinctly that Mr. Sterly did speak to me about putting himself on the rolls and thus taking up the money, as he had done some work in connection with the Hirt affair, for which he thought he was entitled to extra compensation, but I told him this could not be done, but to hold the money so that it might be expended for Mr. Hirt's account at the proper time, and the vouchers sent to him as before. In the numberless details of my work incident to my hurried departure, this matter escaped my memory when I turned over my district, though I may say at that time I had such confidence in Mr. Sterly that even if I had remembered it I doubt if I would have done more than have instructed him to bring the matter to my successor's attention.

(m) It has been insinuated that I have had improper business relations with the contractors. In the course of my examination I was asked to explain several personal communications which my private papers in the possession of the Board indicated I had had at various times with Captain Greene and others. As those transactions occurred for the most part many years ago and had in a large measure passed from my mind, it was difficult for me to remember clearly the details and circumstances in each case, and this difficulty was enhanced by the fact that I had no access to my papers either before or during the examination, but was compelled to answer the questions entirely from memory. Since then I have been permitted to look at my records and have refreshed my memory, and the following statement will explain as nearly as I can recollect the nature of the relations existing between myself and these parties: On April 15, 1886, my brother borrowed some money from Captain Greene, its repayment being assured by me. Captain Greene had no interest then in any works under my charge. The entire sum was repaid January 4, 1888, with interest at six per cent. I have not now and never have had business relations with any contractor doing any work under my direction.

(n) It has been alleged and charged that I have sometimes absented myself from my station without leave: I

frankly admit that this charge is technically true. During short intervals I have been absent from my post without leave, but never secretly and never, so far as I remember, without making it known either to the Chief of Engineers personally or to some one in his office at Washington, and I desire to state further to the Board that my absences were never clandestine, were never intended to deceive and never interfered with the proper conduct of my duties. During these absences I kept in close telegraphic communication with my office, paying the expenses of these telegrams myself, and transacting all of my official business as thoroughly as if present. I never left my station when anything of importance was on hand, was never neglectful of any duty, and indeed I can truthfully say that I never for one moment believed that in taking those few days without permission I was doing anything to the detriment of the service or of the government.

(c) Underlying all the charges and allegations and running through this prosecution, is an insinuation that there has been collusion between the Atlantic Contracting Company and myself, whereby as compensation for permitting this Company to defraud the government I have received a money consideration. Because of this insinuation, my private papers have been dragged before this Board and my private transactions with my father-in-law Mr. Westcott have been pried into and indeed I may say every act of my life for the past thirteen years has been laid bare. In view of the testimony I might well take the position that the charge that by any act of mine the contractors were enabled to make thousands of dollars at the expense of the United States, having failed, I do not conceive that I am called upon to explain my private and personal business affairs or those of others entrusted to my care, and especially is this true when the records show that there is not the remotest ground for believing that there has been any improper relation existing between myself and the contractors. Yet, as this Board have deemed it best in their wisdom—(and right here let me say that I have no objection to their course)—to investigate this insinuation, I have frankly placed at their disposal for their private examination my private papers and the papers of others for whom I was and am still a confidential agent. I have not hesitated to give to the Board every detail of my private life so far as I could remember the same and so far as I am able, and I will now solemnly

declare that I have never received directly or indirectly from any member of any firm or corporation or from any individual doing work or interested in work done under my direction either pecuniary or other benefits of any kind whatsoever. My relations with several of the contractors who have done work under my charge have been friendly, and I have spoken and written to them personally concerning various matters, yet I am not under any obligation to any one of them and never have been, other than such social obligations as may properly exist between honorable gentlemen and friends.

Like many other men not actively engaged in business and with little knowledge of affairs, I kept my private accounts loosely and in a manner perhaps almost unintelligible to any but myself, but as these matters were purely personal to my father-in-law and myself, and were never intended for the public eye, even in the light of this investigation I am not convinced that there was any necessity for a different system. With regard to the sums of money which I have had at my disposal, I have stated to the Board the source from which they were received, and Mr. Westcott's letter confirms that statement. As to Mr. Westcott's private matters, I have but little to say. It would not be becoming in me and I do not believe that the Board would desire that I should undertake, even if I had the information, to give to the public Mr. Westcott's affairs. I have stated to the Board that the moneys which I have invested and expended during the past few years belonged to him and that to him alone was I accountable for the disposition thereof. Mr. Westcott has substantiated this statement of mine, and there is no conceivable view upon which investigation can be pushed beyond this point. I apprehend that the Board will not consider that an exposition of my expenditures will elucidate any transaction which it may be insinuated I have had with the contractors. If I had denied that I had had considerable sums of money at my disposal, proof that I had expended large amounts might be introduced to show the falsity of my statements, but I admit the possession of considerable funds and have shown conclusively the source whence they were received, so it matters not how I have expended the same. I have submitted to the Board, in corroboration of my averment, the several powers of attorney given at various times to me by Mr. Westcott, authorizing me to transact business, and the accounts before the Board also corroborate this statement

in every respect. An examination of these powers will indicate to the Board the close personal relations which existed between us and the peculiar and touching confidence which this old gentleman reposed in the husband of his deceased daughter. Although I have been able to produce only that part of one of these trust accounts which stands in my name, I will call particular attention to the letter of those gentlemen which states, that the transactions shown on the very account as well as all other transactions I ever had with them, either as attorney or personally, were actually for Mr. Westcott and on his account. (Letter of Reed & Flagg.) I know not whether this Board know Mr. Westcott or whether they have informed themselves as to his character, his means and his personal standing, but if they have not and desire such information, I beg to refer them to Mr. Cornelius Vanderbilt, Mr. Chauncey M. Depew, Mr. Samuel Sloan, and others.

In conclusion, I desire to remind the Board that the work which has been subjected to the criticism of my successor and his subordinates represents the labor, the hopes and the ambition of thirteen of the best years of my life. I could not but feel a natural pride in the success which my judgment instructed me had been attained as it developed to completion an estimate in which I had been constantly reinforced by the kindly expressions of my Chief and my brother engineers, and what seemed to be the enthusiastic appreciation of the people of Savannah. From time to time and on every hand the results attained in the deepening of the river have met with the most cordial recognition by the people in whose commercial interests the work was projected. Not only from the lips of the most prominent citizens, but from their official representatives and from the commercial bodies which are in closest touch with their business welfare, this recognition has been pronounced and unqualified. I could not learn without concern from the testimony of my successor that my management of this undertaking had received the condemnation of prominent citizens of Savannah, a statement which he has since been forced to limit to a single citizen who, in his opinion, is prominent enough to voice the sentiment of the entire community in which the work has been done. I have exhausted every effort to have him acquaint me with the name of this person, going to the extent of requesting the senior officer of this Board to instruct him to disclose his name, and yet, notwithstanding he has been authorized by that officer to grant my request, he still declines to do so, and so this investigation closes and it has been

recorded that for the first time in the history of the Engineer Corps, a charge is made affecting the honor of a brother officer based on the statement of a man whose name even is kept secret. With this I contrast the reports of the Cotton Exchange of Savannah and the Board of Trade, bodies including in their membership all of the prominent and representative merchants of that city (appended).

Finally, it is conceded that in the midst of the anxiety incident to the great work with which I have been connected, striving on the one hand to justify the government in the liberal appropriations which it has made, and on the other, to urge to a speedy and permanent fulfillment the undertaking which so nearly concerns the commercial future of Savannah, I may have left to others too many of the details, the personal administration of which would only have delayed and obstructed me in the greater and more important features of the enterprise. But it is inconceivable by any candid mind that with my aims and hopes and ambitions I could condescend to the petty basenesses which are alleged against me. Surely, I can hold with assurance against such assaults the record of an honorable life and faithful service!

Thanking the Board for their attention, it is with all confidence in the justice of my cause, that I commit my honor to their hands.

O M CARTER

Capt. Corps of Engr U S A

(Endorsed) Office, Chief of Engineers War Department,
Nov. 13, 1897 22530/70

APPENDICES TO CAPT. CARTER'S FINAL STATEMENT, OCT. 23, 1897.

AFFIDAVITS, ETC.

Affidavits referred to in the stipulation of Counsel of Dec. 20, 1902. Wyman Vol. 9 p 4495.

Under the following clause:—

“It appearing from the report of the Board of Inquiry that there were certain affidavits tendered to the Board of Inquiry by Oberlin M. Carter, which are not copied into the Stenographer's report of the testimony of witnesses (not under oath) before the board, and the present counsel of the parties not now knowing what those affidavits are or where they are, it is agreed that if they can be produced and identified that they shall be considered as part of the Board

of Inquiry record on the same footing as the unsworn statements of witnesses before the board as provided in clause (1), with the further statement that the Board of Inquiry report states, that they were typewritten affidavits closely identical in phraseology and from persons who were accessible, and should have appeared before the board for cross-examination."

State of Georgia }
County of Chatham. } ss.

Personally appeared E. Bransfield, who being duly sworn, deposes and swears, that he is a mat builder and being in the employ of The Atlantic Contracting Company he built mats during 1896 & 1897 for said company at Foot Point S C, Rosedew S. C—Gascoigne Bluffs D. C. and has been building mats for said company since 1893 That these mats so built by him were for Savannah Harbor Improvement work and were built as follows:

Grillages. The grillages were made of good poles as straight as could be had, averaging 4 inches in diameter laid from 4 to 6 feet apart between centres, both lengthwise and crosswise, lapping 4 to 5 feet and fastened together by a number of wrappings No. 3 wire.

Fascines. The fascines were all made as follows: The brush was best to be had. Some of it was very heavy like black-jack and some was light like myrtle. Black-jack and water-oak weigh three times as much as some other kinds of brush. It was as straight as could be got and was laid carefully lapping joints into the fascine horses. When enough brush was in it was choked as tightly as could be by a choker with two levers connected by strong rope and chain and worked by two men to a diameter of not less than 9 inches and firmly tied at intervals of two feet. In choking, if it was found that too little brush had been put in to make 9 inches

when properly choked, the fascine was not used. If too much brush had been put in, the fascines went and the Government had the benefit of the increase.

Mats. All mats were built as follows; and laid on top of one another. They were built on gin barges. The first layer of poles of the grillages was laid crosswise of the gin poles and the second layer crosswise to the first and wired together as stated. The fascines were shoved in close on top of this grillage, making a solid, close layer of them. Upon this layer a second grillage was placed, hauled down, and tied thoroughly to the first one with No. 8 wire at all crossings of the grillage poles. On top of this grillage a second mat was built. This was done as follows: On top of the first mat another close layer of fascines was put in crosswise to the first one, and instead of the grillage poles a quarter to a half more fascines were put into all of the middle mats. On top of that layer of fascines another grillage was put which was hauled down and tied with wire both to the grillage below and to the bottom grillage, thus making two mats. This way was continued for the entire number of mats built on top of each other, each mat being wired to the one below it and to the bottom one, making the whole thing solid.

E BRANSFIELD

Sworn to and subscribed before me this 19th day of October, 1897.

Labor handling fascines and constructing mat on gin barge	312.50
Labor making, hauling, cutting brush, including cost of brush 4083.33 square yards of fascines 9" in diameter at 50 cents per square yard.....	2041.66
Labor cutting, hauling, including the cost of binders 550 at 20 cents.....	210.00

State of New York, }
City and County of New York. } ss.

Personally appeared R. S. Burnett, Civil Engineer, who being duly sworn deposes and says: That he has had a long experience in Harbor and River work where mats have been used constructed of brush fascines. Deponent has been in the mat camps of the Atlantic Contracting Company at various times since 1893 and has seen their men constructing fascines in choking racks, making the fascines compact with twisted levers and properly tying the same. In 1891 deponent made brush mats under the direction of Gen. Q. A. Gilmore for cross tides dam in Savannah Harbor. Those mats were constructed of brush fascines, the brush being as straight as could be obtained and choked in the same way as they were choked by the Atlantic Contracting Company but not so compactly choked as theirs. Deponent has constructed brush mats on the Kentucky River under Major Post and Major Lockwood. Those mats were not so well constructed as those he has seen in Savannah Harbor. Deponent is familiar with the specifications for improving Savannah Harbor. He has never heard an inspector, Assistant Engineer or any other employe of the government say that the fascines, mats or any of the contractors' work was done otherwise than in accordance with the specifications. He further states that while engaged on the construction of the mining casemate at Fort Pulaski in 1895 he went with Mr. Cooper, the United States Inspector on the Harbor work to see a large multiple mat sunk on the line of the Cockspur Island training wall,

Remarking that the mat was put together strongly, Mr. Cooper said that the contractor was obliged to build the mats strong and compact in order to get them in the work, the water being rough. Deponent heard said Mr. Cooper say that Florida rock was better for the work there than granite.

R. S. BURNETT,
C. E.

Sworn to and subscribed to before me this 20th day of October, 1897.

CHARLES PLATNER,
Notary Public, N. Y. Co.

Commonwealth of Massachusetts, }
Suffolk, ss. Clerk's Office of }
Superior Court.

I, Jos. A. Willard of Boston, in said County, duly elected, qualified and sworn as clerk of the Superior Court, for and within said County and Commonwealth, dwelling in Boston in said County, said Court being a Court of record with a seal which is hereto affixed, the records and seal of which Court I have the custody, do herein and hereby, in the performance of my duty as said Clerk, certify and attest that Thomas J. Kenney, before whom the annexed affidavit proof or acknowledgment was taken and subscribed, is a Notary Public for, within, and including the whole of said Commonwealth, and has authority to execute and take affidavits, proofs and acknowledgments in all the Counties in said Commonwealth, duly appointed, commissioned, qualified, sworn and authorized by the laws of said Commonwealth to act as such; and also duly authorized by the laws of said Commonwealth to take affidavits and certify proofs of acknowledgments of deeds of conveyances for lands, tenements, hereditaments, lying and being in said Commonwealth; in any part thereof and to be recorded therein, wherever situated and however bounded, that he was at the time of taking the affidavit, proof or acknowledgment, hereto annexed, such Notary Public that due faith and credit are and ought to be given to his official acts; that I am well acquainted with his signature and handwriting, and I verily believe that the signature to the said affidavit, proof or acknowledgment is genuine, and further, that the annexed instrument is executed and acknowledged according to the laws of said Commonwealth.

Witness my hand and the seal of said Court at Boston, in said County and Commonwealth, this 11th day of October, A. D. 1897.

JOS A. WILLARD,
Clerk.

(Seal)

United States of America,
Commonwealth of Massachusetts, }
County of Suffolk.

James B. Connolly, of Boston, in said County, being duly sworn, deposes and says:

I am twenty-eight years of age. I was employed by Capt. Carter as clerk in the United States Engineer office, Savannah, Ga., from September, 1890, to the Summer (about July 1st) of 1893, and during that time was used almost entirely as an assistant to J. W. O. Sterly, chief clerk, in general office work, and was witness to the strictness of Capt. Carter where the workings of the office were concerned, and became fully imbued with the earnestness of his oft-repeated instructions to Mr. Sterly that in official accounts and other matters there should be no deviation from strict regulations; and that payrolls should exactly represent actual work done and bear only the names of men actually employed,—in fact, be morally as well as legally correct. Mr. Sterly assured Capt. Carter that no irregularities were allowed by him in any way. Mr. Sterly further impressed on deponent the seriousness of these instructions of Capt. Carter's.

JAMES B. CONNOLLY.

On the eleventh day of October, A. D. 1897, personally appeared the above named James B. Connolly, to me well known and known to me to be the individual described in and who executed the foregoing affidavit and thereupon made oath to the truth of the same.

Before me

THOMAS J. KENNY,

(Seal)

*Notary Public within and for the County of
Suffolk and Commonwealth of Massachu-
setts aforesaid.*

State of Georgia, }
County of Chatham. } ss.

Personally appeared C. C. Cole, who, being duly sworn, deposes and swears, That for the last six years he has been in the employ of The Atlantic Contracting Company and has been employed during all that time at the various mattress camps of said company where the mattresses for the Government works were being built, and that he is thoroughly familiar with the construction of said mattresses and the manner in which they were built having frequently himself superintended the building of the same. Deponent further says that all the mattresses built at said camps were built as follows:

Grillages. The grillages were made of good poles as straight as could be had, averaging 4 inches in diameter laid from 4 to 6 feet apart between centres, both lengthwise and crosswise, lapping 4 to 5 feet and fastened together by a number of wrappings of No. 8 wire.

Fascines. The fascines were all made as follows: The brush was the best to be had. Some of it was very heavy, like black-jack, and some was light, like myrtle. Black-jack and water-oak weigh three times as much as some other kinds of brush. It was as straight as could be got and was laid carefully lapping joints into the fascine horses. When enough brush was in it was choked as tightly as could be by a choker with two levers connected by strong rope and chain and worked by two men to a diameter of not less than 9 inches and firmly tied at intervals of two feet. In choking, if it was found that too little brush had been put in to make 9 inches when properly choked, the fascine was not used. If too much brush had been put in, the fascines went and the Government had the benefit of the increase. I was often employed in the woods near the camps as foreman for the Atlantic Contracting Company and it was part of my duties to see that fascines were properly made as above described and to reject or throw aside to be made over again all that did not come up to the proper standard.

Mats. All mats were built as follows: and laid on top of one another. They were built on gin barges. The first layer of poles of the grillages was laid cross-wise of the gin poles and the second layer crosswise to the first and wired together as stated. The fascines were shoved in close on top of this

grillage, making a solid, close layer of them. Upon this layer a second grillage was placed, hauled down, and tied thoroughly to the first one with No. 8 wire at all crossings of the grillage poles. On top of this grillage a second mat was built. This was done as follows: On top of the first mat another close layer of fascines was put in crosswise to the first one, and instead of the grillage poles a quarter to a half more fascines were put into all of the middle mats. On top of that layer of fascines another grillage was put which was hauled down and tied with wire both to the grillage below and to the bottom grillage, thus making two mats. This way was continued for the entire number of mats built on top of each other, each mat being wired to the one below it and to the bottom one, making the whole thing solid.

C. C. COLE,

Sworn to and subscribed before me this 19th day of October, 1897.

W. V. DAVIS,

Notary Public, Chatham County, Georgia.

State of Georgia, }
Chatham County. }

I, Edw. G. Trenholm, Superintendent of the Savannah Board of Trade, do hereby certify the following to be true and correct extracts from the Annual Reports made to said Body by its President in the years mentioned, to-wit:

(1) Extract from the Second Annual Report submitted for the year 1884-85 by President James K. Clarke.

"Concerning the report of the Marine Committee I regret being unable to congratulate you on any very visible improvement to our river or harbor during the past ten years. As from the best information I can obtain our pilots do not claim to have more than 19 feet channel, when in 1872 vessels drawing 18 feet came up to our wharves. * * * I do not pretend to criticise the work as that comes within the province of an engineer, but the improved depth of the channel I regret to say is very discouraging."

(2) Extract from the Fourth Annual Report submitted for the year 1886-87 by President Fred M. Hull.

"We are fortunate in having assigned to our harbor improvements Lieut. O. M. Carter, an officer not alone thoroughly competent, but one who has taken a lively interest in

our city and thoroughly identified himself with our people. Under his direction we have been steadily increasing the depth of water until we have now according to his report 22 feet to the sea at spring tides; and ordinary tides 22 feet from the city to the sea except at Long Island crossing where there is 21."

(3) Extract from the Fifth Annual Report, submitted for the year 1887-88 by President Fred M. Hull.

"The Improvements to our harbor are at a stand still owing to the failure of the River and Harbor bill, and it is of vital importance that the present Congress shall make a liberal appropriation to commence the plan of the engineers—to give us 28 feet to the sea. We have endeavored to keep this matter before the public and to give to our immediate representative in Congress such assistance as he may need, and in this we have been greatly assisted by Lieut. O. M. Carter of the Engineer Corps in charge of the work."

(4) Extract from the Sixth Annual Report, submitted for the year 1888-89 by President John R. Young.

"During the past year work has been resumed on our river improvement. This work has been carried on under a project commenced in 1873 to obtain a depth of 22 feet in the river at mean high tide, and is now practically completed."

(5) Extract from the Eleventh Annual Report, submitted for the year 1893-94 by President D. G. Purse.

"The work of harbor improvement moves steadily forward under the able direction of Capt. O. M. Carter, U. S. Engineer Corps in charge. * * * The depth in the river gives evidence of a steady increase under the combined action of the dredges and the scouring brought about by the jetty system. Very recently a vessel drawing 22 feet 1½ inches is reported to have been towed in from the sea to the city on a single tide."

(6) Extract from the Twelfth Annual Report, submitted for the year 1894-95 by President D. G. Purse.

"The work on our river and harbor continues under the able direction of Capt. O. M. Carter, Corps of Engineers, and more manifest is made each year the effect upon our commerce of the great improvement that has been accomplished by the liberal expenditure made by the government."

(7) Extract from the Thirteenth Annual Report, submitted for the year 1895-6 by President D. G. Purse.

"Your co-operation with the Cotton Exchange in appealing to Congress for an additional appropriation of \$1,000,000

to construct a training wall at Tybee to provide a safe anchorage and to enable Capt. O. M. Carter, Corps of Engineers U. S. A., to complete and make permanent the splendid improvement of our river and harbor he has so ably directed, is likely to be successful.

(8) Extract from the Fourteenth Annual Report, submitted for the year 1896-97 by President D. G. Purse.

"All arrangements are now completed for pressing the new survey already begun, and before the opening of the coming season there is every reason to believe a new chart will, be issued from Washington giving full credit for the change accomplished by the use of the \$3,500,000 appropriated by the Government and the splendid results achieved by Capt. O. M. Carter, Corps Engineer U. S. A., in its expenditure for improvement of our river and harbor.

And in witness of the correctness of the foregoing eight extracts from the Annual Reports I have hereto set my hand and the official seal of the Savannah Board of Trade at Savannah this October 7th, 1897.

EDW. G. TRENHOLM,

(Seal)

Supt. & Secy. Savannah Board of Trade.

State of Georgia, }
Chatham County. }

I, J. P. Merrihew, Superintendent of the Savannah Cotton Exchange, do hereby certify the following to be true and correct extracts from the Annual Reports made to said body by its Presidents in the years mentioned, to-wit:

(1) Extract from the Twentieth Annual Report submitted on November 10th, 1892, by Mr. J. F. Minis, the retiring President of said Exchange, to-wit:

"The National Government has passed an Act to give us twenty-six feet of water from the city to the sea, and for this year's work has appropriated \$318,750.00.

"We consider that the Engineer Department is in most able hands, and the money available for the project in view will be used to the best advantage. We now have a greater draft of water than ever known, as we can take 22 feet on spring tides and 21 on neap tides from the city over the bar."

(2) Extract from the Twenty-first Annual Report submit-

ted on November 9th, 1893, by Mr. Edward Karow, the retiring President of said Exchange, to-wit:

"The work of improvement in our harbor has been steadily carried on under the efficient supervision of Captain O. M. Carter, the able engineer in charge, and ships drawing 22 feet of water can now pass in safety from the city to the sea at mean high tide."

(3) Extract from Twenty-second Annual report submitted on November 8th, 1894, by Mr. W. G. Cann, the retiring President of said Exchange, to-wit:

"We can again congratulate you upon the continued success with which the appropriation for the deepening of the channel of the river has been expended. We are assured that at the present time there is a depth of 24 feet from the city to the sea at mean high water, and there is every reason to believe that the depth hoped for of 26 feet will be an accomplished fact under the existing contract. The ability with which this work has been prosecuted, and the energy shown at all times by Captain O. M. Carter, United States Engineer in charge, in furthering the interests of the City of Savannah in connection with his work, entitles him to the warm praise and gratitude of the people of Savannah."

(4) Extract from the Twenty-third Annual Report submitted on November 7th, 1895, by Mr. Bierne Gordon, the retiring President of said Exchange, to-wit:

"In this connection we may call attention to the deepening of the channel of the Savannah River, which has resulted in securing a depth of 19 feet at mean low water, or 26 feet at mean high water. To Captain O. M. Carter, United States Engineer, is due the credit for this result of his professional skill, and the gratitude of this community for his zeal and energy in furthering the interests of the City of Savannah."

(5) Extract from the Twenty-fourth Annual Report submitted on November 5th, 1896, by Mr. W. W. Williamson, the retiring President of said Exchange, to-wit:

"Vessels drawing over 23 feet have loaded here during the past two months and gone to sea without any impediment. This but proves the thoroughness and efficiency with which the work of deepening the channel has been done under the supervision and direction of Captain O. M. Carter, the Government Engineer."

And in witness of the correction of the foregoing five extracts from the Annual Reports I have hereto set my hand and

the official seal of the Savannah Cotton Exchange, this 8th day of October, 1897.

(Seal)

J. P. MERRIHEW,
Supt.

Commonwealth of Massachusetts, }
Suffolk County. }

Personally appeared Thomas G Connolly who being duly sworn deposes and says:

That from November, 1894, until March, 1896, he was employed by Capt. O. M. Carter, in charge of the United States Engineer Office at Savannah, Ga., as clerk in said office;

That, while acting in his capacity as clerk, he distinctly heard Captain Carter at various times direct Mr. J. W. O. Sterly, his Chief Clerk, to use extreme care in making out the vouchers and to see that the only names entered on the pay-rolls were those of men who had actually worked the number of days and in the capacities stated therein; and

That he heard Mr. Sterly invariably answer that all due precautions were taken and that the army regulations were adhered to in every particular.

I hereby swear that the above statements are true.

THOMAS G. CONNOLLY.

Sworn to and subscribed before me this 7th day of October 1897.

ROBERT F. GRIFFIN
Notary Public.

State of Georgia, }
Chatham County. }

Before me in person appeared Thomas J. Daniels, who being duly sworn deposes and says: 'That he is at present inspector on the Government works in Savannah Harbor; that he has been employed as such for some years and that he is familiar with the coast country of Georgia, and with the methods of making brush fascines and mattresses, and with the specifications under which such have been made at Savannah and Fernandina since 1892. Deponent knows the cost of constructing and sinking mattresses and states that to the best of his knowledge and belief mattresses built in several courses on top of one another, as at Savannah and

Fernandina cannot be put into the work for less than 75 to 85 cents per square yard. Deponent states further that the fascines and mattresses built under Captain Carter's orders in Savannah were built according to the specifications, deponent's statement of August 18th, 1897, to the effect that they were not so built being brought about by being informed that only mattresses constructed according to instructions given since Captain Carter's departure were in accordance with the specifications.

THOMAS J. DANIELS

Sworn to and subscribed before me this 5th day of October, 1897.

W. V. DAVIS

(Seal)

*Notary Public, Chatham County,
Georgia.*

Charleston, S. C., Oct. 8th, 1897.

Capt. O. M. Carter,
United States Army.

Dear Sir:

I have had a great deal of experience in building jetty work on the Atlantic Coast, building mats and sinking them and stone. In my judgment it is cheaper and easier for a contractor to build any number of single mats than to build the same number of mats on top of one another. In sinking them in rough water, if everything goes well, it may be cheaper to sink them in courses than to sink them singly; but the risk of loss is much greater. So taking it all in all I see no special advantage in one method over the other. I consider the actual cost of mats made of brush fascines to the contractor to be about 80 or 90c a square yard in the work. I have had specifications from you for your works and I have been present myself or by my representatives at three lettings. I got all information I wanted perfectly satisfactory and everything at the lettings was perfectly fair. The risk in mat work is greater than in stone work and the profit to a contractor at the prices at Fernandina is less than on stone. Considering the circumstances at the time of the letting the Fernandina prices are very reasonable and no lower bids could have been had.

Very truly yours,

JACOB FRIDAY

State of Georgia, }
Chatham County. }

Personally appeared E. L. Friday, who being duly sworn deposes and says, that he is a member of the firm of Jacob Friday & Sons, who are contractors, and who have done a lot of government work on the Atlantic coast, and deponent knows the difficulties and cost attending the same. Deponent went over the ground at Fernandina carefully in 1896 and got the specifications and looked them over and bid on the work. Deponent knew that Florida rock had been used and naturally expected it to be used again. Deponent is familiar with mattress construction, and was perfectly satisfied to build either grade of mats at the same price, their cost not varying materially. It was just before the time of the election and the people were afraid of free silver so that deponent's firm then did not dare to bid too low. In view of all the circumstances the bids were very reasonable and in deponent's judgment no lower prices could have been obtained then. Great deal of work was to be done in the breakers and the exposure was bad. In sinking mattresses deponent naturally expected, where practicable for any design, to sink as many on top of one another at once as were required, that being in deponent's judgment, the proper way of sinking them.

E. L. FRIDAY.

Sworn to and subscribed before me this 7th. day of October, 1897.

W. V. DAVIS

Notary Public, Chatham County, Georgia.

New York, Oct. 19th, 1897.

Capt. O. M. Carter:—

At your request I desire to state; I am the President of the Atlantic Contracting Co. I have never at any time directly or indirectly given or paid you any money or any valuable thing.

JOHN F GAYNOR

Defts Ex. 91—1/17/05 R. H. W.

State of Georgia }
Chatham County }

Personally appeared J. H. Gaynor, who being duly sworn deposes and says: That he has had charge of fascine and mat construction at various places along the Atlantic Coast for about fourteen years; deponent was in charge of sinking mats in Savannah Harbor, Georgia, during the past four or five years and also in 1897. Deponent further says the fascines were as well built during the past five years as in the beginning years ago and were all built according to the contract. The mats in courses contained more fascines than when made singly, and said mats were properly made and according to the contract. Deponent has frequently been told by Mr. A. S. Cooper, Assistant United States Engineer that the mats were satisfactory and that they were built properly and in accordance with the requirements of the contract.

J. H. GAYNOR

Sworn to and subscribed before me this 19th day of October, 1897.

W. V. DAVIS

(Seal)

Notary Public, Chatham County, Georgia.

STATEMENT OF W. T. GAYNOR.

I am now and for many years past, off and on, have been in the employ of the Atlantic Contracting Company. I had charge of the work at Savannah under contract of 1892 in its early stages when I was taken sick about January, 1893, and I then left the work. I returned to Savannah about February, 1894, and together with my Brother, Edward, supervised for the Atlantic Contracting Company the work at Savannah, until about November, 1894, when I went to Fernandina, and took charge of the work there under contract of Anson M. Bangs, and I carried this work to completion. I also took charge of the work for the Atlantic Contracting Company at Fernandina, under the contract of 1896. I am thoroughly familiar with all the details of the work done under my supervision, and I have a fairly thorough knowledge of the work at Savannah and Fernandina since 1888.

I have had an extensive experience in the building of fascines and mats, and I have an accurate personal knowledge of the fascines and mats which were constructed at Savannah and Fernandina during my connection with said works.

There has been no change whatsoever in the construction or the character of the fascines and no material change in the construction of the mats used in the works from the time I first became conversant with them up to the present time, except that with a few exceptions, prior to 1893, the mats were built and sunk in single courses, while since then, for the most part, they have been built and sunk in several courses. In building mats in several courses the bottom grillages of the intermediate courses were sometimes left off, and in lieu thereof about 25% extra fascines were put in. This was done at the instance of the Engineer Officer, and made no material difference to us in cost. The fascines built by me were thoroughly made out of the best brush obtainable, were well trimmed and choked and were well up to the specifications. So also were the mats. The work was all well done and accepted by the inspectors and assistant engineer in charge as satisfactory. The fascines built at Savannah under contract of 1892 were exactly the same as those built under Savannah contract of 1896 and Fernandina contract of October, 1894 and 1896, and the latter were just as good as the former.

The average diameter of the fascines after thoroughly choking was twelve inches, none less than nine inches.

To be sure of always having nine inches we had to put in usually more than enough brush, but when it was once in we left it there.

It is well established by experience that fascines built of green brush no matter how well they be choked if exposed to the weather for several days will shrink and the choker strings become loose. I saw the fascines at Fernandina which had been rechoked by Capt. Gillette's order. These fascines were taken from a large pile and had laid there at least three weeks, during which time they had been exposed to the weather, some of which would have been rejected by us when we went to build the mat.

I was informed that they were rechoked under extra heavy pressure, often breaking $3/8$ inch chains, to between seven and eight inches. I have examined these fascines since and it is safe to say that they can be rechoked again to a considerable smaller diameter. If in the course of constructing mats fascines were found imperfectly choked or not up to the proper average, they were not put in the mats by us. There was every reason why I should require that the fascines should be properly made, as we paid for them to be twelve inches after choking, and furthermore we knew that if improperly made it would seriously affect the strength of the mattresses and we would run great risk in launching and sinking them. Relatively much greater strength is required of mattresses in several courses than in one of a single course. The strain on the former in getting off the barges and in sinking is very heavy. At Capt. Gillette's request I built several mattresses according to his ideas, but not according to the specifications. The fascines were made from the brush fascines we had on hand for several weeks. The fascines were fifty feet long; all branches and leaves were taken off and the fascines were choked to a diameter of from ten to twelve inches. I had never seen before a fascine of that kind used in harbor work. Assuming that the brush and poles suitable for this purpose could be had in the locality I had just as soon build Capt. Gillette's fascines as the other. There is no material difference in the cost of construction. Capt. Gillette undertook to make a comparison between a four course mat constructed with the utmost care out of fascines made according to his instructions and a six course mat built in the usual way. My mat was

first made and lay in the neighborhood of ten days exposed to the weather awaiting the arrival of his. After his arrival they both remained exposed for about three days until Capt. Gillette came to make inspection. When he came I called attention to the fact that although the fascines in his mats were made from brush partly dried, which had been thoroughly rechoked, yet by the effect of the weather the brush had still further shrunk and the sewing wires become loose to the extent of about three inches.

After the difficulty experienced at Savannah in launching the large mats with the process of which I had become familiar I began to think about the matter and ultimately I invented a design which I had patented, and this design is now used in launching mats both at Savannah and Fernandina.

My attention has been called to the Empire Construction Company, the stock book of which, I am informed, was found among Capt. Carter's papers. This was a close corporation and all the stock owned by three people, namely: Jno. F. Gaynor, Capt. B. D. Greene and A. M. Newton. A few shares stood in the name of others for the purpose of organization. I was the treasurer of the company and had possession of all the books. While I have no definite recollection on the subject I must have left the stock book at Capt. Carter's office inadvertently. At any rate, Capt. Carter had no interest whatsoever in the company, directly or indirectly.

W. T. GAYNOR

State of New York
City and County of New York } ss

Personally appeared before me W. T. Gaynor, who being duly sworn deposes and says that the foregoing statement is true.

Sworn to and subscribed to before me on this 20th day of October, 1897.

ROBT. LAWRENCE
Notary Public, Kings Co.

Cert. filed in N. Y. Co.

STATEMENT OF EDWARD H. GAYNOR.

I am now and for many years past have been off and on in the employ of the Atlantic Contracting Company. I have also myself taken Government contract work. I had the contract of 1892 for the work at Fernandina, and the work was carried to completion under my personal supervision, and from June, 1893, I superintended for the Atlantic Contracting Company the work done at Savannah under their contract of 1892, and I also had charge of the work of construction for said Company under the contract of 1896. I am thoroughly familiar with these works in every department thereof and I have also a thorough personal acquaintance with all harbor works constructed at Savannah since 1881 and at Fernandina since 1886. I have actual personal knowledge of the character of the fascines and mats which were actually used in the Government works at Savannah since 1881, and at Cumberland Sound since 1885. From 1881 up to the present time, there has been no difference in the construction or character of fascines and mats (commonly known as brush mattresses) except that with a few exceptions prior to 1893 the mats were built and sunk in single courses, since which date they have for the most part been built in several courses. The reason of this change in construction is this: In 1893 we were building and sinking single course mats on Lower Flats training wall at Savannah. The mats were weighted with stone and sunk. In the progress of the work it was found that owing to the soft bottom of the river the mats embedded themselves deeply in the mud, and the desired results were not being obtained. Captain Carter was very much exercised over the situation, for the reason that it had been self-evident that unless this sinking in the mud could be stopped the estimate for the work would be exhausted long before the work was completed, and requested me to experiment with building the mattresses in several courses and sinking in bulk, thus getting rid of the heavy weight of stone. This at first I did not care to do, because we were satisfied with the old method; but after talking the matter over with Captain Carter and Mr. Cooper, I agreed to make the experiment, it being always my policy, as far as possible, to meet the views of the Engineer in charge.

I first built tanks in the side of the barges connected them with six inch valves, through the sides of the barges, and

connected the valves by rods running athwartship through the barges. These rods had handles by means of which the valves were opened and closed. Upon the barges the mats were built in courses on ways or gins. The barges were then towed to the sinking ground; the valves opened and the tanks filled with water by means of which the barge was careened. It was hoped that by this process the mats could be launched from the barges with the assistance of a pull from the tugs; but in this we were disappointed and it took us about four or five days in getting off the first mat. The chief difficulty in this method was that after the tanks were filled to get the incline and the mat failed to come off the barge, was nearly submerged one side and could be handled with difficulty, and as the water could not be let out, there was serious risk of losing the barge. I was somewhat disgusted and had not it been for my desire to exhaust every means to accomplish what the Engineer officer desired, I would have abandoned further experiment. It was then suggested that a bulkhead about 3 1/2 feet high be built the whole length of one side of the barge, and the gins laid from the top of bulkhead to opposite side of barge, thus forming a permanent incline and the mats built on this incline, and then by means of pulls and blows from the tug the mats were disengaged from the barge. This plan was more successful than the first, but was still attended with difficulties and was by no means satisfactory to me, as we often lost days in our efforts to get the mats launched.

But as the work from the beginning of the use of this process began to show up well, and there was no material difference that I could see in cost, and in view of the wish of the Engineer officer, I was willing to continue the experiment as long as I could do so without any special loss to my employers, but under no circumstances would I have bound myself to continue the use of this method, for the reason that the whole thing was experimental. I had no way of knowing what the ultimate result might be.

Mr. Cooper who seemed to take a great interest in these experiments and who I understand now takes some credit to himself for their success, stated to me that it was a lucky thing that we changed to these large mats, for if we had not done so the Government would not have had near enough money to complete the work.

With respect to the construction of the mats: the fascines were made and choked according to the specifications, but

we made them on top of one another, and when the Engineer made us leave out a grillage he made us put in about 25% extra fascines for it. The work was carefully and well done and was acceptable to the inspectors and assistant engineers and they used to tell us so. The fascines built in Savananh under the contract of 1892, were exactly the same as those built under the Savannah contracts of 1896, and the Cumberland Sound contracts of 1892, 1894 and 1896, and those built under that contract were equally as good as those built under previous contracts. They were well made, trimmed of rough limbs and choked and averaged about 12 inches in diameter and there were none less than 9 inches. Everybody knows that in the construction of fascines, if a fascine built of green brush and thoroughly choked is left exposed to the weather for several weeks, the brush will shrink from 25% to 50%, and consequently the choke rope will slack. With respect to two fascines at Savannah which were rechoked by Captain Gillette, they were taken from a very large pile of bundles nearly all of which had been lying exposed to the weather about six weeks and of course the two bundles were not a fair test of the whole pile. I was not present when the rechoking was done, but saw the fascines the next day and was informed that they showed 7 and 8 inches in diameter, respectively, which showing I considered excellent considering the time of exposure and the time of year.

In constructing the mats, if a fascine was found to be loose or under 9 inches, it was not allowed to go in. There was no object for the contractor to have had the fascines less than 9 inches, as they were paid for at 12 inches so as to assure 9 inches always. Unless the fascines were properly choked and built when put in the mattresses the later would have been in unsatisfactory shape for launching and sinking, especially on an ocean bar, and hence Mr. Cooper has said to me repeatedly that a mat that was good enough for the contractors was good enough for the Government,—because the contractors could not afford to build them below the contract, or they might lose them.

The reason why the fascines were left so long exposed was because the work had practically been stopped because of the position taken by Captain Gillette in regard to the work. It may also be said that sometime after fascines have been built, the weather becomes bad and the work has to stop.

I saw the fascines and mats which were built under the

instructions of Captain Gillette. The difference between these and the old mats was simply in the trimming of the brush.

All twigs and leaves were removed and no crooked brush was used. There was no more material in his fascine than in mine, and the fascines were no more tightly choked. The poles though were rigidly straight. There would be no material difference in the cost of building the Gillette fascines and mats and the old style,—assuming that it was possible to obtain in the locality absolutely straight brush and poles. This, however, is an impossibility. I never saw a fascine made like Captain Gillette used in this jetty work on the Atlantic coast, and I have used them on the Delaware River, at Georgetown, for the officers there, and at St. Helena for Col. Harris, and have seen them at Mayport.

My attention has been directed to transactions for the purchase of stone from the City of Savannah. As to this, I will say that we have frequently bought stone from the City. In the transaction referred to we paid \$500 for certain stone at Savannah Quarantine Station part of which was beyond the harbor line. Six weeks afterwards I purchased for about \$200 twice as much stone lying inside the harbor line and which the City did not need removed, which was also much easier to get at. I have purchased stone since this from the City at relatively the same figures. As to stone from Mr. Brown: We culled out what was below the specifications and did not load it or send it down the river to have it rejected there. We threw it off the cars or left it on them. We also got permission to dump it alongside the Government works, but I don't remember having used this permission. The most of it, as I remember, was put on the wharf or near it.

Personally appeared before me Edward H. Gaynor, who being duly sworn deposes and says that the foregoing statement is true.

EDWARD H. GAYNOR

Sworn to and subscribed to before me on this 20th day of October, 1897.

ROBT. LAWRENCE
Notary Public, Kings Co.

Cert. filed in N. Y. Co. 1

State of Georgia. }
Chatham County. }

Before me personally appeared H. M. Garmany, who being duly sworn deposes and says: That he is a resident of Chatham County, Georgia; that he has been employed as recorder of dumping of dredged material in Savannah Harbor; that as such he has dumped such material in the Venus Point Dumping Ground; that no such deposits were ever made in the vicinity of the steamboat channel, and that the orders given to him by the United States Engineers' Office expressly prohibited any material being dumped where it might interfere with the navigation of said channel.

H. M. GARMANY

Sworn to and subscribed before me this 7 day of October, 1897.

W. V. DAVIS

(Seal)

Notary Public, Chatham Co. Ga.

State of New York. }
County of Onondaga. } ss.

Personally appeared before me Thomas F. Gaynor, who, being duly sworn, deposes and says, that he has had a large experience building fascines and mats; he has seen them build at various places on the Atlantic Coast and the ones which he has seen built at Fernandina are as good as any he has ever seen built anywhere else. For some years past he has been in the employ of the Atlantic Contracting Company and has built Brush Fascines and mats for said Company. In 1897 he had charge of building them at Fernandina. All of the mats built by him were made as follows:

Grillages: The Grillages were made of good poles as straight as could be had, averaging four inches in diameter, laid from 4 to 6 foot apart between centres, both lengthwise and crosswise, lapping 4 to 5 feet and fastened together by a number of wrappings of No. 8 Wire.

Fascines: The fascines were all made as follows: The brush was the best to be had. Some of it was very heavy like Black-jack and some of it light like myrtle. Black-jack and Water Oak weigh about three times as much as some other kinds of brush. It was as straight as could be got and was laid carefully lapping joints into the fascine horses. When

enough brush was in it was choked as tightly as could be by a choker with two levers connected by a strong rope and chain, and choked by two men to a diameter of not less than 9 inches and firmly tied at intervals of two feet. In choking, if it was found that too little brush had been put in to make 9 inches when properly choked, the fascine was not used. If too much brush had been put in, the fascines went and the Government had the benefit of the increase.

Mats: All mats were built as follows: and laid on top of one another. They were built on gin barges. The first layer of poles of the grillages was laid crosswise of the gin poles and the second layer crosswise to the first and wired together as stated. The fascines were shoved in close on top of this grillage, making a solid, close layer of them. Upon this layer a second grillage was placed, hauled down, and tied thoroughly to the first one with No. 8 wire at all crossings of the grillage poles. On top of this grillage a second mat was built. This was done as follows: On top of the first mat another close layer of fascines was put in crosswise to the first one, and instead of the grillage poles a quarter to a half more fascines were put into all of the middle mats. On top of that layer of fascines another grillage was put which was hauled down and tied with wire both to the grillage below and to the bottom grillage, thus making two mats. This way was continued for the entire number of mats built on top of each other, each mat being wired to the one below it and to the bottom one, making the whole thing solid.

THOMAS F. GAYNOR,

Sworn to and subscribed before me this 21st day of October, 1897.

PATRICK H. KEOHANE,

Notary Public, Onondaga County, New York.

State of Georgia.

Personally appeared George L. Gammont, who being duly sworn deposes and says that, for many years he has been employed on various government work in the Savannah District; that during the latter part of the year 1896 and the first half of the year 1897 he was Master of the United States Steam Launch "Angler" on which Captain Carter made inspections of the government work in Savannah Harbor, Georgia, Fernandina Harbor, Fla., and elsewhere; that it was Captain Carter's habit to call his assistants on board the "Angler" and question them concerning the work, etc.;

that he, the deponent, heard many of these conversations and understood them; that it was Captain Carter's habit to ask whether the work was being properly done according to the specifications, whether the contractors were being held up to their work properly, etc.; that the deponent heard Captain Carter ask Mr. A. S. Cooper many times within the last year concerning the work in Savannah Harbor; that Mr. Cooper replied that the contractors were doing the work properly according to the specifications; that the mats really were better than required by the specifications, because in the Tybee Roads any mat good enough for the contractor was good enough for the United States. At Fernandina deponent heard Captain Carter within the last year question Mr. Marion Twiggs and Mr. John M. Hall many times and heard both of them say the mats were being built properly according to the specifications. The deponent further heard Captain Carter order Mr. Twiggs to examine the work often and heard him ask Mr. Twiggs how the work was standing, and heard Mr. Twiggs say the mats were standing up all right without any change and that the sand had filled up to their tops, that the work was in good shape, etc. Deponent has been on the work often and has always heard from all the assistants that everything was done well and was a success, and has never heard any intimation that any inspector or assistant thought otherwise.

GEO. E. L. GAMMONT,

Sworn to and subscribed before me this 6th day of October, 1897.

State of Georgia, }
Chatham County. }

Personally appeared R. S. Burnett, who being duly sworn deposes and says: That George E. L. Gammont, whose signature appears to the foregoing affidavit signed the same in the presence of deponent, and deponent further says said signature is genuine, and that at the time said affidavit was signed that it was impracticable to secure the services of a Notary.

R. S. BURNETT.

Sworn to and subscribed before me this 7th day of October, 1897.

(Seal) W. V. DAVIS,
Notary Public, Chatham Co., Ga.

State of North Carolina, }
County of Brunswick. }

Personally appeared John L. Grim, who being duly sworn deposes and says, that he is a practical and experienced contractor; that in 1896 he bid on the Savannah and Fernandina work; that deponent has had very extensive experience in work of that kind and knows what things cost; that mats built like they have been built at Savannah and Fernandina of brush fascines and in layers of mats on top of one another will cost a contractor between 80 and 95 cents per yard in the work, depending upon the locality and other causes, and that the stone to be used there under the specifications upon which deponent's bid was made will cost from about \$3.00 to \$4.50 per yard, depending, as above, upon locality and other causes. Captain Carter gave deponent the specifications for both works in 1896 and explained them to deponent very fully. Deponent was told that only the third kind of mat would be used, except for a very few of the others, not enough to affect cost, and that it would be built and sunk as before, if the contractors could do it, several mats on top of one another at once. The lowest grade rock was understood to be Florida rock. Deponent bid on both works in 1896 and the prices in his bids are low, considering the times and the circumstances. No lower prices could be had at that time, so far as deponent knows. Deponent knows the sort of fascines and mats used in the Savannah and Fernandina work, and in deponent's judgment they are as good as used anywhere else, and better than most. All the bidders fully understood the specifications, so much so that deponent would not have lowered his prices any if all the explanations given orally by Captain Carter had been written out in the specifications. Deponent further says that in his opinion, in case of a change in the relative quantities of rock and mats to be used, it would be to the interest of the contractors to have the rock work increased and the mat work diminished.

JOHN L. GRIM,

Sworn to and subscribed before me at Southport, County of Brunswick, N. C., this 6th day of October, 1897.

WM. WEEKS,

Notary Public.

(Seal)

Personally appeared I. H. Hathaway, who being duly sworn deposes and says, that he is a contractor and has had a long

experience building jetties on the Atlantic Coast. He has built brush fascines and mats, and knows what they cost. Deponent is familiar with the kind of mats built at Mayport and Fernandina, and had the contract at Mayport from 1892 to 1895. The fascines and mats built at Fernandina are just like those made in Mayport. They were made on top of each other, which, in the long run, does not change the cost to the contractor, except to increase it a little. The same kind of jetty work at Fernandina will cost more than at Mayport by about 30%. Deponent knows the present prices at Fernandina, and knows the kind of work done. The prices are reasonable.

I. H. HATHAWAY.

Subscribed and sworn to before me at Washington, D. C., the 16th day of October, A. D. 1897.

WILLARD H. MEYERS,
Notary Public.

State of Florida,
County of Nassau.

Before me personally appeared H. H. Linville, President Board of Pilot Commissioners, who being duly sworn deposes and says: That he is a resident of Fernandina, Fla.; that he knows Marion Twiggs, who was Cap't. Carter's assistant on the government work at Fernandina; that he has often spoke with said Twiggs concerning the work under Cap't. Carter's charge, and that said Twiggs has stated to deponent that the government work was being well and properly done,

according to the contract, and that the jetty was doing its work and standing well.

H. H. LINVILLE,
President Board Pilot Com.

Sworn to and subscribed before me this 18 day of October, 1897.

(Seal) GEO. E. WOLFF,
Clerk Circuit Court, Nassau County, Fla.

State of Georgia,
Chatham County.

Before me in person appeared Thomas H. Laird, junior, who being duly sworn, deposes and says: That he is at present Master and Pilot of steam vessels; that he has been employed at Savannah Harbor since 1878 at intervals; has been in nearly every mattress camp since then; is thoroughly familiar with the country, the timber and brush available, the method of making fascines and mattresses and sinking them, and knows the difficulties and cost attending the same. Deponent is familiar with the fascines and mattresses and the specifications under which they were built in 1892 and 1896. Deponent states that to the best of his knowledge and belief mattresses as actually built in Savannah Harbor under those specifications, in courses on top of one another, cannot be put in the work for less than 80 cents a square yard, except at a loss; in the river or at any place, except on an ocean bar, it is cheaper to a contractor to put in the mattresses in single layers than to build them on top of one another and sink them in that way.

THOS. H. LAIRD, JR.

Sworn to and subscribed before me this 4th day of October, 1897.

(Seal) W. V. DAVIS,
Notary Public, Chatham County, Georgia.

State of Georgia,
Chatham County.

Before me in person appeared William F. McCauley, who being duly sworn deposes and says: That he is familiar with the work in Savannah Harbor and in 1892 made a bid for doing the same. Deponent examined the specifications

carefully and had them explained to him by Captain Carter; deponent understood that only the third design of brush mat would be used, those of the other designs, if any, to be very few in number. Low grade stone was to be Florida stone. Deponent knew the kind of fascines and mats used and believes that if it had been known in the beginning that the quantity of mats was to be so largely increased as it was, much higher bids would have been made for them, brush being scarce and the haul great. In deponents judgment it is cheaper and better in the river for a contractor to build the mats one at a time and not on top of each other. The prices bid were very reasonable, and deponent has been on the river ever since and knows that the work has been well done and the results very successful.

W. F. McCAULEY.

Sworn to and subscribed before me this 6th day of October, 1897.

W. V. DAVIS,

(Seal)

Notary Public, Chatham County, Georgia.

State of Georgia,
Chatham County.

Before me personally appeared Thomas H. Laird, junior, who being duly sworn deposes and says: That he was Master of the United States Steam Launch "Angler" when the contract of 1892 in Savannah Harbor was being done; that Captain Carter made inspections of the Government work there and in Fernandina and elsewhere on said launch; that Captain Carter used to call his assistant engineers and inspectors on board the boat and question them about the work and give them orders; that he, deponent, heard many of these conversations and understood them; that deponent heard Captain Carter ask always whether the work was being done properly according to the specifications, and whether the contractors were being watched carefully; and deponent heard Captain Carter ask Mr. A. S. Cooper many times, especially in 1893 and 1894 about the work in Savannah Harbor, and Mr. Cooper answered that the contractors were doing the work according to the specifications. Deponent remembers distinctly that Mr. Cooper said that the contractors were building better mats than required by the specifications, and that he went on to say that any mat good enough for the contractors was good enough for the United States. Deponent has been on the Savannah Harbor for many years and knows

the various Assistants of Captain Carter and has never heard in any manner whatever any intimation that any one of those assistants thought that there was anything wrong with the work. On the contrary in every case every inspector has said that fine work was being done.

THOS. H. LAIRD, JR.

Sworn to and subscribed before me this 7th day of October, 1897.

CHARLES J. WHITE,

(Seal)

Notary Public, Chatham County, Georgia.

State of New York, }
County of New York. } ss.

R. Moore being duly sworn deposes and says that he resides at Mobile, Alabama.

That his business at present is that of a contractor. He has been engaged in such business for more than twenty years.

That a portion of the contracting work done by him during that time has been upon the Gulf and South Atlantic Coast in the building of jetties for the improvement of entrances to harbors.

That he has also investigated carefully the cost of building such jetties in order to enable him to make bids for other work of the same character.

That the construction of such jetties involved the building and use of brush mats.

That he is thoroughly familiar and knows the cost of building such brush mats for the purpose of building jetties.

That he has seen and is familiar with the location of the work on Savannah River and Harbor.

That he is also familiar with the location of the work at Cumberland Sound.

Deponent further says that from his experience and in his judgment, the cost of any kind of mats in the work in either of these locations would be at least sixty cents per square yard and that such cost would be liable to be considerably increased owing to the condition of the weather, and difficulty in obtaining the material; such increase might be from twenty-five to thirty per cent.

R. MOORE.

Sworn to before me this 7th day of October, 1897.

ROBT. LAWRENCE

Notary Public, Kings Co.

Cert. filed in N. Y. Co.

State of New York, }
County of Kings. } ss.

Personally appeared Martin McGuffog, who being duly sworn deposes and says:

That from about September, 1888, to June 30, 1890, he was employed by Captain O. M. Carter, Corps of Engineers, U. S. A., as foreman of parties engaged in removed snags, logs and overhanging trees in the rivers in the Savannah District, having under his charge at different times a large number of men in the aggregate, for whose time he made out pay-rolls, etc.

That, acting, in such capacity, he heard Captain Carter repeatedly order his Chief Clerk, J. W. O. Sterly, to see that the pay-rolls contained only the names of men who actually worked for the time stated, and to see that under no circumstances should any irregularities in vouchers or pay-rolls be permitted, and deponent heard Mr. Sterly assure Captain Carter that no irregularities or departures from the regulations were made, and that everything was correct in every respect.

MARTIN MCGUFFOG

Sworn to and subscribed before me this 7th day of October, 1897.

GEORGE O'CONNOR
Notary Public.

(Seal)

State of Georgia. }
Chatham County. }

Personally appeared J. E. Nicholas, being duly sworn deposes and says: that for the past fifteen years or more he has been in the employ of the Atlantic Contracting Company as foreman and as such he has superintended the building of the mats used by said Company in the government harbor works along the Atlantic coast from Philadelphia to Jacksonville, and that deponent probably has had more practical experience in mat building than any other man in the United States: That deponent is very familiar with the government works in the Savannah harbor and river and along the coast of South Carolina and Florida: That the brush fascines used at Savannah and Fernandina were built and choked as required by the printed specifications, and as

well as those built at any other place along the coast, and were accepted by the engineer officers in the several districts and by various inspectors. Deponent further says that in a place like the Savannah harbor it is cheaper to a contractor to build the mats single with poles underneath and above and fascines between them than to build them in layers. That on an ocean bar the method in layers or courses would become somewhat cheaper on account of the sinking. The fascines were all choked by the regulation choking rope or chain, with two handspikes.

J. E. NICHOLAS

Sworn to and subscribed before me this 9 day of October 1897.

W. V. DAVIS,

City and County of New York } ss.

Roderick G. Ross personally appeared who being duly sworn deposes and says that he has been a contractor for over twenty years.

That during that period he has been extensively engaged in constructing and superintending the construction of brush fascines and mattresses at various places on the South Atlantic Coast under contract with the United States Government.

That from personal inspection and examination, he is thoroughly familiar with the locality and all the conditions existing in relation to the government work at Cumberland Sound.

That he examined the specifications for the work at Cum-

berland Sound, which was to be let in 1894 and made a bid for the doing of the same.

That deponent's bid at that time was for certain reasons made very low.

That in the year 1896 deponent again examined the specifications for the work, at Cumberland Sound and prepared a bid for the work, but on account of the financial condition of the country, did not submit it.

Deponent knows how the brush fascines and mats were to be built at Cumberland Sound under the contract of 1894 and they are alike in all respects to those to be built under the contract let in 1896.

That deponent knows that the construction of the fascines at Cumberland Sound under the contract of 1894, were properly built and like those built by deponent under his contract at Mayport.

The mats at Cumberland Sound were built on top of one another and as well built as those built by deponent at Mayport, but in deponent's judgment each mat cost a little more per yard to the contractors to build in that way than singly as at Mayport.

But the sinking was a little cheaper if the contractor had good luck, so on the whole the cost was about even.

In deponent's judgment it cost the contractor ten to twenty per cent more for mattresses at Cumberland than at Mayport on account of exposure and strong currents and other difficulties.

That deponent fully understood how the mats were to be built and sunk before the bidding at Cumberland Sound in 1896.

Deponent knew also that fourth class rock was to be Florida rock.

That in deponent's judgment, the three designs of mats cost about the same. The brush ones, however, cost something more than the log ones, but deponent was of opinion that the third class mats were the ones intended to be used in the work.

Deponent was upon the occasion of this bid was given full and free information of all facts required by him.

That the prices for the work as finally let at Cumberland Sound are in deponent's judgment reasonable and fair.

RODERICK G ROSS

Sworn to before me this 13 day of October 1897

PHILIP M. BRETT

Notary Public N. Y. Co.

State of Georgia, }
Chatham County. }

Before me personally appeared James C. Rossiter, who being duly sworn deposes and says; that he is a resident of Chatham County, Georgia; that on February 29th., 1896 he was employed as recorder of dumping of dredged material in Savannah Harbor; on that date two scows were deposited in the Venus Point dumping ground; that neither of these was deposited in the vicinity of the steamboat channel between Savannah and Beaufort; that no such deposits were ever made in the vicinity of that channel, and that the orders given to deponent expressly prohibited any material being dumped where it might interfere with the navigation of said channel.

State of New York }
County of Onondaga } ss:

Personally appeared Myron J. Wheeler who being duly sworn deposes and says that he has been building mats for sixteen years at various places along the Atlantic coast. He was foreman in charge of building and making mats at Savannah Harbor between 1892 and 1896 and in charge of making mats at Fernandina in 1896 and 1897. The mats and fascines at Savannah and Fernandina were built according to the specifications. In the winter of 1892 or spring of 1893 the mats in Savannah Harbor were built on top of one another and when built that way to replace a set of grillage poles each mat contained more fascines and cost more than when built singly. Deponent examined thoroughly the mats and fascines made by Mr. Ross under Capt. Black at Mayport. The fascines at Fernandina in 1897 were just like them but each mat course at Fernandina contained more fascines than a single mat did at Mayport for reasons given above. The fascines in 1897 were made according to the specifications and just like all fascines have been made since deponent first saw them built, and the mats were built as well at the end as at the beginning of the work. They were properly made in every respect. Deponent was told further by Mr. Marion Twiggs that the mats and fascines at Fernandina in 1896 and 1897 were made according to the specifications and that they were satisfactory.

Chatham County.)

Before me personally appeared H. H. Bacon, who being duly sworn deposes and says: That he was one of the jurors who tried the case of James B. Brown against the Atlantic Contracting Company, which was tried in the City Court of Savannah at the February Term, 1897, of said Court.

Deponent further saith that Captain Gillette, the United

States Engineer officer now in charge at Savannah, recently approached deponent and endeavored to ascertain from deponent whether Captain O. M. Carter, the former Engineer officer here, who was summoned as a witness by the defendant in said case, had not testified in a certain manner which Captain Gillette outlined or suggested to deponent.

Deponent further saith that he was a member of the City Council of Savannah during the two years, 1895 and 1896, and in answer to a question by Captain Gillette so informed the latter. Deponent further saith that the conversation between Captain Gillette and himself then turned on the change made at quarantine during that City Administration and the sale of certain stone ballast there by the City which was bought in by the contractors doing the harbor work; deponent told Captain Gillette that deponent thought Captain Carter had treated the City badly about that stone, because deponent thought that Captain Carter could have postponed or prevented the demand made on the City by the War Department to change the Quarantine Station so as to conform to the harbor lines that had been laid down by the Government.

Deponent further says that he did not state to Captain Gillette that Captain Carter had made any changes in the harbor line at quarantine, and deponent did not mean to give Captain Gillette the impression that Captain Carter's action on that occasion was actuated by any improper motive. Deponent did not make any such statement or charge and did not intend to be understood as charging Captain Carter with any collusion with the contractors, nor that the quarantine station was required to be changed for the purpose of enabling the contractors to purchase cheap the stone ballast there. All that deponent intended to say to Captain Gillette, and all that deponent now says, is that the change required at quarantine station made it necessary, in deponent's judgment, for the City to sell the rock ballast that had accumulated there; and that there was no other purchaser in the market for said rock except the harbor contractors who had consequently purchased it at a very cheap figure; and further that Captain Carter had treated the City badly in requiring the change to be made at Quarantine, deponent's belief being that Captain Carter could have prevented the War Department from requiring the same if he had so desired.

Deponent further says that the facts leading up to the change at Quarantine, according to the best of deponent's

knowledge and belief, are as follows:—During the time that deponent was an alderman the City received notice from Captain Carter, then the Engineer Officer in charge here, that certain changes would have to be made at quarantine station at once, that is, within sixty days, so as to conform to the established harbor lines. These changes according to the best of deponent's recollection consisted in certain alterations to the runway and to portion of the wharf and the removal of stone ballast all of which were inside the harbor lines, that is, on the channel side of the harbor lines. This notice from Captain Carter was discussed by City Council and it was decided to let the matter run as long as possible, so no action was taken by council in regard to Captain Carter's notice and no steps were taken to comply with it. Some time afterwards a communication was received by the City from the War Department in Washington requiring that the Quarantine Station lines should be immediately changed to conform with the harbor lines laid down by the Government. The City thereupon went ahead and exposed for sale the stone ballast that had accumulated at Quarantine, which ballast was bought in by the harbor contractors at a figure which deponent considered very cheap. At the time the City was considering the communication of the War Department above referred to Captain Carter by request appeared before the City Council in Committee of the Whole bringing with him his maps showing the harbor lines and so forth, and stated to the Committee that all rock ballast lying inside the harbor lines at Quarantine would have to be removed. Captain Carter also stated at said Committee meeting that it was contemplated or proposed to carry on the harbor works at that point at once, and this as deponent understood was the reason for the demand made by the War Department. But since the removal of said ballast the City has not been required to make any other changes as far as deponent is aware and on this is based deponent's belief that Captain Carter could have postponed or prevented the action of the War Department.

Deponent further saith that he is aware that the harbor lines referred to by Captain Carter's notice and by the communication from the War Department had been laid down and established several years previously by the Government, and that one of the City administrations prior to the one in which deponent served had located this quarantine station with full knowledge of the fact that it was in violation of the harbor lines and after notice from the engineer officer to that

effect; and that the City had arranged through the Engineer Officer or through the War Department to go ahead and establish the station in the manner desired by it on condition that the City would immediately remove the station on notice from the War Department or make any changes in it needed to have it conform to the harbor lines whenever the Government so required.

J. RANDOLPH ANDERSON

(Seal)

Notary Public Chatham Co Ga

(Endorsed) Office, Chief of Engineers War Department,
Nov. 13, 1897 22530/71

State of Florida }
County of Desoto }

Personally appeared James A. Bryan who being duly sworn deposes and says, that he is an experienced contractor and knows the difficulties attending jetty work and the cost thereof. Deponent has made and seen made, log mats brush fascines and brush mats at various places on the South Atlantic coast. He is familiar with the mat work done at Mayport and at Fernandina and with the specifications for them. Deponent knows the three kinds of mats described in the specifications and knows they cost about the same a square yard. The log mat, if anything, being a little cheaper. Deponent has seen **mats built on top of one another** at Fernandina in 1894 and 1897. The fascines and mats were as well built as any deponent has ever seen. It costs a little more a square yard to build mats on top of one another as they built them at Fernandina, than to build single mats, but in sinking this loss can be made up if the contractor has no accidents so it comes out about the same in both ways. Jetty work at Fernandina costs about a fourth more than at Mayport. The present prices at Ferdandina are reasonable.

Deponent knew that four-class rock at Fernandina was to be Florida rock. Deponent was in Savannah at the opening of the bids in 1896. Every bidder got all information about the works and the specifications were clear and under-

stood by every body and everything about the letting was perfectly fair.

Sworn to and subscribed to before me this 23rd day of October, 1897.

JAMES A. BRYAN.

(Seal)

JNO. H. FARRINGTON,
*Notary Public State
of Fla. at Large.*

(Indorsed) Office Chief of Engineers War Department,
Nov 13 1897 22530 202

West Point, New York,
October 20, 1897.

Colonel Geo. L. Gillespie, Corps of Engrs,
President Board of Engineer Officers,
New York.

Colonel

I have the honor to submit the following estimate of the actual cost of constructing and sinking brush mattresses of the kind used at Fernandina, Florida under Captain O. M. Carter Corps of Engrs. The estimate given is for the minimum cost at which the work could be done and for various causes, such as unusually bad weather, poor workmen, inefficient foremen, strikes, scarcity of brush and timber, etc, the work might readily cost 15 or 20 per cent more than here estimated, but I do not believe that it could possibly be done for a cent less.

I give in detail the computation of the cost of every item in order that it may be intelligently criticized, but would wish it to be observed that the price of labor given is commensurate with the tasks assumed and that cheaper labor would accomplish smaller tasks and cost the same in the end.

A fascine 15 ft long and 9" in diameter at the choke will make $5\frac{1}{3}$ sq. yds of single course mattress.

One man will cut $4\frac{1}{2}$ cords of brush per day, which will make one load 15 ft long 6 ft wide and 6 ft high, weighing 1000 lbs.

One load will make 12 fascines

The average haul for brush is $1\frac{1}{2}$ miles which gives 6 loads per day

Cutting one load brush 1 day, \$1.00

Hauling (to include teams, driver, and help loading and unloading), 5.00 per day for 6 loads or \$.833 per load.

Cutting and hauling \$1.833 per load of 12 fascines, or .153 for brush in one fascine. (.153)

Three men will make 1 fascine in 50 minutes, hence $3 \times 50 \times 25$
 ————— = \$.3125 for making one fascine. (.3125)

60 × 2

Hauling fascines to wharf 30 fascines per load, average haul 1 mile, 8 loads per day, team, driver and help, \$5.00 per day for $8 \times 30 = 240$ fascines or per fascine— .0208

Loading fascine lighter,—load to be 4 fascines long, 24 wide and 6 high, 576 fascines; average carry center of wharf to center of lighter 60 ft. for each fascine or 34560 ft. or $6 \frac{1}{2}$ miles for 576 fascines, 2 men per fascine, moving at average rate of 1 mi per hr including time for picking up and laying down fascines, $6 \frac{1}{2}$ hrs hence $2 \times 13 \times 25$

————— = per fascine .0028

2 × 2 × 576

Towing fascine load mattress,—tugboat 3 hrs at \$3.00 per hr. = \$9.00 for 576 fascines or per fascine— .0156

Laying fascines in mattress, average carry from center of fascine lighter to center of mattress 75 ft. then for load of 576 fascines $576 \times 75 = 43200$ ft. = 8.18 miles. Average rate carrying over rough surface of lower courses $\frac{3}{4}$ mi per hr. $8.18 \div \frac{3}{4} = 10.9$ hrs, hence $2 \times 10.9 \times 25$

————— = .0047 per fascine (.0047)

576 × 2

Poles.

To cut and trim one pole including selecting trees, walking from tree to tree, cutting off large butts etc, 15 minutes per pole or 4 poles per hr.

25

————— = .0312 per pole.

2 × 4

Hauling poles:—A pole 30 ft long 5" at butt and 3" at top, 40# per cu. ft. weighs 107 lbs. a wagon load of 2240 lbs will contain 21 such poles, average wagon haul for poles, 3 miles, which gives 4 loads per day or 84 poles. Team driver and help \$5.00 per day hence 5.00

————— = per pole (.0571)

84

Loading poles on lighter; load to be 1 pole long 40 wide

10 high or 400 poles: average carry 60 ft. gives 24000 ft or 4.55 miles, rate carrying 1 mi per hr, 3 men to a pole, gives $3 \times 4.55 \times 25$

$\frac{\quad}{400 \times 2} = .0043$ for loading per pole (.0043

Towing pole lighter to mattress: two lighters a trip or one large lighter carrying double the above load: tug boat 4 hrs at \$3.00 per hr. for 800 poles gives 4×3.00

$\frac{\quad}{800} =$ per pole (.015

Laying poles in grillage: average carry from center of lighter to center of grillage 75 ft. $400 \times 75 = 30000$ ft or 5.7 miles: rate of carrying over rough surface of lower course $\frac{3}{4}$ mi. per hr. or 7.6 hrs for 400 poles, 3 men $3 \times 7.6 \times 25$

$\frac{\quad}{400 \times 2} =$ per pole (.0071

Lashing joints of grillage: scarf joint with two lashings for each pole: cross joint lashings at 6 ft. intervals gives 4 lashings per 2 poles and one extra lashing at end and side for every 5 poles, hence 2 scarf lashings and $2 \frac{1}{5}$ cross lashings per pole $4 \frac{1}{5}$ lashings $2 \frac{1}{2}$ minutes each $2 \frac{1}{2} \times 4 \frac{1}{5} \times 25$

$\frac{\quad}{60 \times 2} =$ per pole (.022

Waste: projecting end of one pole in two cut off and not used if less than 12 ft long average waste 6 ft in 2 poles (60 ft) = $\frac{1}{10}$

CARTER'S REPLY

—to—

THE ARGUMENT OF THE PROSECUTION AGAINST
CAPTAIN O. M. CARTER.

New York, October 29, 1897.

Col. G. L. Gillespie,
Maj. C. W. Raymond,
Maj. H. M. Adams,
Corps of Engineers, U. S. A.

Sirs:—

The answer made to my statement concerns itself to so great an extent with the views of my accuser, induced by his unfounded suspicions rather than suggested by any evidence, that I feel at liberty to ignore much which he has written. I shall not concern myself with his views or conclusions save where they involve such misstatements of facts as would deceive the Board, unless attention was directed to them. Such matters as I have in my statement fully gone into I shall for the most part submit without further comment. The various estimates of the witnesses need not be considered at all. They were before the Board, who have doubtless formed their own conclusions in regard to them; their opportunities; their motives, and their experience. It can be neither interesting nor instructive to follow a criticism, for instance, which undertakes to get rid of pertinent testimony by charging the witness with cigarette smoking. Yet this is not an unfair illustration of the system of reasoning by which conclusions involving the character of the witnesses have been reached.

It is difficult to make a rejoinder logically divided into heads since no particular order is preserved in the answer to which this replies. I am, therefore, forced to take such items as I will consider, as I find them.

The claim is made that "the essential part of the principal charge" is that I paid a dollar a square yard for enormous quantities of brush mattresses whose true value was about one-fifth of that sum.

This subject has been already fully discussed, and it would scarcely seem proper to treat it at length. A mattress seems to have been prepared for this occasion; photographed, and kept in stock for the purpose of having witnesses base their

estimates of the cost of my work thereon. The answer clearly leaves the impression that this mattress was typical, and was selected at haphazard in order to exhibit fairly the character of my work. As a matter of fact, it was constructed during my absence, and after my connection with the work had terminated. Neither the comments of my accuser nor the criticisms of his witnesses under such circumstances can be of the slightest value, save as illustrating the extremes to which these people have gone. A few considerations exhibit the recklessness of the main assertion. He states that the true value of the mattresses was only about twenty cents per square yard. There is no proof of this—it is simply asserted. On the contrary, an expert mattress builder testifies that no mattress can be put into the work for less than sixty cents per square yard, and the true cost of the work as actually done varied from about sixty-five to ninety-five cents per square yard, (P. 29,31). This has been shown conclusively by abundant testimony from men of character and experience, intimately familiar with the work. The last mattress which I saw at Cumberland Sound was about June 1st, 1897. It was built of fascines constructed according to the specifications and well built in every respect. The grillage poles were about five feet apart; were properly lapped and fastened and the fascines were properly jammed together, and the whole system of mattresses properly assembled. Up to that date, the mattresses seen by me had been properly built and as my visits of inspection were made frequently at irregular intervals, and at unexpected times I have reason to believe that all work was properly done. The mattress which my prosecutor claims to have inspected and photographed has nothing in common with what I have described. He states that it required "the closest examination to discover any indication of its "being anything more than a big brush heap squared up at "the corners with a few pine poles laid through the mass"—a description which, if true, would indicate a mass unfit for any purpose whatever in harbor work. He then proceeds to state that "the quality of this mattress was equal to "those previously used" at Cumberland Sound and at Savannah, and then indulges in the remarkable statement that he has "no "engineering objections to any of the mattresses that have "been put in" at Savannah (P. 447), and admits the work is a success. If the work was a success, how could the mattresses have been the worthless things he has described?

In regard to the construction of mattresses and their cost—the only modification from the third design (a modification authorized by the specifications and therefore in accordance with them), is that when the mattresses were built on top of one another a grillage was omitted from each interior mattress and fascines substituted therefor, and extra wire used to bind the mattresses together. What is there in the omission of poles and the substitution therefor of more expensive fascines which suggests that the cost of the work was greatly decreased? As a matter of fact, the cost was increased, as is shown not only by the common sense of the matter but by the testimony of Messrs. Friday, Bryan and Ross, men of character and experienced contractors in just that class of work. These gentlemen are intimately familiar with the mattresses actually constructed by me at Cumberland Sound, as well as with other mattress construction on the South Atlantic Coast.

In his effort to bring the mattresses below their actual cost, the prosecutor finds it necessary to discredit his own witnesses. Captains Black and Gaillard estimated the net cost of brush mattresses of the third design at about sixty-five cents per square yard—the former stating that a contractor at Mayport had failed at a price of seventy cents. Mr. Gieseler estimates the cost of the same mattress at only forty-five cents; Mr. Cooper at thirty-five cents and Mr. Hale at thirty-three cents per square yard. Captain Black estimates the cost of a mattress built according to the description of my prosecutor, a description of a mattress never built or authorized built by me, at about thirty-five cents; Mr. Gieseler at eleven and a half cents; Mr. Cooper at ten cents, and Mr. Keating at eight cents per square yard. My prosecutor asserts that the estimate of Mr. Keating is the most reliable, and yet he arbitrarily doubles the remarkably accordant estimates of his subordinates; strike forty per cent from the estimates of Captains Black and Gaillard, and thus arrives at his assertion that the cost is twenty cents. Of what conceivable value can such estimates be to any one? and yet this is the basis of what my prosecutor declares to be the essential part of his principal charge.

In the effort to discuss with some degree of order what is apparently the first head of the answer, it may be proper to refer again to the choking of the fascines. The form of choker described by Mr. Twiggs I have never seen. It differs from that described as in use in the camps by every one

who has ever been there. The fascines selected for the comparative tests had been lying in the hot sun for three weeks, and many of them had been rejected by the contractor and not intended for use in the work. When subjected by the orders of my prosecutor to such pressure that $1/4$ inch chains were broken, the average diameter of the recompressed fascines at Cumberland Sound was only 2.3 inches below the 9 inches required by the specifications (Report Hall), and at Savannah only 2 inches below (Report Hale). It is a fact known to all men familiar with fascine construction that with green brush even the excessive compression used in those tests could not have choked the fascines as originally made below the required diameter of 9 inches. Thus the claim that the fascines accepted contained less brush than required by the specifications, even basing the claim on the defective fascines used in the tests, has utterly failed of proof. What has not failed of proof is that both in regard to the mattress and the fascine the test was unfair in its act and intent, and the only effect could be to deceive those who were unacquainted with the conditions under which they were made. These considerations would seem to cover the general ideas underlying the charge in the first head. It would be interminable to go over in detail all of his conclusions and surmises based upon what his witnesses have said, or even to consider what they have said any further. Thus, every statement of any effect which he recalls in the testimony of the witness Twiggs is untrue, and I have in my former statement discussed this testimony and this witness. If P. E. Twiggs fell through a mattress he never informed me of the occurrence, although the orders to him were specific to accept no mattress even for measurement which did not come up to the requirements of the contract. Hale, who states that the fascines when rechoked for spectacular effect, only fell 2 inches below the specifications, states further that the contractor had to use 3 or 4 bundles of brush to make one fascine of equal length, and then goes on to say that it took 10,000 of those bundles to make 888 fascines, a discrepancy of only about 250% in his two statements.

The testimony of Mr. Woolvin is quoted as showing that the fascines were not properly built (P. 119). This man's remark applies only to fascines in the work at Augusta, made and placed there nearly three years before he saw them, and who, when asked if he ever saw that prior work, stated that he never did (P. 121). Mr. Brown was the engineer in local charge of that work. The fascines were staked to the bank

and the entire contract was carried out exactly as required of Mr. Twiggs, the stone on shore protection was carefully pitched and Mr. Brown has testified that the fascines were built according to the specifications (P. 39), and yet this man Woolvin is seriously brought forward as a reliable witness concerning fascine construction in the Savannah District, when his only statement is based on the appearance of fascines exposed nearly three years in a warm climate to the destructive flood effects of a torrential stream.

There follows a mass of writing devoted to a criticism of the testimony of witnesses as to the cost of the work to the contractors. It would be idle to go over again the testimony on this point. Engineer officers; contractors; inspectors—all those who have a personal knowledge of what they are talking about, and are men of character and standing—are swept aside to make way for such expressions as: "Taking Capt. Black's estimate * * * 'the cost of many items is greatly over-estimated'; 'Capt. Gaillard's estimate being made with 'the same premises as Capt. Black's, is subject to the same 'correction'; Lt. Rees' estimate is 'out of all reason for the 'purposes of this investigation; (when Lieut. Rees was engaged for four years on the very work in question, knew the exact price of labor and was familiar with the mattress actually constructed by me, which type has not changed since); the Gaynors 'are interested in the same way that Capt. Carter is, &c. No matter what or who it may be, whenever it or they come in contact with this man's theories he strikes at them blindly, Congress, engineer officers, business men, the Chief of Engineers, this Board, his own witnesses, all imperil their reputation by differing with him. His charity begins with himself and ends with those who are subserving his purpose—outside of this narrow circle all things are black to him.

In what he calls the second part of the main charge, he concerns himself with the proposition that the excessive prices for mattress work, but which the Chief of Engineers has testified that he recommended, personally, to the Secretary of War for acceptance (P. 821), justify the belief that I was either a stockholder in the contractors' company or otherwise benefitted pecuniarily by my actions. God only knows how little it would take to justify any belief in his mind. As I am not being tried on the belief of this man, I might content myself with calling attention to the fact that there is not a particle of proof to justify this belief in any one's mind. His

first head on this charge in its detail and in its entirety is untrue, including the Foley incident. With the latter I have had no intimacy of any character; never called him a filibusterer, and evidently have had much less to do with him than my accuser. I am informed that he is or was a sailor boarding-house runner, entirely impecunious, and who, as I was informed later, applied for the specifications on a bet of drinks that even he could get them. These are very low depths into which the case has fallen.

The second division of this second head is made up of such glaring misstatements that it need not be seriously considered. I have dealt with it in my former statement, and where any new comment is indulged in it is so trivial that it is not worthy of serious reflection. Under this head, in order to strike at me he found it necessary to assume that the Board of Engineers, who considered the improvement of Cumberland Sound, neglected their duties. Upon this I need not comment. Those gentlemen might well forget, in a multitude of labors, the specific point at issue, but it is incredible that they were so ignorant of their profession and so neglectful of their duties as to have imagined at the time that 425,000 square yards of single-course mattresses 100 feet wide could go into a space of 6,500 linear feet, neither is it possible that their estimates of cost are as absurd as this critic would have appear. This Board is aware that the extension of the mattress work at Cumberland Sound was seaward—farther seaward than such work had ever extended, and, therefore, it will not seem curious to those who understand such work that the judgment of the engineer officer must frequently change until the success of his experiments is assured. It is interesting to note just here that at this point the cost of the mattresses is arbitrarily reduced to fifteen cents, 25% of my prosecutor's own estimates—arrived at with such pains and at the sacrifice of so many other judgments—being summarily stricken off.

I do not know whether it is intended to extract from the discussion of the question of the inside route any conclusion that I am a stockholder with the contracting company, although it seems to come under that head. I have only to reiterate my former statement that the only sensible route was the one I adopted. Its prompt abandonment by my successor at the instance of steamboat men has thrown away some \$25,000 of the government's money; and defeats

one of the main objects of the inside route—the construction of a channel for use by government vessels in time of war. It is probably not known to my accuser that Dam No. 31 is of the proper height and that the “similar dams” he refers to are not similar at all. Dam No. 31 is in reality a training wall, and was built to direct the ebb flow from Wright’s River over Tybee Knoll. The spur dams to which he refers were built years ago, and rise, many of them, to mid-tide or higher. The effect of their retention at that height cannot but affect the tidal prism. It is imperative to lower their crests. As their removal to mean low water would entail a large cost on the government I endeavored to have the contractors remove them in exchange for the stone, which effort, because of the accumulation of mud and barnacles, they were loath to undertake. If the interest of the river is to be considered, they will have to be removed.

The remarks of my accuser about the dumping in the channel near Venus Point are untrue, as are his remarks about the soundings. These matters have already been discussed by me and are answered by him only by vituperation and by suggestions of concealed information obtained from unknown persons.

The third point relied on to show my interest with the contractors is the threatened work at the Savannah Quarantine station.

If my prosecutor knew the Savannah River, he would know that in case a cut were made across Cockspur Island to throw the ebb flow from the South Channel across Tybee Knoll, it would be imperatively necessary to remove the projecting point of land at the new quarantine station just above the mouth of such a cut, and that the adopted harbor line is a proper one. As to the necessity for removing the ballast, &c., illegally deposited there, it was expected that the passage of the River and Harbor bill in 1896 would permit quite extensive dredging and one of the first things desired was to open the channel near the quarantine. To be ready to begin the work at once, it was necessary that the material illegally put there be removed. Shortly afterward, when the River and Harbor bill became a law, only \$5,000 were made available and the desired work could not be begun. It would have been unjust to the City of Savannah to have deprived it of the use of the quarantine station pending this interval, and hence temporary repairs to existing structures ought to have been authorized. No ballast, however, is permitted to

be deposited beyond the harbor line, and the projecting point should be removed and the new channel opened at the earliest practicable moment. I did not know anything about the details concerning the disposition of the ballast or what it had brought until the report of my accuser and his witness Cooper was made. The matter does not warrant further discussion. The harbor line as established will prevail if any regard is to be had to the interest of the work, and I am not responsible if the cutting off of this jutting land does not commend itself to the reason of my successor.

The Brown case stands on the same footing. There is absolutely no evidence that the rock rejected was ever used in the work, but there is evidence that it was not so used, and yet my accuser has searched Savannah, interviewing jurors in the hope of finding something to my discredit. It will be remembered by the Board that his first position was that one of those jurors had said that I ordered the ballast removed from the quarantine station to benefit the Atlantic Contracting Company. He did not give the name of his informant. This forced me to secure the affidavit of each juror, and the man to whom he now admits he spoke denies the truth of his assertion on oath.

It has been abundantly shown that the presence of inspectors at the mattress camps was not necessary. I will not go over this again but merely remark that whether Mr. Hall stated he "walked around in a mattress" has not been proven, but if he did state that he failed to inform me of it and was derelict in his official duty. Where that was the typical mattress constructed by my successor, I do not know. It is, at least, the only mattress I have ever heard of which could possibly have approximated to that description.

The question of the piling has already been discussed fully. I cannot bandy language with him in regard to the piling replaced by contractors at their own expense, nor do I care to dwell upon the imaginary statement that the piling was of the cheapest second growth pine.

The sinking of mattresses without proper loads of stone has also been discussed. He evidently is unaware that ten per cent. of the monthly estimates was withheld from payment and would far more than cover any losses. As a matter of fact, such losses did not occur, for the brush to which he refers as littering the shores of Tybee and Daufaskie came from mattresses which went to pieces in the breakers before they went into the work, and which were never paid

for. The whole discussion under this head is a work of fancy.

In regard to the compression of mattresses at Cumberland Sound, I have to state that the reports made to me by my assistant showed no compression and that the work was satisfactory. The statement of my accuser as to cost must be untrue, since it does not agree with that deduced from the profiles submitted to me by this same assistant and submitted by me.

The point about bids without competition answers itself. The instances cited show that there was competition.

So far as the Hutchinson Island matter is concerned, I leave him to struggle with himself. What I stated is in writing. He perverted my written language, and now calls on me to prove what he says is false. As he was not even in Savannah at the time, he can scarcely be considered a witness whose assertion need be noticed.

What follows is his attempt to answer me in regard to what he now calls "irregularities involving little loss to the government", but which were serious enough for him to attack my character upon.

There is a mass of details which he insists upon whenever it occurs to his mind and which it is hard to distribute even under his own headings. With the permission of the Board, I gather them here without particular order and with but brief comment:

1. Whilst he admits that the mattress work of Mr. Twiggs at Augusta was not reduced as he had stated, he insinuates that it was a practical reduction since the stone work was increased. The character of such an attempt at evasion is apparent when it is considered that the stone came from a quarry on the river bank a short distance above the works and could be floated there on barges, the profit on it being far greater than on brush mattresses. Multiple mattresses were used by Mr. Twiggs where the depth of water permitted.

2. Of his criticism upon the cost of the Cumberland Sound improvement, it is sufficient to say that that subject was reported upon by a Board of officers of the Corps of Engineers, and the estimates of cost submitted by that Board approved by the Chief of Engineers who had formerly been the Division Engineer and was thoroughly familiar with the locality. The officer who was the Chief of Engineers has testified before this Board that the present prices are "the lowest bids,"

"within the estimate" & "my recommendation is that they be accepted" (p. 821). The comparative values of those estimates and his criticism need not be commented upon.

3. The statement that the present system of building mattresses was inaugurated since the summer of 1893 is not true. It was inaugurated during the winter of 1892-3 and has not since changed. The method of launching has been improved, but no change has taken place in the method of construction.

4. His assertion that what was said in regard to prominent citizens was brought up wholly by me is not true. His testimony appears on page 432 and shows that in answer to my question whether he had spoken to any one, he deliberately and without reason stated that prominent citizens had come to him—a statement which apparently has the name of no prominent citizen behind it.

5. What degree of pressure he has brought upon his subordinates I do not undertake to say, but no one can read Mr. Cooper's letter of August 7th, purporting to be a simple answer to one sent him the preceding day, without becoming convinced that it was not an answer to that letter at all, but to something else. See also in this connection the affidavit of Mr. Daniels.

6. In answer to his assertion that he had nothing "to do with the newspapers getting hold of the charges", it might be well for this Board to inspect his official copy of the very order creating the Board, with a view of ascertaining whether it bears the file marks of a typesetter in a newspaper office.

7. If it is at all pertinent, it may be stated that my reprimand to Mr. Ensey was due to his carelessness in making his reports, and had no reference to his character or fidelity. This is clearly indicated by attention being called to his erasures. Lieut. Rees was sent to examine into the matter, and his report was satisfactory.

8. As to the Hirt matter, it has already been shown that the funds belonged to Mr. Hirt, and there is no more reason why that \$132.10 should be reported to the government than the other funds received from and used for Mr. Hirt. The vouchers for the expenditure of that sum should go to Mr. Hirt, just as the vouchers for the previous expenditures went to him.

9. The statement that an ocean steamer could go through a pile training wall is true, but it is scarcely necessary to remind this Board that a light pile structure designed to make

a silt-bearing river form new banks should not be designed or constructed to resist the ramming effect of an ocean steamer.

10. Regarding the work at Fernandina characterized as disgraceful by this man, the value of his criticism becomes apparent when it is remembered that that work has been carried on in accordance with the recommendations of Boards of Officers of the Corps of Engineers and with the approval of the Chief of Engineers.

In general it appears that my prosecutor has deliberately undertaken, for reasons best known to himself, to do all that he can to besmirch my character, and that when he has failed to find evidence he satisfies his suspicious mind by reinforcing his attempt with his own bald assertions and coarse epithets. I must, as a consequence, believe this man quite capable of going to any extreme to accomplish his end, and I am not called upon to accept any unsupported statement made by him as true, and do not, nor am I called on to consider such a man as his clerk as a corroborating witness for any one.

At the conclusion of his paper, my prosecutor sums up his accusations under two heads, (1) That a large sum of money has been lost to the government and (2) That large sums have been found in my possession.

As to the first, the discussion and the evidence must have demonstrated the utter baselessness of the charge. On the contrary, it has been demonstrated that large sums of money have been saved to the government and that up to the time of my departure the work was a signal success, meeting with the approbation of my superiors and of the people benefited.

As to the second, it is stated falsely and is false in its intention. I desire to recall with emphasis that there are no facts from which this conclusion can be drawn. There is not a work of evidence—there is not a suggestion of evidence—that one cent of the money which I have controlled and used for years has ever come to my hands improperly. The only thing in support of this charge is the statement of my accuser as his belief, which he seems to think is made stronger by reiterating it. At the instance of this accuser my private papers were seized, including even the letters of condolence on the death of my wife, and the business papers of my father-in-law. That I had no objection to their inspection by this Board does not condone his act. This Board found them in the possession of the government when it

reached Savannah, and as embarrassing as it must have been to them, I appreciated their position and frankly tendered them for their private inspection. But the fact remains that after I had obtained permission, before the arrival of the Board, to retake them, this permission was revoked at the instance of this prosecutor. At the time, I was a Captain of Engineers, military attaché to one of the principal embassies of the United States and a member of one of the important commissions of the government. Apart from the obvious consideration which would be due to any individual—no matter how humble his station—it would seem to have been demanded that so far from being adjudged guilty on the bare statement of an inferior made in a letter evidently prepared for him, I should have been reckoned at least not guilty until some evidence of my guilt was forthcoming. At the conclusion of the hearing, as at its inception, the theory seems to be that because I have had money therefore I must have obtained it improperly, and in the effort to establish such a violent conclusion all of my private transactions have been inquired into, and nothing has been found on which to base it. The demand is still made that by some inscrutable means I must compel Mr. Westcott to appear before this Board possibly to be subjected at his age to the insulting interrogations of my accuser concerning his private affairs. This I neither can do, nor am I willing longer to endeavor to do.

He has replied to me & I have submitted his reply to this Board that the transactions to which I have referred and by which I had the handling and control of large sums of money were had with and for him. I have submitted his powers of attorney, which placed at my disposal his entire fortune. In my efforts to afford the Board all the information in my power, I have possibly disregarded his rights and exhibited another man's private business to the Board and to my accuser.

I have explained at length my relations with him and at my requests oft repeated, his brokers have written letters which have been submitted to the Board explaining as far as they felt they were justified, my relations to his account with them.

In this matter, not a statement of mine has been contradicted, not a paper produced by me has been incorrect, not a witness in my behalf has been impeached and yet the Board is asked to find that my statements are false, those papers

untrue, and that I am guilty of a crime, solely because of the unsupported belief or statement of belief of my accuser. The evidence I have submitted and my action before the Board was in the face of the fact that there is not one word of testimony that any of this money has been received from any one improperly and in face of the fact that those transactions were my business and Mr. Westcott's and concerned no other human being alive. In answer to this painful and humiliating action on my part, which to any dispassionate mind anywhere will seem gratuitous, I am still met by the clamor of my accuser that because I had the control of money therefore it was wrongfully obtained. If the fact of this insistence were not to be found coarsely stated in his reply, it would seem incredible. It establishes the precedent that any idle or malicious person is at liberty at any time without any evidence whatever to assail with impunity the reputation of any officer. I have gone so much farther in this matter than even the most exactly should have required, that I go no farther. The fact that I had money and the control of money was not kept secret by me, but has been a matter known to many for years. I have explained where it came from, and this explanation has been substantiated by the man from whom it came. I now denounce the repeated assertion that those moneys were dishonestly acquired as a base slander, inviting upon its proposer the contempt of every honest man. I cannot leave the statement to which this is a reply without a word further. Starting out with the gravest accusations against a brother officer, it has degenerated into vituperation which cannot affect me in the judgment of right minded men and must react on my accuser. That the circumstances under which it is written leaves me powerless to resent it otherwise than in this reply, does not make the burden of it lighter; however these circumstances may have acted upon the mind and conduct of my accuser. Certainly the character of his reply should leave no doubt in the minds of a Board composed of officers and gentlemen that it is not the truth which he seeks to exploit, but the opportunity of venting his spleen where it can presumably be done in safety.

Appeal from the Circuit Court of Appeals of the United States for the Seventh Circuit.

1 PROCEEDINGS OF A GENERAL COURT-MARTIAL,
WHICH CONVENED AT SAVANNAH, GEORGIA,
PURSUANT TO THE FOLLOWING ORDER:

Special Orders,
No. 282

Headquarters of the Army,
Adjutant-General's Office,
Washington, December 2, 1897.
Extract.

The following order has been received from the War Department:

War Department, Washington, December 2, 1897.

By direction of the President, a general court-martial is appointed to meet at Savannah, Georgia, at 11 o'clock A. M., on Wednesday, January 5, 1898, or as soon thereafter as practicable, for the trial of Captain Oberlin M. Carter, Corps of Engineers, and such other persons as may be brought before it.

Detail for the Court.

Brigadier-General Elwell S. Otis, U. S. Army,

Colonel Jacob Kline, 21st Infantry,

Lieutenant-Colonel Samuel M. Mansfield, Corps of Engineers,

Lieutenant-Colonel Henry C. Hasbrouck, 4th Artillery,

Major William S. Stanton, Corps of Engineers,

Major John L. Tiernon, 1st Artillery,

Major Charles A. Woodruff, Commissary of Subsistence,

Major William S. Patten, Quartermaster,

Captain Daniel M. Taylor, Ordnance Department,

Captain Samuel M. Mills, 5th Artillery,

Captain Charles G. Penney, 6th, Infantry,

Captain Theodore F. Forbes, 5th Infantry,

Captain Richard P. Strong, 4th Artillery,

Lieutenant-Colonel John W. Clous, Deputy Judge-Advocate-General, Judge-Advocate.

The Court is empowered to proceed with the business before it with any number of members present not less
2 than the minimum prescribed by law.

R. A. ALGER,
Secretary of War.

Upon the final adjournment of the court the members thereof will, by direction of the Secretary of War, return to

their proper stations. The travel enjoined is necessary for the public service.

By command of Major-General Miles;

SAM'L BRECK,
Adjutant-General.

Special Orders
No. 306.

Headquarters of the Army,
Adjutant-General's Office,
Washington December 31, 1897.
Extract.

6. The following order has been received from the War Department:

War Department, Washington, December 30, 1897.

By Direction of the President, the meeting of the general court-martial at Savannah, Georgia, appointed by War Department Order of December 2, 1897, published in paragraph 3, Special Orders, No. 282, December 2, 1897, from Headquarters of the Army, is postponed until January 12, 1898, or as soon thereafter as practicable.

G. D. MEIKLEJOHN,
Acting Secretary of War.

By Command of Major-General Miles:

H. C. CORBIN,
Acting Adjutant-General.

Special Orders,
No. 1.

Headquarters of the Army,
Adjutant-General's Office,
Washington, January 3, 1898.
Extract.

10. The following order has been received from the War Department:

War Department, Washington, January 3, 1898.

By direction of the President, Colonel Thomas F. Barr, Assistant Judge-Advocate-General, is detailed as judge advocate of the general court martial appointed to meet at Savannah, Georgia, by War Department order of December 2, 1897, published in paragraph 3, Special Orders, No. 282, December 2, 1897, from Headquarters of the Army, vice Lieutenant-Colonel John W. Clous, Deputy Judge-

Advocate-General, hereby relieved at his own request on account of sickness.

G. D. MEIKLEJOHN,
Acting Secretary of War.

By Command of Major-General Miles:

H. C. CORBIN,
Acting Adjutant-General.

Special Orders,
No. 4.

Headquarters of the Army,
Adjutant-General's Office,
Washington, January 6, 1898.
Extract.

13. The following order has been received from the War Department:

War Department, Washington, January 6, 1898.

By direction of the President, Major John R. Myrick, 5th Artillery, is detailed as a member of the general court martial appointed to meet at Savannah, Georgia, by War Department order of December 2, 1897, published in paragraph 3, Special Orders, No. 282, December 2, 1897, from Headquarters of the Army, vice Captain Theodore F. Forbes, 5th Infantry, who is hereby relieved.

G. D. MEIKLEJOHN,
Acting Secretary of War.

By Command of Major-General Miles:

SAM'L BRECK,
Adjutant-General.

United States Court Room.

Savannah, Georgia, January 12, 1898.

The court met pursuant to the foregoing orders at 11 o'clock A. M.

Present:

Brigadier-General Elwell S. Otis, U. S. Army.

Colonel Jacob Kline, 21st Infantry.

Lieutenant-Colonel Samuel M. Mansfield, Corps of Engineers.

Lieutenant-Colonel Henry C. Hasbrouck, 4th Artillery.

Major William S. Stanton, Corps of Engineers.

Major Charles A. Woodruff, Commissary of Subsistence.

Major John R. Myrick, 5th Artillery.

- 4 Major John L. Tiernon, 1st Artillery.
 Major William S. Patten, Quartermaster.
 Captain Daniel M. Taylor, Ordnance Department.
 Captain Samuel M. Mills, 5th Artillery.
 Captain Charles G. Penney, 6th Infantry.
 Captain Richard P. Strong, 4th Artillery.
 Colonel Thomas F. Barr, Assistant Judge-Advocate-General, judge-advocate.

The court then proceeded to the trial of Captain Oberlin M. Carter, Corps of Engineers, who being before the court, introduced Walter G. Charlton, Abram J. Rose, Frank P. Blair and W. W. Mackall as counsel.

George T. Cann was duly sworn as reporter.

The order convening the court was read to the accused, and he was asked if he objected to being tried by any member present named therein; to which he replied in the negative.

The members of the court and the judge-advocate were then duly sworn.

The accused was then arraigned upon the following charges and specifications:

- 55 The court then, at forty minutes past one o'clock p. m., adjourned to meet at eleven o'clock, a. m., tomorrow.

THOMAS F. BARR,
Col. & Asst. Judge Adv. Genl., Judge Advocate.

56

United States Court Room,
 Savannah, Georgia,
 January 13, 1898.

The Court met pursuant to adjournment at 11 o'clock A. M.
 Present: All the members of the Court and the Judge-Advocate, the accused and his counsel and the reporter were also present.

Judge-Advocate: (To the Court), Mr. President, I am about to introduce the Assistant-Treasurer of the United States at New York, Mr. Jordan. It is rather out of the order in which he would be called naturally in the case and solely for the purpose of identifying certain checks which may hereafter be submitted in evidence. I desire to have it understood by the Court that they are not at this stage submitted as evidence, but that they are now to be identified my him to allow him to return to his duties in New York where the vast interests of the Government are in his care.

By the President: The Witness can be introduced.

CONRAD N. JORDAN, a witness for the prosecution, was duly sworn and testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. Please state your name, and official designation?

A. Conrad N. Jordan, Assistant-Treasurer of the United States at New York.

Q. In your official capacity, you are the custodian of the checks paid checks, drawn upon the Sub-Treasury at New York?

A. I am.

Q. Correspondence has been had with you in regard to certain checks issued by Oberlin M. Carter of the Corps of Engineers?

A. Yes, sir.

Q. And you have been requested to bring them with you?

A. I have.

Q. You have them with you?

57 A. Yes, sir. These are the checks. I have here the official order requiring me to bring them if you desire it.

Q. Your presence is ample. I hand you check, please state the number and date of that check, in whose favor it was drawn, by whom signed, and for what amount?

A. It is under date of November 17, 1892, its number is 200,265, it was drawn to the order of The Atlantic Contracting Company, John F. Gaynor, President, for \$3,265.61. It is signed by O. M. Carter, Captain Corps of Engineers, I think it is, and endorsed by the Atlantic Contracting Company, John F. Gaynor, President, and by subsequent endorsers, do you desire those?

Q. I will ask you one question, can you tell from the check itself whether it was paid over the counter of the Sub-Treasury or through the Clearing House?

A. I can.

Q. How was that paid?

A. That was paid through the Clearing House to the 4th National Bank of the City of New York, the date of payment is upon the face.

By the President: What is the date of that check?

A. November 17, 1892.

By Mr. Blair: What is the amount?

A. \$3,265.61.

Mr. Rose: We don't find that in the charges and specifications.

The Judge-Advocate: I simply want to identify these checks, they are not offered as evidence.

Q. Please give the same information in regard to that check?

A. Number 200,268. Its date is December 3, 1892. It was drawn to the order of The Atlantic Contracting Company, John F. Gaynor, President, by O. M. Carter, Captain of Engineers, I cant read it. The Atlantic Contracting Company endorsed it, but as before, it goes through the Fourth National Bank for the sum of \$5,000.00.

Q. Paid when?

A. Paid on December 5, 1892.

Q. Please respond in regard to that check?

58 A. Number 200,302. Drawn December 16, 1892, drawn to the order of the Atlantic Contracting Company, John F. Gaynor, President, signed by O. M. Carter, Captain of Engineers, for the sum of \$8,507.45, and endorsed "Pay to the order of William F. Gaynor, by the Atlantic Contracting Company, The Fourth National Bank of the City of New York. as before, paid December 20, 1897 or 1892 I mean, 1892, but it is blurred.

Q. Please give the same information in regard to that check?

A. This is Number 200,308, dated December 31, 1892, to the order of the Atlantic Contracting Company, John F. Gaynor, President, for the sum of \$20,000.00, drawn by O. M. Carter, Captain of Engineers. This was cashed over the counter of the Sub-Treasury through the medium of the American Exchange National Bank.

Q. Please inform the court, Mr. Jordan, how you determine the fact that it was paid over the counter and not through the Clearing House?

A. The banks all place upon the back of the check the Clearing House stamp, paid through the Clearing House of the City of New York, and the endorsement is signed by one of the officers of the Bank, in this case the party through whom that was drawn I'll assume was brought to the Bank by a messenger of the American Exchange National Bank with the signature of the Cashier of the American Exchange National Bank, he identified the gentleman who presented it and we paid it in cash over our counter. There are two dis-

inct methods of payment, one through the Clearing House and one in cash.

Q. Please give the same information in regard to that check?

A. This is numbered 200,312, under date January 12, 1893, drawn to the order of the Atlantic Contracting Company, John F. Gaynor, President, for the sum of \$25,416.81, and it is endorsed as before. I don't suppose the particulars are needed. Paid the Fourth National Bank, Paid through the Clearing House January 23, 1893.

Q. Please give the same information in regard to that check?

A. Number 200,322, dated February 4, 1893, to the order of the Atlantic Contracting Company, John F. Gaynor, President, for the sum of \$37,722.83, drawn by O. M. Carter, Captain Corps of Engineers for deposit Atlantic Contracting Company. It was deposited in the American Exchange National Bank, and paid that Bank Feb. 11, 1893.

Q. Give the same information in regard to that check.

A. This is No. 224375, dated March 6, 1903; pay to the order of the Atlantic Contracting Co., John F. Gaynor, Prest., for the sum of \$34,985.47. Drawn by Oberlin M. Carter, Captain Corps of Engineers and indorsed by the Atlantic Contracting Co., and the American Exchange National Bank, and paid March 14, 1893.

Q. That was paid over the counter?

A. That was paid through the Clearing House.

Q. Give the same information in regard to that check.

A. The number of this is 224382, dated March 31, 1893, drawn to the order Atlantic Contracting Co., John F. Gaynor, Prest., for the sum of \$37,070.49, by O. M. Carter, Capt. Corps of Engineers, indorsed by the Atlantic Contracting Co., and paid the Assistant Cashier the American Exchange National bank, and paid over the counter of the Clearing House, April 4, 1893.

Q. Please give the same information in regard to that check.

A. No. 224385, being under date April 3, 1893, drawn to the order of The Atlantic Contracting Co., John F. Gaynor, Prest., for the sum of \$20,584.51, by O. M. Carter, Capt. Corps Engineers, indorsed Atlantic Contracting Co., John F. Gaynor, Prest., and paid over the counter in cash, and indorsed for recognition by the Cashier of the American Exchange National Bank, date of payment April 14, 1893.

Q. Give the same information in regard to that check.

A. 224409, dated May 2, 1893, to the order of the Atlantic Contracting Co., John F. Gaynor, Prest., for the sum of \$30,000, drawn by O. M. Carter, Captain Corps of Engineers, U. S. A., indorsed by the Atlantic Contracting Co., and by the American Exchange National Bank, paid May 9, 1893.

Q. Please give the same information in regard to that check.

A. The number is 224417, dated May 31, 1893, to the order The Atlantic Contracting Co., Edward H. Gaynor, Treasurer, for the sum of \$6,105.69, drawn by O. M. Carter, Captain
60 Corps Engineers, endorsed by the Contracting Company and paid over the counter on June 5, 1893.

Q. Please give the same information in regard to that check?

A. This is number 224418, dated June 3, 1893, to the order The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$3,309.40, drawn by O. M. Carter, Captain Corps Engineers, endorsed by the National Park Bank with another Bank endorsement and then paid on July 31, 1893.

Q. I understand you to say when a check has been paid over the counter you will so state?

A. I will so state.

Q. I also understand from your testimony that when you state that a check has been paid over the counter that it has been paid in currency?

A. Correct.

Q. Please give the same information in regard to that check?

A. 224439, dated July 3, 1893, to the order of the Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$3,595.38, drawn by O. M. Carter, Captain of Engineers, endorsed by the contracting Company and paid in cash over the counter.

Q. Please give the same information in regard to that check?

A. Number 224437, dated July 3, 1893, drawn to the order The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$3,000.00, so endorsed and paid over the counter in cash.

Q. Paid when?

A. Paid on July 11, 1893.

Q. There seems to have been a change in the character of that check?

A. Simply an alteration made on the face of it on approval and so certified by Captain Carter, amount corrected to \$3,000.00, \$3,000.00 Captain O. M. Carter, of course, signed as before. A correction permitted by the regulation.

Q. Of course. Please give the same information in regard to that check?

61 A. 224438, dated July 3, 1893, to the order of The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$7,558.83, drawn by Captain O. M. Carter, Corps of Engineers and endorsed by that Company and paid in cash over the counter on July 11, 1893.

Q. Give the same information in regard to that?

A. 224431, dated July 3, 1893, to the order of The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$5,968.18, by O. M. Carter, Captain Corps of Engineers, endorsed and paid in cash over the counter on July 11, 1893.

Q. Give the same information in regard to that, sir.

Q. This is number 224432, dated July 3, 1893, drawn to the order The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$34,177.94, drawn by O. M. Carter, Captain Corps Engineers and deposited in the American Exchange National Bank, paid on July 12, 1893.

Q. Give the same information in regard to that?

A. Number 224449, dated August 3, 1893, drawn to the order of the Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$39,075.00, drawn by O. M. Carter, Captain Corps of Engineers, and paid in cash over the counter on August 7, 1893.

Q. Give the same information in regard to that, sir.

A. 224433, dated July 3, 1893, drawn to the order of The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$46,592.39, by O. M. Carter, Captain Corps Engineers, and paid in cash over the counter July 11, 1893.

Q. Give the same information in regard to that?

A. Number 224450, August 3, 1893, to the order The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$5,700.47, drawn by O. M. Carter, Captain Corps Engineers, and paid to the National Park Bank on August 17, 1893.

Q. Give the same information in regard to this check?

A. Number 224451, dated August 3, 1893, to the order

of the Atlantic Contracting Company, Edward H. Gaynor, 62 Treasurer, for the sum of \$5,000.00, drawn by O. M. Carter, Captain Corps of Engineers, and paid over the counter on August 14, 1893.

Q. Please give the same information in regard to that check?

A. Number 224461, dated September 1, 1893, to the order of the Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$77,975.00, drawn by O. M. Carter, Captain Corps of Engineers, endorsed by this firm and paid the American Exchange National Bank September 7, 1893.

Q. Please give the same information in regard to that?

Q. Please give the same information in regard to this one.

A. Number 224415, dated May 25, 1893, to the order of Edward H. Gaynor, for the sum of \$26,706.46 by O. M. Carter, Captain Corps of Engineers, and paid in cash over the counter on June 5, 1893.

Q. Please give the same information in regard to this check, Mr. Jordan.

A. Number 269484, dated July 1, 1895, to the order of W. T. Gaynor for the sum of \$4,831.78 by O. M. Carter, Captain Corps of Engineers, and paid to the American Exchange National Bank on July 6, 1895.

Q. Please give the same information in regard to this one.

A. Number 269485, dated July 1, 1895, to the order of W. T. Gaynor for the sum of \$6,630.89 by O. M. Carter, Captain Corps of Engineers, and paid the American Exchange National Bank July 6, 1895.

Q. Please give the same information in regard to this one.

A. Number 269486, dated July 1st, 1895, to the order of W. T. Gaynor, \$13,490.08, drawn by O. M. Carter, Captain Corps of Engineers. Paid to the American Exchange National Bank July 6, 1895.

Q. Please give the same information in regard to this one.

A. Number 270536, dated July 6, 1897, to the order of the Atlantic Contracting Company for the sum of \$230,749.90, drawn by O. M. Carter, Captain Corps of Engineers, and paid to the Manhattan Company—The Manhattan Banking Company it is.

Q. Can you give the month?

A. Oh, yes.

Q. Can you find out from the endorsement in any way?

A. The date of payment has been written across, I think it is the 6, because they were paid at the same time. They were both paid at the same time, that and a succeeding check were both paid at the same time.

74 Q. Retain that please until I hand you the next check. Please give the same information in regard to this check.

By the President: What is the date of that first check?

The Judge-Advocate: July 6.

Witness: July 6, they both were paid on July 7, I will read it. Number 270537, July 6, 1897, to the order of the Atlantic Contracting Company for the sum of \$345,000.00, and paid to the Manhattan Company on July 7, 1897.

Q. And that then was the date of payment of both checks?

A. Of both checks.

Q. Number 270536, and number 270537?

A. Correct.

Q. Please give the same information in regard to that check, Mr. Jordan.

A. It is Numbered 270431, dated December 16, 1896, to the order of The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for the sum of \$666.00, by O. M. Carter, Captain Corps of Engineers, and paid to the National Park Bank January 22, 1897.

Q. I notice, Mr. Jordan in those checks which I have passed to you, for identification, and which you have identified, is stamped, printed, "Engineers" in one corner of them,—does each disbursing officer have a different character given to their checks?

A. Yes, sir.

Q. Mr. Jordan, can you furnish us copies of those checks?

A. With pleasure.

Q. With the indorsements?

A. With pleasure.

Q. Judge-Advocate: I desire to have it understood by counsel, clearly and frankly that there have been indorsements on most of these checks which the Assistant Treasurer has not mentioned, but if he sends a certified copy, and this, of course, will be done, there will be no objection to their being used, provided they are correct. Counsel so understand it?

Mr. Blair: There will be no admission on our part as to other signatures on checks.

Mr. Rose: He ought to identify the signatures in the indorsements.

Judge-Advocate: Counsel will understand that these
77 are not offered in evidence now.

Mr. Blair: We wont make any point about that.

Judge-Advocate: You will admit the genuineness of the signatures, whatever he testifies to?

Mr. Rose: Whatever he says about it.

Judge-Advocate: That will save the recalling of this witness and perhaps, others.

Q. Mr. Jordan, will you please furnish me, after you return to New York, with copies of all of these checks?

A. Immediately.

Q. What is the form of certificate you use?

A. We certify a true copy and if it is necessary, we have

a notary in the bank—in the office, who will certify to the fact and attach a notarial certificate as to the correctness.

Mr. Blair: There is no necessity of a certificate of the notary.

Witness: Thank you.

Mr. Rose: The certificate of Mr. Jordan over his signature is enough.

Judge-Advocate: I will again ask of the counsel a slight concession; they seem to be in a conceding mood this morning, there are two or three other checks which I may possibly require, I would like to avoid the necessity of having to recall the Assistant Treasurer, and have him send us copies of those.

Mr. Mackall: We may want to see the originals, he might send the originals and we could send them back.

Judge-Advocate: That interferes with the rule of the sub-treasury, these are sacred papers.

Mr. Mackall: That would be the only possible objection.

Mr. Rose: You can send the copies and then if we want to see the originals after he has sent the copy, you can send them afterwards. You can send the copies and if it is necessary, you can get the originals for us.

Judge-Advocate: I am not sure that it would be necessary.

Mr. Mackall: We will let him send the copies, and, I
78 suppose, if it is necessary that you can get the originals for us.

Mr. Rose: We probably would not object.

Cross Examination.

Questions by Mr. Rose:

Q. Mr. Jordan, you have spoken here several times with reference to the majority of those checks that were paid to a bank, paid to or through the Clearing House by payments, you mean from the assistant treasurer of New York?

A. From the cash of the assistant treasurer.

Q. To that bank?

A. To that bank.

Q. Through the Clearing House?

A. Through the Clearing House.

Q. Will you be kind enough to explain to the Court how payments are made when made through the Clearing House?

A. The checks are gathered up generally the night before or on the morn of the day they are transmitted to us through the Clearing House in a package marked with our name; that

package of each individual bank is receipted for by us over at the Clearing House and is returned to us at the office. The checks are sorted and the payment is made in a lump sum. We are ordinarily, in ninety-nine cases out of one hundred, debited at the Clearing House; that is, we owe money at the Clearing House. In this case the money is made up and paid in a lump sum to the manager of the Clearing House, and about one o'clock or half past one o'clock, we return the checks that we decline to pay, for any reason.

Q. In other words, the checks of all the banks that are members of the Clearing House, that are drawn on the assistant treasurer, are put in one bundle, and turned over to you by the Clearing House manager?

A. Those of each bank are sent in a separate package to me, which comes through the Clearing House and is receipted for by my agent to the Clearing House and brought to the office.

Q. Then the checks which you have drawn on various banks are also sent to the Clearing House?

A. As an off-set.

Q. And the difference between the aggregate of the checks held by you and the checks drawn by you is settled through the Clearing House—the manager of the Clearing House?

A. Paid in cash.

Q. And he divides up the money—the different bank balance due each bank?

A. Correct.

Q. In other words, by that method a bank which has a
79 check deposited with it, that is drawn on you gets credit for the amount of that check by off-set or in cash?

A. In cash.

Q. Not always in cash?

A. So far as we have checks against them or those sent in separate packages back to the Clearing House by us.

Q. As a result of this method the Bank gets credit for the amount of that check?

A. Correct.

Q. You have spoken of several checks as having been paid in cash over the counter. Will you be kind enough to look at this check, number 224451 for \$5,000.00, this is one of the checks which you identified as having been paid over the counter?

A. Yes, sir.

Q. Those are pencil marks; there is a "C"?

A. That means over the counter.

Q. There are some other other pencil marks there ?

A. In this particular case there is one that has a memorandum as to the check being mis-stamped by the Teller, that is one of our Tellers at the counter.

Q. From whom did that check come, when it came to the Clearing House?

A. John Kelly & Company, Bankers in New York.

Q. Can you tell from that endorsement the individual to whom the money was paid over the counter?

A. To his runner.

Q. To the runner of John Kelley?

A. To the runner of his office.

Q. You dont know his name?

A. I do not.

Q. I show you a paper that you have identified as number 269259 for \$100,000.00 and as to which you have testified it was paid over the counter. That also bears a pencil memorandum "OC"?

A. True.

80 Q. Does it not?

A. Yes, sir.

Q. Just above that is the name of the individual?

A. Yes, sir.

Q. Who is the Assistant-Cashier of the Southern National Bank?

A. Yes, sir.

Q. Can you tell to whom the money of that check was paid over the counter?

A. I can most certainly swear that it was a person purporting to be John F. Gaynor, President of the Atlantic Contracting Company, identified by A. C. Carr, or his assistant, accompanying the runner of that Bank and that payment was made to him in person.

Q. That is what you always require?

A. That is a mark of identification and we would not have paid that check without its being so identified.

Q. By the runner of the Bank?

A. By the runner of the Bank.

Q. And the signature of the Bank officer?

A. And the signature of the Bank officer.

Q. And that is true, Mr. Jordan, with reference to all checks where you have stated they were paid over the counter?

A. Every one so marked, that is the method pursued with each one.

Q. Before the Treasurer would pay out money the man who presents a check must be identified by some Bank officer accompanied by a messenger from the Bank?

A. Or some person known to the Teller to be connected with that Bank—it may not be a runner it may be some one else.

Judge-Advocate: Your paying Tellers make payment to persons like myself, or to persons well known, or whose autograph is well known again and again; a man who is perfectly well known would be paid direct upon presentation of a check made payable to his order and endorsed by him, they knowing his signature and knowing him personally?

A. Perfectly correct.

81 By the President: Has any member of the Court any question? There seems to be none.

The Court then, at 12.40 o'clock, P. M., took a recess until 12.5 P. M., at which hour the members of the Court, the Judge-Advocate, the accused, his counsel, and the reporter, resumed their seats.

JOHN B. McCARTHY, a witness for the prosecution, was duly sworn and testified as follows:—

Direct Examination.

Questions by the Judge-Advocate.

Q. Please state your name?

A. John B. McCarthy.

Q. What is your official position under the Government?

A. I am a clerk in the Mail and Record Division, Chief Engineers office, War Department, Washington.

Judge-Advocate: I will state to the court this is another witness where I will pursue the same method as with the Assistant-Treasurer, and let him get away and identify certain papers which are not offered in evidence, but which may be submitted hereafter to the Court.

By the President: No objection.

Q. In the performance of your official duty you have charge of certain records of the Department of Engineers Office of the War Department?

A. I have, sir.

Q. You brought with you certain records from the Engineer Office?

A. I did.

Q. You brought that package with you?

A. I did, sir.

Q. Please state what it contains.

A. Specifications for the improvement of Cumberland Sound, Georgia. Do you want the date?

Q. Yes.

A. August 26, 1892.

Q. If you will give your authority pretty full, Mr. McCarthy, you can save time. When you say contract say contract with whom, give a pretty full description; they are each briefed, are they not?

A. Yes, sir.

Q. Give such description as the brief contains?

A. After the specification are the proposals and abstract of the same. Proposal of Charles C. Ely, William H. Walsh, Edward H. Gaynor, then a contract entered into September 16, 1892 between Captain O. M. Carter, Corps of Engineers, United States Army of the one part and Edward H. Gaynor of Boston, Massachusetts of the other part for constructing jetties at the entrance to Cumberland Sound, Georgia.

Q. That is all the contents of that envelope?

A. Yes, sir.

Q. by President. That, I understand, is the original that is filed in the Engineers office?

Judge-Advocate: Yes, he brought that from the Engineers office with him, one of the originals.

Q. Those papers usually are in triplicate?

A. Quintuplicate.

Q. Quintuplicate, this envelope is marked "Cumberland Sound Number 1, Proposals, &c., \$5,436, Contract 4820, Edward H. Gaynor, September 16, 1892".

I hand you envelope marked number 2, Mr. McCarthy, please describe the contents of that?

A. This contains the Proposals for improving Savannah Harbor, Georgia, September 17, 1892, and the proposals are those of the National Dredging Company, the American Dredging Company, P. Sanford Ross, W. F. McCauley and the Atlantic Contracting Company, there is with them articles of agreement entered into October 22, 1892 between Captain O. M. Carter, Corps of Engineers, United States Army of the one part and the Atlantic Contracting Company of the

other part for constructing training wall, jetties and spur dams in Savannah Harbor, Georgia.

83 Q. Those are original papers pertaining to that contract?

A. Original papers from the records of the office.

Q. Those are contained in envelope number 2, endorsed "Savannah Harbor Proposals, &c., 53—

Witness: 5380.

Judge-Advocate: 5380, contract number 4960, Atlantic Contracting Company, October 22, 1897.

Q. I hand you envelope marked number 3, please state what are its contents.

A. This contains an abstract of the proposals open for the improving of Jekyl Creek, Georgia and the Inside Route between Savannah, Georgia and Fernandina, Florida, February 7, 1893, and the proposal of the Atlantic Contracting Company and Collin McK. Grant and the Contract Articles of Agreement entered into March 1, 1893 between Captain O. M. Carter, Captain Corps of Engineers, United States Army of the one part and the Atlantic Contracting Company of New York of the other part for constructing the training wall in Jekyl Creek, Georgia and the Inside Water Route between Savannah and Fernandina, the contract being numbered 5253.

By the President: One of the five originals?

Judge-Advocate: Certainly.

Witness: One of the five originals.

Q. This is number 3, this envelope, Jekyl Creek proposals and so forth 1236, contract number 5283, the Atlantic Contracting Company March 1, 1893.

I hand you envelope number 4, please state the character of its contents and describe them.

A. This contains an abstract of bids for constructing jetties at the entrance to Cumberland Sound, Georgia September 29, 1894, with the proposals of Anson M. Bangs, R. G. Ross and Company, Rittenhouse Moore and the contract Articles of Agreement entered into November 15, 1894 between O. M. Carter, Captain Corps of Engineers, United States Army of the one part and Anson M. Bangs, Fayetteville, New York of the other part, for constructing jetties at the entrance to Cumberland Sound, Georgia, the contract being numbered 5811.

84 Q. Those are the original papers?

A. The original papers.

Judge-Advocate: That envelope is marked number 4, Cumberland Sound, contract 2440, November 15, 1894.

Q. I hand you now envelope marked number 5, please give the character of its contents.

A. It contains an abstract of the bids for improving the Altamaha River, Darien Harbor and Jekyl Creek, Georgia and the Inside Water Route between Savannah, Georgia and Fernandina, Florida, April 6, 1895, and proposals of Cordex and Bokeman, William T. Gaynor, Charles C. Ely and the contract Articles of Agreement entered into April 20, 1895 between Captain O. M. Carter, Captain Corps of Engineers, United States Army of the one part and William T. Gaynor, Fayetteville, N. Y. of the other part for constructing and repairing training walls and spur dams in the Altamaha River, Darien Harbor and Jekyl Creek, Georgia, the contract being numbered 6049.

Q. Those are all original papers?

A. All original papers and the records of the office.

Judge-Advocate: This envelope is endorsed number 5, Altamaha River and Darien Harbor Proposals number 10-619, contract 6049.

Q. Is that a little ink lost from the 4?

A. It is 6049.

Judge-Advocate: William T. Gaynor, April 20, 1895.

Q. I hand you now envelope numbered 6, please describe the contents.

A. This contains an abstract of the bids for improving the harbor at Savannah, Georgia, dated September 8, 1896, with the proposals of Virginia Dredging Company, P. Sanford Ross, the Savannah Dredging Company, the American Dredging Company, the Atlantic Contracting Company, John L. Grine, Rittenhouse R. Moore, with the contract Articles of Agreement entered into October 8, 1896 between Captain O. M. Carter, Corps of Engineers United States Army of the one part and the Atlantic Contracting Company of New York, State of New York of the other part for improving the harbor of Savannah, Georgia, constructing training walls, closing dams or breakwaters, the contract being numbered 6515.

Q. Those are all original papers?

A. Original papers.

Judge-Advocate: This envelope is number 6, and endorsed Savannah Harbor Proposals, and so forth, 170182, number 6515, Atlantic Contracting Company, October 8, 1896.

Q. I hand you envelope number 7, state what its contents are.

A. This encloses the abstracts of bids for improving Cumberland Sound, Georgia and the proposals of the Atlantic Contracting Company, Jacob Friday and Sons, John L. Grine and the contract Articles of Agreement entered into October 8, 1896 between Captain O. M. Carter, Corps of Engineers, United States Army of the one part and the Atlantic Contracting Company of New York City, New York, of the other part for constructing jetties at the entrance to Cumberland Sound, Georgia. Contract being numbered 6517.

Q. And these are all original papers? From the files of the Department?

A. All original papers from the files in the office.

Q. Here is an envelope, number 10, please describe the contents.

A. This is case number 17,456, Office of the Chief of Engineers, it is the correspondence relating to what is known as the Paulding case, there are a number of letters and enclosures and press copies.

Q. How many papers are there in there. I think you will find an endorsement on the other side. You have that reversed. Please describe those papers, Mr. McCarthy.

A. These are papers connected with the case which is based on a communication from G. Paulding.

Q. How many papers are there in that envelope, Mr. McCarthy.

A. About 14 papers, separate papers.

Q. They relate to the case called the Paulding Case?

A. Paulding Case.

86 Q. All original papers?

A. These enclosures of 17,456.

Q. The number of papers you mean. There may be with them letter press copies in addition to that number which you have given.

A. I think my number of 14 will cover everything there is.

Judge-Advocate: Everything there is. The envelope is marked number 10 Paulding Case.

Q. I hand you now envelope number 11, please state what it contains, or the number of papers that it contains.

A. There are number of papers and memoranda relating to the improvement of Cumberland Sound.

Q. How many are there in that, Mr. McCarthy?

A. There are 13 papers, there are 16 papers with the envelope and press copies of letters, I have not opened them, press copies and memoranda.

Q. You count them as one piece?

A. One piece, that would make 16 pieces.

Q. Those are all originals from the War Department?

A. All originals from the files of the office.

Q. This envelope is marked number 11, endorsed Cumberland Sound?

A. And Savannah Harbor.

Judge-Advocate: And Savannah Harbor.

Judge-Advocate: That is all, Gentlemen, are there some questions you wish to ask the witness?

Mr. Rose: No question.

Judge-Advocate: Has the court any question they will like to ask this witness?

By the President: No questions.

Judge-Advocate: Mr. President, I have nothing further to offer for the day and may as well say here, as at any time in the case, that the court must be well aware of the embarrassment under which I necessarily labor, having been called into this important case without any previous knowledge about it whatever beyond that slight reference to it which

87 was made about it in the Army papers, and until last Saturday night, or until last Friday I should say, in Washington, was the first time I saw the charges, and it was Sunday afternoon before I got hold of any of the papers in relation to the case, and yet I did not feel justified in the further delaying of the trial of the accused officer and I shall necessarily be compelled to ask the indulgence of the court, and of the counsel for the accused from time to time because from the magnitude of the case, and from the large number of papers and documents connected with it it will be utterly impossible for me to present the case in such manner as I would have been glad to have presented it in consecutive form from one specification to the other. I can promise the court my best endeavors to the extent of my powers, both physically and mentally in the case.

The President: Will you be ready to proceed to-morrow morning at 10 o'clock?

Judge-Advocate: Yes, sir, or half past 10 o'clock, I would like to talk to my witnesses.

Mr. Charlton: May it please Your Honor, the defense desires to say it thoroughly appreciates the position of Colonel Barr and will thoroughly co-operate with him in any time he may desire to have.

The President: If there is no objection, court will adjourn until to-morrow morning at half past 10 o'clock.

The Court Then at 1.30 O'clock P. M., Adjourned to Meet at 10.30 O'clock A. M., To-morrow/

THOMAS F. BARR

Col & Asst. Judge Adv. Genl.

Judge Advocate.

United States Court Room,
Savannah, Georgia,
January 14, 1898.

The court met pursuant to adjournment at 10.30 o'clock A. M.,

Present:

All the members of the court and the Judge-Advocate.

The accused, his counsel and the reporter were also present.

88 Judge-Advocate: I propose to offer in evidence this certificate. (Here the paper is handed counsel for the accused)

No Objection.

Judge-Advocate: Mr. President, I offer in evidence certificate of incorporation under the laws of the State of West Virginia, of the Atlantic Contracting Company, as follows: "Certificate of Incorporation, State of West Virginia. I, Wm. A. Olney, Secretary of State of the State of West Virginia, hereby certify that an agreement duly acknowledged and accompanied by the proper affidavits, has been this day delivered to me, which agreement is in the words and figures following: 'The undersigned agree to become a corporation by the name of the Atlantic Contracting Company, for the purpose of building or constructing breakwaters, jetties, piers, wharves, locks, bridges, tunnels, canals and all works of river, harbor and other internal improvement; for the purpose of operating such works, when necessary, during the progress of their construction; for the purpose of buying, owning, selling, and mortgaging real and personal property necessary for the carrying on of such operations; for the purpose of transacting a general contracting business. The said corporation shall keep its principal office or place of business at the City of New York, in the County of New York, and State of New York; and it is to expire on the thirty-first day of December, in the year, 1931. And for the purpose of forming the said corporation, we have subscribed

the sum of Thirty Thousand Dollars (\$30,000) to the capital thereof, and have paid in on said subscription the sum of Three Thousand Dollars (\$3,000.) The capital so subscribed is divided into Six Thousand (6,000) shares of the par value of Five Dollars (\$5.00) each which are held by the undersigned respectively as follows, that is to say: John F. Gaynor, Fayetteville, New York, \$14,965; number of shares, 2,993; Benjamin D. Greene, New York City, New York, \$14,960; number of shares, 2,992; William T. Gaynor, Fayetteville, New York, \$25; number of shares 5, Robert H. Green, New York City New York, \$25.00; number of shares, 5; James E. Chandler, New York City, New York, \$25.00; number 89 of shares, 5. Given under our hands at the City of New York, this Nineteenth day of July, 1892. John F. Gaynor, Benj. D. Greene, William T. Gaynor, Robert H. Greene, James E. Chandler.

Wherefore the corporators named in the said agreement, and who have signed the same, and their successors and assigns, are hereby declared to be from this date until the Thirty-First day of December Nineteen Hundred and Thirty-One, a corporation by the name and for the purposes set forth in said agreement.

Given under my hand and the great Seal of the said State, at the City of Charleston, this Twenty-Second day of July, Eighteen Hundred and Ninety-Two. William A. Ohley, Secretary of State."

Mr. Blair: We will admit, if the court please, that the Atlantic Contracting Company is a corporation organized under and pursuant to the laws of the State of West Virginia.

Judge-Advocate: I so understood that counsel would so agree, but I desired to have upon the record the names of the incorporators.

The President: You can read it.

Judge-Advocate: The certificate is properly signed, I need not read that?

Mr. Blair: Oh, no.

Judge-Advocate: I desire to call attention of counsel to the fact that the present Secretary of State in giving his certificate, by a clerical error makes the certificate given as 1891 in response to a request from the War Department for this certificate, and the Governor's certificate is dated the 30th day of December 1897. I thought the Governor's certificate covered that without returning it for the clerical error.

Counsel for the accused: We will make no point about that.

The President: It will be received.

Judge-Advocate: It will be received and attached to the record and marked "Exhibit 1".

Judge-Advocate: I now offer in evidence, gentlemen, this contract, I understand you have no objection (No Objection).

Judge Advocate: I now offer in evidence the Articles 90 of Agreement between the accused and the Atlantic Contracting Company for constructing jetties at the entrance to Cumberland Sound, Georgia. The contract, which was approved October 20, 1896, by A. MacKenzie, Acting Chief of Engineers, this is one of the existing contracts with the Atlantic Contracting Company.

The President: That is one of the originals?

Judge-Advocate: This is one of the originals, that has been identified yesterday by the clerk of the War Department.

Judge-Advocate: For the purpose of reference, I desire to have this go on the record and I will read as to the details of the work.

The President: It will be received by the court.

Judge-Advocate: Paragraph 36 of the advertisement under the heading "Details of the Work", "Outline of Previous Work". Two jetties have been partially constructed by the United States at the entrance to Cumberland Sound. The north jetty springs from Cumberland Island and extends seaward a distance of about 18,285 feet, measured along the axis of the work. The south jetty springs from a point on Amelia Island, about 5,800 feet East 18 degrees South from the Eastern bastion of Fort Clinch, Florida, and extends seaward a distance of more than 10,000 feet, measured along the axis of the work.

Paragraph 37. Work Contemplated. The River and Harbor Act of June 3, 1896 authorized works as follows: "Improving Cumberland Sound, Georgia: Continuing improvement Five Thousand Dollars: Provided that Contracts may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate two million, three hundred and forty five thousand dollars, exclusive of amount herein and heretofore appropriated." Operations under these specifications contemplate the establishment of a channel across the bar 19 feet deep at mean low water. For this purpose it is proposed to extend and raise the existing jetties with brush mattresses loaded with stone. All work

will be commenced and prosecuted at such point or points
91 and in such manner as may be directed by the Engineer
Officer in charge.

Paragraph 38. Mattresses. Any of the following designs
for mattresses may be used at the option of the Engineer
office in charge:

First Design.—This mattress is a raft of round logs, not
less than 12 inches in average diameter and not less than
(9) Nine inches in diameter at the small end, placed in close
contact side by side, and firmly held by transverse pole bind-
ers, spiked or bolted to them. The binders will be small logs
or poles, not less than Five (5) inches in diameter at the
small end and placed not more than Eight (8) feet apart, and
those on the outside will be close to the ends of the logs.
There will be placed upon the raft of logs a layer of live
wood brush sufficient to give Six (6) inches in thickness in
the finished work, secured in place by poles, lashed to the
binders of the rafts.

Second Design.—This mattress will consist of a layer of
closely placed fascines, crossed at right angles by a second
layer of like fascines, placed at intervals of Six (6) feet. The
brush must be carefully laid so as to break joints and to make
a continuous fascine extending completely across the mat-
tress. The fascines must be firmly held between the binding
poles made of live saplings of pine, or other timber of a
kind approved by the Engineer Officer in charge. These
must be straight and of slight taper and must not be more
than Five (5) inches in diameter at the butts, nor less than
Two (2) inches in diameter at the tips. They must be spliced
together with long scarf joints in a manner satisfactory to
the Engineer officer in charge and so as to extend completely
across the mattress. Either one or two layers of these poles
will be used at the top and at the bottom of the mattress,
as may prove necessary for holding the mattress until in
place and ballasted. The binders in each layer must be placed
parallel to each other at intervals of Six (6) feet, and as
required by the Engineer officer in charge. The fascines and
binders must be firmly compressed and lashed together at
intervals of Six (6) feet in a manner satisfactory to the En-
gineer officer in charge.

92 Third Design.—This mattress will consist of a bot-
tom grillage of poles of live saplings of piles or other
timber of a kind approved by the Engineer officer in charge.
The poles must be straight, of slight taper, of an average

diameter of from Four (4) to Five (5) inches, and not less than three (3) inches at the small end, and must be placed from Four (4) to Eight (8) feet apart between centers, both longitudinally and transversely, and spliced together with long scarf joints in a manner satisfactory to the Engineer officer in charge. Upon this Grillage will be placed a layer of closely compacted fascines, surmounted by a top grillage similar in design to the one at the bottom, the poles of each grillage will be securely fastened together by suitable wire or rope lashings, and the upper and lower grillage will also be securely fastened together in such manner as the Engineer officer in charge may approve.

In any of the foregoing designs the logs and poles used may be loblolly or other timber of a kind approved by the Engineer officer in charge, and must be sound, of gentle taper, and sufficiently straight. Logs will not be used that do not fit closely enough together to hold all the stone securely, even without the use of brush. No extra allowance will be made for logs that are larger than the sizes called for in these specifications. Towing becketts, buoys, and lines, and range masts must be placed as directed. The United States reserves the right to make such alterations in the details of construction, or in material, as may be deemed best during the progress of the work, providing that should such alterations material vary the cost of the mattress the price to be paid shall be increased or diminished proportionately, such change of price being agreed upon before the alterations in the mattress are made. The size of the mattress will be fixed by the Engineer officer in charge from time to time. In general, they will be from Twenty (20) to One Hundred (100) feet in width, have such lengths as may be convenient for handling, and will be laid in sections of convenient length in juxtaposition, or with such lap as may be
93 required. No mattress will be accepted until properly placed in the work and secured there by a layer of stone of such thickness not exceeding One (1) to Two (2) feet, as may be required by the Engineer officer in charge. Gaps between the edges of adjacent sections of mattress will be filled with stone by the contractor, to be paid for at a price equal to the price of mattress work. Portions of the mattress lying more than Four (4) feet outside of the position assigned will not be accepted or paid for. Separate bids for the designs for mattresses are not desired. One price only should be given in the proposals, and the price so stated will be

understood as referring to any of the designs which may be required by the Engineer officer in charge.

Paragraph 39. Fascines.—All Fascines will be made of live brush of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the Engineer officer in charge. The fascines will be from Thirty (30) to One Hundred (100) feet in length, and must be compressed tightly, by an approved form of chocker, to a diameter of Nine (9) inches at intervals of Two (2) feet, where they must be bound firmly with wire or tarred rope of approved strength, the brush used will be as straight and well trimmed as can be obtained; the fascines shall be carefully and thoroughly made and handled with care. They shall be piled up on shore, or on barges for measurement in such way as the Engineer officer in charge may direct.

Paragraph 40. Stone.—First Class Stone.—This stone must be of good quality and not liable to disintegrate under the action of the weather or of salt water. It must be hard and weigh not less, dry, than One Hundred and Sixty-Five pounds (165) to the cubic foot, blocks must be of suitably random size, varying in weight from one ton to ten tons, but Fifty (50) per cent of the blocks must weigh Five tons (5) tons or over. In shapes the blocks must be angular, the smallest dimension being not less than one third the greatest. Quarry stone is required; no boulders nor rip-rap from boulders will be received.

Second Class Stone.—This stone must be of good quality and not liable to disintegrate under the action of the weather or of salt water. It must be hard and weigh not less, dry, than 155 pounds to the cubic foot. Blocks must be of suitable random sizes, varying in weight from Five Hundred pounds (500) to Five tons (5), but Fifty (50) per cent of the blocks must weigh One (1) ton or over. In shape the blocks must be angular, the smallest dimension being not less than one third the greatest. Quarry stone is required; no boulders nor rip-rap from boulders will be received.

Third Class Stone.—This stone must be of good quality and not liable to disintegrate under the action of the weather or salt water. It must be hard and weigh not less, dry, than One Hundred and Fifty (150) pounds to the cubic foot. The blocks must be of suitably random sizes, varying from Twenty-Five (25) to One Thousand (1000) pounds. In shape the blocks must be angular, the smallest dimensions being not less than one third the greatest.

Fourt Class Stone.—This stone must be of good quality and not liable to disintegrate under the action of the weather or of salt water. Its specific gravity must not be less than 2.4 and it must be as hard as hard-burned brick. The blocks must be of suitably random sizes, varying in weight from Fifteen (15) to Two Hundred and Fifty (250) pounds. In shape, the blocks must be as nearly cubical as possible, the smallest dimension being not less than one third the greatest.

The quality, size and shape of all stone must be satisfactory to the Engineer Officer in charge. All stone must be placed in any position of the jetties, or spurs, or on shore between high and low water, as required by the engineer officer in charge. All stone must be placed in any position on the jetties or spurs, or on shore between high and low water, and required by the engineer officer in charge. Such stone when used above mean low water shall, at the option of the said Engineer Officer in charge, be either placed in position by hand or thrown on rip-rap. Stones placed more than Two (2) feet outside of the positions assigned will not be accepted or paid for.

Paragraph 44.—Prices.—The bidder shall state on the form hereto appended (1) a price per square yard for mat-
95 tresses; (2) a price per ton of Two Thousand pounds (2000) avoirdupois for first class stone; (3) a price per ton of 2000 pounds avoirdupois for second class stone; (4) a price per cubic yard for third class stone; (5) a price per cubic yard for fourth class stone; and (6) the plant which he proposes to use in the works.

The prices are for the materials in place in the work and are to cover the cost of all labor, appliances, and contingencies connected with it, excepting only the salaries of the agents of the United States engaged in the supervision and inspection of the work and the measurement of material.

For the purpose of canvassing bids the following will be assumed as the approximate quantities of material, to-wit: Two Hundred Thousand square yards of mattress work; 50,000 tons of first class stone; 75,000 tons of second class stone; 100,000 cubic yards of third class stone, 250,000 cubic yards of fourth-class stone; but the foregoing quantities are liable to be increased or diminished, actually or relatively as may be found necessary.

The said party of the second part shall furnish to the satisfaction of the said party of the first part all steam tugs, barges, derricks, machinery, apparatus and appliances, as well as

such supervision and labor as may be required, for a vigorous prosecution of the work of constructing jetties at entrance to Cumberland Sound, Georgia, observing and fulfilling all the requirements and stipulations of said specifications and if its proposal dated September 7, 1896.

The said party of the first part shall pay to the said party of the second part One Dollar and Ten cents (\$1.10) per square yard for mattresses; Five Dollars and Twenty-Five cents (5.25) per ton of 2,000 pounds for first class stone; Five Dollars and Twenty-Five cents (\$5.25) per ton of 2,000 pounds for second class stone; Three Dollars and Ninety cents (\$3.90) per cubic yard for third class stone; and Three Dollars and Fifty cents (\$3.50) per cubic yard for fourth class stone, it being understood and agreed that no parcel or final payment shall be made until the requirements and 96 conditions of all and singular the papers hereunto attached, or herein referred to, and forming a part of this contract, shall have been complied with in and to their full intent and meaning by the said party of the second part.

Judge-Advocate: A copy of this contract will be attached to the record and marked "Exhibit Number 2".

Judge-Advocate: The whole contract in its present shape is offered in evidence.

Judge-Advocate: There is a similar contract, varying somewhat as to the provisions, quantities and payments, this is the October 27, 1896, contract.

Mr. Blair: There is no objection to that.

Judge-Advocate: I offer now in evidence the Articles of Agreement entered into October 8, 1896, between O. M. Carter, the accused, of the one part and the Atlantic Contracting Company of New York City, New York of the other part for improving the harbor of Savannah, Georgia, constructing training walls, closing dams or breakwaters, approved October 27, 1896. This contract is almost like the other varying,—it is like the other, exactly as to the specifications in relation to mattresses and stone also, I understand varying only as to the amounts to be used in the work and the sums to be paid therefore.

The President: It will be received.

Judge-Advocate: It will be before the court for its inspection and consideration from now on and a copy of this contract will be attached to the record and marked "Exhibit Number 3".

Judge-Advocate: I desire to state to the court that with

each of the contracts that have been submitted this morning there are various papers which may be hereafter submitted and which were identified yesterday by the official of the War Department and testified to.

97 CAPTAIN CASSIUS E. GILLETTE, Captain Corps of Engineers, United States Army, a witness for the Prosecution was duly sworn and testified as follows:

Direct Examination.

Question by the Judge-Advocate:

Q. Please state your name and rank?

A. Cassius E. Gillette, Captain of Engineers, United States Army.

Q. What is your station?

A. Savannah, Georgia.

Q. How long have you been on duty in Savannah?

A. Since the 20th of July, 1897.

Q. Whom did you relieve from that duty?

A. Captain O. M. Carter, Corps of Engineers, United States Army.

Q. That is the accused officer here present?

A. Yes, sir.

Q. What are the nature of your duties?

A. In general, I have charge of the fortifications on the Atlantic coast of Georgia and of the River and Harbor Improvements on the Atlantic coast of Georgia and running into the Atlantic Ocean, except the improvement of Cumberland Sound, Georgia and Florida.

Q. What works were under your supervision at the time you first assumed duty at Savannah?

A. Those mentioned with the addition of the improvements of Cumberland Sound.

Q. When were you relieved from the supervision over Cumberland Sound?

A. On December 6, 1897 the transfer was made. The order for the transfer was December 4, 1897.

Q. And the date of your arrival in Savannah to assume duty was what?

A. July 20, 1897.

Q. What is the name given to the entire territory over which you had supervision at that time?

A. It is generally called the Savannah District.

98 Q. Savannah District, of what character?

A. River and Harbor improvement.

Q. You have a map of these improvements to which you have referred, it is here in the court room, is it not?

A. Yes sir. There is one on that desk, the large map.

Q. Please point out, Captain, the works in process, the work of improvement in process of construction in the district first placed under your charge when you assumed duty here.

A. The work of improvements going on at Savannah Harbor at Cumberland Sound, and there was also dredging partly in Savannah Harbor, and dredging along the inside route near Beaufort.

Q. What is the character of those improvements.

A. The Improvements at Savannah Harbor consisted in building what is known as detached extension to the Oyster Bed training wall or partly a breakwater. Tybee breakwater at the mouth of the Savannah River. The improvement to Cumberland Sound was the building of two jetties extending Eastward from the mouth of the sound, one springing from Cumberland Island in the State of Georgia, which is shown about that point (indicating), the other springing from Amelia Island to Fernandina, on which the town of Fernandina is now located in the State of Florida. The improvement is called the improvement of Cumberland Sound, but the port is Fernandina on Amelia River in Florida.

Q. That is all the description you care to give of the work that was under your supervision?

A. The improvement at Savannah Harbor consisted in building a breakwater or detached extension for a training wall or two training walls. The Oyster Bed training wall and the Cockspur Island training wall. They are two jetties at the mouth of the river. The breakwater is an extension of the one on the left as you go down the stream. It is out at sea for some distance, that is out from the other training wall and is designated to protect shipping in Tybee roads against North-east gales and also to help throw greater quantity of water across the outer bar. It was being improved

99 by sinking mattresses on the sand.—mattresses built of brush and then loaded with rock. It was under contract with the Atlantic Contracting Company. The improvement of Cumberland Sound consisted of building two jetties analogous to the breakwater built at the Savannah Harbor.

Q. Did work under these contracts continue for all the period during which you were in charge of the engineering district?

A. No, sir; work entirely ceased on both of them about the same time, about October 8, 1897.

Q. About October 8?

A. Yes, sir.

Q. Who were the contractors for the Savannah Harbor improvements?

A. The Atlantic Contracting Company, and also, the Atlantic Contracting Company had both contracts.

Q. You will please explain to the Court, Captain, the method pursued in the engineering department to determine the location of work of the character to which you have testified for the improvement of river and harbors; that is, generally so, so that the Court and myself and perhaps counsel, may be instructed as to the methods pursued?

A. The initial step in an improvement consists in a preliminary examination ordered by Congress. If favorable recommendation is made, then a survey is ordered and a project submitted for approval. This project is usually made like the ones under consideration by a Board of Engineers ordered for the purpose. The project gives the general plan of improvement, whether it is to be jetties or dredging or both or analogous works; sometimes this project is subject to revision, generally by another Board of Engineering Officers. After the project is approved money is appropriated by Congress to carry out the project. When the Chief of Engineers who is in general charge of all the improvements, is notified of an appropriation for River and Harbor improvement; he notifies the individual officer in charge of the particular work, of the amount appropriated and requests a project for its expenditure. That project is supposed to be in carrying out the original general project and usually goes into more details in the execution of that part of the work which it is proposed to do. It also recommends whether the work shall be done by contract, or be done by purchases by the Engineering Officer contracting and the employment of hired labor. If the improvement is to be by contract, authority to advertise for bidders and to print the specifications is obtained. The specifications are printed and distributed and on a certain day, which is usually 30 days from the date of advertising—it is specified in the contract—the bids are opened. If there is no reason for not doing so, the contract is awarded to the lowest

bidder, unless there is some manifest impediment to his doing the work. The Government reserves the right to reject any or all bids. The usual procedure is to award the contract to the lowest bidder, with the approval of the Chief of Engineers. Then a contract is entered into between the Engineering Officer and the bidder, whether the bidder is an individual, a firm or a corporation. The contracts are executed in quintuplicate, four of them, signed. They require the approval of the Chief of Engineers. After that the work is carried out under the supervision of the Engineering Officer in charge and such assistants as he may employ, and payments are made by him to the contractors in accordance with the terms laid down in the specifications.

Q. Have you had any experience heretofore, Captain, in work of a similar character to that which was going on in Cumberland Sound and Savannah Harbor when you reached here?

A. I had charge of a work of improvement at Humboldt Harbor, Cal., which is somewhat analogous. The improvements consists of two parallel jetties running out into the ocean. It is worked on quite a different plan, as the Pacific Ocean in that vicinity is much more rough and stormy than the Atlantic Ocean, so that the mattresses and rock that are placed in a jetty from a trestle with a railroad track on it is built out from shore. Here the materials are put in 101 from barges. In this vicinity the weather and the sea is smooth a much greater number of days in the year than it is there in that country; so the work can be done from barges. But there it would be practically impossible to do it; but the jetties themselves are upon an analogous plan. That was an improvement, the total cost of which was about one million and three quarters.

Q. You found when you reached here these two existing contracts with the Atlantic Contract Company, did you make yourself familiar with their terms at once?

A. Yes, sir.

Q. At how early a period after your arrival did you make any payment upon the work performed under the contracts?

A. I made one payment on the first of August, 1897—the first or second,—one on the first few days in August, I do not remember it exactly.

Q. Is that the only payment made under them?

A. Yes, sir.

Q. Before the work was suspended?

A. Yes, sir.

Q. When did you first make personal examination of the work being performed under those contracts?

A. On July 30, I inspected the work at Cumberland Sound; I had previously gone to Tybee to make an inspection of the work there in connection with the contract for building the fortifications there. I inspected the fortifications, but found that the breakwater work was entirely under water and a mattress for use in it would not be there for a day or two, as they came from some miles in the opposite direction, miles to the northwest, so I did not inspect a mattress that day. When I went to Cumberland Sound I inspected the office work, examined the site of the jetties; they were mostly under water too. A mattress was being sunk out at sea when I reached the office, which is two or three miles from the point where the work was being done. Another mattress was to have come in that night, from up the St. Mary's River, 102 where they were to be built. They were putting in one regularly every day. I waited for it, but it did not come. I stayed over night, expecting that it would arrive in the night, but it did not get there until some time the following afternoon, then I inspected it.

Q. What was its character?

A. It consisted of a big mass of brush, with leaves and twigs, piled on a barge. The barge had built up on it an arrangement of cross timbers, called "gins", long timbers, about a foot or so in diameter, flattened on two sides, and placed cross-wise with the barge, about two feet apart, the whole length of it. They were balanced in the middle; the middle point being about 5 feet above the deck of the barge, and so arranged with props under one side that they could be knocked out, and when that was done, the preponderance of the mattress, being on that side, would slip off the barge. From the top of the timbers, which are called "gins", to the top of the mattress, I measured in a number of places, and the average thickness of the whole mass was seven and nine tenths feet. I measured it or I had it measured by Marion Twiggs, the Assistant Engineer in charge, and Mr. John M. Hall, the inspector. We measured it by Twiggs getting on top of the mattress, with a sounding pole, a pole used for making soundings out on the bar, where there is from 6 to 12 feet of water, or 20 feet. This pole was pushed down through the brush to the bottom in the—

Q. Through the interior?

A. Yes; right through the body of the mattress, in a symmetrical set of places. Mr. Hall got under the mattress, and when the bottom of the pole was level with the bottom of the structure, he informed Mr. Twiggs and Mr. Twiggs noted the depth.

Q. This measurement was in your presence?

A. It was in my presence, yes, sir.

Q. You heard the announcement?

A. I heard the announcement every time the pole was 103 at the bottom, and I saw myself what the reading of the pole gave at the top. The feet and tenths were marked on the pole. The externals of the mattress on the bottom was a grillage of pine poles, that is, they were pine poles placed about 8 feet apart in one direction and corresponding poles placed about 8 feet apart in the opposite direction at right angles to those. Each pole was continued clear across the mattress by other poles lashed to it with wire, with several feet of lapping. On top of the mattress was a similar arrangement of poles—a similar grillage. Sticking out of the mattress at various places on the ends and sides were the ends of other parallel similar poles, apparently forming parts of similar grillages or half grillages running through the mattress separating it into different layers as I afterwards found out. That was not apparent at first glance.

Q. You could not perceive that this mattress was laid in courses at the first glance. For what reason?

A. It was so brushy; so many leaves and twigs sticking out of it in all directions.

Q. Do you know what the component part of each course of mattress consisted, or how many were used in the construction of each mattress?

A. There were 8 courses in this mattress, as I found on further examination, being informed of that fact by the assistant Engineer, separated by these poles running through it, and the apparent construction would indicate that each layer of brush was put down in bundles, and very loose bundles, and then a grillage or a half grillage. That is, poles running in opposite direction at right angles, or a single layer running one way of the mattress, and another layer of brush and another layer of poles, and so on to the top. I could not see for myself, that that was the case, but I believe that each layer of poles was wired to the bottom layer by iron wires. There was some evidence that the brush was in bundles. It took a very close examination to see that it was. Here and

there a string, a single strand of what is called spun yarn,
104 it looks like half a string of tarred rope without much tar
on it. It usually has a little tar.

Q. That has a technical meaning, "spun yarn"?

A. Yes, a single strand of spun yarn. It is probably as
strong, but not twice as strong as a single string of good
grocers twine.

Q. Could it be used to successfully choke a bundle of that
character?

A. It would hold a bundle of brush in good shape for
handling, it could not be bound very tightly with it, with any
expectation of permanency.

Q. Does that quite answer my question, has "choking" a
technical meaning in the profession?

A. Yes, sir.

Q. Was that spun yarn of sufficient strength to enable
sufficient choking to be done to the bundle?

A. No, sir. A fascine to be choked as that is the term I
understand you want, would have to be compressed, if it were
fastened according to these specifications, very much more
tightly and have a much greater strain in the binder than a
single strand of spun yarn would stand.

Q. My unfamiliarity with the subject, of course, leads me
to ask questions which would not have a direct bearing, and
I may not understand choking, I would like to have you ex-
plain, so I can understand it, and perhaps, some members of
the Court do not understand what is choking for, that rope
yarn is used for any purposes in the construction of a fas-
cine.

A. Do you mean fascines as specified in these specifica-
tions.

Q. Any fascines, yes, the fascines as specified in these
specifications.

A. A fascine, the word fascine, means cylindrical bundle
of rods or small sticks tightly bound at short intervals, these
specifications for Cumberland Sound required that the fas-
cines shall be tightly choked at intervals of two feet to a
diameter of 9 inches, where they are to bound with wire
105 or tarred rope of approved strength—can I have a copy
of those, I may not get those exactly right—(Copy of
specifications is here handed the witness) The fascines will
be from 30 to 100 feet in length and must be compressed
tightly by an approved form of choker to a diameter of 9
inches at intervals of two feet where they must be bound

firmly with wire or tarred rope or approved strength." I do not know, of course, what kind of a choker was used to bind these bundles.

Q. Then a choker would be used before they were tied with the rope yarn?

A. That's the idea, yes, sir.

Q. That is the point that I wished to get, that is the information that I wanted for myself, and probably some member of the court.

A. Fascines are usually made by an arrangement of cross stakes driven into the ground two feet apart or thereabouts, forming a continuous saw horse. The brush is trimmed so that single limbs are placed into the top angle of these stakes and a rope placed around at intervals of two feet. The rope being fastened and is thirty feet long, which is just long enough to go around the bundle each end of that rope is fastened into a hand spike about a foot from the end, then with a man on each end of the hand spike they bear down so that the rope is drawn, the circle of rope, is drawn tight and the circle made smaller and smaller, and then before removing the choker, as this hand spike and rope is called, the binder is put around there usually of wire, that is what is meant by choking.

Q. Does that require intelligent labor, Captain?

A. Any ordinary laborer could be trained to do it, there was no indication in the mattress I saw that anything like that kind of work had been done.

Q. You, of course, only saw the top mattress, the upper course?

A. I only saw the top course, yes sir. I could know what was in the second course because I tried to walk across the mattress and could not do it, except by walking on one 106 of the poles of the top grillage. The brush was so loose and so fine, so little of it, that in trying to walk across, if you stepped off a pole, I went in several times, nearly to my waist into the brush.

Q. The surface then, would not retain the weight of a man?

A. No, sir.

Q. Not being sufficiently compressed?

A. No, sir.

Q. How many square yards were there in those courses of this mattress on the scow, of which you have testified?

A. The mattress was in two divisions; the lower four

courses were about 100 feet by 50 feet. The upper four courses were about 80 feet, as I remember, it by 50 feet—it was smaller. I did not figure it out myself, but the assistant engineer made it something over 3,000 square yards. The price was a dollar and ten cents per square yard, that is, counting each of those layers as a separate mattress, making the total cost of the mattress about \$3,668.00, as I remember it.

Q. Did that mattress in regard to which you have testified, meet the requirements of the specifications contained in the contract with the Atlantic Contracting Company?

A. It did not.

* * * *

120 Q. Was it a mattress of as much value as a mattress of the lowest type named in the specifications, or of as much intrinsic value? or of as great cost in construction?

A. I do not know what is mean by "lowest type in the specification", there are three types.

Q. I mean the third type?

A. The third type. It was not so valuable as the same number of square yards of the third type. In my opinion, the 8 courses, or 8 mattresses, were about as valuable, perhaps a little more valuable, than one mattress built according to the third design and not so valuable as two. In my opinion, based upon my experience as an engineer, and investigation of the facts connected with the construction of this mattress, its cost per square yard was about one sixth of the cost per square yard of a mattress built according to the third design and somewhere about one tenth of the price paid in the contract per square yard for mattresses.

Q. By that, you mean the cost of production?

A. Yes, sir.

Q. Of one of those mattresses?

121 A. Yes, sir. The cost per square yard of this mattress that I inspected in the works, I believe to be between 10 and 15 cents per square yard.

Q. Was that sunk or taken to the place for sinking?

A. It was.

By the President: What was that question?

Judge-Advocate: If it was taken to where it was to be sunk.

Q. That was its cost of manufacture and assembling different bundles of brush, placing it on the scow and taking it to the place on the works and sinking it?

A. Yes, sir.

Q. As to this particular mattress to which you refer, was that ever sunk in the works?

A. Yes, sir.

Q. To your knowledge?

A. I was present when it was sunk.

Q. That is the only mattress that you have ever seen that was used in that work?

A. No, sir; I have seen two others.

Q. At what time?

A. A few days after this one was sunk, I inspected another one built, I believe, within two days after this first one. I also at the same time inspected an experimental mattress, which I had ordered built, or rather four mattresses built according to the third design of the specifications and piled up on top of one another on a barge similar to the others. The first of these mattresses being one built by the contractor without any instructions from me, was similar to the first one I inspected, in that it was in the same shape. It was evidently built of the same kind of bundles, but they had been placed in layers much more closely together, the others had apparently been thrown down adjacent to each other, but in this next one, the bundles had been apparently forced together, so there was unquestionably between one
122 third or one half more brush in it and I could walk across it without walking a pole. The next mattress I inspected was built, each of the four mattresses of which it was composed, was built under the supervision of the Assistant-Engineer and the Inspector, under orders from me to build such a mattress, or four such mattresses of the third design of the specification. To the best of my memory, I gave them absolutely no further instructions. In conversation with them, there may have been points in the third design mentioned. I do not remember that. My instructions to them were to build four mattresses on top of each other, according to the specification. Then these two mattresses, the second one built by the contractors in the continuance of his system of construction and the one I had ordered built, I compared roughly in order to get the relative amounts of material in the two, per square yard. I directed the Assistant-Engineer to have them sunk in the works and to weigh them. This weighing was done by measuring the displacement of each barge on which they were located just before the mattress was

slipped off into the water, the amount that the barge was forced down into the water by its own weight and the weight of the mattress was carefully measured. As soon as the mattress was off, a similar measurement was then taken, which gave the number of cubic feet of water displaced by these mattresses.

Q. You were present at this time, were you?

A. I was not present during the weighing of the mattresses; that was done under my instructions.

Q. Whom did you instruct to measure it?

A. I instructed Mr. Marion Twiggs, the Assistant Engineer.

Q. And who else?

A. He was the only one I instructed; he submitted a report subsequently of this measurement.

Q. In your testimony, Captain, just please confine yourself to your actual knowledge; when any instance of this kind comes up, you can tell when anything was done by your direction, by whom it was done, and then we can call them.

123 Mr. Blair: That being hear-say, should be stricken out.

Judge-Advocate: That is to be established by other witnesses, if it can be done.

The Witness: This method that I have explained was the method that I ordered done.

Q. These were single courses of mattresses that you have made in this way?

A. I made four mattresses, each a single course mattress, according to the third design of the specifications, piled on the top of one another. There was one modification of the specifications which was not put in. The specifications prescribed that the poles of the grillage, holding the fascines in place, shall be fastened together with long scarfed joints, which means that the end of each pole shall be cut to a long taper fit to the similar taper on the end of the opposite pole and then wired together. Such a scarf joint is left to the discretion of the engineer in such a manner as he prescribed, but it is utterly unnecessary in that mattress, as they were simply wired together. With that trifling distinction, the mattresses were to have been built strictly according to the third design of the specifications.

Q. And you saw then, these four mattresses built according to the third design of the specifications, and four mattresses, such as were offered by the contractor?

A. The one offered by the contractor contained eight courses.

Q. 8 courses of this mattress; that is the point I wish to elucidate.

A. Yes, sir; they were not 8 separate mattresses, because if the 8 were taken off the barge separately, a number of them, three of them, would have to fall to pieces from having no grillage.

Q. Please explain what is a grillage?

A. A grillage as usually used in Engineering, is a row of timbers parallel to each other, crossed by a similar row at right angles to those. The term is sometimes used as applying to the single row, but as I use it here, it applies to the double row. A single row would be a half grillage.

124 Q. In order to constitute a mattress there should be a top grillage and a bottom grillage.

A. Yes, sir. A complete top grillage and a complete bottom grillage.

Q. What is that photograph, Captain? (Handing witness a photograph.)

A. That is a photograph of the first mattress that I inspected at Cumberland Sound.

Q. The mattress in regard to which you have given testimony?

A. Yes sir.

Q. Was that taken by your direction?

A. It was.

Q. In your presence?

A. It was not.

Q. By whom was it taken?

A. By John M. Hall, the Inspector.

Q. You recognize it as a good photograph of the mattress you saw?

A. A fair photograph, it is rather small, but it is a photograph of the mattress, I recognize the mattress.

Q. It has characteristic features which enable you to recognize it?

A. Yes sir.

Q. And you testify that that is a photograph of that mattress?

A. Yes sir.

Here photograph is handed to counsel for the accused and they say they have no objection.)

Judge Advocate. I offer this photograph in evidence to be attached to the record and to be designated as "Exhibit No. 4."

Q. What photograph is that which you now have?

A. That is a photograph of the same mattress as it was sliding off the barge.

125 out at sea, while it was being put in the jetty.

Q. Were you present when that was taken?

A. I was.

Q. You saw it taken?

A. Yes, sir.

Q. And that is a photograph of that mattress?

A. It is a photograph, but a poor one. The camera was on a barge alongside and the motion of the sea moving the camera and the motion of the mattress itself, has magnified the brush so that each twig looks about twice its proper diameter; the poles being magnified by the diameter of the twigs look their natural size (Here the photograph is offered in evidence by the Judge Advocate to be attached to the record and marked "Exhibit 5)."

Q. What is that photograph which you have in your hand, Captain?

A. That is a photograph brought me by one of my inspectors in response to an order to have a photograph taken of a mattress of the third design, built by my orders for the improvement of Savannah Harbor. The third design there is precisely the same as the third design in the specification for Cumberland Sound.

Here the photograph is offered in evidence by the Judge-Advocate to be attached to the record and marked "Exhibit No. 6".

Q. Did you examine the rock in use in the fulfillment of these contracts when you assumed duty?

A. I examined the rock in use at Cumberland Sound.

Q. Did you find it was the same character of rock required by the contract?

A. The barge loads of rock used to sink these mattresses consisted of two or three kinds. The bulk of it was a light coarse limestone. At that time I was not familiar enough with the specifications for rock, to notice whether or not it filled them or not. The specifications being for specific gravity. Subsequently it was reported to me by my Assistant-Engineer that the rock at Savannah Harbor—

126 Q. Never mind what was reported to you, only testify to that which at any time came to your own knowledge personally.

A. I have never tested the rock.

Q. Then you have no knowledge as to the character of the rock that was being used?

A. No, sir.

Q. Did you at any time object to the rock, the character of the rock that was being used?

A. I did.

Q. At what date, do you remember?

A. Early in August, I do not remember the exact date. The objection at Savannah Harbor was before the objection at Cumberland Sound.

Q. Who passes upon these questions originally, of the character of the material used?

A. Of any particular barge load of material?

Q. Of any material that enters into the construction of these public work under a contract?

A. The Inspector.

Q. He is a sworn officer of the Government?

A. No, sir.

Q. He is not under oath?

A. No, sir.

Q. Not a sworn officer?

A. No, sir.

Q. Appointed?

A. Yes, sir.

Q. He is the agent of the Engineer?

A. He is an employee hired by the month.

Q. You mean when employed by him, but he is really an agent of the Government?

A. Yes, sir.

Q. He is paid by the Government?

127 A. Paid by the Government.

Q. These inspectors are kept at different points on the work?

A. Yes, sir.

Q. Are they usually required to inspect all materials entering into the construction of matters used under the contract?

A. Yes, sir.

Q. And to whom do they make their reports?

A. Either directly to the officer in charge of the district, or

to the Assistant-Engineer in local charge of the particular work.

Q. That is when the districts is sub-divided?

A. Yes, sir.

Q. When there are sub-districts?

A. Yes, sir.

Q. Are there sub-districts in this district?

A. Not definite sub-districts; the reports of the inspectors went through the Assistant-Engineer's to the Engineering officer in charge.

Q. Was the assistant engineer an officer of the Engineer Corps?

A. No, sir.

Q. A civilian engineer?

A. A civilian engineer.

Q. What is the purpose for which the mattresses are used in works of this kind?

A. On a sandy bottom, subject to the action of storms and tides, a jetty built of stone alone is liable to sink gradually into the sand from the fact that it does not act as a whole. The mattress designed to spread an apron or cover over a large mass of sand so that the effects of wave action cannot extend clear across the mattress; a little wave action at one point will not affect the whole jetty.

Q. Do you know what those bundles are there on that platform?

A. They are a part of a number of bundles of brush brought into my office by my inspectors, one inspector and one clerk at my orders.

128 Q. All you know of them then is that they were brought there, and what you have learned since they were brought there?

A. Yes, sir.

Q. What would you call one of those bundles?

A. I would call it a bundle of brush.

Q. Could bundles of that character be properly termed fascines?

A. Not without a great deal of specification. If an officer wanted to construct a work of bundles of brush of that kind and describe them, he might, without doing violence to the English language, possibly call them fascines; he would probably call them bundles.

Q. I understood you to say that they could not be called fascines, under the language used in these specifications?

A. Most emphatically not; they could not.

Q. Was the mattress to which you testified, of which the photograph is now in the hands of the Court, constructed of bundles of that character?

A. Apparently bundles somewhat similar in character to the lower ones; it was finer brush; I saw no poles or stakes anything like as large as those in the upper part of the pile. It was of very fine material. Otherwise, the system of construction was apparently about the same as those.

Judge Advocate: Mr. President, I should like to adjourn until tomorrow morning.

* * *

129 The President: If there are no objections the court will stand adjourned until to-morrow morning at 11 o'clock.

Here the court at 2.25 o'clock P. M., adjourned until to-morrow morning at 11 o'clock A. M.

THOMAS F. BARR,

Col. & Asst. Judge Adv. Genl., Judge Advocate.

130

United States Court Room,
Savannah, Georgia.

January 15, 1898.

Court met pursuant to adjournment at 11 o'clock January 15, 1898.

Present: All the members of the Court and the Judge-Advocate.

The accused, his counsel and the reporter were also present.

Judge-Advocate: To facilitate the business of the Court, and in order that we may keep the record of the proceedings up to date in the future, and by authority vested in me I introduce as reporter, Mr. W. O. Tarver, who will at times report proceedings of the Court. Here W. O. Tarver was duly sworn as reporter by the Judge Advocate.

* * *

132 CAPTAIN CASSIUS E. GILLETTE, Corps of Engineers, United States Army, is here re-called as a witness for the prosecution, and testifies as follows:

Direct Examination (Continued):

Questions by the Judge-Advocate.

Q. I asked you yesterday, Captain, for what purpose mattresses are used, and you made a fitting answer. I now ask you whether there are any other uses for mattresses than the one you gave?

A. Yes, sir, some times in fresh water where there is no danger from destruction by the teredo, mattresses and other wood structures can be used to save more expensive material, and where the foundation is very soft mattresses would be used somewhat more extensively in the structure than they would in the case I have mentioned. In certain cases they have been used too instead of building a jetty out of stone on a mattress foundation, mattresses have been interspersed in layers in the jetty spaces to bind it together somewhat better. That use is dangerous in sea water on account of the teredo, which is a kind of organism which feeds upon wood and destroys wood very rapidly when conditions are favorable for its growth.

Q. Why not use stone?

A. Stone is better, probably, in a generality of cases because it is more durable, shell growth, marine growth form on it and it is not liable to be destroyed by the teredo. In a great many cases the foundation instead of being of mattresses has been of small stone. These small stone break the force of the wave action, the water action, the current action on the sand, which would undermine an open jetty and has been found to act just about as well as the mattresses. Mattresses are made flexible, and, at the same time, strong and elastic and have the advantage of following down any sand that might wash out from under it, and at the same time hold together so that the individual pieces could not wash down. If they were covered with sand, or even with a layer of small rock promptly the teredo is not so liable to attack them, but any wooden structure in salt water is always very dangerously exposed to the teredo.

Q. What are the advantages or disadvantages or the different types of mattress mentioned in the specification?

A. If used in a work like that at Cumberland Sound on a jetty of log mattresses, which consist, as the specifications state, of a raft of logs with a load of brush on top.

Q. That is the first specification? The first design?

A. That is the first design, yes, sir. That is rather a dangerous thing to use for this reason: unless promptly covered by sand or other protection the teredo will destroy it very rapidly. The individual logs are very stiff and no matter how large a load of rock were placed upon it in the angle below and between and underneath the logs, will always be a passageway, and if the logs are placed as they usually are, cross-wise of the jetty, just as soon as the jetty begins to do any work, that is to cause a banking up of water on the one side or the other, or even from the pressure caused by the waves or the water current will follow this tube, this angular space, under, beneath and between the two logs from one side of the jetty to the other and wash out the sand and this has been known to occur to such an extent that the whole mass of log mattress will sink bodily down into the sand quite a distance, so that the use of log mattresses at a place like Cumberland Sound would be a very dangerous experiment. It might succeed, it probably would not. In addition to that, logs are quite expensive, a log mattress is quite an expensive mattress unless it should happen that logs could be found very near the water-ways. Where the trees have to be cut down and hauled overland some distance it would make it very expensive. The second design, consisting of fascines, which may be said to be artificial small logs with the good qualities of logs and without the bad qualities. That second design is much better adapted to the case we are considering because when the weight, even a moderate weight, is put upon it, the 134 fascines, however tightly bound, will to a certain extent, flatten out, and this angular space underneath and between two fascines will not be continuous, the angles and crooks and knobs of the brush will project out into space, so that the water will not have a clear current through there, and that space, if the sand is in motion, which it is usually in this case, will promptly fill up and the mattress will not sink. At the same time it is flexible, tough and elastic. The bindings are good and usually strong; the individual pieces of which fascines are composed are strong and elastic. The binding poles used in the specifications here give little stiffness, which will disappear under the heavy load of the jetty, and it is usual in a great many countries, in using these fascines, to use fas-

cines having binders that are flexible, that will bend rather than break, which poles are not so good at. The second design is by far the better design of the 3 for the case we have in hand, assuming the price to be the same or irrespective of price. The second design amounts simply to a more carefully and closely specified third design, with the addition of cross fascines every 6 feet on top of the fascines composing the mattress proper. The second design consists of a grillage and layer of fascines on top of it, and then fascines crossing every 6 feet, and then a grillage on top of that. The third design consists of a grillage and then a layer of fascines, then omits the cross fascines, then the grillage. In the second design the grillage or space between the grillage poles is distinctly specified as 6 feet; in the third design it may be anywhere from 4 to 8 feet, at the option of the engineer officer. The fascines which are described separately are quite distinctly specified. In the second design there is an additional specification for fascines, in that the brush must be so placed as to break joints and make continuous fascines extending clear across the mattress. By inference in the third design, or in all fascines, that requirement is there because with brush ten or twelve feet long, you cannot make a mattress from thirty to one hundred feet long 135 without breaking joint; so that the second design for use in single mattresses would be the most advantageous, leaving the question of price out of the question. The specifications don't prescribe that the mattresses shall be placed, one on top of the other, nor do they forbid it. For use in fresh water, or where the teredo is not liable to work, there is no practical difference between the usefulness of the mattresses, except that the log mattress would be more advantageous as it would occupy or fill up space better. In case of muddy water it would not silt up quite so rapidly.

Q. Not quite so rapidly as what—not fill up so rapidly as what?

A. As in brush mattresses, not quite so rapidly as the brush mattress.

Q. Captain, I would like to have you particularize more clearly than you did yesterday the existing improvements in Savannah Harbor.

A. The improvements I mentioned yesterday is, or are, the improvements now going on. The improvements heretofore carried out were originally directed toward the contraction of the water-way. If the water has a chance to spread out

in a stream like this, a tidal estuary, it will be correspondingly shallow. There is a certain amount of tide-water to flow in and out every tide. There is a certain amount of river water coming all the time and increasing in time of floods. As a general proposition, if a certain amount of water has to go past a certain space it would require a greater depth the more it's narrowed. The original improvements consisted in building spur dykes out from the shore, done a few at a time. It was not particularly successful but helped. After that, about 1892 or 1890 the project was adopted, and the carrying of it out was begun on a large scale, in 1892, which consisted in narrowing up the space for the water to flow out, by training walls, which are, in all essential particulars the same thing as jetties, being put up in the river instead of at the mouth of it, they narrow the channel and the water flowing out scours the material out between them or, if it does not scour the material out it will or may 136 keep it scoured out after it is once dredged.

Q. That is, it does not allow the silt or sediment to deposit?

A. Its tendency is to prevent a deposit of silt. The whole thing depends upon velocity. A stream flowing with a certain low velocity will carry sand or silt or mud of a certain weight or fineness, out, it may carry material which it could not stir up or carry off, material which chanced to be deposited and settled or became compact; so that frequently an improvement will maintain itself where it would not create the depth. The project for the Savannah Harbor contemplated both these things. The training walls were for the maintainance; the dredging to create the channel. Training walls were built at about low water mark. The reason of that is to facilitate the inflow of the tide. If built up to high water mark, or above low water mark, the higher they are built the more they prevent the full range of the tide. The more obstructions are placed to tidal flow, the less height it will rise up in the upper reaches, so as to avoid that, the jetties and training walls are only built at about low tide. It is a curious thing that, while at first glance it would appear that the water that would come in over those jetties would go out over them, but experiment and actual observation, in many cases, demonstrates that this is not so, owing to the fact that there is a large body of water, the ocean, at one end of the improvement and the small slues or marshes at the other end. It is

an observed fact that the water will flow in and over the jetties, and more will go out between them, scouring out. That is the principle upon which the improvement in the Savannah Harbor has been made. The training walls in the upper reaches on the harbor that is, near Savannah, have not been built of mattresses, as described. They have not required the width or extent that mattresses would naturally give them, but piling has been used to permit or narrower walls, using less material. Two rows of piling have been driven, and along the greater part of the improvements, which were begun in 1892, the 137 piling was placed 8 feet apart in the rows, and the rows were 8 feet apart, then the piling was fastened together with timbers, with timbers iron bolts and braces near low water mark, and the space between the piling filled in with bundles of brush running with the training wall. A light load of stone has been placed upon those bundles. The material dredged out the channel has been largely dumped behind the training wall. That, together with the silt coming down from the river has made natural banks in a great many cases back of the training walls. That is the general outline of the work done. At the lower end of the river, where it is more subject to storms and the weather, continuing out to sea, mattresses have been used, and the jetties and training walls have been wider at the base. The water is deeper there too, is additional reason for it.

Q. The court can ascertain from the public records filed in the Engineers office at this District the character of all those improvements and the material used, can it?

A. Yes, sir. The jetties or training walls at the lower end of the river in this case mattresses have not been used simply for the foundation for the rock, but many mattresses have been built, many courses, as it has been called of mattresses have been built of bundles of brush piled one on top of the other and launched from the barge all together, and then a light load of rock placed upon top of that.

Q. Well, that can all be ascertained from the records, I understand, for the information of the court?

A. From the records entirely.

Q. And the amount of each material named in the contract?

A. Yes, sir.

Q. Captain, what kind of string are those bundles tied with? (Referring to bundles in the court room).

A. Those are tied with the string I described yesterday, I

call it ordinary lath yarn, it is slightly stronger than grocers cord, I said yesterday grocers cord, I should have said 138 lath yarn, it is quite strong material, its strength can be inferred from the use to which it is put, that of tying bundles of laths.

Q. Did the stone used by the contractors fall within the description called for by any of the specifications?

A. As reported to me?

Q. Only of your own knowledge, Captain.

A. I have never tested it.

Q. You have never tested it? Then we shall have to get that from some other witness. I will ask you, Captain, to interpret the different specifications touching the stone to be furnished.

A. The specifications for stone are precisely the same in the two contracts. First-class stone,—This stone must be of good quality and not liable to disintegrate under the action of the weather or salt water; it must be hard and weigh not less, dry, than 165 pounds to the cubic foot. The blocks must be of suitable random sizes, varying in weight from one ton to ten tons, but 50 per cent of the blocks must weight five tons or over. In shape the blocks must be angular, the small dimension being not less than $\frac{1}{3}$ the greatest. Quarry stone is required, no boulders nor rip-rap from boulders will be received. That paragraph means precisely what it says; the hardness is not distinctly specified. By quarry stone is simply meant quarried out of the original deposit of rock, not from loose boulders. Second-class stone:—This stone must be of good quality and not liable to disintegrate under the action of the weather or salt water. It must be hard and therefore, weigh not less than 155 pounds,—dry—to the cubic foot. The blocks of little lighter stone than the blocks in the specifications, must be of suitably random sizes, varying in weight from 500 pounds to five tons, but 50 per cent of the blocks must weigh one ton or over. In shape the blocks must be angular, the smallest dimension being not less than $\frac{1}{3}$ the greatest. Quarry stone is required; no boulders nor rip-rap from boulders will be received. That is the same as in the previous interpretations. Third-class stone:—This stone must be of good quality and not liable to disintegrate under the 139 action of the weather or of salt water. It must be hard and weigh not less, dry, than 150 pounds to the cubic foot, it therefore can be of lighter stone than either of the other classes. The blocks must be of suitably random sizes,

varying in weight from 25 to 1000 pounds. In shape the blocks must be angular, the smallest dimension being not less than one third the greatest. That is just as it says. Fourth Class Stone.—This stone must be of good quality and not liable to disintegrate under the action of the weather or of salt water. Its specific gravity must be not less than 2.4 and it must be as hard as hard burned brick. That means precisely the same thing as in the specification for third class stone, that it shall weigh not less than 150 pounds per cubic foot. The weight of water being sixty two and a half pounds a cubic foot, a specific gravity of 2.4 means that it must be 2.4 times as heavy as water, and 2.4 times sixty two and a half per cubic foot, and two and four tenths times sixty two and a half is 150, so there is no distinction in the specification between the weight of third class stone and the weight of fourth class stone, it is simply worded in a different manner. It must be as hard as hard burned brick, that more distinctly specifies how hard it must be than the specification for third class stone, which is, it must be hard. The blocks must be of suitably random sizes, varying in weight from fifteen to 250 pounds. The lower limit of weight in the third class stone is 25 pounds. The lower limit in weight of fourth class stone is 15 pounds. The superior limit in the weight of third class stone is 1000 pounds, and of fourth class stone only 250 pounds. There is therefore wide latitude left to the Engineer officer in determining the class of the stone. If its lower limit is 25 pounds. There is no distinct specification as to what proportion of the third class stone shall be of the larger sizes, therefore the aggregate of fourth class stone with nothing under 25 pounds, that is a very small variation there; if it had a few large pieces in it it could be accepted as third class stone, excepting the expression it shall be of suitably random 140 sizes. That is quite indefinite. It would be probably taken to mean with a reasonable distribution of pounds in weight from the lower limit to the higher limit, but it is a rather vague expression. In shape the blocks,—that is the fourth class stone,—must be as nearly cubical as possible; the smallest dimension being not less than $\frac{1}{3}$ the greatest. The quality, shape and size of all stone must be satisfactory to the engineer officer in charge. All stone must be placed in position on the jetties or spurs, or on shore between high and low water, as required by the engineer officer in charge. All stone must be placed—that sentence is repeated again in this specification—. Such stone which is used above mean low

water, shall at the option of the said engineer officer in charge, be either placed in position by hand or thrown on rip-rap. That is somewhat indefinite. Placed in position by hand could possibly require the stone to be placed on edge, or to fit into each other. Simply to be thrown on rip-rap is to be thrown out as thrown from a wagon, cart or raft. Stone placed more than two feet outside of the position assigned, will not be received or paid for. That explains itself.

Q. Prior to the time you saw the mattresses to which you testified yesterday, and of which a photograph is before the Court, had you given any orders in relation to changing the character of the mattresses required by the terms of the contract, under which they were going to be placed?

A. No, sir. I issued no orders whatever of any kind. Orders in existence when I took charge were all understood to be in force until changed by my order.

Q. You know of your own knowledge, Captain, anything of the character of Florida stone?

A. Yes, sir.

Q. Please state it.

A. Only superficially. It is a limestone, some of it is in appearance, and examining by lifting, it is light. Other of it is more compact, almost flinty in appearance and a great deal heavier. There is a great range in its weight per cubic 141 foot. You can tell that by looking at it.

Q. You have handled stone of that character?

A. I have handled it, yes, sir.

Q. Where is this stone found in Florida which you have handled?

A. I don't know of my own knowledge.

Q. How then do you know that you handled Florida stone?

A. I handled stone on the cars at the wharf here in Savannah, several car-loads of it—I walked over several car-loads, handled some of it, examined it and inspected it in company with one of the contractors, and he told me where it came from,—that it came from Florida.

Judge-Advocate: (Addressing counsel for the accused) I presume you don't object to that?

Mr. Blair: We don't object to that.

Judge-Advocate: It is immaterial, the witness is yours, gentlemen.

* * * *

144

Cross-Examination.

Questions by Mr. Blair.

Q. Captain Gillette, in what year did you graduate from the Military Academy?

A. In 1884.

Q. What was your first station?

A. Willetts Point, New York Harbor.

145 Q. How long did you remain there?

A. About two years and a half, until April 1887.

Q. Where did you go from that place?

A. Cincinnati, Ohio.

Q. How long did you remain at Cincinnati.

A. Two days.

Q. From there where did you?

A. Zanesville, Ohio.

Q. How long were you there?

A. About five years.

Q. What were your duties at Zanesville?

A. I was most of the time Assistant in local charge of the improvements of the Muskingum River.

Q. What was the nature of the improvements, in general terms?

A. Slack water navigation, locks and dams.

Q. Any mattresses or fascines, such as have been used in this improvement here? used in that improvement?

A. No, sir.

Q. In what year did you leave Zanesville?

A. In 1892.

Q. Where did you go then?

A. Chicago, Illinois.

Q. How long were you there?

A. Until September 1893.

Q. What were your duties there, and connected with what?

A. I was engineer officer of the Department of the Missouri, on the Staff of General Miles.

Q. You had no constructing there to do, did you?

A. None, whatever.

Q. And where did you go from Chicago?

A. San Francisco, California.

Q. When did you arrive at San Francisco?

A. On the 6th of September 1893.

146 Q. And how long did you remain there?

A. Until the 12th of July 1897.

Q. And what were your duties there?

A. In the first place, I was Recorder and Officer in charge of the records, and of Inspection of the California Debris Commission.

Q. For how long?

A. I held that position, practically, until I was relieved from duty in California; about four years.

Q. And your duties in that connection, did they have anything to do with construction work of any kind?

A. Yes, sir.

Q. What sort of construction work?

A. Brush dams and other dams.

Q. In what rivers?

A. In the tributaries, Sacramento, San Joaquin, Feather and Yuba Rivers for the retention of the debris from the hydraulic mines.

Q. And in that construction, were any mattresses, such as had been used in this construction in the Savannah District used?

A. Not as mattresses. A great deal of brush was used. The majority of the dams were built of my designing and under my orders, direct orders, for holding this debris.

Q. How as brush used?

A. It was cut down as brush and placed in the dams with the butts down stream, usually; with poles or small logs across to separate the brush into layers so that the water flowing over the dams fell on the butts of the brush, or on the bottom below.

Q. This brush was not laid into bundles in any way?

A. It was not. It was made by the owners of the mines or dams themselves.

Q. What other constructive work were you engaged in in California.

A. For the last year and a half, or so, I had the construction of jetties at Cumberland Sound.

147 Q. I asked you about California.

A. At Humboldt Bay, Humboldt Harbor, the construction work involved the use of brush on the Sacramento River to prevent cut-offs.

Q. In the Sacramento River, or the use of brush in that river, was used how.

A. It was used in a manner somewhat analagous to what I have described in building debris dams in the mountains.

Q. And in Humboldt Harbor, about how did you use brush there.

A. The brush was used as mattress foundation for the rock jetties.

Q. How were those mattresses constructed.

A. They were constructed of bundles of brush built into mattresses underneath a railway track on a trestle built immediately over the point at which they were to be used. They were small mattresses, 20, 25 or 30 feet wide, sometimes built wider, with a grillage at the bottom. Each piece was continuous sawed timber six inches square made of so-called pine, really a Douglass fir. The grillage was made, I suppose, between three and five feet apart, and each piece was continuous. Clear across this grillage was suspended cross-poles from the trestle. Upon these was placed bundles of brush, simply bundled for handling, choked rather tighter than these bundles here. It was straighter brush made of fir or red-wood growth. Those bundles were placed in layers on top of this lower grillage, and then another grillage was placed on top of that, and the whole compressed as tightly as could be done by a power, preferably screw power, which was left to the contractor.

Q. How thick was the brush between the two grillages?

A. About three feet.

Q. After compression?

A. After compression.

Q. How many of those mattresses did you sink, or were sunk under your direct supervision, or your control, rather.

A. I dont remember, quite a large number. They 148 were at work for one whole season and part of another while I was there, and they were sinking mattresses all the time.

Q. You stated in your direct-examination of yesterday that in this improvement at Humbolt Harbor there was expended a million and three quarter dollars?

A. No, sir; the total cost of the improvement when complete will be a million and three-quarter dollars, estimated.

Q. Up to the time you left there, how much of that appropriation had been expended?

A. As I remember it, about three-fifths.

Q. About a million?

A. I think so, I have not refreshed my memory about that.

Q. How much of that was expended under your direct control?

A. The usual season's earnings were about \$300,000.00.

I was there about a season and a half. I think about \$400,000.00; I would not be positive about that. I have not refreshed my memory at all.

Q. In your report, which is Appendix QQ. in the annual report of the Chief of Engineers, for the year 1897, it is stated that in that year you used of brush mattresses 8,812.2 cubic yards, is that correct, as your memory serves you?

A. If it is stated there, it is correct. (Here book is handed to witness) That is correct, yes, sir.

Q. Now, how many, using that as a basis of brush mattresses, did you put in or cause to be put in, in the other half season that you were there?

A. About how many mattresses?

Q. Yes,—or of cubic yards of brush mattresses.

A. I think about half that many.

Q. Then altogether, with respect to brush mattresses, such as you described, you used in Humboldt Bay, there were put in place under your supervision and control something like 12,000 cubic yards?

A. I should think roughly that.

Q. Now, in going over your career, since you left the Academy, have you at any other place than those mentioned, any experience whatever in the putting in of mattresses, such as are used down here?

A. I have never used such mattresses as were used here and never will.

Q. Or such mattresses as are called for by the specifications of these contracts?

A. No, sir.

Q. Then, as a matter of fact, when you reached here, the 20th day of last July you had never had, as an engineer, any practical experience of any sort whatever with any mattresses of the kind described in the specifications under these contracts?

A. If you say precisely of the kind, no. If you say of the same kind, from an engineering standpoint, yes.

Q. You refer to the same kind from an engineering standpoint, by that you mean the mattress you used in Humboldt Bay?

A. Yes, sir.

Q. Your experience there is limited to 12,000 cubic yards, approximately?

A. Yes, sir, approximately.

Q. You say from an engineering standpoint the mat-

tresses which you used there are quite similar to the ones called for by these specifications?

A. They are used there for essentially the same purposes.

Q. What is that purpose?

A. That purpose is to prevent the wave action or current action, or other action of the water from undermining the jetty and carrying the individual stones of which it may be composed deeper into the sand.

Q. How did you prepare the brush in the Humboldt mattresses?

A. The brush was specified to be simply cut and tied up into bundles.

Q. Well, how was it cut?

A. Just simply cut with an ax as it grew on the ground. I understand, not of my own knowledge, that the contractors bought it from the farmers or ranchers as they are called there, so much—

Q. I don't care about how they bought it, I want to understand how the brush was prepared.

A. It was simply cut and piled up in bundles.

Q. Was it trimmed in any way?

A. Not trimmed in any way at all, and not so specified.

Q. The leaves left on?

A. The foliage was left on. It was of cedar or fir order, and there were no leaves on it. It was very flexible brush.

Q. You say that after you saw the mat sunk on or about the 31st of August, or the last of July or the first of August last at Cumberland Sound, you thereupon gave orders to the contractors to construct mats strictly in accordance with those specifications

A. No, sir; I gave orders to the Assistant Engineer to have that done.

Q. And you say pursuant to those orders, certain mats were constructed which complied with the specifications, as you interpret them?

A. With the exception of the splicing of the poles, yes.

Q. How many of those mats did you have constructed?

A. As I remember, five or six. There were four of those mats I spoke about. I told the Assistant Engineer he could allow the contractor to put in a single course of single mattresses, as I understood the specifications to mean; I think he put in two or three of these. Then I ordered the construction of mattresses stopped, as I believed from the state of

the mattresses that no further mattresses were necessary in that locality.

Q. Then what became of the mats, so far as you know, that were constructed according to specifications?

A. They were put in the works.

Q. All of them?

A. All of them.

Q. Were there any of those mattresses made according to the specifications near here?

151 A. I ordered some made.

Q. Well, do you know whether any were made?

A. They had been reported as made, yes, sir.

Q. Do you know what became of those mattresses?

A. They are reported sunk, or were to be sunk in the breakwater. There may have been others constructed that were not sunk, I don't know, I only know what is reported to me.

Q. Those four that you had sunk, one upon top of the other, how were they sunk?

A. They were sunk in the usual manner, I was not present.

Q. How did you expect them to be sunk?

A. Sunk in the jetties.

Q. Singly?

A. No, sir.

Q. Together?

A. Together.

Q. A layer of stone over each mat? And then you did order all sunk at once and a layer of stone put over all four?

A. Yes, but not as the engineer, these mattresses were constructed for experimental purposes, but it was only just to the contractor to allow it to go on.

Q. And paid for out of the appropriation?

A. No, sir, it is not paid for.

Q. To be paid for?

A. Not under my jurisdiction.

Q. Where did you sink them?

A. In the jetty at Cumberland Sound.

Q. You say you don't intend to pay the contractor for those mattresses?

A. Under present conditions, I should asked to be relieved from duty here rather than pay the Atlantic Contracting Company any money—

Q. Never mind that, Captain Gillette, I asked you a 152 categorical question. (Repeat the question, to the reporter).

Reporter: You say you do not intend to pay the contractors for those mattresses?

A. At present, no, sir.

Q. At any time?

A. I do not now intend to pay them for them, my present intention is not to pay him for them.

Q. Is that intention— Was that intention formed because the mats did not comply with the specifications of the contract?

A. No, sir.

Q. Is it because you ordered them sunk four at a time and not singly?

A. No, sir.

Q. Do you know anything about a mattress across the river here?

A. I have seen a mattress laying on a barge over there.

Q. Do you know anything how it got there, or what it is?

A. I do not, not of my own knowledge.

Q. Have you had any report of it?

A. No, sir, not that I recollect, I saw the mattress there one day and was surprised to see it, I did not know it was there. It looks like the mattress I had the photograph of here yesterday. I did not examine it carefully.

Q. You do not know whether that is built according to the specification, as you interpret them?

A. No, sir, I only rowed by in a boat. I could not get more than a casual glance at it.

Q. How far were you from it?

A. 30 or 40 feet.

Q. In what respect did it depart from the specifications, as you interpret them, if any?

A. I was under neath it, and the timbers were between me and it most of the way.

Q. You could see under the grillage, could not you?
153 A. I think I remember seeing the grillage poles at the ends as they stuck out over the poles.

Q. You could see the fascines, could not you?

A. I must have seen the ends of them.

Q. How did they appear to you?

A. They appeared to me like the ends of fascines. The ends of poles or trimmed brush.

Q. According to the specifications?

A. I did not make a close enough examination to notice that.

Q. Did you have anybody in the camp where that mattress was built, that you know of?

A. I do not know where that mattress was built, I had an inspector in the mat camps wherever I had mats built.

Q. Then, if that mattress was constructed since your arrival here it was seen by some inspector of yours, was it not?

A. That would be a difficult question to answer that mat may have been constructed by anybody anywhere. I do not know to whom it belongs, I presume that is one of the mats built by the Atlantic Contracting Company under charge of one of my inspectors at one of their constructing camps, but I know absolutely nothing about it, and have not even been told.

Q. You spoke yesterday of this spun yarn, or lath yarn as probably as strong, but not twice as strong as single string of good grocers twine. Does either of these (handing witness samples of cord) answer the description of the grocers twine you had in your mind?

A. No, sir, the statement I made was in view—

Q. Well, that's enough Captain, you can explain that on Re-direct.

A. Excuse me.

Q. You said this morning, if I recollect it, that it was probably twice as strong as good grocers cord, or that you meant grocers cord yesterday. Would that be a sample of the grocers cord that you had in mind (handing witness piece of cord)?

154 A. Oh, no, sir, it is a great deal stronger than any of these strings. It is a great deal stronger than my description of it as I worded it would mean; it was stronger than I thought it was.

Q. Then you have examined it since yesterday?

A. Yes, sir; I had not tested its strength then. The words I used give the appearance of much less strength than it has.

Q. Did you test it since your testimony?

A. Yes sir, I didn't succeed in breaking it; I tried it and found it very much stronger than I supposed it was—very much stronger.

Q. Did you test it other than merely trying it with your hands?

A. That is all; it may be stronger even than I think it is now. It is quite strong material.

Q. In your testimony of yesterday you spoke of the purpose for which mattresses are used on a sandy bottom, and said that they were used as an apron to avoid the effect of the waves, or such effect as a wave might have, I give your exact language: "The mattress is designed to spread an apron or cover over a large mass of sand, so that the effects of the wave action cannot extend clear across the mattress; a little wave action at one point will not affect the whole jetty." That is correct, is it not?

A. I think that is about right, sir.

Q. And these mattresses, described in the specifications to these contracts were designed for that purpose, were they?

A. I do not know what they were designed for, I did not design them.

Q. Would they serve that purpose?

A. The second design would, I think, very well.

Q. The third would not?

A. Not so well as the second, unless the specifications for the third were very rigidly interpreted.

Q. And the strictness of the interpretation would come in where, on the fascine?

A. Yes, sir, the fascines are not so distinctly specified as in the others.

155 Q. And how should those fascines be constructed?

A. They should be constructed by trimming the brush straight as can be obtained, binding that in the fascines with a an approved form of choker, choker is a technical term used in engineering.

Q. Yes, proceed.

A. For that purpose and firmly bound at intervals of two feet.

Q. In other words, to make a bundle of rods, as you stated this morning?

A. Rods, would be a fair word to use, withes would be the American word.

Q. That means denuded of leaves and twigs?

A. Yes, sir, according to those specifications.

Q. Yes, and I think you said this morning that the effect of such a fascine would be practically that of a pole?

A. I beg your pardon, I didn't intend to say so.

Q. What would be the effect of such a fascine, on the gathering and holding of silt.

A. A fascine like that would have a much better effect on gathering and holding silt than a log would, or two logs side by side because the space I described underneath and between them would be taken up and they would break the current that would flow through them.

Q. I think you said this morning that a fascine built in that way was an artificial small log?

A. It could be regarded as such, yes, sir.

Q. With the exception, then, as I understand you now, that it would gather a little more silt than a real small log or natural log, is that correct?

A. You have not finished the sentence, I don't know what you are going to say.

Q. You say it is like a natural small log; I say then, with the exception that it would probably, as you said, gather a little more silt than the natural small log, is that clear?

156 A. It would be an artificial small log, with that exception, is that what you mean?

Mr. Blair: Yes.

A. It would be with that exception and some other exceptions.

Q. In respect to silt, it would gather more silt?

A. It certainly would, yes, sir.

Q. Is that the only kind of fascine you know anything about?

A. The word fascine can be used to cover other things, if they are described under that word.

Q. Was your definition yesterday an exhaustive definition of fascine?

A. I do not know that it was; I do not remember exactly what it was.

Q. You said yesterday, "A fascine means a cylindrical bundle of rods or small sticks, tightly bound at short intervals."

A. That is Webster's definition of the word "fascine", as nearly as I can recall it.

Q. That is a military fascine, is it not?

A. The dictionary does not say "military."

Q. That is a fascine you built as a cadet at West Point?

A. That would fairly describe it.

Q. That is a fascine for what?—and the purpose of that fascine is what?

A. Used mostly for providing banks inside a fortification, and—

Q. To stop bullets?

A. Not particularly, dirt would stop the bullets.

Q. I don't speak of the modern bullets now, but formerly, when fascines were more used.

A. When fascines were more in use, their function was not to stop a bullet; their function was to hold the bank and the bank would stop the bullet.

Q. Have you ever heard or read in your professional career of such a thing as an engineering fascine as contradistinguished from a military fascine?

157 A. I have never seen that expression defined as such.

Q. Are you familiar with the construction of the mattresses in Galveston Harbor?

A. I am not, I have read of the construction of the mattresses there, but it has been some years ago.

Q. I will ask you to examine that sketch and state if the fascines indicated there are fascines answering to your definition of a fascine, being small cylindrical rods (Handing witness pamphlet)?

A. It is difficult to tell from that drawing whether the brush has been stripped of its branches or merely of its leaves, there don't appear to be any leaves on it. I would say that was a drawing of a structure which could be called a fascine if the description underneath it described what is indicated here. The word fascine could be used to describe a bundle of brush with the leaves on if it was so specified.

Q. Then a brush fascine, as I understand you, would not mean a fascine as you defined it?

A. Most any fascine is built of brush, from a military or engineering standpoint.

Q. Do you consider brush and cylindrical small rods as equivalent terms?

A. I do not.

Q. A bundle of rods or small sticks, do you consider that as equivalent to a bundle of brush tightly choked?

A. Not precisely, no, sir. There is a shade of difference in the meaning.

Q. Then, if the specifications call for a brush fascine you would not put in a fascine made of rods or small sticks tightly bound at intervals?

A. Trimmed brush would be rods or small sticks.

Q. Answer my question, if you please.

A. Excuse me, please.

Mr. Blair (to the reporter): Repeat the question.

158 Reporter: Then if the specifications call for a brush fascine, you would not put in a fascine made of rods or small sticks, tightly bound at intervals?

A. It would depend entirely upon what the specifications were.

Q. In reading Section 38 yesterday on your direct examination, you left out the first section—the first sentence of that section,—please read it now.

A. Fascines—All fascines will be made of live brush, of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the engineer officer in charge.

Q. Does that mean small rods?

A. It means that the material for making the fascines shall come from such brush, not from trees, limbs, etc., but brush.

Q. Does it mean rods or small sticks?

A. That sentence alone does not specify whether it does or not.

Q. If that sentence stood alone, what would it mean? Rods, or small sticks or brush?

A. It would not mean anything definite.

Q. Would it mean rods or small sticks? Would they be included in the description brush, live brush?

A. Rods or small sticks can be made of live brush.

Q. Captain, I think you are not answering the question fairly?

A. I'll try again sir.

Q. "All fascines will be made of live brush, of cedar, and so forth"—would a fascine made of rods or small sticks answer that description?

A. Yes, under certain conditions.

Here the Judge-Advocate asks that the Court suspend the examination for a minute.

Here the Court at 12.55 O'clock P. M. Suspends the Examination. At 1 O'clock P. M. the President Announced that the Court Is Ready, and the Examination Is Continued as Follows:

Q. Do I understand you correctly now, that the specifications calling for fascines of live brush, would not be met by a fascine of rods or small sticks?

159 A. I am unable to answer the question,—it is not definite.

Q. If, to that specification were added, "The brush used shall be as straight and well trimmed as can be obtained", what would your answer be?

A. That the fascine must be made of sticks, rods or single pieces of trimmed brush of those woods.

Q. Denuded of twigs and leaves?

A. Yes, sir. The word "well trimmed" is unfortunately used. The sentence is not grammatical.

Q. Well, never mind the grammatical construction; but as to the engineering construction?

A. The sentence should read, "The brush will be as straight as can be obtained and be well trimmed". You cannot—

Q. Never mind the grammatical construction,—the engineering construction,—you understand by the term as used in these specifications, that the twigs and leaves of the brush shall be lopped off?

A. I cannot conceive of any other meaning of it.

Q. You then know of no technical definition of trimmed as a term of art in specifications of this kind, other than the colloquial definition, to-wit;—denuding or taking away the twigs and leaves from the brush?

A. I cannot imagine any other meaning.

Q. In other words, leave a purely military fascine?

A. It would be a fascine similar to those used in military operations.

Q. Such as you constructed when a cadet?

A. Yes, sir; if I wanted to construct a fascine of that description, I would use those specifications.

Q. You say a log mattress would not gather silt or sand as rapidly as a mattress built according to the third design, according to those specifications as you understand them?

A. I said according to the second design—of the low-160 est degree of the third design.

Q.. Would mattresses of the third design, as you understand that, gather more silt than a log mattress?

A. If the specifications were thoroughly interpreted it would.

Q. Interpreted as you interpret it, the fascines to be made of rods denuded of twigs?

A. Yes, sir.

Q. It would gather more silt than the log fascine?

A. Yes, sir.

Q. Why?

A. Because, as I explained, when the weight of the jetty comes upon it it would be impossible to choke the fascine so tightly but what they would flatten out, and the space underneath and between two adjacent fascines would almost entirely disappear or be very rough and irregular with the straightest brush that can be reasonably obtained on this coast.

Q. There would, however, be left the long grillage poles, being at right angles with the jetty, there would be left an entrance between the sand and the bottom of the brush?

A. That grillage pole would be squeezed down in the sand with the weight of the mattress alone, with thousands of pounds of rock upon it it would cut no figure at all.

Q. Before you put the rock on, how deep would it go down in the sand?

A. Oh, that would depend, it would probably settle in the sand just the weight of the mattress. If the mattress were made of fresh live green brush its own weight would make it sink into the sand.

Q. You mean rods or small sticks?

A. Trimmed brush. It would sink into the sand quite considerably. It would be necessary to put some stone on it or you could not get it to the bottom very readily, without putting some stone on it.

Q. The only reason then that you can assign for the 161 better action of the mattresses of the third design than the log mattresses is that those fascines of small sticks or rods, or trimmed brush, as you interpret it, would be bent down and come in contact with the sand underneath?

A. That is not the only reason I assign.

Q. What other reason?

A. The reason I assigned was that a properly constructed fascine would be more flexible than that.

Q. That is included in what I said,—that it would bend down under the stone and come in contact with the sand underneath?

A. With that statement, yes. Then you omit the other point that the fascines would flatten out and cause the angle below and between the two adjacent ones to disappear. Both those things are caused by the same quality.

Q. You spoke a while ago of the specific gravity of the fourth class of stone being 2.4, that specification calls for the same grade of stone as the third class, is that right?

A. The same weight per cubic foot, yes, sir.

Q. Do you mean that, or do you mean by that, don't you, that a cubic foot of rock of the fourth class must practically be homogeneous in structure?

A. Yes, all rocks have pores though. It must have. Any space in it must be such that the water could not run inside the rock. We don't want rock with a hole in it, or rock that absorbed water permanently. To measure the specific gravity, the rock is put into water and the weight in water is determined.

Q. I understand, Captain. In so determining, do you include or exclude the holes in the rock?

A. To include such holes as the water would run into, but not those small holes or pores where the water would settle.

Q. Speaking then as an expert on that subject of the porous rock, speaking as an expert then, with a given piece of rock, which is not only porous but filled with cavities, you determine the specific gravity by including such cavities 162 as are not reached by the water when the rock is submerged, do you?

A. Yes, sir. If I understand your statement, that is right. The specific gravity of a piece of rock is determined by weighing it in water and then weighing it in air, if the water is absorbed into the rock your result will be vitiated thereby.

Q. Then if you were to have, as sometimes happens in nature, a round piece of granite with a hole in the middle, impervious to water, you would weigh that rock in air and then weigh it in water and determine its specific gravity, including the hole?

A. The hole would not cut any figure at all in that case.

Q. Then, when you say granite of a certain specific gravity, the granite may vary in all sorts of ways, although it may be of precisely the same texture?

A. Yes, sir, it might be in any and all sorts of shapes, round, square and irregular shapes, or any shape, it don't make any difference.

Q. You say then, the specific gravity of granite—I give the figures at random—is 2.7, you mean it is only that particular piece that you determine, any other piece of precisely the same texture and with this round hole that I speak of would be 2.2?

A. That might have precisely the same specific gravity as the other.

Q. Then you misunderstand my question, I asked you if

you included the hole, when you determine the weight of the substance?

A. The hole dont have any effect. If I answered it the other way I misunderstood your question.

Q. Then, in truth, the proper way of determining the specific gravity of a certain specimen of rock that contains air holes would be to take a pile of that rock and determine the specific gravity?

A. You mean if it had air holes that the water would not use? You mean air holes separated from the surface that the water could not reach?

163 Q. Yes, such as I explained with a hole in the center, such as, for instance, any piece of rock with a hole in the center?

A. I thought you meant a hole in the center clear through it.

Q. I expressly said "a round hole in the granite from which the water is excluded"?

A. I misunderstood you. I never heard of a piece of granite of that kind.

Q. We will assume that to be so then?

A. A geode would answer that description, then you would get a wrong determination.

Q. In other words, you would be weighing the hole?

A. No, you would not be weighing the hole.

Q. Taking it with the value of the hole?

A. Not exactly that, but roughly that.

Q. But your determination of the specific gravity would be too light, too little?

A. It would be too light, too little, the specific gravity would be too small.

Q. In your testimony this morning you added considerably to your description of the engineering effect of those mats. Have you been talking to any one, aside from the Judge-Advocate since yesterday on that subject?

A. On the subject of the engineering effect of mattresses? I discussed it about a half minute with my Assistant-Engineer this morning and asked him if he had had any experience in log mats settling down into the sand.

Q. Any one else?

A. No, sir, not that I re-call.

Q. The additional testimony then, which you gave this morning, was due to your own reflection?

A. To my own reflection. I believe Mr. Giessler ventured

a theory as to the possibility of making a mathematical statement of the effect of a fascine by taking a cross section, but I disagreed with him entirely.

164 Q. Is not it true that a fascine made of brush without the twigs into the leaves taken off, green brush, live brush, tightly bound into the fascines would collect silt more rapidly than the military fascine which you were describing?

A. It is possible.

Q. Well, is it true, do you know?

A. No one can predict definitely just what will happen with a fascine or mattress on a sandy bar.

Q. Then Captain, you either know, or you don't know whether such a fascine as I have described would have a tendency to collect more silt than the one composed of rods. Now, if you do know kindly state it. If you don't know, kindly say so.

A. The strict answer to that would be that I do not know positively because you did not definitely describe how loose this bundle was to be. There would be more room in a bundle like that for sand, and if the sand were taken or collected up, it would probably be filled full, and for a given number of cubic yards or cubic feet it would have the great advantage of being enormously cheaper.

Q. Before you came here you met Captain Carter in New York?

A. No, sir.

Q. Or in Washington?

A. Yes, sir, in Washington.

Q. And talked with him about this work?

A. Very briefly.

Q. How is that?

A. I talked with him very briefly.

Q. Did he describe—He described the works in general terms here, didn't he?

A. In very general terms, yes, sir.

Q. And you received from him letters of introduction down here, didn't you?

A. Yes, sir.

165 Q. And an invitation to occupy the house rented by Capt. Carter?

A. Capt. Carter told me his house was rented until the first of October, and he had to pay for it any how, and if I wanted to occupy a room out there, there was a place I could sleep; yes sir.

Q. And did Capt. Carter say it in that way?

A. I don't remember the words; no, sir.

Q. Was it as ungracious a permission as that?

A. Oh, it was perfectly gracious. I did not mean to convey the impression that it was ungracious. It was the same kind of permission as one officer would make to another to take and occupy my quarters, or to occupy one room.

Q. Did he specify one room?

A. No, sir;—the invitation was perfectly cordial and perfectly complete.

Q. In pursuance of that invitation, you did go and occupy his quarters for a short time?

A. I did, for a short time, yes, sir.

Q. Did not Capt. Carter say to you at that interview that if you wanted any explanation with respect to the work that he would be glad to furnish you with it?

A. If he did, I didn't hear it, or don't remember it.

Q. You never did ask any explanation of him after coming here, did you?

A. No, sir; I didn't consider I needed any.

Q. Nor as to the methods of contractors?

A. Methods of contractors?

Q. You asked no explanation of him as to the method of contractors pursued down here?

A. No, sir; I have asked him no questions whatever since I came here.

Q. You have had no communication with him?

A. Yes, sir.

Q. In that line, with respect to your work?

A. In respect to the contractors, yes, sir. He wrote me a letter.

166 Q. With respect to the work down here?

A. With respect to paying for it; yes, sir.

Q. And with respect to the manner with which the work was conducted?

A. No, sir.

Q. The manner of making the mattresses, or fascines?

A. None whatever.

Q. I will ask you, Captain, if this (showing witness a map) is a representation of the detached extension to the training wall down here in the Savannah Harbor?

A. No, sir.

Q. Is it approximately correct?

A. Yes, sir, it is in the same location and approximately represents the wall, that is where the wall was proposed to be.

Q. Where it was proposed to be?

A. Where it was proposed to be, it has been located in a little different shape, a slightly different location.

Q. Materially different?

A. No, sir.

Q. In what direction do the currents run from the Savannah River to the Sea?

Through those two training walls on the ebb tide?

A. Well, approximately East.

Q. Approximately in this direction? (Indicating).

A. Yes, sir.

Q. Now, out here is Calabogue Sound, is it not?

A. Yes, sir.

Q. And out here (indicating), in what direction do the currents run there?

A. I have never been there, I do not know.

Q. Assuming, Captain, that the currents from Calabogue Sound on the ebb, running approximately in this direction (indicating), assuming that fact, and the current running from the Savannah River, as you have described it, extended 167 plain low, as an engineering proposition, the proposed extension of that North training wall would tend to throw a greater volume of water down in this direction (indicating)?

A. Well, the direction of the axis of those two training walls that you speak of strikes that structure about the middle at an angle and that would naturally throw it off in that direction, it is simply a problem of deflection.

Q. A current running from here, (indicating) would strike somewhere out here (indicating)?

A. Nearer the middle of the axis.

Q. That would tend to throw it across this bar?

A. Yes, sir.

Q. That is the reason why you said yesterday in your examination that one purpose of this proposed extension to the training wall was to throw a greater volume of water across that bar?

A. I was simply stating what I understood to be the intention of the people who designed that, I did not design it and I do not know strictly what their intention or expectation was.

Q. You stated it unequivocally, and as a matter of fact, and of your own knowledge?

A. As I understood, I was simply giving an outline of the work and their object. I was not holding myself strictly to my own knowledge.

Q. If the currents are as indicated there, the accession of water across the bar would be very slight indeed, would it not?

A. That is a question I have not investigated. I do not know how slight or how important it would be. I understood that was one of the reasons for constructing that breakwater, the main reason being to protect shipping.

Q. Never mind the reason if you do not know.

A. I did not design it, sir.

Q. You stated, however, that the breakwater is an extension of the Oyster Bed training wall, the one on the left as you go down stream?

A. That is the name of it, the detached extension to the oyster bed training walls. It is somewhat out at sea, somewhat out from the other training wall, and from Tybee Roads.

Q. It is designed to protect shipping against North-east gales?

A. Also, as I understand it, I did not design it.

Q. Also to help throw a greater quantity of water across the outer bar?

A. That is my understanding of what it was designed for.

Q. Then you do not want to be understood as stating that as an engineering fact within your knowledge?

A. No, sir, I have no knowledge whatever of its object when it was built. None, whatever, I have read the reports. As I understood it, that was the object.

Q. Does it appear anywhere in the reports in your office, or anywhere in the project for this improvement that the design of that detached breakwater or detached extension was to throw a greater volume of water across the bar?

A. I have not examined the reports or projects specifically with that object in view. Such is my impression.

Q. If the axis of that proposed extension is in the general line of the current is not it true, as an engineering fact, that it would have no effect on the outer bar?

A. No practical effect, no, sir. If the currents run parallel to the breakwater it would have no deflecting influence on that certain thing.

Q. If it had no deflecting influence on the currents it would not throw a greater volume of water across the bar?

A. It might have a concentrating influence on it, acting as one jetty on Tybee Island has on the other.

Q. It could not concentrate the water if parallel with the current.

A. Not very well, no, sir.

Q. Then, as a matter of fact, if that detached extension is practically parallel with the currents flowing alongside of it it would not have any effect on the outer bar?

A. None to speak of, no, sir.

Q. So then, if it be true that it is practically parallel with those currents, then you would want to modify your answer of yesterday and say it was not designed for that?

A. I would not say what it was designed for. My answer yesterday was not giving accurate engineering facts, simply the location of the works, I do not know what it was designed for, of my own knowledge. I do not believe as it is located it has any great effect upon that, that is one of the possible reasons for its existence.

Q. Then, when you said "and also to help throw a greater quantity of water across the bar you spoke loosely?

A. That is my impression that I have gathered from reading the official reports of this district.

Q. You do not want to be considered now as stating as a fact in hydraulic engineering that the effect, the probable effect, of that detached extension is to throw a greater amount of water across the bar?

A. No, I would want to study the subject before I expressed an engineering opinion upon it.

Q. You said yesterday, or, at least, it is so reported, that the inspector is the agent of the contractor?

A. I did not so intend.

Q. I did not think so. The inspector is an employe of the Government?

A. Yes, sir.

Q. Paid by the Government?

A. Yes, sir.

Q. And appointed by the engineer?

A. Yes, sir.

Q. He has nothing to do with the contractor, no order to receive from him?

170 A. He ought not to.

Q. I say, did he?

A. Do you mean any particular contractor?

Q. I ask you what, in point of law?

A. An inspector on a contract is, as you say, employed by the Government and paid by the Government.

Q. And appointed by the engineer in charge?

A. Yes, sir. His duties are to inspect and measure materials delivered, beyond that he has nothing to do with the contractors.

Q. Do you remember the number of the map that you saw sunk in Cumberland Sound? The first one?

A. No, sir, I do not.

Q. Can it be obtained in your office?

A. Yes, sir.

Q. Will you furnish me with that?

Judge-Advocate: Do you want it now?

Mr. Rose: No, I don't care for it now.

Q. When you said yesterday that you had made an immediate study of these contracts when you first came down here, you did say that yesterday, didn't you?

A. I did not intend to express that I had made an immediate thorough study of it, as I remember it I read the specification over, I think I had a copy with me.

Q. The question is: "When you reached here these two existing contracts with the Atlantic Contracting Company, did you make yourself familiar with their terms at once," you answered "Yes, sir"?

A. Well, no; that answer, as I remember it, might be modified, I do not remember exactly when I made myself familiar with them. I have familiarized myself with them all the time since I have been here. I did not make a detailed study of those contracts and specifications at once. No, sir.

Q. Then you did not make yourself familiar with the 171 details at once?

A. That depends upon the meaning of the word "familiar". I made myself sufficiently familiar to find out what was going on on the work, more from an engineering view than anything else.

Q. Then you do not include in the words, "making yourself familiar with the specifications," that with respect to stone?

A. I think I read them.

Q. By "at once" do you mean prior to August 1, after reaching here July 30?

Mr. Rose: The 20th.

Q. The 20th?

A. Yes, I think I read the specifications over before I went down to Tybee; I won't be positive about that.

Q. Then when you said yesterday, "I was not familiar enough with the specifications for rock to notice whether or not it filled them," you meant by that to qualify that first assertion that you had made yourself familiar with the specifications at once?

A. Yes, sir; that tells how familiar I was with that particular element.

Q. Were you more familiar with any other element than that of stone?

A. I can't say I was.

Q. Then, having your attention particularly directed to it, if you were asked the question now, "You found when you reached here these two existing contracts with the Atlantic Contracting Company, did you make yourself familiar with their terms at once?"—what would your answer be?

A. My answer would be that I familiarized myself with the contract sufficiently to understand what was going on on that work, how the work was being carried out from an engineering point of view, how those jetties were being constructed. I rapidly familiarized myself with them after I made my first inspection, and I have continued that familiarization into details ever since.

172 Q. Then you would not say "Yes, sir" in answer to that question now?

A. Not from the point of view you put upon it, it would hardly be a sufficiently explanatory answer.

Q. You spoke of the nature of the improvements in the Savannah River. That has resulted, has it not, in a great improvement in the depth of the channel?

A. The reports so state, and, while I have no personal knowledge, to the best of my belief, there has been a great improvement in the depth.

Q. Have you examined any chart showing the depth of water in '92, or prior thereto in the Savannah River from here to Tybee?

A. I have looked at such charts, but not to charge my mind with sufficient definite information for cross examination about them.

Q. I do not mean other than to get at it in an approximate way?

A. Yes, sir.

Q. Can you say from that examination, or from any

specific examination, or from any observation that you have made upon passages up and down of vessels in front of this City. Can you say whether or not the channel has materially deepened?

A. Since 1892?

Q. Yes?

A. I think there is no doubt whatever that it has very materially deepened.

Q. It can therefore be predicated of the improvements between here any Tybee, or from a point above here and the Tybee Roads that the experiment has been a successful one, or that the work had been successful?

A. The channel has increased in depth and it has held up to the present time, except at the upper end.

Q. That is not an answer to my question? I asked if it has been successful?

A. I must ask what do you mean by successful?

173 Q. The purpose I assume was, as you know, to increase the depth?

A. Permanently, yes, sir. I assume permanently. It may have been temporarily; I do not know what the intention was.

Q. It was certainly to increase the depth whether temporarily or permanently?

A. Certainly.

Q. Then you say it has increased the depth?

A. At least, temporarily, I cannot tell about the permanent part.

Q. Do you make that answer because you have not been here long enough to study it?

A. No, sir; because I am not a prophet.

Q. You know from the present existing conditions whether you would be a prophet or merely an engineering officer, and also a witness before this court martial;—you know from existing conditions, and from the conditions as they existed prior to this contract, that the probability is that the channel has deepened will be permanent?

A. Hardly,—no sir.

Q. The conditions remaining practically the same with respect to this river, what would your answer be?

A. My answer would be that thus far the increased channel, the deep channel, has filled in from the upper end, from material brought down the Savannah river; the upper mile has shallowed or shoaled about four feet. The contractor for

dredging has now begun work on it, and my assistant engineer reports he will have to take out 180,000 cubic yards of sand to restore it to the condition it was one year ago.

Q. Do you know what the estimate for the yearly maintenance was in beginning the improvement?

A. I do not; at some time in the improvement there has been an estimate for \$50,000.00 a year, as I remember it.

Q. Has that ever been exceeded that you know?

A. Nothing has ever yet been spent for maintenance. The work has just begun; this is the first year.

174 Q. It has held its own practically, say, for the first two years?

A. As far as I know the improvement has held its own, except at the upper end as, it was built.

Q. And the shallowing at the upper end, is that by reason of a defect in the project, or a defect in the construction of the work?

A. I do not think it is due to either; I think it was probably to be expected. It was like this,—my engineering opinion is that the contraction work of the training walls, while they did not narrow the channel sufficiently to cause it to deepen, though it narrowed it sufficiently to make the water carry off the finer material out to sea, and the heavier materials brought down the river have been deposited in the upper end. As I understand it, the object was not to expect that these works would cause deepening alone, unless dredging is done, and it is in the project. As to whether dredging is specified, I do not know.

Q. And if the project was to deepen the water and the result has been the deepening to the extent proposed by the project, and if the projects also included annual dredging expenses, or expenses for the maintenance of dredging, and that has not been exceeded or reached up to the present time, would you not say that it had been a successful work?

A. No work is successful—

Q. I ask you up to the present time,—would you not say it has been a successful work?

A. Up to the present time the work has been successful unquestionably;—it has caused a deepening.

Q. As far as coming up to the work that was contemplated?

A. No.

Q. It has certainly come within the estimate for maintenance, has it not, if no money has been expended for maintenance, not this far?

A. The completion of the contract was one year ago. Since that time there has been nothing expended. You would not begin to maintain a work the moment the digging was stopped. The channel has been left to itself just one year, and 180,000 cubic yards of sand have filled into it.

Q. On the upper reaches.

A. Yes, sir, the upper reaches, the upper one mile.

Q. How much would it cost to remove that at the present contract prices?

A. The present contract price is 13 cents per cubic yard, and 180,000 cubic yards of it would cost between twenty-five and thirty thousand dollars.

Q. Do you know the draft of vessels that can enter this harbor and go out to sea?

A. Not of my own knowledge, but I believe a vessel drawing 25 feet has gone out, certainly 24—24 or 25.

Q. Do you know what has become of the four course mattress you sunk at Cumberland Sound?

A. No, sir, my attention has never been attracted towards it since it was sunk.

Q. Have you had any examinations made, or ordered any examination made of it, or of the Sound in its vicinity?

A. I have had a cross section made, numerous cross sections made of those jetties, in October and November of last year.

Q. That does not answer the question.

A. No, I have had no special examination ordered for that mat, I have not thought of it since I went down.

Q. You say you have had cross sections made of that jetty down in Cumberland Sound?

A. Yes, sir, soundings made for the purpose of making cross sections.

Q. You say you have had soundings made for the purpose of making cross sections?

A. Cross sections are drawings.

Q. Do you mean cross sections or cross profiles?

A. Well, I see no particular distinction between the two terms.

Q. Will your drawings made from your soundings, 176 or the so-called cross sections show the interior of the jetty?

A. No, sir; it don't show anything about it.

Q. Has the term, "cross section" in engineering a different meaning from its meaning colloquially?

A. Possibly. A drawing, showing a cross section might sometimes be strictly called a cross profile. It would perhaps, show only the outside, where a section shows something of the interior.

Q. Which is it, cross section, or cross profile?

A. Possibly cross profile would be a more accurate description of it. Any engineer would understand if you said "cross section."

Mr. Blair: I believe that is all.

Re-direct Examination.

Questions by the Judge Advocate:

Q. You have been asked, Captain, as to your first meeting with the accused?

A. Yes sir.

Q. And as to the nature of your intercourse with him in Washington, as I understood?

A. Yes sir.

Q. And that he tendered you certain hospitalities?

A. Yes sir.

Q. What were they?

A. He gave me some letters of introduction to some gentlemen here, and tendered me the use of his house until the 1st. of October.

Q. Did you go into his house?

A. I did.

Q. Immediately upon your arrival?

A. Yes sir.

Q. How long did you continue to occupy it?

A. Only until I found, I don't remember the date—

Mr. Blair;—Let him answer that question by the date, and approximately his reasons. Why not ask, if he was going to give them.

177 Q. I have not asked that. I ask you how long you remained, can you give the exact date that you vacated those quarters?

A. I cannot.

Q. Approximately, Captain?

A. Approximately, the 1st of August. A few days after my first inspection at Cumberland Sound.

Q. That is as near as you can give it?

A. Yes, sir.

Q. You testified in your cross examination as to the con-

versation you had with the accused in Washington. Did you give all the conversation that you had with him?

A. No, sir, I didn't give any of it to speak of. I talked with him about the works on Cumberland Sound, and I talked with him about the personel of the employees.

Q. Can you state to the court what the conversation was that you had with him. How long were you with him, in his company.

A. I think about an hour and a half, as I remember it.

Q. Well, state as near as you can what was said between you.

A. He got a map of these improvements at Savannah Harbor and told me what had been done, roughly, and in a very few words, what was going on and the building of this break-water. He says "we used mattresses out there, we dont use a military fascine. He says, I found they were not standing up out on the bar as I expected they would, as I had a right to expect they would, because they sanded up so well in Cumberland Sound. By sanding up, I understood him to mean, they filled in with sand. He told me about the various employees, gave me their peculiarities and qualifications. I remember a few points about each one. There are two or three of them. I dont recall anything else.

Q. Anything said about your station?

A. Yes, I recollection he told me, as I remember it, that he had seen, or would see, the Chief of Engineers about the matter, and it was very hot down here, and that it would be advantageous for me to get permission to visit New York at such times as I was not needed in Savannah and return to Savannah whenever my presence was needed during the hot season, and, as I remember it, he said he had asked the Chief of Engineers to grant me that permission, if I applied for it. I remember distinctly he said not to ask to take stations in New York, but to get permission to visit New York. It was in mid-summer and very hot down here.

Q. Are you through?

A. That is all. Yes, sir, with that.

Q. Was anything said about the means of getting to and fro?

A. Yes, sir, he said a steamboat company was very kind and gave officers passes so it would not cost anything, but I could go to New York very comfortably. I dont remember whether he said the steamboat company usually gave passes or would give me a pass, any how, the idea was I could go to New York without expense.

Judge-Advocate: Has the court any question to ask this witness?

The President: Any member of the court desire to ask any question?

By the President: The court has none.

Judge-Advocate: That is all, Captain.

Judge-Advocate: May it please the court, I will state that I have wired the Adjutant-General of the Army asking for authority for the court, the accused, and my assistant, Captain McClure and Captain Gillette and myself to proceed to Augusta to take the testimony of Mr. Marion Twiggs. I shall at least receive a response to that before the time for us to meet again and will take it upon myself to notify individually the President and each member of the court and the counsel as to whether we shall meet in Augusta or here when we adjourn, and I shall move for an adjournment from now until Tuesday morning, to meet either here or at Augusta, as circumstances may determine. There are certain papers relating to this case, quite a large volume of them, which have not yet been examined by the prosecution, which were 179 turned over to me when I took charge of this case, and I am unwilling to take the seal from the box, or to examine the papers, except in the presence of the accused and his counsel, or such of the counsel as they may select. My motion, therefore, is that we adjourn, as I said, until Tuesday morning.

I will amend my suggestion, may it please the Court, to make the adjournment, and move to adjourn to meet in this court room at half-past two Monday afternoon.

The President: If there are no objections, the Court stands adjourned until that hour.

By a Member: I move we make it one o'clock; half-past two is the dinner hour here in Savannah.

Judge-Advocate: I would prefer to make it 9 or 10 o'clock, as for that, but that would probably interfere with my labor.

By a Member: I withdraw my motion.

By the President: The Court then stands adjourned until Monday, at half-past two o'clock.

(Here the Court, at 1.55 o'clock P. M., adjourned until Monday, January 17, until half-past two o'clock, P. M.)

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

180

United States Court Room,
Savannah, Ga.,
January 17th, 1898.

The Court met pursuant to adjournment at 2:30 o'clock p. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his counsel and the reporter D. O. Tarver, were also present.

The president: The Court will come to order. (Addressing the Judge-Advocate). Read the telegram.

Judge-Advocate: This is a telegram handed me by the President of the Court, and reads as follows:

"Washington, D. C., Jan'y. 15th, 1898.

"To Brig. Gen. E. S. Otis,

"President, Court Martial,

"Savannah, Ga.

"In accordance with request in telegram this date from
"Col. Barr, Judge-Advocate of the Court, the Acting Secretary of War directs that you and the other members and
"the Judge-Advocate of the Court Martial of which you are
"President, and the accused, Capt. Carter, Capt. C. E. Gillette, Corps. of Engineers, Capt. C. McClure, Eighteenth Infantry, and the Reporter proceed as necessary for public
"service to Augusta, Ga., and return, for purpose of taking
"testimony of Marion Twiggs, a material witness for the
"prosecution.

"SAM BRECK.

"Adj't. Gen'l."

Judge-Advocate: I move now, Mr. President, that this Court adjourn to meet in Augusta, Ga., to-morrow morning at half past nine o'clock.

181 The President: The Court stands adjourned until to-morrow morning at half past nine o'clock, to meet at Augusta, Ga.

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

182

Reading Room, Arlington Hotel,
Augusta, Ga.,
January 18th, 1898.

The Court met pursuant to its adjournment of yesterday,
at 9:50 o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, Mr. Rose and Mr. Charlton of his counsel, and the reporter, W. O. Tarver, were also present.

The President: The Court will come to order.

The Judge-Advocate: Mr. President, I have just learned of the condition of the witness, Mr. Twiggs, who is at the residence of his brother, and it will be impossible to bring him to us here, in view of the day we have, and I move that we adjourn to Mr. Twiggs' residence where he has kindly offered us the use of his parlor for the examination of his brother, and we can proceed from here.

The President: What hour will be convenient for Counsel?

The Judge-Advocate: It is now five minutes to ten o'clock and I am at the disposal of the Court for any hour that may be suggested.

The President: If it is the sentiment of the Court, we will proceed at once to his residence.

Residence of A. J. Twiggs,
Corner Elbert & Greene Streets,
Augusta, Ga.,
January 18th, 1898.

The Court met pursuant to adjournment at 10:20 a. m.

Present:

183 All the members of the Court and the Judge-Advocate.

The accused, Mr. Rose and Mr. Charlton of his counsel, and the reporter, W. O. Tarver, were also present.

MARION TWIGGS, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. Please state your full name?

A. Marion Twiggs.

Q. What has been your connection with the improvements at Cumberland Sound?

A. I was assistant-engineer,

Q. For how long a period?

A. A period of about eight months.

Q. From the beginning of the contract?

A. From the beginning of the contract.

Q. Until about what time?

A. Until about the first of September.

Q. Were you present at an inspection of a mattress by Capt. Gillette soon after he relieved Capt. Carter?

A. I was.

Q. Where was this inspection?

A. That inspection was near old Fernandina, Fla.,—Near the Government reservation.

Q. The mattress was under inspection at that time.

A. The mattress was under inspection at that time.

Q. Describe the mattress.

A. The mattress was a mattress built according to the third design, modified by Capt. Carter, and that mattress had a bottom grillage and then came a layer of brush and a grillage on top of that, and a layer of brush, and so on, until there was a mattress of eight courses formed.

Q. Was the mattress constructed according to the specifications of the contract?

A. It was not.

Q. (Handing witness photograph) I hand you a photograph of a mattress which has been before the Court; or I hand you two photographs of a mattress which has been before the Court. Do you recognize them?

A. That was a mattress inspected by Capt. Gillette—, two views of it.

Q. How did the mattress compare in construction and quality to those previously sunk in the work during the present contract?

A. It was about an average mattress.

Q. Did it essentially vary in any particular?

A. Not that I noticed.

Q. Did you supervise the construction of a mattress shortly after the inspection referred to,—of a mattress built according to the specifications under the orders of Capt. Gillette?

A. I did.

Q. What were his orders?

A. His orders were to build one mattress strictly according to the specifications.

Q. Which specifications—, which design?

A. The third design.

Q. (Handing witness a photograph.) Is this a photograph of that mattress?

A. That is not a photograph of that mattress; that 185 is a single course mattress.

The Judge-Advocate: That is not the photograph. Excuse me—, my assistant has handed me the wrong photograph. There was no photograph taken of that.

The Court: The Court will look into these two photographs. (Here the Judge-Advocate handed the President the photographs referred to).

Q. (The Judge-Advocate continuing:) Please describe any mattress you built under instructions of Capt. Gillette in accordance with the third design?

A. It was a grillage first formed of live pine poles placed about six feet from center to center, and then there was a layer of closely compacted fascines placed on top of that grillage. Those fascines, I think, were fifty feet long. Then on top of that layer of fascines was another grillage, and the lower and top grillages were made fast by wire, and on top of that was placed another layer of fascines closely mashed up together, and so on. In other words, there was a single mat placed on each of them.

Q. How many courses?

A. Four courses.

Q. Was there a bottom grillage to the second mat or to each mat?

A. To each mat; yes, sir.

Q. You made a report to Capt. Gillette on August 12th, 1897, in which you referred to two mattresses: Did you mean those mattresses in regard to which you have just testified?

A. I did, sir.

Q. How did you weigh them?

A. By displacement of the water.

Q. Are the results of that measurement correctly given in the report you have testified to?

186 A. I believe they are correctly given.

Q. (Handing witness paper:) Is that the report, Mr. Twiggs?

A. That is the report, sir.

Judge-Advocate: It is marked "Fernandina, Fla., August "12, 1897. Twiggs, Marion, Asst. Eng. Submits report on "measurement, and computing displacement of barges 37 and "42, carrying old style and new style mats, and showing reduced estimate of mattress work for July 1-31, 1897."

Q. (The Judge-Advocate continuing:) That mattress you weighed was not the mattress that was inspected by Capt. Gillette, I understand?

A. It was not the mattress inspected by Capt. Gillette.

Q. I mean the first mattress in regard to which you testified?

A. No, sir.

Q. One subsequently offered by the contractors?

A. How is that?

Q. Was it one subsequently offered by the contractors?

A. That is correct.

Q. Is the table of widths, etc., given in your report of August 5th, 1897, based on your personal knowledge?

A. It is based on my personal knowledge.

Q. (Handing witness paper:) Is that the report of August 5th to which you refer?

A. That is the report.

Q. Are the statements made therein correct?

A. I believe them to be correct.

The Judge-Advocate: This is a statement consisting of four pages endorsed, "Fernandina, Fla.? August 5, 1897,

"Twiggs, Marion, Asst. Engineer, Submits tables showing height (average), width and No. of cubic yards of

"stone on mats placed on North and South Jetty under "contract of October 8th, 1896, by the Atlantic Contracting "Company," signed by Mr. Twiggs.

Q. (The Judge-Advocate continuing:) Was there any change made in the construction of mattresses between the last inspection made by Capt. Carter and the first inspection made by Capt. Gillette.

A. There was a change at the first inspection made by Capt. Gillette.

Q. Prior to that inspection?

A. No change at all made.

Q. Between the last time an inspection was made by the accused, Capt. Carter, and the first inspection by Capt. Gillette?

A. No change.

Q. Have you tested the rock delivered as fourth-class rock under the specifications of this contract, known as Florida limestone, for specific gravity?

A. I did test it.

Q. Did it comply with the requirements of the specifications of the contract for fourth-class rock?

A. It did not.

Q. Did you make a report on it?

A. I did.

Q. (Handing witness paper:) Is this it?

A. It is, sir.

The Judge-Advocate: This is a report endorsed "Fernandina, Fla., August 25, 1897. Twiggs, Marion, Asst. Engineer. Stone furnished by Atlantic Contracting Company "does not fill the specifications. Asks for instructions."

Q. (The Judge-Advocate continuing:) Was that a correct report?

188 A. I believe it to be.

Q. Were any Inspectors kept at the place where mattresses were built?

A. Only while one mattress was being built.

Q. That was when?

A. That was when the four-course mattress was being built.

Q. That was under Capt. Gillette's instructions?

A. Yes, sir.

Q. Prior to the arrival of Capt. Gillette were any Inspectors kept at the mattress camp?

A. No Inspectors kept there at all.

Q. Did Capt. Carter give any orders in regard to such inspections?

A. He did not.

Q. Did he see any of those mattresses such as you have described?

A. He saw several of them.

Q. What conversations, if any, have you had with the accused, since he was relieved from duty on subjects connected with his administration?

A. I only had one conversation with Capt. Carter in which he came to the Hospital. He said that the mats he had seen were the mats that he wanted built; that they suited him exactly. That is one particular point I remember. I was sick at the Savannah Hospital at that time.

Q. Was that the time when the Board was in session?

A. Just previous to that time; before that time at Savannah, two or three days.

Q. Prior to the arrival of the officers constituting the Board?

A. Yes, sir.

Q. Did you have any other conversation with him upon any other topic than his past administration?

189 A. Nothing that I think would bear on this case especially.

Q. Perhaps the Court had better judge of that, Mr. Twiggs. Will you state what the conversation was?

A. My memory is a little bad on that point now, and I do not think I can state it correctly.

Q. State as near as you can your recollection of it?

A. Capt. Carter asked me generally about the construction of the work, if I believed the fascines were built according to the specifications, and I told him I did not believe they were, and then he asked me about the general construction of the work, and did I feel free to come into his office and speak to him at any time about the work, and I told him I did not feel free to come into his office. He asked me why, and I told him I believed he was very friendly to Capt. Greene. That was about all.

Q. That is all you can recall at this time, Mr. Twiggs, of your talk with him?

A. Give me a minute, so I can think. (At this point, the examination was suspended for a few minutes on account of the physical condition of the witness.) (Witness continuing:) There is another point that I recall. Capt. Carter spoke of,—asked me about the different Inspectors, how they would probably testify, or something to that effect, and I mentioned different men,—Inspectors, Recorders, etc.,—and how I thought they would testify, and among them I mentioned the Inspector over my work, and he remarked that it didn't make any difference; he was weak. That is the only important point that I remember.

Q. In regard to the mattress, the two mattresses which were submitted, you examined the fascines, or so-called fascines used in their construction; were they, of themselves, 190 in compliance with the specifications of the third design?

A. The fascines used?

Q. Yes?

A. No; they were not.

Q. In what did they differ?

A. They were about fifteen feet long, and bound at irregular intervals, and not choked.

Q. Were they trimmed?

A. They were not trimmed.

Q. Not at all?

A. I noticed sometimes when there would be a big, rough place in there that interfered, and you could not mash it in there,—at times they would cut those large pieces off, but generally they were not trimmed at all.

Q. Were the mattresses used at Cumberland Sound essentially different from those built in Savannah harbor, with which you are familiar?

A. I think the mattresses built at Cumberland Sound were better than the mattresses I saw at Savannah Harbor.

Q. (By the Court:) Did he say "better?"

A. (By witness:) Yes, sir: the average mattress.

Q. (The Judge-Advocate continuing the examination:) What kind of timber was used in the construction of those mattresses?

A. Anything that happened to be on the ground. A force of hands was put out on the reservation, and they cut as they went along, and used whatever they happened to get in making the bundles of brush.

Q. Do you know how the force employed in the gathering of those bundles were paid?

A. They were paid by the bundle.

191 Q. They were not on the regular pay-roll of the contractors?

A. I don't think they were.

Q. Do you know of any kind of wood that grows in the vicinity of the mattress camp that has not been used in the construction of mattresses under this contract?

A. I do not.

Q. All kinds were used?

A. All kinds were used.

Q. Did you ever know of a case where Capt. Carter knew of anything being paid for on the Government pay-roll as personal services?

A. No, I do not know.

Q. (Handing witness drawing.) Did you make that map?

A. I did.

Q. Will you please describe it?

A. Those lines shown in black were the mats one hundred

feet apart, and one hundred feet wide, sunk on the sand at North Jetty, Cumberland Sound, and those mats shown in blue were a second course of mats sunk on top of the mats shown in black. Is there any other question which you wish to ask?

Q. How was the profile of the bottom line obtained?

A. The profile of that bottom line shown is the ground-line on this map,—was the ground at the time the first course of mats was sunk, and before the mats were sunk, when the water was sufficiently smooth soundings would be made,—before the mats were sunk, and after the mats were sunk soundings would be made on top of the mats, which gave the lower black line. The whole profile was made after that method. The lower blue line shows the bottom that the top course of mats was sunk on. That was obtained in the same

way. That was made after those mats were sunk. I believe 192 it was rather rough weather at that time. Most of those mats were sunk, I believe, before the soundings were made, and I tried to get between the mats with long sounding poles, and get to the bottom that way. A great many times the bottom was rock, and that top blue line shows the top of the second tier of mats.

Q. What does that indicate?

A. What do you mean?

Q. Whether there had been shrinkage, or not?

A. That indicates that there had been shrinkage from that top black line to the blue line.

Q. To that second line, there?

A. To that second line, there; that is, that indicates it to my mind.

Q. That map contains a correct record of the survey and soundings made by you?

A. As correct as could be made at that point.

Q. You are an Engineer by profession?

A. Yes, sir; I have been in that business all my life.

Judge-Advocate: (Handing document to the Court:) This map is offered in evidence, to go with the record of this Court. This map is described as follows: "Mats sunk on Range No. '3, North Jetty, Cumberland Sound, Ga. and Fla., during 'July 21-31, 1897; horizontal scale 50 feet to 1 inch; vertical 'scale, 10 feet to 1 inch." It will be attached to the record, marked "Augusta No. 1"

Q. (Judge-Advocate continuing.) (Handing witness paper:) What is that?

A. That is the letter of transmittal of that map.

Q. Its statements are correct?

A. I believe them to be.

Judge-Advocate: This is endorsed "Fernandina, Fla.,
193 "August 15th, 1897, Twiggs, Marion, Asst. Engineer. Re-
ports that soundings were taken on August 12th on the
"mats sunk on the North Jetty during July 21st and 31st,
"1897."

Q. (Judge-Advocate continuing.) (Handing witness pa-
per) What is that paper, Mr. Twiggs?

A. It is a table evidently submitted showing the amount
of brush,—the amount as compared with the old bundles of
the brush in the fascine.

Q. That table was not prepared by you?

A. That table was prepared by the Inspector.

Q. Do you know anything as to the accuracy of the con-
tents of that from your personal knowledge?

A. No; I do not.

Judge-Advocate: This is as far as I care to interrogate this
witness at present, and as the witness is weary I suggest a
recess. I have two or three other questions for him later
on.

The Court: If the Court can take a recess until half past
three o'clock this afternoon, I am advised that the Court will
be advised whether the witness can continue.

Mr. Charlton, Counsel for Defense: In order that there
may be no misapprehension, I will state now that the De-
fendant will submit no questions at all to this witness; and
if Mr. Twiggs can answer the two or three questions to be
submitted by the Judge-Advocate now, we can get through.
Mr. Twiggs may prefer that, and we can get through to-day.

Judge-Advocate: We cannot sit longer than three o'clock,
Mr. President.

The Court: The Court will then take a recess until two
o'clock this afternoon.

Judge-Advocate: The witness states that he would like
to make a correction in his testimony, and perhaps he had
better do it now.

194 Witness: I stated about the construction of that four-
course mat according to the specifications. I made a mis-
statement there in stating that fascines were placed on gril-
lages and then came grillages and then fascines and then
grillages. It should have been a layer of fascines, and then
a layer of—, It should have been the grillage was first con-

structed, and then a layer of fascines, and then another grillage on top of those fascines. The upper and lower fascines were made fast together by wire; then came a grillage, and then another layer of fascines on top of this grillage, and a grillage on top of the fascines, and all was bound securely together with wire again, and so on, until the four courses were complete.

The Court: If there are no objections, the Court will take a recess until two o'clock p. m., to meet here. (At 11:30 A. M. the Court took a recess.)

At two o'clock p. m., the Court reassembled at residence of A. J. Twiggs, corner Elbert and Greene streets, Augusta, Ga., on January 18th, 1898.

Present: All the members of the Court and the Judge Advocate.

The accused, Mr. Rose and Mr. Charlton of his counsel, and the reporter, W. O. Tarver, were also present.

Interrogation of Marion Twiggs, a witness for the prosecution, resumed, as follows:

Direct Examination by the Judge-Advocate.

Q. You testified, Mr. Twiggs, in relation to a four-course mattress constructed in accordance with the third design. Was that a four course mattress or a mattress of four courses?

A. It was four mats on top of each other.

195 Q. Four distinct mats?

A. Four distinct mats.

Q. When the Atlantic Contracting Company commenced work at Cumberland Sound under the present contract, did you give them any instructions as to which of the three designs of mattresses should be used?

A. I did not give them any instructions when they commenced.

Q. Were you called upon for any information upon the subject?

A. No, sir.

Q. By them or by any one else?

A. No, sir.

Q. Do you know why not?

A. I think the contractor had received instructions from Capt. Carter.

Q. Did Capt. Carter tell you?

A. No, the contractor told me.

Mr. Charlton, of Counsel for Defense: I respectfully suggest that he ought to tell what the contractor told him.

Q. (The Judge-Advocate continuing:) Do the specifications provide for mattresses of six or eight courses?

A. No, sir.

Q. I refer to the contract with the Atlantic Contracting Company, for the improvements at Cumberland Sound?

A. No, sir.

Q. Were you furnished with a copy of the specifications or contract at the beginning of the work?

A. No, sir; I was not.

Q. Did you know the contract price of the mattresses?

A. I did not.

Q. Did you know the contract price of the stone?

A. I did not.

Q. What is your estimate of the cost of the mattress, as built, such as you have testified to,—the one Capt. Gillette inspected and of the same character as this that had been used and been sunk, under the contract, per square yard?

A. What is my estimate of the cost?

Q. Yes; of the cost of making?

A. Repeat that question again, please.

Q. What is your estimate of the cost of the mattress, as built, per square yard,—this mattress in regard to which you have testified?

A. My estimate is about ten cents.

Q. That was simply the construction of the mattress on the barge?

A. That included everything. I think,—sinking, too.

Q. Sinking and all?

A. Sinking and all.

Q. The cost of the mattress as sunk in place, for which the contractor was to be paid, was ten cents per square yard?

A. Ten cents per square yard.

Q. You have testified as to those bundles of which these mattresses were constructed: Were they properly filled with brush?

A. How is that?

Q. The bundles, or so-called fascines, were they properly filled with brush?

A. No, sir; I don't think they were; they were very loose.

Q. They were not drawn together?

A. They were not drawn together,—not choked.

Q. Can you recall, Mr. Twiggs, how many mattresses were inspected by Capt. Gillette before work stopped?

A. I know of two that he saw at Cumberland Sound—197 three of them I think he saw there—, single-course mats.

Capt. Gillette, I think, saw two mattresses of the old design, and he saw two or three mattresses built according to the specifications, if I remember correctly.

Q. How did the second mattress, the eight-course mattress you weighed compare with the one shown in the photograph,—the first mattress inspected by Capt. Gillette?

A. How did it compare?

Q. Compare in construction?

A. It was a different mat entirely. It was compact, and built out of fascines, and the other mattress was built out of bundles of brush and very loose. It was entirely a different kind of mat. It is a hard matter to compare them exactly.

Q. I am referring to the two mattresses furnished by the contractors, the first and second one?

A. The two mattresses furnished by the contractors?

Q. Yes, the first one furnished and the next one furnished—how did they compare?

A. The second mattress was better constructed than the first one that Capt. Gillette saw.

Q. Was it constructed on the same general principles?

A. It was constructed on the same general principles, but I think there was a good deal more material in that mattress than in the first mattress Capt. Gillette saw.

Q. A greater number of bundles?

A. Yes, sir.

Q. Pressed closer together?

A. Pressed closer together.

Q. What kind of stone was used by the contractors 198 in the improvement at Cumberland Sound?

A. The majority of it was limestone obtained from Florida. Then, there was some granite used; most of that was obtained near Columbia, S. C., I believe.

Q. How much of that was used?

A. The granite?

Q. Yes?

A. I don't remember now the proportion. I know there was a great deal more limestone used.

Q. Do your reports show the quantity of each?

A. My reports show exactly.

Q. They are on file in the office of the Engineer in Savannah?

A. Yes, sir.

Q. That Florida limestone is the stone which you tested for specific gravity?

A. I tested that, and also the granite.

Q. And they are both to be found in the report?

A. No; I did not report the granite.

Q. Your report, then, only covers the Florida limestone?

A. It only covers the Florida limestone.

Judge-Advocate: Unless, Mr. Twiggs, you have some further testimony that you can think of that is properly relevant to the questions,—properly responsive to the questions which I have asked you, I have nothing further to ask you.

Witness: There is nothing I can think of, sir.

Mr. Charlton, of Counsel for Defense: May it please the Court, the Defense declines to examine the witness; or, rather, does not care to do so.

Q. (By the Court:) Under the present contract of 1.9 October 8th, 1896, for Cumberland Sound, did the average of the fascines which you saw contain enough brush to make fascines nine inches in diameter if they had been well cicked.

A. There was not enough material in the bundle.

Q. (By the Court:) Was the brush distributed along the fascines so, that, if well choked, they would have been nearly uniform in diameter?

A. Sometimes they were and sometimes they were not: there was no regularity on that point.

Q. (By the Court:) Was the brush used in making the fascines good, live brush?

A. Generally it was.

Q. (By the Court:) The contract says the fascines shall be carefully and thoroughly made. Were they so made?

A. They were not so made.

Q. (By the Court:) In what respect were they not carefully and thoroughly made?

A. Sometimes,—very often the rope that they were bound with would slip or be broken, and it was tied very loosely, and a fascine would be larger at one place than at another. It seemed to be very small at certain places. And again, one or two men would be carrying a fascine, and it would bend double in the middle if they were not careful.

Q. (By the Court:) At about what average interval were they choked?

A. They were choked about two or two and one-half feet.

Q. (By the Court:) I would like to ask what proportion of brush the fascines contained compared to what they should have contained, whether one-fourth, one-third, one-half or one-tenth?

A. I expect about one-third.

Q. (By the Court:) I would like to ask if, in the 200 bundles that were used for the filling of mattresses, if that brush was bundled or loose?

A. It was bundled.

Q. (By the Court:) I should like to ask the witness if, at any time between the inception of the contract and the time when Capt. Carter was relieved from duty, he made any report to him of these various defects or defaults in the contract?

A. Capt. Carter inspected these bundles of brush. I saw him when he inspected them, and consequently it was unnecessary for me to make a report, as he made no remarks upon these bundles of brush.

Q. (By the Court:) Did you have any conversation with Capt. Carter concerning these failures, I mean from the inception of the contract to the time Capt. Carter was relieved?

A. I did not.

Q. (By the Court:) I would like to ask the witness what his specific duties were, and what were the duties of the Inspector; what specific duties were assigned to you?

A. There was an Inspector appointed over the work to measure the material and inspect it. I was Assistant-Engineer in charge of the work, and I inspected a great deal of the material myself, or watched him to see if he was correct; but generally he did most of the inspecting. That was his principal duty. My principal duty was to see that everything went straight, and to attend to the survey work and the engineering work necessary.

Q. (By the Court:) In what locality—what locality were your duties confined to?

A. Cumberland Sound.

Q. (By the Court:) The entire Sound?

A. Yes, sir.

201 Q. (By the Court:) Can you state the date when the contractors first commenced work on this contract?

A. About the last part of November.

Q. (By the Court:) The latter part of November, 1896?

A. 1896.

Q. (By the Court:) Did you inspect all the mattresses placed in the Jetty?

A. Not all of them.

Q. (By the Court:) What proportion?

A. I inspected half of them.

Q. (By the Court:) How many were placed in the Jetty?

A. I don't remember the number now.

Q. (By the Court:) Relatively, as near as you can recall?

A. Over one hundred.

Q. (By the Court:) Were they all constructed after the manner of the one which Capt. Gillette and yourself inspected, the one you have testified to?

A. That was an average mattress; some of them were better than that, and some of them a little worse than that.

Q. (By the Court:) Was their general character the same?

A. The general character was the same.

Q. (By the Court:) Under the specifications and under the contract, how did you understand that these mats should be placed in the Jetties? One by one, and weighted down, or several bundled together and tied together, and all in one mass?

A. Several tied together in one mass.

Q. (By the Court:) How many tied together?

A. Eight.

Q. (By the Court:) They could tie all the mattresses together and sink them that way.

202 A. That was the instructions, to tie the different courses together, which were called eight-course mats, which we sunk.

Q. (By the Court:) You received instructions to receive mattresses of that kind?

A. Yes, sir.

Q. (By the Court:) From whom?

A. From Capt. Carter. They started at six courses and went up to eight courses.

Q. (By the Court:) How was it intended that those mattresses should be weighted—What instructions did you receive upon that point from Capt. Carter?

A. To place a sufficient amount of stone upon each mat-

dress to make it secure in case of storms, and to use as little stone as possible.

Q. (By the Court:) That, then, was a matter resting entirely in your discretion was it,—the amount of stone which you placed upon the mattresses?

A. The amount of stone. After the mattress work was finished, it was intended to go over all the mattresses then, and the stone work would be continued.

Q. (By the Court:) Were the mattresses constructed under Capt. Gillette's order ever placed in that Jetty—, the experimental mattress, was that ever placed in the Jetty?

A. They were placed in the Jetty.

Q. (By the Court:) Tell me how that was weighted?

A. Weighted with stone, about the usual amount I believe.

Q. (By the Court:) All the mats were placed together and stone on the top?

A. Stone on the top.

Q. (By the Court:) There was no stone between the 203 grillage in any way?

A. The stone would necessarily fall between the grillage on the top.

Q. (By the Court:) Yes, on the top, but, as I understand, these mats were all separate mats, grillage above and grillage below; now two courses of grillage came together on these mats, the interior grillage?

A. In the mat Capt. Gillette ordered, they did.

Q. (By the Court:) The two courses were tied together?

A. Yes, sir.

Q. (By the Court:) The top of one and the bottom of another?

A. Yes, sir.

Q. (By the Court:) No stone was placed, then, except on the top?

A. On the top. The mats he ordered consisted of four mats, all fast together. They were all sunk at once by placing the stone on top of that mat.

Q. (By the Court:) Those were his directions?

A. Directions on that one mat; that was the test mat.

Q. You saw the mattress placed in the Jetty?

A. Yes, sir; it was placed in the Jetty.

Q. (By the Court:) Any others placed in the Jetty subsequently?

A. Yes, sir; they were single course mats.

Q. (By the Court:) How were they placed?

A. They were placed on top of some of the old work there, and weighted with stone,—weighted on the top.

Q. (By the Court:) There was no stone between the mats?

A. Some stone would always fall between the mats; for instance, there would be a space of several feet—

Q. (By the Court:) But not placed there before the top mats were put on?

A. No, sir.

204 Q. (By the Court:) Did you inspect all the mattresses placed in that Jetty until the contractor concluded work?

A. No, sir, I did not inspect all of them.

Q. (By the Court:) No, no; I mean after the experimental mat was made, that you say was placed in the Jetty?

A. Yes, sir.

Q. (By the Court:) How many more were placed in that Jetty subsequently to that time?

A. About three or four.

Q. (By the Court:) Were they placed on the top, along the Jetty on the top—, all of them?

A. Yes, sir, they were placed on top of a course of old mats.

Q. (By the Court:) I would like to ask what proportion of the Jetty received single course mats, and what proportion received mats of two, three or four or more courses?

A. I cannot answer that correctly now; I do not remember the data on that point.

Q. (By the Court:) How many courses did the mattresses contain that were being placed on the Jetty when Capt. Gillette took charge?

A. Eight courses.

Q. (By the Court:) Were those mattresses paid for per square yard for each course?

A. They were.

Q. (By the Court:) That is, if there was a mattress containing eight courses, the mattress in place would contain eight square yards, for ever square yard in each course, to be paid for: Is that correct?

A. Yes, sir.

205 Q. (By the Court:) In what condition did those mattresses go into the Jetty? Were they torn in getting them into the Jetty, or were they put in in good condition?

A. Sometimes they were torn, and sometimes they went in in good condition.

Q. Generally, did they hold together very well, or not?

A. They generally held together very well, except when there was a very heavy sea. Of course, heavy sea waves would sometimes break some of the wires, and some of the grillages were sometimes broken by barges.

Q. (By the Court:) Were they delivered into the Jetty on a scow, or towed into place?

A. They were put on top of a barge and dumped off; they were on a barge, and they were dumped off into place. Stone barges were anchored on either side of the mattress and everything made fast, and then the mattress was sunk from using the stone from both barges at the same time.

Q. (By the Court:) Was the surface of the mat pretty uniformly level when sunk?

A. That was the intention.

Q. (By the Court:) Was that the fact?

A. Generally it was.

Q. (By the Court:) What depth of water were they sunk in?

A. From ten to thirty-one feet, I believe.

Q. (By the Court:) I would like to ask about the binding: Were they mostly bound in wire or tarred rope?

A. The bundles of brush were bound with tarred rope: I don't know whether it was tarred rope exactly, but it was pretty strong and had tar on it; and the grillages were bound with wire.

Q. (By the Court:) What was the average thickness 206 of the ballast that was placed on the mats?

A. Less than a foot probably, or a foot of stone.

Q. (By the Court:) Was it thrown on by hand from scows?

A. Thrown on by hand.

Q. (By the Court:) Was there much loose brush perceptible on the mats, before the ballast was put on them, unsecured?

A. On some mats there was; some bundles would work out, but in smooth weather, as I said, they always went down in good shape.

Q. (By the Court:) Were there holes in the mats through which any ballast could go at all?

A. Generally there was not; sometimes it would fall down in one or two courses. There might be a bundle or two

missing in there, and the stone would go down that depth, and catch on something else.

Q. (By the Court:) You stated that the fascines were about fifteen feet in length?

A. Yes, sir.

Q. (By the Court:) How were they joined: Did they make good joints where one fascine butted against another?

A. Sometimes they did, and sometimes they did not.

Q. (By the Court:) On what system were those fascines fifteen feet in length placed in the mattress—in what order were they arranged,—in rows?

A. In rows.

Q. (By the Court:) Was there any breaking of joints between the rows where they united?

A. They broke joints frequently: that was the general intention.

Q. (By the Court:) Was that intention carried out?

A. Sometimes it was not. I noticed in one or two cases that I had to call the attention of the contractor to that and tell him to break the joints.

Q. (By the Court:) Did he correct it when you called his attention to it?

A. He corrected it at that time.

Q. (By the Court:) Did you ever call the contractor's attention to any defects which he failed to correct?

A. I was calling his attention to defects all the time.

Q. (By the Court:) Did he fail to correct them?

A. Very generally he did.

Q. (By the Court:) What reason did he give for not responding to your demand—for not complying with your demands?

A. He made all kinds of excuses. Sometimes saying the Foreman would not do this, and that, and the other.

Q. (By the Court:) Did you ever order him to discontinue work unless he complied with the specifications?

A. No, because all the mats came up to the specifications of the mattress I had seen sunk in Savannah. I was continually trying to get them in better shape than any mattress I had seen in Savannah. I thought that it would be better to do that.

Q. (By the Court:) How many of these mattresses did Capt. Carter see put in the Jetty,—those which you considered defective?

A. I don't remember that. I remember that Capt. Carter inspected five mattresses that I know of; he saw them.

Q. (By the Court:) On Cumberland Sound?

A. On Cumberland Sound.

Q. (By the Court:) Were they all at one time, or at different inspections?

A. Different inspections.

Q. (By the Court:) How many different inspections?

208 A. I don't remember; it was three different inspections anyway.

Q. (By the Court:) At what intervals of time were those three inspections made?

A. I don't remember that.

Q. (By the Court:) Can you give about the date of any one inspection?

A. Yes, it was about July.

Q. (By the Court:) What year?

A. July, 1897.

Q. (By the Court:) Those five mattresses which Capt. Carter saw, how did they compare in quality with the first one with Capt. Gillette inspected after he took charge of the work?

A. One mattress I remember especially, Capt. Carter went out with the tow to see; he stood right by that mattress, and I was on the stone barge with him, and the contractors had everything hooked up and sank this mattress, and he saw it very well I think,—on top and all sides, and that mattress was a little worse, I think, than the mattress Capt. Gillette saw, because I inspected that myself very carefully. I also inspected the mattress that Capt. Gillette inspected.

Q. (By the Court:) Now, from your answer to my question, tell me about what proportion of brush that mattress he saw contained relatively to the amount it should have contained to make a mattress like that called for by the specifications?

A. The proportion would be about four-ninths; one-third to four-ninths, somewhere along there.

Q. (By the Court:) Do you know the price that was paid per square yard for that mattress?

A. I do not remember now.

209 Q. (By the Court:) Was it sunk as a single-course mattress?

A. No; it was sunk as an eight-course mattress.

Q. (By the Court:) What was the length and breadth of this mattress of eight courses?

A. One hundred feet broad; there were four courses, one

hundred feet broad and fifty feet wide, and on top of those four courses there were four more courses eighty feet broad and fifty feet wide.

Q. (By the Court:) Eighty feet long, you mean?

A. The mattresses were generally sunk perpendicular to the axis of the Jetty.

Q. (By the Court:) The lower courses were one hundred feet long and fifty feet wide?

A. Yes, sir.

Q. (By the Court:) Now, what was the width of the upper?

A. Eighty feet by fifty feet.

Q. (By the Court:) Did the upper courses project over the lower ones?

A. No, sir; they were eighty feet: The lower ones were one hundred feet.

Q. (By the Court:) You said the lower ones were one hundred feet long and fifty feet wide: Now, how wide were the upper courses?

A. The upper courses were eighty feet wide and fifty feet long.

Q. (By the Court:) Then, the width in one case was greater than the width in the other. Were the sides of this eight-course mattress vertical from top to bottom, the whole eight courses?

A. They were fifty feet in length. (Here the witness, with his hands illustrated to the Court the position of the mat as it laid upon the Jetty.)

Q. (By the Court:) Which way was the axis of the Jetty?

210 A. (In answer to the above question, the witness described and illustrated with his hands the direction of the axis of the Jetty, and how the mats were placed on the Jetty.)

Q. (By the Court:) Across that axis how wide was the Jetty?

A. Across the Jetty was one hundred feet; that is, the mattress was one hundred feet wide; and then on top of that came four more courses eighty feet wide, and the ends of the mats were perpendicular, the whole eight courses.

Q. (By the Court:) Did you make all the measurements of the mattresses delivered by the contractor—did you personally supervise the measurements?

A. Not all of them.

Q. (By the Court:) What proportion?

A. That is hard for me to say: I measured one-third of them—something like that. I would not say how many. It was about that, roughly.

Q. (By the Court:) In your estimation, in your opinion what was the value or the cost of the mattress which was constructed under Capt. Gillette's orders? You estimated the cost of the other?

A. Yes, sir: I intended to estimate the cost of Capt. Gillette's mattress, but never did; I was taken sick, and never made any estimate on that. In saying that I measured one-third, I meant to say that I checked a great many. The Inspector measured all the mattresses, and he measured all the material,—the Inspector on the works. He measured all the material, both the stone and the mattresses. Occasionally I would take the tow out to sea and sink the mattress personally, and leave him inside. When I say I measured one-third, I checked one-third.

Q. (By the Court:) He is the party who reported the 211 measurements to Capt. Carter?

A. His measurements were the official measurements, put in the books of the office, and those measurements I adopted in my reports and submitted those reports to Capt. Carter.

The Judge-Advocate: I move that we adjourn to meet in Savannah, Thursday, at 11:00 o'clock. My time was fully occupied yesterday in examining papers, and I had no opportunity to confer with witnesses whom I wished to examine, and I desire time for that purpose.

The President: You have all heard the motion to adjourn to meet in Savannah on Thursday, at 11:00 o'clock a. m. There being no objection, the Court stands adjourned, to meet in Savannah, on Thursday morning, January 20th, at 11:00 o'clock a. m. (At 2:48 o'clock p. m. the Court adjourned.)

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

212

United States Court Room,
Savannah, Georgia.
January 20, 1898.

The Court met pursuant to adjournment, at 11 o'clock, A. M.

Present:

All the members of the Court and the Judge-Advocate:

The accused, his counsel, and the Reporter, G. T. Cann, were also present.

Mr. Blair: May it please the Court, the accused desires to know from the Judge-Advocate to-day whether or not a certain chart which we have requested a number of times leave to inspect, will be delivered, or the accused will be permitted to examine to-day, and if not, we desire to make a statement and a motion to the Court in regard thereto.

Judge-Advocate: It will. I anticipated that action and I was about to tell you this morning it was open to inspection, and I was about to say to counsel before the adjournment of Court, that the chart is now open to inspection, the inspection of the accused and his counsel. I have myself had only one opportunity to look at it. It has been recently completed. It involved a great deal of labor.

Judge-Advocate: The Court will remember the testimony of Mr. Twiggs given in Augusta, in which he testified as to the accuracy of certain reports made by him, which I now have and will submit in evidence. First; is the report, dated Fernandina, Florida, August 5, 1897, by Marion Twiggs, Assistant Engineer, submitting measurements, taken, showing heights (average) width and number of cubic yards of stone and mattresses placed in the Cumberland Sound jetty under contract of October 8, 1896, under contract of the Atlantic Contracting Company. A copy of this report will be attached to the record and marked Exhibit No. 8.

The President: It will be received.

Judge-Advocate: The second report is dated Fernandina, Florida, August 12, 1897, Marion Twiggs, Assistant-Engineer, submits report of measurement of building and displacement of jetty 3742, carrying old style and new style of mat; showing weights and estimates of mattresses placed in works, July 6, to 31, 1897. A copy of this report will be attached to the record and marked Exhibit No. 9.

Judge-Advocate: The third report is dated, Fernandina, Florida, August 25, 1897, Marion Twiggs, Assistant Engineer; Stone furnished by the Atlantic Contracting Company,

Design 1 of the specifications of the contract for construction. This will be attached to the record and marked Exhibit No. 10.

ARTHUR S. COOPER, a witness for the prosecution, having been duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. Please state your name, Mr. Cooper, in full to the Court.

A. Arthur S. Cooper.

Q. Place of residence?

A. Savannah, Georgia.

Q. What is your profession?

A. Civil engineer.

Q. Where are you employed?

A. In the Savannah District, United States District, Savannah.

Q. How long have you been so employed?

A. I have been employed in the district off and on for 13 years, not continuously, but at different times for 13 years.

Q. How long, consecutively, since your last return up to now?

A. About four years and a half.

Q. What have been your duties?

A. I have served as Assistant Engineer, mainly in the field, in charge of construction.

Q. What has been your principal field of labor?

A. In Savannah Harbor?

Q. And inform the Court, please, just what the nature
214 of your duties were in the field work?

A. It was partly surveying and construction of training walls, spur dams, and all work of construction of the harbor, dredging also.

Q. Work being done under contract?

A. Contract work mainly.

Q. Who was the officer in charge when you came here last?

A. Captain Carter.

Q. The accused here, present?

A. Yes, sir.

Q. Please inform the court what you know of the character of the mattresses which have been placed in Savannah Harbor under the contract of the Atlantic Contracting Company of 1896.

A. Its been brush mattresses, mattresses constructed of brush and poles.

Q. Describe them.

A. Describe the brush?

Q. The mattresses.

A. There have been several styles put in the body of the work, however, as constructed, all mattresses were what is known as the third design mats, these mats consist of a grillage of poles on the bottom, spaced 8 feet apart both ways, being longitudinally and crosswise. On top of this grillage of poles rests a solid grillage of brush, bundles of brush, on top of this grillage of bundles of brush there is another grillage of poles; the top grillage being wired to the bottom grillage by wires leading clear through from the lower grillage to the top grillage. By grillage, I mean a double tier of poles, a tier running lengthwise and a tier running crosswise.

Q. At the top and bottom?

A. At the top and bottom.

Q. Have you described the character of the mattresses sunk under the contract?

215 A. I don't know that I understand exactly what you mean.

Q. The actual mattresses that you saw, actually sunk under this contract of 1896; does that description apply to these?

A. Yes, sir.

Q. Does that description apply to the third design of the specifications, mentioned in the contract?

A. Well, no. In the third design it said "fascine", and these mats were constructed of bundles of brush.

Q. Was the mattress you saw; how many courses of the mattresses?

A. They varied all the way from one course up to ten. Ten is the highest that has ever been sunk at one time.

Q. What would be the height of a ten course mattress?

A. This particular mat, ten course mat, was 15 feet high. I don't think but one of that height was ever sunk.

Q. What would be the height of a three course mattress?

A. A three course mattress would be four and a half or

five feet, of that style of construction;—that is, the style just described.

Q. Was the brush used? This is the contract of '96 I am speaking about.

A. Well, that would apply to the contract of '96 or of '92.

Q. I am referring solely to the contract of '96 now.

A. Ninety-Six, yes, sir.

Q. Now, were the mattresses sunk under this contract in Savannah Harbor, constructed in compliance with the requirements of the third type, mentioned in the specifications?

A. Not entirely; not entirely. The bundles of brush, as I said, before, were substituted for fascines, and in some instances all the poles were not put in. The top grillages sometimes would consist of a single tier to a course, while grill-larges mean double tiers.

Q. That is, top and bottom of each mattress?

A. Yes, sir; a double grillage was always the first.

Q. Was the brush trimmed?

A. No, sir; it was not.

216 Q. You inspected those mattresses as they were placed in position?

A. Either myself, or some of the inspectors working under my orders.

Q. You saw a good many of them, did you, go into place?

A. I saw nearly all of them go in.

Q. Did you see any mattresses go into place which filled the requirement of the third design under contract?

A. I did not see any that would fill the requirements of those specifications.

Q. You had the specifications before you?

A. Yes, sir.

Q. Had you any instructions as to what character of mattresses you should accept?

A. When I returned to the service in 1893 I was taken down on the works and shown what was going on, shown the style of construction, when I returned to the service in 1893 I was sent down the river and shown the style of mattresses at that time being constructed in the harbor. This style of construction was given to me as satisfactory to Captain Carter, and I was told that I was to carry on the work in the manner that I found it being carried on; in other words, to carry it to that standard, that style of construction, that style of construction that I found being used was the standard I

was to employ during my work. That, of course, was not a fascine, it was not a fascine according to the specifications, but I was told that that style of construction was satisfactory, and was what was wanted, I therefore carried out my instructions.

Q. Then those mattresses which you have seen sunk under the contract of 1896 in the Savannah Harbor were of the same character as those which had been previously shown you as acceptable to the accused?

A. Yes, sir, the same style of construction, and about the same height for each course, and were therefore satisfactory to the officer in charge.

217 Q. Were any instructions given you, in any degree varying from those original instructions, at any subsequent time?

A. Yes; to a certain extent varying the height required for each course.

Q. Please state what those instructions were.

A. I was given by Capt. Carter a list of the heights that would be required when multiple mats were put in; that is, mats made one on top of the other; being as high as ten courses at a time. I was given a list that each of these mattresses would have to have, in order to be entitled to the number of courses mentioned in that list, and that list was my guide for the entire construction of the entire work of the contract.

Q. Those instructions were then, as to the number of courses?

A. No; not the number of courses; but of the height of the mattresses would have, when the number of courses were given. The number of courses was specified by myself and the orders were issued to the contractor to build a certain number of courses, I knowing how high they would have to be, if there were that many courses.

Q. Have you any memoranda of those instructions?

A. I have; Capt. Carter gave me a pencil memoranda; I carried that in my field book until it was worn out. It was about to fall to pieces, and then I made a copy of it in one of my field books, but the original I have not got.

Q. You have not got the original?

A. No, sir.

Q. What have you done with it?

A. It was worn out, falling to pieces, and I threw it away.

Q. You threw the remnants away?

A. Yes, sir.

Q. You are sure it was been destroyed?

A. Yes, sir.

Q. Have you a copy with you?

218 A. Yes, sir; I have a copy with me; it was copied in the back of one of the field books, used in the construction of the Cockspur Island training wall, or in the front, however.

Q. Please read and explain those instructions.

A. "The first course will be 2 feet in height; that means a single course mat must have a height of two feet, that is, an average height of 2 feet, by taking several measurements; 6 or 7 measurements all over the mat, and the mean must be 2 feet. Second course mat, 3-1/2 feet: Fourth course mat, 5 feet: A Five course mat, 7-1/2 feet; A six course mat, 9 feet; A seven course mat, 10 feet; An eight course mat, 12 feet." The list was not carried any further than that, because it was not contemplated to build mats much higher than 12 feet, only in isolated cases.

Q. What was to be the height of a 10 course mat?

A. That is not given in this list; an 8 course mat is the highest given.

Q. What is the height of the 8 course mat?

A. 12 feet; that is the average of a foot and a half per course.

Q. And what the two course mats?

A. Three and a half feet. That has been the basis of the entire work under the '92 contract, and has also continued to be the basis of the '96 contract.

Q. That is the basis upon which computation for payment has to be made?

A. No, sir; not exactly; practically, but that's not meant so.

Q. Were computations for payment to be made on that?

A. Well, yes; but I will have to explain what that means. Suppose a mat was delivered to be one of seven courses; this table says it must be 10 feet high. Suppose that mat was only 9 feet high, instead of being allowed for a 7 course mat, they would only be allowed for a six course mat.

Q. Then it was the basis of computation.

A. Basis of computation, yes, in that way.

219 Q. Can you estimate the cost per square yard of the mattresses that you saw go in?

A. I have made an estimate, you mean as put in the works?

Q. As when sunk?

A. The specification mats as put in the works?

Q. As put in the works, I ask you what was the value of a square yard?

A. I have computed it to be 9 cents. That is the cost as placed in the works.

Q. How do you arrive at that conclusion?

A. I have gone over the details of the construction, and the cost for 2000 yards of mat, dividing the entire cost by 2000 gives the mean per square yard.

Q. I understand that the mattresses of different courses that an allowance was made the contractor per square yard of surface to each course?

A. The surface of each course? Yes. The same as if they had been placed in the works singly.

Q. Now please state to the court how you arrive at the value which you have placed upon these mattresses when sunk.

A. Well, I would have to go through the details of the estimate then.

Q. Please go through them.

A. I have estimated in the mat camp for two foremen \$10, one time keeper \$2—this is on a basis of 2 days work—2 days work at the camp for building one mat, 75 men at a day and a half would be \$84.25 for the labor and then the feed for 7 teams for two days \$10, the wire and rope \$5, cost of establishing camp, I mean by that the expenses of looking up the camp and building the quarters for the men and for the mules and expenses of that kind, divided among each mat, would mean about \$3 to every mat. There would be, say 150 mats, which would be \$3 a mat, a mat, which would make quite heavy expenses for establishing one camp. I said 150, I will correct that by saying 50, which is as much as you can get in one place.

Mr. Charlton: I didn't catch that, \$3 for every man?

A. For every mat, then the privilege for cutting the brush per mat—brush and poles would be \$5, and general super-
220 intendents \$10, office rent and clerical hire for half a day,

I estimate a half a day because I have computed 2 mats to be placed in the works for one day. I have estimated for a large plant on the work so as to go on very rapidly, that is \$2, loss and interest on the plant for half a day \$15, a cost of securing the contract \$1 per mat, I mean by that what it would

cost them put down, loading and expenses of that kind, the towing of the mat to the river camp \$15, for the cost of sinking I estimate 20 men at the river camp would be \$15, one tug boat, one engineer at \$20, one fireman \$5, time-keeper \$1, provision 2 days, that is, \$43, for the cost of sinking the mats, 2 a day, \$21.50—the cost of sinking each mat, making \$183.75, the total cost of completing and putting in place for 2000 yard mats. I have here the cost of the plant.

Q. Wait one moment, you speak of the daily interest on the cost of the plant. Please explain that.

A. I am going to do that in this item. The item of the plant shows one tugboat \$8,000, 3 tug boats \$5,000, 4 gin barges \$6,000, 2 gin barges, \$2,000, 4 stone barges \$4,000, 2 brush barges \$1,000, one pile driver \$1,500, one quarterboat \$500, 10 anchors \$500, 4 row boats \$150, 20 mules \$2,000, stoves, dishes, and-so-forth \$200, cord, chains, and-so-forth \$300, tools \$500, making a total \$32,450.

Q. How much?

A. \$32,450. For the entire plant, and I have made an estimate that that plant is worth \$10,000 upon completion of the work, a total loss on account of the plant of \$22,450, and I have added interest to take and divide up among the number of days that we work for the whole three years and makes \$30 a day for interest and loss upon the plant. For the operation of the tugboats I have estimated for one captain \$100 a month, one engineer \$100 a month, one foreman \$30, cook \$25, deck-hand \$25, coal \$90, provisions \$60, repairs, that, is general repairs, \$75, making a total of \$500 a month for operating expenses of their best tugs, which would be \$20

221 a day a working day. Then the cheaper tugs, the tugs that towed the mats from the brush camps to the river camp, those are the cheaper construction tugs and cheaper men on them, one captain \$70 a month, one engineer \$70 a month, one fireman \$30, one cook \$20, one deck hand \$20, provisions \$50, coal \$75, repairs \$50, making a total cost of operating the cheaper tugs \$385 a month, or \$15 a day, and these items are put into the others by the day.

Q. In stating the value of the plant, do you mean that the plant, like it could be put in place now, or do you attach a present value, or a value at the time you were there?

A. I put what I thought was the value of the plant when it was first put in operation, not the present value. The present value I put down at one third of that.

Q. I am not speaking of the present value, but whether it could be replaced by new material?

A. Well, it could be, except the tug boats, the tug boats you could not replace them for that money.

Q. Do you know anything about the age of the boats?

A. Yes, sir, they were all old boats except one, that one I placed at \$8,000. You could buy a new boat, or a boat nearly new for that money.

Q. How long have you known the boats?

A. Since '84. The first one of them since '84, and the others since '93.

Q. Where have you known them?

A. Savannah Harbor.

Q. They have been in Savannah Harbor all that time?

A. Yes, sir, that is from the dates mentioned, '84 and '93.

Q. Then the age of the boats have entered into your calculation as to their value as a present plant?

A. According to the best of my judgment, yes, sir.

Q. Have you seen any mattresses constructed in accordance with The requirements of the third design under the existing contract?

A. I saw one place in the breakwater in 1897, which were in the exact accordance with the third design as described by the specifications.

Q. Under whose orders were they sunk?

A. Under the orders of Captain Gillette.

Q. On what date was that mattress sunk?

A. It was in August some time, I can refer to my notes here and give you the exact date, do you wish it?

Q. Well, about what time?

A. About the latter part of August, I think.

Q. Did you see it go in place?

A. I was present, yes, sir. I was on the breakwater when it was sunk.

Q. Did you examine that mattress carefully?

A. I did, yes, sir.

Q. It was in exact compliance with the requirements?

A. Yes, sir. It was in exact compliance with the requirements according to the contract and specifications, as I understand it. Yes, sir.

Q. That was a third type of mattress?

A. The third design, yes, sir.

Q. Did you make an estimate of the cost of constructing and sinking in place that mattress.

A. I did.

Q. What was the estimate placed upon it per square yard?

A. 40 cents.

Q. How did you arrive at that conclusion?

A. In the same manner as before. I went through the details of construction, first assuming the mat to be 100 by 55 feet, which would mean 555 and 55/100 square yards. Shall I go through the details?

Q. Yes, please. I would like to have that upon the record specially.

A. In the construction of the mat I have estimated 2 223 foremen, 2 days, that would be \$12; 50 men, 2 days, at

\$1 a day, would be \$100; the privilege of cutting brush and poles, \$5; cooking and provisions, for 2 days, \$4; cost of establishing camp per mat, \$3; general superintendence, \$7; wire and rope, \$10; office rent and clerk hire, \$4.50; loss and interest on the plant, \$20.50; cost of securing the contract, \$1; towing from the river camp, \$15; and sinking as before, \$43; making, \$225; and as there are only 555 yards, that would mean 40 cents per square yard. Now, do you want to go through the details of the plant, with that too?

Q. No; that's sufficient.

A. I just estimate the loss and interest on the plant at \$20.50 a day.

Q. I think that's sufficient upon that point. Do you recognize those bundles on the platform, Mr. Cooper?

A. Yes, sir.

Q. What are they?

A. They are bundles of brush that were brought to the Engineer Office by the inspectors, Mr. Keating and Mr. Austin and Mr. Hale, and they were brought from two different camps.

Q. Only what you know; I simply want to take you from the time you saw them for the first time.

A. I saw them at the Engineer's office. They were brought there by the men I speak of.

Q. Those are the identical bundles?

A. I would have to look at them before I identified them.

Q. Please look at them and identify them.

(Here witness examines the bundles.)

A. Those are the same bundles that were stored at the Engineer office; three of which were obtained—

Q. State simply what you know. Do you know where they were obtained?

A. I do know that three of them were obtained on Tybee Beach, by myself and Mr. Hale.

224 Q. Are those that were obtained by you Mr. Cooper, separated from the others there?

A. One of them that is in the center was obtained by me.

Q. How about that top one there?

A. I had nothing to do with obtaining that. That was obtained from one of the brush men, I had nothing to do with the bottom one.

Q. How is this one in front?

A. That was obtained from one of the brush camps. The center one of the three.

Q. That center one, but low down on the platform?

A. Yes, sir, but low down.

Q. That is the third course, not in sight of the court?

A. No, sir.

Q. Have you seen bundles of the character of those you just examined, and you testified to having first seen in the Engineer's office, used in the construction of the mattresses under the existing contracts?

A. I have.

Q. How do those compare as to the distance at which they were tied together with those you have seen used in the construction?

A. About the same, some of them were a little closer and the others not so close.

Q. As to compression, some were closer and some not so close.

A. Yes, sir.

Q. I am referring to that upper one to the rear?

A. That's about the same as to compression, and of the same material as used in the work. Of course, they would look a little different coming fresh from the camp because they had all the leaves on, but, as a matter of fact there would be about the same material there, that is, material of any value.

Q. Those found by yourself, I understood, were on the shore, were down on the shore on Tybee Island.

A. On the beach at Tybee Island, washed on shore by the waves, presumably they came from the breakwater, of course, I do not know that.

Q. You know the character of the mattresses that were put in the breakwater?

A. Yes, sir.

- Q. Mattresses of that character were put there?
- 225 A. Yes, sir.
- Q. Were there many of them on the beach?
- A. Many bundles of brush?
- Q. Yes.
- A. I judge, taking all, on the beach to have made up two or three mats.
- Q. Holding together?
- A. No, they were all loose bundles, and some of the brush was loose, I mean entirely separated.
- Q. I mean the bundles of brush held together as bundles?
- A. No sir, the majority of them were not as bundles, they were simply as loose brush, the ropes having parted and the brush scattered all over the beach.
- Q. In stating that the brush you saw on the beach on Tybee Island would make three mattresses, do you mean three single mattresses or three course mats.
- A. Three course mats, that would be 9 single mats.
- Q. Have you ever visited a mattress camp where the bundles were being made?
- A. I have been in mat camps occasionally, not very much.
- Q. Was that called a mattress camp where they were constructed, or where they were assembled?
- A. It was called a mat camp where they were built.
- Q. Where the bundles were assembled, used in the construction of mattresses was a mattress camp?
- A. A mattress camp, yes, sir.
- Q. Was an inspector kept at that camp?
- A. No, sir, occasionally an inspector would be sent there.
- Q. By whom?
- A. By Captain Carter.
- Q. How often?
- A. I don't remember of their having been sent there more than three or four times. There might be more, that is all I remember.
- 226 Q. For how long a period would they remain there?
- A. 2 months at a time, some times only one month.
- Q. Who were they?
- A. Mr. Hale was one of them, S. M. Hale, E. J. Keating, and I. Stanton Carter.
- Q. Was Captain Carter present at any time when you were present, when those mattresses were sunk in place?
- A. Quite frequently, yes, sir.
- Q. Did he make any criticism upon them—state any objections?

A. Not that I remember, I don't remember of any objections being made, the mattresses seemed to be satisfactory in all cases.

Q. What character of stone was used in the stone work under the existing contract?

A. There has been all grades of stone. There has been piles of rock from New York and piles of rock stored up from foreign vessels coming into port and Florida rock.

Q. What rock principally?

A. In the last two contracts it has been, mainly Florida rock. Previously to that it has been mainly New York Rock.

Q. Do you know where this rock was obtained?

A. Not exactly, no, sir. I know that it came over the S. F. & W. Railway and was delivered to the contractors here at the S. F. & W. Wharves on lighters. Exactly where it came from I could not say, I do not know. It has always been known as Florida rock, and that is all I know about it.

Q. Did the Florida rock furnished and sunk by the contractors comply with the requirements and specifications in the contract?

A. It did not.

Q. In what did it vary?

A. In specific gravity, and in hardness. The specification says it shall be as hard as hard burned brick and only about one third of it would come up to that requirement.

Q. Was any of it rejected because it did not come up 227 to that requirement?

A. It was not.

Q. You saw this stone go into place?

A. Yes, sir.

Q. In what respect did it vary from the requirements of the contracts as to specific gravity?

A. It was very much less. It would vary. The average specific gravity from 100 to 200 samples tested, was probably less than 2—1.96, as I remember it, and the specifications called for 2.4. I

Q. I hand you two samples of rock, what are they?

A. It is lime stone, known as Florida rock.

Q. Have you seen those specimens before?

A. Those two specimens were taken from a lighter load of rock which went into the works on September 8, 1897.

Q. Taken by whom.

A. They were selected from the barge by T. J. Daniels.

Q. In your presence?

A. No, not in my presence.

Q. How do you know that they were selected from that barge?

A. Simply that he brought the samples to me to be tested.

Q. Where?

A. On tybee Island, they were brought into my office on Tybee Island by T. J. Daniel. The employee on that barge on that work.

Q. Is there any stone of that character to be found on Tybee Island, unless brought there?

A. No, sir.

Q. You say that you made a test of those specimens for specific gravity?

A. I have. This one has a specific gravity os 1.3, a soft one, and this one has a specific gravity of 2.6.

Q. The difference between those two specimens seems to be very great, are they at the extremes of such Florida stone as you know?

A. Those are the two extremes. That is probably the 228 lightest one ever presented to the office to be tested, and this is among the heaviest and they vary all the way between that grade—all the way up from this light one to this heavy one.

Q. That, then, is the very poorest that could be found?

A. The very poorest that could be found.

Q. And that the very best that could be found?

A. The very best, the two extremes.

Q. Have you seen stone of the character of each of those specimens go into the works, or how nearly similar have you seen it?

A. I have seen stone of that character go into the works.

Q. In what proportion?

A. Well, there would very few as bad as this sample presented, but there would be a good many that would have a specific gravity of say of 1.7 or 1.6, a good many would range along there, it would be very rare case that would average 1.3, that was a rare case, and that was selected because this was above the average, one below the average and one above the average and take the mean and you would get the average of that barge.

Q. It would be very rare that a specimen of either extreme would be found in that stone?

A. Very seldom, the inspectors would inspect in that manner, that we speak of. They would select these samples from each lighter, that is those samples that would represent in

his judgment the average of the weight on that lighter. In selecting those samples that practically decided the weight of the weight of the lighter because a great deal depends on his judgement in picking out rock that would represent the average of the lighter, so that the men that selected the samples determine what was going to be the specific gravity of the lighter.

Q. How do you determine the specific gravity of these specimens?

A. By soaking the samples for a day or more in water so that they would become thoroughly saturated, then weighing them while wet, and then putting them into a bucket 229 with a spout to it, but before they were put in the bucket water was put in so it would just run out, when the water would cease to run out the bucket a pan was placed under the spout and the rock placed in the bucket, the actual amount of water displaced by the rock ran into this pan, and in that way gave the actual amount of the water displaced by the stone then the weight of the stone was determined by the weight of the water displaced, then the weight of the stone was divided by the weight of the water displaced and that would give the ratio of the weight of the water which would be the specific gravity. Specific gravity means comparison with that of water.

Q. Do you recognize that (handing witness a photograph)?

A. This picture that I hold in my hand is a photograph of one of the mats ordered constructed by Captain Gillette.

Q. This is a copy of or a duplicate of Exhibit 6, do you recognize that photograph?

A. Yes, sir.

Q. What is it?

A. It is a photograph of a mat completed according to the third design of the specification of the contract with the United States.

Q. That is the mattress in regard to which you gave testimony?

A. Yes, sir.

Judge-Advocate: I show the witness now a photograph or the duplicate of the one that is in evidence before the court and know as Exhibit No. 4.

Q. Have you ever seen a mattress like that?

A. Not exactly like that, that I believe is a mattress from Cumberland Sound. I never saw one exactly that shape. No, sir, we did not use them of that shape on Savannah Harbor.

Q. In what does it vary?

A. In that there is only two lengths of mats. I dont know how many courses, quite a number of courses of a certain width, and quite a number of another width. On the Savannah Harbor we would step up gradually instead of stepping up like this.

Q. As to the brush shown in the photograph, I judge 230 that to be the same style of construction used on Savannah Harbor. Now, Mr. Cooper, we will return to the subject of the construction of the mattresses. I want you to describe fully to the Court how those bundles were made, how they differed from the fascines called for by the third design.

A. The fascines called for by the third design contemplated a solid fascine with all the leaves and twigs trimmed off and choked hard at intervals of 2 feet, and it also contemplated that those fascines shall be the full width of the mat, 100 feet by 40 feet, or whatever width the mat is. They were to run crosswise to the dam of the fascines and be the full width of the dam, and in the mattresses going into the construction of the Savannah Harbor this was not done, it was a bundle of brush used, brush not trimmed and lightly choked and made about 15 feet long placed one after another until they go the full width of the mat, that was the main difference between the fascine as specified and the fascines as used. Is that what you want?

Q. That's what I want. Were the bundles of brush as well and firmly made and braced as tightly and closely as they could be?

A. Under the specifications?

Q. No, as a fact?

A. I think they were not.

Q. As they could be, I am speaking in binding bundles of brush in as fascines.

A. I answered that they were not.

Q. Were the inspectors habitually kept at the mattress camp?

A. Very seldom, very seldom.

Q. Then when the mattresses reached the point at which they were to be used, their internal construction could not be judged by the engineer, who witnessed their being put in place?

A. About these large mats, it was impossible to tell exactly what was inside of them because some of them, the main bulk

of them, were 10 feet high, that was the most common mat
231 put in place, the 10 foot mat. A mat would be 100 feet
in one direction and 25 feet on top, and 40 at the bot-
tom, you could not see the entire mat, you could not see
the inside of it, you could not tell what it was made out of.

Q. Did you make any effort to ascertain the interior con-
struction?

A. In some instances I used a sounding pole, shoving the
pole down into the mat or through it where possible, in some
instances I have been down in the mats.

Q. Do you mean down in them after they were prepared to
be sunk?

A. Yes, sir.

Q. How did you get in?

A. Simply pushed the top bundles aside and worked my
way down into it.

Q. How often did you do that?

A. I don't remember doing that but twice.

Q. How much space could you find void?

A. Well, in some instances, as large as that desk (point-
ing).

Q. Where I sit?

A. Yes.

Q. You testified that Mr. Hale had been an inspector at
the mattress camp, do you recollect when it was he was an
inspector there?

A. When Captain Gillette took charge he sent me down
word there was no tidal inspection. He sent me word I was
to carry out the specifications as printed, that was the order
I got. I told Captain Gillette that would be impossible with-
out giving me an inspector at the mat camp and I think he
asked me to recommend somebody.

Mr. Charlton: We dont want all that conversation be-
tween him and Captain Gillette.

Judge-Advocate: I simply want to know about Hr. Hale
at the Mattress camp.

Witness: I was telling how he was appointed.

Q. Never mind how he was appointed, I simply want to
know if he was there?

A. He was there.

232 Q. That was under Captain Gillette?

A. Yes, sir.

Q. Was he there at any other time?

A. No, sir.

Q. How long were the other inspectors you mentioned as at the mattress camp on duty at the camp? and when?

A. I think Mr. Keating was on duty about three months in 1894.

Q. How long was he on duty under the existing contract?

A. He was not on duty under the existing contract; not in the mat camp.

Q. Who was on duty under the existing contract?

A. Mr. Hale. You mean in the mat camp, do you not, you mean the mat camp?

Q. In the mattress camp, yes?

A. Mr. Hale.

Q. Was that subsequent to or prior to the assignment of Captain Gillette here?

A. That was subsequent to his assignment.

Q. Who was assigned to duty by Captain Carter at the mattress camp, if any one, under the present contract?

A. Under the present contract, the '96 contract?

Q. Yes.

A. There was nobody there, no inspector at all.

Q. Then the testimony in relation to inspectors of the mattresses to the camp there that you gave covered quite an extended period of time?

A. They covered the '92 contract.

Q. Mr. Cooper, did you ever call the attention of the accused to any failure on the part of the contractors under existing contract to comply with the requirements?

A. I made a written report in March, 1897, in regard to the placing of rock on the mattresses.

Mr. Charlton: The writing, if there was any, would speak for itself.

233 Q. I asked you if you made any report.

A. I just stated that I made a report in March, 1897, in regard to the placing of rock on the mattresses.

Q. Was that report in writing?

A. In writing, yes.

Q. To whom did you make it, to Captain Carter?

A. Captain Carter.

Q. Have you the report with you?

A. I have not.

Q. A copy of it?

A. No, sir, it is in the office.

Q. Did you, at any time, find that the contractors were not furnishing the material they were required to furnish?

A. They were not placing as much stone on the mats as I was told to put on by Captain Carter, I called Captain Carter's attention to that.

Counsel for the accused: We must object Colonel, if that's in writing.

Judge-Advocate: That report is in your office, I presume we will get the report. You made the report in writing?

A. In writing, some time in March, I cant tell exactly the date, some time in March.

Here the court at 12.20 o'clock p. m., takes a recess of 10 minutes to allow the prosecution time to send to the engineer's office for the above report.

234 (Reported from this point by W. O. Tarver)

Court called to order and examination of witness resumed at 12:30 p. m.

Q. (The Judge Advocate continuing.) Is that the report to which you were testifying when the court took a recess?

A. That is the one, yes, sir.

Judge Advocate: I offer this report in evidence. I understand there is no objection on the part of the accused or his counsel. I will read it:—

“Tybee Island, Ga., Mch. 10, 1897.

Capt. O. M. Carter,

Corps of Eng. U. S. A.,
Savannah, Ga.

Sir:—

I have the honor to report that I have this day made a careful examination of the breakwater. There is no doubt of the fact that the mats that have been sunk have not sanded up in the least. At places where I was able to shove a pole through the mats, the hard sand bottom was exactly the same depth as it was, 100 feet outside of the dam; and also at the edges of the mat there has been no piling up of the sand as would naturally be expected. In fact, at some places there is actually a scour. It is therefore, evident that no sanding will take place. Or at least, not until the crest is brought up much higher, probably high enough to stop the ebb-flow entirely at low water. I would recommend that the present mat works be either stopped or slackened up, and what is already laid be covered over with sufficient rock to prevent the worms from destroying it. This should be done also on account of the danger of losing the mats already placed by the action of severe storms. There are two places that have al-

ready been considerably damaged, say, about 100 feet in length of the wall. I would further recommend that no mats be left with less than about 300 cu. yards of stone on them; and would give it as my opinion that about 150 to 200 cu. yards for each 100 feet in length should be put on the 235 old works as soon as possible.

Very respectfully,
Your obedient servant,
Ass't Eng."

This paper will be marked Exhibit, No. 10.

Q. What instructions did you receive from Capt. Carter in regard to that communication?

A. I received no written instructions, and do not remember of any oral instructions except some months later.

Q. Were your recommendations carried out?

A. No, sir; they were not.

Q. None of them?

A. No, sir.

Q. The recommendations made by you in the report just read, none of them you say, were carried out?

A. None of them were carried out, as far as I know.

Q. Did you have any conversation with the accused in regard to this report?

A. No change taking place in the amount of stone placed on the mat, some months after I noticed that the mats were still being badly damaged by storms, and I went to Capt. Carter and made a personal report, a personal statement to him in his office, requesting that orders be issued to require the contractors to place at least 200 yards on each mat, and to proceed at once with the placing of rock on the mattresses already sunk; stating to him that mattresses were being damaged by the storms. Capt. Carter dictated a letter, complying with that request to the contractors, but I do not know of any instances where that letter was carried out.

Q. You would have been aware of it if the instructions contained in that dictated letter had been carried out?

A. Yes, sir.

Q. You are sure they were not complied with?

A. According to the best of my knowledge, they were not.

236 Q. The same conditions existed then as subsequently?

A. The conditions were worse, because some of the mats were badly damaged after that letter had been written.

Q. You made no written report except the one to which you have testified?

A. Not in regard to the stone.

Q. What was your oral report to the Captain?

A. It was to the effect that the Breakwater was being badly damaged by storms, and that I feared the teredo would eat up all the brush if it was not covered and protected from the action of these marine worms.

Q. Was that all of your report?

A. That is the substance of the verbal report I made to Capt. Carter. I do not remember the date; it was some months after the letter was written.

Cross-Examination by Mr. Charlton.

Q. You do not know where that rock (Sample of rock handed witness) came from, do you?

A. Not of my own knowledge except as I have stated.

Q. That is from information received from others?

A. Yes, sir.

Q. Now that (Handing witness rock) one?

A. No.

Q. Will you be kind enough to state again how you obtained the specific gravity of these two pieces?

A. I took the samples and immersed them in water, and allowed them to remain in water at least twenty-four hours, sometimes three or four days; then I weighed each sample immediately after taking it out of the water. I immersed it in water, and carefully determined the amount of water displaced by that stone, and then I divided the weight of the stone by the weight of the water displaced.

237 Q. The weight of the stone after it was taken out of the water by the weight of the water it displaced?

A. Yes, sir.

Q. You immersed it in what sort of receptacle?

A. Do you mean before the test or in order to get the displacement?

Q. When you got the displacement.

A. It was artesian water.

Q. What kind of a vessel?

A. A tin vessel with a spout to it.

Q. That was placed on what?

A. That was placed on a table.

Q. How did you catch the displacement?

A. Through the spout. I poured the water in a bucket and let it run until the water stopped, then when the water stopped I placed a basin under the spout and then placed the rock in the water,—placed the basin under the bucket, and all the water caught in that basin would be the amount displaced.

Q. Suppose you had to get the specific gravity of granite, would you apply the same test that you did to this rock here?

A. Yes, sir.

Q. Suppose there had been put into these works a series of iron tubes two feet long, hermetically sealed, and nine inches in diameter, with a thickness of say, of $\frac{1}{8}$ of an inch, how would you obtain the specific gravity of that iron?

A. I would not have to obtain it, I would know it.

Q. Suppose you did not know it, but wanted to find out the specific gravity for a new purpose, how would you find it out?

A. I would determine that by the displacement of the water.

Q. Tell us how?

A. The same way.

Q. You would immerse that iron in water for 24 hours?

A. That would not be necessary because iron is not porous.

Q. Tell us how you would do it.

A. I would first have to break this seal so that the water would go into the inside of the iron,—break that seal so that the amount of water displaced would be the actual bulk of the iron. I am not after the specific gravity of the air in there, but the specific gravity of the ore.

Q. Then you would take it out from its immersion and weigh it in air?

A. Weigh it in air and divide that by the weight of the water displaced.

Q. That is the way you would get at that?

A. Yes, sir.

Q. You first came here in 1888?

A. In 1884.

Q. Had you ever had any experience with coast work at that time?

A. That was my first experience on tide water.

Q. You never had been to tide water before?

A. No, sir.

Q. And you never had seen a mattress before?

A. Never had.

Q. Nor a fascine?

A. Not that I know of. I may have seen some in some railroad work, but it didn't make any impression on my mind. I didn't know much about it.

Q. You were in the employ of Capt. Carter whilst he was out West?

A. I was.

Q. In bringing you down here to the Atlantic coast to be put upon this work here, was he bringing you here for any experience you had had in this character of work or because of his confidence in you?

A. I suppose so.

Q. Both or which?

A. I suppose because he felt confident that I would be a faithful man to him.

Q. In other words, he relied upon you?

A. He did.

239 Q. When you came down here you had some trouble with the tide water, didn't you?

A. I didn't have any trouble with the tide water.

Q. Didn't you complain about the freshets in the river here worrying you twice a day?

A. No, sir.

Q. You never had seen tide water before?

A. No, sir.

Q. You never had seen this character of construction?

A. No.

Q. It gave you a great deal of trouble didn't it, or did you adapt yourself to it at once?

A. I think I did.

Q. Adapted yourself to it at once?

A. I think so.

Q. In your direct testimony I think I remember that you stated several times with emphasis that there were no fascines constructed in accordance with specifications until after Capt. Gillette came here?

A. That is my testimony, sir.

Q. But you had seen a military fascine before Capt. Gillette came here?

A. I had not.

Q. Do you consider the fascine put into Capt. Gillette's

mattress a military fascine?—If not, what kind of a fascine was it?

A. I think that would answer the description of a military fascine.

Q. In other words, it was the theory, or fact that all the leaves, twigs and branches were to be cut from this brush?

A. That was the idea.

Q. To have nothing but what?

A. To have nothing but straight branches that came up from the ground straight to the top.

Q. A cylindrical bundle of rods?

240 A. Poles or small brush.

Q. What do you mean by poles or small brush, was all the brush cut off?

A. Brush with all the branches cut off.

Q. It had been brush at one time?

A. Yes, sir.

Q. After you cut off the branches, twigs and leaves, have you any brush left?

A. I understand by definition of brush the entire substance, from the ground to the top.

Q. But as I understand you under the specifications, the third design contemplated the exclusion finally of all leaves, twigs and branches, so as to bring it down to a cylindrical bundle of rods or poles?

A. A smooth bundle of rods or poles.

Q. That is a simple collection of stems of the original brush?

A. Yes, sir, that is right.

Q. Therefore, strictly speaking, there is no brush in a fascine under the specifications?

A. Yes, sir, what is left of the brush after being trimmed; it is a part of the brush, of course.

Q. But all of the brush, in the common acceptation of the term, is gone, is it not?

A. The trimmed brush, as I said before, applies to the entire structure and this pole is a part of the brush.

Q. Therefore, these cylindrical rods or poles, when you get them into a mattress, you call them brush?

A. I do not understand you.

Q. I understand you to say that you cut off everything from this brush and get it into a fascine of smooth poles?

A. Yes, sir.

Q. Now, where does the brush come in, after you
241 cut off the twigs, leaves and branches?

A. It would not be called brush.

Q. Therefore that is purely a military fascine, as you understand it?

A. That is my understanding.

Q. And you never had seen a military fascine until after Capt. Gillette came here?

A. Not that I remember.

Q. Had you ever heard of such a thing as a brush fascine?

A. I have constructed a brush fascine.

Q. Where?

A. I don't remember.

Q. You never heard of its being used in this locality?

A. I think so.

Q. These that were constructed under the directions of Capt. Carter, what were they called?

A. Bundles of brush.

Q. Where did you get that expression from? It is one that Capt. Gillette used very frequently in his testimony.

A. Simply from the meaning of the word. A bundle is something bundled together and brush is what it is made of.

Q. Did you ever use that expression before Capt. Gillette came here in describing the fascines constructed under the administration of Capt. Carter?

A. I have.

Q. Where?

A. In talking of the work with the men.

Q. Do you find any such description in the specifications?

A. No, sir, I did not.

Q. Is there any of your reports which contain any such expression?

A. Most all of my measurements of the brush have the word "brush" written over the top. I don't say bundles of brush, but on nearly all my measurements of brush,—that is those I measured myself,—those reports I made myself,—
242 you will find Over the report the word "brush" with a mark underneath it.

Q. That you meant to indicate what?

A. Meant to indicate that the material in that report was a bundle of brush.

Q. Then what did you consider brush under these reports?

A. Those bundles.

Q. With what on?

A. Branches and stems and leaves just as it was cut in the woods.

Q. And you considered that a brush fascine, or a simple bundle of brush?

A. A bundle of brush.

Q. I want to know whether you reported those bundles of brush as fascines?

A. I don't think I ever reported them as fascines.

Q. Although at that time the only fascine you had ever heard of or knew of, was the so-called brush fascines in this work here?

A. Well, the word brush fascine is a combination I don't know that I know how you mean to apply it.

Q. Have you never heard of a brush fascine?

A. I have heard the term used, but want to know how you mean to apply the term.

Q. What you call a bundle of brush or bundle of live brush, well trimmed and choked at several intervals?

A. That would be a fascine.

Q. What do you consider the "well trimmed" to mean?

A. That it is simply that it should be well trimmed.

Q. What do you understand by that?

A. I would understand by "well trimmed" that all the branches and leaves should be cut off.

Q. Everything cut off to the rods or to a military fascine?

A. A military fascine.

Q. You say that you yourself recovered some of these bundles of brush there from Tybee beach?

243 A. Yes, sir.

Q. And that there was enough on the beach to make how many mattresses?

A. I estimated roughly enough to make about three of the style of mattresses going into the works at that time.

Q. Single course mattresses or three course mattresses?

A. Three course mattresses.

Q. How many bundles did you estimate were on the beach?

A. I didn't estimate it; it was simply a rough estimate and I could not tell exactly how many.

Q. Did it ever happen in the course of your observation that certain mattresses went to pieces without going into the works at all?

A. As I remember, seven mats during the construction of

the breakwater, were lost entirely,—torn to pieces in the operation of sinking them.

Q. If they came beyond a certain line in sinking them, were they rejected?

A. No.

Q. None of them were rejected?

A. No.

Q. Wasn't it designated in the specifications that they were to be placed in a certain position on the jetties?

A. Yes, sir.

Q. Suppose they were not placed in that position, what became of them?

A. They were paid for.

Q. Of your own knowledge?

A. I do not know that they were paid for, but they were reported.

Q. Did you ever know of any of the mats going out of the proper line?

A. Some of the mats were as much as fifteen feet out of the proper line.

Q. You reported them?

244 A. I wasn't inspector when the mattresses were sunk.

Q. Did you know that a mat was 15 feet out of proper line?

A. I did.

Q. How did you happen to know that?

A. I was given the list by the inspector.

Q. You do not know whether that was reported or not?

A. Not officially reported, I do not.

Q. That wasn't a part of your duty?

A. No, sir.

Q. Now, the mattresses that went to pieces, you don't mean to say that they were paid for, do you?

A. Certainly not.

Q. Who reported those?

A. They were not reported at all.

Q. They were not even reported as being in the works?

A. No, sir.

Q. Did you ever have occasion to report any deductions against the contractors on account of insufficient material?

A. Not under the contract of 1896.

Q. Have you ever reported any at all under any contract?

A. I don't remember; possibly I have; I don't recollect just now.

Q. You cannot possibly recollect that you did report that they were reduced?

A. No, sir.

Q. Now, in regard to the construction of the mattresses; you were never at the camps, as I understand it?

A. I didn't say never, I said only occasionally.

Q. About how many times?

A. Four or five times in all, I reckon.

Q. Was it a part of your business to be there?

A. It was not, as I understood them.

Q. Have you any familiarity with the construction of mats?

A. I have been on the works about 15 years.

Q. Have you any familiarity then with the construction of mats?

245 A. Certainly.

Q. Where did you acquire it?

A. On this work.

Q. You never had seen any constructed until you came here?

A. Not until I came here.

Q. Had you ever seen any constructed until Capt. Gillette came here? If so, when and where?

A. Oh, yes, sir, I had seen them at the camps.

Q. You were there four or five times, I believe you said?

A. Yes, sir, four or five times.

Q. What was your business there?

A. When the work was a little slack in the river camps, it afforded me an opportunity to visit the mat camps, that is the place where the mats were being constructed, and according to my general instructions, that was what I was supposed to do.

Q. How long did you stay there?

A. A few hours.

Q. During those few hours, on those occasions, you acquired all the practical knowledge you have of the construction of the mats, did you?

A. No, sir, not at all.

Q. Where did you get your knowledge of it?

A. By seeing the mats in the work.

Q. After they were constructed?

A. After they were constructed.

Q. Now, you mentioned a mat in which you were able to promenade around in, in a space as big as Col. Barr's desk?

A. Yes, sir.

Q. You say it would be practically impossible to determine with an ordinary mat whether that imperfect work existed in the middle of it?

A. I could not ordinarily tell how the middle was constructed. the top was all covered up and the sides were all covered up, so that you could see nothing but the ends of the brush and the sides of it.

Q. Was it impossible for you to examine into it?

A. Not impossible, no sir.

Q. Did you do it?

A. In some instances I did.

Q. Did you find them defective?

A. In some instances.

Q. What did you do?

A. When I considered the mats below the standard, laid down to me by Capt. Carter, I reported them.

Q. Was there any particular difficulty in discovering any imperfection in a three course mat?

A. There was some difficulty, but not so much as in a larger one.

Q. Was there any at all?

A. Oh, yes, you could not see the middle course.

Q. Could not you readily sound a three course-mat?—That would be about how high, three or four feet, a three course mat?

A. About five feet.

Q. You said something about Capt. Carter instructing you to report by heights?

A. Yes, sir.

Q. Did you acquiesce in that?

A. I carried those instructions out through the entire contract.

Q. When he suggested that to you, did you acquiesce in it, or did you protest?

A. I didn't say anything at all, I simply obeyed orders.

Q. (Handing witness a photograph) You were shown this photograph (Photograph of a mattress) I believe you testified, or it has been testified, that that was constructed since Capt. Gillette has been here?

A. Yes, sir.

Q. Is that in accordance with the specifications?

247 A. As I understand it, I think it is.

Q. From whom did you understand the specifications, or did you understand them by reading them over?

- A. By reading the specifications over.
- Q. From your own reading of it, or from what Capt. Gillette has instructed you?
- A. Capt. Gillette gave me no instructions at all; he simply told me to carry out the specifications as printed.
- Q. And you had no talk with him at all?
- A. Not a word that I remember.
- Q. Is that your work?
- A. No, sir, this was supervised by Inspector Hale.
- Q. Is that a fair illustration of all the mattresses constructed under the specifications, since Capt. Gillette's time?
- A. I think so.
- Q. Do you see any difference in it, I mean between it and the mats constructed under Capt. Gillette's administration? I say, of those constructed since Capt. Gillette has been here, constructed under the specifications,—is there any material difference between that mat and all the rest of them?
- A. Only four of them have been constructed since Capt. Gillette has been here.
- Q. Is there any difference between that and the other three?
- A. I don't think so.
- Q. They are practically the same thing?
- A. Practically the same thing.
- Q. Now, as I understand you that mat, the one you have before you, is similar to the other three; you did supervise the construction of one of the other three, didn't you?
- A. No, I did not.
- Q. Where did you see it?
- A. I was on the work when the first one was sunk.
- Q. Have you seen any subsequent ones?
- 248 A. I saw one that has not been sunk. while it was still on the barge.
- Q. Do those you have seen, including the one on the barge, comply with the specifications in all particulars?
- A. I think so.
- Q. That is your judgment?
- A. That is my judgment.
- Q. Is that the result of your own knowledge of the specifications, or did you get that from other people?
- A. From my own knowledge of the specifications.
- Q. From your own interpretation of the specifications?
- A. My own interpretation.

Q. Did you have a copy of the specifications? while under Capt. Carter?

A. I did.

Q. Why were they given to you?

A. I do not know. I could not say from my own knowledge, I was not told.

Q. They were just handed to you with absolutely no instructions at all?

A. None, that I remember.

Q. Did you keep them?

A. Yes.

Q. Why did you keep them?

A. I could not say.

Q. You never consulted them?

A. I read them over.

Q. Did you learn them at all? Did you interpret them?

A. I think I understand all that was in them.

Q. Did you from the first?

A. I think so.

Q. This idea you have now of the construction of a mat, did you have that from the first time you read the specifications?

A. I did.

249 Q. And your idea never has varied, never has changed?

A. That is right.

Q. Did you ever report that those mattresses were not built according to specifications?

A. I did not understand that they were to be built according to the specifications. I was taken down the river and shown a mat that was said to give satisfaction, that I knew not to be according to the specifications, and that was satisfactory.

Q. And you had a copy of the specifications?

A. Yes, sir.

Q. And you knew the mats were not in accordance with them?

A. Yes, sir.

Q. And you knowing that the mats were not constructed according to the specifications, and that it was your duty to see that they were in accordance with the specifications, and that those were your instructions, deliberately went against your instructions?

A. If the men in charge show me a mat and say that is

the standard, and if I am to go by that standard, I go by it; that is my duty.

Q. What were your general instructions in regard to this work?

A. I never received any instructions to carry out the specifications.

Q. Will you tell us what instructions you did receive?

A. I could not tell you all the instructions I received; you must remember I have been on this work thirteen years.

Q. And you were never told during all that time that you were to be governed by the specifications?

A. Not that I know of; I don't think I was ever told to carry out the specifications.

Q. I would like you to be positive about that.

A. I am positive.

Q. You ought to be able to swear one way or the other; were you ever told to hold the contractors down to the specifications?

250 A. I never was.

Q. Were you ever told not to show the contractors any favors?

A. I have been.

Q. Who told you that?

A. Captain Carter.

Q. Do you know this book (showing witness book) have you ever seen one like it before?

A. I have; it is the regulations prescribing the general conduct of the department here in Savannah.

Q. Prescribing whose duties?

A. The duties of inspectors, assistant engineers, clerks and every body in the district.

Q. You were an assistant engineer?

A. Yes, sir.

Q. Were those books given out to those various people?

A. I think everybody had one.

Q. Including yourself?

A. I had one.

Q. Did you read it?

A. I did.

Q. Let me read you this: "102.—Mattresses and stone will be measured immediately before they are placed in the works. Mattresses will first be carefully examined, and the inspector must satisfy himself they are constructed in ac-

cordance with contract before he accepts them for measurement." You remember that provision, do you?

A. Yes, sir.

Q. Did you deliberately disobey the instructions contained in this book, to satisfy yourself that they were constructed in accordance with the specifications?

A. I don't think I did; that does not say that they are to be carried out in accordance with specifications.

Q. Did you see that they were carried out in accordance with the contract?

251 A. I had not seen the contract, and didn't know what it was.

Q. You never had seen a copy of the contract until Capt. Gillette came?

A. I never had seen it until a few days ago; I never had seen it until after Captain Gillette came.

Q. And yet you took upon yourself a solemn obligation to see that the contract was carried out?

A. I received my instructions from Capt. Carter.

Q. Did you have inspectors under your charge in any way?

A. Some of them.

Q. You were assistant engineer; when Capt. Carter wasn't there, who was in charge of the work?

A. Capt. Carter was always in charge.

Q. But suppose he was not personally at any particular point on the river and you were, were you in charge of it, subject of course, to Capt. Carter?

A. Subject to his orders I was in charge.

Q. Now, I will read to you from page 17 of this same book, "96. He must thoroughly comprehend the specifications and his general instructions."—You did not take the trouble to advise yourself of that?

A. I did, I comprehended the specifications.

Q. Now, I understood you to say that in your opinion, the general average of the Florida rock was about the specific gravity of 1.07?

A. No, sir, I said 1.96, or about 2.

Q. Was that the average of the samples you took; I am talking about the average rock generally; didn't you estimate that?

A. I did.

Q. You estimated that by your eye?

A. No, I estimated that by specific gravity of the samples

taken, upon nearly 200 samples taken, and the specific gravity determined.

Q. Didn't you say a while ago that 100 samples had been taken?

252 A. Possibly I may have, I think I said 200.

Q. Which was it, 100 or 200?

A. It might not have been quite 200, but it was certainly more than 100.

Q. Didn't you estimate the general average of the specific gravity of the rock in bulk at 1.07?

A. I don't think I made that statement.

Q. 1.07 was it, or 1.96?

A. 1.96.

Q. You did that by eye?

A. No, that is the average as taken by my notes.

Q. Do I understand you to maintain, as an engineer, that it is desirable to have all fascines laying at right angles to the axis of the jetty?

A. I think that is the best position for them.

Q. That is your judgment, why?

A. Because that is in training walls; a majority of the jetties were training walls, in fact, all constructed of this design were training walls, and in training walls they should go at right angles to the current.

Q. That is your reason?

A. Yes, sir.

Q. Why is that, the engineering, desirability of it?

A. If they extend crosswise, the current going at right angles to the bundles of brush, it will stop more material than if the current went parallel to the brush, because it would be more apt to silt up, sand up, fill up.

Mr. Charlton, of counsel for defense: (Addressing the Judge Advocate) Have you those tables that Mr. Cooper made up as to the cost of the mats?

The Judge Advocate: No, I think the witness has them. (Witness handed counsel the tables referred to)

Q. (Mr. Charlton continuing) These are the two tables from which you read?

253 A. That is for the mattresses as put in the works,—the brush mattresses. I have got another one here for the fascine mattresses.

Q. When you reported to Capt. Carter that, in your judgment, the breakwater down here needed so many yards of stone upon it, you say no attention was paid to it, and you

subsequently insisted upon its being done and had quite a conversation with Capt. Carter in his office; I want you to try to recall when you had that conversation, and saw Capt. Carter write that letter to the contractors?

A. The letter is on file in the office; that will show it.

Q. You cannot recall the time?

A. I think I can; I would only have to give it as my opinion, because the letter is on file, and I am not certain, but I think it was some time in June.

Q. The latter part of June?

A. Somewhere about that.

Q. How long after that did Capt. Carter leave here?

A. About one month.

Q. You say nothing was done in between those periods in regard to putting on more stone?

A. Putting on of extra stone, you mean?

Q. Yes?

A. I don't think so; there may have been a few barges.

Q. Has any been done since?

A. A great deal; I don't remember that any was put on prior to Capt. Carter's leaving, though I would not state that as a fact.

Q. So it is possible that the contractor may have complied with this letter?

A. No, sir, he did not, because several mats were sunk with less than 200 yards on it.

Q. Did you report that?

A. It was not my place to report it, it was the place of the Inspector

254 Q. Do you know whether or not he reported it?

A. He did report it, the letter will show.

Q. Who was that inspector?

A. T. J. Daniels.

Q. Now, referring to your estimates of the cost of constructing these mats, the cost per square yard, which I understand you to put at nine cents—?

A. Nine cents for the previous mats.

Q. On those now built, 40 cents?

A. Forty cents; the previous mats were nine cents and the present mats forty cents per square yard.

Q. Did you ever construct a mattress of the previous type?

A. Did I ever personally construct one?

Q. Yes?

A. I never did.

Q. How many did you see constructed?

A. I have seen under process of construction possibly four or five.

Q. While being at the camp for a few hours at a time?

A. For a few hours at a time.

Q. How many tugs have you ever bought?

A. None.

Q. How many mules have you ever purchased?

A. I never purchased any.

Q. How many people have you ever hired in this vicinity to do common labor?

A. I do not know.

Q. Have you ever hired any?

A. Yes, sir.

Q. Have you ever paid for any yourself?

A. Yes, sir.

Q. What were they to do?

A. I have hired all kinds of labor,—common labor, 255 colored men, then some white men on surveys.

Q. Did you ever hire any to do any work of the character indicated by your estimates here, if so, when and where?

A. I said I never constructed a mat personally.

Q. Therefore, you have had no experience with the employment of labor in this character of work?

A. No.

Q. Why did you put 75 men at 75 cents a day in the other estimate, and put 50 men at 50 cents a day in this?

A. One dollar, I think it is; if you will figure it out, I think you will see that to be one dollar.

Q. Why did you make that difference?

A. I put that down 75 cents a day because I believed that was about what was paid by the contractor, but I could not employ them at that. They would not work for me at that, but the contractors seem to get them for less than the government.

Q. Could you get them for one dollar?

A. I could get plenty of them for one dollar.

Q. You put down in one case what you could get them for, and in the other case what you could not get them for?

A. I put down in one case 75 cents because that was work done by the contractors, and I put down in the other case what I believed I could do myself.

Q. This was the 40 cent mat,—you put down one dollar for that?

A. Yes, sir.

Q. Who built that mat,—this forty cents mat?

A. That mat has never been built, that is an imaginary mat.

Q. Now, tell us something about the mats constructed by the contractors under the specifications, what did they cost?

A. I think that (figures as contained in paper) is about the cost of them.

Q. You have made no calculation on that at all?

A. This (indicating paper) is a calculation, but that (indicating the other paper) is my estimate of what I believe the mats would cost.

256 Q. This is a perfectly ideal thing?

A. Certainly; all estimates are ideals; somebody has to see what the cost will be, has to look up the figures and compile them.

Q. You did that without any practical knowledge of the cost of these various things which you put in the estimate?

A. I have been on the harbor several years and I ought to have some knowledge of it.

Q. Do you mean to say that mules sell for 40 dollars a piece?

A. I don't think my estimate says that.

Q. What is your estimate?

A. I think my estimate is \$100, if I recollect.

Q. You have made some more estimates in this business; you made one on Sept. 27th, didn't you?

A. I don't remember, I might have.

Q. I will see if I can recall it to you. Now, I have before me what purports to be an estimate made by you on Sept. 27th, a type-written copy of it,—to which is appended the name, A. S. Cooper, Assistant Engineer. Probably you had better look at it and see if you can recall it before I ask you anything in regard to its contents? (Counsel handed witness paper)

A. Yes, sir, I remember making that estimate.

Q. I find in the estimate you submit to-day the cost of two foremen in that camp, two days, \$10?

A. That is \$5 a day for each foreman.

Q. On this one of Sept. 27th, is two foremen at \$4?

A. Yes, sir, that is as I said before, what I supposed they had,—the contractors, had paid.; but in my estimate, that I submitted to the court, I didn't care to state that, because I don't know that I can hire men for that. I put in this esti-

mate what I know I could hire them for; in the previous estimate I put down what I thought the contractors paid.

Q. One time keeper in the present estimate, \$2; one 257 timekeeper in that of Sept. 27th, \$1?

A. Yes, sir.

Q. Now, in the estimate for the third design, the 40 cent mat,—the ideal estimate,—I see two foremen, two days, \$12; now which is right, \$10 or \$12?

A. I just explained that in my first estimate, I put down what I thought the contractors paid, but in the estimate which I was willing to swear to, I put down what I knew they could be got for.

Q. You mean that you guessed at the figures in your first estimate?

A. I do not; that is the result of hear-say evidence, what I have been informed; I have not sworn to that; that is to the best of my knowledge, what has been paid.

Q. And is designed to instruct people as to the cost of mattresses per square yard, as built under Capt. Carter's administration?

A. That was designed to express my opinion of what they would cost.

Q. And now you say that you have absolutely no knowledge about it, that it is hear-say and guess-work?

A. It is from hear-say evidence. I have not sworn to it and do not intend to swear to it; but I know the things put down there (indicating the present estimate) can be procured for that price and I am willing to swear to that.

Q. Here are two foremen (indicating in statement) two days, \$12. and two foremen, two days, \$10?

A. It is a higher class of work and requires better men.

Q. Better foremen?

A. Yes, sir.

Q. Why so?

A. Because it is more skilled labor.

Q. Skilled labor to make a fascine mat under the specifications as you understand them?

A. Yes, sir.

258 Q. And skilled labor to cut off twigs, leaves and branches?

A. No; but to bundle them and construct them into proper mattresses.

Q. What is the additional work of constructing them into fascine mattresses, than would be called for under the old manner of constructing them?

A. Better constructed; better work, and better work means better men.

Q. You mean choked them tighter?

A. Choked them tighter.

Q. Did you ever see any specification fascines choked?

A. I never did.

Q. You never saw the process of choking?

A. I saw the process of choking, but I never saw mats choked.

Q. You saw the fascines well choked?

A. Not fascines, I have seen bundles of brush choked.

Q. Under Capt. Gillette, have you seen any fascines choked?

A. I have not.

Q. You don't know how that is done?

A. I think I do.

Q. Do you know what was put around them when they were choked, what they were tied with?

A. They were tied with lathe-yarn.

Q. You are talking about Capt. Gillette's fascines now?

A. That was used for both; lathe-yarn will apply to both; it was used for both.

Q. I notice in the estimate given to-day, that you put down mules at \$100 apiece?

A. Yes, sir.

Q. Twenty mules, \$2,000?

A. Yes, sir.

Q. And in the estimate of Sept. 27th, I find you have 50 mules \$2,000.

A. That is simply a clerical error; that should have been 20; I did not intend that for 50. That is an accidental mistake.

259 Q. Well, are these clerical errors;: captain of tug boat, in estimate given to-day, \$70; in estimate given on Sept. 27th, \$50?

A. No, sir, I have changed that purposely.

Q. Then the engineer the same thing?

A. I changed that purposely.

Q. And the firemen?

A. Yes, sir and the fireman.

Q. He has been increased 25%?

A. Yes, sir.

Q. And likewise the cook?

A. Yes, sir.

Q. And the deck-hand?

A. I increased the whole, making the cost of the tug about \$15 per day instead of \$12.

Q. Then I notice here an estimate of Sept. 27th, before you reach your final conclusion, upon which you are estimating the cost of these mats per yard, this item.: "Lobbying River and Harbor Bill through Congress, \$25,000?"

A. I do not know anything about that; I know that item is in there.

Q. Where did you get that information from?

A. I simply put that in there, thinking possibly that might have been paid; I didn't know that was paid.

Q. Who was to pay that?

A. That is what it cost to get that bill through Congress.

Q. You think the money with which they were to buy Congress was to be paid—?

A. If they paid it.

Q. Do you know that it was paid?

A. I do not.

Q. And you absolutely put in a libelous thing like that without any information at all?

A. It is simply hear-say.

260 Q. Hear-say from whom?

A. From some of their own men, I don't know who.

Q. Not even from the men themselves, but from some unnamed, indefinable person, you put in an item there of an amount paid for the purchase of Congress?

A. It need not necessarily be for the purchase of Congress.

Q. What do you mean by it then?

A. It means for work in Congress to explain what that Bill was for.

Q. That was charity then?

A. Call it what you like.

Q. What is a proper thing? I want to find out now, in making up that estimate, upon which a man's position might depend, what you meant by such an item as that?

A. I have explained what I meant as near as I can.

Q. That is the only explanation that you have of that remarkable item that went into the cost of the mat?

A. That is the only explanation I have.

Q. And in spite of that you could not get it beyond nine cents?

A. No, sir.

Q. What experience have you had in hiring the privilege of cutting brush here or anywhere else?

A. That is from information gathered from others.

Q. That is your estimate from what other people told you?

A. Yes, sir, what other people told me.

Q. And you put down the same amount for the one course mattresses that you do for the eight course mattresses?

A. Yes, sir.

Q. So you pay the same amount for the privilege, irrespective of the amount of brush you cut?

A. It takes about as much brush to make one of these specification mats of one course as it would take to make one of the eight course mats under the old style of construction. That is what I mean by putting that item in as the same.

Q. Do I understand you to say that it cost exactly the same thing, that the same amount of brush went into a one course mattress under Capt. Carter's administration, as went into an eight course mattress,—is that your testimony?

A. No, sir; I didn't say that. I said that it took about as much brush for an eight course mattress of the old style construction as went into a specification mattress built under Capt. Gillette.

Q. That it took the same amount of brush for a Gillette one course mattress as for a Carter eight course mattress?

A. That is what I said.

Q. And you put down for the privilege the same thing for an eight course mattress as for a one course mattress?

A. I do not know that I made any such statement.

Q. If you did, it is in here? (Statement)

A. Yes, sir.

Q. You have said several times that you have been here off and on for 13 years?

A. Yes, sir.

Q. You have had considerable experience with this work; were you in charge of the construction department any?

A. Yes, sir.

Q. Have you made honest reports about it?

A. I think I have.

Q. Do you know?

A. I have.

Q. You meant to be honest in your reports?

A. Yes, sir.

Q. Have you any pride in your work?

A. Yes, sir.

Q. Is it good work?

A. Yes, sir; it has accomplished what it was intended to accomplish.

262 Q. The work has accomplished what it was intended to accomplish?

A. It has, undoubtedly.

Q. Did you ever, under the contract of 1896, report to Capt. Carter that there was plenty of material in the mattresses furnished and that the material was good?

A. Possibly I might.

Q. Would you have done that if it was not true?

A. That answer means this: it means there was plenty of material in that mat according to the standard given me by Capt. Carter to work by; it does not mean that there was plenty of material in it according to the specifications; a plenty, as I understood my instructions, but not according to the specifications.

Q. As you understood the specifications, that was not good material, nor sufficient material?

A. That is right.

Q. But as Capt. Carter instructed you, it was good material and sufficient material and did its work?

A. It did its work and was according to his instructions.

Q. Have you ever stated,—under the contract of 1896,—that the alleged brush fascine, or bundles of brush, or whatever you call them, were better for the work in this river, than Capt. Gillette's military fascine?

A. I never made the statement.

Q. What do you say right now?

A. I think it is not as good.

Q. Not as good, why?

A. Because for the same number of fascines you would not get as large a height in your construction; that is your construction would cost you probably double the amount of work. A jetty, constructed of fascines according to the specifications, with all the grillage poles in accordance with the specifications, would cost about one half of what
263 it did under the old brush mats.

Q. Is it your idea that the government is after saving money on this work, or after getting satisfactory results?

A. Saving money and getting satisfactory results both.

Q. But rather than spend the money they should get unsatisfactory results?

A. I did not say that it would best to get unsatisfactory results rather than spend the money. Mats constructed according to the specifications would build up more. The specification mats would give two feet for each course, and in the construction of these brush mats we didn't gain but about a foot for each course of mats.

Q. Isn't the primary object of putting down mats to catch the sand and accumulate the silt and get a foundation?

A. I was after a foundation, and after getting height mainly.

Q. What is the object of putting down mattresses at all if it is not to accumulate the sand and catch the silt?

A. It is for both.

Q. Is not that the primary object?

A. I do not think so in a harbor; it would be the primary object on bare, exposed places,—the primary object there would be to get a foundation, but in a harbor, where there are training walls and fifteen feet of water or ten feet of water, one of the primary objects is to get height.

Q. But in breakwaters and in Cumberland sound, the primary object is to get something down there that will accumulate sand and silt and form a natural jetty as far as possible?

A. I don't think so. I think the proper method is to put in single course mattresses and to let the foundation be of rock. The idea of putting mattresses in the open sea is a great mistake.

Q. That is your opinion as opposed to Capt. Carter and the Chief Engineer and the Secretary of War?

A. That is my opinion, opposed to all of them.

264 Q. Now, if I recollect your description of the mattresses built under Captain Gillette's instructions, and in accordance with the specifications, you took a bottom grillage, and then you put a mattress on top of that, and then you put a top grillage on that, and so on?

A. In this harbor Capt. Gillette never constructed anything but a single course mat; he did at Fernandina, but I know nothing about it.

Q. Now, you were building a four course mattress?

A. Yes, sir.

Q. Do I understand that you put first a bottom grillage?

A. A bottom grillage; I mean a double system of poles both ways.

Q. Then you put on your fascines?

A. Yes, sir.

Q. Then put a top grillage on that?

A. Yes, sir.

Q. Then upon that a bottom grillage and the next course?

A. Yes, sir.

Q. Was that between two courses?

A. Between each layer of fascines, not courses; a course consists of a grillage and fascines, and between each layer of fascines I would have two grillages of poles, or four single systems of poles in the multiple mat.

Q. Now, when you put these down upon the ocean bar,—put down the mattresses in that condition, what is going to become of the poles?

A. They will be either embedded in the sand or eaten up by the worms if they are not covered up,—one or the other; if they are not covered up, they are certain to be eaten up.

Q. That is your idea not only of a specification mattress, but of a proper mattress for this character of work?

A. What do you mean?

Q. Is that your opinion, your judgment, as to a proper mattress for this character of work,—the one you have 265 just described?

A. I think so. For work in Savannah Harbor, these rough brush mattresses are just as good, provided you take into consideration the price; in fact, better, because they would be cheaper, but when you pay for these inferior brush mattresses the same price you do for the fascine mattresses, then the fascine mattresses are the best, because you gain the most hight from it.

Q. Suppose you left out the grillage altogether, and instead of the grillage used a flexible fascine, what sort of a mat would that be?

A. I would not think it a good construction at all; it would be liable to go to pieces before it sunk.

Q. Suppose, instead of going all to pieces before it sunk, it got into the work, what would be its worth there as compared to the mattresses you are talking about?

A. It would not be worth quite as much as the mattresses with the grillage, because these grillages being in place and

these fascines being in place and rock on top,—there is a great deal of space in there, a great deal of air, and if that is put into a river with a great deal of sediment and a great deal of sand, these spaces are liable to fill up, and, after they do fill up in a solid manner, you gain some hight there that costs you nothing.

Q. I am speaking now of rougher water, like Cumberland Sound and Tybee Breakwater; I understand you to say that the specification mattress is better than the first I have described where the fascine is used?

A. I would consider them better. As I said before, I would use a single course mat. I would put only one course for the reason that if you put more, it is liable to be eaten up by the worms, but where the bottom is real hard, I would put in no mattress at all; I would simply build of rock. That is the best way to do I think; that is the way it was done at Charleston.

266 Q. Is it your judgment that the granite is better rock for this work than the Florida rock?

A. I think so; decidedly.

Q. You have some reason for thinking that?

A. It is heavier.

Q. Is that all you want,—weight?

A. On the bar on the outside that is what you want, weight, and what you must have, or it will be torn to pieces.

Q. Which rock do you consider the best?

A. For outside work?

Q. Yes?

A. Granite.

Q. Which granite?

A. Any granite.

Q. There are two or three mentioned here?

A. The New York Granite is good.

Q. How about the Georgia granite?

A. Georgia granite is good; I would consider it just as good as the New York rock, probably better, because it seems to be harder.

Q. Now, the rock that was put in on the ocean bar was Florida rock?

A. In Savannah, yes, sir; not entirely,—some ballast was put in, but most of it was Florida rock.

Q. Do you know anything about what was put in at Cumberland Sound?

A. Only from hearsay.

Q. Have you never been there when rock was put on the jetty?

A. I had charge at Fernandina in 1887; it was all Florida rock at that time.

Q. You never saw New York rock put in at that time?

A. No, sir.

Q. Have you ever known of your own knowledge that the Florida rock has been known to form into a solid mass at Cumberland Sound?

A. I do not know that of my own knowledge.

Q. What is your observation of Florida rock? Has
267 it ever formed into that sort of a mass anywhere?

A. All rock on the Savannah Harbor between certain limits is a solid mass.

Q. Is that true of Florida rock?

A. It is true of Florida rock.

Q. Now, if Florida rock will catch these barnacles and shells and form into a solid mass, isn't its very lightness a desirable element, in-as-much as it will not sink into the sand?

A. I don't see why lightness should be desirable. You want something to sink them with, and Florida rock does not.

Q. Isn't it a lighter rock than the granite?

A. Yes, sir.

Q. Does it sink as readily into the sand as granite?

A. Yes, I think it would if you threw it right on the sand.

Q. I am talking about throwing it on top of the mattresses?

A. Then sand does not come into the question.

Q. Sand does come into the question; don't sand get into the mattresses sometimes?

A. Yes, sir; and with single course mattresses, in time it would be covered up so that you would not know that the jetty was there.

Q. Would not the Florida rock be desirable, then, on account of its lightness?

A. I don't think so; you might construct it of a feather.

Q. Would a feather sink a mattress, do you think?

A. I think not.

Q. Your estimate, as I recollect it, is based upon the construction of two mats a day?

A. Yes, sir.

Q. During the life of the contract,—the practical life of the contract?

A. That estimate was really intended for the contract of 1892, and not for the contract of 1896.

Q. Would it not be equally true of the contract of 1896?

A. No; you would vary the details.

268 Q. How many mats were constructed a day under the 1896 contract?

A. You could not have put in two of those a day.

Q. You didn't make any estimate for the contract of 1896?

A. That specification mat is for the contract of 1896; let me see it, and I can tell you; that is one mat a day.

Q. Now, as a matter of fact, don't you know that there is no such average as that? That an average of one mat in two days is excessive?

A. No; I do not think so. You will see that I have estimated for a very large plant,—a larger plant than is used on the breakwater.

Q. As a matter of fact, what was done on the Breakwater under the contract of 1896; what average of mats did come in under that contract?

A. I don't know; I think probably between fifteen and eighteen a month.

Q. Now, in this estimate which you have drawn up,—have you taken into consideration the loss of mattresses?

A. I have not.

Q. As a matter of fact, were any mattresses lost?

A. Oh, yes, sir.

Q. Were they lost frequently?

A. About seven of them were lost.

Q. Now, if those, instead of being worth \$780.00 were worth \$2,000,—isn't that very material?

A. I said that was the cost of the mat; I didn't say that was the price the contract should be let for. If you figure the amount the contract should be let for, you should add twenty-five cents for exposed places like that. That is simply the cost.

Q. You estimate these mattresses as put into the works?—cost per yard put into the work?

A. It says cost, but does not say what I would bid.

Q. So you have left out of here the element of storms?

A. Yes, sir.

Q. And the element of lost mattresses?

A. Yes, sir.

269 Q. And the element of rejected mattresses?

A. There were no rejections.

Q. Was there a possibility of any rejections?

A. There might have been.

Q. Have you ever known of any being rejected?

A. Not under that contract.

Q. Under any contract? I want to know if it is a conceivable element to enter into the matter at all?

A. I don't think any have been rejected on Savannah Harbor.

Q. You have left out of the question the possible destruction of the plant by storm?

A. Yes, sir.

Q. Do you happen to know that we have right here one of the stormiest regions on the Atlantic coast?

A. I have seen some of them.

Q. You saw the storm of 1896?

A. No; I was not here.

Q. You saw the storm of 1893?

A. I did.

Q. Did you ever see any worse storm than that?

A. I have.

Q. Where?

A. In Kansas.

Q. A cyclone?

A. Yes, sir.

Q. Did you ever see a storm on this coast worse than that?

A. No.

Q. You know the people look out for them every fall?

A. Yes, sir; think that might be the time, along in August.

Q. And you think the disposition is to rush the work in the summer months on account of that contingency?

A. Yes, sir.

Q. As a matter of fact, when you get up further in Cumberland Sound, haven't you got to build a trestle out there?

270 A. I think it is quite probable they will have to do that.

Q. That you have not taken into consideration at all?

A. I was not estimating on Cumberland Sound, but on Savannah Harbor.

Q. Were any changes made in the construction of those bundles of brush from the time you came here last until Capt. Gillette took charge?

A. No material change that I know of.

Q. I mean in the general method of construction?

A. No material change that I remember of.

Q. Were you instructed in any way to modify the construction of those fascines or mattresses?

A. Do you mean in 1892 or 1896?

Q. Since you were last here? you came here, I believe, in 1893/ the last time; I am talking about that. From the time you came here in 1893 until Capt. Gillette came, I understand you to say that there was no material variation in the method of constructing those bundles of brush and mattresses? Were you instructed to vary the construction of them in any way?

A. Shortly after the storm of August, 1893, there was a change. I suppose that is what you have reference to.

Q. I do not; I do not know; I ask you if you know of any change?

A. There was a change at that time. When I came here in August, 1893, the mats were being constructed off the end of the lighter; that is constructed off the gin barge and the gin poles were over the end of the lighter; they were building continuous mats, and building three at a time, and those were being sunk. They built, say, up to twenty feet or thirty feet of mats at a time, and, when that was built to thirty feet for the entire three courses, the poles would be pulled out from under it, so that the mat would come to the edge of the water, and they would continue that process again, making a continuous mat for another training wall. Then in the storm of August, 1893, this plant was scattered, and some 271 of it was lost, and the question came up as to the method of starting the work again, and the suggestion was made that the mattresses be built on the barge entirely, the barge having the gins across the side of the beams instead of across the end, they could build not only one mat, but as many mats as necessary for the entire dam; in other words, could sink the entire dam at one sinking. That was the change.

Q. In other words, it was more a change in the method of launching the mat than anything else?

A. No; it was a decided change. Before they were working slowly; now they built the whole thing at once, and put it into the works four or five times as fast.

Q. Was there any change in the method of constructing either the fascines or the mattresses.

A. That is the change in the mattress; there was no

change in the fascines or bundles of brush, but there was a change in the style of constructing the mats, as I described, from launching from the end to launching from the sides, and in building multiple instead of single mats.

Q. I want to know whether there was any change in your instructions; from the time you came here and got your instructions were any different and varying instructions given you by Captain Carter up to the time he left here?

A. In some minor details; not generally, I think.

Q. I mean in what you called instructions?

A. He would give instructions every day, verbally and written.

Q. Whom did you succeed here?

A. I don't know; there were several Inspectors on the work, and the man I found immediately in charge was a man by the name of Felber.

Q. Where was he?

A. In Savannah Harbor; I do not know whether he was in charge of the entire Harbor or a small part of it.

Q. Did he turn his papers over to you?

A. He did.

272 Q. Do you know who preceded him?

A. I do not.

Q. Among any papers you got, or letters of instructions you got from Felber—?

A. I didn't get any instructions or letters from Felber.

Q. Among the papers turned over to you by Felber as appertaining to his office, did you find any letters addressed to P. E. Twiggs, which Felber had as successor to Twiggs?

A. Felber turned over to me no papers; he simply turned over to me a few small field books of this style. That was the only papers I received from Felber; no other letters or instructions about the work at all.

Q. I want you to look at this letter, (handing witness letter book) and, if you haven't got the original, it is probably lost. Did you ever receive such a letter as that?

A. I never received this letter. Do you wish me to read its contents.

Q. No; if you deny having received it off hand that way without knowing its contents, I have no objections.

A. No, sir; I never received that letter.

Mr. Charlton: It appears to be letter 216, page 331, Book No. 2, dated July 3rd, 1893.

Q. You deny, then, positively that you ever had such a letter in your hand?

A. I never had it, and never saw it.

Q. (Handing witness letter book) Will you kindly look at this, and say whether you ever received that paper?

A. I suppose I received it; I don't remember exactly.

Q. The original of that paper, if you received it, what has become of it, do you know?

A. I think I have it.

Q. Will you be kind enough to produce it?

A. I haven't it with me.

273 Q. At any time?

A. Yes, sir; I will/ It is possible that I haven't it, but I think I have.

Q. If you haven't it, it is because it has been inadvertently lost?

A. Yes, sir; the intention was to keep it.

Mr. Charlton: That begins on page 426 of Book No. 2 and extends to page 428, being dated October 2nd, 1893, and is a memo. for Mr. A. S. Cooper.

Q. (Handing witness book) Will you be kind enough to look at this one, and see if you can recall it?

A. I remember that letter.

Q. Did you understand it?

A. I think I did.

Mr. Charlton: This is dated Oct. 23rd, 1893, Book No. 2, page 438, and is a memo. for Mr. Cooper.

Q. Have you that letter?

A. I expect I have.

Q. If you haven't got it, it is lost or destroyed?

A. If I haven't got it, it is accidentally destroyed; if it was destroyed, it was not done purposely.

Q. I don't mean to imply that; I just want to lay the foundation for introducing a copy of it. If you have it, will you be kind enough to produce it?

A. I will.

Q. You say you understood this letter?

A. I think I did.

Q. Now on or about October, 1893, what did you put into the holes of the Marsh Island Closing Dam? what did you fill them with?

A. With bundles of brush.

Q. Why.

A. Because I was told.

Q. Who told you?

A. Capt. Carter.

274 Q. Verbally or in writing?

A. In writing. That letter I think says—

Q. Show it to me in that letter?

A. Says brush fascines of the same style of construction as mentioned before.

Q. So that you had heard the term "brush fascines" back yonder in 1893?

A. Yes, sir.

Q. And under the order to fill in the dam with brush fascines, you did put something in it?

A. I put in what I understood the order to mean.

Q. Did I understand you correctly that you never had recommended deductions from the mattress work?

A. I didn't say that.

Q. What did you say?

A. I said possibly I might have recommended it, but I didn't remember of any specific case.

Q. (Handing witness paper) Is that a true paper?

A. Yes, sir; that is my writing.

Q. That is your signature?

A. Yes, sir.

Q. What is the date of that paper; did you notice?

A. It is dated June 10th, 1895.

Q. You seem to have made some deductions, then, didn't you?

A. That was simply not put in the totals at all; it was left out. One of these mattresses in this report was torn to pieces in the process of sinking. Of course, the measurements were made, and put down in the report, but it was not figured up in the totals as given by me; in other words I report the simple dimensions of it.

Mr. Charlton: We offer that paper in evidence. (Marked Defts. Ex. No. 1).

Judge Advocate: We have no objection to the admission of it.

275 The Court: The Court would like to be informed as to the character of that paper.

Mr. Cahrlton: It is a report of Mattress and Stone Work done at Cockspur Island during June 1-10, 1895, by Atl. Contr. Co. under contract of Oct. 22, 1892.

Q. (Mr. Charlton continuing) Now, under the contract of 1896, did you make any deduction?

A. I think those deductions were made by the Inspector. I think there were some deductions of a course or so now and then for damaged mats, not by me, but by the Inspector.

Q. It came under your supervision to report it?

A. Yes, sir.

Q. Did you not check it and approve it?

A. I did; the Inspector reported part of the mat lost, and I signed his statement.

Q. Without knowing whether it was true or not?

A. I had his statement for it.

Q. And you passed it on to Capt. Carter, who relied upon your report?

A. Yes, sir.

Q. Look at that (Handing witness paper) paper?

A. That is a case the same as the other. One mat was destroyed by storms, and the measurements given in the report, and the most deducted; the mat did not go into the jetty, and was consequently deducted.

Q. (Handing witness another paper) Now look at that?

A. That is another case; the same; the mat was lost, and the measurements made in the report, and deducted because it did not go into the work.

Mr. Charlton: We offer these papers in evidence. (Marked Defts. Ex. No. 2 and Defts. Ex. No. 3)

Judge-Advocate: We have no objections.

Q. (Mr. Charlton continuing) Now, will you look at these three papers, and show where you indicate on them anything in regard to the brush?

276 A. There is nothing on this in regard to the brush.

Q. What design of mat is mentioned there?

A. In my own report, I have the third design mentioned. In Mr. Daniel's reports, he also has the third design mentioned.

Q. So that in both Mr. Daniel's reports and in your own report you describe these as mats of the third design?

A. The third design; yes, sir.

Q. How do you reconcile that with the statement that you always put in the ordinary brush?

A. You don't remember what I said. I said the ordinary brush was usually put on my brush measurements; two reports. You will find in addition to that report the stone measurement reported, and where the brush was put in. You will find the brush measurements, and on that report is where I wrote the word "Brush".

Q. We haven't those reports before us; the one we have before us describes those mattresses as mattresses of the third design?

A. The third design.

Q. The third design of what?

A. The third design according to my instructions as I understood them.

Q. The third design according to the specifications, wasn't it?

A. Modelled after the third design of the specifications; it is a modification of the third design of the specifications.

Q. What do you call a modification of the third design,—a military fascine?

A. Not a military fascine; that is the main modification.

Q. (Handing witness paper) Will you look at that letter, and say whether it is the original; the letter is in your hand-writing, and that is your signature?

A. Yes, sir; certainly.

Mr. Charlton: I will offer this in evidence. (Marked Defendant's Ex. No. 4, and copy attached to the record)

Judge Advocate: I have no objections.

Mr. Charlton: I will read this letter, Def's Ex. No. 4:
277 "Tybee Island, Ga., March 12th, 1897.

"Capt. O. M. Carter,

"Corps of Engineers, U. S. A.

"Savannah, Ga.

"Sir:

"On March 10th I visited the Breakwater, and found Mat No. 45 in the water and rapidly going to pieces. As there was not much of a sea on, I examined the mat carefully to see what was the matter. I found that the material in the mat was good and there was apparently plenty of it; but that the wiring was very poorly done. The only wire that held the three courses together, as near as could be judged, were on the outer edges of the mat, and only about ten on a side at that. While this defect would have made no difference if the mat had been placed in position, yet it made it possible to do bad work while placing such mats; therefore the contractor has been notified that such mats are not satisfactory.

"Very respectfully,

"Your obedient servt.

"A. S. COOPER,

"Asst. Eng'r."

Q. (Mr. Cahrlton continuing) Apparently you were satisfied with the material and everything appertaining to that mat save the wiring, is that true?

A. That is true, according to my instructions, as I stated before.

Q. I am talking about what the report says; that is true by your letter?

A. That is true by my instructions. I was following out orders and instructions, and it didn't make any difference whether it was according to the specifications or not; if I was told to do a thing, I had to do it, or get out of the way, and let somebody else do it.

Q. Do you mean to say that you would do a thing you 278 knew was not right rather than lose your place?

A. I obeyed orders.

Q. You obeyed orders that you knew were wrong rather than lose your place?

A. I did.

Q. Now, when you reported to Capt. Carter that the material in the mat was good and that there was sufficient of it, you were reading into that a private understanding you had with Capt. Carter,—is that what you mean?

A. That is what I mean.

Q. Was anybody else a witness to that private understanding save you?

A. There were several present when he gave me instructions about the mat.

Q. He gave you a copy of the specifications and a book of instructions, and told you they were to be of the third design, yet you made reports to him in regard to that and went outside of that whenever you made a report,—it was to be with this secret understanding?

A. There was no secret understanding; I was taken down on the works and shown a sample of the work, and I was told to carry on the work as I found it, and that I did.

Q. You had the specifications, though?

A. I did.

Q. And you understood them from the beginning thoroughly?

A. I did.

Q. And you reported that the mattress was of good material and sufficient?

A. Yes, sir; according to my instructions.

Q. You said nothing about according to your instructions

in your letter, did you? If you and Capt. Carter had died, Capt. Gillette would have considered that it was a proper report under your instructions?

279 A. He would have known that it was not a proper mat or it would not have gone to pieces. The letter especially states that there was no sea at that time, and a mat properly constructed according to the specifications, when there was no sea, could not go to pieces.

Q. You, then, rejected that mattress because the wiring was not good?

A. I recommended the rejection of it because it didn't go into the work.

Q. You said it would have been all right if it had gone into the work?

A. All right according to my instructions.

Q. Didn't you, in black and white, say that the material was good and sufficient, and that even in its then condition, if it had gotten into the works, it would have done its work properly, but the wiring being insufficient, and it going to pieces, you recommended a deduction of it?

A. There is no recommendation there. It didn't go into the work, and, as a matter of course, they would not pay for it.

Q. It didn't go into the work, but was sufficient in every other respect, according to your instructions, except as to the wiring?

A. Except as to the wiring.

Q. They told you to be careful about the wiring?

A. They did.

Q. That was the only defect in it, according to your instructions?

A. I was always instructed to report everything that came on the works unusual; that was the general instructions, and you will find them in the book; any unusual circumstance occurring on the work was to be reported to the officer in charge.

Q. And you say that you got that out of this book that I showed you?

A. Yes, sir.

Q. You said something about some additional report, showing the brush in addition to these things here?

A. Not in that contract. When there is brush being
280 put into the walls, there is a supplementary report accompanying these reports, showing how much brush was used.

Q. I am talking about this work here that you reported on Cockspur Island; you said that it was in accordance with the third design?

A. I never said that.

Q. Wasn't that what you meant?

A. You don't understand it?

Q. You don't mean to report any brush about this work here?

A. That is under the contract of 1892.

Q. No; the 1896 contract?

A. No brush of any consequence was put in under that contract.

Q. The brush you are talking about was loose brush, or bundles of brush, dumped in between the piling?

A. Dumped in between the piling.

Q. It was done that way purposely?

A. Yes, sir.

Q. It has nothing to do with these reports about mattresses of the third design being lost?

A. No.

Q. Why did you mention it in that connection?

A. I didn't mention it in that connection. I was speaking about the contract of 1892.

Q. Did you ever report any mattresses of the second design?

A. According to my recollection, no mattress has been put in Savannah Harbor of the second design.

Q. On the Breakwater?

A. None of the second design put in.

Q. Now in the River?

A. None that I know of.

Q. At Barnwell Island?

A. No, sir.

Q. You never reported any?

281 A. No, sir; not that I know of.

Q. (Handing witness paper) Be kind enough to look at that paper?

A. That is not my report; that is a report as made out by another man and signed by me, but there is a clerical error there.

Q. But we never would have discovered that error if there never had been this prosecution of Capt. Carter?

A. Probably not.

Mr. Charlton: We will put it in with the Court's permission. (Marked Defendant's Ex. No. 5, copy attached to the record)

The Judge-Advocate: We have no objections.

Q. (Mr. Charlton continuing) That being a clerical error according to your remembrance of it now after three years time; did you never make any other report about a mat of the second design that was not a clerical error?

A. Not that I know of. These mats that I see you have described there are mats sunk along pole dams; it may have been customary to call those mats, mats of the second design, but, if they were so called, it is erroneous.

Q. So when we run across an expression as to the design of these mats, we are always to understand that it means nothing?

A. That was an error.

Q. And when it says the third design, it does not mean the truth; is that the idea?

A. No, sir; that is not the idea.

Q. (Handing witness paper) Here is one apparently in your own handwriting?

A. Yes, sir; as I say, it may have been customary to call these mats mats of the second design.

Q. Where was that put.

A. It is in the Marsh Island Closing Dam.

Q. Is that another clerical error?

A. That is not correct; those mats are not according to the second design.

282 Q. Do you mean according to the second design as interpreted by Capt. Gillette and by you since he has come here?

A. Yes, sir.

Q. They are built according to the second design as you understood them at the time you put them down?

A. I didn't know that had been put in there, but it is an error; I will state that as being an error.

Q. That is, in view of your enlightenment about the second design?

A. No, sir; I don't think so. That is simply an error, a misstatement.

Mr. Charlton: We offer this paper now. (Without objection the paper went in, marked Defendant's Ex. No. 6, copy to be attached to the record.)

Mr. Blair, of Counsel for Defense: If the Court please, we would like permission to take a piece of each of these stones, to have the specific gravity determined by our experts, if that is permissible.

The Court: You have no objections, Col. Barr?

Judge-Advocate: I have no objections.

Judge-Advocate: I move now that the Court adjourn until 10:30 o'clock tomorrow morning.

The Court: If there are no objections, the Court stands adjourned to meet here tomorrow morning at 10.30 o'clock.

(Court adjourned at 2.55 o'clock p. m.)

THOMAS F. BARR,

Col. & Asst. Judge Adv. Genl, Judge Advocate.

283

United States Court Room,
Savannah, Georgia,
January 21, 1898.

The Court met pursuant to adjournment at 10.30 o'clock A. M.

Present: All the members of the court and the Judge-Advocate.

The accused, his counsel, and the reporters, George T. Cann and W. O. Tarver, were also present.

ARTHUR S. COOPER, a witness for the prosecution on the stand, testified as follows:

Cross-Examination (Continued).

Questions by Mr. Charlton:

Q. Mr. Cooper, you said upon yesterday that whilst you had a copy of the specifications and understood them as now, that you did not feel called upon to go by them because you were carried down the river and shown a mat which was to be your guide. Where was that mat at?

A. It was about half way down the river at a place called Venus Point. We were then constructing what is known as the North Long Island training wall. That wall was being constructed, as I described yesterday, by means of those continuous mats; mats built off the end of the lighter in three courses at a time. Those mats were mats moddled after the third design in the specification: They were the third design with exceptions, and those exceptions were what I suppose

I was to go by by giving me that sample used. I was told that was the class of work that would be satisfactory, or was satisfactory to the engineer officer in charge and I was to carry on the work as I found it being carried on.

Q. And when was that?

A. That was in the latter part of August, 1893.

Q. And who went with you and exhibited the mat to you?

284 A. I think as I remember the exact circumstances, I was sent down the river by myself and Captain Carter came down the river a few days afterwards and showed me those things and told me to look the work over and familiarize myself with the work as it was being carried on and he would give me further instructions later on.

Q. Then you got those instructions from Captain Carter, himself?

A. Yes, sir.

Q. You say those were the third design, with exceptions?

A. Yes, sir.

Q. What exceptions?

A. They were bundles of brush, they were fascines of the third design, except that the poles were not put in.

Q. They were grillages?

A. Yes, sir, grillage poles.

Q. That is, instead of having two sets of poles between the mattresses there was but one? Is that the idea?

A. That's the question I understood you to ask me.

Q. Is that true?

A. I have not given my answer yet. My answer is, that is some instances instead of four single courses, or two double courses, there would be only one single course, or one half of one double course of poles between the mattresses.

Q. Now, with those exceptions, the mat conformed to the third design of the specification?

A. With those exceptions, they conformed to the third design of the specification.

Q. As you now interpret it?

A. As I interpret it, yes, sir.

Q. The mat that you were shown, the typical mat, was three courses?

A. It was a three course typical mat, built after or under the mat as described.

Q. Did it have any poles in it, so you could walk around it?

A. No, it did not, that's the reason why I said I reported the mats which had holes in them as not being in accordance with my instructions.

Q. Did you report the holes in the two mats that you did walk around in?

A. I cant remember the details of the reports that I made, I reported to Captain Carter in person.

Q. You did not report in writing?

A. I did not report in writing, I reported to him in person, all the mats that were not being built properly, and some change must take place, they were badly built and they must do better.

Q. Who was present when you walked around in this mat?

A. There could be nobody else in the mat but myself.

Q. But who was present in the neighborhood and saw you go down in them?

A. The contractor's foreman and one of my inspectors.

Q. Well, who was the inspector?

A. John M. Hall.

Q. Who was the contractor's foreman?

A. John H. Gaynor.

Q. Nobody else there?

A. Well, there was a number of men there.

Q. Who now, we want the names of all you can think of?

A. The colored men, I dont know their names. I never did know their names.

Q. Any other white person there?

A. Not that I remember. There might have been, I dont remember now.

Q. Do you remember when that was?

A. That was some time in 1894, it was subsequent to April 1, 1894. The exact date I could not tell you.

Q. And between what other months, approximately?

A. Well, sometime in the Summer of 1894. I dont know.

286 Q. Did you render a rejection for those mats?

A. I did not.

Q. Now, you mentioned two mats, didn't you, in which those large holes occurred?

A. I mentioned that I had gone down in the mats twice.

Q. The same mat?

A. No, sir, two different times?

Q. And on each one that you have just talked about, that you have just given an indication of, who was present?

A. The same parties were present.

Q. How far apart were those two times?

A. Those two times? It may not have been over a week, I don't know, it was about the same time.

Q. Where were those mattresses?

A. Where they were put in.

Q. Where were they at when you walked in them?

A. They were down in position to put in the Cockspur Island training wall, the exact position, I could not tell, somewhere in the neighborhood of Fort Pulaski, a little below Fort Pulaski.

Q. Do I understand those were two distinct mats, or the same mats in which you went twice?

A. Two distinct mats.

Q. About a week apart at a time?

A. Yes, sir, I judge so.

Q. The same persons were present, as far as you know?

A. As far as I know, yes, sir.

Q. When you made the complaint to Captain Carter in consequence with your experience with those mattresses, who were present?

A. To the best of my recollection, it was in his private office and nobody was present but Captain Carter.

Q. You and Captain Carter?

A. Yes, sir.

287 Q. How long was that after the occurrence?

A. I don't know; it was not very long.

Q. Was it after both occasions?

A. It was after the second occasion.

Q. Now, in your estimate of the cost of mattresses per square yard, your estimate rather, of the plant, you figured upon a large plant working rapidly, two mattresses a day: Well, now, as a matter of fact, it worked only one mattress in two days, would that affect your figuring in any way?

A. In making an estimate, a man naturally goes by his past experience. That is all I had to base my estimate on. I had seen as many as four mats placed in one day.

Q. You have not answered my question.

A. I have answered your question, excuse me, from my experience. That is what a man has a right to use. In making up a case, you use your experience. In making up an estimate, I use my experience. That is an estimate of four mats placed in the works. Four mats as large as 2,000 square yards have been placed in the work in one day. Then it stands

to reason that two could be done in a day. I think they averaged in fact, two a day. I believe they averaged as much as two mats a day under the contract of 1892, during at least, one year after.

Mr. Charlton: Repeat the question, Mr. Reporter.

Reporter: Now, in your estimate of the cost of mattresses per square yard, your estimate rather of the plant, you figure upon a large plant, working rapidly, two mattresses a day: Well, now, if as a matter of fact, it worked only one mattress in two days, would that affect your figuring in any way?

Mr. Charlton: Would it not? Yes or no, Mr. Cooper?

A. I can't answer that yes or no. It must be explained; I can't say.

Q. One minute; I have got the right to exact and get 288 a categorical answer or statement from you. If you cannot answer say so. Now, I ask you that question, whether instead of giving two mats a day the plant would only develop one mat in two days, would that affect your figuring as to the cost?

A. If possible only to put in one mat a day it would affect the figuring in the cost.

Q. How would it affect the matter of interest and deterioration, which you have got at \$15, and which is based on the plant turning out two mats a day, when, as a matter of fact, assuming it to be a matter of fact, it turned only one mat in two days, how would that affect your figuring?

A. You are arguing that.

Q. I am not arguing I am assuming.

A. Excuse me, I know it is not so—

Q. Just answer the question please. Assuming it turned out one mat in two days instead of two mats in one day, upon the items of insurance and deterioration, based on \$15 a day in your estimate, by what would it be increased?

A. You mean, estimating that the plant that I have estimated on, could turn out only one mat in a day?

Q. I want you to answer my question, which is entirely explicit.

A. That is not explicit.

Q. In your estimate given upon yesterday you estimate one item of \$15 for insurance and deterioration of the plant?

A. Yes.

Q. Based upon the idea that the plant was moving rapidly, turning out two mattresses a day, if the plant only turned

out one mattress in two days would that affect the figures and diminish the item of interest and insurance, and, if so, to what amount?

A. You would multiply the item by 4.

Q. It would be \$60, would not it?

A. Yes, on that basis.

289 Q. Have you ever prepared the cost of developing of three fascines—the making of three mattresses, first, second and third, or did you confine your attention to the third design.

A. I made it by estimating for the first, second and third design.

Q. A detailed estimate?

A. Yes sir.

Q. Have you those estimates?

A. Yes sir. (Here the witness takes a paper) This is an estimate for the first design. Read it?

Q. No, I want to see it, I have not offered it at all.

A. One sheet is the plant and the other is the estimate.

Q. Have you the second also?

A. Yes sir.

Q. When did you first see what you call the bundles of brush that Captain Carter used?

A. In 1886.

Q. Was that the first time?

A. I think it is.

Q. You didn't see any when you came here first in 1884?

A. There were no fascines or bundles of brush used on the first contract, it was all mats of the first design.

Q. Log mattresses?

A. Log mattresses, that's my recollection.

Q. Were there any bundles of brush, brush fascines, as we call them used in any of the works singly without being used in mattresses?

A. You mean on the contract of 1884?

Q. Yes, in the work.

A. Under the 1884 contract.

Q. Yes, 1885.

A. Well, the contract was 1884 and the work was done in 1885.

Q. Well, did you see it in 1885?

A. I made the statement that I didn't see any, it is
290 barely possible there may have been a few. Maybe a barge load or something like that, I don't remember. I

dont say there was not, because I am not certain. I have no recollection of putting any brush in that contract.

Q. In 1886, when you remember seeing them, were they then used in mattresses?

A. No, they were piled on the barges and towed to the works and thrown in the work and stones placed on them, they were not built into mats.

Q. Do you mean those bundles of brush were piled on the barges?

A. Piled on the barges and towed to the works.

Q. Do you remember which work they were put in?

A. Yes, sir; Fig Island Jetty, Dam number 36, Dam number 33, and I think some on dams 27, 15, and 10.

Q. Did they answer in description and appearance to what you now call bundles of brush?

A. They did.

Q. Who was in charge of this improvement at that time?

A. I had personal charge of the harbor improvement under Captain Carter's orders.

Q. Who was over Captain Carter here?

A. General Gilmore.

Q. How long did General Gilmore stay here after that time, do you remember?

A. Well, I think that Captain Carter, Lieutenant Carter it was then, reported to Captain Bailey at Charleston, they were all under General Gilmore, afterwards Captain Carter was given charge and reported directly to General Gilmore. After that he was placed in Engineer charge and General Gilmore was relieved and he reported to the Chief of Engineers.

Q. Do you remember when that took place?

A. I could not give you those dates.

Q. Captain Bailey and General Gilmore were in 291 charge for two or three years after you came along?

A. Yes, sir, Captain Bailey.

Q. You said upon yesterday that from 100 to 200 tests—

A. I correct that to 100, it was nearer 100 than 2.

Q. Were made; that includes all tests made of this stone?

A. Yes, sir.

Q. Was it all made under your supervision?

A. I made the tests. The inspectors mainly selected the samples. The samples were selected, I think I tested personally the samples for all the lighters. I think Mr. Daniels selected the samples from 10 lighters and Mr. Keatings the

samples of one lighter, and Mr. Gignilliat the samples of one other lighter.

Q. Then that included all the tests made on the Savannah Harbor, and the Cumberland Contract?

A. I had nothing to do with Cumberland.

Q. What have you done with the sample.

A. I have them at the Engineer's office at Tybee.

Q. How long ago did you make the tests?

A. The first tests were made on the third of August?

Q. Last August?

A. Last August.

Q. They never had been made before?

A. No, they never had.

Q. Now, you also said upon yesterday that as soon as Captain Gillette took charge here that plenty of stone had been put down on the breakwater.

A. I received orders from Captain Gillette to place at least 200 yards of stone upon every mat sunk, or for every mat placed on the works I was ordered to place at least 200 yards of stone on the other mats previously sunk.

Q. How many were placed on the breakwater?

A. After Captain Gillette came?

292 Q. Yes.

A. I think 3000 yards, possibly 4000 after Captain Gillette came.

Q. When was the last put on by him?

A. The last put on was about, I think the 10th day of October. No I guess it was September, I am not certain about that now.

Q. What proportion of that was Florida rock, and what proportion was granite?

A. I think there was about seven lighters of granite and the balance was Florida rock.

Q. What is the balance, how many lighters?

A. I don't know.

Q. Can't you estimate about the proportion.

A. Yes, that would leave probably about 3000 yards of Florida rock put on.

Q. About how many lighters would that make—lighter loads.

A. About 20.

Q. About 20 lighters of Florida rock and seven of granite is that right?

A. That is according to my recollection, it may be wrong, but some where about that.

Q. That is approximately true?

A. Approximately true, yes, sir.

Q. Have you at any time stated publicly that Captain Carter's appointment to London and upon the Nicaragua Canal Commission was due to the contractors?

By the court: What is that question?

Q. Has the witness at any time stated publicly that Captain Carter's appointment to the London Legation, to the London Embassy and upon the Nicaraguan Canal Commission was due to the influence of the contractors?

A. I never made any such public assertion as that.

Q. Have you ever stated it privately, where it could
293 be heard by other people?

A. I dont think I have.

Q. Did you never state it, upon your honor as a witness, I am referring to whether you have ever stated it in the hearing of other people?

A. I think I may have stated that before the Board.

Q. Well, did you do it, dont you know whether you said it or not?

A. I cant remember everything I said before the Board.

Q. Did you never say that the contractor had boosted Captain Carter along.

A. I used that expression, yes, sir.

Q. And when asked what you meant by "boosting" you said they had secured for him the position of Military Attache to the London Embassy, and a place upon the Nicaraguan Canal Commission.

A. I did not say they had procured it, I said I thought so.

Q. Did you have nothing to base that on except your thoughts?

A. That's all.

Q. In other words, that comes under the category of the lobbying item. Does it not. It is about the same basis, the same theory?

A. It is all hearsay evidence.

Q. Hearsay? Well, who told you that?

A. I dont know exactly, you can hear those things and you cant tell where you get them from.

Q. Mr. Cooper, as a matter of fact, you told it to yourself, you are the only person that ever mentioned it; that is, you didn't get it from anybody else, did you?

A. I think I heard it.

Q. You cant tell the person from whom you got it?

A. I cannot.

Q. Did you at any time receive instructions from Captain Carter to hold the contractors strictly to the specifications?

A. Not to my knowledge, I never remember of receiving any such instructions.

294 Q. Have you at any time ever received instructions to this effect? That they were to be held strictly to the specifications, and if they did not conform to them, that you were to go to the expense of stopping the work?

A. I dont remember of ever receiving any such instructions.

Q. You never did?

A. Not to my knowledge.

Q. Would not you remember if you had received positive instructions of that character?

A. I think I would.

Q. And you state now that you do not remember, or that you did not?

A. I dont remember of ever receiving any such instructions.

Q. You stopped work on the breakwater, did you, on the 10th of September, was not that the last work done there?

A. I did not stop work.

Q. Well, who stopped work?

A. The contractors stopped work.

Q. Well, under whose orders?

A. Nobody's orders.

Q. Has there been any work done there on the breakwaters since the 10th of September?

A. I say along the 10th, about that date, it may have been the 10th of September or the 10th of October, I think it was the 10th of October.

Q. Well, whichever it was, has any work been done there at all since?

A. No, sir.

Q. Has any work been done in Cumberland Sound since?

A. No, sir.

Q. What has been the chief work of the office force of Captain Gillette since that time?

A. Well, they have been working on map work.

295 Q. Would it take all that time to draw a map, all that time?

Judge-Advocate: I would like to ask if the witness knows what the office force has been engaged on.

A. I have not been in the office but a very short time.

Q. Where have you been?

A. I have been at Tybee, engaged on the work down there.

Q. The fortifications?

A. The fortifications.

Q. Well, the few times that you have been here and been in there, what has that office force been employed on?

A. They all seemed to have been busy.

Q. Have not they been busy looking up evidence in Captain Carter's case?

A. I suppose so.

Q. Every time you have been there, has not that been the general work they have been engaged in?

A. They seemed to be working on maps.

Q. Working on maps of the work of Captain Carter?

A. Working on the plans of the fortifications and business relating to the rivers and the operation pertaining to all matters connected with the district. I could not give you the details of the business because I dont know, my work is in the field, if you want that you must ask some one else, I dont know.

Q. Have you devoted some of your valuable time to looking up the case against Captain Carter?

A. I have looked up some facts, I was told to do.

Q. Who told you to do that?

A. Captain Gillette.

Q. Were you brought up from your labors at Tybee?

A. Not that I know of.

Q. How did you come up without being sent for?

A. If I was sent for I came up.

296 Q. Were you sent for?

A. Some times, yes, sir.

Q. Were you sent for?

A. Some times.

Q. For that purpose? To look up this case against Captain Carter?

A. I dont know that I was sent for to come up for that purpose. I may have come up for other purposes and was then given some of this work to do.

Q. Will you look at that and see if you can tell us what it is meant to represent—Before you answer that question—

Mr. Charlton (To the Judge-Advocate): Colonel, I asked

the witness if he could identify what that was meant to represent.

Judge-Advocate: Certainly.

A. This sketch represents a couple of cross sticks, evidently for the purpose of choking a fascine, I never saw the sketch before, if that is what you show me, the answer is; that that is what I would understand from the sketch, I dont remember of seeing it before. It is a choker for fascines.

Q. Would you regard that as an efficient choker?

A. I should think so, yes.

Q. Have you ever seen the choker that is used in this vicinity by these contractors?

A. I have, yes.

Q. Is it stronger or weaker looking than that?

A. I have not any distinct recollection as to that and would not like to state, I have seen them, but didn't especially notice them at the time. It would not be fair for me to say whether it was easily stronger or weaker, I dont know.

Mr. Charlton: We offer this in evidence.

Judge-Advocate: This will be attached to the record and marked "Defense Exhibit No. 7".

Q. Will you kindly look at that drawing and see if you can tell us what that represents?

297 Well it may be taken to represent a bundle of brush, or it may be taken to represent a bundle of weeds.

Q. Assuming it would be taken to represent a bundle of brush, have you ever seen anything like that before, any such bundle of brush as that?

A. I think so.

Q. Where?

A. I have seen some in the works here, I think even as good as that.

Q. Even as good as this?

A. Yes.

Q. Well, do you consider that a fascine?

A. No, sir, I should call that a bundle of brush, I suppose that would be described as a bundle of brush trimmed and choked. I should judge by that sketch that that has been some brush that was cut and the biggest part of the limbs trimmed off and the smaller brush and branches left on and choked, that's my understanding of that sketch.

Q. It could by any imagination be made to represent a fascine?

A. That is not a fascine, as I understand it.

Mr. Charlton: We introduce this in evidence.

Judge-Advocate: That will be attached to the record and marked "Defense Exhibit No. 8".

Mr. Charlton: I notice in your estimate of the cost of the first design of the construction of the mattresses of the first design of the specifications that you have labor put down at a dollar and a half a day, whereas in the others I think you had it down at a dollar a day and 75 cents a day.

A. Excuse me, only a part of that labor on that estimate is a dollar and a half a day. You see the labor is paid all the way from a dollar and a half to \$1, and 75 cents a day, depending upon the class of work they had to do.

Q. I see the item is this: Building mat, labor \$1.50 a 298 day, \$43, that is very hard work, the men have to be engaged in the water up to their waist all day and you cant get men to work in those conditions without paying them for it, they work for less money on land than in water.

Q. What experience have you had in building log mattresses, personal experience.

A. In building a log mat?

Q. Yes.

A. I had three or four years experience with log mats, I never built any.

Q. You never paid for the building of any?

A. Never did.

Q. That's all guess work?

A. Not guess work, no, sir, I dont understand it that way. I have had experience with log mats and know what they are, and, of course, have some idea of what it would cost to build them.

W. When did you find this bundle of brush that was brought up here, that you claim to have found upon Tybee Beach, when did you find it?

A. The date?

Q. Yes, sir.

A. I think it was some time in September.

Q. Last September?

A. Yes, I can look up the exact date in my journal if you with it.

Q. Just simply the approximate date; and the first you saw of it was there on the beach, was it not?

A. As far as I know, it was. It may have been some bun-

dles that came out of those mats that I sunk on the break-water.

Q. That you dont know, you dont know where it came from?

A. I do not, I do not.

299

Re-direct Examination.

Questions by the Judge-Advocate.

Q. Mr. Cooper, you have been testifying as to the estimate made by you of the cost of the manufacture of the mattresses of the different types, which do you consider the most expensive types of the three designs mentioned in the specifications?

A. I would consider it more expensive to build the log mats, that is Design No. 1, on account of the heavy material in that mat, it costing more to tow it. Design number 1 has to be towed while the mat is in the water, it cannot be placed in the water. In designs number 2 and 3, that is where the distinction comes in design number 1. Design number 1 has the logs built into the mat and it remains in the water until it sinks in the works.

Q. In addition to the cost of construction it would be the cost of transportation to the place where it was to be sunk?

A. Yes, sir.

Q. What would be the relative cost of manufacture and transportation of type number 1 per square yard and the relative cost of transporting the 8 course mattresses ready to be sunk in place per square yard?

A. Do you mean that both of them, or all of them are to be constructed according to the specifications, or as they were going in the work?

Q. The mattress I am speaking about is the mattress you have testified as having been put in the works, the 8 course mat.

A. My estimate for the 8 course mat was 9 cents a square yard in place, that is the actual cost, without figuring any profit or any risk to the contractors, and the first design for log mats, according to my figures, would cost 55 cents, 55 and a half cents I think it was per square yard in place, without figuring and profit or risk to the contractor.

300 Q. And that would be one mattress instead of 8?

A. Well, that is per square yard. that estimate was made on a basis of a mat which contained 2000 square yards

and the total cost of the mat was divided by the 2000 square yards to arrive at the cost per square yard.

Q. Exactly. Now, as to type number 2 of the designs, how much different do you think that would be?

A. In the cost of construction, in the type number 1, and number 2. The cost of number 1 and 2 is very little 2, I estimate number 2 at about 50 cents per square yard in place.

Q. Now, as to the cost of number 3, according to the specifications

A. I made a computation of that of 30 cents per square yard in the same manner.

Q. The advertisement calling for bids called for one bid, as I understand, one price for the three types of mattresses?

A. I think it did, I was not here when they were advertised, and only know that from hearsay.

Q. You have seen the specifications?

A. The specifications say that. Yes, I believe it does. It says one price will be estimated for all three designs.

Q. How was it determined which type of mattress should be used?

A. That was determined by Captain Carter.

Q. According to the terms of the specifications?

A. You could not tell by the specifications.

Q. No. That question of determination I am upon now, according to the terms of the specifications?

A. The specification does not specify which design will be used.

Q. But that the design to be used should be at the option of the Engineer in charge?

A. At the option of the Engineer in charge.

Q. You were shown this book of regulations for the government of employees of the United States Engineering 301 Department, and your attention called, I think to the last section, the paragraph was 96, "He must thoroughly comprehend the specifications and his general instructions". To whom does that refer?

A. That, I believe refers to inspectors and engineers in the field.

Q. That is the specifications and his general instructions?

A. Yes, sir.

Q. What is your understanding of the meaning of general instructions, in addition to the specifications?

A. General instructions would be instructions received at any time from Captain Carter, either verbal or written.

Q. And under the first of those requirements you would be governed by such instructions as he gave them, notwithstanding you had the specifications in your hands?

A. If I had instructions countermanding any one order in that book even if it was verbal, I would carry out the instructions.

Q. And consider yourself justified by the terms of the requirements?

A. Consider myself justified in carrying out the last order given in all cases, no matter whether verbal or written.

Q. Did you even see these regulations?

A. I was on the work three months, when I came back the last time before I knew this book was in existence. My first recollection is, when asked by Captain Carter why I disobeyed a certain paragraph in that book.

Q. Do you recollect the paragraph?

A. I think it was paragraph 25.

Q. If that is the paragraph, please read it.

A. That's right, 25.

Q. Read it please.

A. "In case of the transfer of property, duplicate receipts will be executed, one of which will be forwarded to this office, the other to be retained by the transferrer". There was a case where I transferred property and simply took one 302 receipt and didn't forward a copy to the office. My attention was called to it and I was asked why I violated this regulation, that is the first I knew the book was in existence.

Q. Now, Exhibit No. 1 for the Defense, submitted to you yesterday in that there is a deduction made. How did it happen that that account was stated and then the deduction made thereafter?

A. This mat was received on the works and measured and of course, we not knowing but what it was going in the works—the may was dumped overboard and the attempt made to sink it, and the mat went to pieces, and, of course, didn't go in the works, and we could have either put that in our report or not. In some cases of that kind they didn't go into the report at all, in this case it did go in the report and the cost diminished, but I would not look on that in the light of a deduction, it was not a deduction in the proper sense of the word, it is simply taking out material that didn't go in the works, there is no recommendation for a reduction, it is simply in the report as what did not go in.

Q. What is the object of those reports, what is their purpose?

A. To convey to the Engineer Officer in charge the exact amount of material placed in the work by the contractor.

Q. As a basis for the adjustment of accounts?

A. The adjustment of accounts as to whether they were paid or not I am not supposed to know.

Q. Could that mattress, which went to pieces, referred to in that Exhibit No. 1, have gone to pieces had it been constructed according to the language of the specifications mentioned in the contract?

A. I could not say, I do not remember just exactly why that went to pieces. It may have been very bad weather, if it was very bad weather it probably would have gone to pieces anyway.

Q. That is, you have seen storms of such violence that they would destroy any mattress?

A. They never attempted to sink them in bad weather, 303 in case the weather is very bad. Some times they will go out when the weather is threatening and when the sea is very high and take the risks rather than lie idle.

Q. Do you recollect the conditions when that mat went to pieces?

A. I do not, there were seven cases in which mats went to pieces, I cannot recall which special case this was.

Q. How many of those 7, if any of them, could have gone in the works under the nature of the stress in which they were placed and in which they went to pieces if they had been properly constructed.

A. I think the probabilities are that the majority of them would have gone into the works if they had been properly constructed, possibly all of them, but I could not state that.

Q. Did you know, while acting under the instructions of Captain Carter whether any modifications of the types of mattresses called for as specified had been made.

A. I was not notified, of any change in the form, if that's what you mean.

Q. There was no agreement in writing made known to you of a modification of the terms of the contract?

A. No notification of a modification was made known to me while I was in charge under the contract of '92 or '96.

Q. Do you know who got up these regulations, of your own knowledge?

A. I was told—

A. No, of your own knowledge?

A. I do not.

Q. Did you have occasion to make frequent reference to them?

A. I paid very little attention to those regulations, I dont remember of reading them over more than a couple of times while I was on the works since I came back in 1893.

Q. Have you received a copy of them since you returned in '93.

A. I received a copy some months after I came, I think it was given to me by Mr. Sterly, the clerk of the office,
304 I have been told since that I gave a receipt, but it made no impression upon me at the time. I have forgotten.

Q. Have you ever had a conversation with the accused in regard to the regulations?

A. Printed regulations?

Q. Any conversation I stated about the regulations?

A. About the printed regulations?

Q. Yes, this book.

A. I dont remember ever speaking to Captain Carter about the printed regulations.

Q. Upon any other occasion that that which you have testified, did he call your attention to the regulation?

A. Possibly he might, I dont remember, sir, if he did.

Q. You dont quite understand, yesterday, Mr. Cooper, in answering a question by Mr. Charlton whether you spoke of doing wrong rather than resigning, did I so understand you?

A. I did not say that.

Q. What did you say?

A. I said I obeyed orders, that I did not think were proper orders to give rather than resign. I think that was my answer.

Q. Well, did you consider that you were doing a wrongful act when you made out the reports in the manner in which you did?

A. I did not, I was obeying my orders and my instructions. I considered the man that gave the order was responsible and not the man who executed the order.

Q. You were yesterday shown an estimate made by you in which you had embraced the sum of \$25,000 to be used in lobbying the appropriation bill through Congress, in that estimate, was not that in the interest of the contractors, enlarging the cost of production?

A. Of course. That Item I knew nothing about, it is simply hearsay.

Q. You do not quite understand me, was it in effect, that embracing of that large sum in the estimate, was it not 305 in the interest of the contractor, and so as to increase the cost of manufacture?

A. Oh, yes, that would increase the cost of manufacture, I could have left that out and the cost would have been less.

Q. It was in the interest of the contractor that that cost appeared in the estimate?

A. Yes, sir, in that respect, yes, sir.

Q. You also left out loss involved on account of storm?

A. I made an estimate of the loss during the entire 3 years, there had been a loss of but one mattress that I recollect.

Q. Then, might that same \$25,000 in the estimate charged to the lobby account be taken out and charge it to storms, and then the estimate would be the same as you spoke of here yesterday?

A. That would more than replace it.

Q. You were testifying yesterday in reply to some questions from Mr. Charlton as to the specific gravity of the different stones, what was the sinking power of the stone of the lightest character.

A. That stone would weigh, the sample you have in your hand would weigh 84 pounds to the cubic foot, that is in water, but this stone being very porous, if it was coated with a coat of parafine or any substance impervious to water would actually float because that stone dry would only weigh 56 pounds a cubic foot, and a cubic foot of water would weigh 62 and a half pounds a cubic foot, it would therefore float.

Q. Then, Mr. Cooper, if I understand you rightly, stone of this character only sinks when placed over the works when it becomes saturated with water?

A. When it becomes saturated with water.

Q. Have you ever seen any of it float?

A. I have seen a half a dozen samples float about a quarter to a half a minute; if thrown overboard it would only sink when the air became replaced with water.

Q. What is your understanding, as an engineer, of 306 the meaning of the term used in the specification about stone of a certain specific gravity to be used to hold down mattresses upon that work. What would the term "specific gravity" refers to?

A. Specific gravity is a relative term. It means the relation of that stone to water, and water being the unit, the weight of stone would be more than the unit, the character of the stone specified would be 2.4, that is, the weight of the stone would be 2.4 time the weight of water, that is what I mean by specific gravity.

Q. That is the stone as delivered and sunk?

A. Yes.

Q. You speak of barnacles attaching themselves to stone, they do that on any kind of stones, dont they?

A. That depends upon the time of year the stones are placed in water, if the stone was a very soft stone, for instance, to illustrate, if you place two stones in water, one very rough and one very smooth, if that is done in September, or the early part of the winter, no oyster shells will attach to them until after the following August, which would be nearly a year. In the meantime the rough stone would be coated with mud and the smooth stone would gather less mud, then, when the oysters became attached to the smooth stone they would stay there, and when attached to the rough stone they would fall off on account of the mud, in other words, the rough stone would gather mussel better after Christmas.

Q. Did Captain Carter ask you to make a test of the stones used in the works under the contracts?

A. He did not.

Q. These two sketches that were shown you, number 5 and 6, you could have been able to pass much better judgment upon them had photographs of the objects been shown you, could you not?

A. I could.

Q. You spoke yesterday of military fascines, does it make any difference whether a fascine is a military fascine or not, if it is according to the specification?

307 A. I do not see that that would make any difference, the term "military fascine" does not occur in the specifications, they are described accurately. You are supposed to go by the description given in the specification.

Q. If you were writing specifications for what you understand to be military fascines, would you write them any different from the specifications of the contract of 1896 for the Savannah Harbor?

A. I might possibly specify more particularly about the trimming. The choking is clearly stated but you might be

more explicit as to the trimming, that simply says "well trimmed", there might possibly be some misunderstanding as to what that meant.

Q. As to the definition of "well trimmed"?

A. Well trimmed, yes. That probably might be expressed more explicitly in terms that could not be misunderstood.

Q. You spoke of sounding the mattresses, what do you mean by that?

A. Sounding?

Q. Yes.

A. In this case that I speak of, I would take a pole, say a pole 10 or 15 feet long, and shove that down between the bundles of brush in order to ascertain whether the center tiers of brush were properly packed, or whether they were there at all or not, that's what I mean. I did not mean sounding after it was sunk, I mean feeling of it before it was sunk.

Q. That is the mattress itself?

A. Part of the mattress was covered, the top course and the sides, I could not see it, and the pole was used to give me as accurate an idea as I could obtain by using the pole from outside the mat.

Q. Could you run a pole through one of those 8 or 10 course mats?

A. Always, you could always run a pole down.

Q. You would have to be particular as to the spot?

A. You had to be particular as to the spot, but you could always shove the pole clear through the mat.

308 Q. Could you tell by such sounding whether the mat was full of bundles of brush or loose brush, or some other material?

A. You could not, absolutely, you could simply form an opinion by the use of that pole. If you could not put the pole down very easy you could naturally infer there was a good deal of material in there, but as to what the material was, you could not tell by the pole.

Q. There was no other means unless the mattresses were inspected during the course of construction?

A. The proper inspection would be to have a man upon the grounds to see each bundle of brush and each pole put in the mat, I could not tell when the mat was delivered to me on the works what it was made of.

Q. Then the proper place of inspection of those mattresses was the mattress camp where they were constructed?

A. Yes, sir.

Q. In those reports to which you testified yesterday, there is a heavy design of mats, what does that refer to, what designs does that refer to?

A. In nearly all cases, to the third design as put in those blanks. The blank form given me to fill out as the heading designated as design of mats. In that column there is a space, probably a quarter of an inch, there is no opportunity to describe accurately how each mat is constructed, but simply to put in there some one short word that would give some idea as to how the mat was constructed, those mats were to be modelled after the third design, so the third design was placed in there to indicate some other part or method of constructing that mat. That does not mean that all of the details were followed out of the third design in making that mat, it simply means that that was the plan upon which the mat was built.

Q. It was not then a certificate or statement that the mat had been constructed in accordance with the terms of the specifications?

309 A. I did not understand it that way, it was simply a descriptive term.

Q. For whose information were those reports made?

A. They were made for the information of the Engineer officer in charge.

Q. He would understand what was meant by that?

A. Yes, sir.

Q. The specifications he handed to you of those contracts provided for modifications for the several designs?

A. There is a clause in there providing for modification, yes, sir.

Q. And you never received any information that a modification had been made of the express terms of the contract?

A. I did not.

Q. How often did you submit those reports to the accused?

A. They were submitted every 10 days or three a month.

Q. Then to repeat a complete description of the changes made each 10 days would have involved a repetition?

A. Yes, sir.

Q. In the contract of 92, what proportion of the mattresses were of the character that you have described as 8 course mattresses?

A. You mean of the third design?

Q. Yes, and of the kind actually used under the printed characters as to the third design?

A. That question was asked me as to the correct class yesterday, I had at that time forgotten, I remember now distinctly how they came to be put the second design. There were some mattresses constructed not in accordance with any design, but it resembled the second design more than it resembled any other, for that reason it was put down in the description "second design", but they were not in accordance with the second design, but resembled that closer than any other design.

Q. Well, what proportion of the mattresses of the 310 standard adopted by Captain Carter were put in under that contract?

A. They were all put in by the standard mentioned by Captain Carter.

Q. Have you ever seen the first design used in the Savannah Harbor or Cumberland Sound?

A. When I first came here in 1884, the mats were all built of the first design. It prescribes that enough brush shall be placed on the top of the log raft to make a layer 6 inches thick in the finished work.

Q. What is meant by "finished work"?

A. It means that the logs must be covered by a layer of loose brush of sufficient thickness so that if the rock is placed after it is sung the brush and the binder poles along with the brush will be 6 inches thick.

Q. What thickness of brush was actually used to secure this 6 inches in the finished work?

A. In some instances it is as great as 6 feet.

Q. How would the quantity of brush in such a layer compare with the quantity of brush in a single layer of 8 course mattresses built in Savannah harbor during the contract of '92?

A. That is provided the layers were equal?

Q. Yes.

A. If the requirements of both were carried out strictly to the letter I think the brush would be greater, or do you mean according to the specifications, or as put in the works.

Q. As put in the works, how would the quantity of brush of that one you have described compare with the quantity of brush in a single layer of an 8 course mattress?

A. I think the amount of brush actually used in the work in the mats of the first design and the amount of brush

actually used on a single mat of the third design in the three works were very nearly equal, possibly a little more in the third design than there was in the first design.

Q. The preponderance, if any, would be on the side of what?

311 A. Of the third design.

Q. I mean, that is, as actually constructed?

A. That is what I spoke of, the actual construction in both cases, in case of the first design, which would be the style prior to 1888, in the case of the third design, which is used subsequent to that I think the preponderance of the brush would be a little bit in favor of the third design actually used in the work.

Q. In making use of the third design, do you mean mattresses actually sunk or the mattresses as specified?

A. I understood your question to mean the mattresses as actually sunk?

Q. That is what I meant?

A. Yes.

Q. The same provision was in that contract as to the bids, bidding one price for the three separate designs as in the existing contract?

A. You mean in that contract of 1884?

Q. No, the '92 contract that you are testifying about, that the same price should be bid for all three separate designs?

A. Yes, the same price should be bid.

Q. And the type to be used at the option of the Engineer Office in charge?

A. The types to be used to be at the option of the Engineer Officer in charge.

Q. What position did you first occupy under the accused, Mr. Cooper?

A. I occupied the position of topographical assistant, general service detachment, Department of the Missouri.

Q. Then you were in the Army, a part of it at the time?

A. At that time I was an enlisted man in the Army.

Q. And you subsequently joined the accused? Was it at his option or did you solicit his employment.

A. He wrote requesting me to report to him at Savannah for duty as his inspector on the work here.

Q. And your subsequent employment under him was that under the same circumstances, at his own request?

A. My first employment was procured in this manner; Captain Bailey, or Lieutenant Bailey, as it was then, was

Chief Engineer of the Department of the Missouri. He advertised for topographical assistant, I answered Captain Bailey's advertisement, and in the meantime Captain Bailey was transferred to Charleston and Captain Carter was appointed Chief Engineer of the Department of Missouri, Captain Carter picked out my application and sent for me, that is the way I first came in the service.

Q. I am referring to your subsequent employment, Mr. Cooper, from time to time, if each time you have returned to the service of the Government, if it has been at his request and invitation.

A. In all cases.

Q. How as to your compensation, has it remained the same in each employment?

A. It was increased all the times except one, I was sent for four times, three of those times my pay was increased, in one instance it was not increased.

Q. How about your last return to the service under him?

A. My salary was increased.

Q. By how much.

A. It was increased from 175 to \$200 per month.

Q. Which you have continued to receive since that time?

A. I have continued to receive up to the present date.

Q. Mr. Cooper, you were asked yesterday as to when your changed views were experienced in relation to the manner in which business had been done in these improvements in this District?

A. In regard to what?

Q. In regard to the manner in which the business had been transacted here, and the character of the work, and the manner in which you characterized it after Captain Gillette arrived and before?

313 A. After Captain Gillette arrived the work was done in strict accordance with the specifications.

Q. No, you dont understand me, you were examined as to when your change of views took place under which you characterized the work in different terms from what you had characterized it before his arrival?

A. It was shortly after my return in 1893, I could not place the exact date, it was somewhere in 1894 or 5, somewhere along there.

Q. And any views that you now entertain or express in relation to the mattresses more particularly had been entertained before you ever saw Captain Gillette?

A. Yes, sir, some time before.

Q. Did you receive a letter of instructions from Captain Gillette as to how your business should be conducted?

Mr. Rose: Let him answer the question yes or no.

Mr. Charlton: If the witness received instructions from Captain Gillette, if oral they are not admissable, if in writing that should be first submitted to us.

Judge-Advocate: It is in response to the line of investigation yesterday, it seems to me. Showing that he only became aware that things were not going properly after he received information from Captain Gillette.

Mr. Charlton: He testified yesterday he knew all along they were not going according to the specification right straight along.

Mr. Blair: We will object to the introduction of that letter if it is your purpose to introduce it, do you offer it Colonel?

Colonel Barr here asks the witness if he remembers such a letter.

Witness: I remember the letter.

Judge-Advocate: This is a letter dated August 6, 1897, from Captain Gillette to Mr. Cooper conveying certain instructions to which the counsel objects.

The President: State the objection.

Mr. Blair: Colonel Barr has not offered it.

314 Here Judge-Advocate starts to read the letter.

Mr. Blair: We object to reading it.

The President: State the ground of the objection.

Mr. Blair: That seems to be a letter, if the court please, addressed by Captain Gillette to this witness, the 6th day of August, 1897, after the accused left Savannah and was relieved from duty at Savannah, now nothing that Captain Gillette can say, or this witness, or anybody else can be binding evidence upon this accused. We submit that this is not the proper way, the legitimate way, to build up the testimony of this witness. The declaration of Captain Gillette made out of the hearing of the accused and not acquiesced in by him is not evidence of anything. The mere fact that Captain Gillette gave this witness instructions on the 6th of August may be relevant to the case, but the nature of those instructions we submit has nothing to do with the charges here either. This officer is charged with various derelictions of duty, which occurred, if they occurred at all, long before August 6th, oc-

curred of course before he left here, about the middle of July; now, we submit, respectfully, that nothing that Captain Gillette could say or do after the accused had left here and after the offense had been fully committed, if they were committed at all, can have no bearing whatever upon this case. Moreover, if the letter of instructions contained instructions of Captain Gillette to this witness as to his method of conducting the work, as to the specifications under this contract the letter cannot be in response to anything we brought out because this witness testified yesterday, and again to-day, that as far back as 1893 he knew that the work was not being done in accordance with the specifications.

Judge-Advocate: The proffer is with-drawn.

Q. You testified, Mr. Cooper, in regard to a statement made by you before the Board, what board did you refer to?

A. The Board of Engineer officers sent down here to 315 investigate the charges made against Captain Carter.

Q. In regard to "boosting" along the accused?

A. Yes, sir.

Q. On what did you base that?

A. Simply matters that I had heard.

Q. You used the same expression elsewhere?

A. Not that I know of, I don't know that I ever used that expression before, except to Captain Gillette.

Q. Was that in a letter, or did you state it to him.

A. I think it was in a letter.

Q. Is that the letter?

A. Yes sir.

Here the letter is handed to counsel for the accused.

Judge-Advocate: I propose to read this.

Mr. Blair: We object, if the court please.

The President: State the objection.

Mr. Blair: This is a letter dated August 7, marked "Personal", addressed to Captain Gillette by this witness, it contains various statements with respect to Captain Carter. We submit that that is not admissible. If the witness has any statements to make with respect to Captain Carter he is here under oath, let him make them in answer to relevant proper questions addressed to him by counsel, but extra-judicial statements not sanctified by oath, private correspondence between him and Captain Gillette have no business in this case. They are not any admission to bind this defendant in any way shape or form, the letter, moreover, is not in response to anything elicited in the cross examination of this witness. If

pertinent to anything at all brought out it is pertinent to the question asked this morning as to "boosting" the accused along and getting him his details at London and on the Nicaraguan Commission. The court will remember that the questions which were addressed to this witness in that regard were "did he make a statement in the hearing or in the presence of any other person", that question has 316 nothing to do with any letter which this witness may have written, therefore we submit under no conceivable rule of evidence is the letter admissible, it is an expression of personal opinion only by this witness.

Judge-Advocate: I will ask the witness one question in regard to this before I offer it.

Mr. Blair: Very well.

Q. Why was that letter written?

A. That letter was written because Captain Gillette wrote me a letter requiring me to answer certain questions.

Q. An official communication?

A. An official communication. I did not want to answer those questions and I wrote that letter for the purpose of avoiding those questions.

Judge-Advocate: I offer this letter in evidence for the one single purpose of showing the condition of the mind of the witness at the time when he had just come in the service, and it was not a new condition of mind, that Captain Gillette's presence had not engendered those thoughts and those views, and that he hadn't changed his views by reason of anything done by Captain Gillette.

Mr. Blair: Here is the witness under oath, if there is any fact within his knowledge, any change of heart, and practical theory he entertained with reference to this case let him answer a pertinent question put to him, that is the way we elicit evidence in a court of justice.

Here the Court at 12.00 o'clock, noon, retires to an adjoining room for consultation, after which, at 12.17 o'clock P. M., the Court having returned and the members of the Court resuming their seats the Court was open and the President, in the presence of the accused, his counsel, the Judge-Advocate, and the reporter announced—

By the President: The court sustains the objection of the accused.

317 Judge-Advocate: Mr. Cooper, you testified that the value of the mattresses, as placed in the water under those contracts was 9 cents a square yard?

A. Yes, sir.

Q. What was the contract price?

A. I think it was 95 cents.

Q. That is in the Savannah Harbor improvement?

A. Savannah Harbor contract of 1892.

Q. What was the contract price under the contract of '96?

A. As I remember it that was also 95 cents.

Q. 95 cents is the price of each contract?

A. Yes, sir.

The President: Any member of the court desire to ask a question?

By a member: I would like to ask the witness if at the commencement of his service under the contract of Savannah Harbor Captain Carter read with him the specifications under that contract and asked him if he clearly understood them.

The President: There is no objection, the court will offer the question.

A. He did not.

By a member: I would like to ask if he read any specifications used in the contract before entering upon the execution of the contract with the witness.

The President: Adopted by the court.

A. He did not.

By a member: I would like to ask if the witness clearly understood all the requirements of the specifications under that contract.

By the President: Adopted.

A. I think I did.

By a member: I would like to ask if he understood why the specifications required the brush to be trimmed, well trimmed, in making the fascines.

By the President: Adopted:

A. As I understand it, that is involved in the reason
318 why trimmed brush or military fascines should be placed
in the work, or simply the bundle brush; is that correct?

By the Court: No; I want the question answered why the specifications required the brush to be well trimmed in making a fascine in hydraulic construction.

A. I consider the brush well trimmed would be preferable; for the work would build up more for each course where height was desired, and it would make a firmer and better foundation, where the foundations were required.

By the Court: I would like to ask if the brush was well

trimmed at any time, while making any fascines in that contract of 1896?

By the President: Answer that.

A. They were not, to the best of my knowledge and belief.

By the Court. Have they ever been well trimmed, under any contract which the specifications stipulated that they should be,—in this district?

A. Not in the fullest meaning of the word "well trimmed." Some of them were trimmed; but as I understand the meaning of the word "well trimmed," they were not.

Q. Did that requirement that the brush should be well trimmed increase the price for making the mattresses?

A. I should say that it would; most decidedly, increase the price. It involved labor; it involved expense; it involved more labor in cutting brush, and more labor in cutting and binding and choking

Q. I would ask if it increased the price, why it was retained in the specifications to the succeeding contract?

A. That I could not answer. I had nothing to do with preparing the specifications. My work was in the field; I never was consulted as to what the specifications would specify. The specifications were given to me as completed. I had nothing to do with their preparation, and was not consulted as to how they should be prepared.

By the Court: I would like to ask if Capt. Carter never expressed to the witness to make any suggestions as to how the cost of the work could be cheapened and its efficiency retained at the same time.

A. He asked me some question as to how it could be cheapened in the matter of using less rock on the mattresses in some instances, and as to other details; but never as to the specifications; simply the details as to the field work. I was often consulted as to the field work, and to its methods as to carrying on the field work, but not to the specifications.

Q. I would like a statement as to what those details of field work were.

A. I mean by field work the sinking of the mats, and the determination of the proper amount of rock to place on each mat, and in general, the best methods of constructing dams, spur dams and training walls.

By the Court: I would like to ask how many of those mat-

tresses were used in more than one course, piled in more than one course.

A. How many mats?

By the Court: Under the contract of '96, Savannah Harbor.

A. I think there was—

By the Court: What proportion of them?

A. There were 133 parts; that would be 125 mats. 125 mats went into the breakwater, but 4 of those mats were a single course mats, that would make 121 mats, 3 course mats, used on the contract of '96.

Q. Were any mats laid in more than three courses?

A. Not in the contract of 1896.

By the Court: Now, I would like to ask what would be under the specifications, the entire height of a mattress in one course.

A. A mattress of one course, according to the specifications of design No. 3, would be 25 inches, using the figures mentioned in the specification; but there are practical points that come in there, that might increase that, for instance—the specifications say a pole shall be 3 inches at the small end and 5 inches at the large end; in cutting poles it would be 320 more than likely they would average more than 4 inches, that is, would cut some poles that would be 3 at the small end and they might be 8 at the other end. You would therefore, average more than 4 inches. In constructing the fascines, the specifications say they shall be 9 inches in diameter. In that case, in order to secure 9 inches, you must have more than 9 inches; you probably would in that case. I mean that both figures under specifications would call for 25 inches, and you would practically get two feet and a half or 30 inches. I simply give that as my opinion, but the specifications say 25 inches.

Q. Then if a mat had been constructed according to the specifications, a single course would have been 25 inches in height?

A. According to the specifications, yes sir.

By the Court: In the two course mattresses made from the poles, one met on the other, would have made what height?

A. That would have made 4 feet and 2 inches, minus 4 inches, because you lost the height of one pole.

By the Court: Then, as I understand it, the top pole in the top grillage of the bottom mat, is parallel to the bottom pole of the lower mat?

A. Yes, sir.

By the Court: And the lower poles of the upper mat lie between the top pole of the lower mat?

A. Yes, sir.

By the Court: And that takes off four inches?

A. Yes, sir.

By the Court: So that the lower mat was 25 inches in height, and the next mat 21?

A. Twenty-one; that is correct, according to the specifications.

By the Court: Now, then, the three course mats according to the specifications, would have been how high?

A. On that basis?

By the Court: On that basis.

321 A. That would be 5 feet and 7 inches.

By the Court: Now, taking your testimony of yesterday, you said you were instructed by Captain Carter to accept certain heights for certain mattresses of certain courses?

A. Yes, sir.

By the Court: What height were you instructed to accept for mattress three courses high?

A. 4 and a half feet, as I remember it. I have not got the list with me, I think that is it. It is on record, however.

By the President: Could you state a little more definitely if you had memoranda from which you testified as to the height?

A. Yes, sir, but I have not the memorandum with me. I think that is right. (here the height of a four course mattresses is read from the record of yesterday). I think that is right, it was 5 feet, I think that is the height given in my list.

By the court: That is 7 inches less?

A. 7 inches inches less than the exact measurement would give.

By the court: That is a seven course mat?

A. A three course mat.

By the court: A fourth course mat was 5 feet according to his memorandum yesterday.

By the Court: Were any four course mats built?

A. I think there were, there were very few, that is in the contract of '96, there were none in the contract of '96.

By the Court: I would like to ask if the training walls that were built with mats of the character which has been de-

scribed retained their height or if they settled so that additional brush had to be added.

A. You mean back of the contract of '96?

By the Court: In the contract of '96.

A. I think in the breakwater that the mats settled nearly a half when the rock was placed on them, in some cases more than that.

By the court: That was at sea, in the ocean?

322 A. In the ocean, I cant say whether that was all due to the added weight of the stone, or part due to the action of the sea and storms displaced some of the brush, I think probably the displacement of some of the brush had something to do with that.

By the Court: How about the training walls in the river in fresh water?

A. The settlement?

By the Court: Yes?

A. I think in the river, in the Savannah Harbor, the amount of height gained for each course of mat would average a little less than a foot in the finished work, it varies in different places, in some places it would be considerably less, in other places it might possibly be a foot, but in no instance, have they gained more than a foot in height from the brush mattresses put in the work, executed under that contract. In the first design mat the average gain is 2 and a half feet, that is the result of experience in constructing a log mattress, or spur dams of log mattresses.

By the Court: Under former contracts, I would like to ask how training walls built of mattresses retained their height and where additional brush had to be placed in order to retain the heighths.

A. In some instances additional brush had to be placed on them, and in some cases additional mats had to be placed on them in order to bring them up to the top.

By the Court: I would like to ask, where they have been made, if they have been made of tightly choked fascines, would renewals have to be made in the river where there is no teredo?

A. In some instances probably there might be but not in such extent as they did occur. In some instances where the water was deep a possible addition would have to be made if the work was made of tightly bound fascines. In shallow water I dont think they would have to be made where constructed according to the specifications.

By the Court: When you speak of shallow water, what do you mean?

A. 3 to 7 feet.

323 By the court: Then is not it a sound conclusion that the mattresses made of properly choked and compact fascines make a more serviceable and durable training wall than bundles of brush like those on exhibition here?

A. Decidedly better work and cheaper work, provided the cost of brush be at the same price as the cost of fascines, then the fascine is much better, I do make this point, if these mattresses were paid for at their proper cost, allowing a reasonable profit to the contractor, then I believe those dams would have been cheaper than if constructed as fascines because you have so many more yards for the same price, but price for price, the fascines were at least half as cheap as the other. It would cost at least half as much to build a dam. I mean both mats being paid for at the same price per square yard.

By the Court: Under the contract of 1896, the money paid for the fascines of the character that were put in the training wall, if I understand it correctly, a much more durable training wall could have been obtained and one that would have cost less for maintainance?

A. Yes, sir, that's right, that's my understanding of it.

By the Court: The specifications require that the contractor shall be present on the works, or be represented, or have a responsible representative, who was that responsible representative under the contract of 1896 in the improvement of Savannah Harbor?

A. Edward H. Gaynor was the superintendent in charge of the work.

By the Court: Was his attention, of your knowledge, ever called to the deviation of the mattresses from the quality required by the specifications?

A. I think it was, repeatedly.

By the Court: Do you clearly recollect any time?

A. Yes, sir, I think I do several times.

By the court: What did he do.

324 A. He would always present the argument, that is usually present an argument in favor of brush in preference to fascines. He would always say he thought they would silt up and do better work. Of course, as I said, that is true, if the proper price, is applied. At the same time, he would make an argument for those fascines—those bundles to be sub-

stituted for fascines, that is usually the answer given, or something similar to that.

By the court: You have stated, you clearly understood the requirements of the specifications?

A. I think I do.

By the court: Did you ever, as an inspector, or as assistant engineer, charged with the details of construction of those training walls make a demand upon that responsible representative of the contractor who was there present that he put in those walls mattresses of the quality required by the contract?

A. I dont think I did.

By the court: Why not?

A. Because I realized that that demand should be made through Captain Carter. Captain Carter was in charge and I was obeying orders. Those mats I saw built were built, as I understand it to Captain Carters satisfaction. For me to require the contractor to put in something better than I was instructed to do would be going beyond my orders, I was to obey orders, not to say what was to be done.

By the Court: You have testified when you first entered the service under the contract of '96 you were shown a mattress and told that that mattress was the character of mattress that was to be accepted in the work under that contract. Who showed you that mattress, and who told you that?

A. Captain Carter was present when the mat was being sunk, and told me that that was the character of the work that he wanted done.

Judge-Advocate: I think you rather mis-state the evidence, it was in 1893 he received those instructions and not in 1896.

325 A. '93, as I understand it.

By the court: I understood it was '96.

Judge-Advocate: No, it was '93.

By the court: How high was this mattress construction carried in the breakwater?

A. Only three courses, some I think 4 feet, and some few 5 and a half, probably a general average of a little less than 5 feet in height for the brush mattresses.

By the court: In your experience as an engineer, on the South Atlantic coast, do you know of any objection to carrying the mattresses as high as that in sea water.

A. Decidedly.

By the court: What is it.

A. Because they would be eaten up by the worms, by the teredo, if this brush mattress were not covered up the worms will eat it up and go into them and honeycomb them and they will become simply hollow sticks with no substance and gradually sink down so there would be nothing to stand.

By the court: Do you know how long unprotected it would last in this quarter of the South Atlantic Coast, unprotected or not covered with yellow metal or creosote.

A. If unprotected it would not stand a year, if it has to stand a strain, if it is not under any strain it will last longer, but if it is under any strain it will not stand any time.

By the court: Do you know how many lineal feet of the breakwater has been constructed in sea water of mattresses of three courses here on the Savannah Harbor?

A. On the Savannah Harbor, breakwater, there has been 7000 linear feet.

By the court: Has any recent survey been made of that breakwater?

A. To take a profile or section? I made a survey of the breakwater October 7, 1897, taking a cross section about every 100 or 125 feet from one end to the other, a detailed survey made by means of two transit men and a little steam boat in the usual manner of making hydrographic surveys.

By the court: Could you determine from that survey the top surface of the brush work at that time?

A. Those notes have been worked up in the office, the profile is a record showing the average height of the top of the breakwater at that date, October 7, 1897.

By the court: Did that show the top surface of the brush construction? under the stone?

A. Well, I could not say that those soundings did, of course, you could not tell whether the lead struck brush or whether it struck stone. It determined the average of the breakwater according to that survey, of course, parts may have been due to the stone and part to the brush. I could estimate closely probably what the destruction had been, I could not tell what the destruction by the teredo had been, I could tell how much of the jetty was there. How it was destroyed, whether by teredo or storm I could not tell without going down in a diving suit and making a minute examination, and that has not been done.

By the Court: Did you make a record of the profile of the jetty as it was constructed, a cross section or cross profile?

A. It is on file in the office, it is of the construction, a profile or plan.

By the Court: Was additional stone placed on it after that survey was made, or before another survey was made?

A. Do you mean the survey of October 7, or the original survey.

By the Court: I mean after the jetty was first constructed, you took a cross profile or cross section of it, I understood you to say?

A. Yes, after the entire work was done, the cross profiles were taken.

By the court: How long was that after the brush had been put in place?

A. The last brush was put in in September of this 327 year, and the survey was made in October, one month after the brush was in place, and there were two barges of stone placed on the dam after my survey at the upper end of the wall.

By the court: Now, on that part of the breakwater, where no additional stone was put?

A. I will state that I had made a report of the survey, I made in the case, giving the average height gained in the breakwater for each individual mat, each of the 125 mats. That report is on file in the Engineer's office, and, as I remember, the average height gained for each mat is less than 2 feet.

By the court: You don't quite understand what I want. I want to know after the breakwater was constructed, down past the brush mattresses three courses high, soon after its construction, if a survey was made of that breakwater showing correctly its profile, its cross section?

A. Yes, sir, that is the survey I refer to, made October 7, 1897, one month after the breakwater was constructed.

By the court: Well, were any other surveys made of breakwaters built earlier than that in former years, built in that way of brush mattresses three courses high.

A. Not in this department. There is a survey made of the work at Cumberland Sound, made in the same manner I made mine, and made after construction, those profiles are on record in the office.

By the court: Now, was another survey made after that at sufficient interval to test the endorance of this mattress structure three courses high?

A. There has been no survey made since October, that is the last survey made.

By the court: October 1897?

A. '97, yes, sir, there has been no survey made since then, but in the river in the previous work there have been surveys made from time to time to show about how much we have gained for each course on the dam, showing how much settlement has taken place. I stated that before, from the best I could, from what I remembered, that the brush mattresses had gained about a foot in height in the works, that is all in the harbor, and the mattresses in the breakwater gained less than that, probably 8 or 9 inches per course of brush mat, and that the log mat increase the height 2 and a half feet, that is the result of my experience 13 years on the harbor.

329 At this point, 12.50 o'clock p. m., W. O. Tarver commenced to report the testimony.

Q. (By the Court) Did you note the depth of the water on top of each mat, and record it, directly after the mat was placed and the stone was placed upon it?

A. I or the Inspector. During the construction of the breakwater a part of the time I was personally in charge; that is, personally supervising the sinking of the mats, but during the greater part of the time, I had an Inspector supervising the sinking of the mats, and I only came about occasionally, but either I or the inspector took soundings on the mats immediately after they were sunk or as soon thereafter as the weather would permit. Sometimes the weather was rough, and we could not take them immediately, but they were taken sometime shortly after the sinking of the mats.

Re-cross-Examination by Mr. Charlton.

Q. What is the character of the bottom of the Savannah River?

A. It has a great many different styles, depending upon the location.

Q. Well, the general character of it; is it mud or sand?

A. In the channel it is in most cases sand, and intermixed with mud and clay and all kinds of bottom.

Q. At the points where the mattresses were put down, what is the general characteristic of that part of the river?

Q. Do you mean all along the harbor?

Q. Yes?

A. In most cases, I think say from Savannah down to Ft. Pulaski, or in that neighborhood, or say to Venus point, it is mainly of mud, and in the locations where the jetties were placed, it is quite soft. A pole in a case of that kind could readily be shoved into the mud four or five feet.

Q. Now, where the Breakwater is, what is its character?

330 A. Very hard sand.

Q. Have you ever happened to observe how far the Savannah River water goes out to sea?

A. I could not answer that in full; I know it goes out quite a good way; I don't know how far.

Q. It does, as a matter of fact, go beyond Tybee frequently?

A. Oh, yes, sir.

Q. Now, in your investigation as to the difference in the heights of these mats as put down, when you did investigate them, are you able to state to this Court how much diminution of height is due to compression and how much to subsidence?

A. You mean how much is due to settlement in the bottom?

Q. Yes, in the bottom?

A. I cannot. I drew a comparison between a log mat and a brush mat, both under the same conditions and sunk in the same place, and therefore the comparison is fair. They would both do to go on a soft bottom—

Q. Now, I would like to ask you the question again; how much of the diminution of the height referred to is due to compression and how much to subsidence?

A. I do not know.

Re-direct Examination by the Judge-Advocate.

Q. If there was compression there must have been subsidence?

A. Not necessarily, if the mats were sunk on a very hard sandy bottom; there would be no sinking into the sand. Then any diminution in the height as determined by surveys would be absolutely settlement. It would be fair to say absolutely settlement if it was very hard sand.

Witness: I would like to ask the Court if I will be given permission to look over my testimony. I make this request,

because it may be misunderstood, and I do not wish it
331 to go on the record until I have seen it.

The Court: You cannot look over it in private, but it can be read to you here.

Witness: Some of my statements might have been misunderstood; in fact questions have been asked me by Counsel which showed that they misunderstood statements I made.

Mr. Charlton: If you will call my attention to any of those questions, I will ask them again.

The Witness: That was the question in regard to the second design mats.

Mr. Charlton: I asked you several about that; which one do you desire to correct?

Witness: I don't know that I wish to correct any of them, but from your questions, you didn't seem to understand me.

Mr. Charlton: He does not want to correct his own testimony, but apparently my questions; I don't want to correct my questions.

Judge-Advocate: I think the request of the witness is fair; he wants to see how the questions and answers would be considered together.

The Court: He has the right to have his testimony read.

(The Judge-Advocate read to the witness his testimony of yesterday, Jan'y 20th, relating to mats of the second design, and the witness made no corrections)

Judge-Advocate: (Addressing witness) Do you desire any more of your testimony read? or do you desire to make any corrections in that?

Witness: No, sir; I think that is all right.

Judge-Advocate: If you desire to have all of your testimony read, we will do so.

Witness: I do not know of any specific cases I wish to correct. I made the request thinking possibly some error might creep in, but I could not ask the Court to read it all over.

Judge-Advocate: I am perfectly willing to do so. It 332 has up to this trial been usual in the proceedings of a court-martial to do so.

The Court: (Addressing witness) You have the right to make the demand.

Witness: I do not wish to take up so much time of the Court that might be useless; but a question might have been asked me, and I might have misunderstood it, and have made an answer that would in future, lead to a serious error.

The Court: Do you wish to have the testimony read?

Witness: I think it would be safer as regards errors; but I do not wish to take up so much time of the Court in that way.

The Court: The testimony will be read.

(Here the Judge-Advocate read to the witness in the presence of the Court all of his testimony, given on Jan'y 20, except a small portion of it, which was omitted on account of the hour for adjournment having arrived, and asked—)

Q. Does the witness wish the remainder of his testimony read tomorrow morning?

A. (By witness) I think that will probably be all right tomorrow morning. So far it has been very satisfactory, and I think probably we might dispense with the reading of the balance of it.

Judge-Advocate: I move that we adjourn until tomorrow morning at ten o'clock.

Member of the Court: I move that we adjourn until tomorrow morning at nine o'clock.

Another Member of the Court: Will you be ready at ten o'clock?

Judge-Advocate: Yes, sir.

First Member: I object.

The Court: The motion before the Court is to adjourn until tomorrow morning at nine o'clock, and we will take a rising vote.

Motion to adjourn to meet at 9 o'clock was lost, and the motion to adjourn to meet at ten o'clock was carried.

The President: The Court stands adjourned until tomorrow morning at ten o'clock, A. M. (Court adjourned at 3 o'clock, P. M.)

THOMAS F. BARRY,
Col. & Asst Judge Adv. Genl.
Judge Advocate.

333

United States Court Room,
Savannah, Ga.,
January 22nd, 1898.

The Court met pursuant to its adjournment of yesterday at 10.00 o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his Counsel and the reporter, W. O. Tarver, were also present.

President: The Court will come to order.

Capt. Taylor: (A member of the Court) As I have certain duties for the performance of which I must make preparation in advance, as I am not able to perform them, I desire to make a motion now that, when this Court adjourns on a week from today, Saturday the 29th, it adjourn to meet on Tuesday, February 1st, at 10.00 o'clock. I make this motion now simply in order that I can, if it is not the pleasure of the Court to grant the motion, make arrangements to have those duties performed,—so that I can communicate with the Ordinance Officers in Washington, and make arrangements to have them performed.

The President: You have all heard the motion: all in favor of it say Aye; all opposed—No.

(The motion was unanimously voted down by the members of the Court.)

A. S. COOPER, a witness for the prosecution, recalled:

Judge-Advocate: This witness has desired a further reading of the testimony which he gave, but the record has not yet been made up. There was such an amount of it yesterday that the reporters have not been able to complete the record, but we can recall him at another time to complete that.

Witness: In thinking over the testimony, I remember two instances where inaccurate statements had been made, 334 and it is possible there might be others also, and possibly it might be best to read it all.

Q. (By the Court) I would like to ask you a question. Your work here was confined to the Savannah River and Harbor, wasn't it?

A. Not entirely; I was in charge at Cumberland Sound.

Q. (By the Court) For what length of time?

A. For nearly a year,—in 1887.

Q. (By the Court) Upon what portion of the River was the work under the contract of 1896?

A. It was mainly on the Breakwater, and that is one point where I made a mis-statement yesterday. There was some work done on what is known as Dam 31, which goes from the old quarantine station to Turtle Island. I should have stated that.

Q. (By the Court) The majority of the work was done on the Breakwater?

A. On the Breakwater. There were also five mattresses sunk on the Cockspur Island training wall at the outer end.

Q. (By the Court) What is the length of that Breakwater?

A. 7,000 feet.

Q. (By the Court) What is the width of the jetty at the base?

A. The Breakwater has an average of 100 feet throughout.

Q. (By the Court) The width?

A. The width.

Q. (By the Court) What work did you supervise in Cumberland Sound under the contract of 1896?

A. That was not the contract of 1896; that was the contract of 1887.

Q. (By the Court) You didn't supervise any, then?

A. No, sir; not under the 1896 contract that was by Marion Twiggs, the engineer from Augusta.

Q. (By the Court) In 1893, when Capt. Carter first took charge of the work, you stated that he was under the supervision of Gen. Gilmore.

335 A. In 1893? No, I think not.

Q. (By the Court) No; when you first came here thirteen years ago?

A. When I first came he was directly under Capt. Bailey's orders and indirectly under Gen. Gilmore's, and later, very shortly, he was given charge of the Savannah District under Gen. Gilmore's orders.

Q. (By the Court) Where was Gen'l Gilmore stationed at that time?

A. At New York.

Q. (By the Court) Did he visit Savannah during that period?

A. I remember distinctly about two visits he made to Savannah; there might have been more, but that is all I know of.

Q. (By the Court) Did you note his presence on the work at any time?

A. I don't think he came directly on the works where the mats were being sunk. He came down the river on a small steam-boat, but I don't think he saw any mats sunk, and at this time, the mats were all of the first design; that is, log mats.

Q. (By the Court) I don't recall whether you testified to that or not, but were not these so-called bundles of brush built whilst Gen. Gilmore was in charge, and sunk into the training walls?

A. I would like to be informed of the date.

Q. (By the Court) Any date that occurs to you mind while Gen. Gilmore was in charge?

A. In order to answer that question, I would like to know the date Gen. Gilmore was relieved of charge?

Q. (By the Court) For instance, in the summer of 1888.—were any bundles of brush used before that time?

A. Some bundles of brush were used prior to 1888.

Q. (By the Court) Were the bundles of brush used when Gen. Gilmore was in charge similar to those used under Capt. Carter?

A. Similar; but I think they were a trifle better; there was not any great difference in them.

Q. (By the Court) Kindly describe the difference if there was any?

A. I think during those times the bundles were a trifle better packed and a trifle better trimmed. As I said, I don't think there was any marked difference between them; the difference was not striking.

Q. (By the Court) I would like to ask where Gen. Gilmore had his office at that time?

A. That was in New York City, as I remember it.

Q. (By the Court) Did he come here often?

A. I don't remember but two visits from Gen. Gilmore, but I think quite likely there may have been more, because I was on the river most all of the time, and he could have come to Savannah, and I not have known it.

Q. (By the Court) Do you know what Gen. Gilmore's physical condition was at that time?

A. I think he was quite infirm, and not capable of going about like a younger officer would on the works.

Q. (By the Court) To your knowledge, did he ever see one of the bundles of brush used on the work?

A. I don't think he did.

Q. (By the Court) To your knowledge, did he?

A. He never saw them to my knowledge; I cannot say that he did not see them.

Q. (By the Court) Who was the contractor at that time?

A. I think it was under the firm name of Greene & Gaynor.

Q. (By the Judge-Advocate) Were the specifications contained in that contract under which the work was being done exactly of the same character as those of the contract existing now and under which the work is now done?

Mr. Charlton, of Counsel for Defense: We make the point that the specifications, as a matter of course, are in writing, and are, therefore, the best evidence; otherwise, we would have to rely upon the memory of this witness for many years to express what is already in writing and in the possession of the Court.

The President: The Court is not now strictly bound by the rules of evidence, and the witness may answer the 337 question. The Court adopts the question.

A. According to my recollection, the specifications were similar, but I don't think they were exactly the same, and the exact difference I do not believe I will be able to state.

Q. (By the Court) I would like to ask you if the specifications of the contract under which the mattress was made, which you stated that Capt Carter showed you in 1893, and which he instructed you to be guided by,—I would like to know if the specifications of the contract under which that mattress was made were the same as the specifications of the contract of 1896?

A. According to my understanding and recollection, they were almost exactly the same; there was some minor difference like using riprap stone or riprap, but that was substituted with four classes of stone.

Q. (By the Court) But in regard to the construction of the mattresses and fascines?

A. In regard to the construction of the mattresses and fascines I think it is identical.

Q. (By the Court) Who first saw that mattress that Capt. Carter said should be your guide, you or he?

A. We were both present when it was being built; Capt. Carter was on the lighter for an hour or so with me while a certain section of the mattress was being built.

Q. (By the Court) Did he inspect it thoroughly?

A. Yes sir. This was not only a standard, but I was also told that the work was going on as Capt. Carter wished it, and, when I was sent down the river, I was told to look over the work and see how it was being constructed, so I would be thoroughly familiar with the work.

Q. (By the Court) Capt. Carter issued a little book of regulations?

A. Yes, sir.

Q. (By the Court) Prescribing that the Inspectors should hold the contractors strictly to the specifications?
338 A. No, sir; excuse me, but I don't think that expression is used in the book.

The Court: I would like that paragraph read.

Judge-Advocate: It was paragraph, I think, No. 96, "He must thoroughly comprehend the specifications and his general instructions".

Mr. Charlton: There is still another one, No. 102.

Judge-Advocate: (reading) "102. Mattresses and stone
"will be measured immediately before they are placed in
"the work. Mattresses will first be carefully examined, and
"the inspector must satisfy himself that they are construct-
"ed in accordance with the contract before he accepts them
"for measurement. He will measure the length in at least
"two places, and the width in at least three; the product of
"the means of these two dimensions, after they are correct-
"ed for error of tape, will be reduced to square yards. The
"original measurements will be taken to the nearest tenth
"of a foot. The square yards of mat and cubic yards of stone
"will be expressed in the nearest one-hundredth. When not
"otherwise engaged, the inspector will, by personal observa-
"tion, keep himself fully posted concerning the character of
"the ballast being piled on barges by the contractor. Be-
"fore measuring a barge-load of ballast, the inspector will
"inform himself as far as practicable with regard to the qual-
"ity and general character of the material. Should he con-
"sider that ten per cent. of any load does not come up to the
"requirements of the contract, he will reject the whole load
"and not measure it. In measuring stones or shells, the

“length will be taken in three places, the width in five, and
“the height at the fifteen intersecting points. The mean of
“each set will be taken for the average length, width, and
“height, and the correction of the tape-line or chain used will
“then be applied to these means. The corrected means will
“be used to compute the cubic yards. When stone is received
“by weight, the displacement will be determined in ac-
339 “cordance with special instructions. The weight of a
“cubic foot of fresh water will be assumed as 62.5
“pounds, and of salt water as 64 pounds. The place, date, and
“time of day when a mattress or barge of loading material
“is measured will be recorded, together with a clear state-
“ment of the original (not copied) measurement notes, and
“the final results. There will afterwards be added the neces-
“sary notes showing when and where the material was de-
“posited in the work.”

Mr. Charlton: Will you also read 105.

Judge-Advocate: (reading) “In case of minor defects
“in mattresses, loss of logs in sinking vacant spaces between
“mattresses, variations in alignment, piles of dirt in barge-
“loads of stone or shell, stone of inferior quality or under-
“size, etc., the inspector will make a fair estimate, and re-
“port the amount in each case which is not up to the re-
“quirements of the contract, and submit his recommenda-
“tions as to reductions or allowances to be made.”

Judge-Advocate: That comes under the duties of the in-
specter.

Q. (By the Court) When did you first receive that vol-
ume containing those paragraphs which have just been read?

A. I haven't any accurate memory of that. I think it was
handed to me by the clerk in the office sometime about three
months after I arrived in Savannah the last time.

Q. (By the Court) What year was that?

A. 1893,—that is my recollection.

Q. (By the Court) Did Capt. Carter see that mattress,
and direct you to be guided by it before or after the receipt
by you of those regulations?

A. Before the receipt of those regulations.

Q. (By the Court) Did he ever inspect your work after
issuing these regulations and satisfy himself whether or
not you were exacting the construction of the mattresses in
accordance with them?

A. Capt. Carter visited the works very often, some-
340 times three times a week; he came on the barges, and
saw the entire work, and knew how it was going on.

Q. (By the Court) What character of mattresses did he
see at those visits?

A. The same as I have described.

Q. (By the Court) In what did they differ from the mat-
tresses required by the specifications?

A. In that the fascines were not fascines; they were bun-
dles of brush, as described before, and there was very seldom
the proper number of grillage poles between the fascines.
That was the main difference between those mats that went
into place and the mats required by the specifications.

Q. (By the Court) What is the purpose of building a
training wall?

A. The purpose of building a training wall is to guide
the ebb flow so as to confine it in certain places, to either
maintain or scour out a channel, and in Savannah Harbor,
the aim has also been to construct them of such heights that
they would not keep out the flood tide, and not change the
tidal range of the Harbor.

Q. (By the Court) Then, is the efficiency of a training
wall dependent upon its height if it is properly constructed?

A. Yes, sir.

Q. (By the Court) Then, after the requisite depth has
been attained, is the maintenance of that depth dependent
upon maintaining a certain height of training walls?

A. I think so. In Savannah Harbor, after the construction
of the training walls, the channel did not scour out as it was
expected to. Then the channel was dredged. That was esti-
mated in the original estimate, and it was found that the
dredging had to be done after the work had been completed
for a year and a half or two years; and so far, it has main-
tained the channel over all the shallows with one exception.

Q. (By the Court) Which training wall would best main-
tain its height without additional or further material, one
341 built of mattresses of bundles of brush like these or one
built of mattresses containing fascines like those required
by the specifications?

A. One built of the fascines required by the specifications
would undoubtedly retain its height better and longer, be-
cause a bundle of brush has a great many small twigs, and
these small twigs will disintegrate and fall off and there will
be nothing left but the poles, and, in the original bundle, the

poles don't occupy the full size of the bundle and the space occupied by the twiggs has gone and he has lost it.

Q. (By the Court) Now, considering the relative cost, if you were going to improve a stream by building training walls in the most efficacious and most economical way, would you construct those training walls of mattresses of bundles of brush or of mattresses of fascines?

A. It would depend upon the character of the River?

Q. (By the Court) In the Savannah River?

A. I believe I would build them of bundles of brush, but I would put brush in my specifications, and ask for bids on them.

Q. (By the Court) Why?

A. Because bundles of brush are much cheaper.

Q. (By the Court) Would training walls built in that manner accomplish the same purpose?

A. Yes; for less money.

Q. (By the Court) If you could get training walls built of these bundles of brush and one built of fascines for the same money, which would you take?

A. I would decidedly take the fascines; there can be no doubt of that.

Q. (By the Court) Why?

A. Because the bundles of brush will shrink,—shrink down to a half or one-third of what they were originally, and the fascines, being all solid poles, or small branches,—not small branches, but straight poles left, will not settle, and they will not disintegrate, and, under the water, they will be almost indestructible if they are put in where they will not be destroyed by the teredo

342 Judge-Advocate: This is the contract, may it please the Court, to which he referred. Does the Court desire to have it submitted to the witness?

The Court: Yes, sir.

Judge-Advocate: (Handing witness paper) Will you look it over.

The Court: The witness will state what those papers are

Witness: Contract between John F. Gaynor and the United States Government for doing work on Savannah Harbor.

Q. (By the Court) Do those papers contain a bid?

A. I did not notice that; I think they do.

Q. (By the Court) Look at that again, and that fully what those papers are?

A. This paper is a proposal, or bid, signed by John F. Gaynor, to do certain work in Savannah Harbor, and the next paper is a guarante signed by two witnesses and Jacob Paulson and B. D. Greene, and to them is attached a copy of the specifications and also a copy of the general instructions to bidders.

Q. (By the Court) What is the date of those specifications?

A. Dated Army Building, New York, November 29th, 1886.

Q. (By the Court) By whom are the specifications signed?

A. They are not signed.

Q. (By the Court) In blank, are they?

A. I beg pardon; they are signed by Q. A. Gilmore.

Q. (By the Court) What follows?

A. Then follows the general instructions to bidders, not signed at all.

Q. (By the Court) You say you have the contract there?

A. I never saw this paper before.

Q. (By the Court) Let me look at that paper one moment?

A. (Witness handed the President the paper.

The Court: Here (referring to copy of specifications attached to the papers in question) is the best evidence of the contents of the specifications of the former contract to which you refer. Will you (addressing Judge-Advocate) read 343 to the Court what that specification contains. The question arose upon the difference in the specifications under the former contract and the contract of 1896, and it was objected to because the witness could not give evidence of that fact.

Judge-Advocate: I presume it is not desired that I should read that which refers to location and general description of the work.

The Court: No.

Judge-Advocate: As to the construction of the dams referred to, (reading) "The dams will consist of brush made "into fascines and loaded with stone. The fascines may, at "the option of the engineer-in-charge, be laid one at a time "or in mats, except where the water is over four feet deep, "when they must be made into mats. When laid in shoal "water, or when required by the Engineer-in-charge, the fascines will be fastened by stakes. There shall be, when

“stakes are used, at least two stakes for each fascine, or for each foot in length of mat. These stakes shall be at least five feet long for bottom layers and six feet long for the upper layers, should any be laid, and they must be driven until their heads are level with the brush”

Q. (By Judge-Advocate) (Handing witness paper) Is that the one you saw just now?

A. No; I think not.

Q. (By Judge-Advocate) Be sure; look it over and see?

A. That is not the one I had.

Q. (By Mr. Blair) This is the one (witness handed another paper)?

A. This is the paper I identified.

Judge-Advocate: This (proposal for improving Savannah River, Ga., dated Savannah, Ga., Dec. 24th, 1886, in reply to advertisement for proposals, dated New York, Nov. 29th, 1886) relates to a different improvement from the one in regard to which he testified. The wrong paper was brought into Court, and submitted to me. The paper which has since

been handed to me is this (Proposal of Sept. 21st, 1886, 344 of John F. Gaynor, for Improvement of Harbor at Savannah, Ga., in reply to advertisement for proposals dated New York, September 11th, 1886) one (handing the President the paper).

The Court: Let the witness identify the paper.

(Judge-Advocate handed witness the paper)

Witness: This paper is proposal for work in Savannah Harbor, signed by John F. Gaynor.

Q. (By the Court) What is its date?

A. September 21st, 1886.

Q. (By the Court) Savannah Harbor?

A. I will give you the correct title: Improving Harbor at Savannah is the proper designation in the contract.

Q. (By the Court) What is the date of the specifications there?

A. September 11th, 1886. The proposal is dated September 21st, 1886, and that is followed by the guarantee of two guarantors, Edward Gaynor and Myron Bangs, and that is followed by General Instructions to Bidders, and that by the printed specifications signed by Q. A. Gilmore.

The Court: (Addressing the Judge-Advocate) Read the specifications

The Judge-Advocate: (reading) “Under these specifications it is the intention to continue the construction of

“dams, wing dams and training walls, at such points as the
“Engineer in charge shall designate, between the upper limit
“of the City of Savannah and Tybee Roads, and the work
“will consist essentially in building up said dams, wing-dams
“and training walls with successive courses composed of log
“and brush mattresses, overlaid with riprap stone and in
“putting stone alone upon the works wherever required. Ad-
“ditional mattresses and stone will be used in repairing
“and raising the cross-tides dam under these specifications,
“if the Engineer in charge shall so direct. The mattress
“is simply a raft of round logs, not less than 12 inches in
“average diameter, and not less than 9 inches in diameter at
“the small end, placed in close contact, side by side, at right
“angles to the line of the wall or dam, and firmly held
345 “by transverse binders spiked or bolted to them.

“The binders will be smaller logs or poles, not less
“than 5 inches in diameter at the small end, and placed not
“more than 8 feet apart, and those on the outside will be
“close to the ends of the logs.

“The spaces between the binders will be closely filled up
“with compact bundles of brush, placed parallel to the logs
“of the mattress, to such a depth as to give a thickness of
“not less than 6 inches when compacted in the finished work,
“secured in place by pole binders, in such a manner as the
“Engineer in charge shall approve. At the option of the
“Engineer in charge there will be placed upon the raft of
“logs, instead of the bundles of brush above described, a
“layer of live wood brush sufficient to give 5 inches in thick-
“ness in the finished work, secured in place by poles lashed
“to the binders of the raft.

“The logs and binders used may be of loblolly or other
“cheap variety of pine, and must be of gentle taper and
“sufficiently straight, and the brush will be live hard-wood
“brush. Logs will not be used that do fit close enough to-
“gether to hold the stone safely, even without the aid of
“brush.

“The mattresses will be laid in sections of convenient
“length in juxtaposition, or with such laps as the engineer
“in charge shall direct, and each section will be made of the
“full width of the mattress course, as fixed by the Engineer
“in charge during the progress of the work.

“This width may vary from 10 feet to 100 feet.

“Gaps between the edges of adjacent sections of mattresses

“will be filled with stone by the contractor, to be paid for at a price equal to the price of the mattress work.

“The stone will be sound, dense, of compact form, and of suitably random sizes, varying in weight from 15 to 400 pounds. When received by weight, twenty-eight hundred

“(2,800) pounds will be required to the cubic yard; when received by measurement, the stones will be fairly piled

346 “upon scows or lighters. Loads of stone submitted for

“measurement that contain any appreciable quantity of defective stone, or that are loosely or not fairly loaded, or so loaded that they cannot be accurately measured, will not be accepted.

“The general depth of stone covering the mattress will be from six inches to one foot, at the option of the engineer in charge, to be distributed as said Engineer shall direct, but the right is reserved to place additional stone at points on any of the works, where, in the opinion of the said Engineer, it is considered to be necessary, and such stone when used above mean-low water shall, at the option of said Engineer, be either placed in position or thrown on rip-rap.”

The Court: Is there any other design described there?
Judge-Advocate: No other design described.

Mr. Blair (of Counsel for defense:) With permission of the Court, I would like to read the specifications of this second contract with General Gilmore, which was the first one identified by the witness, and is dated November 29th, 1886, because it contains a description of brush fascines.

The Court: That, you say, is a second contract?

Mr. Blair: This is the one first offered to the witness, and first identified, and is the second contract, but relates to improving Savannah River, Georgia,—the improvement of the Savannah River below Augusta, Georgia.

The Court: You have the guarantee and specifications?

Mr. Blair: I have the specifications, and I desire to read to the Court from these specifications General Gilmore's description of a brush fascine.

Judge-Advocate: This is a matter which this witness, I understand, knows nothing whatever about. If the witness referred to the contract entered into under this bid, I should interpose no objection.

The Court: I want to know the date of the proposal last identified.

Judge-Advocate: September 21st, 1886.

The Court: What is the date of that other proposal?

Judge-Advocate: December 24th, 1886.

The Court: You say he knows nothing about that other contract?

Judge-Advocate: I so understand; he may be asked by the Court.

Q. (By the Court:) The first proposal and specifications are the ones you identified here?

A. I will state that I never saw the contracts, or any of them, but the specifications of the last one (specifications of September 11th, 1886, on which was based proposal of September 21st, 1886) I identified. I had something to do with; the specifications of the first one I identified (specifications of November 29th, 1886, on which was based proposal of December 24th, 1886,) I had nothing to do with.

The Court: Very well, read it, Mr. Blair. The Judge-Advocate will have no objections, I presume.

Judge-Advocate: I have no objection.

Mr. Blair: (reading) "Fascines shall be made of live
"brush, well trimmed and closely choked, fifteen (15) feet
"long and from twelve (12) to fifteen (15) inches in diameter
"at the butt, and tied with four (4) bands of wire or tarred
"rope, the bands to be placed as the Engineer in charge shall
"approve. When made into mats they will be closely packed
"and secured by at least three (3) pairs of binding poles,
"joined by ties of wire or tarred rope, not more than two
"feet apart. The form of the fascines will be slightly
"tapering, and when made into mats the butts will be side by
"side.

"Mats must be from twelve (12) to fifteen (15) inches
348 "thick at the butt-ends of the fascines, and not less than
"fifteen (15) feet wide

"Bids will be decided on the basis of one (1) cubic yard
"of stone to one (1) cubic yard of brush fascines."

Judge-Advocate: I would like to have the witness asked if the specifications which refer to bundles of brush is the one to which he had any relation under the contract.

The Court: The Court adopts the question.

A. The contract just read in regard to Savannah harbor?

Q. (By the Court:) The specifications?

A. The specifications just read in regard to Savannah harbor?

Q. (By the Court:) Read by Mr. Blair.

A. No; by Col. Barr.

Q. (By the Court:) The specifications first read.

A. Those first read, as I understand it, had reference to Savannah harbor. In that was specified the log mats, or as in later contracts they were called the first design, and also some fascines to be placed in places on the harbor where Jet-ties had settled, to bring them up to the proper height: Is that the question the Court wishes

Q. (By the Court:) No, sir, it is not. The stenographer will please read the question.

Stenographer: (Reading question) "I would like to have the witness asked if the specifications which refer to bundles of brush is the one to which he had any relation under the contract?"

A. I had nothing to do with that contract.

Q. (By the Court:) I would like to be informed if the specifications which Mr. Blair just read are a part of the contract which was made by General Gilmore?

Judge-Advocate: In the matter over which the witness was placed?

The Court: When I find out when the contract was made, then I want to ask if the witness had anything to do with it— the specifications.

Judge-Advocate: These specifications which were read by Mr. Blair?

The President: Some of the members of the Court are not satisfied with the last answer given by the witness.

Judge-Advocate: I will frame the Interrogatories somewhat differently so that perhaps he may understand it more fully.

Q. (framed by the Judge-Advocate, and adopted by the Court:) The specifications read by Mr. Blair refer to Savannah River below Augusta, and specify fascines; had you anything to do with that contract?

A. I had nothing to do with that contract.

Q. (By the Court:) The specifications read by the Judge-Advocate refer to logs with bundles of brush; had you anything to do with that?

A. I did.

Judge-Advocate: That is all I shall want of this witness upon this branch of the case. He will be recalled on new matter at a subsequent stage.

PAUL E. TWIGGS, a witness called for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Paul E Twiggs.

Q. What is your business?

A. United States Inspector, Savannah harbor.

350 Q. How long have you been in the service of the Government?

A. Between six and seven years.

Q. Engaged all of that time upon river and harbor improvements?

A. Yes, sir; not all of that time in Savannah Harbor, though.

Q? But upon river and harbor improvements?

A. Yes, sir.

Q. What has been the nature of the duties performed by you?

A. Inspector of jetty work and dredging, and mattresses, during the time I staid with the Government.

Q. When did you first enter the service of the Government?

A. I do not remember. It has been about six or seven years ago; between six and seven. I cannot remember with accuracy the year or the month.

Q. Under what officer were you employed?

A. First under Capt. Bixby, now Maj. Bixby, who was afterwards relieved by Major Stanton; I was a short time under Maj. Stanton in charge of the work.

Q. Under whom did you next serve?

A. Capt. Carter.

Q. Where?

A. Savannah Harbor.

Q. What were the nature of your duties?

A. I was first put on the dredges.

Q. How long did you remain there?

A. Probably two months at that time; it may have been longer and may not have been that long.

Q. Then to what duty were you assigned?

A. I was given charge of the jetty work at the Lower Flats training wall, Savannah.

351 Q. Given charge in what capacity?

A. Inspector.

Q. When was that?

A. I don't remember whether I came over here in 1892 or 1893; it was during the contract of 1892.

Q. Who was the Assistant Engineer in charge?

A. There was no Assistant Engineer in charge over me at that time; Capt. Carter had entire charge of the work on the river.

Q. You received your instructions, then, from Capt. Carter?

A. From Capt. Carter.

Q. That is the accused officer here?

A. Yes, sir.

Q. What instructions did you receive?

A. What have you reference to?

Q. In relation to the character of the materials to be passed upon by you?

A. When I took charge of the Jetty work?

Q. As Inspector?

A. Capt. Carter instructed me just after coming down on the works that the fascines were not to be military fascines, and that he did not wish the contractor pressed.

Q. Did Capt. Carter visit the works while you were inspector?

A. Frequently.

Q. How often?

A. From two to three times a week.

Q. Did he see, on those occasions, the character of the mattresses which were being used?

A. He certainly did; he ought to have; he was there.

Q. What was the character of those mattresses; describe them?

352 A. They were made of loose brush, made into bundles; these bundles were put into the mat with grillage poles of different lengths and size as a top and bottom foundation.

Q. Did you have a copy of the specifications of the contract?

A. I did, sir.

Q. Were those mattresses built in accordance with the terms of the contract?

A. No, sir.

Q. State specifically the difference between the mattresses as built and those as required.

A. I will state that the only experience I have ever had in the construction of mats and fascines was under Capt. Bixby. The fascine that I was instructed to build for him was a military fascine, so he called it. I had never seen one before. The fascine, as called for by the specifications here of the 1892 contract, I should say was a military fascine.

Q. That is simply from the description it gives?

A. That is right, sir. The bundles, or I don't know, I suppose you would call them fascines,—they were bundles of brush—I suppose would be the proper name, did not come up to the specifications for two or three reasons.

Q. State the reasons?

A. The brush was not trimmed at all; they were not choked. If they were, they were certainly very loosely choked. I cannot say positively whether or not they were choked. If they were choked, they were very loosely choked; the choking was not done properly. The brush was not straight, and not of the proper length. They were not tied at the proper intervals, and they were not tied,—bound,—by the proper material, and not compressed.

353 Q. Did you report those facts to Capt. Carter?

A. I did not, sir.

Q. Why did you not?

A. Because Capt. Carter was on the works and saw it. I found the work going on in that way when I took charge. I made no alteration, and made no reports, from the fact that Capt. Carter was present from two to three times a week there on the works himself.

Q. Did he make any comment upon the character of the work?

A. Frequently he made the remark that the material was good. I say frequently,—on one or two occasions Capt. Carter remarked, in my presence, that the material was good.

Q. I have understood that the mattresses going in at that time were known as continuous mattresses?

A. Continuous mats.

Q. In how many courses?

A. From two to four or five; I don't remember accurately,—may have been five at different times and different places, according to the depth; whatever the depth called for. I do not remember accurately.

Q. Describe the construction of each course?

A. The continuous mat was built on a barge,—at this time on skiffs,—that was inclined in a downward direction towards the water. Grillage poles were laid at right angles with each other, and these bundles were placed upon these grillage poles and pressed down, and there were grillage poles placed on top of that at right angles. This mat was continued: it did not end at all. At every tide, or whenever the high water slacked or whenever the low water slacked whenever they could sink it without any danger to the mat, they would sink them, but never turn loose the mat from the barge. That is what we call a continuous mat.

354 Q. How long did you remain there as Inspector?

A. Probably six months; probably not that long; probably longer; the records will show.

Q. Did the same character of work continue all the time you were there as Inspector?

A. Yes, sir.

Q. Did you know where the bundles of brush came from of which the mattresses were made?

A. I did not.

Q. How were they brought there?

A. On barges.

Q. The mattresses were built right there?

A. Yes, sir.

Q. Woven together, as I understand, you might call it?

A. Yes, sir.

Q. I think you have testified as to what, in your judgment, is a properly made fascine?

A. No, I do not think so.

Q. Well, please state what you know about making fascines?

A. I got my instructions from Capt. Bixby, as I stated. There should be brush closely trimmed, as a matter of fact trimmed to a pole,—small poles made into fascines, choked with a chain or rope choker to nine, ten or eleven inches, as the case might be, according to the specifications, wrapped at intervals of two feet with wire. That was our specifications there,—Georgetown.

Q. That is Georgetown, S. C.?

A. Georgetown, S. C.; that is the only experience I had,—and those wires were twisted with plyers or nippers. The mat was then trimmed close with a brush hook; that is, the small twigs and little debris that was left around, such
355 as leaves, etc., that was trimmed off close.

Q. You were on duty at that time at Georgetown when you were so instructed and learned of the making of those mats?

A. Yes, sir.

Q. You saw the specifications under which they were made?

A. Yes, sir.

Q. Were they of the same character as the specifications given to you for your guidance in Savannah harbor?

A. The making of the fascines was about the same. The construction of the mat was a little different, I think.

Q. Did you ever take any action in regard to the failure of the contractors to comply with the provisions of the contract?

A. Yes, sir.

Q. What action was that?

A. I stopped the work at the Lower Flats training wall on one occasion.

Q. For what reason?

A. Because they were not using the proper material in the mat.

Q. Did you report to Capt. Carter that you had stopped the work?

A. Yes, sir; I will state what that was, that it may not be misconstrued.

Q. State fully?

A. They had been using, according to the specifications, or as near the specifications as they could, or as they did, grillage poles for the mat. They had used up all of the grillage poles, and they wanted to continue the building of the mat by the use of fascines, or bundles of brush, instead of grillage poles. I would not allow it, and I therefore stopped the work. The contractors' foreman came to Savannah, and got instructions from Capt. Carter—

Q. Only what you know yourself.

A. That is what he gave me.

356 Q. You may state what you did and what ensued,—what was the result?

A. I will state that, after stopping the work, there was a delay of probably three or four hours until the Foreman came back from Savannah. I presume he went there. He brought a note from Capt. Carter—a memorandum—instructing me—

Q. Where is that note?

A. That note was destroyed in the house—flat, in which

we stayed, during the storm. All the records and letters were destroyed there.

Q. What did it contain?

A. It ordered me to allow the contractor to continue building of the mat, and to use fascines until the poles arrived.

Q. You did so?

A. I did, sir.

Q. Did you ever have cause to take similar action again?

A. On another occasion—

Q. What were the circumstances?

A. Similar circumstances, with the exception that the work was not delayed as long, as Capt. Carter was coming down the river, and I spoke to him in regard to the matter again, and he gave the contractor himself permission.

Q. What was wrong?

A. The same thing; they wanted to use fascines instead of poles for bundles.

Q. That changed the character of the bundles, did that not?

A. No, sir.

Q. Were they not more tightly compressed?

A. No, sir; the identical bundle they were building the mat with. That was for grillages.

Q. They were not more closely choked than those you have testified to?

357 A. No; they had no way of choking the mat at all.

Q. Did the contractors, or their representatives on the works, ever make any better efforts to improve the quality of the brush mattresses when there was likelihood of an inspection by Capt. Carter?

A. No, sir, I don't think so.

Q. Will you look at those bundles on the platform behind you?

A. Yes, sir. (Witness went over to the pile of brush and looked at it.)

Q. Have you ever seen anything like them?

A. Frequently, sir.

Q. Where?

A. On this work.

Q. Point out, if you can, to the Court such bundles as you have seen go into the works when you were Inspector.

A. Point out any particular bundles?

Q. Any of them.

A. All of them, I think, sir: I have seen all of them. That was about—I should say that that was a fair sample. There may have been some better, and there may have been some worse, than that, but I should say that the majority, or the greater part, of the brush was similar to this.

Q. You have seen bundles not so well constructed and tied as those put into that work?

A. Yes, sir; that is right.

Cross-Examination by Mr. Charlton.

Q. The only experience you have had with fascines was in Georgetown bay before you came here?

A. Georgetown harbor.

Q. And that, you say, was strictly a military fascine?

358 A. I think so.

Q. Had you ever seen a military fascine before you went there?

A. No, sir.

Q. And Capt. Bixby instructed you that that was a military fascine?

A. That is right.

Q. And, as I understand you, it was a cylindrical bundle of rods tightly compressed by the use of a chain or other appliance?

A. That is right.

Q. When did you first hear the expression "bundles of brush"?

A. Where do you mean?

Q. As applied to these things put into the improvement here, when did you first hear that expression?

A. Ever since I have been on the works.

Q. Were they always called that way?

A. Yes, sir; bundles of brush. Sometimes "fascines" was used.

Q. Did you ever hear the expression "brush fascines"?

A. Oh, yes, sir; I have heard the expression.

Q. As applied to what?

A. Fascines made of brush.

Q. These here in this harbor?

A. Well, no; I can't call that a brush fascine, from the fact that it is not choked.

Q. What is your idea of a brush fascine?

A. One that is made of brush, trimmed close and choked down to nine inches, and bound at intervals of two feet.

Q. What do you call "trimmed close"?

A. Trimmed after they go into the bundles.

Q. What do you cut off?

A. Cut off the outside.

Q. What do you cut off the stem?

359 A. Don't cut anything off the stem when it is a brush fascine. I am giving you simply my idea. A brush fascine, according to my idea, would be brush put down into a fascine; that is, on wooden horses, choked with a chain or rope choker, as the case might be, to a certain diameter, without the brush having been trimmed previously, bound at intervals of two feet, as the specifications would call for, I presume, then trimmed off afterwards. I would say that was a brush fascine.

Q. When you put it upon these horses,—I understand you to say horses?

A. Yes, wooden horses,—

Q. Yes, I understand what you mean, wooden horses—When you put it upon them all the twigs and leaves are on it?

A. Not the leaves, because that, I should think, would be stripped.

Q. Leave the twigs and branches on?

A. That is right.

Q. And then you would choke it down?

A. Yes, sir.

Q. Always to two feet?

A. I don't know; according to the specifications.

Q. And after you got it down there you would carefully clip off all the twigs and branches?

A. Yes, sir.

Q. So that you would leave nothing but a military fascine?

A. I should not say that was a military fascine.

Q. What is the difference between a brush fascine and a military fascine?

A. On a military fascine the brush is trimmed before it goes into the bundles.

Q. And a brush fascine is trimmed after it goes in?

A. Yes, sir; trimmed after it goes in; I think that is
360 about the difference.

Q. That is your idea—you never saw a brush fascine?

A. No, I don't think so, unless you call these (indicating brush in court-room) brush fascines.

Q. And you say that is the general average (indicating bundles of brush in the court-room) of the so-called fascines or bundles of brush that went into this improvement?

A. I should think that was a good sample: they may have been better or worse.

Q. Well, which—worse, or better, or about the average?

A. I say that is about the average.

Q. You are quite as certain about that as of anything else you have testified to?

A. Certainly, according to my judgment.

Q. You got up there and looked at that entire series of bundles, and said that was the general average: did you include the bundles down there at the bottom?

A. I never saw those; I can't see through the bundles.

Q. I didn't think so.

A. Of course, I can't say about what I didn't see.

Q. Are you acquainted with the character of brush in and around Augusta,—live brush?

A. Yes, sir.

Q. Is it straighter or more crooked than that down here?

A. About the same, I should say: I have never seen any brush cut there for the purpose of building fascines.

Q. And you think the brush up there is exactly like that here?

A. Not exactly like it.

Q. I mean in regard to its straightness in its growth?

361 A. I should say in the low country, and around here, the quality of brush would be better than that in Augusta.

Q. That is your judgment?

A. That is my judgment.

Q. And the character of the brush is different, is it not, in the low country?

A. Yes, sir; we have a great deal of brush that they haven't got.

Q. But you think the brush here is apt to be straighter than it is up there?

A. I think so, yes, sir.

Q. In remarking the difference between the military fascines you saw constructed at Georgetown, and the alleged fas-

cines constructed here, you mentioned a great many differences, and one was choking?

A. Yes, sir.

Q. The choking over there was to what diameter?

A. Nine inches.

Q. And the choking here was to what diameter?

A. None, particularly.

Q. No choking?

A. I didn't see any.

Q. Didn't see any evidence of choking at all?

A. I did not.

Q. You are perfectly clear about that?

A. Perfectly clear.

Q. That (indicating bundles of brush in court-room) is about the average class of choking?

A. I think so.

Q. That (indicating bundles of brush in court-room) is not choked at all, is it?

362 A. I don't think so.

Q. Therefore, there was no choking done?

A. I don't say there was no choking done, but if choked they were choked very improperly.

Q. Another distinction between the Georgetown fascine and the Savannah fascine was in the character of the binder, was it not?

A. Yes, sir.

Q. Over in Georgetown, it was what over there—what did you use?

A. Used wire?

Q. Annealed wire?

A. Annealed wire.

Q. And over here they used what?

A. I don't know what they call it. I would take it to be rope-yarn or spun-yarn, with some tar on it.

Q. Would you call it lath-yarn?

A. It has been called that.

Q. And you say the failure to use annealed wire—I understand that this tarred rope was one of the elements of the fascine, or rather made this one here—lacks one of the elements of a fascine?

A. No, sir; because fascines are sometimes tied with tarred rope.

Q. Then what is the objection to tying these here with tarred rope?

A. That is not tarred rope; that is a strand of rope, I should say.

Q. You would not consider it a proper thing—lath yarn—to put around a fascine?

A. Not when properly choked,—I should not think so.

Q. What is the objection—in regard to its lack of strength? Think it would break?

A. Yes, sir.

Q. You said, in answer to Col. Barr, that you were
363 given a copy of the specifications, and you saw at once that the work was not up to the specifications?

A. No, sir, I don't think I said that.

Q. I mean within a reasonable time—a day or two days?

A. I saw, the moment I examined the specifications,—I saw that they were not up to the specifications; in fact, I don't know what it was. I was instructed by Capt. Carter, and, if they were not to be military fascines, I didn't know what they were to be.

Q. As soon as he gave you that information you were completely at sea, because you didn't recognize any other fascine?

A. I did not recognize on his work any military fascine.

Q. Now, you were given these specifications and read them, and understood them to be a military fascine?

A. That is what I understood.

Q. And as those things were so completely at variance with your idea of a military fascine,—this brush being put in the river—, you concluded at once that it was not up to the specifications as soon as you saw it?

A. Certainly, as soon as I saw the specifications.

Q. You linked on to that answer that you were told by Capt. Carter not to press the contractors?

A. That is right.

Q. Did Capt. Carter ever tell you that your first duty was to look after the interests of the United States Government?

A. I don't think so.

Q. I want a positive answer from you upon that point.

A. I say I have no recollection of Capt. Carter ever using those words to me. I don't think there was any occasion for it.

Q. Well, words that conveyed exactly the same idea to your mind?

A. If he did, I don't remember it.

364 Q. Did he not say to you that your first duty was to look after the interests of the United States Government; and, that being protected, that the contractors were not to be pressed if they conformed to their duty?

A. No, sir.

Q. Then, I understand you to swear positively that he never used any such expression, and that you have never testified that Capt. Carter did tell you that?

A. Yes, sir; I will swear to that absolutely.

Q. Now, on September 21st, 1897, or in that neighborhood, in the City of Savannah, in the presence of at least three persons, was not this question asked you and was not this reply given by you: "Q. The instructions given you then were, were they not, to do all you could while there to see that the interests of the United States were protected, and in doing so, if you could give any assistance to the contractor in any legitimate way, to help him facilitate his work, you could do so? A. Yes, sir." Is that true, or not true?

A. I don't think I made that statement.

Q. Following immediately—

A. Excuse me, one minute: If I made that statement, I misunderstood it.

Q. Well, we will try the second question: "Q. Your first duty was to look out for the United States, and then afterwards, if consistent with your duty, you could give any assistance to the contractor that was proper? A. I think that is right, sir." Did you make that answer?

A. I may have made that answer; I don't remember. (

Q. Suppose you made that answer—, was it true or false?

A. Suppose I made the answer?

365 Q. Yes, if it be true that you did make these answers to these questions, were the answers true or false?

A. In the first place, I don't acknowledge making those answers. I don't remember the questions.

Q. That is not my question to you—?

A. I am going to answer it, sir. Let me hear those questions again. I would like to answer straight on that, sir.

Q. (Mr. Charlton reading:) "Q. The instructions given you then were, were they not, to do all you could while there to see that the interests of the United States were protected, and in doing so, if you could give any assistance to the contractor, in a legitimate way, to help him facilitate his work, you could do so? A. Yes, sir."

A. I think there was something said in regard to it, if I am not mistaken: I remember—I recall it.

Q. How much of it?

A. I don't know, sir. In regard to the assisting of the contractor in carrying on the work, I think I answered "yes".

Q. Now, you are an intelligent man: Is it possible for you to misunderstand that question?

A. No, sir; I don't think so.

Q. Shall I read the second one?

A. Go ahead.

Q. (Counsel reading:) "Q. Your first duty was to look out for the United States, and then afterwards, if consistent with your duty, you could give any assistance to the contractor that was proper? A. I think that is right, sir."

A. I see what you are driving at. That was before the Board of Inquiry, was it not?

Q. Yes, sir.

A. And not by Capt. Carter: that question was asked me before the Board.

366 Q. Yes, sir.

A. I understood it. Yes, sir; those questions are correct. I was under the impression that you meant that Capt. Carter had given me those instructions in his office or on the work. Those questions were asked me before the Board of Inquiry.

Q. And were the answers given correct?

A. I think I answered them in that way.

Q. Don't you know?

A. I think so; I don't remember exactly the wording of it.

Q. You know these answers are not elaborately worded ones. One is "yes, sir", and the other says, "I think that is right, sir".

A. If I said so, I will swear to it.

Q. May I ask you whether you answered "yes, sir", to the first question, and "I think that is right, sir", to the second question?

A. Who were the questions asked by?

Q. I don't think it makes any difference who asked the questions. Capt. Carter asked you both of those questions.

A. Yes, sir; I think that that was right.

Q. I want to know whether it was right.

A. I will answer yes, sir.

Q. Now, you have testified that all this apparently worthless stuff—bundles of worthless stuff—, went into the gov-

ernment work: have you ever reported to Capt. Carter, during the time you were Inspector there, an allowance for the contractor having too much material?

A. Yes, sir.

Q. Better than called for by the specifications?

A. No, sir.

Q. Did you report more material than was called for by the specifications?

A. Yes, sir.

367 Q. Was it allowed?

A. It was not at that time.

Q. You recommended the allowance?

A. I certainly did.

Q. In other words, according to your idea, the contractors were doing better than they were required to do?

A. No, sir.

Q. Why did you make that recommendation?

A. Because he requested me to do it.

Q. Who requested you to do it?

A. Capt. Carter.

Q. Who was present?

A. Capt. Carter came upon the works when we were measuring the mats.—I say,—he stated to me in this language: "Where the mats run over measurement by courses, you can make a recommendation for extra height." I did so.

Q. Is that all there is to it?

A. That is all.

Q. You did recommend it?

A. I did.

Q. And he didn't allow it, did he?

A. He did not at that time. He wrote me a letter shortly afterwards—

Q. Where is that letter?

A. I don't know: that was lost in the house-flat, during the storm. I suppose his copies will show that.

Q. Now, how was it if he desired to have an allowance recommended for these people, in this particular instance when it was recommended by you, he did not give it?

A. I suppose he did not give it. I am going to tell about that. I don't know whether it was ever allowed or not.
368 His letter stated to me that the recommendation would not be allowed at present, but at the completion of the work it would then be taken into consideration. Now, wheth-

er it was taken into consideration, and that allowed, I don't know. I suppose the records will show.

Q. Do you remember about what date that was, so we can find out?

A. I don't know.

Q. Do you remember the month you went on the works as Inspector?

A. No, sir.

Q. Was it not about June or July?

A. I think so, I know it was in the Summer.

Q. That is the only time you were there,—those three, or four, or five months?

A. Yes, sir.

Q. Are you acquainted with Mr. A. S. Cooper, Assistant Engineer?

A. I am.

Q. Do you know his general character for truth and veracity in the community in which he lives?

Judge-Advocate: I must object to that in their cross-examination. If they desire to impeach a witness for the prosecution by this witness, they must call this witness for the defense.

Mr. Charlton: I withdraw it for the moment.

Q. (Mr. Charlton continuing:) Do you remember any instance in which Mr. Cooper falsified about you?

A. Yes, I can recall the circumstances—

Judge-Advocate: That is the same thing. I desire to allow the utmost latitude—

Witness:— I can answer the question in a satisfactory manner, I think. That circumstance occurred when I was Inspector of dredging on the dredge "Tomacheechee"; that is the circumstance you have reference to?

369 Q. (By Mr. Charlton) That is it, I think.

A. I was given instructions by Mr. Cooper, who was Assistant Engineer, to take the dredge up to Marsh Island, and there dig mud and marsh for the purpose of depositing that stuff behind the closing dam between the main-land and Marsh Island. He instructed me if I could not get the mud on the edge of the Island, to go into the Island until I did get it. He wished no sand; he wanted mud. I did as I was instructed. Shortly afterwards I was relieved.

Q. You mean relieved from employment?

A. Yes, sir; Capt. Benyuard came up and relieved me. I was at sea. I didn't know what I had done. Capt. Carter,

when I went to the office, told me that there were grave charges against me. I said to him, "I know nothing of them. What are they? I am at sea. Who were the charges preferred by?" He stated that they were preferred by A. S. Cooper, who said that I had disobeyed orders in digging farther into Marsh Island than was required, and in not digging the proper stuff, as per his orders. I gave it the lie. I said, "A. S. Cooper lied." I told Capt. Carter that. Capt. Carter reproved me at the time, and said that I must not talk about his Assistant Engineer in that way, and I think I remarked to Capt. Carter that I had certain rights as well as his Assistant Engineer, and if he lied on me I was going to say so; and it was an infamous lie. That is the remark I used. I had never seen Mr. Cooper on the subject,—never had had a conversation with him in regard to it at any one time previous to that, or after that, until about two weeks ago, About two weeks ago,—that was the time the testimony was given before the Board, I think—the Board of Inquiry—I was approached on the subject by Mr. Cooper. He said that there was a mistake,—that there was an error somewhere in regard to my testimony, so far as filling up the Closing Dam at Marsh Island with mud was concerned. I said "In 370 what manner?" He said "Well, I have made no such report as Capt. Carter showed you". I said "You didn't report me for disobedience of orders for digging that mud in the wrong place, going too far in the Island?" He said "I did not". I said "Capt. Carter showed be a memorandum, —pulled it out of his drawer—, and read the memorandum to me, in which these charges were written, I presume, for he held the memorandum in front of him". He said "I made no memorandum. I made no such charges. I did report that the stuff was dumped in the wrong place: that is the report that I made to Capt. Carter, and I did not report you for disobedience of orders." Now, that is all I know about it. That is simply, now, a mere matter of veracity between Capt. Carter and Mr. Cooper.

Q. Up to two weeks ago you were still of the opinion that Mr. Cooper had lied?

A. I certainly was.

Q. And you were approached by him as this case began to come on two weeks ago, to explain the matter to you?

A. I do not know why it was, but that is the way it was.

Q. He made no explanation to you last September when you reiterated this statement?

A. I had no conversation with Mr. Cooper in regard to the matter at all; I only spoke to him on business, as I did not feel very friendly to him. If the statement was made by Mr. Cooper, it is false. If it was not made by Mr. Cooper, it is not false. I thought at the time that it was made by Mr. Cooper, and I didn't have much use for him, and never spoke to him except on business. When Mr. Cooper tells me he did not make the statement —

Q. Your opinion changes of him at once?

A. No, I didn't say that at all, but I have as much
371 right to suppose that Mr. Cooper can tell the truth as well as Capt. Carter; I don't know. It is simply a matter of veracity between the two. I have nothing to do with it.

Q. You are out of it?

A. I am out of it; that's right.

Q. Have you ever been ordered by Capt. Carter to build each mat strictly in accordance with the specifications?

A. I may have been; I don't remember. It has been a long time since I was on the works.

Q. Did you do it?

A. I did it according to the way he wished it done.

Q. When he said build strictly according to the specifications, you went ahead and built it on some idea outside of the specifications?

A. He was always present three or four times a week.

Q. But when you were given a distinctive order to build according to the specifications, which you say you understood, did you build them according to the specifications?

A. I did not.

Q. Why not?

A. Because Capt. Carter did not wish it. If he had, he would have changed the work when he came down on it. He never did that while I was there.

Q. How many mattresses, fascines, stone or anything else have you inspected under the contract of 1896?

A. None at all.

Q. You haven't been in the employment of the government?

A. No, sir; I haven't been on the Jetty work for 1896 at all.

Q. Are you in the employment of the Government now?

A. Yes, sir.

Q. In what capacity?

372 A. Dredging, and dumping the scows.

Q. That is, under Capt. Gillette?

A. Yes, sir.

Re-direct Examination by the Judge-Advocate.

Q. I understood you to say that Mr. Cooper's report to Capt. Carter, if he made one, in relation to the charge against you, was not shown to you?

A. No, sir; it was not shown to me. It was a memorandum that either Mr. Cooper or Capt. Carter made, I don't know which. He pulled it out of his drawer, and read this memorandum. Whether the memorandum was written by Mr. Cooper or Capt. Carter I am unable to say.

Q. Or whether it was a memorandum?

A. Or whether it was a memorandum. I didn't see anything on it. I was standing in front of him and could not see.

373 SAMUEL M. HALE, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. State your full name and occupation?

A. S. M. Hale; and I was Inspector, surveyor, and recorder in Savannah harbor.

Q. How long have you been engaged in that employment?

A. I started here in May, I think, of 1891, and have been on these different parts of the works.

Q. In this engineering district?

A. Yes, sir.

Q. You have had experience on fascines?

A. Yes, sir.

Q. What has it been?

A. Well, I had experience on fascines in Augusta, and here under Capt. Gillette. In Augusta, in 1893, under Capt. Carter.

Q. Then you understand how a fascine should be made?

A. Yes, sir.

Q. When were you last employed by Capt. Carter.

A. I think it was in June, 1897.

Q. How long did you remain with him from that time?

A. The last time I was employed by Capt. Carter I think it was—I was laid off at several different times—1894.

Q. The point is, and the 7th of June, 1897, was the last employment that you had?

A. The last employment that I had with Capt. Carter.

Q. When did you next go into the service of the United States?

A. Under Capt. Gillette.

Q. When?

374 A. On August 1st.

Q. Last?

A. Last, yes, sir.

Q. What duties were prescribed for you?

A. I was told to go out to Foot-Point camp, and out to the camp they had at Hilton Head, S. C., and inspect the building of mats according to the specifications.

Q. Did you do so?

A. Yes, sir.

Q. State what you found?

A. With two exceptions, and that is in the grillage poles and making scarf joints, and for wire or tarred rope, and at that time the contractor had no wire or tarred rope, and I wrote to Mr. Cooper (and I was to send my reports to Mr. Cooper) at the time and explained this matter; and I didn't get any answer until after I had built the first mat; but I put this rope yarn at intervals of one foot apart, and I told the Foreman and the men to double it in every case. That was my orders when I left each camp.

Q. That was the orders from Capt. Gillette?

A. No, I gave that myself, because they did not have wire nor tarred rope.

Q. This was the mattress camp from which brush was being taken, I suppose,—where it was assembled after being bundled?

A. These were the old bundles. We were to trim and to make a fascine required by the specifications at the place where they hauled this brush.

Q. At the place where it was deposited for the purposes of construction?

A. Yes, sir.

Q. Not where it was bundled?

375 A. No, sir.

Q. You had seen fascines built for making mattresses before you went there?

A. Yes, sir.

Q. How did those bundles compare with the fascines you had seen used for the manufacture of mattresses?

A. There was no comparison at all; that is, they were bundles of brush here and fascines in Augusta.

Q. Are you familiar with the amount of labor used by the contractor to make these mattresses?

A. Yes, sir.

Q. What instructions did you received from Capt. Gillette?

A. The instructions I received from him you mean when I started first to the camp?

Q. All the instructions you received from him?

A. He told me to build these fascines according to the specifications; that was the instructions I got from him at first, and to report to Mr. Cooper. I went down to Tybee to report to Mr. Cooper, and I told him at the time,—I says, "Shall I build these mats of the same kind of fascines as we built in Augusta?" He said, "Yes." I explained to him how those fascines were built there.

Q. Were you furnished with the specifications, or had you read the specifications, as to the construction of those mattresses?

A. Yes, sir.

Q. Were they the same specifications as those under which you had made fascines before at Augusta?

A. Yes, sir; about the same thing word for word with one exception, and that is the lengths of the fascines were different.

Q. Who was the contractor at Augusta?

376 A. Mr. Albert Twiggs.

Q. Go on and tell about the construction of the mattress you were instructed by Capt. Gillette to construct?

A. The mattress was 50 by 100 feet long. First laid a bottom grillage, that is, poles one way and right-angle poles put on top of these; they were wired down and cross-wired at every joint, and then the 100 feet of bundles of fascines were laid and twenty men would press them,—after these bundles of fascines were laid,—would compact them together at intervals of about ten feet in the whole length of the mat,

and tie that until they built the whole mat. Then a top grillage would be put on and wired down to these fascines at these intervals of ten feet, and they were also wired, so as to hold the fascines in place until they could press in the other parts, and that was done the whole way through the mats. This top grillage was also wired won to the mat, to the bottom grillage, that is, at intervals between every joint, which was about six feet all around the mat. It was done that way at intervals, in between in different parts of the mat, of 12 to 15 feet.

Q. You did this work at the same place where the contractors had been having their mattresses constructed?

A. Yes, sir.

Q. Did you use bundles which were there ready for their use?

A. I had these bundles trimmed and made fascines out of them.

Q. Did you take that in bundles or cut open the bundles?

A. I cut the bundles open and picked out such parts as I thought could be trimmed properly to make fascines.

Q. About how many bundles would it take to make one fascine under the specifications?

A. About eight of the same size.

377 Q. It took you to make one fascine eight of those bundles?

A. To make one 100 foot fascine?

Q. Yes?

A. I counted from fifty-eight to sixty-four of those bundles it took to make one 100 foot fascine after being trimmed.

Q. How long were the bundles?

A. The bundles were about fifteen feet long.

Q. The fascine, I understood, was one hundred feet long?

A. At first we built a few thirty, forty and sixty feet, but very few of those were built.

Q. How many of those bundles would it take to choke into a nine inch tightly choked bundle of equal length?

A. I suppose three or four.

Q. Did you find this out?

A. I tested that.

Q. You tested that?

A. Yes, sir.

Q. All the material that was used in those bundles you did not find servicable I understood you to say?

A. No, sir.

Q. Why was it not servicable?

A. Because it was mostly twiggs and leaves.

Q. How many 15 feet bundles would you have to use to make 15 feet of a fascine?

A. Eight,—about eight.

Q. Can you estimate as to the cost of the mats that were made of those bundles you found there?

A. Well, I did estimate that a mat built of those bundles we found there cost \$180.00 approximately.

378 Q. That was from an actual investigation made by you and calculation upon the cost of labor, etc.?

A. Yes, sir.

Q. Was that for a three course mattress?

A. That was for a single course mattress built according to the specifications out of these brush I found there.

Q. How much a sq. yard would that be?

A. You mean to the mat?

Q. Yes, to the surface of each mat?

A. About 500.

Q. I am not asking how many sq. yds., but how much it would cost per square yard?

A. By using the amount trimmed from these bundles, I think about thirteen cents per square yard.

Q. Did you make an estimate of the cost of a mattress required by the specifications?

A. Yes, sir.

Q. How much was your estimate?

A. \$168.00,—\$167.75.

Q. For a mattress of what dimensions?

A. 50 by 100 feet.

Q. What would that be per square yard?

A. About thirty three cents.

Q. You may step over to that pile (indicating bundles of brush in court-room) of bundles and examine them.

A. (The witness examined the bundles)

Q. Did you see them?

A. Yes, sir.

Q. Do you want them moved at all?

379 A. Well, if they want to examine these bundles, I have the average bundle here that was used?

Q. You have seen bundles of that character used?

A. Yes, sir.

Q. In the construction of mattresses?

A. Yes, sir.

Q. In a condition such as they now are?

A. You mean have I seen mattresses built of such stuff as that?

Q. Yes?

A. Yes, sir; I have never examined them closely, though.

Q. Do you know where those bundles came from?

A. Yes, sir.

Q. Where from?

A. Foot Point, S. C.,—five of them.

Q. Who procured them?

A. I did.

Q. That was the mattress camp where they were constructed?

A. Yes, sir.

Q. Where did you find them there?

A. Right at the camp, where the mats were built and the fascines.

Q. Were they picked from any pile of bundles or did you take them from one pile?

A. I took those from some that were left over from building fascines required by the specifications after being trimmed.

Q. Do you know where those bundles were made?

A. In the vicinity of Foot Point, that is, within a mile.

Q. Do you know if any Inspector was present at any time to inspect these bundles and inspect the mattresses in process of construction?

A. No, sir.

380 Q. You don't know whether or not there was one there?

A. No, sir; I do not. I did not find any there at all.

Q. Was there a mattress in process of construction when you reached there?

A. There was a mattress there,—a three course mattress,—so I was told by the foreman.

Q. What did you see?

A. I saw this mattress; at least, he and I walked to the bank together, and I asked him what kind of a mattress it was—

Q. I want you to testify just what you saw?

A. I saw this mattress,—saw the top of it.

Q. Was it an uncompleted mattress?

A. They said it was a complete mattress.

Q. No matter what they said. Don't bring in what any

one said to you. Just state what you observed yourself and what you saw. You went to the place where this mattress was constructed or being constructed. Were those bundles of the same character as these bundles that you obtained?

A. I suppose about fifty feet the bundles were on the hill and the mattress was down a bluff like, on the barge on the water.

Q. As near as the bundles could be conveniently placed for the construction of the mattress?

A. Yes, sir.

Q. How many bundles did you find there at the landing?

A. I suppose there were 8,000 or 10,000 bundles. I was told different, of course.

Q. (Handing witness photograph) Do you recognize that photograph?

A. Yes, sir.

Q. Were you present when it was taken?

381 A. No, sir.

Q. You recognize it as what?

A. As a mat built according to the third design in the specifications.

Q. Do you know when it was taken or anything about it?

A. No, sir.

Q. Is that the picture of the mat built by you?

A. Yes, sir.

Q. Is it a good photograph of the mat built by you?

A. Yes, sir.

Judge-Advocate: (Showing photo) This is the photograph which is now before the Court.

Witness: That was a mat built at Hilton Head, S. C., I think.

Q. Do you know anything of its construction?

A. Oh, yes, sir.

Q. That is the one in regard to which you have been testifying?

A. That is right.

Q. How does it compare with those you have testified you had seen before?

A. You mean in Augusta?

Q. Yes?

A. Well, the mats there, of course, were not so large as that; they were smaller. They were practically the same except, of course, in Augusta the brush was quite different.

Q. How many single course specification mats were made under your supervision?

A. Six.

Q. How many did you have made out of the bundles you found at the landing?

A. Six.

382 Q. Was that pile in regard to which you have testified entirely used up?

A. Yes, sir.

Q. Where did you get further material?

A. That is, at Hilton Head it was entirely used up, but at Foot Point there were some few bundles left.

Q. Where did they get material to build the mats after this pile was used up?

A. At Foot Point; they didn't build anything more at Hilton Head; but at Foot Point, the stuff used for building these other fascines they have there now was gotten about from a half of a mile to a mile of the place where the mats were built,—much better stuff, too, than they had in these bundles.

Q. The quality of the material improved, then, after you made these mattresses to which you have testified?

A. Yes, sir.

Q. Were there other bundles scattered around in the woods at that point?

A. Yes, sir.

Q. You saw them yourself?

A. Yes, sir.

Q. Do you know if they were hauled to the place where the mats were constructed?

A. These bundles that were scattered in the woods?

Q. Yes, sir?

A. A great part of them were; some few were left out there at a place where they could not haul them from; it was boggy, and, at that time, they could not haul them out.

Q. (Handing witness paper) Please read that 38th paragraph entitled Fascines?

A. (Reading) "All fascines will be made of live brush "of cedar, water oak, myrtle, sweet gum, or any other variety "of wood approved by the Engineer Officer in charge. The "fascines will be from twelve (12) to twenty (20) feet in

383 "length, and must be compressed tightly by an approved "form of choker, to a diameter of nine (9) inches at "intervals of two (2) feet, where they must be bound

“firmly with wire or tarred rope of approved strength. The brush used shall be as straight and well trimmed as can be obtained; the fascines shall be carefully and thoroughly made and handled with care. They are to be placed in the work singly, or in mattresses, in such places, quantities, and manner, as the Engineer Officer in charge may direct. When made into mattresses the fascines will be packed together and secured by binding poles joined by tires of wire or tarred rope not more than two feet apart, the form and dimension of mattresses and the method of their construction to be such as the Engineer Officer in charge may approve. For measurement the fascines shall be piled on shore or on barges in such way as the engineer officer in charge may direct.”

Q. The mattress built by you was built in accordance with these terms?

A. Yes, sir; with those two exceptions, and that was the wire and the grillage poles.

Q. Is that the same character of mattress as you made for the Twiggs contract,—the same specification as for the Twiggs contract?

A. Yes, sir; except they were trimmed a great deal closer

Q. In making this mattress under the direction of Capt. Gillette, did you comply literally with Capt. Gillette's instructions?

A. Yes, sir; I trimmed the brush, and got the kind of brush, at that time the best that could be obtained,—at this place; that is, of what they had.

Q. How were you to tie them?

A. They were properly choked and tied, and, while I was at their camp, they doubled the twine. They used this spun-yarn with probably a little tar on it, and put double yarns around at intervals of a foot to a foot and a half.

384 Q. Was anything said to you by Capt. Gillette as to what rope should be used in tying them, or what material for tying them should be used?

A. Yes, sir; there was something. As far as I can remember, Capt. Gillette told me about choking them,—having them properly choked, and he read, or gave me the third design of the specifications, and then afterwards said, “Just follow the specifications,” or something to that effect; I disremember exactly.

Q. The specification that you have just read said that they

must be bound firmly with wire or tarred rope of approved strength?

A. Yes, sir.

Q. Did you use either of those materials?

A. No, sir.

Q. Why not?

A. Because the contractors didn't have either wire nor tarred rope in camp, and I told them they would have to get this; and I wrote Mr. Cooper a letter to ask him about it, and he didn't answer. Well, I took this rope-yarn, and by using two strands of this, it was equal to tarred rope. I tested it, and afterwards found out it was about as strong as the tarred rope, and I put it at intervals of a foot apart. Then when I first met Mr. Cooper, he said—

Judge-Advocate: No matter what he said.

(At this point in the proceedings, 12.25 o'clock p. m., Reporter W. O. Tarver was relieved by Reporter Geo. T. Cann.)

385 Q. Do I understand you to say that it took 8 bundles as prepared and cut up to make one according to the specification of the same length?

A. Yes, sir.

Q. How many square feet of the old style mattress would one of those bundles behind you make, those bundles that you have inspected there?

A. About 15 square feet.

Q. In making your estimate of the cost of the old style mattresses, how much did you allow for the cost of one bundle?

A. Old style, 2½ cents per bundle.

Q. Upon what do you base your estimate?

A. Of course, I inquired as to what they cost.

Q. Do you know what they cost?

A. Only by what I heard.

Q. You saw no account or statement and have no personal knowledge of what they did cost?

A. No, sir, except that.

Q. Your estimate then was based upon that value?

A. Yes, sir.

Q. 2½ cents per bundle.

A. The reason I don't know that is because the first day after I got into this camp I went out on the works and told them those bundles would not do and they stopped at once,

so I did not get a chance to find out the actual cost of those bundles, only by being told.

Q. Were those bundles cut by the employees of the contractors, or did persons cut them on their own account, selling them to the contractors if you know?

A. I know that the contractor's foreman hired those men to cut those bundles, that is to cut the bundles that were used before.

Q. At day labor rates or by the bundle, do you know of your own knowledge?

386 A. By day labor rates, but in this way, they paid so many men so much a day in some cases.

Q. Do you know this?

A. No, sir.

Cross-Examination.

Questions by Mr. Charlton.

Q. Mr. Hale, you stated just a moment ago that you knew that the contractors did this work by contract,—do you know that from your own knowledge?

A. That the contractor did this work?

Q. Got this labor by contract. Do you know anything at all about how they got their labor and how they paid, except what other people told you?

A. Except what the men themselves told me.

Q. Do you know it except from what other people told you?

A. I have got no paper, no sir.

Q. You have no actual knowledge except what was told you?

A. I was there.

Q. I ask you to answer my questions. If that was not hear-say?

A. Of course, about those bundles.

Q. That is you don't know anything at all about the employment of labor?

A. That is hear-say, certainly.

Q. Now, I want to put you on notice, kindly let me do so?

A. Certainly.

Q. When I am asking you a question, unless I ask you for the information of other people, don't give it.

A. All right.

Q. What has been your experience in Government employment, when did you first go in?

A. May, 1891.

Q. That was at Augusta?

387 A. No, sir, that was in Savannah on a little survey at Savannah.

Q. How long did you stay here?

A. A very short time.

Q. Then where did you go?

A. In 1882 I was down at Mayport, Florida under Mr. Geiseler.

Q. What character of work did you do there?

A. Surveying.

Q. Then your next employment?

A. My next employment was with Captain Carter.

Q. At what point?

A. Surveying, I think mainly upon the survey.

Q. And your next employment?

A. I have been an inspector some.

Q. How long were you an inspector under Captain Carter?

A. At different times I was an inspector on dredge work and dredge material.

Q. How long were you employed as an inspector by Captain Carter as an inspector of mattress material and mattress construction?

A. That was the time I went to Augusta.

Q. How long was it?

A. I went to Augusta in December.

Q. Of what year?

A. 1893 and stayed there until January 7, 1894.

Q. You were an inspector at that point of mattress construction and fascine construction?

A. That is, I was inspector of dams.

Q. And you were inspector of mattress construction and fascine construction?

A. No, sir.

Q. That was no part of your duty?

A. No, sir.

Q. You are familiar with the brush that grows up there?

A. No, sir.

388 Q. The brush that grows in the woods?

A. No, sir.

Q. Have you never testified that that brush there is straighter?

A. The brush I saw in those fascines was straighter.

Q. That would be the natural appearance of it when growing?

A. Yes, sir, I suppose so.

Q. Now, do you mean to tell the court, do I understand you to state to the court that the fascines at Augusta were military fascines?

A. Well, I call them military fascines.

Q. Why do you call them that?

A. That is, I say there were built according to the specifications, if you tell me what is a military fascine I will tell you what they were.

Q. No, I am not on the stand, I want you tell me that.

A. A military fascine is built of rods, that is what a military fascine is.

Q. A military fascine is a fascine built of rods?

A. I suppose so.

Q. Do you know?

A. I say if a military fascine is built of rods those were pretty nearly military fascines.

Q. Did they have any leaves on them?

A. No, sir.

Q. Did they have any twigs on them?

A. Very few.

Q. They had some few twigs but had no leaves?

A. No, sir.

Q. It was in the dead of winter?

A. It was in winter.

Q. Did you expect them to have leaves on them at that time?

A. No, sir, but some bushes do have leaves on them in winter.

Q. No doubt that is so.

389 A. None of those fascines had any on them.

Q. Did they pick the leaves off them?

A. I don't know how they did it.

Q. Do you come from that part of the country.

A. No, sir.

Q. You are familiar with the brush up there, whether it loses its leaves?

A. No, sir.

Q. You know down here quite a quantity do not lose their leaves?

A. Yes, sir.

Q. You know up there it is higher up and colder, and they do lose their leaves?

A. I dont know.

Q. Did you ever hear those inspectors call those military fascines?

A. No, sir.

Q. Did you ever hear the expression, "brush fascine"?

A. No, sir.

Q. They just called it a fascine, generally?

A. They just called it a fascine generally.

Q. When did you first hear the term "military fascine"?

A. I have heard that ever since I have been on the work.

Q. Where at?

A. I have heard it employed in a great many places.

Q. Chiefly since you have been in the Government employment for the last 5 or 6 years?

A. No, sir.

Q. Did you ever see a military fascine, to your knowledge before Captain Gillette came here?

A. No, sir, except in Augusta.

Q. That is your idea that that is a military faxcine?

A. That is my idea.

Q. When did you first acquire that idea, Mr. Hale, 390 that those fascines up there were military fascines?

A. Well, that is what I say, if a military fascine was built of rods they are military fascines.

Q. When did you first get the idea that a military fascine was built of rods?

A. My idea about a military fascine being built of rods is generally the way I hear it as being built.

Q. I want to get whether you heard that expression and explanation before you came under the employment of Captain Gillette?

A. I have heard of a military fascine, not knowing whether it was built of rods, or what it was built of?

Q. Have you got it under the employment of Captain Gillette, who explained to you what a military fascine was?

A. He has mentioned something of the kind, he did not explain that the rods—

Q. What did he call them?

A. He just said brush closely trimmed. I dont remember of his ever saying the word rods to me at all.

Q. He did not describe what brush closely trimmed was, what was the meaning of that expression?

A. He just said military fascine.

Q. He just said a military fascine is brush closely trimmed, or brush closely trimmed is a military fascine?

A. No, sir.

Q. He didn't mention a cylindrical bundle of rods closely trimmed is a military fascine?

A. No, sir.

Q. How many conversations did you have with him?

A. Very few.

Q. About how many?

A. I don't know any, except in that case.

Q. I understand you to say you were an inspector of dam construction at Augusta, not of fascines or of mattresses?

391 A. No, sir.

Q. Then the next employment in which you were thrown in connection with mattress construction was on what date?

A. The 1st of August.

Q. 1st of August '97. Was not that the very first opportunity you had ever had in an official or responsible capacity, mattress or fascine construction?

A. Of building a fascine, that was the very first.

Q. Before that you had seen it incidentally, but it was not a part of your duty?

A. It was a part of my duty to see whether those fascines were tightly wrapped with wire, and, if not, to throw them out.

Q. Your first experience with building them was during your last employment?

A. That is my first experience.

Q. Now, I want you to state to the court the full conversation had between you and Captain Gillette when he called you in there and showed you the specifications and asked you if you understood them?

A. The full conversation I cannot remember exactly except Captain Gillette told me those fascines must be tightly compressed by an approved choker and they must be closely trimmed and are all to be the same as the specifications stated, as far as I remember.

Q. He did not explain what closely trimmed meant according to his idea?

A. Not at that time.

Q. When did he explain that to you?

A. Some other time since then.

Q. About how long since then?

A. Well I dont remember exactly the time.

Q. Within the last two or three days?

A. No, sir.

Q. Well, within the last week, Mr. Hale.

392 A. A week or so, I was in the office when they asked about it and I spoke about it forst.

Q. Why should you, if you understood the specifications and knew how to build fascines according to the specifications, why should you ask that explanation of Captain Gillette?

A. I was only asking about Military fascines, if those were called military fascines, any faxcine made of trimmed brush closely trimmed, I was told was a military fascine, I wanted to know if this was a military fascine.

Q. You only found that out a week ago?

A. I dont know exactly the time.

Q. Within a week or so?

A. Say that time.

Q. Now, you went over there, understanding the specifications, you had no trouble about that did you?

A. No, sir.

Q. Captain Gillette at that time made no detailed explanation except what you have stated?

A. Except what I have stated.

Q. And he turned you loose over there to construct mattresses?

A. He told me to report to Mr. Cooper, I went down to Tybee and reported to him and he told me what to do.

Q. You built up the mattresses?

A. Yes, sir.

Q. You also brought some of those bundles of brush here?

A. Yes, sir.

Q. Where did you first catch hold of the expression "bundle of brush"?

A. I have heard it used in every case, I have never heard one of the contractor's foremen say "fascine".

Q. You never have?

A. No, sir.

Q. Have you ever heard them call it at all?

393 A. They called it "bundles of brush".

Q. You did not get that from Captain Gillette?

A. No, sir, I have known that all the time. I have said in talking "a bundle", I may have said "fascine".

Q. That was inadvertantly done?

A. That was accidental, yes, sir.

Q. I say you brought over some of those bundles of brush?

A. Yes, sir.

Q. All by yourself?

A. No, sir, the ones that I brought from Foot Point I did bring up myself.

Q. Are those the ones you brought from Foot point?

A. There are 5 or 6 and there were three brought from Tybee.

Q. The ones you brought from Foot Point you brought from Foot Point yourself. I dont mean the manuel labor, but was anybody else with you?

A. No, sir.

Q. I understood, I may be in error about that, I understood Mr. Cooper to say there were two people.

A. That was Mr. Keating and Mr. Austin, who got three of those bundles.

Q. Probably so, some of those bundles were brought up by Mr. Keating and Mr. Austen?

A. Yes, sir.

Q. Who was Mr. Keating?

A. He was an inspector here.

Q. Who was Mr. Austen?

A. He is a clerk in the office.

Q. Are both now in the employment of the government?

A. Yes, sir.

Q. Can you state upon your oath, Mr. Hale, whether or not those are rejected bundles of brush?

A. I can, those I brought from Foot Point are not rejected.

394 Q. You state that positively?

A. I state that positively, that they are not rejected bundles of brush, or less they would not have been hauled to the camp.

Q. Where did they reject bundles of brush or fascines?

A. One case that I know of—

Q. Your experience has been rather limited?

A. Yes, sir,

Q. In your experience, the only place a fascine is rejected is where it is built?

A. Rejected by the foreman, that is what I mean.

Q. None was ever rejected in the camps?

A. I have never seen any, I rejected a great many while I was building those fascines because there were not any parts in it that I thought they ought to have.

Q. You rejected everything that had a twig on it?

A. No, I left a few twigs.

Q. With the exception of the construction of this specimen of model mats that you presided over, will you tell this court what other work you have been at for the United States government since that time except concerning yourself with the Carter case?

A. Yes, sir; I was months down on the surveys down at Fernandina for Mr. Geiseler, the Assistant-Engineer.

Q. It was getting a profile for use in this case?

A. I dont know, I suppose so, I did not ask.

Q. What were you doing?

A. I dont know what, I was observing, taking angles, I did not ask what they were getting it for, or anything about it.

Q. Dont you know that you were down there looking up evidence in this Carter case?

A. No, sir, I didn't know that.

Q. Have you learned it since?

A. I learned it by the profile that is being platted.

Q. You know now by what is being done with the results of your labors that that was the object of your visit down there?

A. I know that now.

Q. That accounts for one month, which month was that?

A. I think that was October.

Q. And in November, what did you do for the Government?

A. That started in October and lasted in a part of November.

Q. Well, when that left off.

A. I have been on a little survey up the river here examining shoal places in front of the Central Railroad slip.

Q. How long did the examination in the shoal place in front of the Central Railroad take?

A. I think that was two days. It lasted three or four

days, probably five days, I don't remember exactly, to complete it all.

Q. Have you been down on the breakwater?

A. Yes, sir, I was there before the survey at Fernandina.

Q. Were you there also getting a soundings to plat that for the same purpose?

A. For the breakwater? I have not seen any plats of the breakwater.

Q. After that what did you do?

A. I was on that survey, as I said, and after that I was up the river for Mr. Geiseler putting up tide gauges.

Q. How long did that take?

A. I was 2 or three days here getting ready for that work.

Q. What month was that?

A. The last of December.

Q. That didnt take but 2 or 3 days?

A. Yes, sir.

Q. How long?

A. Off and on I was pretty nearly the whole time.

Q. What do you call the whole time?

A. Well I was on it about the middle of December?

Q. And then from then on?

A. From then on? It was after that time that I went
396 up the little Back river and put up the tide gauges.

Q. That would only take a day or two?

A. A day or two.

Q. And the balance of the time has all been given to the Carter case, has it not?

A. Well, pretty much.

Q. What has been your particular labor in regard to the Carter case,—whom have you seen?

A. Whom have I seen?

Q. Yes.

A. I have seen a great many.

Q. Sent out by Captain Gillette to see them?

Judge-Advocate: I must object to that question. It is admitted that this witness has been at work in the interest of the prosecution, or in the interest of the Government, in the preparation of this case.

Mr. Blair: We withdraw the question.

Mr. Charlton: Yes, rather than have the Court retire on the question.

Judge-Advocate: I dislike to offer any objection; I like to allow the fullest latitude.

Mr. Charlton: We are obliged, Colonel, but we do not want anything but our rights.

Q. How are you carried on the rolls, in what capacity?

A. Well, I have been carried on the rolls as an inspector.

Q. Now?

A. Now?—I have not noticed.

Q. You don't know?

A. I did not notice it or pay any attention.

Q. For the last month—how—have you been carried on the rolls?

A. I think as an inspector; I do not remember distinctly noticing I have been an inspector off and on the roll on survey, if that is what you want.

397 Q. For the last month you don't know how you were carried there, and you have done no work as an inspector?

A. No work as an inspector, but I did surveying, I made preparation for surveying, I never noticed carefully, it was there too, I just didn't pay any attention to it when I seen it.

Re-direct Examination.

Questions by the Judge-Advocate:

Q. All work on the contract has been suspended, has it not?

A. Yes, sir.

Q. Now, Mr. Hale, has Captain Gillette given you any instructions beyond those pertaining to the manufacture of that mattress in accordance with the terms of the specifications?

A. No, sir.

Q. In explaining to you the meaning of a military fascine, was it in answer to a question by you what was a real military fascine?

A. Yes, sir.

Q. Was I not present?

A. I think you were, yes, sir.

Q. I was talking with you about the testimony which you would give in this case?

A. Yes, sir.

Q. And it was for your information?

A. Yes, sir, I wanted to know what a military fascine was, whether they called those military fascines, or no.

Q. Did it make any difference whether they were mili-

tary fascines or fascines of a different character, so long as they filled the requirements of the specifications?

A. No, sir, that is what I was guided by all through the work.

Q. Is the construction of a mattress a very intricate and difficult piece of labor for an intelligent man?

A. To do the work, it is.

398 Q. To do it, or have it done, having the labor under his control?

A. Yes, sir, to be carefully made it should be.

Q. You consider yourself competent, you understood the specifications fully?

A. Certainly.

Q. You considered yourself competent to construct that mattress or have it constructed?

A. Yes, sir.

Q. And in your judgment you did comply with the requirements, except insofar as the material used in the fascine?

A. Yes, sir.

Q. Were the poles used in the construction of the fascines made by you trimmed as much, or not as much, as the poles used in making the fascines under the Twiggs contract?

A. They were not trimmed as close, it was because I did not go to extremes with it.

Q. You mean extremes, I did not exactly understand that?

A. That is according to the specifications, of course, I could have you might say, taking the whole pile make it one third of what I did, I mean by taking the brush as good as I could obtain, of course, I didn't want to throw away a stick that was probably the least crooked or anything like that, and the others were perfectly straight in Augusta.

Q. That is, in Augusta they were all straight?

A. Yes, sir.

Q. And better trimmed?

A. I think they were, yes, sir.

Q. And that was a very strict and literal interpretation of the specifications?

A. Yes, sir.

Here the Court took a recess at 12.50 o'clock P. M. for 10 minutes. Court met pursuant to recess at 1 o'clock P. M.

Evidence reported by George T. Cann, as reporter, January 22, 1898.

399 ERNST AUGUST GEISLER, a witness for the prosecution, sworn, testified as follows:

Q. What is your full name?

A. Ernst August Geisler.

Q. What is your employment?

A. I am a civil engineer.

Q. Where are you employed?

A. In the United States Engineer's office, Savannah.

Q. Under Captain Gillette?

A. At present under Captain Gillette, yes.

Q. How long have you been so employed, Mr. Geisler?

A. Off and on, I suppose for about 20 years.

Q. But how long in your last service in this Engineering District?

A. In this Engineering District I have been twice, I came here first in 1889 and stayed here about a year and a half and then went to the St. Augustine District and stayed there a year or a year and a half and then returned here in the Spring of 1893. Since the Spring of 1893 I have been here uninterruptedly.

Q. Then you served under Captain Carter partly during that time?

A. Captain Carter, yes.

Q. Until Captain Gillette arrived?

A. Until Captain Gillette arrived.

Q. What has been the principal article used in the construction work since you have been here?

A. Well, mattresses, fascines and stone.

Q. Are you familiar with the terms of the contracts now in existence for the improvements here?

A. Yes.

Q. You are familiar with the specifications?

A. I beg your pardon, I did not quite catch that question. Not with the terms of the contract, I would not say that, but with the terms of the specifications.

Q. You are familiar then with the specifications as 400 to the three types of mats, are you?

A. Yes.

Q. Have you made any estimate of the cost of each type per square yard?

A. I was asked to do so by the Board of Investigation that convened here a short time ago, I did so, but in regard

to that estimate I would like to say that since then I have revised that estimate. The estimate was made under unfavorable circumstances. I was not at the time able to get full information in regard to certain details: I have since supplied that information and revised the estimate, I would not like that estimate to go in.

Q. Yes, you are here as a witness to state any conclusion you have arrived at and I ask you—

A. Exactly.

Q. To give your estimate of the cost of the first type.

A. I estimate it 68 cents per square yard, a log mattress of the first type.

Q. How do you reach that conclusion, Mr. Geisler?

A. I have gone into the various items. In the first place, I suppose it is based on the size of a mat 75 feet by 50 feet. I suppose that mat to be constructed of 100 logs, partly 50 feet long and partly 25 feet long, and those logs I suppose on the average to cost 55 cents on the stump, that is based on the information that I received from the proprietor of timber land in the vicinity of Cumberland Sound. He proposed to furnish logs 50 feet long on the stump at 75 cents. Now, my computation here is simply in proportion with that. Then I presume that the cutting of those logs will cost \$6.25, 2 men at \$1.25 a day cutting 40 trees in one day, that will give \$6.25. Then comes the item of hauling, I suppose two men at \$1 a day and one double team at \$1.50 a day will haul 16 logs a day, which will make the whole cost \$21.87; all together that will make the logs cost at the camp \$83.12; whereas, in my first estimate, which I first submitted I said 401 \$100, which is therefore too much. Then there are 44 binders and poles 25 feet long at 6 cents, which is \$2.64, then there are 500 spikes—there are 500 crossings, all together between the binders and logs, so there must be 500 spikes, 10 inches by 5/8 of an inch weighing one and a quarter pounds each, which would 625 pounds of iron at two and a half cents a pound is \$15.62-1/2 cents; then there is the privilege of cutting brush, this information I obtained from the same party on whose land the Atlantic Contracting Company has been cutting brush, the privilege of cutting brush they paid for at the rate of \$5 a mat, indifferently whether that mat was heavy or light or a large mat, the contract was \$5 a mat, so I have put in the same amount here. Then there is the cutting and hauling of the brush: Now, there I have estimated 250 bundles to be hauled, the number of those

bundles becomes clear—how I got that becomes clear when I speak of the other fascines or the 8 course mattresses of the third design, at the time the contractors were made to construct the mats according to the specifications: They had a number of those bundles on hand, and in order to use them they put them into the first mats that were constructed according to the specifications, and according to count—

Q. Your estimate is upon an assumed case of labor and an assumed amount of work done, as I understand.

A. Yes, I just want to say how I got at it, that's all.

Q. Well, if you know that, those things can be done at that cost, you can state it.

A. Very well. Cutting and hauding 250 bundles at 5 cents, that is \$12.550, then there is the labor of building the mat, one foreman three days at \$3 a day, which is \$9, 16 laborers at three days at \$1.25 each for the log mat is \$60, then there is a tug boat half a day, to and from the camp towing the mat, I suppose the mat will be built in water and not on a gin barge, \$12.50; I suppose the rent of the tugboat to have been \$25 a day, then there is a tug boat day and a half sinking the mat \$37.50; then there is consumption of rope \$8, 25 percent interest, amortization and repairs 402 for \$3,000 plant, distributed on 120 mats, which I suppose to be the number that can be sunk in a year, \$6.25, all together \$252.13. Then losses 7-1/2 percent on that and contingencies 5 percent, together 12-1/2 percent, \$31.52, which makes a total of \$283.65.

Q. Taking into consideration then all those features that you have recited you make the cost of a mattress 68 cents a yard?

A. Making and sinking it.

Q. Putting it in place?

A. Putting it in place, yes.

Q. Please give to the court the same information in regard to the second specification.

A. The second I make 56 and 4/5 of a cent per square yard.

Q. Have you given the court the same information,

A. Yes, sir, 56 and 4/5 of a cent per square yard.

Q. And that is the cost of it? I mean by the same calculation?

A. I made the same calculation, going over all those items which I enumerated just now in a similar way.

Q. Now, as to the type of mattresses provided for in the third design of the specification?

A. I make that a little less, 43 and $1/5$ cents per square yard placed in the works.

Q. Arrived at by a computation of the same character?

A. Yes, sir.

Q. Are you familiar with the mattresses as actually used under the existing contract?

A. Very little I have really seen. You refer to the multiple course mattresses, I suppose under the contract of 1896?

Q. The multiple mattresses, the course mattresses?

A. Under the contract of 1896 I don't think I have seen one of them. In former years I have seen some of them.

Q. When did you see one of them?

A. Some time during the contract before that, possibly 4 or 5 years ago.

Q. That was the contract of 1892?

A. The contract of 1892, yes.

Q. What was the estimate of cost of the mattresses then being used?

A. I have made an estimate now on that.

Q. What is the estimate.

A. In place $11-2/5$ cents per square yard.

Q. I would like to know some particulars of that last estimate, Mr. Geisler?

A. In the first place there is the privilege of cutting brush, the same as before, \$5; then there is cutting and hauling and binding 2000 bundles at 9 cents a bundle, that information is according to actual account by Mr. Hall, \$180; then there are 522 grillage poles 25 feet long at 6 cents, \$31.32; then there are 9000 linear feet of wire, 600 pounds at 2 cents, \$12; then there is the labor for building the mats 2 foremen, 1 day, at \$3 a day would be \$6, and 50 laborers, 1 day, at \$1 a day, \$56; then there is a tug boat, $1-1/2$ days, sinking the mat, \$37.50; \$25 interest, amortization and repairs on a \$9000 plant, in this case distributed among 150 mats, assuming that 150 of those can be built in a year, \$15; consumption of rope \$8; a total of \$344.82; then losses, which in this case I have assumed at less, the mats being on gin barges, transported to the place on gin barges, 5 percent, contingencies 5 percent, \$34.48, which makes a total of \$379.30.

Q. How many square yards?

A. $11-2/5$ cents per square yard, that is on a total square yard number of 3,333.33 on a mat of 8 courses, 75 by 50, 8 courses high.

Q. It cost sunk in place how much?

A. \$379.30.

Q. How much per square yard?

A. 11-2/5.

Q. Do you know the contract price of mattresses at 404 Cumberland Sound and at Savannah?

A. For Cumberland Sound it was \$1.10, and I think for Savannah 95 cents. I am not sure about that, I think it was.

Cross-Examination.

Questions by Mr. Charlton.

Q. Mr. Geisler, what has been your specific duties in the office of the Engineer officer here?

A. During the first years they have been mainly surveys and computation and investigating of a theoretical character. During the last year it has been principally practical work, construction work.

Q. Well, what do you mean by construction work?

A. I mean the construction work, work in connection with the work now being done on the constructions at Tybee, I was engaged in getting up specifications, I, with Captain Carter, drew the specifications for it, I made the estimates for it.

Q. So that your work prior to the work on the fortifications here was generally what you call hydrographic?

A. Generally hydrographic. The period is so long I cannot cover the entire period of my duties, there were other duties, I was in charge of the draughting room, and a good many things arose in the course of years in the draughting room which I cannot recall.

Q. During the course of your employment, has the construction of mattresses and fascines come under your observation?

A. Never, not here, but it had otherwise come under my observation, it has never been a part of my duties.

Q. Where did it come under your observation?

A. I have seen mattresses and fascines constructed at the mouth of the St. John's river.

Q. Have you any practical knowledge about the construction of mattresses and fascines?

405 A. None whatever, beyond what I have seen at the places I have stated.

Q. Where your mind was not charged with it?

A. Not at all, I had nothing to do with it.

Q. Your estimate that you have given, of course, is based upon information gathered from other people?

A. Yes, sir, more in the way of confirmation than anything else.

Q. Of course, that comes to you with such errors as the people themselves will be guilty of?

A. Yes, still, at the same time, I have always exercised in many respects, I was able to check to a certain extent.

Q. You say that your first estimate, which you have since changed was gotten up at the request of the Board?

A. No, not at the request of the Board, it was handed in to the Board, it was gotten up under instructions of Captain Gillette, I was sent to Fernandina and found there a letter of instructions to my predecessors from Captain Gillette instructing him to make those estimates, at the same time, before I left the Savannah office, I received instructions to the same effect from Captain Gillette.

Q. Who was your predecessor?

A. Mr. Marion Twiggs.

Q. Did Captain Gillette give you other instructions when you went down there in addition to the making of estimates?

A. I suppose he did, if you can name anything, I cannot recall them, he simply told me to go. Mr. Marion Twiggs became ill and had to leave very suddenly and I was told to go and take his place.

Q. Then the work you were sent upon was work done in connection with the Carter prosecution?

A. Not, when I went down there.

Q. To get information for the estimates?

A. Well, I suppose so, yes.

Q. At what time was that Mr. Geisler?

406 A. That was in the beginning of September.

Q. Did Captain Gillette give you any other instructions as to the plan of prosecution, anything you were to do there?

A. I suppose you refer to my second sojourn.

Q. Possibly so, sir.

A. I returned from Fernandina about the 20th of September, I think, at the time the Board of Investigation convened here, then I was sent back to Fernandina about the middle of October with instructions to make a survey of the jetties.

Q. Were you given any additional instructions to inquire of any persons concerning Captain Carter?

A. I don't recall.

Q. Or concern ng the contractors, were you not instructed to look up possible creditors of the contractors and get information from them?

A. Captain Gillette, at one time, sent me a pencil note making such a request.

Q. Did you accceed to it?

A. No.

Q. What did you reply to it?

A. I replied that the only way I could see to get the information was to advertise in the papers and ask such creditors as they would to file their names at the office in Fernandina.

Q. Why did you refuse to comply with those instructions?

A. Because I did not know how I could do so.

Q. As far as you can, I want your answer.

A. It is not oral, it is on file so it can be very well established.

Here the Judge-Advocate objects to the witness stating the contents of the letter, offering to get the letter for the accused.

Q. Did you never give oral expression to Captain Gillette at all upon that subject?

A. Well, I may have, yes, I suppose I did.

407 Q. Will you be kind enough to tell us what you said?

A. I know that, I suppose I have, expressed to Captain Gillette it was not very much in my line that I could not do such things, that I was not very expert at getting information, I suppose I used words to that effect.

Q. Don't you remember what your language was, was not it stronger than that?

A. Well, yes, I believe I said to Captain Gillette I was not in the detective line, something like that. No, I believe my words were, I recall them now, that I was not gifted that way, I used the word "detective."

Q. Didn't you use the word spy?

A. No, I did not. Yes, no, not to my recollection.

Q. Have you been engaged on any other work connected with the Carter prosecution by Captain Gillette, I mean outside of the ordinary lines of your duty of preparing charts and things of that sort. I have in my mind the Hutchinson Island affair?

A. The Hutchinson Island affair, yes.

Q. Were you directed by him to look into that?

A. I was instructed by him to look into that, that was up before the Board of Inquiry.

Q. Well, now, were you required to do anything else in regard to this prosecution, which you declined to do?

A. Well, there was something at the time I gave this oral reply to Captain Gillette, I really don't recall what it was, I have forgotten what it was.

Q. You cannot recall that at all?

A. No, I can't recall that I don't know what it was. I believe that was, at the time I said this to him. What it was I don't know, it might occur to me, I remember it was something entirely harmless.

Q. If you can't recall it how can you recall its nature?

A. I can recall my feeling at the time in regard to the matter.

408 Q. Mr. Geisler, You have been here quite a long time connected with this office, what was your understanding about these so-called bundles of brush. Did you ever hear them called "fascines" before they were put in the mattresses under Captain Carter's administration?

A. Well, yes, I believe I did.

Q. Is it not a fact, Mr. Geisler, that this term "bundles of brush" and "military fascines" has sprung up here since Captain Gillette has come?

A. Yes, I should judge so. That is rather the distinction between military fascines and other fascines. I have never heard it made before. In fact, Captain Gillette explained to me what it was.

Q. You got your impression from him then?

A. I got my impression of what a military fascine was from him, all I know about a military fascine I got from him certainly.

Q. Now, you have seen this work, you know the results of it, which is the better fascine for work in this river, Captain Gillette's military fascine or Captain Carter's brush fascine?

A. I don't believe in Captain Gillette's fascine for work of this kind and I have told him so. I believe that fascine is the best which has the greatest number of fine twigs or branches in it, and that fascine is the poorest one which has the fewest number of branches in it. In both cases the mattress must be well choked.

Q. Will you explain why you have that preference?

A. I have that now, and for the reason that the office of

the fascine is to hold the bottom, that is, hold the particles of the bottom to protect against scour. Generally this office is performed by friction between the particles of the bottom and the superficial area of the component parts of the fascine. That fascine that has the greater superficial area will be the best to hold the particles of the bottom on account of the friction with them. Now, if you take the two extremes, taking a single log 9 inches in diameter that would only have a very small superficial area. If a fascine is composed 409 of sticks of 1/4 inch diameter the sum of the superficial areas of those sticks would probably be 6 or 7 times the superficial area of the log, if you make those sticks still smaller it would be still greater, of course there is a limit, but theoretically it would be the case. That is why I would prefer the brush stuff down to the practical limit.

Q. The fascine as actually used by Captain Carter has accomplished its work?

A. Judging from experience, and what we see in Savannah Harbor, it is to be presumed that it has.

Q. Do you happen to know how much depth of water has increased in the Savannah River since Captain Carter has had charge?

A. Yes, I could not say exactly since he took charge, I cant say, but comparing it with the time I first came here in 1889, the available depth of water was then about 13 feet at low water and it is now 20 feet at low water.

Q. What is the rise of tide, the average rise of tide?

A. The rise of tide down at the mouth is 6 3/4 feet and at Savannah it is 6 feet, that would give you a gain of 7 feet.

Q. The project contemplated 26 feet at high water?

A. The project contemplated 26 feet, the result was attained at the end of the fiscal year of 1896.

Q. Do you know whether or not it has been obtained within the appropriation?

A. I think I can safely say it has, I dont know the exact figures but I believe it has.

Q. And within the estimate of the project?

A. Within the estimate of the project, too, practically, it may be a little different, I dont think it is, I think it is within the estimate of the project.

Re-direct Examination.

Questions by Judge-Advocate.

Q. Who got up the project and made the estimate for that contract of 1892.

410 A. The project?

Q. Yes.

A. Well I had a good deal to do with it.

Q. Who was responsible?

A. Captain Carter, certainly.

Q. You were the engineer.

A. Yes.

Q. It is your business to make estimates?

A. Yes.

Q. Estimates are usually made on authority of such statements as can be made by you relative to the value of labor and material?

A. Certainly, I dont put much store in the fact that I have not had practical experience with those mats, I think that notwithstanding that I am perfectly competent to make the estimate.

Q. You have ever constructed a building?

A. Repeatedly, yes.

Q. Have you never superintended the construction?

A. Oh, yes.

Q. Becoming familiar with the cost of material?

Q. Yes, I have constructed buildings as long as 20 years ago.

Q. Then when a record of those are estimated, it would be based upon your knowledge of material for buildings?

A. When it comes to making an estimate upon buildings I would be more familiar with the details, I dont know that that would hold good because in building there would be more material than in these very simple mats.

Q. In making an estimate you would not hesitate to estimate upon values outside of those of which you have immediate knowledge?

A. Certainly not, only of course, I should have to go to necessary sources for information.

Q. Which is the usual course pursued by gentlemen of your profession?

A. Undoubtedly.

411 Q. Now, you have stated what in your judgment would be an ideal mattress for use—

A. Fascine.

Q. A fascine for use?

A. Yes.

Q. In using that did the question of cost enter at all into your judgment?

A. No, I say that simply the office of the fascine is to conform to the shape at the bottom, and whichever the best performs this office is the best fascine.

Q. The question of the value then did not enter into your mind?

A. When I made the statement just now, no.

Q. Could a fascine of that ideal character be constructed under the specifications in this contract?

A. Well, the specifications say the brush which goes into the fascine shall be well trimmed, now, I do not know that that would mean that all the small branches should have to be trimmed off, I doubt that. That, of course, would be a question which might be answered differently, I should judge that under those specifications it would be quite admissible to put small stuff as long as it is proper stuff and as long as the whole thing can be well choked afterwards, into a fascine. It seems to me that the term "well trimmed" does not forbid that.

Q. If you desired to secure for the government fascines of that ideal character how would you prepare the specifications?

A. Well, probably that is a question really about which I have not thought, I suppose I might word the specifications somewhat differently, possibly I might word them so as to express definitively that small stuff is admissible, possibly that would have been the correct way to do it, I think I would do that in fact.

Q. If it was your intention in the construction of this ideal fascine to use bundles of brush you would set it forth in the specifications, would you not?

412 A. Well, every fascine has to be constructed of bundles, now there is a mattress lying upon the other side of the river now, 100 feet by 50; the fascines in that mattress are 100 feet long, it is impossible to get brush 100 feet long, you have to get brush, say 10 or 12 feet; I believe they would generally average 15 feet. Those bundles are transported to the mat camp. It is the most handy form of transporting them and when they are brought to the mat camp they are put together and a fascine made out of them.

Q. Would it be necessary to say anything at all about trimming in the specifications?

A. Well, yes, I think it would; for instance, if the stuff was too crooked it would interfere with properly choking the fascine, then if the branches were standing at almost right angles from the pole, well, then, I suppose that would interfere with the choking, then the leaves should be trimmed off, so, I suppose the trimming is all right, that the word trimming should be use.

Q. I simply want to get at your ideas of what the specifications should be in order to secure a fascine that you would like to see.

A. As I said just now, only I would probably state in my specifications that the stuff be of a certain fineness, of certain thinness would be admissable in the fascine.

Q. If a limb stuck out at right angles and there was no provision for trimming would not the provision for choking require that they would be trimmed anyway.

A. I suppose it would.

Q. Then it would not be necessary to say anything about trimming?

A. No, I dont suppose it would, still, I suppose it would be well to put it in.

Q. How about using bundles like those back of you Mr. Geiseler, to construct an ideal mattress or an ideal fascine.

A. Well, I think as well as I can see the stuff from here now, the one lying on the top if properly choked, a fascine as made out of it, I think, that that would be very good stuff as far as I can see.

413 Q. How much would it take to choke it?

A. I might guess, I dont know as I could say very much about that, of course that is very light and requires a good deal of choking.

Q. Could that be choked into a very small space?

A. I suppose it could, yes.

Q. Would its value increase with increased choking and its usefulness increase?

A. Well, if you would take a single fascine it would be choked to such a small compass that it would hardly serve as a fascine, if you take several of them and choke them to the diameter which is called for in the specifications, 9 inches, they would be all right.

Q. You would have to have several of them?

A. No doubt.

Q. How many?

A. Two would be the least.

Q. Do you think that two like that could be compressed tightly, or choked tightly to that diameter?

A. That is what they have actually done at Cumberland Sound, they have used, as I said before, the bundles that were made, and they found on the ground they have made them into fascines, and, as a matter of fact, they would take up two bundles.

Q. Were you there?

A. No, that was stated by Mr. Hall.

Cross-Examination.

Questions by Mr. Charlton;

Q. Just a question or two, Mr. Geisler. Suppose the expression "well trimmed" is a term of art and comprehends the lopping off of large branches and placing them inside a fascine, would it be the part of wisdom to leave that out of the specification? If the expression "well trimmed" really means properly trimmed under the exigency of the work, the lopping off of the large branches, such as you have described and leaving on the smaller twigs or branches so as to
414 get them as suggested, essentially parallel in the fascine, would it be a wise thing to leave that out, if it had a well defined meaning?

A. No, I don't think it would. As I replied just now, I don't think it would be a good policy to leave that out any way.

Q. Of course, Mr. Geisler, when you look at that brush there, which you think would take up two bundles, that does not present the appearance it had when it was cut?

A. Undoubtedly, no.

Q. Of course, all the foliage is gone and the leaves?

A. No doubt it was thicker when green and probably denser.

Q. It would require more to compress it?

A. I don't know much about the experiment actually made at Cumberland Sound. What I said just now was that two of those bundles would go to make up the thickness of a fascine.

Q. You said you were not there?

A. No, I was not there, that is merely hearsay from Mr. Hall.

Q. Of course, "closely choked" does not mean inordinately choked?

A. I have seen bundles at Cumberland Sound which were very well choked; choked under the direct orders about that thick.

Q. From whom?

A. From Captain Gillette, I suppose.

Q. Will you describe the method of that choking?

A. I was not present; I saw the bundles after being choked.

By the Court: I would like to know if a man obtaining the specifications, for the purpose of making a bid, would in your opinion, understand that he was to do more trimming than was necessary to make a fascine of the character you have just described. Do you understand the question?

A. I understand the question about this way. Whether the specifications would be clear to that effect on the idea that he was just to do that trimming necessary to produce a 415 fascine I tried to describe describe short while ago?

Q. Yes.

A. I think so, yes.

Q. You dont think it would leave him to infer he must do too much trimming?

A. I dont think it is as clear as it should be.

Q. You have been an engineer officer for a long time? Have you ever known men to visit the office for information as to what would be required of them provided they got the contract?

A. Oh, yes.

Q. Do you remember any inquiries having been made upon that precise point about trimming?

A. No, I do not remember that, still they may have been made without my knowing it.

Q. Who usually responded to these inquiries?

A. That was generally Captain Carter himself.

Q. Have you ever had a conversation with Captain Carter as to the requirements of the specifications?

A. In regard to this particular point?

Q. Yes.

A. No, I have never.

By the J. A.: Was it not in reply to an inquiry by Captain Gillette as to how the business could be conducted in the manner it had been without his discovery that he made the response that he was not a detective?

By the President: The court will adopt the question and the witness will answer it.

A. Yes, I think it was.

By the court: Refresh your memory, if you can Mr. Geiseler, and see when you made use of that expression if it was not in response to this, when Captain Gillette told you when you went down to Fernandina to see the possible creditors of the contractors and find out whether they owed them money?

A. You are entirely mistaken, Captain Gillette has never told me anything of the kind; as I stated before, Captain Gillette has written me a note which contained such a request.

By the court: This request was made in writing?

A. Yes, in a short pencil note.

By the court: And you answered it?

A. I answered it.

Here the court took up the reading of the testimony of Witness A. S. Cooper to him, which occupied the time of the Court until the hour of adjournment, to-wit: 3 o'clock P. M.

Here the Court at 3 o'clock P. M. adjourned to meet Monday morning, January 24, at 11 o'clock A. M.

THOMAS F. BARR,
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

417

United States Court Room,
Savannah, Ga., January 24th, 1898.

The Court met pursuant to its adjournment of the 22nd inst. at 11.00 o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his Counsel, and the Reporter, W. O. Tarver, were also present.

The President: The Court will come to order.

ARTHUR S. COOPER, a witness for the prosecution, recalled.

Judge-Advocate: Mr. Cooper, I will continue the reading of your testimony right where the Reporter left off Saturday.

Witness: (After hearing his testimony read) I have a number of corrections I wish to make. Is it in order to make them now?

Judge-Advocate: Make such statements to the Court as you desire, remembering that each time you come before the Court you are still under oath as a witness, of course.

Witness: Yes, sir. In the questions asked me by Mr. Charlton, I was made to appear as being opposed to the opinion expressed by the Board of Engineers appointed to report on the Cumberland Sound work, and, as he stated also, by the Chief of Engineers. I told him my opinion was opposed to anybody; I didn't say opposed to the Board. As I understand it, the Board did not recommend that large brush mats be placed on the outside slope of the Ocean bar, consequently, my opinion was not opposed to that of the Board.

Q. (By the Court) Are you replying to the cross-examination of the first day?

A. Yes, sir. Then in answering one question in regard to the placing of brush on log mats in the contract of 1884, I made one statement which is not absolutely correct. I said 418 that the brush was placed on the log mats loose. That was not the truth. They were placed on the log mats in bundles,—just simply bundled brush, and placed there about eight inches thick. Then in the next contract, that of 1886, that was made optional with the Engineer to put on either bundles or loose brush. That was simply a mistake of memory on my part. Then in answer to a question from Mr. Charlton, he incorporated one statement, or fact which is not really a fact, and I answered in the affirmative, not noticing his error. He stated that loose brush and bundled brush was placed in pile dams. That is not so. No loose brush was ever placed in pile dams under my charge. It was all bundled brush. And in answer to a question from Maj. Stanton, in regard to whether any large mats were placed in the work in the contract of 1896, I said no, forgetting that Dam No. 31 had been constructed under that same contract. Dam No. 31 has large mats in it. Dam No. 31 is a dame extending from the old Quarantine Station to Turtle Island. It was constructed under the contract of 1896, and, in answering Maj. Stanton, I had forgotten that fact. In that dam, there are some mats as high as seven courses and I wish to make that correction. I said that the last stone put on the Breakwater was in September. That is an error. The last stone put on was in October. And then in Mr. Charlton's cross-examination, he tried to make me appear as being the person who originated the statement "Bundles of Brush." I

have with me some letters which show that it was customary to use "brush",— "Brush" and "fascines". Sometimes these bundles were called "fascines" and sometimes they were called "brush"; and, if it is in order, I can introduce two letters here which will show that they were called "bundles of brush".

The Court: No. What answer will you make to that question now?

A. None at all. I think my statement was correct, only I have the letters to show that.

The Court: No; it is too late now.

419 Witness: In answer to another one of Maj. Stantons questions, I omitted one very important point. He asked me what I was consulted about by Capt. Carter, and I told him in regard to construction work and matters of that kind. I was also consulted as to the efficiency of all his men. Of course, this is very important to the Officer in Charge, as he wants to know exactly what is going on. I was required to tell him exactly what took place in the field, and I was required to give my opinion of each of the men. That was a private matter between Capt. Carter and myself, but I was required to do that. I made one misstatement in regard to my position at Leavenworth. The statement that I was an enlisted man, but the members of the Court understood that I suppose. Of course, I was an enlisted man, but I wasn't a soldier. I had the privilege of retiring at any time, and had no military duty, but I think that was understood by the Court. That is all with the exception of some explanation in regard to the personal letter I wrote Capt. Gillette.

The Court: That letter has been barred. Do you wish to correct the answer you made?

Witness: Yes, sir; one misstatement.

The Court: You can correct that.

Witness: I stated that I had made statements before the Board in regard to the assisting of Capt. Carter, of "Boosting", as it was called. I did not make that statement to the Board. The question was asked me by the Board whether I ever made that statement in a private letter, and I answered that I did.

The Court: What is your answer now?

Witness: That was the answer I made to the Board when they asked me if I had ever made that statement. It was not made to the Board, but in a private letter. That was a mis-statement.

The Court: With those corrections, your testimony is correct?

Witness: I believe it is; yes, sir.

Q. (By Judge-Advocate with permission of the Court)
420 Is that all the corrections you have to make?

A. In regard to that personal letter; that was barred out. I could not correct that. That is all.

Judge-Advocate: I submit now that the proper basis is before the Court on which to admit the letter which was ruled out the other day. It appears that this subject was brought in in cross-examining this witness in explanation of a letter, and a meaning was placed upon that letter which it did not bear before the Board, and that is a proper basis on which to admit in evidence its full statements,—the statements actually used by him; not an inference drawn upon it. I submit that it should go before the Court, and become a part of the record.

The Court: The Court understood that the statement made before the Board was an oral statement, and not a written statement in a letter.

Judge-Advocate: He has now stated that he did refer to a personal letter; that he referred to a personal letter written to Captain Gillette. The Court might ask him why he was writing a personal letter to his official superior.

Mr. Charlton: The situation is this: irrespective of where that expression occurred originally, he appears from this testimony, to have been asked if he had ever used such an expression, and not the contents of a letter; that was not inquired into before, as his explanation of that term wasn't entered into. Now, under what conceivable rule could the entire letter, filled perhaps with irrelevant matter, be introduced when the entire question addressed to the witness is in regard to one expression of it.

The Court: The statement was in writing?

Mr. Charlton: No, sir; the statement was made orally before the Board as to his explanation of the word "boost",—what he meant by using that expression "to boost", and that alone. The balance of the letter wasn't inquired into.

421 Judge-Advocate: I think perhaps it would elucidate this very much if the testimony of the witness on that point, given during the cross-examination by Mr. Charlton, be read. In the cross-examination of Mr. Charlton, this occurred:

"Q. Have you at any time stated publicly that Captain

“Carter’s appointment to London and upon the Nicaragua Canal Commission was due to the contractors?”

“By the Court: What is that question?”

“Has the witness at any time stated publicly that Captain Carter appointment to the London Legation, to the London Embassy, and upon the Nicaraguan Canal Commission was due to the influence of the contractors?”

“A. I never made any such public assertion as that.

“Q. Have you ever stated it privately, where it could be heard by other people?”

“A. I don’t think I have.

“Q. Did you never state it, upon your honor as a witness, I am referring to whether you have ever stated it in the hearing of other people?”

“A. I think I may have stated that before the Board.

“Q. Did you never say that the contractors had boosted Capt. Carter along?”

“A. I used that expression, yes, sir.

“Q. And when asked what you meant by ‘boosting’, you said they had secured for him the position of Military Attache to the London Embassy, and a place upon the Nicaragua Canal Commission.

“A. I did not say they had procured it; I said I thought so.

“Q. Did you have nothing to base that on except your thoughts?”

“A. That’s all.

“Q. In other words, that comes under the category of the lobby item, does it not? It is about the same basis, the same theory

“A. It is all hearsay evidence.

“Q. Hearsay? Well, who told you that?”

422 “A. I don’t know exactly; you can hear those things, and you can’t tell where you get them from.

“Q. Mr. Cooper, as a matter of fact, you told it to yourself; you are the only person that ever mentioned it; that is, you didn’t get it from anybody else, did you?”

“A. I think I heard it.

“Q. You can’t tell the person from whom you got it ?

“A. I cannot.”

And then he goes on. I think that is all of the testimony on that point.

Mr. Blair: On page 32, Colonel, you will find some more.

Judge-Advocate: Then, upon the Re-direct examination by the Judge-Advocate, this occurred: (reading)

"Q. You testified, Mr. Cooper, in regard to a statement made by you before the Board, what Board did you refer to?"

"A. The Board of Engineer Officers sent down here to investigate the charges made against Capt. Carter.

"Q. In regard to 'boosting' along the accused?"

"A. Yes, sir.

"Q. On what did you base that?"

"A. Simply matters that I had heard.

"Q. You used the same expression elsewhere?"

"A. Not that I know of; I don't know that I ever used that expression before, except to Captain Gillette.

"Q. Was that in a letter, or did you state it to him?"

"A. I think it was in a letter.

"Q. Is that the letter?"

"A. Yes, sir."

And then came the objection and the arguments.

Mr. Blair: Now, if the Court please, I suggest that orderly method, in accordance with the practice of Courts Martial, is to ask the witness which particular answer he desires to correct. That has not been done as yet.

423 The Court: The Court prefers that you recall the witness.

ARTHUR S. COOPER, a witness for the prosecution, recalled to the stand, testified as follows:

The Court: Have you any questions to ask him?

Judge-Advocate: I have no questions.

Mr. Blair: As I understand the witness, he said that he wanted to correct some testimony. I said, so far as my experience goes before Courts Martial, the proper method for him to do that is to point out the specific answer he desires to correct; that he has not done.

Judge-Advocate: It is a matter for the Court to pass upon. In this connection, I ask for a reconsideration of the action of the Court the other day, and would then offer the letter in evidence.

Mr. Blair: I desire, of course, to make an argument on that proposition, but I would like to know first what to direct my argument to.

The Court: The Court will ask the question.

Q. (By the Court) You stated in your testimony, Mr. Cooper, that you made a statement before the Board investigating Capt. Carter's actions here as to influence the contractors had brought towards securing his appointment to London and upon the Nicaragua Canal Commission. You first said that you stated this before the Board orally, as I understood it. Subsequently you said that the statement was contained in a letter written to the Board, or written to Captain Gillette.

A. The correction I wish to make is: I stated in my testimony that I made that statement to the Board. I didn't make that statement to the Board. I made that statement in a letter to Capt. Gillette. I was questioned in regard to that statement before the Board, but didn't make that statement before the Board.

Q. (By the Court) You wish to say, then, that you never made a statement of that character to the Board?

A. That is my recollection of it, sir.

424 Judge-Advocate: I offer this letter now and suggest that he be asked by the Court how he came to address a personal letter to his superior officer.

Mr. Blair: We object.

The Court: I don't think that is proper.

(Judge-Advocate,—by permission of the Court. You did identify this letter, did you not?)

A. Yes, sir.

The Court: (Addressing Mr. Blair, counsel for defense) Have you any objection?

Mr. Blair: We object to the letter being introduced in evidence. If the Court will hear me, I desire to speak on it.

The Court: State your specific grounds.

Mr. Blair: The witness was asked certain questions with reference to the statement that they were "boosting" the accused along, with reference to the statement that the contractors were "boosting" the accused along. He stated in substance after come fencing with the Colonel examining him, that he had made such a statement before the Board. Now, he desires to correct that statement, and say that he made it in a letter. We asked him nothing whatever about a letter. If he had answered us that he had never made the statement, that—if he had given categorical answers to our questions—he had never made the statement, that he had never made the statement privately, that he had never made

the statment to the Board of Engineer Officers, then our questions cease. If the Court please, I will read our questions: (Reading from stenographic report) "Q. Have you at any time stated publicly that Capt. Carter's appointment to London and "upon the Nicaragua Canal Commission was due to the contractors? A. I never made any such statement as that. Q. Have you ever stated it privately, where it could be heard by other people? A. I don't think I have.

"Q. Did you never state it upon your honor as a witness, I am referring to whether you have ever stated it
425 "in the hearing of other people?

"A. I think I may have stated that before the Board.

"Q. Well, did you do it? Don't you know whether you
"said it or not?

"A. I can't remember everything I said before the Board.

"Q. Did you never say that the contractors had 'boosted'
"Capt. Carter along?

"A. I used that expression, yes, sir.

"Q. And when asked what you meant by 'boosting', you
"said they had secured for him the position of Military Attache to the London Embassy, and a place upon the Nicaragua Canal Commission.

"A. I did not say they had procured it; I said I thought
"so.

"Q. Did you have nothing to base that on except your
"thoughts?

"A. That's all."

In those questions, the Court will observe that we have made no reference whatever to any letter, and, on the re-cross-examination, no where was any reference made to any letter. Had the witness stated, instead of giving the answer he did, I might have; if he had stated it, No; it was in a letter, then the inference is that our questions would have ceased, or, if he had given categorical answers to the questions, they would have been in each instance,—No. Now, the letter was brought out by the Judge-Advocate on the re-direct, and I submit that it is not proper for the Judge-Advocate, being the adversary, to bring out the question about the letter, and say, Because I brought it out, your adversary, this letter is admissible in evidence. The Court will observe that we studiously avoided, having in mind this very letter, of which we have a copy, any reference to this letter, and avoided any reference to any writing, and, had the witness followed out his duty as a witness, and made categorical answers to our questions, the

letter never would have been mentioned, and was not
 426 mentioned in our cross-examination. We submit that the
 Judge-Advocate cannot interrogate him again, and bring
 out this matter of a letter, and then introduce it, because,
 by inference, we had reference to a letter to which we did
 not refer; and now, without practically changing his testi-
 mony, in an attempt to explain an answer, he brings forward
 this letter, and the Judge-Advocate seizes upon that with the
 idea, basing it upon the explanation of this witness, that he
 may introduce it in evidence. We submit that it is not proper.

Judge-Advocate: The simple proposition to submit to the
 Court is this: that the witness was examined before the Board
 of Engineers as to the meaning of a phrase used by him in a
 letter under consideration, and that that matter has been
 brought into this case by the defense, and that the witness
 himself is entitled, in view of the line of examination pur-
 sued, to have the letter read to the Court, and spread upon the
 record.

The Court: The Court will retire for consultation.

(The Court retires at 12.36 o'clock p. m., to an adjoining
 room for consultation, after which, at 12.53 o'clock p. m., all
 the members of the Court returning, the President, in the
 presence of the accused, his counsel, the Judge-Advocate and
 the Reporter, announced as follows:)

The objection is not sustained, and the letter will be re-
 ceived in evidence.

Judge-Advocate: I will read to the Court the letter, marked
 "Personal": (reading)

"Tybee Island, Ga., Aug. 7, 1897.

"Capt. Cassius E. Gillette,

"Corps of Eng'rs, U. S. A., Savannah, Ga.

"Dear Sir:

"Before answering your letter of yesterday officially, I de-
 "sire to make a personal request of you, hence this personal
 "letter. This letter I speak of shows me that you intend to go
 "back of the time you assumed charge of this district,
 427 "presumable for the purpose of making an official report

"on the matter. Before you take this serious step, I wish
 "you to know what the consequence will be. Capt. Carter is,
 "as you probably know, an extremely bright, and even bril-
 "liant, man; and is therefore a credit to his Country and also
 "to the Engineer Corps. He has done a great deal of cred-
 "itable work in this district. He is also a very ambitious man,
 "and it is this ambition which I now fear has brought him

"into trouble. He has yielded to temptation, and probably
"allowed the contractor (or a particular contractor) to do as
"he likes in exchange for their influence and power to boost
"him along. If you pursue this investigation, you are now
"making, to the end, it will undoubtedly cost Capt. Carter his
"commission, and be a stain on the engineer corps of which
"you are a member. I therefore beseech you to drop the mat-
"ter, that is, only so far as the past is concerned. The only
"real wrong done, so far as the Government is concerned, has
"been to pay the contractor about 1/3 to 1/2 more for the work
"than he rightly deserved. The results have been gained just
"as well as though everything was done exactly according to
"specifications. The mischief is not serious. Besides, what is
"there to be gained by this investigation. I have already
"pointed out what the loss will be. As far as I am personally
"concerned, I have nothing to fear. I have done nothing that
"I would blush to see published in the newspapers. It is very
"galling to me, however, to have to give evidence against Capt.
"Carter. I at first thought of resigning, but then I would be
"assuming Capt. Carter's faults, and perhaps lose my own
"standing as an engineer. While that would be a very mag-
"nanimous conduct on my part to let Capt. Carter carry off
"all the honors, after doing the bulk of the work myself, and
"assume all of the blame to shield him, I am not going to do
"so. My standing has cost me about 20 years of hard work,
"and I do not intend to relinquish it so easily.

"I sincerely hope, however, that you will take the same view
"of this matter that I do.

"Yours respectfully,

428

"A. S. COOPER.

"P.S.—I would suggest that I be permitted to reply to
"your letter with the statement that all of the July mats were
"sunk before receiving your orders."

"A. S. C."

I ask now that the official letter of Capt. Gillette, as suc-
cessor of Capt. Carter, to which this was a reply, or rather a
response, be admitted in evidence. I withdrew the tender of
the letter the other day upon objection of Counsel, but I pre-
sum they will have no objection to making consecutive his-
tory.

Mr. Blair: We have no objection.

Judge-Advocate: I read from my copy, with consent of
Counsel, who interpose no objection to the introduction of it
as evidence. (reading)

“U. S. Engineer Office,

“Savannah, Ga., August 6, 1897

“Mr. A. S. Cooper,

“Assistant Engineer, Tybee Island, Ga.

“Sir:

Mr. Daniels' report of mats for July for Tybee break-water, are returned herewith. You will please have him endorse on the reports whether or not the mats were built according to the printed specifications, and if not so built, why not, and an estimate showing what proportion the material used in each mat bears to the amount that would have been used had the mats been built according to specifications.

“Very respectfully,

“CASSIUS E. GILLETTE,

“*Captain of Engineers.*”

Mr. Blair: I presume now that we have the undoubted right to cross-examine this witness upon this letter.

The Court: Certainly.

Cross-Examination by Mr. Blair.

Q. What portion of your letter of August 7th is an answer to the letter of August 7th written by Capt. Gillette to you?

A. I should say all of it.

Q. To what portion of the letter of Capt. Gillette to you is this paragraph an answer: “Capt. Carter is, as you probably know, an extremely bright and even brilliant man, and is therefore a credit to his Country and also to the engineer corps.” What portion of the letter from Capt. Gillette to you is that an answer to?

A. That is not an answer; that is an argument.

Q. Then it is not in answer to anything contained in the letter of Capt. Gillette to you?

A. That letter—

Q. Answer yes or no?

A. I don't think it can be answered by “yes” or “no.” “Yes” or “No” would not express the proper answer to that question.

Q. Very well. To what portion of Capt. Gillette's letter to you, is this paragraph in your letter to him an answer: “He has yielded to temptation and probably allowed the con-

“tractor (or a particular contractor) to do as he likes in
“exchange for their influence and power to boost him along?”

A. That letter was written because I did not want—

Q. Can you answer my question Yes or No?

A. I cannot.

Q. Can you point out any particular paragraph in Capt. Gillette's letter to which the paragraph I have read is an answer?

A. I cannot.

Q. “If you pursue this investigation you are now making to the end, it will undoubtedly cost Capt. Carter his commission, and be a stain on the engineer corps of which you are a member.” Can you point out in the letter of Capt. Gillette to you any interrogatory to which that is an answer?

A. That is not an answer; it is an argument.

Q. Then it is not an answer to any particular interrogatory of Capt. Gillette's letter to you, is it?

A. It is not.

Q. “The only real wrong done, so far as the Government is concerned, has been to pay the contractor about 1/3 or 1/2 more for the work than he rightly deserved.” To what particular question in Capt. Gillette's letter to you is that an answer?

A. As I said before, that is an argument to try to get Capt. Gillette to withdraw his letter. It is not an answer; it is argument.

Q. A voluntary statement on your part?

A. It is.

Q. “I at first thought of resigning, but then I would be assuming Capt. Carter's faults, and perhaps lose my own standing as an engineer.” Do you mean by “assuming” that you would take the burden of Capt. Carter's faults? Is that your meaning?

A. If I resigned, I would probably be looked upon in the light of doing wrong work myself,—knowingly doing work wrong.

Q. “While that would be very magnanimous conduct on my part to let Capt. Carter carry off all of the honors, after doing the bulk of the work myself, and assume all of the blame to shield him, I am not going to do so.” When did you first begin to do the bulk of the work on this improvement?

A. By “bulk of the work,” I meant the execution of the contracts. I had no reference to any other work at all.

Q. You had no reference to the project?

A. Not at all.

Q. You took to yourself no credit for the engineering skill displayed in the conception of this project?

A. I had nothing to do with that.

Q. And the credit which you did take to yourself of this successful construction, is based largely upon these mats which you have attacked in your testimony?

A. It is not.

Q. What is it based upon then?

431 A. Upon the fact that I was in charge of the work from the time it began. I was on the work at least twelve hours a day for at least three years. I didn't execute that work at long range from some comfortable desk in some comfortable office.

Q. And you put in these defective bundles of brush?

A. I put in such material as was presented to me to put in. I had no power, nor influence, to get anything else. I had to accept what was given to me to work with, and I did so.

Q. And that was creditable to you, was it?

A. The fact that I succeeded in getting the work done with inferior material,—accomplished the results intended to be accomplished,—I should say was creditable to me.

Q. And the method of putting in this inferior material, was that creditable to you?

A. Just as I said before, if a man can take inferior material and accomplish the same results that could be accomplished with good material, that shows ability.

Q. And you claim a high order of that kind of ability?

A. I simply put my whole life and energy into that work, and accomplished what was intended to be accomplished.

Q. You laid this inferior material along the lines of jetty selected by you, of course?

A. I did not; I had nothing to do with the plan. I simply executed the plan.

Q. And you had nothing to do with the sinking of the mats, did you?

A. Yes, sir, I did.

Q. What did you have to do with the sinking of the mats?

A. How do you mean?

Q. What did you have to do with the sinking of the mats?

A. Officially, I had nothing; practically, I had a good deal.

Q. You pointed out to the contractor where the mats were to be sunk?

A. Yes, sir.

Q. That was in accordance with the plan devised by
432 Capt. Carter,—along the lines indicated by Capt. Carter?

A. Capt. Carter indicated where the mats were to be sunk.

Q. Then it was not very creditable to you to sink the mats along the lines indicated by Capt. Carter,—in the particular places designated by Capt. Carter?

A. I claim no credit for the plan whatever, and did not so state in my letter.

Q. Did you put stone upon the mats in any different places from the places indicated by Capt. Carter's plan?

A. Most decidedly; in some instances I did.

Q. You deviated, then, from Capt. Carter's plan?

A. There was nothing in the plan to say where the rock should go.

Q. The rock was to go on the mats, wasn't it?

A. Yes, sir.

Q. The mats were to go at the places indicated by Capt Carter, weren't they?

A. They were.

Q. Then the rock was to go at the places indicated by Capt. Carter, wasn't it?

A. So it was, but the mats—

Q. Answer my questions, if you please, interrogatively, If you have any explanation to make, you make it on the re-direct.

A. Very well.

Q. You didn't have anything to do with the silting up of those mats, did you?

A. Not a thing.

Q. The powers of nature did that?

A. They did.

Q. You had nothing to do with the tides or current?

A. Not at all.

Q. Wherein, then, lay your particular efficacy in this work?

A. In executing the work.

Q. In what particular?

433 A. In arranging the details of the work. When this work was going on, there were probably fifteen or twenty barges and three tug-boats, and the work was going on some-

times in as many as seventeen places at once, and it required considerable skill to keep that plant and all this work going on at the best advantage. If a certain thing at a certain point was not done at a certain time, it might go to pieces, and, to keep the work going and execute it to the best advantage, it took considerable brain work.

Q. And that is the brain work you did?

A. Yes, sir.

Q. And you didn't want Capt. Carter to have any honor for that, but you wanted it?

A. I think I was entitled to that honor.

Q. Is it not true that the only portion of this long letter dated August 7th, 1897, in answer to Capt. Gillette's letter, is like the woman's letter,—in the post-script, the post script being, "I would suggest that I be permitted to reply to your letter with the statement that all of the July mats were sunk before receiving your orders?" That is a full and complete reply, is it not, to Capt. Gillette's letter?

A. It might be a full and complete reply, but I considered it necessary to make an explanation, and I made it.

Q. Made your explanation first, and then in your post scrip two or three lines long, made your reply to the letter?

A. It might be looked on in that way.

Q. The second paragraph of this letter of yours reads this way: "This letter I speak of shows me that you intend to go back of the time you assumed charge of this district, presumably for the purpose of making an official report on the matter." What is there in Capt. Gillette's letter to you to indicate that he intended, or to indicate his intention, to go back of the time when he assumed charge of this work?

A. There is a statement in his letter that he wishes
434 me to state whether the mats sunk were according to the specifications or not. In that respect, I knew that they were not in accordance with the specifications, and I knew if I answered the question in that manner, I would be required to explain why they were not in accordance with the specifications. Furthermore, I knew that Capt. Gillette had been to Fernandina, and had seen the style of mats put in there, and that he had ordered that work stopped, and ordered it done in accordance with the specifications; that showed me that he had started an investigation.

Q. Then you knew that outside of the letter Capt. Gillette wrote to you?

A. Yes, sir.

Q. The letter from Capt. Gillette to you refers merely to the July mats?

A. Yes, sir.

Q. And Capt. Carter left here early in July?

A. Yes, sir.

Q. And the mats Capt. Gillette inspected were made after Capt. Carter left here?

A. Some of them; yes, sir.

Q. Which ones were made before Capt. Carter left here that Capt. Gillette inspected?

A. None of them.

Q. Then your answer "some of them" is not correct?

A. No; it is not. That is, none of them that he had inspected.

Q. None of the mats that Capt. Gillette inspected were made prior to the departure of Capt. Carter,—is that true?

A. To the best of my knowledge and belief it is.

Q. So then, in answer to the letter of August 6th, 1897, which calls for an explanation of the report on the July mats, you say that the letter "shows me," shows you, "that you," Capt. Gillette, "intend to go back of the time you assumed charge of this district, presumably for the purpose of making an official report on the matter;" you say that is in answer to Capt. Gillette's letter to you. You didn't have any conversation, then, with Capt. Gillette or any one else, with respect to the subject matter of your reply?

A. I never mentioned it to anybody. That is probably the second time I had ever expressed an opinion of that kind.

Q. The second time?

A. Yes, sir.

Re-direct Examination by Judge-Advocate.

Q. Did you consider the personal letter written by you, which has been identified and read to the Court, in any sense an answer to the official letter sent you by Capt. Gillette?

A. In one sense it is an answer. It is an answer in this way: it is an answer to him privately, to try to get him to withdraw his letter.

Q. Does it answer his letter?

A. No; it does not.

Q. Is it not rather an appeal than a reply?

A. It is.

(At this point in the proceedings, 1.15 p. m., Reporter W. O. Tarver was relieved by Reporter Geo. T. Cann.)

436 Judge-Advocate: Mr. P. E. Twiggs had expressed a desire, may it please the Court to make some corrections and explanation of his testimony from some point.

The President (To Mr. Twiggs): Do you desire the entire testimony read?

Mr. Twiggs: No, sir, Mr. President.

Judge-Advocate: I would like to ask you if your knowledge is gained from the newspaper account of the testimony, or from the testimony and if you would not rather have the evidence as it appears from the record.

Mr. Twiggs: I want it as it appears on the record.

Judge-Advocate: What particular part of your testimony?

Mr. Twiggs: In reference to a question asked by Mr. Charlton, whether Captain Carter has instructed me that the interest of the government of the United States should be looked after and the specifications should be carried out. I answered that question here, no, that he had not. That is the part I want to explain to the Court.

Judge Advocate; Would you like that part read? Do you desire that portion read?

Mr. Twiggs;—I would like that portion read so I can make the necessary explanation in regard to it.

Judge Advocate;—I would call your attention Mr. Twiggs that you are still under oath.

Mr. Twiggs;—Yes sir.

Mr. Rose;—It is on page 31.

Mr. Twiggs;—I will state to the Court that I do this to do justice to all parties concerned.

The President;—The record will be read.

Mr. Rose;—page 31, the third question from the bottom.

(Here the reporter W. O. Tarver reads from the evidence of Paul E. Twiggs, taken on January 22, 1898.)

Reporter;—"Did Captain Carter ever tell you that your first duty was to look after the interests of the United States government?—I dont think so.—I want a positive answer
437 from you upon that point I say I have no recollection of Captain Carter ever using those words to me, I dont think there was any occasion for it.—Well, word that conveyed exactly the same idea to your mind? If he did I dont remember it.—Did he not say to you that your first duty was to look after the interests of the United States

Government and, that being protected, that the contractors were not to be pressed if they conformed with their duties? No, sir.—Then I understand you to swear positively that he never used any such expression and that you have never testified that Captain Carter did tell you that? Yes, sir, I will swear to that absolutely.—Now, on September 21, 1897, or in that neighborhood, in the City of Savannah, in the presence of at least three persons, was not this question asked you, and was not this reply given by you: Q. “The instructions given you then, were they not, to do all you could while there, to see that the interests of the United States were protected, and in doing so, if you could give any assistance to the contractor in any legitimate way, to help him facilitate his work you could do so? A. Yes, sir.” Is that true or not true? I dont think I made that statement.—Following immediately? Excuse me one minute, if I made that statement I misunderstood it.—Well, we will try the second question Q. “Your first duty was to look out for the United States and then afterwards, if consistent with your duty, you could give any assistance to the contractor that was proper? A. I think that is right, sir.” Did you make that answer? I may have made that answer, I dont remember.—Suppose you made that answer, was it true or false? Suppose I made the answer?—Yes, if it be true that you did make these answers to these questions, were the answers true or false? In the first place I dont acknowledge making those answers, I dont remember the questions.—That is not my question to you? I am going to answer it sir, let me hear those questions again, I would like to answer straight on that, sir. (Mr. Charlton, reading) “Q. The instructions given you then were, were they not, to do all you could while there, to
438 see that the interests of the United States were protected, and in doing so, if you could give any assistance to the contractor in a legitimate way to help him facilitate his work, you could do so? A. Yes, sir.” I think there was something said in regard to it, if I am not mistaken, I remember. I re-call it.—How much of it? I dont know, sir.—In regard to the assisting of the contractor I think I answered yes.—Now, you are an intelligent man, is it possible for you to misunderstand that question? No, I dont think so.—Shall I read the second one? Go ahead. (Counsel reading)—“Q. Your first duty was to look out for the United States, and then afterwards if consistent with your duty you could give any assistance to the contractor that was proper? I think

that is right, sir. I see what you are driving at, that was before the Board of Inquiry, was it not? Yes, sir? And not by Captain Carter, that question was asked me before the Board.—Yes, sir? I misunderstood it, yes, sir those questions are correct, I was under the impression that you meant that Captain Carter had given me those instructions in his office or on the work. Those questions were asked me before the board of Inquiry.—And were the answers given correct? I think I answered them in that way.—Dont you know? I think so, I dont remember exactly the wording of it.—You know these answers are not elaborately worded ones, one is yes-sir, and the other says “I think that is right sir”? If I said so, I will swear to it.—May I ask you whether you answered “Yes, sir” to the first question, and I think that is right, sir, to the second question? Who are the questions asked by?—I dont think it makes any difference who asked the question, Captain Carter asked you both of those questions? Yes, sir, I think that that was right.—I want to know whether it was right? I will answer yes, sir.”

By the President: What correction do you wish to make?

Mr. Twiggs: Well, there are portions of it, I dont know, showing there, which all explains what I want. I simply wanted to state, if, in answering that question in the beginning, that I was under the impression that Captain

439 Carter—or what Mr. Charlton referred to, was when Captain Carter gave me certain instructions when I went down on the works in the beginning, that those instructions were coupled with the first instructions that I was given, and that is the reason I answered “No”. At that time he didn’t give me those instructions. I was under the impression that that was what Mr. Charlton was driving at. In other words, when he gave me instructions and gave me charge of the works his instructions were, as the testimony will show, that I was not to press the contractor, and he did not wish military fascines made. I thought that he referred to that matter. I am not correcting that, that is right, I am only stating the way it came up; I thought that was the time that was referred to, and that he had given me those other instructions at that time.

By the court: Well, that is sufficient on that point.

Mr. Twiggs: I will state that Captain Carter did give me those instructions absolutely at different times, he may have done so more than once, I am certain he did so once, he may have done so afterwards.

By the court: What were you referring to when you said "He gave you those instructions"?

Mr. Twiggs: The instructions that the interest of the United States Government must be looked after and the specifications carried out.

The President: Any other corrections?

Mr. Twiggs: That is all, Mr. President.

Cross-Examination.

Questions by Mr. Charlton.

Q. Now that you are upon the stand and stated awhile ago that you had come to do justice, is there any other correction you wish to make?

A. I dont think so, Mr. Charlton.

440 Q. Are you prepared to make a correction that the average amount you put in was as on those (indicating)?

A. I do not, I said what I thought was correct there.

Q. Have you talked with any one since the testimony of yesterday?

A. What do you mean?

Q. About any feature of this case?

A. I have discussed it, I suppose just the general idea of the court and so forth, but with reference to that one question—Yes, I did discuss it.

Q. With whom?

A. Mr. Austen, he and I discussed the matter together.

Q. Anybody else?

A. I think not, I think Mr. Hall was present, possibly, when I discussed it with him.

Q. Any one else?

A. No, sir.

Q. What are you talking about now, the correction you have just made?

A. Yes, sir, that's right.

Q. Have you talked about anything else about the case?

A. I dont think I can recall anything else just at present, I may have, and may not have, I may have made casual remarks in regard to it, I dont know what, I think I was talking to them at the time you passed me on the corner Saturday afternoon.

Q. They are witnesses for the prosecution, are they not?

A. Yes, sir, I think so.

Re-direct Examination.

Questions by the Judge-Advocate:

Q. Have they been examined for the prosecution?

A. I think not, sir.

Q. I will ask one question more, with the permission of the court, how did you carry out those instructions given you by Captain Carter?

441 A. What do you mean, Colonel Barr?

Q. About looking out for the interests of the Government?

A. How did I carry them out?

Q. How did you carry them out?

A. I did not carry them out.

Q. Why not?

A. Well, sir, for two or three reasons; in the first place, I did not think that Captain Carter wanted me to do that which he was not doing himself.

PAUL J. KEATING, a witness for the prosecution, having been duly sworn, testified as follows:

Direct Examination.

Questions by Judge-Advocate.

Q. What is your full name, Mr. Keating?

A. E. J. Keating.

Q. What is your business?

A. I am a cement tester at present.

Q. Have you been in the service of the United States in the work of improvement of rivers and harbors in this Engineering District?

A. Yes, sir.

Q. When?

A. Well, altogether since about the 6th of June, 1893.

Q. How were you first employed?

A. As recorder to a survey party.

Q. That was in 1893?

A. Yes, sir.

Q. How were you employed in 1894?

A. As boatman.

Q. Throughout the year?

A. Well, not that title, I was inspector of pile driving and mat construction.

Q. You were borne on the rolls as a boatman and paid as a boatman?

442 A. I dont know about the pay, sir.

Q. So far as you knew, you were employed as a boatman?

A. That was the way I was carried on the rolls, yes, sir.

Q. Did you receive any instructions from the Engineer officer in charge at that time, Captain Carter, the accused?

A. At what time?

Q. When you were acting as inspector?

A. Yes, sir.

Q. Were those written or oral instructions?

A. Well, I received instructions from Captain Carter on many different occasions, I dont know which occasion you refer to, Colonel.

Q. Well, to whom were you ordered to report?

A. I was ordered to report at one time to Mr. Cooper by Captain Carter.

Q. Was that order in writing or given to you verbally?

A. In writing.

Q. Have you it with you?

A. Yes, sir.

Here the witness produces the order, it is offered to counsel for the accused without objection.

Q. Read that so that its date of the instruction you got may appear?

A. June 17, 1894.

Q. Is that the 17th?

A. June the 17th, yes, sir. "Mr. Keating will report to Mr. Cooper at 79 Charlton Street at 8 o'clock this Sunday evening. O. M. Carter.

Q. What work were you then placed upon, Mr. Keating?

A. I was superintending construction of mats.

Q. Where?

A. The first place that I went to was Dutch Island, that is about 4 miles from Savannah, I think it is 4 or 5 miles. It is further than that by water, probably 10 or 12 miles.

Q. Was it the place where mattresses were being constructed from bundles being brought to the place?

443

A. Yes, sir.

Q. Then you saw mattresses in course of construction?

A. Yes, sir.

Q. And saw them after they were built, ready to be towed away to be sunk?

A. Yes, sir.

Q. Well, state what the result of your inspection of those mattresses was as to their condition?

A. Those bundles were made up in the woods.

Q. Those bundles were found right there?

Mr. Charlton: Confine him to what he knows.

Judge-Advocate: I think he has thus far done so.

Witness continuing, says: Who sent us to observe the construction of mattresses?

Q. No, not at present. Certainly;—after the mattress was constructed and you inspected it, what kind of mattress did you find?—that is all.

A. Well, it would be a 9 course mat, constructed of poles and brush.

Q. Did you know whether it was properly constructed or not, after you had seen it?

A. According to my instructions, yes, sir.

Q. Did you have a copy of the specifications?

A. Not with me; I don't think I did, I am not positive either on that point.

Q. Had you been furnished with the specifications?

A. I had read the specifications; I had had a copy, but I am not positive that I had a copy at that time.

Q. Do you remember the mattresses and the requirements of the specifications?

A. Only in a general way, I had an idea how they compared with the specifications.

Q. Well, what were your instructions as to the mattresses, Mr. Keating?

A. Mr. Cooper, when I went to see him, told me how he wanted the brush made into bundles and laid on grillages of poles, made into mats. He told me that he wanted the straw, pine brush, trimmed. He didn't want the straw. That is the only particular brush that he said he wanted trimmed.

Q. The pine brush?

A. The pine brush. He said the mattresses had been coming there with too much pine straw in them, and that he didn't want that. Do you wish me to go into the instructions that Mr. Cooper gave me?

Q. No, I will let that go at that. Did you examine those mattresses after they were constructed and see if they were compactly built?

A. Well, I was there during the time when the mat work was constructed. I could see them as the work progressed on the mats.

Q. Were they compactly built?

A. Well, that is a question there might be a difference of opinion upon.

Q. Look at those bundles on that platform back of you; you may go back and examine them if you like, Mr. Keating.

A. This is very much like the brush, only that it is dead, there are no leaves in it. When it was a mat it was a little better than it is now.

Q. How as to their being tied?

A. They were tied better than that.

Q. Tied closer?

A. Yes, sir.

Q. All of them?

A. All that I could inspect, that was under my directions, they were.

Q. At that time, in 1894, did you walk over any one of those mattresses, or course of mattresses after it was constructed?

A. At that time, yes, sir; yes, sir.

445 Q. Well, was that a mattress that was made before you arrived or after you arrived?

A. I think it had been finished just before I arrived. It was there finished.

Q. You did not witness its construction?

A. No, sir.

Q. Could you walk over it?

A. Well, I could walk over it.

Q. Did you walk over it?

A. Yes, sir.

Q. With what result?

A. Well, I found a hole in it.

Q. How large a hole?

A. I dont remember that now, sir. I could not state positively, but I went down into it.

Q. You did not fall into it, but you simply made your way into it?

A. I went into it. I saw it before I got into it. I didn't fall into it.

Q. How long were you at the mattress camp at that time?

A. At that time?

Q. Yes?

A. Well, I was there about 6 weeks, all together.

Q. 6 weeks?

A. About 6 weeks.

Q. Do you know how many men were engaged in bringing bundles of brush to rendezvous?

A. That would be the drivers, the teams brought the brush.

Q. How many men were engaged, that is, there that you saw, not those that you estimate?

A. Those that I saw right there at the camp, at the landing? I frequently went out into the woods to show them how I wanted those bundles constructed as per my instructions.

Q. Whom did you show how to get up the bundles?

446 A. I showed the men that had charge of the men who were constructing those.

Q. Who were the laborers who were constructing those?

A. I dont remember.

Q. Do you know how many there were?

A. Well there were—I made an estimate some time ago. In the estimate there were 83 men. It would average 83 men. But since that I have discovered I made a mistake and it was but 76 men.

Q. Have you made an estimate of the cost of manufacturing those mattresses?

A. Yes, sir.

Q. Constructed as you saw them?

A. Yes, sir.

Q. Was is your estimate as to their cost per square yard?

Mr. Blair: We object, if the court please: This man has not been shown to have the slightest qualification to give his opinion as an expert of the cost of the construction of these mats.

Judge-Advocate: I will withdraw that for the present.

Q. How would you go to work to make an estimate of the cost of construction?

A. I would learn the probable amount of labor that it took and about how much the labor was paid per day, and about what the materials cost, and the wire, and so forth.

Q. Have you possessed yourself of sufficient knowledge of the subject so that you can estimate the cost per square yard of those mattresses?

A. I think so.

Q. Well, what is your estimate?

A. About 10-1/10 cents.

Q. These mattresses to which you have been testifying, I understand, have reference to those sunk under the contract of 1892?

A. Yes, sir.

Q. Now, have you seen any mattresses under the existing contract, that of 1896 in the Savannah Harbor?

A. Just a few, yes, sir.

Q. Well, how many?

A. I think about 10.

Q. What was their general character?

A. They were not so good as those that were constructed under my direction in 1896.

Q. '96.

A. 1894.

Q. Well, in what way?

A. Well, they were not so compactly built. The brush was not so compactly pushed up together it was not as solid as those that were built under my charge.

Q. You were along there in an official capacity when you saw them?

A. I was assisting the inspector who had charge of the work.

Q. You were in the employment of the government at that time?

A. Oh, yes, sir.

Q. Well, what experience did you have with any of those mattresses?

A. I sunk one myself while the inspector was not there, while he was away sick. This mat did not hold together very good, there was a very big sea running at the time, however.

Q. Did you find any mattresses not properly compressed?

A. Yes, sir.

Q. How many?

A. Well, I can recall one.

Q. How was that defective?

A. It had a hole in it.

Q. A large one or a small one?

A. I went through it.

Q. Down into it?

A. I went through it to the deck of the lighter from the top to the bottom.

448 Q. Did you come out the mattress the same way you come in?

A. I dont remember that, sir, I dont know whether I did or not. I dont remember whether I came up through the mat, my impression is I crawled out on the deck of a stone barge which was very close to to the one that had the mat.

Q. That is simply a matter of memory and not a statement of fact?

A. Yes, sir, the last question.

Q. Was more than one layer of bundles of brush laid upon a grillage before another grillage was placed about that?

A. I dont remember ever having seen it.

Q. You saw it then complete with one layer of brush and a grillage then put in place, and that was uniform in the construction of those mattresses that you saw made?

A. Yes, sir, generally more than one course of poles, more than one grillage.

Q. But one layer of brush?

A. One layer of brush, yes, sir.

Mr. Blair: May it please the court, before proceeding with the cross examination of this witness. The court has doubtless observed, as we have observed, that the engineer officer in charge now in this district has been actively assisting the Judge-Advocate in presenting the case. I wish the court to distinctly understand that I have no objection whatever to the Judge-Advocate having any assistance whatever which he may require or desire, but inasmuch as the engineer officer in charge here is not in uniform we infer that he is not officially the assistant of the Judge-Advocate: and we think the accused has the right to have it spread upon the record just in what capacity the engineer in charge is here in the court assisting the Judge-Advocate, and we respectfully ask the court that that be spread upon the record.

Judge-Advocate: I will state very frankly to the court that Captain Gillette is assisting me, not only in the court all day, but usually until a pretty late hour at night; that 449 he is assisting me in the performance of my duty, in the preparation of this case for the proper presentation and consideration of the court, and that without his assistance I should be very much at sea very often: and while we are upon this point, not only he is assisting me, but the entire force of his office is assisting me and we are all engaged, as is this court engaged, in endeavoring to ascertain what is the truth of this matter and I am very glad to have it all go upon the record and let the reviewing officer see how much and how little assistance I am having.

Mr. Blair: We of course could not make any objection to the Judge-Advocate having the assistance of the engineer in charge, but it has not, as yet, appeared in the record that he is assisted other than by Captain McClure, but it is patent to the eyes of every member of the court that Captain Gillette is here actively assisting, and in as much as he was not in uniform we assume that he was doing it in an individual capacity. I presume now it is upon the record, that is all and will be satisfactory.

Judge-Advocate: I would like this further to appear, that Captain Gillette is attending to the duties of his office, as well as assisting me, I have never given the subject a thought as to whether he should be in uniform or not.

By the President: That will appear upon the record, that is all that is necessary.

Cross-Examination.

Questions by Mr. Charlton:

Q. Mr. Keating when did you first come into the employment of the United States?

A. 1893.

Q. In the capacity of a boatman, I think you said?

A. Recorder.

Q. What are the duties of a recorder?

A. That is, to record the soundings when the leads-
450 man calls them out to him in making surveys.

Q. You subsequently became a boatsman?

A. Yes, sir, that survey was ended and Captain Carter gave me a position as boatsman.

Q. In the same year?

A. In the same year.

Q. When did you first become an inspector?

A. In the same year.

Q. 1893, was that?

A. 1894, I beg your pardon, 1894.

Q. How long did you continue an inspector of mattresses?
I mean, of course mattresses?

A. Oh, of mattresses?

Q. Yes.

A. Just about 6 weeks.

Q. And that is all the experience you have had?

A. In the construction of mattresses.

Q. In the construction of mattresses, 6 weeks?

A. About 6 or 7 weeks, yes, sir. It was from the 18th of June until about the 28th of July, I think.

Q. And that experience was out at the camp of construction, was not it?

A. Yes, sir, usually.

Q. You were sent there to see that the work was properly done?

A. Yes, sir.

Q. You were sent under instructions of Mr. Cooper?

A. Yes, sir.

Q. The instructions came from him and not directly to you, and not from Captain Carter?

A. Yes, sir.

Q. You went there, and to the best of your ability saw that it was properly done? Didn't you see it so well done that you, yourself, stated that the mattresses were so well built that

451 you had worked yourself out of a job?

A. I believe I did make that remark.

Q. It was true when you made it, was not it?

A. I think it was, yes, sir.

Q. Did Captain Carter ever have occasion to reprimand you for anything?

A. Yes, sir.

Q. What for?

A. Some part of the work I did that didn't suit Captain Carter's ideas.

Q. It was defective, was not it.

A. He said it hadn't been done right.

Q. Was not the contractor ordered to repair it, or do you remember that?

A. I do not, sir. Yes, sir, Captain Carter did say it would have to be repaired.

Q. Now, those mattresses that you inspected during your 6 weeks sojourn at the camp, during your entire duty as inspector were they not entirely satisfactory to Mr. Cooper?

A. I think they were, I think he told me they were satisfactory to him. I think I met him in the office one day and he told me they were coming all right now.

Q. Now, Mr. Keating, just one or two more questions; you have stated an estimate of the probable cost of those mattresses?

A. Yes, sir, but that is the estimate I desire to withdraw, this estimate I presented to the Board.

Q. Did you present it to the Board or to Captain Cassius E. Gillette, they are not the same thing?

A. Exactly.

Q. It was at Captain Gillette's request you presented it to him?

A. Yes, I think that was it, I think he asked me to submit a letter to him; yes, sir, I think that was it.

Q. You desire to withdraw it now?

452 A. Now.

Q. Well, nobody has put it in yet. Have you that estimate with you?

A. I made another estimate since then.

Q. I understand, I am talking about the original one now, have you that with you?

A. Yes, sir.

Q. Will you show it to me, please, I want to ask you just one question about it. (Here the witness hands counsel the estimate.) This is signed by you?

A. Yes, sir.

Q. I notice that in estimating about the plant which you put at \$16,000 you estimate as high as 25 per cent interest?

A. Well, 10 per cent interest on the plant.

Q. And what is the balance for?

A. Sinking fund.

Q. Where did you run across the word amortization?

A. I got that word from Mr. Geiseler, it expressed what I wanted.

Q. You never heard it before?

A. No, sir, I never did.

Q. Is there anything else that you didn't get from somebody else?

A. Yes, sir.

Q. What else is there?

A. That I didn't get from somebody else?

Q. Didn't you get it all from somebody else?

A. Well, if you put it in that way. Of course, the cost of labor of course I had to get that from somebody else.

Q. You had no experience in that?

A. No, sir.

Q. You had no more experience with the cost of labor than you had with amortization?

A. I heard the men say what they were getting, I have seen them hire them and tell them how much they were
453 going to get a day. If that is hearsay evidence.

Q. You had never heard the word amortization until Mr. Geiseler suggested it to you?

A. Yes, sir.

Q. Your idea now is that it meant a sinking fund?

A. Yes, sir, that is what I did, that is what I thought the word meant, a sinking fund, yes.

Q. I was only concerned about it because I was very much in a condition that you are, I had never heard it until I look it up and found that it meant the alienation of lands or tenements in mortmain, a term of scotch law which has nothing to do with mattresses at all.

A. I don't care, that expresses my meaning.

Q. When you feel through the mattress down here—

A. I didn't fall through.

Q. Didn't you? You went down upon the barge, did you purposely go through it and then crawl out at the side?

A. I think so.

Q. Did you report that mattress?

A. No, sir.

Q. Now the mattress you say that almost went to pieces, the one I think when a heavy sea was on, did that mattress get away or was it grappled back?

A. I don't remember that it was.

Q. Can you recall the fact that it did get away? And that you did rescue it finally?

A. No, sir.

Q. You don't recall that? Now, in 1894, when you went down in the mat, who was present?

A. There were two or three present, Mr. Gaynor was present.

Q. Which Gaynor?

A. Ed. Gaynor.

Q. Who else?

454 A. That is all that I remember that was right there with me, if I am not mistaken, Mr. Gaynor went down in the mat with me, I may be mistaken.

Q. Anybody else that you recollect? I want to get at the person who saw you go down in the mat.

A. I think that his foreman also saw me, Tom Gaynor. That is all I know; I think Tom Gaynor, I am not positive as to Tom Gaynor even.

Q. Were you permitted to show any favors to the contractors, Mr. Keating?

A. No, sir.

Q. Nor did you?

A. Nor did I.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. Before being asked to prepare that estimate, which counsel has shown you, Mr. Keating, how did Captain Gillette come to know that you had experience as an inspector?

A. I remember now. I went to Captain Gillette and told him I had made a mistake inasmuch as I had stated to the Board that it was in 1893 that I was at the brush camp, no, in 1894—I was really in the brush camp in 1894. Then Captain Gillette asked me if I had any records by which I could make an estimate of the cost of mats.

Q. Then you yourself went to him. He didn't come to you?

A. No, sir. I didn't go to him for that purpose, understand.

Q. But you brought to his knowledge the fact that you had been an inspector at a mattress camp?

A. Yes, sir, of course, that was brought to his knowledge the day before when I was before the Board.

Q. Did he suggest to you that you could receive any assistance in making this estimate?

A. Yes, sir. He told me; in fact he went with me to Mr. Geiseler and he told me that Mr. Geiseler would help me, 455 to give Mr. Geiseler the data, or tell Mr. Geiseler that I would submit a letter to him; that he wanted Mr. Geiseler to help me—I don't remember the words.

Q. That he could aid you in what way, can you conceive?

A. I understood that it was in shaping the estimate.

Q. As to the manner of making the estimate.

A. As to its shape, its general form.

Q. As to what should enter into the consideration in determining the cost?

A. No, sir.

Q. That, you yourself knew?

A. Yes, sir. Those I thought I knew.

Q. You knew the amount of labor and the amount of material required to construct one?

A. I thought so, yes, sir.

Q. In the 6 weeks experience you had manufacturing an article of that kind, you could make some estimate?

A. Yes, sir.

Q. You know of the number of men employed on them?

A. Yes, sir.

Q. Did anybody in the government service, that you are aware of, here in this district know any more about the subject than you did?

A. I don't know.

Q. As to the number of men employed about the mattress camp?

A. I really don't know.

Q. Do you know of any other inspector than yourself being on duty in that camp?

A. Not in that camp, I don't think there had been any other inspector in that camp.

Q. Or any other camp in this district?

A. At that time, no sir.

Q. Or since that time; I mean while Captain Carter was in charge of this engineering district?

A. I don't know of any one.

456 Q. In your estimate, which the counsel showed you on the cross-examination, you allowed a certain percentage; did you allow in that estimate anything for wear and tear or loss on the value of the plant used?

A. Yes, sir.

Q. In what item was that allowed?

A. That was allowed under the head of repair.

Q. Read it please in response to my question.

A. Read the whole?

Q. Read in response to my question.

A. I would like to have you repeat. (Here the question is repeated). Wear and tear on the plant?

Q. Yes.

A. That is what I understand by amortization, in other words, I mean by that that I allowed 10 per cent to replace that plant.

Q. And that is the item to which you referred?

A. Yes, sir.

Q. I understood you to say that you estimated there for the labor a greater number of laborers than you found subsequently were actually employed?

A. Yes, sir.

Q. What did you allow a day for the labor of those men in your calculation?

A. 80 cents.

Q. What was your basis for making that the pay they received?

A. What the men told me.

Q. No matter what they told you. Not upon what they told you, simply, but from what you knew from seeing them paid, or knowing what contract they made, you based it, you based what they were paid?

A. Yes, sir.

Q. What changes did you make in the estimate submitted to you by counsel, or the basis of the estimate, and that subsequently made by you?

A. The mat I based that estimate on was built under very favorable circumstances and it was rushed through, they had a good many men, and it was rushed through in a hurry.

Q. You made the estimate in a hurry, or the mattress was made in a hurry?

A. No, the mattress was made in a hurry, it was built in about 2 days.

Q. Well, what change did you make in the subsequent estimate?

A. I found instead of 8 $\frac{1}{10}$ it is about 10 $\frac{1}{10}$ for a 9 course mat.

Q. That is a more carefully considered estimate by you than the first one?

A. Yes, sir.

Q. And that was 10 $\frac{1}{10}$ cents?

A. Yes, sir.

Q. And to which you had given more time?

A. Yes, sir.

Q. In securing the assistance of Mr. Geiseler, did you obtain from him information as to the amounts estimated, or simply aid in making up the estimate?

A. That is all.

Q. The estimate then was based entirely upon information furnished by you?

A. Yes, sir.

Q. You simply took advantage of Mr. Geiseler's knowledge?

A. That would be about it, I expect, it would not be so pretty to look at, probably if I fixed it up myself.

By the President: Has the court any question. There are none.

458 JULIUS H. GRUNDEL, a witness called for the prosecution, having been duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. What is your full name?

A. Julius H. Grundel.

Q. How are you employed, Mr. Grundel?

A. As draughtsman.

Q. Where?

A. U. S. Engineer's office.

Q. In Savannah, here?

A. Yes, sir.

Q. At present under Captain Gillette?

A. Yes, sir.

Q. What is that map or chart? (Handing witness map).

A. North Jetty, Cumberland Sound.

Q. Please state to the court what. Give to the court a description of it.

A. A compilation of official records of mattresses, stone, cross sections and profiles Cumberland Sound, Georgia and Florida, North Jetty.

Q. That is a general description of it?

A. Yes, sir.

Q. What does it show?

A. Longitudinal sections and also cross sections at different intervals.

Q. What information does it convey?

A. It conveys the longitudinal section, which is taken on the axis of the jetty, and a cross section, which is taken at different points along the jetty.

Q. Describe what those lines mean?

A. The upper dotted red line represents the height of mattresses before sinking, the full red line represents a line showing the present average crest for the width, called the original width of top.

Q. And that black line?

A. The black line. The bottom line shows the original bottom at the time of sinking the mattress. The dotted black

line above that shows the height of the mattress after sinking. The full blue line shows the bottom of the mattress at the time of sinking, and the dotted blue line shows the top after sinking.

Q. And the upper blue line?

A. The upper dotted blue line shows the top of the mattress.

Q. After sinking?

A. Yes, sir.

Q. Does that show the number of mattresses sunk at any point in the improvement?

A. Yes, sir, it is all given in the table of description, each mat, the size of each mat, the number of courses are all made explicit on this mat so anybody could follow it.

Q. From what survey was this chart made up?

A. This was made up from a survey which I think dates back of 1882, that is, part of it, and it has the last work 1896 and 1897.

Q. What do those figures 19,000 mean at the top of the chart?

A. That represents the distance from an actual point on the jetty and to that particular point on the axis of the jetty measured along the jetty.

Q. That is then, it is a station?

A. Yes, sir.

Q. What does this line mean there?

A. That full black line on the cross section is taken from the Geisler survey made in October or November, 1897. It is an actual cross section, as ascertained and crossing the jetty at that particular point, and it is named here in the profile as "Station 18,940."

Q. That shows everything which was in existence on that date?

A. Yes, sir.

460 Q. What is that chart or map (Handing witness a map)?

A. That is a chart or profile of South Jetty, compilation of official record mattresses, stone and cross section of Cumberland Sound, Georgia and Florida.

Q. Was that draughted by you, Mr. Grundel?

A. Yes, sir, complied by me from the records in the office

Q. Based upon the official records?

A. Yes, sir, the official records, and what is stated in the profile there, or title.

Q. To the best of your knowledge and complete?

A. Yes, sir, that is made strictly according to the figures, I can produce anything I have there at any time.

Q. These two together show existing conditions?

A. Yes, sir.

Judge-Advocate: Or existing conditions at the date of the last survey. I offer these in evidence to be used in reference from time to time as the case will progress. These will go on record, marked "Exhibits 11 and 12."

Q. What is this Mr. Grundel?

A. That is a detached extension of Oyster bed training wall, Savannah Harbor.

Q. And what is this? (Handing witness paper).

A. Cockspur Island training wall and Oyster Bed training wall.

Q. That also made up from the actual records of the office?

A. Yes, sir.

Q. And made by you?

A. Yes, sir.

Q. And are accurate to the best of your ability?

A. Yes, sir.

Judge-Advocate: This is offered in evidence, and to accompany the records and proceedings, marked "Exhibit 13."

461

Cross-Examination.

Questions by Mr. Blair.

Q. Mr. Grundel, when were the two charts first identified by you, completed?

A. Completed this morning, I added a few figures on there, simply placing the height of the stone on top and the original height of the mattresses.

Q. These are the two charts relating to Cumberland Sound, are they?

A. Yes, sir.

Q. What stage of completion had they reached on the 13th day of January, the day after this court opened?

A. Well, there was considerable to it, I could keep on working on that, for that matter, now.

Q. Considerable to be put on at that time, consisting of what, roughly speaking?

A. I had to add the stone to each mattress.

Q. Did it consist only in the lettering?

A. No, sir.

Q. Didn't you state in the office of the engineer in charge on Thursday, the 13th day of January, current, that these charts were finished; about 10.30 in the morning, in the presence of Captain McClure, that these charts were finished, all except the lettering, which would take a day, or perhaps two days?

A. It would depend how far this work is supposed to reach. That profile starts in 1882, I was told afterwards by Captain Gillette all he cared for was the latter part of it, I didn't understand him.

Q. Did you make that statement?

A. Yes, sir.

Q. That morning?

A. Yes, sir.

Q. You spoke just now of these two charts being longitudinal sections and cross sections of jetties at Cumberland Sound.

462 A. Yes, sir.

Q. That is your description of it?

A. Yes, sir.

Q. Do these charts show the interior construction of the jetties?

A. Interior as much as you can show it. It shows the dimensions.

Q. Does it show anything at all of the interior construction.

A. It shows a plane passed through: What has been placed there.

Q. Does it show anything at all of the materials in the interior?

A. No, sir.

Q. You platted that chart from the soundings only?

A. No, sir; well, it is constructed by the soundings principally.

Q. What else?

A. And lines.

Q. The data which go to make up these charts were principally soundings?

A. Soundings taken and general work taken from the engineer officer in charge.

Q. Were there any borings made into the interior of the jetties?

A. No, sir.

Q. And placed upon that chart?

A. No, sir.

Q. Then, strictly speaking, that chart is not a longitudinal section?

A. Yes, sir, it could be so.

Q. Wait until I finish my question; but it is, strictly speaking, a longitudinal profile with areas of cross profile?

A. A longitudinal profile, yes, sir; and cross section.

Q. They are cross profiles, are they not, and not cross sections?

A. They would be considered cross sections, as I understand them.

Q. Do they show the interior construction in any way of those jetties?

A. No, sir, but you have to assume what the interior was. We know what was placed there.

463 Q. Do they pretend to show with any degree of accuracy the actual interior structure of those jetties?

A. We didn't investigate and go down there. It is assumed by all engineers you would find mattresses there if they were placed there, and rock and whatever was placed there.

Q. Do the charts pretend to show the interior construction of those jetties at which, at the places at which, the so-called cross sections were taken?

A. Yes, sir, from an engineer's standpoint; as Captain Carter would have it shown, I think he would call that a cross section of the jetty, he has done the same work in the office.

Q. I am asking you from the standpoint of plain simple truth.

A. I didn't go into the interior. I know what was placed there from the notes.

Q. I want to know if your understanding of the meaning of cross section, as an engineering term, is an imaginary section taken from consideration simply of the exterior of the structure said to be in the cross section?

A. Yes, sir, that would be a plane passing down from the top, the principle of which is represented by soundings, down to the original bottom, and what is there we expect is there. brush or stone, it didn't grow there, and evidently you can consider it there. Brush or stone, either one thing or the other.

Q. If, for any particular reason, it was desired by an engineer to get at it as a matter of truth, the actual in-

terior of the cross sections in those jetties, and in order to do so borings were made with a diamond drill or anything else, would that show the interior structure, and from the observations thus made a picture or drawing was prepared showing the actual interior, what would you call that in engineering?

A. All that depends to what extent you want to go into that work. We know what was placed there, there is brush there and there is rock there, you can assume which is brush and which is rock.

464 Q. I want to know from an engineering standpoint.

A. I am not here to discuss engineering standpoint.

Q. You are here to answer such questions as the court permits me to ask you.

Judge-Advocate: You must answer the question to the best of your ability.

The President: The witness will answer the question.

Q. I ask you if by means of a diamond drill, or a diver going down there and making an actual cutting across one of those jetties, and actually ascertaining exactly what was in the interior of the jetty along the plane, and that cut of it was actually platted upon a map what would you call that, a cross section?

A. I would call it a cross section, and I could tell when I struck rock and when I struck brush.

Q. In any event then, would you call this thing, which you have platted upon these charts, supposed to be the depths at points determined by a plane at right angles and not an actual determination of the interior structure by any stretch of imagination could that be called a cross profile? in engineering?

A. A profile I would consider the outer surface, the section is what you call the profile, from what we found by taking soundings and observation down to the original bottom, showing what was placed there.

Q. Mr. Grundel, how do you ascertain, in order to correctly plat, the mean height of the crest of those jetties at any cross section or profile.

A. You could take the several heights?

Q. What several heights?

A. The soundings.

Q. Where?

A. Taken across the jetties.

Q. At how many points?

A. The points that are on the jetties, those that happen to fall on the jetty itself.

Q. Now, I am asking you as an actual matter of fact how these charts were constructed, the cross-section, so called. We will presume that to be a portion of the jetty, that book standing on the edge, we will assume this table upon which the edge of the book rests to be the bottom of the sea, how many soundings were taken in order to determine the average height of the top of that jetty, on the crest of that jetty above the bottom?

A. Well, I didn't count the number, I suppose you can look at that chart there and find out the number that was taken.

Q. How far on either side of the medial line did those soundings run in the plane of that cross section?

A. They ran, I suppose, a couple of hundred feet, in some cases 300 feet.

Q. That would make the total in the determination of the average mean height of this jetty?

A. No, sir, I did not consider those in the section at all, the section mentioned there, the average section is simply taking the soundings that happen to come on the jetty itself.

Q. On what parts of the jetty?

A. Well, the average height would be taken on the original width of the crest or top of the jetty.

Q. Then your answer is that your soundings taken to ascertain the average mean height were taken 200 feet apart on a medial line was not correct?

A. No, sir, that was not correct.

Q. How far on either side of the medial line were the soundings taken to determine the average mean height of that cross section, how far on either side of the medial line of that crest of that jetty?

A. Well, we taken the average of the original width of the top of the last mattress laid, if it was 80 feet wide we took the average of 80 feet.

466 Q. That is 40 feet on either side of the medial line?

A. That is by the section taken by Mr. Geiseler, the cross section. The average was taken of the original width of this section here of the top mattress. That is, the soundings were taken, or the average height taken for that width, which in this case is 75 feet.

Q. Then in computing that average height you did not

take a sounding for more than $37\frac{1}{2}$ feet from the medial line, did you?

A. No, sir.

Q. No, such soundings entered into your computation here?

A. Not in here.

Q. And all along this cross section?

A. No, sir.

Q. No such cross section enters into the composition of this supposed line? of the jetty, does it of the cross section?

A. No, sir.

Q. Not at all.

A. No, sir.

Q. What is this space to represent (indicating)?

A. That is the cross section taken by Mr. Geiseler.

Q. How do you know this height here, which is more than 50 feet from the middle perpendicular?

A. That sounding there is platted from a sounding taken by Mr. Geiseler, that is the crossing of the jetty he platted as a whole line as far as it extended.

Q. Then you never added any of those soundings together and divided by the number of soundings so as to get the average sounding?

A. No, sir, not in this case.

Q. In any case?

A. No, sir, not that I know of, I have taken this section here, the result as obtained in some cases on the planimeter, and in some cases obtained by taking the average sounding.

Q. In how many instances was it platted on the average of sounding?

A. The average is taken simply on the detached ex-467 tension of Oyster Bed training wall. In that case I average the soundings which appeared on the jetty itself, that is if I felt doubtful about having too much depth, I threw those out, in justice to Captain Carter or anybody concerned.

Q. So you used your own discretion then, about which ones of those soundings you would throw out in computing your average?

A. In some cases where I felt doubtful; I didn't want to do anything unjust to Captain Carter, or in the way of misrepresenting anything. In one or two cases I called Captain Carter's attention to dropping out a deep sounding where

I possibly could so as to show the jetty in the best way I possibly could.

Q. The result would have been, if you had any deep sounding, to diminish the average height of the crest as plotted?

A. Yes, sir.

Q. And so those soundings you thought too deep you threw out?

A. Yes, sir.

Q. And those not too deep you kept in?

A. Yes, sir, Captain Carter called my attention in the office to some particular soundings and thought I was too partial to him, he called my attention to it, but he came to find out it was not so.

Q. It was a matter of discretion which sounding you would take, and which you would throw out?

A. It was not entirely left to me, I consulted Mr. Cooper in that case.

Q. Did you leave out any that you thought were too shallow?

A. No, sir, I kept those in, my object in this work is to show things as they are.

Q. You said Captain Carter, just now, did you mean Captain Carter or Captain Gillette?

A. Captain Carter.

Q. When was that?

A. Some one sent in there and asked if I had taken that sounding and said Captain Carter asked about it.

468 Q. Then you didn't see Captain Carter?

A. Captain Carter sent in word.

Q. You dont know that he did?

A. Yes, sir.

Q. Did you see him, did you hear him?

A. Did I hear him?

Q. Yes.

A. Some one was sent in the office and came direct from the room and asked me the question and went directly back.

Q. It was not Captain Carter's own voice that communicated that to you?

Judge-Advocate: Who was the person?

A. I have no recollection of who it was, I was not paying any attention, they came and showed me those particular places and some soundings of 12 feet and Captain Carter thought I ought to consider those. He found out he was in error, I had thrown them out.

Judge-Advocate: You have several civil engineers in the office?

A. Yes, sir.

Q. Was it one of those?

A. I think it was some one connected with the office, I have been bothered so much in the office I didn't take any particular attention

Q. In the exercise of your discretion, in throwing out soundings, was in relation to that chart or this one (indicating)?

A. It was in relation to this one here (indicating).

Q. Was there any discretion whatever given you in regard to Cumberland Sound?

A. No, sir, I was to take things just as they were, with the exception of places like that, where it was left to my judgment. I wanted to do things just as they were in the construction of this work and I consulted Mr. Cooper.

Q. That was in relation to this map here, (indicating)?

A. Yes, sir.

Judge-Advocate: Has the court any question.

The President: None.

469 Judge Advocate; That is all the matter I have to present to the Court for today, may it please the Court.

President: Cannot you be ready before eleven o'clock to-morrow.

Judge Advocate; Not very well.

Mr. Blair;—If I may be permitted to state to the Court; the accused here is under a very heavy expense and the hours are very precious to him, and if the Judge Advocate can find it within his power to lengthen the sessions of this Court, even by an hour, it would be what I think is right. For instance, the Court will observe that today we have made almost no progress; two witnesses and two witnesses only, and I do submit to the Court that this is a very great hardship upon this defendant, that the case should progress so slowly. I know of course that the Judge Advocate came into this case late, but he has had since the 8th. of January, and he has had able assistants, two of them, and it does seem to me that better progress could be made or should be made, and I do urge upon the Judge Advocate and I urge upon the Court to endeavor to hasten this trial.

Judge Advocate;—As I have already stated to the Court, I shall expedite this case with all my ability, getting through as soon as it is possible to get through, and I find that to-

morrow morning I can place a witness on the stand at an early hour, a witness that promises to consume in examination some considerable time. Therefore, an adjournment until ten o'clock would be acceptable to me.

President; If there are no objections the Court will stand adjourned until ten o'clock tomorrow morning.

Here the Court at two fifty o'clock P. M., adjourned until tomorrow morning at ten o'clock A. M.

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl
Judge Advocate.

470

United States Court Room,
Savannah, Ga.,
January 25th, 1898.

Court met pursuant to its adjournment of yesterday at 10.00 o'clock a. m.

Present:

All the members of the Court and the Judge Advocate.
The accused, his Counsel, and the Reporter W. O. Tarver, were also present.

The Court: Court will come to order.

JOHN W. O. STERLY, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your name?

A. John W. O. Sterly.

Q. What position do you occupy?

A. Chief Clerk in the United States Engineer's Office.

Q. Here in Savannah?

A. In Savannah.

Q. How long have you held that position?

A. I have held that position as chief clerk since Capt. Carter became disbursing officer.

Q. What date was that?

A. After the death of Gen. Gilmore, I think May 1st, 1888.

Q. Do you remember the date of the passage of the Act known as the River and Harbor Act of 1896?

A. June 3rd, 1896.

Judge-Advocate: I will put in evidence, of which the Court will take judicial notice, an Act making appropriations for the construction, repair and preservation of certain public works on Rivers and Harbors and for other purposes, which appears to have become law on June 3rd, 1896, having been passed at a previous date by the House of Representatives over the veto of the President, and in the Senate on the date first named, June 3rd, two-thirds of the Senate agreeing to pass the same.

(Reading) "Harbor of Savannah, Ga.: Continuing Improvement five thousand dollars: Provided, That contracts may be entered into by the Secretary of War for such materials and work as may be necessary to complete the project of further improvement recommended by Capt. O. M. Carter in his reports of December 7th, 1894, and July 1st, 1895, and to complete the project for the steam-boat channel be-

tween Beaufort, S. C., and Savannah, Ga., recommended by Capt. O. M. Carter in his report December 4th, 1895, and mentioned in that report as Route 2, to be paid for as appropriations may from time to time be made by law not to exceed the amount of one million dollars, exclusive of amount herein or heretofore appropriated.

“Improving Cumberland Sound, Georgia: Continuing Improvement, Five Thousand Dollars: Provided, that contracts may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate two million three hundred and forty five thousand dollars, exclusive of amount herein and heretofore appropriated.”

Q. As Chief Clerk, you are the custodian of the public records of this headquarters?

A. Yes, sir.

Q. You have brought with you certain records which I have told you I should want in this case?

A. Yes, sir.

Q. Look at paper S. H. 29, 1896. What is that?

A. That is, “Capt. Carter encloses copy of advertisement inviting proposals for improving Harbor at Savannah, Ga., and requests authority to publish same in certain official newspapers; also requests authority to print 300 copies of accompanying specifications.”

Q. That is a brief?

A. That is a brief.

472 Judge-Advocate: (Reading)

“United States Engineer Office,

River and Harbor Improvements and Fortifications in Georgia and North Eastern Florida. Savannah, Ga./? June 4th, 1896.

The Chief Clerk of the War Department,
Washington, D. C.

(Through Brig. Gen. Wm. P. Craighill, Chief of Engineers, U. S. A., Washington, D. C., and Colonel Peter C. Hains, Corps of Engineers, U. S. A., Division Engineer, South-East Division, Baltimore, Md.

“Sir:—

I enclose herewith a copy of an advertisement inviting proposal for improving harbor of Savannah, Ga., and request authority to publish the same in the following official newspapers:

6 insertions in the Morning News, Savannah, Ga.

6 Insertions in Florida Citizen, Jacksonville, Fla.

3 Insertions in Marine Journal, New York, N. Y.

3 Insertions in Engineering News, New York, N. Y.

3 Insertions in Engineering and Building Record, New York, N. Y.

I also request authority to print 300 copies of the accompanying specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.

(2 enclosures)''

The Court: That is the original?

Judge-Advocate: This is the original. Endorsed, "Capt. O. M. Carter to C. C., W. D., Encloses copy of advertisement inviting proposals for improving Harbor at Savannah, Ga., and requests authority to publish same in certain official newspapers; also requests authority to print three hundred copies of accompanying specifications, stamed at the top U. S. Engineer's Office, Savannah, Ga., recived June 12th, 1896.

473 On the bottom, "Received back, U. S. Engineers Office, Savannah, Ga., August 22nd, 1896, forwarded by the Division Engineer, received back Office Chief Engineers, Aug. 15th, 1896; with one and two and six copies.

(reading) First endorsement, "U. S. Engineer Office, 9 Pleasant Street, Baltimore, Md., June 6th, 1896. Respectfully submitted to the Chief of Engineers. I have no official information that an appropriation for this work has been made, nor have I any that the specifications have been drawn in accordance with an approved project. Attention is invited to the following:

Par. 34 seems to be a change in the form prescribed by the Department. Orders require when any change is made, the reasons for it must be given.

Par. 39, last part—2nd and 3rd line from bottom—is not understood.

Par. 40. There is nothing to guide the bidder as to length of haul. The place of deposit is to be somewhere at a locality to be approved by the Engineer, but if it is one mile, one price would be bid, and if it was ten miles, the price would be greater.

Par. 44. Prices for stone are by the ton in some cases and in others by the cubic yard. I would prefer all to be by the ton, but Capt. Carter may have some reason for the difference which I do not know.

Par. 49. Last part not understood.

A circular is referred to in the form of proposal, but it is not clear what the circular is.

These papers are submitted to the Chief of Engineers at the request of Capt. Carter, who it is understood will see him personally on June 8th in regard to them,

PETER C. HAINS,

*Col. Corps of Engrs., U. S. A.
Div. Engineer, S. E. Division.*

"2nd Endorsement.

474 "Office Chief of Engineers,
U. S. Army,

June 10th, 1896.

"Respectfully returned to Capt. Carter for revision, attention being invited to the foregoing endorsement. To be returned through Division Engineer,

By command of Brig. Gen. Craighill,

A. MacKENZIE,

Lieut. Col. Corps of Engineers.

15553,

Inclos. 1 and 2 accompanying.

3rd Indorsement,

U. S. Engineer Office,

Savannah, Ga., June 12th, 1896.

"Respectfully returned to the Chief of Engineers, U. S. A., (Through Col. Peter C. Hains, Corps of Engineers, U. S. A., Division Engineer, S. E. Division, Baltimore, Md.)

Par. 34 is correct, and is of the form required in all continuing contracts, said form having been approved by the Division Engr, the Chief of Engineers, and the Secretary of War, in July, 1892.

The form prescribed by the Department, relating to other contracts, is not applicable in the present instance.

Par. 39, second and third lines from bottom, mean exactly what is stated, viz: That, if required by the Engineer Officer in charge, stone put above mean low water shall be pitched or carefully put in position by hand, instead of being dumped on riprap or by a derrick. Mosaic work cannot be expected on an ocean bar, but if the contractor fails to deposit any stone within two feet of the prescribed ranges, he will not be paid for the same. Such requirements have been found to be necessary, and have always been inserted in all specifications for work in my district.

Par. 40. It is important that the dumping grounds should be provided by the contractor. This has been required, and

the length of haul cannot be given by the Engineer Officer 475 in charge. Since each bidder must select his own dumping ground, he will then know his length of haul.

Par. 44. Prices for first-class and second-class stone are by the ton; for third class and fourth class stone by the cubic yard. This is necessary, since it is desired to use much ballast for third class and fourth class stone, it being advantageous to receive such by the cubic yard.

Par. 49. A clerical error made the word 'accepted' read 'inspected'. That error has been corrected.

The word 'circular' is another clerical error. It should have read 'instructions and specifications'. That error has been corrected.

O. M. CARTER,
Capt. Corps of Engrs., U. S. A.

(2 Enclosures returned)

4th Indorsement.
U. S. Engineer Office,
9 Pleasant st., Baltimore, Md.,
June 15, 1896.

Respectfully submitted to the Chief of Engineers.

The corrections noted in the third endorsement have been made, but as stated in my last endorsement, I have no official knowledge of an appropriation having made, and no project for its expenditure has yet passed through this office or been approved.

PETER C. HAINS,
Col. Corps of Engrs., U. S. A.
Div. Engineer, S. E. Division.

Received Office Chief of Engineers, June 16th, 1896.

5th Indorsement.
Office Chief of Engineers.

U. S. Army, Aug. 15th, 1896.

Respectfully forwarded to the Chief Clerk of the War 476 Department with recommendation that the authority within asked for be granted. Amendment to the specifications has been made by this office.

A. MacKENZIE,

War Department.

Approved,

August 15th, 1896.
DANIEL S LAMONT,
Sec'y of War.
J. S.

6 Enclos.

Received Office Chief of Engineers Aug. 15, 1896.

7th Indorsement.
Office Chief of Engineers,
U. S. Army,

August 15, 1896.

Respectfully returned to Capt. Carter inviting attention to the foregoing endorsements.

15553,

A. MACKENZIE,
Act'g Chief of Engrs.

Enclos. 1 and 2 accompanying. (6 Enclosures)

Through Col. Peter C. Hains,

Corps of Engineers,

Division Engineer, South East Division."

Judge-Advocate: There is no record of an endorsement on the paper that it did pass through the office of Col. Hains.
(Continuing reading)

"8th Indorsement,
U. S. Engineer Office,

Savannah, Ga., Oct. 20th, 1896.

Respectfully returned to the Chief Clerk of the War 477 Department, Washington, D. C., with the following bills and vouchers in duplicate: Savannah Morning News, \$4.80; Jacksonville, Fla. Citizen, \$2.62; Engineer Record, New York, \$4.20; Marine Journal Company, New York, \$4.50; Engineering News, New York, \$3.60; John C. Rankin Company, New York, \$73.00. There are also forwarded herewith two slips of advertisements for file and one sample of job printing.

(15 Enclos.)

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.
Rec'd War Department Oct. 23rd, 1896.

9th Endorsement.

Audited and respectfully returned for payment. War Department, November 7th, 1896."

Q. Is that the enclosure (handing witness paper) referred to in that communication?

A. Yes, sir.

Q. What is that?

A. Specifications for improving Harbor at Savananh, to be opened on September 8th, 1896.

Q. (Handing witness paper) Is that the advertisement that was published?

A. Yes, sir.

Q. That is the original paper furnished the printer from which to publish the advertisement, or one like it?

A. One like it. The printer had another copy.

Q. The advertisement, as printed, was like this?

A. Yes, sir.

Q. What was its date?

A. The date of the advertisement was June 6th.

Q. What is the date given when bids would be opened?

A. September 8th.

Q. Of the same year?

A. Yes, sir; 1896.

478 Q. On or about the date given in the endorsement I read from the Chief Engineer's Office, August 15th, was any official information received at the office here of the action taken?

A. I was not at the office; I was not in Savannah at the time.

Q. Do the records of the office show that any official information was received?

A. On August 15th?

Q. Any papers on file to show?

A. A telegram is on file notifying Mr. Connolly to advertise.

Q. Have you those telegrams?

A. (Witness handed Judge-Advocate the papers)

Judge-Advocate: Here is a telegram (reading) "August 15, 1896, dated Washington, D. C., to Connolly, U. S. Engineer's Office, Savannah, Ga. Advertise immediately all work, Fernandina, Savannah and inside route, to be opened Tuesday, Sept. 8th. No change in list of papers. I have specifications. Carter, Engrs."

I offer both of these in evidence, and read them, so that they may go on the record. I suppose it is all right. They are not originals.

Mr. Blair: We make no objections.

Judge-Advocate: (Reading) "New York. August 15. To Connolly, U. S. Engineer Office, Savannah, Ga.

Date all advertisements June 6th, but all will be opened Sept. 8th.

CARTER Engr."

Stamped, "U. S. Engineer Office, Savannah, Ga. Received Aug. 15, 1896".

Q. Where were you on August 15th?

A. On August 15th I was in New York in the morning.

Q. Did you see the accused on that day in New York?

A. Yes, sir.

Q. Where?

A. At the University Club in New York.

Q. In relation to these specifications?

479 A. Yes, sir.

Q. What occurred?

A. Capt. Carter went to Washington,—told me that he was going to Washington to have the specifications approved, and that the specifications would be sent to me from Washington to have them printed, or rather to have corrections made, because the specifications were already in print. Then I was requested to notify Capt. Greene when the project of expenditures—No; I am in error there.

Q. State it accurately?

A. What I refer to occurred on another date.

Q. Confine yourself to the interview we are talking about. Was that all that occurred between you and Capt. Carter at that time?

A. The specifications were sent to me from Washington, and I received those on the 17th.

Q. 17th of what month?

A. 17th of August.

Q. Where were you then?

A. Patchogue, Long Island.

Q. Did you see the accused about that time?

A. I think I saw Capt. Carter at that time, and he told me to have the specifications ready; that he wanted a second proof of the copy at a certain date.

Q. You say you went to Patchogue, Long Island?

A. Yes, sir.

Q. When was that?

A. 1896; I arrived there on the 5th of August, on a vacation.

Q. Did you see Capt. Carter before going there?

A. Yes, sir, I did.

Q. What day?

A. I saw Capt. Carter on the 4th, in the morning.

Q. Fourth of August?

A. 4th of August. In the evening I saw him; not in
480 the morning. I arrived with Capt. Carter on the steamer sailing from Savannah on the 1st of August at 10 o'clock

at night, and we arrived in New York on the 4th of August at 8 o'clock in the morning.

Q. Did you have any instructions from Capt. Carter at that time as to what action to take in certain contingencies?

A. To open his mail at the University Club, and as soon as I would receive notification that the project of expenditure had been approved, to have the specifications printed, and that I would be notified to that effect from Washington when the project would be approved; and I was also requested to notify Capt. Green if the project was approved.

Q. Where were you to address Capt. Green?

A. In Stamford, Conn.

Q. What are his initials?

A. B. D. or D. B. I forget which?

Q. Do you know who Capt. Green is?

A. Yes sir.

Q. Who is he?

A. He was formerly an engineer officer and a contractor.

Q. What is he now?

A. He is a contractor.

Q. Has he been a contractor engaged in business in this engineering district?

A. Yes, sir.

Q. How often?

A. I have seen Capt. Green in Savannah since I have been in Savannah, since 1885.

Q. Do you know if he is a member of the Atlantic Contracting Company?

A. No, sir; I do not know that he is a member of the Atlantic Contracting Company.

Q. Did you comply with that request?

A. Yes, sir; I did.

Q. Had Capt. Greene ever been a bidder for contracts in this District to your knowledge?

481 A. I have seen his name on bonds and sureties, but, as a bidder, I don't think there was a contract in his name.

Q. Did you have any instructions to notify any other parties when the projects were approved?

A. No, sir.

Q. Did you notify any other party?

A. No; I did not. I notified Capt. Carter.

Q. Did you notify Capt. Greene, as directed?

A. Yes, sir; I did.

Q. How did you notify him?

A. I notified him by letter.

Q. Do you remember the date of the letter?

A. It must have been the same date when I received notice that the project had been approved.

Q. From whom did you receive that notice?

A. From Capt. Goethals, Engineer's Office, Washington.

Q. How did you hear,—by telegram?

A. Yes, sir; a personal telegram.

Q. Did you hear from him subsequently?

A. Yes, sir; I had a letter from him.

Q. About these specifications?

A. Yes, sir.

Q. Have you that letter?

A. No; I have not.

Q. What has become of it?

A. I have destroyed it.

Q. Do you remember what it stated?

A. It stated that while the project was approved, and the specifications were allowed, yet there was some clause about dredging. There was some trouble about dredging, and that Col. MacKenzie wanted to see Capt. Carter about it.

Q. How long did you stay at Patchogue?

A. I staid there until the beginning of September.

Q. Were you in New York City in the intermediate time?

482 A. Yes, sir; several times.

Q. Was it by your order that the specifications were printed?

A. Yes, sir.

Q. You remember the date?

A. The specifications were printed, and I must have given a verbal order about the 13th of August, 1896.

Q. By the accused,—by Capt. Carter?

A. No; a verbal order to the printer.

Q. You were acting then under previous instructions?

A. I acted under previous instructions.

Q. Capt. Carter was not then in New York?

A. Capt. Carter was not then in New York.

Q. From what were the specifications printed by the printer?

A. From a duplicate of these approved specifications,—a printer's copy.

Q. This, then, as it stands, are the specifications as they were printed at that time?

A. No, sir.

Q. Were there any alterations made after this was submitted?

A. Yes, sir.

Q. This appears to have been amended?

A. The proof was made from another set, a duplicate of that as it was sent to Washington.

Q. But that was the date,—on the 13th of August?

A. Yes, sir.

Q. On what day did you receive from Washington specifications on which the final proof was made?

A. On the 17th of August, 1896.

Q. That was for the final report?

A. That was this specification that is before you,—the approved specification.

Q. While you were at Patchogue, were you in communication with Capt. Carter?

A. Yes, sir.

483 Q. Where was he?

A. Capt. Carter was away on a summer vacation. He had authority to be away from his station.

Q. Had he directed you to communicate with him?

A. Yes, sir; Capt. Carter directed me to communicate with him, but I have forgotten the address.

Q. Did you reach him?

A. I could not reach him. I reached him at times, but I failed to reach him after August 11th. I failed to reach him by telegraph.

Q. Were you notified that any of your telegrams were not received, by the telegraph office?

A. Yes, sir.

Q. How were those addressed that he did receive?

A. Mr. C. O. Montgomery.

Q. What place?

A. I don't know the place, I have forgotten.

Q. What state or locality?

A. It was in Canada.

Q. Were you instructed by Capt. Carter to so address him?

A. Yes, sir.

Q. When did you see Capt. Carter first after you took the specifications to the printer?

A. On August 15th.

Q. Where did you meet him?

A. At the University Club, New York.

Q. At what hour?

A. About nine o'clock.

Q. In the morning?

A. In the morning.

Q. Well, what took place then?

A. Capt. Carter told me that he would go to Washington.

Q. (Handing witness paper) This original letter which I read to you, one indorsement says, "Through Col. Peter
484 C. Haines, Corps of Engineers, S. E. Division;" does that paper appear to have gone through that division?

A. No, sir; there is no endorsement.

Q. The file marks, however, show that it got into the office here properly.

A. It was received back in the Savannah engineer's office Aug. 22d, 1896.

Q. Do you know where they were in the intermediate time, of your own knowledge?

A. They were in the hands of Capt. Carter.

Q. Do you know of your own knowledge that this was in the hands of Capt. Carter, this original letter?

A. I handed those to Capt. Carter in the University Club.

Q. This original letter of Capt. Carter asking for authority to advertise?—do you know of your own knowledge when it reached the Savannah office?

A. No, sir, I do not.

Q. You were not in the office when it was received here?

A. I was not here.

Q. You only know from the official stamp?

A. Yes, sir.

Q. Where were the specifications first sent, do you know, from Washington?

A. They were sent to me.

Q. At Patchogue?

A. At Patchogue.

Q. For yourself or for—?

A. For Capt. Carter.

Q. Were sent to Capt. Carter, then, to your care?

A. Yes, sir.

Q. You received them on what date?

A. On Monday the 17th, of August, 1896.

Q. When did you meet Capt. Carter again, and did
485 you then return the approved specifications to him?

A. I met Capt. Carter again either on that day or the following Thursday.

Q. Did he return to you the printed specifications that you had handed to him?

A. When I met Capt. Carter I handed the specifications to him.

Q. What is G. R. 9, 1896?

A. Transmit copy. "Office of Chief Engineer, U. S. A.—

Q. You need not read it.

A. Transmitting Act of June 3d, 1896.

Judge-Advocate: I offer it in evidence and read it that it may go on the record. (Reading) "Office of the Chief of Engineers,

United States Army,
Washington, D. C., June 19, 1896.

Capt. O. M. Carter,
Corps of Engineers, Savannah, Ga.

Capt.:

The 'Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes,' of June 3d, 1896, contains items for works of improvement within your district as specified below.

"Please submit, at as early a day as practicable, projects for the expenditure of the amounts appropriated, specifying in each case to what portion of the work you propose to apply the funds, reference being had to the approved plan, and to the estimate upon which the present appropriation is based. In this connection it is desired that for each work there be submitted a concise resume, setting forth the plan and project now in process of execution, and your judgment as to its worthiness. A project, with estimate of cost, will be required for each new work, and for those that are expended by authority, together with the proposed application thereto of the present appropriation, unless such project 486 and estimate have been already furnished, when reference thereto should be made. In this connection see Section 3663, Revised Statutes. Each improvement should be the subject of a separate communication; and it is desired that you state distinctly the manner in which it is proposed to carry on the work, with the reasons therefor—whether by contract, after inviting proposals in the usual way, or by hired labor.

A copy of the Act is herewith.

By command of Brig. General Craighill;

Very respectfully,

Your Obedient servant,

A. MacKENZIE,

Lieut. Col. Corps of Engineers."

Then follows an extract from the Act of Congress which I have already read.

Q. Now, look at C. S., page 32—C. S. No. 2—what is that?

A. Capt. Carter submits his project of expenditure,—Cumberland Sound, Ga., on June 22, 1896, to the Chief of Engineers.

Judge Advocate: I offer this letter in evidence and read it to the Court, that it may appear upon the record:—

“United States Engineer Office,
Savannah, Ga. June 22, 1896.

Brig. Gen. Wm. P. Craighill,
Chief of Engrs. U. S. A.

Washington, D. C.,

(Through Col. Peter C. Haines, Corps of Engrs., U. S. A.,
Division Eng., S. E. Division, Baltimore, Md.)

“General:

In compliance with instructiojs contained in your letter of the 19th, inst., I have the honor to submit the following 487 project for the expenditure of \$5,000, appropriated by Act of Congress, dated June 3, 1896, for ‘Improving Cumberland Sound, Georgia: Continuing Improvement.’

The above Act further provides: “That contracts may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate two millions three hundred and forty-five thousand dollars, \$2,345,000) exclusive of amount herein and heretofore appropriated”.

The present project of improvement referred to in this Act is given in the report of a Board of Engineers, dated Dec. 18, 1895, to which I respectfully refer for details. The project contemplates the formation of a channel across the bar not less than nineteen feet deep at mean low water. This is to be accompilshed by the construction of two jetties of stone, with a mattress hearting wherever admissible, resting upon a foundation mattress of brush, starting from the shores on opposite sides of the entrance and extending sea-ward upon converging lines so directed that the ends will be parallel to each other, and about 3,900 feet apart.

The scour between the jetties is to be aided by dredging, if necessary.

The cost of the improvement is etsimated at \$2,350,000, exclusive of expenditures already made and the Act of 1896 provides that contracts may be entered into for that amount.

The locality is worthy of the expenditure of the sum contemplated by the project.

There were no funds available on July 1, 1895a. The entire sum of \$5,000 appropriated by the Act of June 3, 1896 will be required for engineering and contingencies.

Any work executed during the year should be done by contract, as prescribed by the Act of June 3, 1896, and 488 should consist in extending and raising both jetties as provided in the project approved by the Act, and given in detail in the report of Dec. 18, 1895.

Very respectfully,

Your obedient servant,

Capt. Corps of Engineers. U. S. A."

There is no impression of any signature to the letter.

Q. Look at C. S. 10, 1896?

A. (Witness reading from paper) "Approved project of June 22, 1896, for improving Cumberland Sound, Georgia." From "Chief of Engineers, Aug. 11, 1896."

Judge Advocate: I offer in evidence and read this communication from the Chief of Engineers. (Reading)

Subject: Cumberland Sound.

Office of the Chief of Engineers,

United States Army.

Washington, D. C., Aug. 11, 1896.

"Capt. O. M. Carter,
Corps of Engineers,
Savannah, Ga.

Captain:—

Your letter of June 22, 1896, submitting project for expenditure of appropriation of \$5,000, made by the River and Harbor Act of June 2, 1896, together with the amount therein authorized to be applied to work under the continuing contract system, for improving Cumberland Sound, Ga., was duly received, and submitted to the Secretary of War by indorsement as follows;—

'2nd Indorsement,
Office Chief of Engineers,
U. S. Army,

August 3, 1896.

"Respectfully submitted to the Secretary of War.

The River and Harbor Act of June 3, 1896, contains a 489 provision as follows:—

'Improving Cumberland Sound, Ga.: Continuing Improvement, five thousand dollars: Provided, That contracts

may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate two million, three hundred and forty-five thousand dollars, exclusive of amount herein and heretofore appropriated”.

The project upon which this appropriation is based was formulated and recommended by a Board of Engineers constituted to consider the subject of the improvement of Cumberland Sound.

A copy of the Board's report, dated Dec. 18, 1895, was sent by the Secretary of War Feb. 12, 1896, to the Chairman of the River and Harbor Committee of the House of Representatives.

The Cumberland Sound is an important highway of commerce. All the commerce of St. Marys, Ga., and ninety per cent of the commerce of Fernandina, Fla., are dependant upon water transportation through this sound. A number of railroad lines, with their connections, traversing the largest orange, phosphate and yellow pine regions of the United States, as well as the cotton belt, and the coal and iron districts of the Southern States, find an outlet to the Atlantic ocean through Cumberland Sound.

The work already done by the United States on this water way is likely to cause shifting of shoaling of the channel to such an extent as to greatly interfere with shipping unless active operations are begun and the work authorized by the Act carried out.

For these reasons I recommend that the within project for the expenditure of the appropriation of \$5,000 made by the Act, be approved, and that contracts be let for the completion of the work in accordance with the provisions of the law and the regulations of the Department.

A. MacKENZIE,

Acting Chief of Engineers.”

490 “The paper has been returned to this office by War Department, indorsement of August 6, 1896, “approved as recommended by the Acting Chief of Engineers in the preceeding inforsement hereon.”

“It it held that work under continuing contracts may be carried on as rapidly as the contractor may choose and the engineering and other conditions permit, payment to be made as provided for by law. Your attention is called to the necessity in case the contractor elects to do work in advance of future appropriations by Congress, of providing for the

payment of necessary expenses of superintendence and contingencies from the funds now available.

Very respectfully, your obedient servant,

A. MACKENZIE,
Acting Chief of Engineers.

Through Col. Peter C. Haines,
Corps of Engineers.

Division Eng. Southeast Division."

It appears from the indorsement that this passed through the Division Engineers' office Baltimore Md., and was transmitted to Capt. Carter.

Q. Please state from your papers C. S. 5,/ 1896?

A. (Witness handed counsel the paper)

Q. Do your records show what was the first day on which these advertisements appeared in the papers?

A. Yes, sir.

Q. What was the first date?

A. On August 16; that is the order.

Q. That was in what paper?

A. That was in the Savannah Morning News.

Q. Do your records show what date it first appeared in the Florida Citizen of Jacksonville?

A. Under date of August 14, they were ordered to be printed on August 17.

491 Q. By the Florida Citizen Aug. 17th—?

A. Yes, sir.

Q. Now on page 48?

A. Marine Journal, Aug. 22, 1896.

Q. How many advertisements?

A. Three advertisements.

Q. When was it first printed in the Engineering and Building Record, New York?

A. August 22.

Q. How many times?

A. Three times.

Q. Now look at page 50 and tell me when it was first printed in the Engineering News, New York?

A. August 20; three insertions were ordered.

Q. When were the specifications received from the printer?

A. They left the printer on August 21.

Q. That is in New York?

A. The New York printer.

Q. Do your records show when they were received in Savannah?

A. The first issue was on Aug. 24th.,

Q. When were the bids to be opened?

A. On Sept. 8th.—

Q. How were those specifications distributed,—sent out?

A. I was not here at the time, but the records show that they were sent out by letter.

The following papers and copies of papers were identified by the witness and offered in evidence and read by the Judge Advocate:

C. S. 6, 1896.

“Florida Central & Peninsula R. R. Co.

H. R. Duval, President.

32 Liberty St.

New York, June 8, 1896.

“Dear Captain Carter:—

492 If under the River and Harbor Bill, improvements will go on in Fernandina under the continuous list, I have a friend who would like to bid for the contract to do the work, and if you will kindly advise me when it will be necessary to make the investigation prerequisite to the contract, I shall be very much obliged to you.

Yours very truly,

H. R. DUVAL.

By a member: I move that we take a recess for 15 minutes.

The President: If there is no objection, court will take a recess for 15 minutes

Here the Court at 12.00 noon, took a recess of 15 minutes.

At 12.15 o'clock P. M., the Court assembled pursuant to recess.

Q. (By the Judge-Advocate) I notice that some of these letters from Captain Carter refer to one specification and some to a full set how many comprise a full set?

A. Three comprise a full set.

Q. Why are three necessary?

A. Because the papers have to be submitted in triplicate.

Q. Bids have to be submitted in triplicate?

A. In triplicate.

Here the Judge-Advocate continues to put in evidence the following papers, upon identification by the witness:

512 File No. G. R. 22, 1896.

R. G. Ross,

General Contractor,
River and Harbor Improvements

A Specialty.

Main Office: Jacksonville, Fla.

Jacksonville, Fla. August 19th, 1896.

Capt. O. M. Carter,

Corps of Engrs. U. S. A.,

Savannah, Ga.

Dear Sir:

Please send me all information with specifications, and other necessary papers, that will enable me to bid on the construction of jetties at Cumberland Sound, Ga. and the improvement of Harbor at Savannah, Ga., and oblige,

Yours very respectfully,

R. G. Ross.

Copy of letter G. R., X-2, page 336.

"United States Engineer Office,

Savannah, Georgia, August 24, 1896.

Mr. R. G. Ross,

Jacksonville, Fla.

Dear Sir:

In compliance with your request of the 19th instant, I transmit, herewith, one complete set of specifications for constructing jetties at entrance to Cumberland Sound, Georgia.

Very respectfully Yours,

O. M. CARTER,

Capt. Corps Engineers, U. S. A.

(Three enclosures)

File No. G. R. 23, 1896.

Hydraulic Construction Company.

Hydraulic Engineers, Experts and Contractors.
Subterranean Water Supply, Hydraulic and Hydro-Pneumatic Caissons, Foundation Tests and Dtainage. Water 513 works constructed by franchise or contract. Branch Offices: Boston, Richmond, Detroit. (Caisson Department) 145 Broadway and 88 Liberty Street.

Judge Advocate:— May it please the Court, these are papers that were identified by the clerk from the engineer's office, Washington, as original papers, or some of the papers.

The Court:— Properly certified to?

Judge Advocate:— Testified to. I now offer in evidence and read;

“Subject: Proposals Improving Cumberland Sound, Georgia.

United States Engineer Office,

Savannah, Ga. Sept. 8, 1896.

Brig. Gen. Wm. P. Craighill,

Chief of Engineers, U. S. A.

Washington, D. C.

524 “General:

I have the honor to transmit herewith all proposals received this day for Improving Cumberland Sound, Ga., and request authority to award the contract to the Atlantic Contracting Company, of New York, N. Y., John F. Gaynor, Pres., this Company being the lowest responsible bidder, the prices being considered satisfactory and reasonable. An abstract of the proposals is transmitted herewith.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

(Four enclosures)’

Judge-Advocate: I also offer in that connection, and read,
“Abstract of Bids opened at Savannah, Ga., September 8th,

1896, by Capt. O. M. Carter, Corps of Engineers, U. S. Army, for constructing jetties at an entrance to Cumberland Sound, Ga." First column, "No"; next column, Name and Address of Bidder; next column "Mattress, 200,000 square yards, price, amount"; next column, "First Class Stone, 50,000 tons, price, amount"; next column, "Second Class Stone, 75,000 tons, Price, Amount"; next column, "Third Class Stone, 100,000 cubic yards, Price, Amount"; next column "Fourth Class Stone, 250,000 cubic yards, Price, Amount"; next column, "Total." 1. The Atlantic Contracting Co., John F. Gaynor, President, New York, N. Y., Price \$1.10, Amount \$220,000; 2. Jacob Friday and Sons, Pittsburgh, Pa., Price \$1.12, Amount \$224,000; 3. John Grim, Philadelphia, Pa., Price \$1.15, Amount \$230,000. First Class Stone, price bid by the Atlantic Contracting Co. \$5.25, amount \$262,500; price bid by Jacob Friday & Sons, Pittsburgh, Pa., \$5.00, amount, \$250,000; price bid by John Grim, Philadelphia, Pa., \$5.20, amount \$260,000. Second class stone, price bid by the Atlantic Contracting Company, \$5.25, amount, \$393,750; price bid by Jacob Friday & Sons, \$5, amount \$375,000; price bid by John Grim, \$5.20, amount, \$390,000. Third class 525 stone, price bid by the Atlantic Contracting Company, \$3.90, amount, \$390,000; price bid by Jacob Friday & Sons, \$4.50, amount \$450,000; price bid by John Grim, Philadelphia, Pa., price, \$3.90, amount, \$390,000. Fourth class stone, price bid by the Atlantic Contracting Company, \$3.50, amount, \$875,000; price bid by Jacob Friday & Sons, \$3.40, amount, \$850,000; price bid by John Grim, \$3.55, amount, \$887,500. Making the aggregate bid of the three different bidders carry out in the total column, from the Atlantic Contracting Company, \$2,141,250; from Jacob Friday & Sons, \$2,149,000; from John Grim, \$2,157,500. "Remarks: Amount for which the Secretary of War is authorized to enter into contract, \$2,350,000". Asterisk against the Atlantic Contracting Company, John F. Gaynor, Pres. New York, N. Y., and has a foot-note, "Bid recommended for acceptance, that Company being the lowest responsible bidder for the best and most satisfactory materials and service." There is also a note made under the head of Jacob Friday & Sons, marked with two asterisks,—“Justification of guarantors omitted.” Signed, “O. M. Carter, Capt. Corps of Engineers, U. S. A., Savannah, Ga., Sept. 8, 1896.”

Judge Advocate: I submit in evidence the three bids made by the parties whose names appear in the abstract just

read, copies of which will be attached to the record marked, Exhibits 14, 15 and 16. Copy of abstract read by me will be attached, marked Exhibit No. 17.

Q. (Judge Advocate continuing examination) I think I asked you if all these documents and books that you have brought here, and from which I have read, or from which you have read, or referred to here, are the official papers and records from the office of the engineer of this district?

A. Yes, sir.

Q. Now, as to the appropriation for the improvement of Savannah harbor, which I read from the Act of Congress 526 gress this morning,—that became law the same date as that for the improvement of Cumberland Sound, and now, as to the time for calling for projects of expenditure, was that project called for for Savannah harbor, as well as Cumberland Sound, at the same time?

A. Yes, sir; it was.

Q. And was the project submitted in a communication bearing the same date?

A. Will you please repeat the question?

Q. Was the project of expenditure,—was the date of the letter calling for the project of expenditure of the same date for Savannah harbor as for Cumberland sound?

A. Yes, sir.

Q. It was one communication?

A. One communication.

Q. The letter submitting project of Savannah harbor, was that in the same communication as for Cumberland sound?

A. No, sir; separate.

Q. Look at letter book, S. H. No. 4, page 123.

A. (Witness identified copy of letter in letter book and handed the book to the Judge Advocate).

Judge Advocate: I offer in evidence and read this letter which is as follows:—

"SUBJECT: Project of Expenditure, Savannah Harbor,
Savannah.

United States Engineer Office,
Savannah, Ga., June 22, 1896.

"Brig. Gen. Wm. P. Craighill,
Chief of Engineers, U. S. Army,
Washington, D. C.

(Through Col. Peter C. Hains,
Corps of Engineers, U. S. Army,
Division Engineer, Southeast Division,
Baltimore, Maryland.)

527 General:

In compliance with your letter of instructions of the 19th instant, I have the honor to submit the following project for the expenditure of \$5,000, appropriated by Act of Congress, of June 3, 1896, for "Harbor of Savannah, Ga.: Continuing Improvements."

The Act referred to provides further: "That contracts may be entered into by the Secretary of War for such materials and work as may be necessary to complete the project of further improvement, recommended by Capt. O. M. Carter, in his reports of Dec. seventh, eighteen hundred and ninety-four and July first, eighteen hundred and ninety-five, and to complete the project for the steamboat channel between Beaufort, S. C., and Savannah, Ga., recommended by Capt. O. M. Carter in his report of Dec. fourth, eighteen hundred and ninety-five, and mentioned in that report as Route 2; to be paid for as appropriations may from time to time be made by law, not to exceed the amount of one million dollars, exclusive of amount herein or heretofore appropriated."

"The projects referred to in this Act contemplate (1) the extension of the Coxspur or Oyster Bed training wall, (2) the construction of a detached portion of the latter for the purpose of sheltering the anchorage in Tybee Roads and protecting the channel, (3) The maintenance of the existing channel, depth in the harbor, and (4) the opening of a steamboat channel 7 feet deep at mean low water between Savannah, Ga., and Beaufort, S. C., which latter is to be accomplished by connecting dam No. 31 with Turtle Island and by dredging in Ramshorn Creek at the mouth of Wrights River.

"The cost of the above work was estimated at \$1,148,950, provided all operations were completed by July 1, 1897, and that a sum greater by \$50,000 for each year thereafter re-

quired for the completion of the work. The Act of June 3, 1896, which provided that the Secretary of War shall not obligate the Government to pay more than \$400,000 in any 528 one fiscal year, increases the necessary cost of the improvement to \$1,248,950, which is \$243,950 more than the total sum for which the Secretary of War is authorized to enter into contract.

"The locality is well worthy of the improvement contemplated by the authorized projects, but the limit of cost should be extended to that required for completion.

"No work has ever been done by the United States on the inside route between Savannah, Georgia, and Beaufort, South Carolina.

"The condition of the improvement in Savannah Harbor is given in detail in my last annual report.

"Work under the existing contract in Savannah Harbor will be completed about July 15, 1896, and the balance available, which will be about \$15,000, together with the \$5,000 made available by the Act of June 3, 1896, will be required for engineering and contingencies.

"The United States owns no suitable plant for executing the work and any work done should be done by contract, as provided in the Act of June 3, 1896, that method being most economical and advantageous to the Government.

"All work should be done according to the projects approved by that Act, which are given in my reports of December 7, 1894, February 4, 1895, and July 1, 1895, to which I respectfully refer for details.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A."

Q. Have you that original letter among your papers?

A. No, sir, I have not.

Q. It was never returned with any indorsement so far as the records of your office show?

529 A. No, sir.

Q. Give me S. H. No. 49, 1896.

A. (Witness handed Judge-Advocate the paper).

Judge-Advocate: I offer this paper in evidence, and read it as follows:

“Subject: Savannah Harbor, Ga.
Office of the Chief of Engineers,
United States Army,
Washington, D. C., Aug. 11, 1896.

Capt. O. M. Carter,
Corps of Engineers,
Savannah, Ga.

Captain:

Your letter of June 22, last, submitting project for expenditure of appropriation made by the river and harbor act of June 3, 1896, for Harbor at Savannah, Ga., was duly received and submitted to the Secretary of War with indorsement of which the following is a copy:

‘2d indorsement.
Office of Chief of Engineers,
U. S. Army,

August 3, 1896.

Respectfully submitted to the Secretary of War.

The river and harbor act of June 3, 1896, in the item appropriating \$5,000 for continuing improvement of harbor at Savannah, Ga., provides:

“That contracts may be entered into by the Secretary of War for such materials and work as may be necessary to complete the project of further improvement recommended by Captain O. M. Carter in his reports of December seventh, eighteen hundred and ninety-four, and July first, eighteen hundred and ninety-five, and to complete the project for the steam-boat channel between Beaufort, South Carolina,

530 and Savannah, Georgia, recommended by Captain O. M. Carter in his report of December fourth, eighteen hundred and ninety-five, and mentioned in that report as route two; to be paid for as appropriations may from time to time be made by law, not to exceed the amount of one million dollars, exclusive of amount herein or heretofore appropriated.’

‘This provision of the act is based upon reports submitted by Captain O. M. Carter, Corps of Engineers, and printed in the Annual Report of the Chief of Engineers for 1895, pp. 1449-1462 and 1521-1525.

The project formerly adopted by Congress for the improvement of Savannah Harbor, has been successfully completed under the continuous contract system, and the conditions are now favorable for letting the contracts for the work authorized by the act of June 3, 1896, on terms advantageous to the Government.

It appears that the interest of commerce and economical work, and the necessity of protecting existing depths in the harbor, alike requires that arrangements should be made as early as practicable for carrying on the work authorized. I, therefore, recommend that contracts be entered into for the completion of the work, in accordance with the provisions of the act above quoted, and the regulations of the department.

Under terms of section 5 of the act, the Secretary of War can not obligate the Government to pay more than \$400,000 on this work in any fiscal year, beginning July, 1897.

A. MACKENZIE,
Acting Chief of Engineers.

The project was returned to this office by War Department indorsement of August 6, "Approved as recommended by the Acting Chief of Engineers in the preceding indorsement hereon."

Very respectfully, your obedient servant,

A. MACKENZIE,
Acting Chief of Engineers.

Through Col. Peter C. Hains,

Corps of Engineers, Div. Engineer, Southeast Division.

531 "Rec'd Engr's Office, Balto., August 12, 1896," and
in U. S. Engineer Office, Savannah, Ga., Received August
14, 1896."

Q. Give me S. H. 29, 1896.

A. (Witness hands Judge-Advocate paper).

Q. I will ask you if the specifications were submitted with the request to advertise with the same communication for Savannah Harbor as for Cumberland Sound?

A. No, sir.

Q. I would like to see then the date of the communication submitting the specifications and request to advertise for the improvement of Savannah Harbor?

A. That is marked S. H. 29, 1896.

Judge-Advocate: You are right. I read the Savannah Harbor instead of Cumberland Sound.

Q. (Handing witness paper). How is that marked?

A. C. S. 5, 1896.

Judge-Advocate: I will state to the Court that I read the request for authority to advertise for the improvement of Savannah Harbor while examining the subject of Cumberland Sound, and that is already in evidence as applicable to the pending examination; so it will be necessary for me now to

read the application which should have been read with the Cumberland Sound papers, and I offer it in evidence.

(Reading)

“Subject:—Advertisement, Specifications, etc., improving Cumberland Sound.

United States Engineer Office,
Savannah, Ga., June 4, 1896.

The Chief Clerk of the War Department,

Washington, D. C.

(Through Brig. Gen. Wm. P. Craighill, Chief of Engineers,
U. S. A., Washington, D. C., and Col. Peter C. Hains,
532 Corps of Engineers, U. S. A., Division Engineer, South-
east Division, Baltimore, Maryland.)

Sir:—

I inclose herewith a copy of an advertisement inviting proposals for constructing jetties in Cumberland Sound, Ga., and request authority to publish the same in the following official newspapers:

6 insertions in Morning News, Savannah, Ga.;
6 insertions in the Florida Citizen, Jacksonville, Fla.;
3 insertions in Marine Journal, New York, N. Y.;
3 insertions in Engineering News, New York, N. Y.;
3 insertions in Engineering and Building Record, New York, N. Y.

I also request authority to print 300 copies of the accompanying specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engineers, U. S. A.

Indorsed; Savannah, Ga., June 4, 1896, Capt. O. M. Carter, to C. C. W. D. Enclose copy of advertisement inviting proposals for constructing jetties in Cumberland Sound, Ga., and requests authority to publish same in certain official newspapers. Also requests authority to print 300 copies of accompanying specifications.

1st indorsement, U. S. Engineer Office,
9 Pleasant Street,

Baltimore, Md.

June 6, 1896.

Respectfully submitted to the Chief of Engineers. I have no official information that the work contemplated is provided for by law, or that a project for the expenditure has

been approved. The specifications, however, are defective in the following particulars.

533 1. On the 4th, page there is printed matter evidently intended to be stricken out, but has been overlooked.

2. On the next page (5)—description of third design—at line 14, something has been omitted and must be inserted to make sense. The whole paragraph seems to be duplicated in part, and confused.

3. Par. 44 (Prices) page 8, does not accord with form of proposal on page 12. In one case the price is stated to be 'a price per cubic yard for third class stone' and in the other, 'for third class stone—dollars and—cents (\$.....) per ton of 2,000 pounds'. In my judgment both third and fourth class stone should be bid for by the ton and not by the cubic yard, as well as the first and second classes.

4. Par. 44 has an evident error on third line, tons meaning pounds.

I submit these papers to the Chief of Engineers at the request of Capt. Carter, who has informed me that he expects to be in Washington on Monday, June 8th, and wishes to see the Chief of Engineers in regard to them.

Peter C. Hains,

Col. Corps of Engrs., U. S. A.

Div. Engineer, S. E. Division.

2d Indorsement.

Office Chief of Engineers,

U. S. Army, June 10, 1896.

Respectfully returned to Captain Carter for revision, attention being invited to the foregoing indorsements.

To be returned through Division Engineer.

By command of Brig. Gen. Craighill,

A. MacKENZIE,

Lieut. Col. Corps of Engrs.

15551.

Inclos. 1 and 2 accompanying.

534

3rd Indorsement.

U. S. Engineer Office.

Savannah, Ga.,

June 12, 1896.

Respectfully returned to the Chief of Engineers, U. S. A. (Through Col. Peter C. Hains, Corps of Engineers, U. S. A. Division Engineer, Southeast Division, Baltimore, Md.)

1. On the fourth page is a clerical error; the printed matter should have been stricken out.
2. The paragraph is confused on account of a clerical error; this has been corrected.
3. The clerical error has been corrected. It is advantageous that third class and fourth class stone should be received by the cubic yard, since it is desired to make use of much ballast rock.
4. The word 'tons' should have been 'pounds' and the correction is made.

O. M. CARTER,
Capt. Corps of Engrs., U. S. A.

(2 enclosures returned.)

4th Indorsement.
U. S. Engineer Office,

9 Pleasant St.,
Baltimore, Md., June 15, 1896.

Respectfully submitted to the Chief of Engineers. These papers seem now to be all right, but as stated in the first indorsement, I have no official knowledge of the appropriation having been made, and no project for the expenditure has yet passed through this office, or been approved.

PETER C. HAINS,
Col. Corps of Engineers, U. S. A.
Div. Engineer, S. E. Division.

535 Received Office Chief of Engineers, June 16, 1896.

5th Indorsement.
Office Chief of Engineers, U. S. A.

Aug. 15, 1896.

Respectfully forwarded to the Chief Clerk of the War Department, with recommendation that the authority within asked for be granted. Amendment to the specifications has been made by this office.

A. MACKENZIE, *Act. Chief of Engineers.*

15551. Inclos. 1 and 2 accompanying.

Received War Department, Aug. 15, 1896.

Authority No. 2239, T. B. N.

6th Indorsement.

Approved,

War Department, Aug. 15, 1896.
DANIEL S. LAMONT, *Sect. War,*

J. S.

5 inclos. Received Office Chief of Engrs., Aug. 15, 1896.

7th Indorsement.
Office Chief of Engineers,

U. S. Army, Aug. 15, 1896.

Respectfully returned to Capt. Carter, inviting attention to the foregoing indorsements.

A. MacKENZIE,
Act. Chief of Engrs.

15551.

Inclos. 1 and 2 accompanying.

Through Col. Peter C. Hains, Corps of Engineers, Div. Engineer, S. E. Division.

536

8th Indorsement.

U. S. Engineer Office,
Savannah, Ga., Oct. 20, 1896.

Respectfully returned to the Chief Clerk of the War Department, Washington, D. C., with the following bills and vouchers in duplicate:

Savannah Morning News, \$4.80; Jacksonville, Florida Citizen, \$2.62; Engineering News Pub. Co., \$3.60; Marine Journal Co., New York, \$5.25; Engineering Record, New York, \$4.20; John C. Rankin Co., New York, \$62.00. There are also forwarded herewith two slips of advertisements for file and one sample of job printing.

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.

(15 enclosures)

Received War Department Oct. 22, 1896.

9th Indorsement.

War Department, Nov. 7, 1896.

Accounts Nos. 1 to 4, having been audited, are respectfully returned for payment.

Account, No. 5, in favor of the New York Engineering Record, is returned for correction, the voucher stating that the advertisement was published in the New York Engineering News. Attention is invited to the number of insertions charged and ordered. Authority was granted to publish the advertisement for three insertions in the New York Engineering Record, and the publishers' original bill states that

it was published three times. Voucher gives the number of insertions charged as two; ordered two.

By order of the Sect.'y of War,

JOHN TWEEDDALE,
Chief Clerk.

537

10th Indorsement,

U. S. Engineer Office,
Savannah, Ga., Nov. 9, 1896.

Respectfully returned to the Chief Clerk of the War Department, Washington, D. C.

Correct vouchers are transmitted, which please substitute for those in which errors occur.

O. M. CARTER,
Capt. Corps of Engineers, U. S. A.

(4 inclosures)

Received War Department Nov. 12, 1896.

11th Indorsement.

Audited and respectfully returned for payment,
War Department,
Nov. 12, 1896.

Received back U. S. Engineer Office, Savannah, Ga., Nov. 14, 1896.

Q. The seventh indorsement states that this communication was returned to Capt. Carter through Col. Peter C. Hains. It has no such action upon it, and the eighth indorsement is by Capt. Carter under date of Oct. 20, 1896?

A. Received back U. S. Engineer Office, Savannah, Ga., Aug. 22, 1896, and afterwards Nov. 9, 1896.

Q. The receipt of Nov. 9, 1896, had reference to the payment of bills for advertising?

A. To the bills.

Judge Advocate: I called the attention of the Court to the fact that telegrams were produced by this witness as the proper custodian, (Reading) "Washington, D. C., August 15, 1896. To Connolly, U. S. Engrs. Office, Savannah, Ga. Advertise all work Fernandina, Savannah and inside route to be opened Tuesday, Sept. eighth. No change in list of papers.

I have specifications. Carter, Engrs."; and from New York, same date, "To Connolly, U. S. Engineer's Office, Savannah, Ga. Date all advertisements June sixth, but all will be opened September eighth. Carter. Engr."

They are all in evidence before the Court.

Q. Now, I come back to the communication in relation to Savannah Harbor, which was by mistake read while in considering Cumberland Sound project. What came with that (Handing paper to witness)?

A. With this communication in this specification and advertisement.

Q. That is not the original that came?

A. This is the original which was sent from Washington and which came from Washington, which is changed,—certain modifications were made in Washington.

Q. And from that was prepared matter for printing of specifications?

A. From the duplicate of that.

Q. The printing was from a duplicate?

A. A copy like this. Capt. Carter handed me a copy of this and that copy I gave to the printer.

Q. The duplicates then were returned?

A. Yes, sir, and when this original came I compared the Printer's copy and made alterations on the printer's copy from that.

Q. This then was the basis for final proof?

A. Yes, sir, for the second proof.

Q. That was received at the same time that the authority by you—that was sent first to you?

A. Yes, sir.

Q. Your testimony in regard to that, as to your meeting Capt. Carter, covers these specifications, as it did the specifications in relation to the improvement of Cumberland Sound?

A. Yes, sir.

Q. They were both considered together?

539 A. At the same time?

Q. You received the same instructions in regard to this that you did in regard to the other specifications?

A. Except as to notifying Capt. Green. I notified him that the project had been approved without referring to any particular work.

Q. Just generally?

A. Generally.

Q. Were these specifications calling for Savannah Harbor improvements received from the printer at the same time as those for Cumberland Sound?

A. They were to be delivered at the same time. Whether

they were delivered at the same time, I don't know; I didn't see them delivered.

Q. Do you know when the specifications for Savannah Harbor improvement were received, or when they were accessible to bidders?

A. The records show they were accessible to bidders August 24th; the first specifications were sent out on that date.

Q. The advertisement bore date of June 6th?

A. Yes, sir.

Q. That had not been changed?

A. No, sir.

Q. Bids were to be opened September 8th?

A. Yes, sir.

Q. I will ask you now to produce applications as I call them, and it may be that some of the applications have already been read. File mark, S. H. 50—

Mr. Blair:—If the Court please, I see that the Judge Advocate has a list of Savannah Harbor applicants, similar to the one he had for Cumberland Sound. It contains the name of the applicant for specification, the date he applied, the date specifications were sent to him, and the number sent,

540 In other words,—the information contained in these letters, which were read at length. I suggest that that might be put right into the record, subject to our verification and it will save the reading of these letters. It seems to me that is all the information the Judge Advocate needs in that connection. It took us two hours and a half to go over that other list, and this is about as long; otherwise, we have no objection.

Judge Advocate: I will read, upon the admission of counsel, with however, one point omitted by him; that is, the place of residence. This is a compilation of the names of applicants for copies of specifications, Savannah Harbor improvement, giving their names, place of residence, date of their application, file mark received, number of copies sent, date of letter of Capt. Carter and the page in letter book on which Capt. Carter's letter was copied.

C. W. Johnston, Boston, date of application, Aug. 24, 1896, file mark, S. H. 50, reply sent. Aug. 26, 1896, Page 180, with 3 copies of specifications.

J. M. Ferguson, Sabine Pass, date of application Aug. 27, 1896, file mark, S. H. 52, reply, inclosing 3 copies, sent Aug. 29, 1896, copy book, S. H. Page 188.

Saluda Quarries, Columbia, S. C., application without date, file mark, S. H. 53, reply of Aug. 31, 1896, inclosing one copy, copy book, S. H. Page 193.

Sanford & Brooks, Baltimore, date of application Aug. 28, 1896, file mark, S. H. 54, reply sent Aug. 31, 1896, inclosing three copies, copy book S. H. page 192.

I. H. Hathaway, Philadelphia, date of application Aug. 28, 1896, file S. H. 55, reply sent Aug. 31, 1896, inclosing three copies, S. H. 190.

F. Behrend, New York, date of application Aug. 30, 1896, file mark, S. H. 56, reply sent Sept. 2, 1896, inclosing one copy, S. H. 195.

541 American Dredging Co. Philadelphia, date of application Aug. 31, 1896, file mark, S. H. 57, reply sent Sept. 2, 1896, inclosing three copies, letter book, S. H. 197.

G. H. Breymann & Bros., Toledo, Ohio, date of application Aug. 12, 1896, file G. R. 21, reply sent Aug. 24, 1896, inclosing one copy, letter book S. H., 169.

R. G. Ross, Jacksonville, date of application Aug. 19, 1896, file mark, G. R. 22, reply sent Aug. 24, 1896, inclosing three copies, letter book, S. H. 175.

Hydraulic Construction Company, New York, date of application Aug. 20, 1896, file G. R. 23, reply sent Aug. 24, 1896, one copy, letter book S. H. 167.

Jacob Friday, Pittsburgh, Pa. date of application Aug. 20, 1896, file mark, G. R. 24, reply sent Aug. 24, 1896, three copies, letter book, S. H. 172.

P. Sanford Ross (Chas. C. Ely) Savannah, date of application Aug. 21, 1896, G. R. 25, reply sent Aug. 24, 1896, three copies, letter book, S. H. 162;

New York Dredging Co. New York, date of application Aug. 21, 1896, file G. R. 26, reply sent Aug. 24, 1896, three copies letter book, S. H. 171;

Morris & Cummings, Dredging Co. New York, Aug. 21, 1896, G. R. 27, reply sent Aug. 24, 1896, three copies, letter book, S. H. 174;

Virginia Dredging Co., C. P. E. Burgwynn, Richmond, Aug. 21, 1896, file G. R. 28, reply sent Aug. 24, 1896, three copies, letter book, S. H. 176;

Will R. Maher, Atlanta, Ga., Aug. 22, 1896, file G. R. 29, reply sent Aug. 24, 1896, one copy, letter book, S. H. 168;

Bryan & Patterson, Jacksonville, Fla., Aug. 22, 1896, file G. R. 30, reply sent Aug. 24, 1896, one copy, letter book, S. H. 166;

Rittenhouse R. Moore, Tallulah Falls, Aug. 22, 1896, 542 file G. R. 31, reply sent Aug. 24, 1896, three copies, letter book, S. H. 173;

John J. Shipman, Washington, Aug. 22, 1896. G. R. 32, reply sent Aug. 24, 1896, one copy, letter book, S. H. 165; International Construction Co. Albany, N. Y., Aug. 24, 1896, file G. R., 33, reply sent Aug. 26, 1896, three copies, letter book, S. H., 182;

William Johnson & Co., Charleston, Aug. 25, 1896, file G. R. 34, reply sent Aug. 27, 1896, three copies, letter book, S. H., 185;

Charles S. Day, Jersey City, Aug. 25, 1896, G. R., 35, (Telegr.) reply sent Aug. 26, 1896, three copies, letter book, S. H., 181;

Henry Wilson, Washington, Aug. 26, 1896, file G. R., 36, reply sent Aug. 27, 1896, three copies, S. H., 186;

Alabama Dredging and Jetty Co., Mobile, Aug. 26, 1896, G. R., 37 (reply sent Aug. 28, 1896, informing that copies had been sent to R. R. Moore, G. R., Page 357;

Mechanical & Development Co., New York, Aug. 27, 1896, file G. R., 39, reply sent Aug. 29, 1896, one copy, S. H., 187;

John L. Grim, Philadelphia, Aug. 28, 1896, G. R., 40, reply sent Aug. 31, 1896, three copies, also one copy to Gen. James E. Slaughter, Donaldsonville, Ky., S. H., 191;

R. A. Johnson, Augusta, Ga., (through Barrow & Osborne) G. R. 42, reply sent Sept. 4, 1896, one copy, S. H., 200;

Oral Requests:

Edward H. Gaynor, Savannah, Aug. 24, 1896, reply sent Aug. 24, 1896, three copies, S. H., 170;

Savannah Dredging J. Paulsen. Savannah, Aug. 26, 1896, reply sent Aug. 26, 1896, three copies, S. H., 184;

Cordes & Bochmann, Charleston, Aug. 29, 1896, reply sent Aug. 29, 1896, three copies, S. H., 189;

543 Stewart Constructing Co., Savannah, Aug. 29, 1896, reply sent Aug. 31, 1896, three copies, S. H., 194;

Friday, Savannah, Sept. 2, 1896, reply sent Sept. 2, 1896, one copy, S. H., 196;

W. H. Venable, Atlanta, Sept. 4, 1896, reply sent Sept. 4, 1896, three copies, S. H., 198;

James Foley, Savannah, Sept. 7, 1896, reply sent Sept. 7, 1896, inclosing one copy, S. H., 201;

Mr. Rose (Addressing the Judge-Advocate) Will you kindly state how many three copies were sent to and how many one copy was sent to?

Judge-Advocate: Seventeen of those who made written application, and five of those who were here present and made personal applications, received full sets. Then who made written applications, received one copy of the specifications and two who made personal application, received one copy of the specifications. There is a further entry that of these bidders the American Dredging Company, the Virginia Dredging Company (C. P. E. Burgwynn) and Rittenhouse R. Moore and the Savannah Dredging Company were bidders for dredging.

Mr. Rose:—Will you be kind enough to give me the same information as to your other list,—how many there were?

Judge-Advocate:—In relation to Cumberland Sound there were thirteen who made written applications and received three copies of the specifications; twelve who made written application, received one copy of the specifications. One of these parties, however, appears on a subsequent date to have received two additional copies, a week after the first copy was sent him. A copy was sent him Aug. 24, 1896, and on Aug. 31, 1896 two more were sent to him. Of those who made oral requests here in Savannah, there were five who received a full set of the specifications—three copies, and four who received but one copy.

544 **Judge-Advocate:**—Mr. President, I am pretty well used up and I think the reporters will be before tomorrow morning, with the amount of material I have given them—

Mr. Blair:—Before the Court adjourns, we would, on behalf of the accused, like to have permission from the Court, by our experts to examine those two charts introduced yesterday of Cumberland Sound. I presume they are now in the custody of the Court, having been offered in evidence, and that it is necessary to have the permission of the Court to examine them.

Judge-Advocate:—I think the defense is entitled to it.

The Court:—I know of no objection.

A Member of the Court:—I move that we adjourn until tomorrow morning, at 11 o'clock.

The Court: If there is no objection, the Court stands adjourned until tomorrow morning at 11 o'clock A. M.

(Here at 2 o'clock, P. M. the Court adjourned to meet on January 26, 1898, at 11 o'clock, P. M.)

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl
Judge Advocate.

545

United States Court Room,
Savannah, Georgia, January 26, 1898.

Court met pursuant to adjournment at 11.00 o'clock to-day.

Present:

All the members of the court, and the Judge-Advocate
The accused, his counsel, and the reporter were also
present.

The President: The court will come to order. All present.

J. W. O. STERLY, a witness for the prosecution, having been previously sworn, continues to testify as follows:

Judge-Advocate: These are the proposals, gentlemen, in regard to Cumberland Sound. I offer now in evidence, the proposals for the improvement of Savannah Harbor, in regard to which the edamination was going on at the close of the court session. I read, first; the following as a part of my offer:

"Subject: Proposals, Improving Hrbor at Savannah, Georgia.
United States Engineer Office.

River and Harbor Improvements and Fortifications in
Georgia and North-Eastern Florida.

Savannah, Ga., September 8, 1896.

Brig.-Gen. Wm. P. Craighill,
Chief of Engineers, U. S. A.,
Washington, D. C.

General:

I have the honor to transmit all proposals received this day for Improving Harbor at Savannah, Georgia, and request authority to award the contract for jetty work to The Atlantic Contracting Company of New York, N. Y., John F. Gaynor, Pres., the lowest rates for jetty work, and that for dredging to Rittenhouse R. Moore of Mobile, Ala., the lowest rates for dredging, the prices in each case being considered satisfactory and reasonable. An abstract of the proposals is transmitted herewith.

Very respectfully, your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.,

(8 enclosures)

546 The President: Does that purport to be an original, or second copy?

Judge-Advocate: That is the original, and as it is spread upon the record I will not have to attach it.

Judge-Advocate: These are all originals which have been identified before.

The President: The abstract also?

Judge-Advocate: This is the abstract I shall later submit the contracts, that is, the proposals.

"Abstract of bids opened at Savannah, Georgia, September 8, 1896, by Captain O. M. Carter, Corps of Engineers, U. S. Army, for Improving Harbor at Savannah, Georgia." (The heads of the columns will be described as follows: The first is for the number, next name and address of bidder; next mattresses, 200,000 square yards, price, amount; the next column is first class stone, 25,000 tons, price, amount; the next column is second-class stone, 25,000 tons, price, amount; the next column is third class stone, 50,000 cubic yards, price, amount; the next column is fourth class stone, 100,000 cubic yards, price, amount; the next column is total for jetty work; the next column is dredging, 1,250,000 cubic yards, price, amount.) No. 1, Virginia Dredging Company, J. Clements Shafer, Secretary and Treasurer, Richmond, Virginia, bids on dredging, price 16-9/10c, amount \$211,600.00.

No. 2, P. Sanford Ross, Jersey City, New Jersey; for mattresses, bids 90c per square yard, amount \$180,000.00; first class stone, 25,000 tons, price \$4.80, amount \$120,000.00; Second class stone, 25,000 tons, price \$4.80, amount \$120,000.00; third class stone, 50,000 cubic yards; price \$3.55, amount \$177,500.00; fourth class stone, 100,000 cubic yards; price \$2.60, amount \$260,000.00; total for jetty work \$857,500.00; For dredging, 1,250,000 cubic yards, price .17-9/10 amount \$223,750.00.

No. 3, Savannah Dredging Company, Jacob Paulsen, 547 President, Savannah, Georgia, bids only on dredging .20-1/2; amount \$256,250.00.

No. 4, The American Dredging Company, S. Y. Scharmerhorn, President, Philadelphia, Pa., bids only on dredging .22, amount \$275,000.00.

No. 5, The Atlantic Contracting Company, John F. Gaylor, President, New York, New York; mattresses: price .95, amount \$190,000.00; first class stone; price \$3.90, amount \$97,500.00; Second class stone: price \$3.90, amount \$97,500.00; Third Class stone: price \$3.50, amount \$175,000.00; Fourth class stone: price \$2.75, amount \$275,000.00; giving a total for jetty work of \$835,000.00.

No. 6, Rittenhouse R. Moore, Mobile, Ala., dredging .13; amount \$162,500.00.

No. 7, John L. Grim, Philadelphia, Pa., mattresses, price .98, amount \$196,000.00; First class stone: price \$4.00, amount \$100,000.00 Second class stone: price \$4.00, amount \$100,000.00; Third class stone: price \$3.30, amount \$165,000.00; Fourth class stone: price \$2.90, amount \$290,000.00; aggregating a total for jetty work of \$851,000.00. Remarks: Amount for which the Secretary of War is authorized to enter into contracts, \$100,5000., With asterisks. It is recommended that the bid of the Atlantic Contracting Company of New York, John F. Gaynor, President, for jetty work, (The first five items), and of Rittenhouse R. Moore, of Mobile, Ala., for dredging, (Item 6.), be accepted, they being the lowest responsible bidders for the best and most suitable materials and service. With the remark as to the Virginia Dredging Company, J. Clement Shafer, Secretary and Treasurer, Richmond, Virginia, that a bond of only \$50,000.00 was submitted instead of \$250,000.00, as required, and in another case that of the American Dredging Company, S. Y. Schermerhorn, President, Philadelphia, Pa., that evidence of authority to bid not filed.

(Signed)

O. M. CARTER,

*Captain Corps of Engineers, U. S. A.,
Savannah, Georgia, September 8, 1896."*

Judge-Advocate: The bids referred to in the abstract, 548 copies of them will be attached to the record, marked consecutively "Exhibits 18, 19, 20, 21, 22, 23 and 24."

Judge-Advocate: Look at "G. R. N. 13, 1892"; what is that?

A. It is a letter from the office of the Chief of Engineers notifying Captain Carter of the passage of the River and Harbor Bill and asking him to submit projects to the Engineer for the amount appropriated.

Q. What is the date of the passage of the Bill, if it is stated there?

A. July 13, 1892.

Mr. Blair: I don't know what the object of that is, anything relating to any other contract, as I understand it, has been passed upon by the court.

Judge-Advocate: I think not, may it please the court.

The President: What's the objection?

Mr. Blair: I have not made any objection, if the court

please, I want to know the nature of the evidence introduced, it seems to be going back of the 1892 contract.

Judge-Advocate: It is going back of the 1892 contract, may it please the court, I propose to go back of all the contracts, in which the parties named in this specification, No. 2, are referred to.

The President: What is the connection which you wish to show?

Judge-Advocate: I wish to show the connection, if there is a connection, or attempt to, between the accused and these parties. Do you make objection?

Mr. Blair: Unless the Judge-Advocate will state as to what particular specifications he intends to connect these contracts of 1892, I think this is due to us, if it is on the conspiracy charge, why then I think we are entitled to know that before we make the objection.

Judge-Advocate: It has reference to the Second Specification of the First Charge, as counsel surmises—that of conspiracy.

The President: The question is material then?

549 Judge Advocate: I presume you will hear their objection.

Mr. Blair: This is only preliminary as entering upon the subject.

The President: You withdraw the objection?

Judge-Advocate: He has not made any objection, formally.

Q. Give me "G. R. 13, 1892." It is the same number. Here the letter above referred to is produced by the witness.

A. This is a letter from the office of the Chief of Engineers, United States Army, July 14, 1892. The River and Harbor Act of July 13, 1892, contains the following item: "Improving Brunswick Harbor, Georgia, \$27,500.00; Cumberland Sound, Georgia, \$170,000.00; Savannah Harbor, Georgia, \$318,750.00; Darien Harbor, Georgia, \$25,000.00; Alata-maha River, Georgia, \$15,000.00; Ocmulgee River, Georgia, \$25,000.00; Oconee River, Georgia, \$25,000.00; Savannah River, between Augusta and Savannah, \$35,00.00; Jekyl Creek, Georgia, \$7,500.00 Inside Water Route, between Savannah, Georgia and Fernandina, Florida, \$15,000.00; Savannah River, Georgia, above Augusta, \$10,000.00, project called for."

Judge Advocate: I offer in evidence, a copy of which will be attached to the record, marked "Exhibit 25"—

Mr. Blair: What is that?

Judge-Advocate: It is a communication, the brief of which, the witness read, it is preliminary. * * *

553 Q. Look at "C. S. No. 1," what's that?

A. That is Captain Carter's project and expenditure for Cumberland Sound.

Q. What is the date?

554 A. July 27, 1892.

Q. Now, go to the next "C. S. No. 2," what's that?

A. That is a letter from the Chief of Engineers, dated August 3, 1892, approving project for Cumberland Sound.

Q. It was approved, then, on August 3, 1892?

A. Yes, sir.

Q. The project?

A. Yes, sir.

Q. Now, look at C. S. N. 1, page 285, what is that?

A. That is a letter to the Chief Clerk of the War Department, Washington, D. C., through the Chief of Engineers, Washington, D. C. and Colonel William P. Craighill, Corps of Engineers, U. S. A., Division Engineer, South-east Division, Baltimore, Maryland, dated August 1, 1892, enclosing a copy of an advertisement inviting proposals for construction of a jetty at entrance to Cumberland Sound, Ga. and requesting authority to publish the same in the following official newspapers; 6 insertions in "The Mornings News," Savannah, Ga., 6 insertions in the "Times-Union," Jacksonville, Fla., 3 insertions in "Engineering & Building Record," N. Y., 3 insertions in "Engineering News," New York, N. Y., and requesting authority to print 200 copies of accompanying specification.

Q. That was on August 1, 1892, you said?

A. August 1, 1892.

Q. Sent by whom?

A. Sent by Captain O. M. Carter.

Q. Now, look at C. S. N. 3, 1892, what is that?

A. That is the approval of the foregoing letter.

Q. That is giving authority to advertise?

A. Giving authority to advertise and print specifications for proposals for constructing a jetty at entrance to Cumberland Sound, Georgia.

555 Q. That was dated August 6, 1892?

A. That was dated August 6, 1892. Approved by L.

A. Grant.

Q. When was it received at the Engineer's office, does it show, I mean here?

A. On August 10, 1892.

Q. What was the date of the advertisement of the specifications?

A. August 1, 1892.

Q. When was the date of opening bids to be?

A. 10th of September, 1892.

Q. What was the first publication made of the advertisements?

Mr. Blair: We desire to examine those, if the Judge-Advocate please.

Judge-Advocate: We suspend and allow you to look at it.

Mr. Blair: I desire to examine those that you have offered, and as they are offered.

Judge-Advocate: I was simply saving time and pursuing the same plan we did in regard to the other cases.

Here papers are handed to counsel for the accused.

Q. Mr. Sterly, you were present here at Savannah at the time those things occurred, to which you have been testifying, having reference to the paper?

A. Yes, sir.

Q. What you have testified to then, is within your own knowledge?

A. Yes, sir.

Q. Now, from those papers before you, refresh your memory. How many days elapsed between the receipt of authority to advertise and the date of actual advertisement—publication of advertisement. Well, the records show that there are—I'll pass that by. What day did the first advertisement appear of those specifications?

A. On August 15, in the "Savannah Morning News."

Q. When did it appear in the next paper?

A. On August 15, in the "Times-Union," Jacksonville, Fla.

556 Q. When did it appear in the next paper on your list?

A. August 20, in the "Engineering and Building Record," New York, N. Y.

Q. How many insertions in that paper?

A. 3 insertions.

Q. When was the last insertion?

A. On September 3.

Q. What is the next?

A. "The Engineering News," New York, N. Y. on August 20, 27, and September 3, 1892.

Q. Can you find from these records when the specifications were received from the printer?

A. Not from these records, I made a memorandum, but I have not got it here.

Q. Do you know when the specifications were received?

A. About shortly before the papers were issued, the first issue of the specifications.

Q. You cannot recall, of your own knowledge. Who took them to the printer to have them published, do you know—or prepared?

A. I do not know.

Q. Cannot you find some data among those papers that will refresh your memory?

A. They were sent to Gibson Bros., in Washington on August 10.

Q. Look at page 295, "C. S. N. 1."

A. That is a letter to General Casey, Chief of Engineers, transmitting in a separate package 125 copies of the specifications for Improving Cumberland Sound, Georgia."

Q. What date is that?

A. On August 26.

Q. Does that refresh your memory to any extent?

A. Yes, sir.

Q. Were those sent under instructions?

557 A. To the Chief of Engineers.

Q. To the Chief of Engineers?

A. Yes, sir.

Q. Specific instructions or general instructions?

A. Circular from Headquarters Chief of Engineers.

Q. That is general instructions?

A. General instruction.

Q. What was the practice of sending them, how sent for printing?

A. The practice was, they would be sent as soon as the specifications were received from the printer, the general practice. There might be times when they have not been sent the same day.

Q. But usually no delay.

A. Yes, sir.

Q. No change was made in the date of the advertisement August the 1st, I understood you?

A. No change of date.

Q. Have you any record of any instructions upon that point as to the date of the advertisement?

A. Yes, sir, here is an approved copy of advertisement, which is dated August 1. Date of opening September 10, 1892. That is an enclosure to this.

Q. I don't think you understand me, Mr. Sterly, I asked if you had any special instructions in regard to it, or simply the specifications were left in that shape?

A. The specifications were left in this shape, as they came from Washington.

Judge-Advocate: This is a list of the applicants for specifications, and those who received the different copies.

Mr. Blair: We have no objection to that, subject to verification, of course, as far as we may be able to verify it and check it up.

Judge-Advocate: The names of parties, and dates of application for specifications. This is in relation to the Cumberland Sound Improvement for 1892

558 "Geo. Y. Wisner, Detroit, Mich., August 23, 1892.

A. G. Midford, New York, N. Y., August 24, 1892.

D. A. Gillies, Wilmington, Del., August 25, 1892.

S. S. Leonard, Mobile, Ala., August 28, 1892.

B. G. Bailey, Philadelphia, Pa., August 30, 1892.

Skinner & Wallace, Wilmington, N. C., September 3, 1892.

R. G. Ross, Jacksonville, Fla., September 6, 1892.

D. V. Howell, New York, August 27, 1892.

Carolina Brown Stone Company, Jno. W. Hinsdale, President, Raleigh, N. C., September 7, 1892."

Judge-Advocate: The names of parties who applied in person, and number of copies issued:

"Jacob Paulsen, Savannah, Ga., Sept. 5, 1892; 3 copies September 6, 1892."

Judge-Advocate: The names of parties who received specifications, one copy, and date of issue:

"Geo. Y. Wisner, Detroit, Mich., August 26, 1892.

A. G. Midford, New York, N. Y., August 27, 1892.

D. A. Gillies, Wilmington, August 27, 1892.

D. V. Howell, New York, August 29, 1892.

B. G. Bailey, Philadelphia, Sept. 2, 1892.

S. S. Leonard, Pensacola, Fla., Sept. 2, 1892.

Skinner & Wallace, Wilmington, N. C., Sept. 6, 1892.

John W. Hinsdale, Presd., Raleigh, Sept. 8, 1892.

Judge-Advocate: The names of parties who received two

additional copies: B. G. Bailey, Philadelphia, September 5, 1892.

Judge-Advocate: The names of parties returning specifications:

A. G. Midford, New York, N. Y., Sept. 6, 1892.

Judge-Advocate: There appears to be no record here as any specification delivered upon oral request. So far as the official records of the office show but one party received a full set of the specifications, that was Jacob Paulsen, and 9 received one copy, and one of those received two additional copies. Now, I shall in each of the cases of this nature that I present to the court read the correspondence in relation to those cases in which only one specification was sent. I made one statement, that there appeared to have been no personal application, I read the case of Jacob Paulsen, who was a personal applicant.

Judge-Advocate: Look at C. S. N. 6, 1892.

Here witness produces the paper.

Judge-Advocate: I offer in evidence and read the following:

Geo. Y. Wisner,
Civil & Consulting Engineer,
39 W. Canfield Ave.

Detroit, Mich. August 23d, 1892.

Capt. O. M. Carter,
Corps of Engrs. U. S. A.,
Savannah, Ga.

Dear Sir:

Please send me a set of specifications and blank forms for bids for the work of constructing jetty at entrance to Cumberland Sound, Ga.

Respectfully yours,

GEO. Y. WISNER.

Judge-Advocate: Now, give me page 296, C. S., N. 1
(Reads):

“United States Engineer Office.

Savannah, Ga., August 26, 1892.

Mr. Geo. Y. Wisner, C. E.,
39 W. Canfield Ave.,
Detroit, Mich.

Sir:

In compliance with request contained in your letter of 23rd instant, one copy of specifications for improving Cumberland

Sound, Georgia, is sent you herewith. Please consider the specifications carefully, and if you desire to bid upon the work

I shall take pleasure in showing you over the same, giving you all the available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bids. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.,"

(One enclosure).

Judge-Advocate: C. S., N. 7. 1892. I offer in evidence and read

"# 121 Liberty St., New York, N. Y.

August 24, 1892.

O. M. Carter, Capt.

Corps of Engineers,
Savannah, Ga.

Dear Sir:

Referring to your advertisement in the "Engineering News" of August 18. 92, I respectfully request you to forward me a copy of Specifications, blank forms and such information as may be proper for you to afford pertaining to the Jetty at the entrance to Cumberland Sound, Ga.

Yours very respectfully,

A. G. MIDFORD,

Contractor &c."

Judge-Advocate: Page 298, C. S., No. 1, I offer in evidence and read

"United States Engineer Office,

Savannah, Ga., August 27, 1892.

Mr. A. G. Midford,

121 Liberty St.,
New York, N. Y.

Sir:

In compliance with request contained in your letter of 561 the 24th instant, one copy of specifications for Improving Cumberland Sound, Georgia, is sent you herewith. Please consider the specifications carefully, and if you desire to bid upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning it, and furnishing you with the two remaining

copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A."

(one enclosure)

Judge-Advocate: C. S., N. 8, 1892. I offer in evidence and read:

Merritt House,

N. W. Cor. Front and French Streets,

J. C. Carwood, Proprietor.

Wilmington, Del., Aug. 25, 1892.

O. M. Carter,

Capt. Corps of Engineers, U. S. A.,

Pleas send me specification and form of proposals for Constructing a Jetty at Entrance to Cumberland sound Ga & oblight,

D. A. GILLIES."

Judge-Advocate: I read from page 297, C. S. 1, and offer in evidence—

"United States Engineers Office,

Savannah, Ga., August 27th, 1892.

Mr. D. A. Gillies,

Merritt House,

Wilmington, Del.

Sir:

In compliance with request contained in your letter of 25th instant, one copy of specifications for Improving Cumberland Sound, Georgia, is sent you herewith. Please consider the specifications carefully, and if you desire to

bid upon the work I shall take pleasure in showing you over the same, giving you all available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,

Yours obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.,

(one enclosure.)

Judge-Advocate: C. S. 9, 1892. I offer in evidence and read communication:

“Office of S. S. Leonard,
General contractor and builder of Pier Heads, &c.,
Mobile, Aug. 29th, 1892.

O. M. Carter, Esq.,
Capt. Corps of Engineers,
Savannah.

Sir:

Please forward to my address here specification blanks, & Etc., for Jetty work entrance of Cumberland Sound, Ga.

Yours truly,

S. S. LEONARD.”

Judge-Advocate: Page 301, C. S., No. 1: (Reading)

“United States Engineer Office,
Savannah, Ga. Sept. 2, 1892.

Mr. S. S. Leonard,
Pensacola, Fla.

Sir:

In compliance with request contained in your letter of the 29th ult., one copy of the specifications for improving Cumberland Sound, Georgia, is sent you herewith. Please consider the specifications carefully, and if you desire to bid 563 upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning it, and furnishing you with the two copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt. Corps of Engineers, U. S. A.,

(one enclosure.)

Judge-Advocate: C. S. N., 10:

“B. G. Bailey,
Civil Engineer.

1501 Arch St.
Philadelphia Aug. 30th, 1892.

Capt. O. M. Carter,
Corps of Engineers, U. S. A.,

Sir:

Will you kindly forward me the necessary specifications

and blank forms relative to construction of "Jetty at entrance of Cumberland Sound, Ga."

Very truly yours,

B. G. BAILEY."

Copy S.

Judge-Advocate: I read in evidence C. S. No. 1, page 300, :
"United States Engineer Office,
Savannah, Ga., Sept. 2, 1892.

Mr. B. G. Bailey, C. E.,
1501 Arch St., Philadelphia, Pa.

Sir:

In compliance with request contained in your letter of the 30th ultimo, one copy of the specifications for Improving Cumberland Sound, Ga., is sent you herewith. Please consider the specifications carefully and if you desire to bid upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning 564 it, and furnish you with the two remaining copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.,

(one enclosure.)

Q. What is that?

A. That is a request for two more specifications for Cumberland Sound by the same man.

Q. A telegram?

A. A telegram.

Judge-Advocate: (Reading), a telegram dated "Philadelphia, Pa. Capt. O. M. Carter, Savannah. Send me at once two more copies of proposals and specifications for Cumberland Sound work. B. G. Baily Received, U. S. Engineer Office, Savannah, Ga., Sept. 5, 1892," with a memorandum attached in red ink "Copies mailed Sept. 5/92. J. B. C."

The President: What is the date of the telegram?

Judge-Advocate: "Received September 5th, dated Philadelphia, Pa. 4, I presume that is September the 4th—a night message (C. S. 12, 1892).

Judge-Advocate: This is the answer to Mr. Bailey, C. S. 1, page 302

“United States Engineer Office.

Savannah, Ga., Sept. 5, 1892.

Mr. B. G. Bailey, C. E.,
1501 Arch St.,
Philadelphia, Pa.

Sir:

In compliance with your telegraphic request, there are sent you herewith, two additional copies of the specifications for Improving Cumberland Sound, Georgia, completing set 565 necessary to enable you to bid.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Captain Corps of Engrs. U. S. A.,

J. B. CONNOLLY.

(2 enclosures.)

Judge-Advocate: C. S., N. 11; I offer in evidence and read:
Office of

The Standard Veneer Package Company,

Manufacturers of patented

Boxes and Baskets,

Grape and Fruit Baskets a Specialty.

Wilmington, N. C., Sept. 3, 1892.

Capt. O. M. Carter,
Savannah, Ga.

Sir:

Enclosed find specification for jetty work on Savannah River sent us some short time ago.

Send specifications for Cumberland Sound, and oblige,

Yours,

SKINNER & WALLACE.”

Judge-Advocate: I offer in evidence and read C. S. 1, page 304:

“United States Engineer Office,

Savannah, Ga., Sept. 6, 1892.

Messrs. Skinner & Wallace,
Wilmington, N. C.,

Sirs:

In compliance with request contained in your letter of the 3rd inst., one copy of the specifications for Improving Cumberland Sound, Ga., is sent you herewith. Please consider the specifications carefully, and if you desire to bid upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning it and furnish-

ing you with the two remaining copies of the specifications
necessary to enable you to submit your bids. If you do
566 not intend to bid, please return the enclosed specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engineers, U. S. A."

(One enclosure)

Judge-Advocate: S. H. No. 68; I offer in evidence and
read:

"Jacksonville, Fla. Sept. 6, '92.

Capt. O. M. Carter,
U. S. Engineer Corps,
Savannah, Ga.

Dear Sir:

Will you please send me specifications and papers requi-
site for bidding on all work under your jurisdiction and oblige,

Yours very truly,

R. G. ROSS."

Judge-Advocate: C. S., page 306:

"Savannah, Ga., Sept. 8, 1892.

Mr. R. G. Ross,
Jacksonville, Fla.

Sir:

In compliance with request contained x x x x x x x x
x x x x I inclose x x x x x x x Specifications for
x x x x x x Improving Cumberland Sound, Ga. x x
x x x x For original letter, see Savannah Harbor book."

Judge-Advocate: This is Savannah Harbor book, No. 1,
page 475:

"United States Engineer Office,

Savannah, Ga., Sept. 8, 1892.

"Mr. R. G. Ross,
Jacksonville, Fla.

"Sir:

In compliance with your request of the 6th, instant,
566½ received this day, I herewith enclose one copy of each
of the specifications for Improving Harbor at Savannah
Georgia, Improving Cumberland Sound, Georgia; Improving
Savannah River above Augusta, Georgia. Please consider
the specifications carefully, and if you desire to bid upon any
or all of the works, I shall take pleasure in showing you over
the same, giving you all of the available information concern-

ing them, and furnishing you with the remaining copies of the specifications, necessary to enable you to submit your bid.

"If you do not intend to bid on any particular work, please return the specifications for that work. If upon none, please return all of them.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A."

(Three enclosures)

Judge-Advocate: S. H., No. 59, 1892. This is a postal:
"N. Y., Aug. 27—92

"Dear Sir:

Please send me plans and specifications for govt work at Savannah, and on Cumberland Sound; not dredging. Yours,
D. V. HOWELL,

202 Broadway, N. Y. City. Room 24."

"Capt. O. M. Carter, U. S. A.,

U. S. Engineer Office,

Savannah, Georgia."

Witness: I find a letter here from Mr. Howell, in the record of Savannah Harbor.

Judge-Advocate: You have got the wrong book.

567 Judge-Advocate: That postal was with regard to all the work.

Judge-Advocate: I offer in evidence and read, C. S., No. 1, page 299:

"United States Engineer Office,
Savannah, Ga.

August 29, 1892.

"Mr. D. V. Howell,

202 Broadway,

New York, N. Y.

"Sir:

In reply to your request of 27th, instant, one copy of specifications for improving Cumberland Sound, Georgia, is sent you herewith. Please consider the specifications carefully, and if you desire to bid upon the work, I shall take pleasure in showing you over the same, giving you all available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid.

"If you do not intend to bid, please return the inclosed specifications.

"The Savannah Harbor specifications have not yet been received from the printer; but when they are, a copy will be sent you.

Very respectfully,
Your obedient servant,
O. M. CARTER,
Capt. Corps of Engineers, U. S. A."

(One enclosure)

568 Judge-Advocate: C. S. N. 14:

"The Carolina Brown Stone Company.

Quarries, Sanford, Moore County, N. C. Offices,
Norfolk and Raleigh.

Raleigh, N. C. September 9th, 1892.

O. M. Carter, Esq.,
Corps of Engineers U. S. A.,
Savannah, Ga.

Dear Sir:

Will you be so good as to send me specifications for the stone work required in constructing the jetty at the entrance of Cumberland Sound, and very greatly oblige,

Yours truly,

JNO. W. HINSDALE,
President."

Judge-Advocate: While this is date September the 9th, it appears to have been received "U. S. Engineer Office, Savannah, Ga., September 8, 1892. Have you the response to that, that will show.

Judge-Advocate: I offer in evidence:

"United States Engineer Office,
Savannah, Ga., Sept. 8, 1892.

Mr. Jno. W. Hinsdale,
President Carolina Brown Stone Company,
Raleigh, N. C.

Sir: In compliance with request contained in your letter dated the 9th (7th) instant, one copy of the specifications for Improving Cumberland Sound, Georgia, is sent you herewith. Please consider the specifications carefully, and if you desire to bid upon the work I shall take pleasure in showing you over the same, giving you all of the available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your

bid. If you do not intend to bid please return the enclosed specifications.

Very respectfully,
Your obedient servant,
O. M. CARTER,
Capt. Corps of Engrs., U. S. A.,

(one enclosure).

569 Q. What was the date of the award of this contract?
A. September 13, 1892.

Judge Advocate: I offer in evidence:

"United States Engineer Office,
Savannah, Ga., September 10, 1892.

Brig. Gen. Thomas L. Casey,
Chief of Engineers U. S. A.,
Washington, D. C.

General:

I have the honor to transmit herewith all proposals received for constructing jetty at entrance to Cumberland Sound, Georgia, with abstract of same, and authority as requested to award the contract to Edward H. Gaynor, the lowest responsible bidder, the prices being deemed reasonable.

Very respectfully,
Your obedient servant,
O. M. CARTER.
Capt. Corps of Engrs., U. S. A.

(4 enclosures).

Judge-Advocate: I read from the copy, there are the same contents exactly as this, with this endorsement:

1st indorsement.
Office Chief of Engineers,
U. S. Army.
Sept. 13, 1892.

Respectfully returned to Captain Carter, Corps of Engineers, approved.

When such record as may be necessary has been made this paper will be returned to this office.

By order of

MAJOR H. M. ADAMS,
Corps of Engineers.
(In charge)
THOS. TUTTLE,
Captain Corps of Engineers.

Second endorsement:

United States Engineer Office,
Savannah, Georgia, Sept. 15, 1892.

Respectfully returned to the Chief of Engineers, U. S. A.,
Washington, D. C. Record made.

O. M. CARTER,

Captain Corps of Engrs., U. S. A.,

Judge-Advocate: The abstract of proposals referred to is
as follows:

570 United States Engineer Office,
Savannah, Ga., Aug. 1, 1892. Sealed proposals will
be received at this office until 12 M., city time, on the 10th day
of September, 1892, and then publicly opened, for construct-
ing jetty at entrance to Cumberland Sound, Ga. Specifica-
tions, blank forms, and all available information will be fur-
nished on application to this office. O. M. Carter, Captain,
Corps of Engineers, U. S. A.

Abstract of Proposals for Constructing Jetty at Entrance
to Cumberland Sound, Georgia, opened on September 10, 1892,
by Capt. O. M. Carter, Corps of Engineers, U. S. A.

—ooOoo—

No. of pro- posal	Name of Bidder	Residence	Mattresses per sq. yd.	PRICE FOR	
				Riprap per cu. yd.	Total
1	Chas. C. Ely	Savannah, Ga.	\$1.32	\$3.78	\$211.44
2	Wm. H. Walsh	Fernandina, Fla.	1.26	3.72	204.96
3	Edward H. Gaynor	"Boston, Mass.	1.05	3.59	184.52

Remarks: Amount available, \$170,000.

"Bid recommended for acceptance, he being the lowest re-
sponsible bidder for the best and most suitable materials and
service.

I hereby certify that the above Abstract of Proposals is
correct.

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.,
Savannah, Ga., Sept. 10, 1892.

571 Judge-Advocate: The three proposals referred to
with the abstract are offered in evidence, copies will be
attached to the record and marked "Exhibits 26, 27 and 28."

Judge-Advocate: I offer in evidence the contract entered
into with the successful bidder, as he appears on that ab-
stract between Capt. O. M. Carter of the one part, entered
into September the 16th, 1892, and Edward H. Gaynor of

the other part, for constructing jetties at entrance to Cumberland Sound, Georgia.

The President: One of the five originals, is it?

Judge-Advocate: One of the originals, as testified to by the clerk from the Engineer's office here. It has been identified.

Judge-Advocate: The contract which was just placed in evidence bears the approval of Thomas Lincoln Casey, Brigadier-General, Chief of Engineers, September 27, 1892.

The President: The court will take a recess for 10 minutes.

Here, at 12.35 o'clock p. m., the court takes a recess.

Here the court met pursuant to recess at 12.45 o'clock p. m.

Present: All the members of the court, and the Judge-Advocate; the accused, his counsel, and the reporter, George T. Cann, were also present.

J. W. O. STERLY, on the stand, having been previously sworn, continued to testify as follows:

Direct Examination (Continued):

Questions by the Judge-Advocate.

Q. Mr. Sterly, I now call your attention to the subject of the improvement of Savannah Harbor of 1892. The appropriations for that improvement were contained in the same act as the appropriations for the improvement of Cumberland Sound, as I understand?

A. Yes, sir.

Q. Now, what was the date of the project for expenditures; when was the project of expenditure called for: G. R. 13?

572 A. G. R., 13 is in evidence with the Cumberland Sound before, the Cumberland Sound contract.

Q. The project was called for the same date in the same letter?

A. Yes, sir.

Q. July 13, 1892, if I remember rightly. Was the project for expenditure submitted at the same time for Savannah Harbor as for Cumberland Sound?

A. Yes, sir.

Q. S. H., 1, page 263?

A. It was submitted on July 18, 1892.

Q. That is the same date it was called for?

A. It was called for on July 18, the same date.

Q. What date do you find the approval, if you find it?

A. July 20, 1892.

Q. What was the date of submitting the jetty specifications, with request to advertise?

A. July 18, 1892.

Q. Have you the letter, asking for that authority?

A. Yes, sir.

Q. Let me have it. (Here the letter is produced by the witness.)

A. There are two letters.

Q. I want the original letter.

A. Here is the original. (Handing paper)

Judge-Advocate: I offer in evidence and read:

“United States Engineer Office,
Savannah, Ga., July 18, 1892.

“The Chief Clerk of the War Department,
Washington, D. C.

“(Through the Chief of Engineers, U. S. A., Washington, D. C., and Colonel William P. Craighill, Corps of Engineers, U. S. A., Division Engineer, Southeast Division Engineer, Baltimore, Maryland.)

“Sir:

I herewith inclose a copy of an advertisement, inviting 573 proposals for constructing training walls in the Savannah Harbor, Ga., and request authority to publish the same in the following official newspapers:

6 insertions in Savannah Morning News.

6 insertions in Charleston News and Courier.

6 insertions in Jacksonville Times-Union.

3 insertions in New York Engineering News.

3 insertions in New York Engineering News.

3 insertions in New York Marine Journal.

I also request authority to print 250 copies of accompanying specifications.

Very respectfully,
Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

(2 enclosures)

First Endorsement

Office Chief of Engineers,

U. S. Army, July 20, 1892.

Respectfully forwarded to the Chief Clerk of the War Department with recommendation that the authority within asked for be granted.

THO. LINCOLN CASEY,
Brig.-Gen. Chief of Engineers.

Second Endorsement,

War Department,

July 20, 1892.

Approved, B. Elkins, Secretary of War.

Third Endorsement,

U. S. Engineer Office,

Savannah, Ga., November 1, 1892.

Respectfully returned to the Chief Clerk War Department, Washington, D. C., with the following bills and vouchers in duplicate:

Judge-Advocate: That is simply a statement of the account for the advertising.

Q. This letter appears to have been letter pressed, does it appear in the official record?

574 A. No, sir.

Q. Have you made a search as of that date?

A. There is a letter.

Q. That letter I am referring to?

A. Yes, sir.

Q. That letter I am referring to?

A. This letter I cannot find in the copy book.

Q. Do you find a letter of similar import?

A. Yes, sir (Handing Judge-Advocate copy book).

Q. This is the Savannah Harbor book, so called?

A. Yes, sir, Number 1.

Judge-Advocate: S. H. 1, page 368, I offer in evidence and read the copy, reading from the public records a copy in typewriting of the letter identical in term with that which I have just read. It will be offered to counsel to compare the two:

“United States Engineer Office,
Savannah, Ga., July 18, 1892.

The Chief Clerk of the War Department,
Washington, D. C.

(Through the Chief Engineer, U. S. A., Washington, D. C.,
and Col. Wm. P. Craighill, Chief of Engineers, U. S. A., Di-
vision Engineer South-east Division, Baltimore, Maryland.)
Sir:

I enclose herewith a copy of an advertisement inviting
proposals for constructing training walls in the Savannah
Harbor, Georgia, and request authority to publish the same
in the following official newspapers:

- 6 insertions in Savannah Morning News.
- 6 insertions in Charleston News and Courier.
- 6 insertions in Jacksonville Times-Union.
- 3 insertions in New York Engineering News.
- 3 insertions in New York Marine Journal.

I also request authority to print 250 copies of accom-
panying specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

(2 enclosures.)

Capt. Corps of Engrs., U. S. A.

Q. Whose handwriting is that, Mr. Sterly? If you know
(Handing witness the above original letter of July 18, 1892.)?

A. Captain Carter's.

Q. Where are the specifications that accompanied this
communication? (Here a paper is opened) These are the
original specifications that accompanied that?

A. Yes, sir.

Q. In whose handwriting are they?

A. Captain Carter's.

Q. Upon what date were the bids to be opened?

A. On the 20th of August 1892.

Q. Has an original of that typewritten letter, copied in the
book, ever been returned to the Department after it was sent
out of the Department, to your knowledge?

A. I have not seen it.

Q. All official communication, then, has been had upon
that paper?

A. Yes, sir.

Q. Including the payment of accounts for printing?

A. Yes, sir.

Q. The bids were to be opened August 20th?

A. On August 20th.

Q. What was the date of the first advertisement? The first publication of an advertisement?

A. July 27th.

576 Q. In what paper?

A. In the Morning News, Savannah.

Q. When was it first published in the News and Courier?

A. July 28.

Q. That was in Charleston, South Carolina, I presume?

A. Charleston, S. C.

Q. When in the Times-Union of Jacksonville, Fla.

A. July 28.

Q. When in the Engineering News New York?

A. July 30.

Q. How many insertions?

A. Three insertions were ordered.

Q. When in the Marine Journal of New York?

A. On July 30th.

Q. When was this communication received back in the Engineer's Office here in Savannah (Handing witness the letter)?

A. On July 26, 1892.

Q. July 26. That appears from the file mark stamped on the paper itself?

A. Yes, sir.

Judge-Advocate: Now, here is a list of applicants for specifications.

Mr. Blair: Now, if the court please, we object to the introduction of that list. If the Judge-Advocate is going to read the letters we are entirely willing that the list shall go in, we have no objection to that, and, of course, the Judge-Advocate can put in the letters whether we object or not, but in the interest of saving time we are willing to do just as we did yesterday afternoon at the close of the session, or just before the session closed, to let that list go in and let it be stated in the record that the letters are of similar tenor to the letters read this morning, but we object to both the list and the record itself.

577 Judge-Advocate: I don't care to have you make a statement as to this list.

Mr. Blair: If there are any practical reasons why the letters should go in we have no objection.

Judge-Advocate: I will yield to the counsel so far as this

list is concerned and shall not consume the time of the court in reading the letters in regard to this list. I will state what it shows, however, this list shows the applications for specifications under the advertisement that has been testified to. "Ross and Sandord, C. C. Ely, Agent, July 29, 1892, applies for one copy, which was sent him on July 30, 1892, and he applied for two additional copies on August 2, 1892, and they were sent him on August 3, 1892.

John G. Smith, Charleston, presumably South Carolina, July 29, 1892, and they were sent him on July 30, one copy.

John F. Gaynor, New York, July 30, 1892, and they sent him one copy July 30, 1892.

Jacob Friday, Pittsburgh, Pa., July 30, 1892, August 1, 1892, one copy sent him.

J. D. Walker, Alleghaney, Pa., August 1, 1892, one copy sent him August 5, 1892.

Geo. A. Mercer, Jr., Savannah, Ga., August 1, 1892, one copy sent him August 1, 1892.

G. F. Broughton, Jacksonville, August 2, 1892, there was sent him one copy August 5, 1892.

M. D. McIsaac and Company, Wilmington, August 2, 1892, one copy sent them August 5, 1892.

Stewart Stone Company, Columbia, S. C., August 3, 1892, one copy sent them August 5, 1892.

Mason Gooch & Hoge Company, Frankfort, Ky., July 28, 1892, sent them one copy August 11, 1892.

International Contracting Company, New York, August 6, 1892, a full set of three was sent August 10, 1892.

578 Skinner & Wallace, Wilmington, August 5, 1892, and August 12, 1892, there was one copy sent August 11, 1892 and two additional copies sent August 16, 1892.

Henry K. Gustin, Oscala, August 7, 1892, one copy sent August 11, 1892.

Grant Wilkins, Atlanta, Ga., August 8, 1892, one copy sent August 11, 1892.

R. Moore & Co., Mobile, Ala., August 8, 1892. One copy sent August 11, 1892.

McGee, Kahmann & Co., Kansas City, August 8, 1892. One copy sent August 12, 1892.

International Contracting Company, New York, August 11, 1892, "Will send specifications as soon as they are out" August 13, 1892.

B. G. Bailey, Philadelphia, August 13, 1892, one copy of specifications sent August 16, 1892.

Kingbridge Company, Chattanooga, August 15, 1892, one copy sent August 16, 1892.

J Marzyeh & Co., Jacksonville, no date, one copy sent August 16, 1892."

Q. Were there any bids opened under the specifications referred to?

A. No, sir.

Q. Why not?

A. They were recalled, Captain Carter received a telegram.

Q. Do you know that?

A. Yes, sir. (Handing the Judge-Advocate paper), that is an official copy of the telegram sent from Washington.

Q. By whom is it certified?

A. By Major Adams, Corps of Engineers.

Judge-Advocate: I offer in evidence and read this official copy of a telegram: S. H. 45:

"Telegraph at Government rates.

Washington D. C., August 18, 1892.

Captain Carter,
579 Southern Bank Building,
Savannah, Georgia.

Authority to advertise Savannah dredging asked for August Third not granted. On account of Eight hour law, return unopened all bids for stone, etc., in Savannah Harbor invited July Eighteen.

Request authority to re-advertise for bids for improving harbor as a whole; one set of specifications only, covering all work.

H. M. ADAMS,
Engineers?

Collect.

Official copy by mail.

H. M. Adams,

Major Corps of Engineers."

Q. After that action was taken, when was authority again asked to print and advertise?

A. On August 17, 1892.

Q. On August 17? Why, it was on August 18 that it was withdrawn. Look at it, look at S. H. 1, page 426, see if you can refresh your memory?

A. August 18, that is a telegram to the Chief of Engineers, U. S. Army, Washington, D. C. "Please return Savan-

nah Harbor Specifications as I have no copy, that I may prepare combined sets as soon as possible.

Q. Now, look at S. H. 47.

A. That is a letter from the Chief of Engineers dated August 18. "As requested, transmits original specifications for dredging in Savannah Harbor."

Q. Look at S. H. page 428.

A. That is a telegram to the Chief of Engineers dated August 18, 1892, "Do not fully understand telegram. The clause relating to 8 hour law has been attached to all specifications that were sent out relating to stone, etc., in Savannah Harbor. Is this sufficient, or must the whole work, jetty and dredging, be let to one contractor on new specifications. Official business government rate, paid? Charge

580 Q. Now, look at S. H. 46?

A. That is a true copy of a telegram of the Chief of Engineers dated August 18, 1892. "Captain Carter, Engineers, Southern Bank Building, Savannah, Georgia, the whole work on jetties and dredging Savannah Harbor must be re-advertised in one set, of specifications, by direction of General Casey. H. M. Adams, Engineers. A true Cope, John G. D. Knight, Captain, Corps of Engineers."

Q. Now, look at S. H. 55?

A. That is a letter from the Chief of Engineers, dated August 20, 1892.

Q. What is it?

A. A letter addressed to Captain O. M. Carter:
Captain O. M. Carter,

Corps of Engineers,

Richfield Springs, N. Y.

Captain:

I have to furnish for your information the accompanying copy of your letter of the 17th instant, with the endorsements thereon, relative to advertisement and specifications for work at Savannah Harbor, Georgia. You will please return the two enclosures handed to you in this office August 20.

Very respectfully,

Your obedient servant,

H. M. ADAMS,

Major, Corps of Engineers, In charge.

4800-1892.

Copy of 4800-accompanying.

Q. Look at S. H. 1, page 447?

A. That was a letter written by Captain Carter to the Chief of Engineers under date of August 24, 1892.

Q. Read it?

581 A. (Reading)

“U. U. Engineer Office,

Savannah, Ga., Aug. 24, 1892.

The Chief of Engineers, U. S. A.,

Washington, D. C.

General:

I have the honor to request authority to modify the specifications approved by the Secretary of War, Aug. 20/1892, relating to Savannah Harbor, Georgia.

The specifications, as approved, provide in par. 53 that * * * “The work will not be divided between two or more “contractors, but will be awarded to the lowest responsible “bidder, who furnishes satisfactory evidence of his ability to “prosecute the work vigorously as required.” * * *

There are two distinct classes of work in Savannah Harbor, viz., jetty work, and dredging, and contractors having plants suitable for one class of work have none suitable for the other, and are moreover unskilled in the two classes of work.

The only way in which a contractor for one class of work could bid intelligently on the other class would be to form a partnership with another contractor having experience in that class of work. When combinations are thus entered into, it is feared that prices will be increased. Moreover, there are some contractors for dredging who desire to bid on the work who cannot do so at all if they must bid on the whole work. For these reasons it appears to me desirable to change the clause of the specifications hereinbefore quoted, and I therefore have the honor to request authority to substitute for it the following: * * * “The United States reserves the

“right to award the contract for jetty work, (items 1 to 9 inclusive), to one bidder, and that for dredging, (items 10 “and 11), to another, but neither the jetty nor the dredging “will be divided between two or more contractors, but

“the contract for the entire work, or for each of the

582 “two classes of work may be awarded to the lowest responsible bidder who furnishes satisfactory evidence of

“his ability to prosecute the work vigorously as required.”

* * *

The contract can then be awarded as a whole, or in two

parts, as appears most desirable and advantageous to the United States.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engineers, U. S. A.,

Q. Look at S. H. 60.

Mr. Blair: I just want to get the date of that letter.

A. August 24, 1892. (To Mr. Blair.). (Answering Judge-Advocate's question) This is an official copy of a telegram from Washington to Captain Carter.

Q. By whom is it certified to be official?

A. H. M. Adams.

Q. Read it.

A. (Reading)

"Telegraph At Government Rates.

Washington, D. C., Aug. 27, 1892.

Captain Carter,
Southern Bank Building,
Savannah, Ga.

Secretary of War has authorized change in specifications for Savannah Harbor as recommended in your letter of August twenty-four.

H. M. ADAMS,
Engineers.

Collect.

Official copy by mail:

H. M. Adams,

Major, Corps of Engineers."

Q. What was the date of opening bids given in those specifications?

The President: You mean given in the advertisement, don't you?

Judge-Advocate: Yes. Never mind that just now. When was authority given to advertise; to re-advertise?

583 A. August 20, 1892.

Q. Upon a written application by Captain Carter from this office, from the office in Savannah?

A. Yes, sir, on the written application of August 17, 1892.

Q. Did the specifications accompany that? Did you find any request for authority subsequent to August 18, 1892?

A. I beg your pardon.

Q. Do you find any request for authority to advertise subsequent to August 18, 1892? there?

A. No, I dont find any, this letter of August 17th relates to dredging.

Q. But what I am endeavoring to find, Mr. Sterly, are the specifications that were to be advertised for bids under this contract for this improvement so far as your official records show. Then there is no no written application to re-advertise for bids (Here witness searches for papers).

Judge-Advocate: Well, if you dont find it, Mr. Sterly, we will get at it another way, never mind it Mr. Sterly.

Q. Do you remember the date for opening bids?

A. September 17, I am not sure.

Q. That's your impression, 1892?

A. Yes, sir.

Q. Now, please look at your records, Book 1, page 435,

A. That is a letter to the Morning News in Savannah asking them to publish the enclosed advertisement.

Q. What date?

A. The letter is dated August 22, 1892.

Q. When was the first publication made in that paper?

A. On August 23rd.

Q. When was the first publication made in the Times-Union, Jacksonville, Florida?

A. August 22.

584 Q. Do you find that there on page 437?

A. August 24.

Q. August 24. When was it first published in the News and Courier of Charleston, South Carolina. Page 439.

A. August 24.

Q. When in the New York Seaboard: page 440.

A. August 27—there's a correction here "August 25."

Q. August 25?

A. Yes, sir.

Q. Have you any record there of when the specifications were received from the printer?

A. Yes, sir.

Q. When was it?

A. There is a letter from Gibson Brothers, Washington, D. C., dated August 29, 1892, "Captain Carter, Sir: Your telegram of this morning is received. The specifications were shipped on Saturday. Yours truly, Gibson Brothers.

Q. That is simply information that they had been shipped. I mean to their receipt here. I will ask you when the first specifications were issued?

A. On August 29. There is also a telegram to Gibson Brothers on the same date.

Q. How were they issued?

A. They were issued on application.

Judge-Advocate: I have another list of applicants here, gentlemen (to counsel for the accused). This is a list of applicants for specifications and information it appears that those who received them in response to written application but one copy, was 11, and those who received additional two copies, 2; those who received full sets on written application, 5, and three with an interrogation mark, which I shall ask to be explained. Upon oral application four received three sets of specifications, or full sets, and one received one.

585 Judge-Advocate: In spite of the objection of the counsel, I propose to place upon the record the correspondence which was had with these parties who received but one copy of the specifications.

Mr. Blair: We cannot object.

Judge-Advocate: Please give me File No. 50 (Here a paper is handed to the Judge-Advocate). That appears to be a communication not signed, I will make no use of it. Give me File marked 51.

Mr. Rose: Was anything said in response to that letter which was not signed?

Judge-Advocate: No, I can show you the letter (Here the witness hands the paper to the Judge-Advocate).

Judge-Advocate: File No. 51, I offer and read from.
Water Works, Sewerage, Railroads.

Stewart K. Smith, C. E.
Surveying and Draughting.

Ballard, Washington, August 15, 1892.
O. M. Carter, Captain Corps Engineers, U. S. A.

U. S. Engineer's Office,
Savannah, Ga.

Dear Sir:

Will you kindly send me a copy of the specifications for the stone, mattress, fascine and pile work in Savannah Harbor as advertised in "Engineering News" of Aug. 4th, and oblige,

Yours very respectfully,

STEWART K. SMITH."

Box 254

Judge-Advocate: Now give me S. H. 1, page 441. (Here the book and page is handed the Judge-Advocate).

Judge-Advocate: I read in evidence:

“United States Engineer Office,
Savannah, Ga., August 26, 1892.

Mr. Stewart K. Smith, C. E.,
City Engineer, Ballard, Wash.

Sir:

In compliance with request contained in your letter of the 15th instant, I transmit herewith copy of specifications 586 for stone, mattress, fascine, and pile work in Savannah Harbor, Ga.

Very respectfully,

Your obedient servant,

O. M. CARTER,

(One enclosure.)

Capt., Corps of Engrs., U. S. A.”

Mr. Rose: How can that be, he didn't get it back until the 29th.

Witness: That is the old copy, and the date is changed too. No,

Q. Is that letter signed by Captain Carter?

A. Yes, by Captain Carter.

Q. Give me File marked 52. (Here letter is handed Judge-Advocate).

Judge-Advocate: I read in evidence:

San Francisco Bridge Company,
Engineers and Contractors,
World Building, New York, N. Y.
San Francisco, and Seattle.

New York, Aug. 17, 1892.

Captain O. M. Carter,

Corps of Engineers, U. S. A.,

Savannah, Ga.

Dear Sir:

Your favor of August 10th noted, we would like to investigate your work at Savannah, or other places that you may have dredging work to do. Wish you would kindly send us copy of specifications when ready, for work in your charge. In this connection, wish you would kindly keep in mind that we prefer to do work by hydraulic method, where possible, and, in that case, desire measurements in situ instead of in scows. Of course, as you know, there is considerable difference for material measured in situ over material measured

in scows. If you can do so, wish you would make provision for this in your specifications.

Yours very truly,

SAN FRANCISCO BRIDGE COMPANY,

By Geo. W. Catt, Vice-Prest."

587 Judge-Advocate: To this reply was made S. H. 1, page 445, August 26, 1892. That does not seem to say anything about specifications. It may be covered—Look at File marked 56, it may be covered by that, possibly. No. It is noted here that one specification was sent to New York and three to San Francisco August 29, 1892. S. H. 1, 458: I offer in evidence and read:

"United States Engineer Office,
Savannah, Ga., August 29, 1892.

San Francisco Bridge Co.,

42 Market St.,

San Francisco, Cal.

Sirs: In compliance with request of Mr. Catt, I send you herewith a complete set of specifications for the work proposed for the improvement of Savannah Harbor, Ga.

Very respectfully,

Your obedient servant,

O. M. CARTER,

(3 enclosures.)

Capt., Corps of Engrs., U. S. A."

Judge-Advocate: S. H. 1, 459:

"United States Engineer Office,
Savannah, Ga., August 29, 1892.

The San Francisco Bridge Co.,

World Building,

New York, N. Y.

Sirs:

In compliance with your request, I send you herewith one copy of the specifications for the improvement of Savannah Harbor, Georgia, a complete set has been sent to San Francisco, as requested by you.

Judge-Advocate: File No. 54, from Atlanta, Georgia,
August 20, 1892.

588

"Atlanta, Georgia, August 20, 1892.

Capt. O. M. Carter,
Corps U. S. Engineers,
Savannah, Ga.

Dear Sir:

I understand that the letting for the harbor work has been postponed and will be re-advertised,—kindly send me a copy of the new specifications for same, and oblige,

Yours truly,

V. H. KRIEGSHABER".

Judge-Advocate: To which this response was made, S. H. 1, page 456.

"United States Engineer Office,
Savannah, Ga., August 29, 1892.

Mr. V. G. Kriegshaber,
8 N. Forsythe St.,
Atlanta, Ga.

Sir:

In compliance with request contained in your letter of the 20th instant, one copy of the specifications for Improving the Harbor at Savannah, Georgia, is sent you herewith. Please consider the specifications carefully, and if you decide to bid upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,
Your obedient servant,

O. M. CARTER,

(One enclosure.) *Captain Corps of Engineers, U. S. A."*

Judge-Advocate: File No. 59.

A. It is among the Cumberland Sound papers.

Q. It is among the Cumberland Sound papers?

589 A. Yes, sir.

Q. That was answered at the same time—that letter covered the application for both contracts?

A. For both contracts.

Q. Both advertisements?

A. Yes, sir.

Judge-Advocate: All right.

Judge-Advocate: File No. 62.

"Frank C. Somers,
Dredging,
211½ Market Street.

Camden, N. J., August 29th, 1892.

O. M. Carter, Captain of Engineers,
Savannah, Ga.

Sir:
Please send me specifications for improving Savannah Harbor.

Yours respectfully,

FRANK C. SOMERS."

Judge-Advocate: I read from S. H. 1, page 467.

"United States Engineer Office,
Savannah, Ga., August 31, 1892.

Mr. Frank C. Somes,
211½ Market St.,
Camden, New Jersey.

Sir:

In compliance with request contained in your letter of the 29th inst., one copy of the specifications for improving the Harbor at Savannah, Georgia, is sent you herewith. Please consider the specifications carefully, and if you decide to bid upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bids. If you do not intend to bid, please return the enclosed 590 specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

(One enclosure).

Judge-Advocate: File 63: Savannah, Georgia, August 29, 1892.

Never mind that. He got what he asked for.

Judge-Advocate: File No. 65: National Dredging Company, September 5, 1892. That is all right, so far as this reading is concerned.

Judge-Advocate: File No. 68:

A. It is in evidence with Cumberland Sound.

Q. That was in the letter read yesterday then?

A. This morning, the 1892 contract, that letter.

Judge-Advocate: File No. 71:

Southern Supply Company & R. C. Strother, Contractors,
Atlanta, Ga. Sept. 8, 1892.

O. M. Carter,
Capt: Corps Engrs.
Savannah, Ga.

Dear Sir:

Will you please mail us copy of specifications and blank form covering information regarding improvements Savannah Harbor.

Very Respy,
SOUTHERN SUPPLY CO. & R. C. STROTHER,
S.

Judge-Advocate: S. H. 1, page 476:

"United States Engineer Office,
Savannah, Ga., September 9, 1892.

Southern Supply Co. & R. C. Strother,
Contractors,
Atlanta, Georgia.

Sirs:

In compliance with request contained in your letter of 591 the 8th instant, one copy of the specification for improving Harbor at Savannah, Georgia is sent you herewith. Please consider the specifications carefully, and if you decide to bid upon the work I shall take pleasure in showing you over the same, giving you all the available information concerning it and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bids. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

(one enclosure).

Judge-Advocate: Give me S. H. 1, page 462.

"United States Engineer Office,
Savannah, Georgia, August 29, 1892.

Mr. G. W. Eagan,
Charleston, S. C.

Sir:

In compliance with your verbal request of this day, one copy of the specifications for improving the harbor at Savannah, Georgia is sent you herewith. Please consider the specifications carefully, and if you decide to bid upon the work

I shall take pleasure in showing you over the same, giving you all the available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

(one enclosure). *Capt., Corps of Engrs., U. S. A.*

592 Judge-Advocate: Please give me file No. 75 (Witness hands paper to Judge-Advocate.)

Judge-Advocate: I offer in evidence and read:

N. Y. Sept. 7-92.

Capt. O. M. Carter, U. S. A.,

Dear Sir:

Some parties here together with myself are conferring as to making a bid. What security is necessary on the brush and logs and stone work alone, mattrass also, how much time will it take to look over the work and place to get logs and brush. Can any stone be had inland in Georgia. Please send additional papers to make bid, and so forth by next mail. The time is extremely short for us. One of our party being far West.

Very truly yours,

D. V. HOWELL,

202 Broadway, N. Y. City."

Judge-Advocate: S. H. 1, page 479.

"United States Engineer Office,

Savannah, Ga., Sept. 10, 1892.

Mr. D. V. Howell,

202 Broadway,

New York City.

Dear Sir:

I enclose two copies of the S. P. C. P. for improving Savannah Harbor, as requested. The bidders bond is mentioned in the specigication, viz., two sureties, each justifying in the sum of \$375,000.00.

It would take several days to look over work properly, including places for obtaining material, as brush and logs must be brought long distances.

Yes, suitable stone can be had in Georgia, near Atlanta.

Very respectfully,

O. M. CARTER,

Capt., Corps of Engineers, U. S. A.,

(2 enclosures).

593 Q. Whose handwriting is that?

A. Captain Carter's handwriting.

Judge-Advocate: I offer in evidence a communication from the accused:

"Subject: Proposals Improving Harbor at Savannah, Ga.
United States Engineering Office.

Savannah, Ga., Sept. 17, 1892.

Brig.-Genl. Thos. L. Casey,
Chief of Engineers, U. S. A.,
Washington, D. C.

General:

I have the honor to transmit herewith all proposals received this day for Improving Harbor at Savannah, Ga.

A total of the lowest bid for jetty work, and the lowest bid for dredging is \$105,000 less than the lowest proposal of a single bidder for all of the items, and I have the honor therefore to request authority to award the contract for jetty work to the Atlantic Contracting Company of N. Y., John F. Gaynor, Prest. (the lowest bidder for jetty work); and that for dredging to P. Sanford Ross of Jersey City, N. J. (The lowest bidder for dredging), the prices in each case being considered satisfactory and reasonable.

An abstract of the proposals is transmitted herewith.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engineers."

(6 enclosures).

"1st indorsement
Office Chief of Engineers,
U. S. Army.

Sept. 21, 1892.

Respectfully returned to Captain Carter, Corps of Engineers, approved.

When such record as may be necessary has been made 594 this paper will be returned to this office.

By command of Brig. Gen. Casey:

THOS. TUTTLE.

Captain, Corps of Engineers.

Mr. Blair: I would like to ask, Colonel, it is not to be implied that the letters which you have read with respect to the specifications of this contract are exhaustive of the parties who have applied, is that true?

Judge-Advocate: I give all the information that I have,

Mr. Blair, whether it is against, apparently against the interests of the accused or for him. I have no doubt all those instances given the records show.

Mr. Blair: You dont understand me. You read letters asking for copies of specifications and letters in reply thereto. No, thus far you have read 9 sets of letters, we have a list here of a considerable number of parties who applied and got specifications.

Judge-Advocate: There were other specifications, in which three were sent. I stated I should not read those. If you desire it, I shall follow it up and read them.

Mr. Blair: No, we simply want the court to understand that they do not cover all the letters sent and replied to.

Judge-Advocate: No, I think I stated to the court, and I think the court understood me, that I should only read correspondence where there was one copy of specifications sent, does the court so understand me?

The President: Yes.

Mr. Blair: That's my mistake.

Judge-Advocate: The abstract of proposals referred to in the communication just read is as follows:

The National dredging Company of Wilmington, Delaware, made no bid except wharfing or revetment, 2500 linear feet, price \$50, amount \$125,000; dredging, 7,000,000 cubic yards, price .17.9, amount \$1,253,000; total, \$1,378,000. There were of mattresses, 350,000 square yards, fascines 300,000 595 square yards, pile work 50,000 linear feet, cluster fender piles, 200 clusters, groups of tie piles, 1500 groups; thorn timber, 800,000 feet B. M.; iron bolts, 200,000 pounds; riprap stone, 200,000 cubic yards; large stone, 50,000 tons; wharfing or revetment 2500 linear feet, dredging 7,000,000 cubic yards.

The American Dredging Company, L. Y. Schermerhorn, President, Philadelphia, Pa., price \$1.08, amount \$378,000 for mattresses; fascines, price \$1.80, amount \$450,000; pile work, price \$1.75, amount \$87,500; cluster fender piles, price \$60, amount \$12,000; group of tie piles, price \$24, amount \$36,000; sawn timber, price \$35, amount \$28,000; iron bolts, price .05c, amount \$10,000, riprap stone, price \$3, amount \$600,000; large stone, price \$2.80, amount \$140,000; total \$1,831,500; wharfing or revetment, price \$38, amount \$95,000; dredging, price .17-1/4c, amount \$1,207,500; total \$1,302,500; grand total \$3,134,000:

P. Sanford Ross, Jersey City, N. J., mattresses, price \$1.10,

amount \$385,000; fascines, price \$1.79, amount \$537,000; pile work, price \$1.44, amount \$72,000; cluster fender piles, price \$47, amount \$9,400; groups of tie piles, price \$24, amount \$36,000; sawn timber, price \$33, amount \$26,400; iron bolts, price .045, amount \$9,000; riprap stone, price \$3.04, amount \$608,000; large stone, price \$2.56, amount \$128,000; total \$1,810,800; wharfing or revetment, price \$40, amount \$100,000; dredging, price .16, amount \$1,120,000; total \$1,220,000; grand total \$3,030,800:

W. F. McCauley, Savannah Ga., mattresses, price \$1.13, amount \$395,500; fascines, price \$1.74, amount \$522,000; pile work, \$1.55, amount \$77,500; cluster fender piles, price \$51, amount \$10,200; groups of tie piles, price \$20, amount 30,000; sawn timber, price \$33, amount \$26,400; iron bolts .04, \$8,000 amount; riprap stone, price \$3.08, amount \$616,000; large stone, price \$2.60, amount \$130,000; total \$1,815,600; wharfing or revetment, price \$43, amount \$107,500; dredging, price 17c, amount \$1,190,000; total \$1,297,500; grand total \$3,113,100:

596 The Atlantic Contracting Company, John F. Gaynor, Prest., New York, N. Y., mattresses, price .95, amount \$332,500; fascines, price \$1.60, amount \$480,000; pile work, \$1.60, amount \$80,000; cluster fender piles, price \$50, amount \$10,000; groups of tie piles, price \$20, amount \$30,000; sawn timber, price \$30, amount \$24,000; iron bolts, price .05, amount \$10,000; riprap stone, price \$2.95, amount \$590,000; large stone, price \$2.60, amount \$130,000; total \$1,686,500; wharfing or revetment, price \$40, amount \$100,000; dredging, .17-1/2, amount \$1,225,000; total \$1,325,000; grand total \$3,011,500:

To this paper there is attached a copy of advertisement, as follows:

United States Engineer Office, Savannah, Ga., August 17, 1892. Sealed proposals for improving Harbor at Savannah, Georgia, will be received at this office until 12 M., city time, on the 17th day of September, 1892, and then publicly opened. Specifications, blank forms and all available information will be furnished on application to this office. O. M. Carter, Capt. Corps of Eng'rs, U. S. A.

Remarks: (Amount for which the Secretary of War
(is authorized to enter into contracts, \$3,150,000
(Amount available, under the present
(appropriation, \$310,000.

I hereby certify that the above abstract of proposals is correct.

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.,
Savannah, Ga., Sept. 17, 1892.

It is recommended that the bids of The Atlantic Contracting Company, of New York, N. Y., John F. Gaynor, President, for jetty work (the first nine items), and that of P. Sanford Ross, Jersey City, N. J., for dredging (10th and 11th items) be accepted, they being the lowest responsible bidders for the best and most suitable materials and service."

597 Judge-Advocate: I submit these proposals accompanying the abstract, I offer in evidence the proposal of the National Dredging Company, the American Dredging Company, the American Dredging Company, P. Sanford Ross, W. F. McCauley, The Atlantic Contracting Company, referred to in the abstract, copies of which will be attached to the record marked "Exhibits 31, 32, 33, 34.

Judge-Advocate: I offer in evidence the articles of agreement October 22, 1892, between Captain O. M. Carter, Corps of Engineers, U. S. A., of the one part and the Atlantic Contracting Company of the other part for constructing training walls, jetties, and spur dams in Savannah Harbor, Georgia. Approved November 10, 1892. A copy of this will be attached to the record and marked "Exhibit 36."

Judge-Advocate: Look at G. R. N. 25: August 20, 1894? What is that?

A. It is a letter from the office of the Chief of Engineers to Captain Carter.

Q. Well, you may give a brief description of it anyway.

A. Transmits amounts appropriated by River and Harbor act of August 17, 1894, with directions to submit projects for the expenditure of the same.

Q. For what improvements?

A. For the improvement of the Harbor at Brunswick, Georgia, Cumberland Sound, Georgia; Darien, Georgia; Altamaha River, Georgia; Ocmulgee River, Georgia; of which \$5,000 are to be expended between Macon and Hawkinsville, and the like sum below Hawkinsville, improving Oconee River, Georgia, of which \$3,000 is to be expended between Millidgeville and the Central Railroad Bridge; improving Savannah River between Savannah and Augusta; improving Jekyl Creek,

improving Savannah River above Augusta, inside water route between Savannah, Georgia and Fernandina, Florida.

Judge-Advocate: Can you give me the date of the letter submitting the project for expenditure as to the Cumberland Sound improvement? C. S., page 412, what was the date?

A. August 30, 1894.

598 Q. What was the date of the approval of the project and expenditure. See C. S., N. H.

A. September 4, 1894.

Q. What was the date of submitting specifications and request to advertise?

A. August 30, 1894.

Q. What was the date of the approval of the specifications and authority to advertise?

A. Approved September 6, 1894.

Q. You have the approval there, what date was that received back, received here?

A. September 8, 1894.

Q. What was the date of the advertisement of the specifications?

A. August 29, 1894.

Q. When was the date of opening bids?

A. September 29, 1894.

Q. Was the first publication of those specifications made in the papers. No. When was the advertisement first placed in the papers calling for bids?

A. September 10.

Q. In what paper?

A. In the Savannah Morning News, Savannah, Ga., September 10; in the Times-Union, Jacksonville, Fla., September 10.

Q. When in the Engineering Record, New York?

A. September 15, and 22.

Q. When in the Engineering News, New York?

A. September 13, 20 and 27.

Q. Do you know when the specifications were received from the printer?

A. No, I cannot tell.

Q. Cannot you find any data there from which you can refresh your memory as to when they were received from the printer?

A. No, sir, I only see a letter from the Chief of Engineers that a 130 copies were forwarded to him on September 17.

Q. Have you the bill of the printer for those specifications?

A. Yes, sir, there must be a bill.

Q. Well, is it among these papers?

A. No, sir.

Q. Is it probably in your office here, the Engineer's office?

A. Yes, sir.

Q. You stated that the first advertisements for proposals were dated September 10, and that the bids were to be opened on September 29, was Captain Carter in Savannah at that time?

A. In September 29?

Q. September 10, when the advertisement first appeared?

A. I don't know.

Q. Look at C. S., page 424 and see if that will refresh your memory.

A. Captain Carter was in Baltimore, there is a letter to the Chief of Engineers (Handing letter book to Judge-Advocate).

Judge-Advocate: (Reading):

“United States Engineer Office,

Savannah, Ga., September 17, 1894.

Brig.-Gen. Thomas L. Casey,

Chief of Engineers, U. S. Army,

Washington, D. C.

General:

I have the honor to request approval of a journey made by me from Savannah, Georgia to Baltimore, Maryland and return, September 9-16, 1894, for the purpose of consulting with Colonel Craighill Division Engineer, concerning works of improvement at Cumberland Sound, Georgia.

Telegraphic authority was obtained from the Chief of Engineers for this journey, but time did not permit obtaining of regular orders.

The travel was necessary for the public service.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

600 Judge-Advocate: This letter is offered in evidence.

Judge-Advocate: Now turn to page 425.

A. That is a letter to the Chief of Engineers asking for approval of a journey.

Judge-Advocate: I now offer in evidence this letter:

"United States Engineer Office,
Savannah, Ga., Sept. 21, 1894.

Brig. Gen. Thomas L. Casey,
Chief of Engineers, U. S. A.,
Washington, D. C.

General:

I have the honor to request the approval of a journey made by me from Savannah, Georgia, to Fernandina, Florida, and return, September 17-18, 1894, for the purpose of making an examination of a reported change in the channel across the outer bar.

The exigency of the journey was such that antecedent authority could not be obtained from the Chief of Engineers.

The travel was necessary for the public service.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

Q. Give the names of the parties and the dates of application for specifications, if you can, in response to this advertisement.

A. There is one letter to Messrs. E. B. Hunting & Co., dated September 21, 1894.

"Replying to your letter of the 20th instant, I have to inform you that plans and specifications for the Fernandina work can be seen at this office."

Judge-Advocate: This is C. S., page 426?

A. Page 426.

Judge-Advocate: Look at page 427.

601 Witness: (Reading)—

"United States Engineer Office,
Savannah, Ga., September 21, 1894.

Dr. C. N. Brandt,
Savannah, Georgia.

Dear Sir:—

Replying to your letter of the 20th instant, I have to inform you that plans and specifications for the Fernandina Work can be seen at this office, the necessary papers for submitting bids will be furnished to all those who will bid on the work.

Very respectfully yours,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A."

Q. Is there any record to be found in your office of the names of parties who applied in person for specifications, and the number of copies furnished them?

A. There is one letter from E. B. Hunting & Company.

Q. You read that?

A. No, sir.

Q. All right.

A. (reading)

“Savannah, September 21, 1894.

Captain O. M. Carter, Corps of E., U. S. A.,
City.

Dear Sir:—

Your esteemed favor of this date;

We beg to say that we have called at your office and requested a copy of the specifications and blanks to bid on, and have been told that they could only be obtained from you in person; but that if we would leave a note for you the papers would be sent to us by mail. Will you kindly instruct your clerk to allow us to see the specifications and furnish us with the papers to bid on. Will call on Saturday morning.

Yours truly,

E. B. HUNTING & Co.

Agnew.

602 Q. It was in response to that letter, I understand, you read from the book, was it not?

A. Yes, sir; No, sir.

Q. It was not?

A. No, sir.

Q. Then read the response to that, if you have it there?

A. There is no response to that.

Q. Look at C. S. 1, 11, 1894.

A. Will you kindly repeat the question.

Q. C. S., 11, 1894. I think you will find it there.

A. Yes, that's that letter of September 21, 1894.

Q. That's the one, read that.

Witness: (Reading:)

“Captain O. M. Carter, Corps of Engineers, Your esteemed favor of this date we beg to say that we have called at your office and requested a copy of the specifications and blanks to bid on and have been told—

Q. Is that the same one?

A. Yes, the same letter.

Q. That is all you find?

A. Yes, sir.

Q. Do you know Agnew?

A. Yes, sir.

Q. Now, have you any record of the parties who applied in person and the number of copies issued to them?

A. No, sir.

Q. There is no record to be found in your office of that?

A. No, sir.

Q. Have you the names of parties who received one copy of specifications?

A. No, sir.

Q. Were there any additional copies asked for by anyone?

A. There is no record in this book of it.

603 Q. Or in any book?

A. I don't know.

Q. Or the book that you have charge of, or have access to?

A. This is the Cumberland sound book, it is not in this book.

Q. It would be in this book if issued from this office, or should be.

A. Yes, sir.

Q. Where would you find the names of parties who returned specifications, if any were returned?

A. I would find them among the files of letters received if returned by letters transmitted.

Q. Have you found any so returned?

A. No, sir.

Q. Were any so returned?

A. I don't remember.

Q. Would you know it officially if they were so returned?

A. I might and might not.

Q. Would not there be some record in the office if returned?

A. They are returned without a letter of transmittal, which would be filed away, there would be no record.

Q. Any notation of any kind made?

A. No, sir.

Q. Look at page 431 to page 432.

A. Page 431 is a letter to the Chief of Engineers transmitting proposals received for constructing jetties at the entrance to Cumberland Sound with abstracts of the same.

Q. This is the letter forwarding the proposals. I offer it in evidence, and read:

“United States Engineer Office,
Savannah, Ga., September 29, 1894.

Big. Gen. Thomas L. Casey,
Chief of Engineers, U. S. A.,
Washington, D. C.

604 General:

I have the honor to transmit herewith all proposals received for constructing jetties at entrance to Cumberland Sound, Georgia, with abstract of same.

The prices bid by Ansom M. Bangs, of Fayetteville, N. Y., are lower than the work can be done for, but as Mr. Bangs is responsible, authority is requested to award the contract to him.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

(4 enclosures.)

Judge-Advocate: And the abstract accompanying this letter is as follows, reading:

Abstract of Proposals for Constructing Jetties at Entrance to Cumberland Sound, Georgia, opened on September 29, 1894, by Capt. O. M. Carter, Corps of Engineers, U. S. A.:

Proposal No. 1, Ansom M. Bangs, Fayetteville, N. Y.: Mattresses per square yard \$0.57; riprap stone per cubic yard \$2.00; total \$88,500.

Proposal No. 2, R. G. Ross and Co., Jacksonville, Florida; mattresses per square yard .85, riprap stone per cubic yard, \$2.85; total \$128,000.

Proposal No. 3, Rittenhouse Moore, Mobile, Alabama, mattresses per square yard, .90, riprap stone per cubic yard, \$2.80; total \$129,000.

Remarks: Amount available, \$170,000.

“Bid recommended for acceptance, he being the lowest responsible bidder for the best and most suitable materials and service.

I hereby certify that the above Abstract of proposals is correct.

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.
Savannah, Ga., Sept. 29, 1894.

605 Judge Advocate: I offer in evidence the three proposals referred to in the abstract, Anson M. Bangs, R. G. Ross & Company, Rittenhouse R. Moore. Copies will be attached to the record and marked "Exhibits 37, 38 and 39."

Judge-Advocate: I now offer in evidence the contract between O. M. Carter, Captain Corps of Engineers, U. S. A., of the one part and Anson M. Bahns, of Fayetteville, N. Y., of the other part for constructing jetties at entrance to Cumberland Sound. Approved November 23, 1894. Thomas L. Casey, Chief of Engineers. A copy of this will be attached to the record and marked "Exhibit 40".

Here the court at 2:45 o'clock p. m., adjourned until 11 o'clock a. m. tomorrow morning.

THOMAS F. BARR,
Col. and Asst. Judge Adv. Genl.
Judge-Advocate.

606 United States Court Room,
Savannah, Ga.,
January 27th, 1898.

Court met pursuant to its adjournment of yesterday at eleven o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his Counsel, and the Reporter, W. O. Tarver, were also present.

The President: The Court will come to order.

J. W. O. STERLY, a witness for the prosecution previously sworn, recalled to the stand.

Judge-Advocate: May it please the Court, I desire, and I trust there will be no objection to the course, to suspend the examination of this witness for a short time, in order to examine a witness who is about to be called away from the City.

Mr. Blair: We have no objections.

Judge-Advocate: We will excuse you, Mr. Sterly.

THOMAS, J. AGNEW, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Thomas J. Agnew.

Q. Where do you reside?

A. In Savannah.

Q. What is your business?

A. Lumber.

Q. In what business were you engaged in 1894?

A. Lumber business.

Q. Were you aware in 1894 of a call having been made by the Engineer Department for bids upon improvements for Cumberland Sound?

A. Not until my attention was called to it by a friend.

Q. You became aware of it as a fact?

A. Yes, sir.

Q. Did you take any action upon that information?

A. At the request of my friend, I did.

Q. What was that action?

A. That I would get specifications for him to bid on the work.

Q. Did you obtain them?

A. I did.

Q. How did you obtain them?

A. I got them at Capt. Carter's office.

Q. Upon your first application?

A. No, sir.

Q. Please inform the Court as to the applications made, if more than one or two, and if any difficulty was encountered in procuring them?

A. I made application in person two or three times for the specifications.

Q. To Captain Carter?

A. No, sir.

Q. To whom?

A. I think Mr. Connolly.

Q. It was in the office of Capt. Carter?

A. In the office of Capt. Carter.

Q. Do you know if Capt. Carter was present in his office at that time?

A. I didn't see him.

Q. And you didn't, on those occasions, receive any specifications?

A. I did not.

Q. What course did you then pursue?

A. I then wrote Capt. Carter, requesting the specifications in the name of E. B. Hunting & Co.

608 Q. Were you connected with them at that time,—associated with them?

A. I was their agent.

Q. What response did you receive?

A. I received a letter.

Q. Have you that letter?

A. I have not.

Q. Do you know what has become of it?

A. I do not.

Q. Do you remember its contents? It was in your own possession?

A. In my own possession in the office of Hunting & Co.

Q. Is it on the files of Hunting & Co.?

A. That I am not prepared to say; I rather think it is.

Q. Did he enclose you a copy of the specifications in that letter?

A. He did not.

Q. Well, what next occurred?

A. I wrote a second letter requesting the specifications, and stated the fact that I had experienced a great deal of trouble in getting them, and had been unable to get them, and understood that they could only be obtained from him in person.

Q. Did you receive a reply to that communication?

A. I think not.

Q. How did you finally secure the specifications?

A. In the second communication which I addressed to Capt. Carter, I stated that I would call on Saturday for specifications, which I did, and I got them.

Q. Had you made any other efforts to secure these specifications?

A. I had.

Q. What?

A. By requesting a friend of mine, my family physician, Dr. Brandt, to get the specifications for me.

Q. Did he get them?

A. He did not.

Q. Did you have any conversation with Capt. Carter in regard to the requirements of the specifications?

609 A. I did not.

Q. For whom were you really acting in the prem-

ises?
A. Ross & Co., of Jacksonville, Fla.

Q. Were you present when the bids were opened?

A. I was.

Q. Did you put in a bid?

A. I did.

Q. Whose was it?

A. Ross & Co., Jacksonville, Fla.

Q. How long before the bids were opened did you put it in?

A. About five minutes to twelve o'clock.

Q. Do you remember who were present at the time of the opening of the bids?

A. Two Mr. Gaynors, Mr. Moore and myself.

Q. Do you know Mr. Moore's first name?

A. I understand it to be Rittenhouse.

Q. Do you know the names of the two Gaynors?

A. I know one is John and the other is Edward.

Q. Did anyone speak to you about the bids before the opening?

A. Yes, sir.

Q. Who was it?

A. Both John and Edward Gaynor.

Q. What conversation did you have with them?

Mr. Blair: I object. Capt. Carter is not shown to have been present and heard the statement, and the Gaynors are not on trial in this Court. To attempt to bind Capt. Carter by declarations made in the presence of these men by a third party—

Judge-Advocate: I submit that the declarations of any of these parties named as co-conspirators are competent evidence.

Q. (Judge-Advocate continuing) I will ask the witness if Capt. Carter was present in the room?

A. He was not.

610 Q. It was not in the room where the bids were opened that the conversation occurred?

A. He was in the room where the bids were opened, but not in the room where the conversation occurred.

Q. Where did the conversation take place?

A. In the outside office and in the hall or landing.

Judge-Advocate:—I submit the case to the Court. I do not think it requires argument.

.

The Court: The Court will retire.

611 (The members of the court then, at 11.14 a. m., withdrew to an adjoining room, and the court was closed, after which, at 11.25 o'clock a. m., the members of the court resuming their seats, the court was opened, and the president, in the presence of the accused, his counsel, the Judge Advocate and the reporter, announced:)

The decision of the Court is that the objection is not sustained.

Judge-Advocate (Addressing the witness) You will answer the question.

A. Ed. Gaynor asked me if I was going to put in a bid for the work, to which I said "Yes." He then wanted to know if E. B. Hunting & Co. were bidding on the work, to which I replied "No.", and he then continued to question me, to find out who the bid was from, which information I did not give him. After a conversation of five to ten minutes with him, John Gaynor appeared, and also questioned me as to who the bid was from, which I refused to tell him, and Ed. Gaynor then said to me that I was doing him an injustice; that my party would not get the contract, and again requested me to withdraw the bid, as I would only cause them to lose money. This conversation with the two Gaynors lasted from ten to fifteen minutes, when Ed. Gaynor made me a proposition to give me \$500 if I would not put the bid in, which I refused to accept, telling him that my instructions were to put the bid in.

Q. That was within the half hour prior to the opening of the bids?

A. Yes, sir.

Q. What next happened?

A. The Gaynors then stepped off and held some conversation, when I was again approached by Ed Gaynor, asking me not to put in the bid, which I again refused to do, and he walked to Capt. Carter's desk, took up an envelope from the desk and substituted another.

- 612 Q. How long before the opening of the bids was that?
A. About five minutes to twelve o'clock.
Q. About the time you put in your bid?
A. After he removed the envelope and substituted another, I placed my bid on top.
Q. Capt. Carter was there at the desk?
A. Capt. Carter was in the room.
Q. He was in the room where this desk was?
A. Yes, sir.
Q. Can you recall all who were present at the opening of the bid?
A. Capt. Carter, Ed and John Gaynor, Rittenhouse Moore, myself and I think, one or two others whom I did not know.
Q. Any of the employes of the engineer office?
A. Not that I remember.
Q. How many bids were opened?
A. Three.
Q. Was there any bid from either of the Gaynors?
A. No, sir.
Q. Can you recall what bids were opened?
A. Bid of Rittenhouse Moore, Ross,—Bangs & Co.
Q. Do you know Mr. Bangs?
A. I do not.
Q. You don't know whether he was there or not?
A. I do not.

Cross-Examination by Mr. Charlton.

- Q. As I understand your testimony, you did not want these specifications for yourself, but for Messrs Ross & Sons, Fernandina?
A. Ross & Co. of Jacksonville.
Q. So soon as you saw Capt. Carter, he gave you a copy of them?
A. I never saw Capt. Carter.
Q. When you went to the office the second time, you got a copy?
A. No, sir.
Q. The third time?
613 A. No, sir.
Q. Which time?
A. After I had written two letters, requesting the specifications.
Q. They were sent to you through the mail?

- A. They were not.
Q. How did you get them?
A. I got them in Capt. Carter's outside office.
Q. Did you send them to Ross & Co.?
A. I did not.
Q. Ross was a bidder however?
A. Yes, sir.
Q. So he got the specifications somewhere?
A. Yes, sir.
Q. What did you do with your copy?
A. Mailed them to W. D. Barnett of Jacksonville, who I understood was a partner of Ross & Co.
Q. None of this conversation which you have detailed here as occurring with the Gaynors, occurred in Capt. Carter's presence or hearing, did it?
A. No, sir.
Q. And as a matter of fact, when Gaynor had put in the bid which he had in his hand, the last bid, he put it in before you put in yours?
A. Yes, sir.
Q. He substituted one bid for another, and he put in his bid before you put in yours?
A. Yes, sir.
Q. And he was so anxious to get you out of the way, that he offered you \$500?
A. He offered me \$500.
Q. You put in the bid for another man?
A. For Ross & Co.
Q. And Gaynor seems to have put in a bid for another man?
614 A. He put in a bid, but whether the bid was for another man, I cannot say.
Q. You were there when the envelopes were opened, was his, Gaynor's, among them?
A. No, sir.
Q. And that is about all there is to it that you know?
A. Yes, sir.

Re-direct Examination by the Judge Advocate.

- Q. This is the contract of 1894, I think you testified, is it not?
A. Yes, sir.

Q. You know who received the contract, who was the successful bidder?

A. Bangs & Co.

Q. Bangs & Co., or Bangs alone?

A. Bangs is the name I remember.

Q. You do not remember whether Bangs was the firm name or an individual name?

A. No, sir.

JOHN W. O. STERLY, a witness for the prosecution, previously sworn, recalled.

Judge-Advocate: May it please the Court, there was some little misunderstanding yesterday and a confusion of both the counsel and my self in relation to a communication, dated Sept. 17, asking for authority on the part of the accused to advertise, while it appeared from other correspondence that on a previous day he had been instructed to re-advertise, and that it was apparently in compliance with those instructions that he had advertised the previous day or asked for authority the previous day. I have here from the office of the Chief Engineer this letter:

615 "Office of Chief of Engineers,
Washington, D. C., Aug. 20, 1892.

Capt. O. M. Carter,
Corps of Engineers,
Richfield Springs, N. Y.

Captain:—

I have to furnish for your information the accompanying copy of your letter of 17th, inst., with the indorsements thereon, relative to advertisement and specifications for work at Savannah Harbor, Georgia. You will please return the two inclosures handed to you in this office August 20th." (That is the same date showing Capt. Carter was there then.)

"Very respectfully,
Your obedient servant,

H. M. ADAMS,
Maj. Corps of Engrs. in charge."

Upon that original letter the statement of the account for advertising is made for audit in the War Department. The following is the letter from Capt. Carter:—

Subject, Authority for advertising and printing.

United States Engineer Office,

Savannah, Ga., Aug. 17, 1892.

"The Chief Clerk of the War Dept.

Washington, D. C.

(Through the Chief of Engineers, U. S. A., Washington, D. C. and Col. Wm. P. Craighill, Corps of Engrs., U. S. A., Engr. S. E Division, Baltimore, Md)

Sir:—

I inclose herewith a copy of an advertisement, inviting proposals for improving Savannah Harbor, Georgia, and request authority to publish the same in the following official newspapers:

616 6 insertions in Savannah Morning News,
6 insertions in Charleston News and Courier,
6 insertions in Jacksonville Times-Union,
3 insertions in New York Engineering News,
3 insertions in New York Seaboard.

I also request authority to print 250 copies of accompanying specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A."

(2 Enclosures.)

1st— indorsement,
Office Chief of Engineers,
U. S. Army,
Aug. 20, 1892.

Respectfully submitted to the Secretary of War, with recommendation that these specifications be approved, and that the work at Savannah Harbor be carried on under the same after due advertisement and execution of contract.

If the specifications are approved it is also recommended that the within request for authority to publish advertisement and print specifications be granted.

H. W. ADAMS,

Major Corps of Engineers, In charge.

2d, indorsement.

The specifications are approved.

By order of the Acting Secretary of War,

John Tweeddale,

Chief Clerk.

War Dept.

Aug. 20, /'92.

3rd, Indorsement.

War Department,

Aug. 20, 1892.

Approved as amended.

L. A. Grant,

Acting Secretary of War."

The Court: What is the date of that application?

Judge-Advocate: August 17, per impression.

I think this we read in evidence before, but the last telegram I will read and the accompanying letter:—

"Washington, D. C., Aug. 27, 1892.

To Capt. Carter, Southern Bank Bld.,

Savannah, Ga.

"Secretary of War has authorized change in specifications for Savannah Harbor, as recommended in your letter of August twenty-four.

H. M. ADAMS,
Engineers."

Accompanying this is the following communication:—

"Washington, D. C., Aug. 29, 1892.

"Capt. Carter,

Sir:—

Your telegram of this morning is received. The specifications were shipped on Saturday.

Yours truly,

GIBSON BROS."

That appeared before in evidence, but I thought it well to read them at this time, to make this connected story.

Q. (Continuing examination) Now, will you show me the letter book in which that letter is copied?

A. The copy book was left in the office.

Judge-Advocate: I will ask the Court to take a recess while the witness gets the book.

The Court:—The Court will take a recess of five minutes.

(At 11.41 o'clock A. M. the Court took a recess until 11.48 o'clock a. m., when the witness returned with the letter book referred to, and handed it to the Judge-Advocate.

Q. (The Judge-Advocate continuing the examination) This is the letter dated Aug. 17, 1892, from Capt. Carter to the Chief Clerk of the War Department to which you referred?

A. Yes, sir.

Judge-Advocate:—This is the original of the letter, a copy of which was inclosed by the Chief of Engineers to Capt. Carter and which I have just read to the Court. It bears date of August 17, 1892, but it follows in the impressions in the official copy book here papers, of which impression was taken, dated Aug. 18, 1892,—quite a number. I presume the Court takes my statement for that. If they desire to examine the book, they will see that the impression follows communications of the 18th; and it is now perfectly apparent that it is the original paper on which authority was granted, and that no other was written upon that subject, and the fact of the antedating, or confusion of dates, seems to have escaped the rigid scrutiny of the Department in Washington.

Q. Look at G. R., 13, 1892; the date of the River and Harbor Act?

A. That is a letter from the office of the Chief of Engineers to Capt. Carter.

Q. Does it show the date of the act making appropriation for improvements of rivers and harbors?

A. Yes, sir.

Q. What is the date?

A. July 13, 1892.

Q. Turn to the paragraph, relative to Jekyl Creek and water-way.

A. "Improving Jekyl Creek, Ga.; continuing improvement, \$7,500. Inside water route between Savannah, Ga., 619 and Fernandina, Fla., \$15,000."

Q. When were the projects of expenditure called for.

A. July 14, 1892.

Q. Let me see J. C., page 314?

A. (Witness hands Judge-Advocate the letter book)

Q. What is that?

A. It is the project of expenditure for Jekyl Creek, Ga.

Q. What date?

A. July 28, 1892.

Q. By whom is it signed?

A. By Capt. O. M. Carter.

Q. And addressed to the Chief of Engineers?

A. Addressed to the Chief of Engineers.

Q. Look at J. C. N. 1, what is that?

A. Letter from Capt. Carter to the Chief Clerk of the War Department under date Jan. 9, 1893, submitting advertisements and specifications for Jekyl Creek and inside water route.

Q. Do you find the date of the letter approving the project of expenditure,—what date was that you just read?

A. Jan. 9, 1893.

Q. That is not the paper. Look and see if there is anything further in there as to approving the project of expenditure?

A. No, sir; there is nothing in that paper but the approval of the specifications.

Q. What date were they approved?

A. Approved by the War Department, Jan. 13, 1893.

Q. What was approved that date?—Look and see what communication you are reading.

A. That is the approval of the specifications,—approval of authority to print the specifications and to advertise.

Q. That was Jan. 13—?

A. January 13th.

Q. And what was the date of application for it?

620 A. January 9, 1893.

Q. What was the date of the advertisement and specifications?

A. January 7, 1893 was the date of the advertisement.

Q. What was the date of the opening of the bids?

A. February 7, 1893.

Q. Look at J. C., page 36, and tell me when that advertisement first appeared and how many times in the Engineering and Building Record of New York?

A. Engineering and Building Record twice, Jan. 21 and 28, 1893.

Q. And in the Seaboard, New York?

A. January 19 and 26, 1893.

Q. In the Morning News, Savannah?

A. Jan. 18, 19, 20, 21, and Feb. 5 and 6.

Q. Brunswick Times, Brunswick?

A. Jan. 18, 19, 20, 21, Feb. 5 and 6, 1893.

Q. Can you tell when these specifications were received from the printer?

A. No, sir.

Q. What was the date of the first issue of the specifications?

A. Jan. 26, 1893.

The following papers were identified by the witness and offered in evidence and read by the Judge-Advocate:

File J. C. 2.

“American Dredging Co.

Office 234 Walnut St.,

Philadelphia, Pa., Jan. 23, '93.

“O. M. Carter,

Capt. of Engineers, U. S. A.,

Savannah, Ga.

Sir:—

Will you please be kind enough to send me copy of specifications for improving Jekyl Creek and the inside water route between Savannah, Ga., and Fernandina, Fla., as per 621 your advertisement of Jan. 7, 1893, and oblige,

Yours very respectfully.

FLOYD H. WHITE,
Secretary.”

Letter Book, J. C., Page 42.—1893

Subject, Specifications, Improving Jekyl Creek, etc.,

United States, Engineer Office.

Savannah, Ga., Jan. 26, 1893.

Mr. Floyd H. White,

Secretary American Dredging Co.,

234 Walnut St., Philadelphia, Pa.

Dear Sir:—

In compliance with request contained in your letter of the 23rd, instant, I send you herewith one copy of the specifications for improving Jekyl Creek, Georgia and Inside Water Route, between Savannah, Georgia, and Fernandina, Fla.

Please consider the specifications carefully, and if you desire to bid upon the work, I shall take pleasure in showing you over the same, giving you all the available information concerning it and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the inclosed specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

(One enclosure.)

File J. C. 3.—1893

“Charleston, S. C., Jan. 23, 1893.

Captain O. M. Carter,
Savannah, Georgia.

Dear Sir:—

Please send to me specifications and blank proposal
622 for improving Jekyl Creek, Geo., and inside water route
tween Savannah, Geo. and Fernandina, Fla.

Your most obedient,

COLIN McK. GRANT.

143 Rutledge Avenue, Charleston, S. C.”

Letter Book, J. C., Page 43.—1893

Subject, Specifications Jekyl Creet, etc.

United States Engineer Office,
Savannah, Ga., January 26, 1893.

Mr. Colin McK. Grant,
143 Rutledge Avenue,
Charleston, S. C.

Dear Sir:—

In compliance with request contained in your letter of the
23rd, instant, I send you herewith one copy of the specifica-
tions for improving Jekyl Creek, and Inside Water Route
between Savannah, Georgia and Fernandina, Florida.

Please consider the specifications carefully, and if you de-
sire to bid upon the work, I shall take pleasure in showing
you over the same, giving you all the available information
concerning it, and furnishing you with the two remaining cop-
ies of the specifications necessary to enable you to submit your
bid. If you do not intend to bid, please return the enclosed
specifications.

Very respectfully,

Your obedient servant,

O. M. CARTER.

Capt. Corps on Engrs., U. S. A.

(One enclosure)”

Judge Advocate:—To this party there appears to have been
sent January 28, 1893, two additional copies of the speci-
fications.

623

File, J. C. 4.—1893

“Dear Sir:—

Please forward proposal blanks for River Work, as per

your adv. Jan'y 7th, Jekyl Creek, &c., and inside water route between Savannah and Fernandina.

Respecty yours,

JOHNSTON & TOWNSEND,
Somers Point, N. J.,
1, 23, '93.

A. H. M."

Letter Book, J. C., Page 40.—1893

Subject, Specifications, improving Jekyl Creek, etc.

United States Engineer Office,
Savannah, Ga., January 26, 1893.

Messrs Johnston & Townsend,

Somers Point, N. J.

Dear Sirs:—

In compliance with request contained in your postal of 23rd, instant, I send you herewith one copy of the specifications for improving Jekyl Creek, Georgia, and Inside Water Route, between Savannah, Georgia and Fernandina, Florida.

Please consider the specifications carefully, and if you decide to bid upon the work, I shall take pleasure in showing you over the same, giving you all the available information concerning it and furnishing you with two remaining copies of the specifications, necessary to enable you to submit your bid. Mr. R. G. Ross,
Jacksonville, Fla.

Dear Sir:—

In compliance with your oral request, I send you herewith one copy of the specifications for improving Jekyl Creek, Georgia and Inside Water Route between Savannah, Georgia and Fernandina, Florida.

Please consider the specifications carefully and if you desire to bid upon the work, I shall take pleasure in showing you over the same, giving you all the available information concerning it and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid.

Very respectfully,

Your obedient servant,

O. M. CARTER.

Capt. Corps of Engrs. U. S. A.

(One enclosure.)

Judge-Advocate: I offer in evidence and read papers that have been identified by the officer from the Engineer Office, as follows:

Subject, Proposals for Improving Jekyl Creek, Ga., and Inside Water Route.

United States Engineer Office,
Savannah, Ga., Feb. 7, 1893.

Brig. Gen. Thomas L. Casey,
Chief of Engineers, U. S. A.
Washington, D. C.

General:—

I have the honor to transmit herewith all proposals received for improving Jekyl Creek, Georgia, and Inside Water Route between Savannah, Georgia, and Fernandina, Florida, with abstract of same, and authority is requested to award the contract to The Atlantic Contracting Company, of New York, N. Y., the lowest responsible bidders, the prices being deemed reasonable.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.

(Three enclosures.)

630 Judge-Advocate:—The abstract referred to and copy of advertisement referred to, dated Jan. 7, 1893. Abstract of proposals for improving Jekyl Creek, Ga., and Inside Water Route between Savannah, Ga., and Fernandina, Fla., opened on Feb. 7, 1893, by Capt. O. M. Carter, Corps of Engineers, U. S. A. The Atlantic Contracting Company, New York, N. Y., John F. Gaynor, President, bid 99 cents per square yard on mattresses, amount, \$8,910 for 9,000 square yards; on rip-rap stone, 3,000 cubic yards, \$3.59 per cubic yard, amount \$10,770; total, \$19,680. Colin McK. Grant, Charleston, S. C., on mattresses, 9,000 square yards, price bid \$1.25 per square yard, amount, \$11,250; on rip-rap stone, 3,000 cubic yards, \$3.70 per cubic yard, amount \$11,100, total amount, \$22,350. Remarks: Amount available, \$21,000. Bid recommended for acceptance, they being the lowest responsible bidders for the best and most suitable materials and services,—that referring to the Atlantic Contracting Company. And at the bottom of the abstract, "I hereby certify that the

above abstract of proposals is correct. O. M. Carter, Capt. Corps of Engrs, U. S. A.

Savannah, Ga., Feb. 7, 1893."

I submit the two proposals referred to in the abstract in evidence, and copies of the same will be attached to the record, marked, Exhibit No. 41, and Exhibit No. 42. I also offer in evidence contract entered into on March 1, 1893, between O. M. Carter, Capt. Corps of Engrs., U. S. A., of the one part and The Atlantic Contracting Co., of New York, of the other part, for constructing training wall in Jekyl Creek, Ga., and Inside Water Route between Savannah and Fernandina, and copy of this will be attached to the record, marked Exhibit No. 43.

Q. (Examination continued) Have you the report of operations, from the records of the office, for May, 1893?

631 A. For which work?

Q. Work at Fernandina?

A. Yes, sir. (handing the Judge-Advocate the paper)

Judge-Advocate:—This is a report of operations during the month of May, 1893. I offer it in evidence and read it as follows: "Property has been cared for and necessary office work executed.

"Jetty work, under the existing contract with Mr. Edward H. Gaynor, has been continued during the month until May 19th, when the funds available for the work were exhausted.

"The first and second courses of the north jetty were advanced 587.5 feet by double mattresses, reaching a point 17,416.5 feet from the initial point, measured on the axis of the jetty. The second course was also advanced a distance of 165.1 feet from a point 13,641.2 to a point 13,806.3 feet from the initial point. There were used in this work during the month 14,116.16 square yards of brush mattresses, and 2,005.56 cubic yards of rip-rap stone.

Probable Operations During Next Month.

To care for property, execute miscellaneous office work, and make the annual examination.

Respectfully submitted,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

Savannah, Ga., June 10, 1893."

I omitted to state to the Court in submitting the contract of March 1st, just put in evidence, that it has the usual ap-

proval. It is approved April 17, 1893, by Thomas Lincoln Casey, Brig. Gen., Chief of Engineers.

Q. (Examination continued) On this contract, approved April 13, when did the work begin, do you know?

632 A. Work began on the 24th, of May, 1893.

Q. You read over the paper; is that the paper?

A. That is the report of operations.

Q. Signed by whom?

A. Signed by E. R. Conant, Inspector.

Q. Addressed to whom?

A. Capt. Carter.

Q. And is found in the official records of the office?

A. Yes, sir.

Q. Have you the report of operations also showing that?

A. (Handing the Judge-Advocate the paper) Yes, sir. That does not show the date.

Q. This does not show the date?

A. No, sir.

Judge-Advocate: This is the report of operations during the month of May, 1893:

"Property has been cared for, miscellaneous office work executed and jetty work, under contract with The Atlantic Contracting Company has been commenced.

There were placed in the Jekyl Creek jetty (see report on Inside Water Route between Savannah and Fernandina) in the first course 1,712.58 square yards of brush mattresses; in the second course, 829.89 square yards, and in the third course 829.89 square yards, making in all 3,372.36 square yards of brush mattresses, from 22 to 44 feet wide, which were loaded with 94.28 cubic yards of rip-rap stone. The first course was thereby advanced 354.1 linear feet, and the second and third courses 338.5 linear feet each.

Probable Operations During Next Month.

To care for property, execute miscellaneous office work, make annual survey, and complete jetty work under contract with The Atlantic Contracting Company.

Respectfully submitted,

633

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

Savannah, Ga., June 10, 1893."

Q. Look at G. R., 25, 1894?

A. It is a letter from the Chief of Engineers to Capt. Carter, dated Aug. 20, 1894, notifying him of the passage of

the River and Harbor Bill, and the Act of Aug. 17, 1894, and requests him to submit projects of expenditure.

Q. For what improvements?

A. For improving harbor at Brunswick, Ga.; for maintenance \$10,000. Improving Cumberland Sound, Ga.; continuing improvement, \$170,000

Q. What appropriation was made for improving the Altamaha river, Jekyl Creek and the Inside Route?

A. Improving Altamaha river, \$10,000; improving harbor at Darien, Ga., \$25,000; improving Jekyl Creek, Ga.; continuing improvement, \$4,000; Inside Water Route between Savannah and Fernandina: continuing improvement, \$20,000.

Q. Look at A. R., Page 175; what is that?

A. That is a letter from Capt. Carter to the Chief of Engineers, under date of August 30, 1894, submitting project of expenditure for Altamaha River, Ga.

Q. Look at page 150, D. H.; what is that?

A. Letter from Capt. Carter to the Chief of Engineers, under date of August 31, 1894, submitting project for expenditure of \$25,000 for improving harbor at Darien.

Q. Look at J. C., 96; what is that?

A. That is a letter from Capt. Carter to the Chief of Engineers, under date of Oct. 1, 1894, submitting project for the expenditure of \$4,000 for improving Jekyl Creek.

Q. Look at Waterway, 14; what is it?

634 A. Letter to the Chief of Engineers, under date of October 1, 1894, submitting project for expenditure of \$20,000, for improving Inside Water Route between Savannah, Ga., and Fernandina, Fla.

Q. What was the date of the letter approving project for expenditure for Altamaha river? A. R. 9, you will find it.

A. September 4, 1894.

Q. What was the date of approval of project of expenditure for Darien harbor?

A. September 6, 1894.

Q. What was the date of letter approving project of expenditure for Jekyl Creek?

A. October 6, 1894.

Q. What is the date of letter approving project of expenditure for the Water-way?

A. October 5, 1894.

Q. Were specifications submitted separately for these improvements?

A. No, sir.

Q. Or in combination?

A. In combination.

Q. Look at A. R., page 179; does that refer to the Act of Congress, under which authority for making such combination is found?

A. Yes, sir.

Q. What date is that?

A. March 2, 1895.

Q. Look at A. R., 1, 1895; what is that?

A. A. R., 1, 1895, is a letter from Capt. Carter to the Chief of Engineers, in which he requests authority to advertise and print specifications. This bears approval, dated March 1, 1895.

Q. What is the date of his request?

A. March 2, 1895.

Q. Did you find the date of that Act? The River and Harbor Act of what year conferred that authority to make combination?

635 A. It was either the Act of 1890 or the Act of 1892 which gives authority to combine specifications.

Q. Some years prior to this contract?

A. Yes, sir.

Q. What was the date of the advertisement and specifications?

A. March 2, 1895.

Q. What was to be the date of the opening of the bids?

A. April 6, 1895.

Q. When did that advertisement first appear in the Morning News of Savannah?

A. On March 14, 1895.

Q. When in the Times of Brunswick?

A. On March 14th.

Q. How many times?

A. Six times.

Q. How many times in the News?

A. Six times.

Q. When and how many times did it appear in the Engineering News, New York?

A. Twice.

Q. What dates?

A. March 21st and 28th, 1895.

Q. When in the Marine Journal of New York?

A. March 23, 1895.

Q. On that day alone?

A. On that day alone.

Q. Can you tell when the specifications were received from the printer?

A. No, sir.

Q. Can you tell when the specifications were first issued?

A. Yes, sir.

Q. Give me the first date on which the specifications were issued.

A. March 22, 1895.

636 Judge-Advocate: Here is a list of applicants for specifications pertaining to the improvements of the Altamaha River, Darien Harbor, Jekyl Creek, and the Inside Water Route between Savannah, Ga., and Fernandina, Fla., in which, so far as the specifications appear to have been sent to any parties, they each received three,—a full set. There are nine. P. Sanford Ross, R. H. McWilliams & Co., Virginia Dredging Co., American Dredging Co., Venable Bros., C. I. McDonald & Co., H. Davin, and Geo. O. Tenney, and, while Cordes & Bochman appear to have been bidders, there is no record of their having received any specifications, but they must have received three. There is no record of Chas. G. Smith & Son having received any,—that was from Washington, D. C. P. Sanford Ross, Savannah, Ga., R. H. McWilliams & Co., Chicago, Ill., Virginia Dredging Co., Richmond, Va., American Dredging Co., Philadelphia Pa., Venable Bros., Atlanta, Ga., C. Irwin McDonald & Co. Pittsburgh, Pa., H. Davin, Columbia, Va., Geo. O. Tenney, Chattanooga, Tenn., Cordes & Bochman, Charleston, S. C., Chas. G. Smith & Son, Washington, D. C., Elton A. Smith, Savannah, Ga., and the Savannah Dredging Co., Savannah, Ga., and the Atlantic Contracting Co., Savannah, Ga., and that covers that list. I neglected to state that the Atlantic Contracting Co. received three, and April 10th was the date on which all those requests to return unused copies was sent. From March 22nd up to March 29th were the days the specifications were sent out in sets of three.

I offer in evidence and read:

“Subject: Proposals for Improving Altamaha River, Darien Harbor, etc.

United States Engineer Office,
Savannah, Ga., April 6, 1895.

Brig. Gen. Thomas L. Casey,
Chief of Engineers, U. S. Army,
Washington, D. C.

General:

I have the honor to transmit herewith all proposals received together with abstract of same, for improving Altamaha River, Georgia; Darien Harbor, Georgia; Jekyl Creek, 637 Georgia, and Inside Water Route between Savannah, Georgia, and Fernandina, Florida, and authority is requested to award the contract to Wm. T. Gaynor, Fayetteville, New York, the lowest responsible bidder, the prices being deemed reasonable.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

(4 enclosures)''

Abstract of proposals for improving Altamaha River, Darien Harbor, Jekyl Creek and Inside Water Route between Savannah, Ga., and Fernandina, Fla., opened on April 6th, 1895, by Capt. O. M. Carter, Corps of Engineers, U. S. A. First, Cordes & Bochman, Charleston, S. C., bid on mattresses per sq. yard, \$1.20; fascines per cubic yard \$1.75; Pile work per linear foot \$1.60; fender piles per cluster, \$75.00; tie piles per group \$25.00; Sawn timber per 1,000 feet \$30.00; iron bolts per lb. 5c; riprap stone per cubic yard \$3.25; aggregate \$52,625.00. Second Chas. C. Ely, Savannah, Ga., bid on mattresses \$1.28 per sq. yard; fascines per cubic yard \$1.85; pile work per linear foot \$1.75; fender piles per cluster \$60.00; tie piles per group \$25.00; sawn timber per 1,000 feet \$30.00; iron bolts per lb. 6c; riprap stone per cubic yard \$4.00; aggregate \$59,425.00. Third Wm. T. Gaynor, Fayetteville, N. Y., bid on mattresses per square yard \$1.00; fascines per cubic yard \$1.65; pile work per linear foot \$1.50; fender piles per cluster \$50.00; tie piles per group \$20.00; sawn timber per 1,000 feet \$25.00; iron bolts per lb. 5c; riprap stone per cubic yard \$3.05; aggregate \$48,000.00. Remarks: Amount available, \$44,000.00. There is an asterisk opposite the name of Wm. T. Gaynor and an asterisk below by "Bid recommended for acceptance, he being the lowest responsible bidder for the best and most suitable materials and

service." Below that is, "I hereby certify that the above abstract of proposals is correct. O. M. Carter, Capt. Corps of Engineers, U. S. A., Savannah, Ga., April 6th, 1895." 638 A copy of this Abstract will be attached to the record marked Exhibit No. 44.

I offer in evidence the proposals referred to in the Abstract just read, from Cordes & Bochman, Chas. C. Ely and Wm. T. Gaynor, copies of which will be attached to the record marked Exhibit No. 45, Exhibit No. 46 and Exhibit No. 47.

I offer in evidence the contract based upon the bid of Wm. T. Gaynor, referred to in that Abstract. It appears to have been entered into on April 20, 1895, between O. M. Carter, Capt., Corps of Engineers, U. S. A., of the one part, and Wm. T. Gaynor of Fayetteville, N. Y., of the other part, for constructing and repairing training walls and spur dams in Altamaha River, Darien Harbor and Jekyl Creek, Ga., and was approved April 30, 1895, by Brig. Gen. Casey, Chief of Engineers. Copy of this will be attached to the record and marked Exhibit No. 48.

Q. Who had the contracts for the improvements in Savannah Harbor and in Cumberland Sound at the time this contract was let?

A. Cumberland Sound, Anson M. Bangs; in Savannah, the Atlantic Contracting Co.

Judge-Advocate: That is all I have to ask this witness upon this branch of the case. He will be recalled at a subsequent period on other matters.

Cross-Examination by Mr. Rose.

Q. When did you first come to Savannah?

A. 1885.

Q. When were you first employed in the Engineer's office of the United States?

A. You mean in Savannah?

Q. Yes?

A. I think it was on the 22nd of November, 1885.

Q. Capt. Carter was then the officer in charge?

A. Yes, sir.

639 Q. In what capacity were you first employed?

A. I was employed as a rodman.

Q. For how long?

A. I did duty as rodman for a few months.

Q. And your next employment?

A. I did clerical work in addition to that; was out in the field and did office work at the same time.

Q. And you say that continued down until what time in 1885?

A. Until about May, 1885.

Q. Then what was your next work after that of rodman, and the work you just said you did in the field?

A. Off and on I had different duties. I did work as surveyor and as rodman, and I was carried on the pay-roll as Fort Keeper, Inspector and Clerk.

Q. When did you go in the office?

A. I don't remember the exact date, but I think the 22nd of November, 1885.

Q. In what capacity?

A. You mean what I was carried on the roll as?

Q. No, what you did?

A. Did office work.

Q. What do you mean by office work?

A. General office work.

Q. What were your duties in the office? What did you do?

A. I did my duty.

Q. What was that?

A. Different things.

Q. Tell us some of the things?

A. Clerical duty and drawing.

Q. Draughtsman, were you?

A. Yes.

Q. Were you at any time put in charge of the accounts?

A. Later on, yes, sir.

640 Q. When was that?

A. When Capt. Carter became disbursing officer.

Q. Fix about the time, I don't care about it exactly?

A. On the 24th of August, 1888.

Q. And you had charge of the bills, vouchers and accounts?

A. Yes, sir; under Capt. Carter.

Q. And continued in that capacity down until the time he left?

A. Yes, sir.

Q. Now, during the last years, say from 1890 to 1896, who was the correspondence clerk?

A. Mr. Connolly.

Q. And you had nothing to do with the correspondence, did you?

A. I had to supervise it.

Q. Except so far as the bills went?

A. No, sir.

Q. Now, Connolly, when did he leave?

A. On the 3rd of August, 1897.

Q. And after Capt. Carter left, were you put in charge of the correspondence?

A. I have been always in charge of the correspondence, too.

Q. You have always been in charge of the correspondence.

A. Yes, sir; that is, nominally in charge. I was put in charge, but I wasn't allowed to have much to say.

Q. You were in charge, but didn't have much to say about it?

A. No, sir.

Q. Did your other duties take all of your time?

A. Yes, sir.

Q. Is that the reason you didn't have much to say?

A. There maybe other reasons.

Q. Did you see the correspondence as it came in and went out?

A. Yes, sir.

Q. All of it?

A. No, sir; not all of it.

Q. The official correspondence I am talking about; did 641 you dictate any of the letters you read here?

A. No, sir.

Q. Did you assist in copying them, or copy them yourself?

A. At odd times I have copied letters.

Q. Did you copy any of these you have just read?

A. Yes, sir; I have copied some, but could not point out which.

Q. You wrote some of the letters yourself?

A. Yes, sir.

Q. Look at S. H. 1, page 430?

A. I have got it.

Q. That is a letter that is dated August 15th, isn't it?

A. No, sir.

Q. What is the date of that letter?

A. 17th.

Q. In whose hand-writing is that?

A. My own hand-writing.

Q. The whole letter?

A. Yes, sir; not the signature.

Q. I asked you about the letter, not about the signature. That is the one that was copied after the one on the 18th?

A. Yes, sir.

Q. Give me the Jekyl Creek papers,—J. C. 1, 1893, and the enclosure.

A. (Witness handed Counsel the papers)

Q. This, I think you testified, was a letter of January 9th from Capt. Carter to the Chief Clerk of the War Department, asking for authority to print advertisement and approved specifications in relation to the improvements at Jekyl Creek, is that right?

A. This is the letter of January 9th, 1893. Will you please repeat your question?

Q. Tell me what it is?

A. Letter from Capt. Carter to the Chief Clerk of the War department, enclosing copy of advertisement for bids for improving Jekyl Creek and Inside Water Route between Savannah, Ga., and Fernandina, Fla., and requesting authority to publish same in certain newspapers.

Q. What newspapers?

A. Morning News, Savannah, Ga.; Engineering and Building Record, New York, and the Seaboard, New York.

Q. (Handing witness paper) Is that the specification that was sent with that paper? You just handed it to me as part of those papers,—is there any doubt about it?

A. I am just comparing it. That is the paper.

Q. That was one of the papers that was sent to Washington with that letter?

A. Yes, sir.

Q. Under the head of "Advertisement," in this paper, appears the following—Will you read what appears under the head of "Advertisement?"

A. (Reading) "United States Engineer Office, Savannah, Ga., January 7, 1893.—Sealed proposals for improving Jekyl Creek, Georgia, and the inside water route between Savannah, Georgia, and Fernandina, Florida, will be received at this office until 12 M., city time, on the 7th day of November, 1893, and then publicly opened. Specifications, blank forms, and all available information will be furnished on application to this office. O. M. Carter, Capt., Corps. of Engineers, U. S. A."

Q. On the 7th day of November?

A. 7th day of February; I made a mistake.

Q. Now, this is the advertisement that appears here under date of January 7th, 1893, which states that sealed proposals for improving Jekyl Creek and the inside water route between Savannah and Fernandina, etc., will be received at the office of the United States Engineer, and opened on the 7th day of February,—is that right?

A. Will be opened on the 7th day of February; yes, sir.

Q. And the date of that is the 7th of January?

643 A. Yes, sir.

Q. Was that paper sent back with J. C. 1, 1893, approved?

A. Yes, sir.

Q. I show you another paper endorsed, "Advertisement," and ask you if that was an enclosure with J. C. 1, 1893, when it left Savannah for Washington?

A. Yes, sir.

Q. Did that ever come back to Savannah from Washington?

A. Yes, sir.

Q. Does it bear the approval of the War Department?

A. No, sir.

Q. Isn't there stamped on the J. C. 1, the approval of the War Department?

A. Yes, sir; the approval in on this paper.

Q. But not on the other?

A. Yes, sir; it is stamped on there.

Q. That appears to have been done in the War Department?

A. Yes, sir.

Q. That advertisement is dated January 7th, 1893, for sealed proposals, to be opened on the 7th day of February, 1893, for Jekyl Creek, is it not?

A. Yes, sir.

Q. That is the advertisement referred to in this letter J. C. 1, 1893,—is a copy of the advertisement inviting proposals?

A. Yes, sir.

Q. And is the advertisement approved by the War Department by the approval on J. C. 1?

A. Yes, sir.

Q. I show you the Abstract of the bids or proposals for improving Jekyl Creek, Ga., and the Inside Water Route between Savannah, Ga., and Fernandina, Fla., opened Febru-

ry 7th, 1893, to which is attached a copy of the advertisement, and ask you to look at the advertisement approved by the War Department, and tell me whether one is not an exact copy of the other? Don't compare it with the book, but compare it with the original, please?

A. Yes, sir; that is an exact copy.

Q. So that the advertisement as printed and published is an exact copy of the one received from the War Department by Capt. Carter, and which he was directed to publish?

A. Yes, sir.

Q. The dates and all?

A. The dates and all.

Q. Now, will you tell me, if you can, from that paper, or anything else, when that advertisement was received in Savannah back from Washington,—the date?

A. January 16th, 1893.

Q. When was the first publication made? Here is some pencil memorandum of it in your own hand-writing; I think you can tell me from this?

A. That might be altered; I didn't read it from that.

Q. I didn't change it.

A. I didn't say that. The first publication was January 18th.

Q. In what paper?

A. Morning News.

Q. When was it published next in that same paper?

A. Jan'y 19th, 20th and 21st and February 5th and 6th, 1893.

Q. How many insertions of that?

A. Six.

Q. How many insertions did he ask for in that letter, to be put in the Morning News?

A. Six.

Q. That was approved by the War Department?

A. Yes, sir.

Q. When was the first insertion in the Engineering & Building Record?

A. Two; January 21st was the first one.

645 And when next?

A. January 28, 1893.

Q. That is a weekly paper?

A. A weekly.

Q. The Morning News is a daily?

A. Yes, sir.

Q. How many insertions in the Engineering & Building Record, New York, are asked for, and approved by the War Department, in that letter?

A. Two.

Q. When was the first insertion in the Seaboard of New York?

A. January 19th, 1893.

Q. When was the next?

A. January 26th, 1893.

Q. Is that a weekly or daily?

A. I think it is a weekly paper.

Q. That is all the number of times that it was printed in the Seaboard?

A. Yes, sir.

Q. How many times were asked for printing it in the Seaboard, and approved by the War Department?

A. Two insertions.

Q. Are there any papers asked for and approved by the War Department in which this advertisement did not go?

A. Yes, sir.

Q. What one is that?

A. The Brunswick times.

Q. You didn't understand my question: Are there any papers which Capt. Carter asked authority to print this in, and which the War Department approved, in which it was not printed?

A. It was printed—

Q. In all the papers in which Capt. Carter asked authority for?

A. Yes, sir.

646 Q. Now, authority is requested to publish also six times in the Brunswick Daily Times, this paper not being on the official list, but is published nearer the scene of the work than any other paper?

A. Yes, sir.

Q. Was it published in the Brunswick Daily Times?

A. Yes, sir.

Q. When?

A. January 18th, 19th, 20th, 21st, February 5th and 6th, 1893.

Q. That is a daily paper?

A. Yes, sir.

Q. So that in the two daily papers, the first issue was on the 18th of January?

A. Yes, sir.

Q. And that authority to publish was received in Savannah on the 16th; that is right?

A. Yes, sir; that is right.

Q. And the advertisement published was an exact copy of the advertisement approved by the War Department?

A. Yes, sir.

Q. Dates and all?

A. Yes, sir.

Q. In each one of these papers?

A. Yes, sir.

Q. And this is true in all these cases?

A. Yes, sir.

Q. In short, the advertisement was published in the papers for which authority was requested, which was approved by the War Department?

A. Provided there was no change; sometimes the advertisements were changed in Washington.

Q. If there was a change, the changed advertisement was then published,—the changed paper?

647 A. Will you please repeat that question to me?

Q. You said that sometimes there were changes in the advertisement in Washington?

A. Yes, sir.

Q. And when they came back here with their approval, that change was in?

A. The change was not.

Q. But that changed newspaper was the one it was published in?

A. Yes, sir.

Judge-Advocate: Sometimes a change of papers published in, and not the form of the advertisement.

Q. (Mr. Rose continuing) Yes,—a change in the papers?

A. I thought you meant the form of the advertisement.

Q. In other words, the directions from Washington, or from the War Department, were followed by Capt. Carter with regard to the advertisement, the papers and the substance sent to him?

A. Not in all cases.

Q. Tell me one that was not?

A. That was in 1896.

Q. What was that?

A. There was a change in some of the papers that came

approved; the date was not changed; it remained to be opened on July,—I forget the date,—June 6th, and it came back from Washington to be opened the 6th,—on July 8th.

Q. And when did it come back from Washington?

A. It was approved August 15th.

Q. And got back here August 18th?

A. No; came back later.

Q. But it came back after the date had expired in the original advertisement?

A. Yes, sir.

Q. Give me S. H. 29 and C. S. 5, 1896.

A. Witness handed the Counsel the papers)

648 Q. These papers were handed by you to the Judge-Advocate on Tuesday, I think, day before yesterday,—the letter requesting authority to print the advertisement inviting proposals for improving the Harbor at Savannah, Ga.,—letter of June 4th, 1896,—was that printed slip on the papers when you gave them to the Judge-Advocate the other day?

A. Yes, sir.

Mr. Rose: With permission of the Court, I would like to read a paper which appears pasted on this paper, that has already been read, which was not read by the Judge-Advocate. (Reading)

“Advertisements to be inserted strictly in accordance with the following paragraph of the Army Regulations of 1895: 506. Ordinarily advertisements will be given six insertions in daily, or four in weekly, papers. When more than ten days are to intervene between the date of the first publication and the date of opening, those in daily newspapers inviting proposals will at once be given four consecutive insertions, and immediately before the date of opening, two consecutive insertions. In case of emergency, advertisements may be given one or more insertions, as time and circumstances permit.

Q. (Mr. Rose continuing examination) The advertisement authorized by the approval of this letter was inserted six times in the Morning News, a daily newspaper, wasn't it? How many times was it inserted in the Morning News?

A. Six times.

Q. And two consecutive days before the opening of the bids?

A. No, sir; 5th and 7th.

Q. Do you know what the 6th was?

A. It wasn't here at that time; I didn't order this printed; it is probable that the 6th was on a Sunday.

Q. So that it was two consecutive days of publication?

A. It is not published on a Sunday.

Q. Isn't it true that where there were daily newspapers, they were inserted six times, in accordance with the authority, and, in weekly newspapers, inserted the number of times approved by the Department?

A. Sometimes not.

Q. Why?

A. For the reason that the advertisement was sent for approval to Washington, and it came back, and there would not be time enough for three publications.

Q. It was so delayed in Washington?

A. Yes, sir; so delayed in Washington.

Q. That is S. H. 29, 1896?

A. S. H. 29, 1896.

Q. Give me C. S. 5, 1896?

A. I haven't got that paper here.

Q. Do you remember that that contains, or has pasted to it, a printed slip exactly like the one I have just read to the Court?

A. Yes, sir.

Q. That is on the Cumberland Sound, 1896, letter?

A. Yes, sir; as far as I remember.

Member of the Court: Mr. President, I move that we take a recess of ten minutes.

Mr. Rose: May it please the Court, I think that is all the questions I desire to ask this witness at present, reserving the right to further cross-examine him, as the Judge-Advocate says he will come back on the stand, at that time.

The President: The Court will take a recess of ten minutes.

(Court took a recess at 1.28 p. m., and was called to order again at 1.45 p. m., all the members present.)

J. W. O. STERLY, a witness for the prosecution, resumed the stand.

Re-direct Examination by the Judge-Advocate.

Q. Here are the advertisement, specifications, and proposals in relation to the improvement of the Harbor at Savannah; it was handed to you by the Counsel; what date was put for the advertisement?

650 A. June 6th, 1896.

Q. What date appears as the date for the opening of the bids?

A. September 8th, 1896.

Q. Does there appear to have been any change of that date?

A. Yes, sir; there has been an erasure.

Q. That was the enclosure with request for authority to advertise, was it not?

A. Yes, sir.

Q. Do you know in what form that went forward with the request for authority?

A. To be opened July 6th or 8th,—July 6th,—it was in July.

Q. And with the authority to advertise, that (handing witness paper) came back as the form of advertisement to be published?

A. Yes, sir.

Q. Returned back I think in August?

A. Yes, sir.

Q. What date in August was this advertisement received back to be inserted?

A. August 15th.

Q. Received back approved, giving authority to publish?

A. August 15th.

The Court: That is the Cumberland Sound contract for 1896, is it?

Judge-Advocate: This is the harbor of Savannah paper.

Q. Read that advertisement which was returned with authority to publish?

A. (Reading) "United States Engineer Office, Savannah, Ga., June 6th, 1896.—Sealed proposals for improving Harbor of Savannah, Georgia, will be received at this office until 12 M., city time, July 6, 1896, and then publicly opened.

Information furnished on application. O. M. Carter, Capt.,
Corps of Engineers, U. S. A."

Q. Then no change was made in the War Department in
the dates of the advertisement submitted for approval?

651 A. No, sir.

Q. It was approved and forwarded after the date
specified in the advertisement for opening bids was given?

A. Yes, sir.

Q. (Showing witness paper) Are you familiar with that
writing there in red ink; that "September 8th"?

A. It is in two hand-writings; "September 8th" is in one
hand-writing, and "1896" was written by Mr. Connolly. That
is the same as this (indicating).

Q. Then you have no knowledge or judgment in regard
to that?

A. No, sir.

Mr. Rose: 1896 was the original?

Judge-Advocate: Yes, sir.

Mr. Rose: No erasure at all?

Witness: No.

Q. (Judge-Advocate continuing) I hand you now the
advertisement, specifications and proposals for improving
Cumberland Sound,—the copy enclosed with the letter to
which you have advertised,—this letter,—(handing witness
paper) do any changes appear to have been made there?

A. Yes, sir.

Q. What changes?

A. The date "June 6th"; the "6th" has been changed and
rechanged, and "September 8th" has been changed. There
has been two changes and that is the second change, "Sep-
tember 8th".

Q. How was it left as the date for the advertisement?

June 6th.

Q. (Handing witness paper) Was that paper also an
enclosure?

A. Yes, sir.

Q. Read that?

A. (Reading) "United States Engineer Office, Savan-
nah, Ga., June 6, 1896.—Sealed proposals for constructing
jetties at Cumberland Sound, Georgia, will be received
652 here until 12 M., city time, July 6, 1896, and then publicly
opened. Information furnished on application. O. M.
Carter, Capt., Corps of Engrs., U. S. A."

Q. That was the advertisement Capt. Carter was authorized to have published?

A. Yes, sir.

Q. Upon what date was he so authorized?

A. He was authorized to do so on August 15th, 1896.

Q. I see that this has been edited for publication. Please state what changes were made from the advertisement as submitted?

A. "United States" is abbreviated to "U. S", and "Georgia" to "Ga." "All" is stricken out and "Corps" is stricken out, and "U. S. A" is stricken out.

Q. In your cross-examination by Mr. Rose, you testified that the War Department has approved these dates of the advertisement,—the dates referred to in the advertisement. Do you know whether that was so as to the dates, or whether there was more than the authority to advertise by the department?

A. This is the authorized (indicating paper) advertisement.

Q. You do not know, as a matter of fact, anything about whether it was the approval of the form of the advertisement, or simply authority to advertise, as requested?

A. That is the authority,—if there is authority to advertise,—as it stands there.

Q. Then it was authorized on August,—what date?

A. Authorized on August 15th.

Q. Then on August 15th, the office was authorized to advertise for proposals and bids to be opened July 6th. Do you know who authorized that change from July 6th to September 8th,—of your own knowledge?

A. Of my own knowledge, I know that this was authorized in the specifications by the Chief of Engineers (indicating paper).

Q. Where did you find that?

A. The specifications has been approved on that letter for the 6th.

653 Q. After September 8th appeared there?

A. Yes, sir.

Q. You have said you didn't know who put that "September 8th" there [think. You testified that you didn't know who put "September 8th" there?

A. I should have said after I received these papers back,—I received the papers in this way.

Q. Received back,—who from?

A. From Washington.

Q. Who sent it to you?

A. Capt. Goethals.

Q. You have said you didn't know who wrote that, did you not?

A. I don't know who wrote this.

Q. That "September 8th"?

A. Yes, sir; I don't know who wrote that.

Q. And you don't know who made that figure in black ink between "June" and "1896" in red ink?

A. No, sir; I do not.

Judge-Advocate: For the information of the Court, I will submit these two papers in relation to each case, which have been referred to, with the changes made in the red ink as they appear. These specifications,—the copy of the advertisement and the specifications in relation to the improvement of the Harbor of Savannah, a copy of which will be attached to the record marked Exhibit No. 49 and the enclosure marked Exhibit No. 49A. Also the advertisement and specifications in relation to the improvement of Cumberland Sound, copies of which will be attached to the record marked Exhibit No. 50; enclosure marked Exhibit No. 50B.

Re-cross Examination by Mr. Rose.

Q. I understood you to say the other day that you received these two papers, Exhibits 49 and 50, at Patchogue, Long Island?

A. Yes, sir.

654 Q. Received them direct from Washington?

A. Yes, sir.

Q. In the shape they now are?

A. Excuse me; I don't know which file number.

Q. That is Exhibit 49, and that is the specification, and that is Exhibit 50 (showing witness papers)?

A. Yes, sir.

Q. And when they came to you, the advertisements in here were in the shape they now are?

A. Yes, sir.

Q. The original request for authority was to have the bids opened July 6, 1896, and that was not approved until August 15th?

A. Yes, sir.

Q. And therefore the advertisement if it appeared after

the 15th of August could not be for bids to be opened on the 6th of July previous?

A. No, sir.

Q. The change, therefore, of the date for opening the bids was necessary under the authority?

A. Yes, sir.

Q. Do you know whether Capt. Carter was in Washington on the 15th of August?

A. Yes, sir; he was in Washington personally.

Q. What date did you get this back from Washington with the changes?

A. August 17th.

Q. Who made those changes, or by what authority they were made, you don't know?

A. Not on that paper.

Q. No; not on these papers?

A. No.

Mr. Rose: I have nothing further.

Q. (By the Court) In the Engineer's office, while it was in charge of Capt. Carter, were memoranda sometimes
655 kept, or ever kept, of men believed to be responsible and believed, or supposed, to have facilities for doing the work at advantageous rates; that is, the work called for under the different contracts and specifications, so far as you know?

A. No, sir; as far as I know, not.

Q. (By the Court) After the specifications were received, so far as you know, were they ever sent promptly to any such men without waiting for a request for them in response to the advertisement?

A. They were always, of late years,—since 1892, they were always accompanied by a letter of transmittal.

Q. (By the Court) Yes, but were they sent out without waiting for a request from these men? Were they sent to these men supposed to have special advantages or facilities for doing the work?

A. In some instances I cannot find any record of requests,—there was no written request.

Judge-Advocate: (Addressing witness) You do not understand; he wants to know whether specifications were sent to those who might be bidders,—prospective bidders?

Q. (By the Court) Without waiting for any request for them; for instance, some men might have been known to Capt. Carter, or to the office, to have special facilities or

advantages to do this work, good men to do the work; now, were the specifications sent to those men without waiting for those men to ask for the specifications?

A. I don't know; they have never been sent out that way,—not to my knowledge.

Q. (By the Court suggested by Mr. Rose) Would you have known it if the specifications had been sent out? Did you have direct charge of sending out the specifications?

A. No, sir; Captain Carter would tell whoever was there to send them out.

Q. (By the Court) If they had been sent out without waiting for a request, would you have known it?

A. No, sir.

656 The following questions propounded by the Judge-Advocate were adopted by the Court:

Q. I will ask you if, since 1892, as you testified, whether specifications known to you to have been sent out were accompanied by a written communication?

A. Previous to that time—

Q. No; whether all since 1892, which have been sent out to your knowledge, have been accompanied by letters of transmittal, and made a matter of record in the office?

A. Yes, sir; since 1892, it was a matter of record in the office.

Q. Who had custody of these specifications?

A. In most cases, Capt. Carter.

Q. Do you know if any account was kept of the number of specifications received, and what disposition was made of them?

A. Yes, sir; nothing but the records in the office so far as I know, the letter of transmittal.

Q. Do the records of the office show how many copies were received from the printer?

A. The bill shows.

Q. And how many were sent to the Chief of Engineers?

A. Yes, sir.

Q. And there was no account of stock ever taken,—of how many were left on hand?

A. No, sir.

Q. What is done with those left on hand after the bids have been opened,—those unused?

A. Those which have been unused are put away,—put aside; some are used for the use of inspectors, and some

are used in making out new specifications,—use part of the specifications.

Q. Where are they stored?

A. They are stored in the Engineer's office.

Q. In whose charge? Who would have control of them?

A. Nobody has direct control over them.

657 Q. Who could get out one? Who could give one out?

A. Everybody could give one out; you could tell the messenger to give me a specification; I mean the specifications after the bids are opened.

Q. They are so plentifully left on hand that anybody could get one?

A. Yes, sir; in some cases. In some, a very few are left.

Q. How about the contract of 1896,—were there many of them left?

A. The contract of 1896, there were quite a number left.

The following questions propounded by Mr. Rose were adopted by the Court.

Q. There were more printed under the contract of 1896 than before?

A. Fifty more.

Q. In the Jekyl Creek contract, and the Altamaha River, a bidder by the name of Chas. C. Ely appears to have put in a bid; that must have been done by three copies?

A. Must have been done by three copies.

Q. Will you please find in the record, a record of sending to him three copies?

A. Three copies; P. Sanford Ross, Savannah.

Q. That was sent to P. Sanford Ross?

A. Yes, sir.

Q. The bid was put in by Chas. C. Ely?

A. Yes, sir; 1895.

Q. It is in the name of Chas. C. Ely, the bid was?

A. Yes.

Q. And there is a long letter transmitting him a copy of these specifications?

A. No; P. Sanford Ross; sent it to P. Sanford Ross.

Q. Find in that book the letter sending a copy to Elton A. Smith?

A. There is no such letter in this book.

Q. Will you be kind enough to read the letter that appears on page 203? (Letter Book A. R. page 203).

658 A. (Reading) "Mr. Alton A. Smith, Savannah, Ga.
Dear Sir: My supply of specifications for improving

Altamaha Aiver, Darien Harbor, etc., being almost exhausted, on account of the great demand for the same, I have to request that if they are of no value to you, you will have the kindness to return to me in the enclosed envelope at least two of the three copies sent you on the 5th instant. Very respectfully yours, Capt., Corps of Engrs., U. S. A., One enclosure”

Q. That was after the bids had been opened?

A. That letter does not bear the signature of Capt. Carter.

The Court: What contract does that refer to?

Mr. Rose: Jekyl Creek, 1895.

The following questions were propounded by the Court:

Q. Did your office ever receive general authority to advertise in the newspapers?

A. No, sir.

Q. You never advertised except under special authority received in each case?

A. Yes, sir.

Q. Did the application for authority to advertise always contain the dates,—the date of advertisement and the date when the bids were to be opened?

A. Yes, sir.

Q. Were those dates in all instances adhered to, except in the one case which you have spoken of here?

A. To my best knowledge, they have always been adhered to.

Q. Does not the law require advertisements for thirty days for supplies and services, except in cases of emergency?

A. The law requires it.

Q. Or more?

A. Or more if practicable, except in case of emergency.

Q. Were thirty days ever given?

659 A. Thirty days were given between the date of the advertisement and the date of opening.

Q. The date of the first publication of the advertisement in the newspapers and the date of the opening?

A. No; never.

Q. Generally, what period of time was given,—in your opinion?

A. In my opinion, it takes between the date of the receipt of the approval to advertise and the date of the opening of the bids,—that varied from 18 to 24 days.

Q. That is, from the date of the approval by the Secretary of War?

A. Yes, sir.

Q. And the date of the opening of the bids?

A. Yes, sir.

Q. From twenty to twenty four days?

A. Yes, sir: from twenty to twenty-four days; I said before 18 days, I think.

Q. Did you ever have any conversation with Capt. Carter upon this subject,—upon this matter of time?

A. No, sir; I did not, except that I asked Capt. Carter in the beginning, "On what dates do you want to have it advertised in the papers"? after the paper came back approved.

Q. Did you ever have any conversation about the time of opening the bids?

A. Yes, sir; in 1896 I had a conversation about it.

Q. Repeat that conversation, if you can?

A. Capt. Carter says, "I let it stand". I asked Capt. Carter whether he would change the date, whether it should be changed to September 15th—

Q. Why September 15th?

A. Being one month after the date of the approval, and Capt. Carter told me, "No; I let it stand the way it is; that gives ample time enough". The specifications were printed from the printer's copy, and were almost always ready 660 within a week after the approval came back.

Q. Did he tell you there was no emergency in the case?

A. No, sir.

Q. Any further conversation that you recollect on that subject?

A. I did not have any other conversation on that subject.

Judge-Advocate: That is all, Mr. Sterly; you can go. I could put on another witness, but I would like the reporters given a little time to catch up, they are so very much behind, and I move that the Court adjourn until 11.00 o'clock tomorrow morning.

The Court: If there are no objections, the Court stands adjourned until tomorrow morning at 11.00 o'clock a. m.

(Here, the Court, at 2.15 p. m., adjourned, to meet Friday, January 28th, 1898, at 11.00 o'clock a. m.)

THOMAS F. BARR,
Col. & Asst. Judge Adv. Genl
Judge Advocate.

661

United States Court Room,
Savannah, Georgia, January 28, 1898.

The court met pursuant to adjournment, at eleven o'clock this morning.

Present:

All the members of the Court, and the Judge-Advocate:

The accused, his counsel, and the reporter, G. T. Cann, were also present.

The President: The Court will come to order; the members of the Court are all present.

FRANK A. D. HANCOCK, a witness for the prosecution, having been duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate:

Q. Mr. Hancock, please give your full name.

A. Frank A. D. Hancock.

Q. And place of residence?

A. Savannah, Georgia.

Q. What is your occupation?

A. At the present time in the employ of the Venable Construction Co.

Q. Where are the headquarters of that Company?

A. Atlanta, Georgia.

(The President): What construction company was that?

Q. The Venable Construction Company, I understood you to say?

A. The Venable Construction Company, Atlanta, Georgia.

By a Member: Savannah?

A. Atlanta, sir.

Q. Did you see an advertisement, published in 1896, calling for proposals for the improvement of Savannah Harbor and Cumberland Sound?

A. I must have seen it; I became aware that those improvements were to be made.

Q. Did you become interested in the improvements?

662 A. Yes, sir.

Q. In what way?

A. I was a member of the concern of McAlpin & Schley, and Mr. Venable, of the Venable Construction Co., or Venable Bros., came to Savannah, and I was introduced to him

as being familiar with local conditions. There was no definite plan made. The general plan was we were to join for the purpose of trying to obtain the work and do it.

Q. Join with Mr. Venable?

A. Yes, sir, that was the general plan at the time.

Q. Who is Mr. Venable?

A. Mr. Venable is a member of the firm of Venable Bros. of Atlanta.

Q. At that time?

A. At that time. The Venable Construction Co. has since been organized.

Q. Did you procure the specifications?

A. Yes, sir.

Q. In relation to those two contracts for the improvement of Savannah Harbor and Cumberland Sound?

A. Yes, sir.

Q. Please state to the Court how you want to work and with what success in procuring the specifications.

A. I called at Capt. Carter's office, and I was admitted to his private office and told him that I wanted copies of the specifications. He then asked me if I applied as an agent; I said that I was a principal; he said, "That is all right, because we are not issuing them to agents." I will try to remember the sequence, of course, there may be some change.

Q. I wish you would without my questioning you upon the points; state to the Court everything that occurred.

A. After that I think his first reference was to the Cumberland Sound work. He first asked me if I was familiar at all with the work, if I had been over it; I said I was not; 663 he said "it is my duty to warn all prospective bidders that the work is of a difficult character." Then he referred particularly to the Cumberland Sound work, and said it would not be safe for any bidder to bid on it without first seeing the work and familiarizing himself with its character. He went on to say that it would be necessary to construct a trestle over the breakers, and that the character of the work was such that he estimated a \$400,000 plant would be necessary to effect it, and he referred to the fact that no money would be available for a year, and a lot of the work would have to be done on the capital of the contractors, which would make large capital necessary. Then he said for the purpose of maintaining his records in the office he would not give me the specifications, but he would have the proper letters sent to my office, which he did promptly.

Q. He sent you letters containing the specifications?

A. Yes, sir.

Mr. Rose: He said 'promptly' Col.

Q. He sent you a letter then promptly, containing the specifications?

A. Yes, sir.

Q. How many?

A. One for each work.

Q. One for each work?

A. One for each work, yes sir; there was a separate letter for each specification.

Q. How long before the opening of the bids was it that you had this conversation with him?

A. It was on the 4th, of September, that is four days,—the bids were opened on the 8th.

Q. That was four days before?

A. Yes, sir.

664 Q. Did you make application for a sufficient number of applications to enable you to put in your bid?

A. No, sir.

Q. Did he give you any information in regard to any special point as to the requirements of the specifications, about the material to be used?

A. Nothing as to material.

Q. Did he say nothing about the stone to be used?

A. No, sir.

Q. Did he say anything about the type of mattresses which should be used?

A. No, sir.

By a member of the Court: Was this in 1896?

Judge-Advocate: Yes, I asked that question first. I think that was my inquiry?

Mr. Charlton: Yes; the contract of '96.

Q. When you originally applied for specifications, did you ask for a copy of the specifications or for specifications to enable you to make a bid?

A. A copy.

Q. A copy; you only wanted a copy?

A. I didn't specify anything particularly; I did not ask for a full set.

Q. Then you got what you asked for in that instance?

A. Yes, sir.

WILLIAM W. OSBORNE, a witness for the prosecution,
having been duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. Mr. Osborne, will you please give your name and profession?

A. William W. Osborne, attorney at law.

665 Q. You occupy an official position in the state, do you not?

A. I am prosecuting officer for this circuit, Solicitor General is the title.

Q. You have been a member of the State Senate, I think?

A. Yes, sir.

Q. Do you remember in Sept. 1896 if you had occasion to request from Capt. Carter specifications in relation to the improvement of Cumberland Sound and Savannah Harbor?

A. I did so, yes sir.

Q. For whom were you acting?

A. W. H. Venable.

Judge-Advocate: Those letters are in evidence (handing the letters to counsel for the accused) and spread upon the record.

Q. Is that your letter, Mr. Osborne?

A. Yes, sir, dated Sept. 4, 1896.

Judge-Advocate: This is a letter, may it please the Court, which is already spread on the record as evidence, but as it is short, I will read it:

“Savannah, Ga., Sept. 4, 1896.

Capt. O. M. Carter,
Savannah, Ga.

Dear Sir:—

We have a client who asks us to get from you immediately copies of specifications for the jetty work for the Savannah Harbor, and Cumberland Harbor. We would like these specifications at once.

Very truly,

BARROW & OSBORNE.”

Q. Did you receive those specifications for which you asked?

A. I did not, sir.

Q. What further action did you take?

666 A. I received a written communication from Capt. Carter, I cannot find it; at the request of Capt. Gillette I searched my office, but I have not it, asking the name of the party who desired the specifications.

Q. Did you reply to that letter?

A. I did, sir.

Q. Was that your reply? (showing witness a letter)

A. That's the reply, yes, sir.

Judge-Advocate: This reply is so short I will read it again.
United States Engineer Office,
Savannah, Ga., Sept. 4, 1896.

"Messrs Barrow & Osborne,
Savannah, Ga.

Dear Sirs:

Replying to your inquiry of the 4th, inst., please send to me the name and address of the party desiring specifications.
Very respectfully, yours,

O. M. CARTER.
Capt. Corps of Engrs., U. S. A."
Savannah, Ga., Sept. 4, 1896.

Dear Sir:—

The name of the party desiring the specifications for harbor work is R. A. Johnson, Augusta, Ga.

Respectfully,
BARROW & OSBORNE.

Capt. O. M. Carter,
Savannah, Ga."

Q. Did they send you those specifications?

A. They did not; the word come back they would be mailed to the party.

Q. Who is R. A. Johnson, of Augusta, Ga.?

667 A. I do not know. Mr. Venable was in my office. He came there and said he desired the specifications some time in advance of any of the other contractors, knowing that he had them. For that reason I wrote the first letter. He was still in my office when the communication came back from Capt. Carter, and he said, "Give him the name of R. A. Johnson, of Augusta, Ga." I gave the name and the reply came back they would be mailed. Then I found we didn't get them, and Mr. Venable went over and got them himself.

Q. So far as you know?

A. Of course, I was not there; I saw them in his possession afterwards.

Q. Did you participate in the preparation of the bids, Mr. Osborne?

A. I cannot say that, sir; Mr. Venable desired to place himself in a position where he could bid, and I believed he and his brother, Sam, were going to sign the bond, making the bid through somebody else, and Sam, his brother, was not in Savannah and would not reach here until the Central train came in the afternoon before the bids were going to be opened. I think there were three copies, he was to qualify on and the brothers were to qualify as bondsmen; I had Mr. Carr, the clerk of the superior court of this county, come to his office at 8 o'clock the evening before the bids were going to be made, and he qualified both the Messrs Venable. That is the only thing I had to do with it and that was to see that he was there at the time. I was present when they qualified the bond.

Q. Do you remember the amount of the bond?

A. No, sir, I do not remember, I could not tell you.

Cross-Examination. (By M. Charlton.)

Q. You do not know who R. A. Johnson is, do you?

A. No, sir, I have no idea.

Q. Don't you know he has no existence at all?

A. I did not at that time.

668 Q. You know it now, don't you?

A. I heard so.

Q. You heard that from Mr. Venable?

A. I have not; no, sir: I did not get it from him: I did not know at that time it was a fictitious address: I understood, or rather, the impression I had was he was some person working for Mr. Venable.

Q. You knew that Mr. Venable knew he was not in Augusta?

A. No, sir.

Q. You knew that he didn't want them?

A. No, sir.

Q. You knew that Mr. Venable did, and he was in your office at the time?

A. Yes, sir.

Q. Within a step or two of the engineer's office?

A. Yes, sir.

WILLIAM H. VENABLE, a witness for the prosecution, having been duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. Please state your name and residence, Mr. Venable.

A. William H. Venable, Atlanta, Georgia.

Q. What is your business?

A. I am in the granite business.

Q. What was your business in 1896?

A. I was in the tranite business—the stone business.

Q. The same business as at present?

A. Yes, sir.

Q. Where are your works?

A. At Stone Mountain and Lithonia, 16 and 25 miles below Atlanta, Georgia.

669 Q. How far from Savannah?

A. Approximately, 275 miles.

Q. How far from Brunswick?

A. About the same distance.

Q. And how far from Fernandina?

A. I suppose 400 miles; I really don't know the distance accurately.

Q. You were in Savannah in 1896, a short time prior to opening bids for the improvement of Cumberland Sound and Savannah Harbor, were you not?

A. I was, yes, sir.

Q. And in Mr. Osborne's office here in Savannah?

A. Mr. Osborne and myself were together; we were in the state senate together; he was my friend and I came to him as my friend and attorney to investigate the matter of bidding.

Q. You were President of the senate?

A. I was President of the senate, yes, sir, of which he was a member.

Q. Did you make efforts to secure specifications to enable you to make a bid?

A. I did.

Q. How did you secure them?

A. I requested Capt. Carter to give them to me.

Q. That is when you did secure them?

A. Yes, sir.

Q. Did you make any preliminary effort to secure them before you made the request?

A. Yes, sir, I went to the office of Mr. Osborne and requested him to write a note to get me the specifications without going to the office myself.

Q. Why did you not want to go to the office yourself?

A. Well, I thought as a matter of prudence, it would be best for me not to go to the office and get the papers.

670 Q. Prudent in what way?

A. Well, I did not care particularly to be known in the transaction, until I had formally and absolutely made up my mind to bid.

Q. What took place in Mr. Osborne's office? Did you secure the specifications, or a copy of the specifications there?

A. My recollection is sir, that a letter was addressed to Capt. Carter and a reply came back asking for whom we wanted the specifications for, and Mr. Osborne asked me who he should say, and I gave him the name of a party, a fictitious party, and I supposed he could get them for one party as good as another. I gave the name of some man, Johnson, who lived in Augusta.

Q. And there was no such person to your knowledge?

A. Not to my knowledge, no sir.

Q. It was not your desire that your attorney should have the specifications sent to you or to anybody, but to be sent there to him for you?

A. Sent to his office for me.

Q. The name was then used simply as a blind?

A. Yes, sir.

Q. When you saw Capt. Carter, Mr. Venable, what conversation did you have with him in relation to those proposals?

A. He invited me into his private office where he had the prints and charts and everything, and began to show me the work in detail as appeared on those records.

Q. He pointed out the different localities where the improvements were to be made?

A. Yes, sir, and asked me if I had inspected the work. I told him I had not.

Q. Did he explain to you the specifications in detail?

A. In a limited measure he did, not through the whole
671 of them in detail?

Q. Did he give you the details of the types of mattresses to be used?

A. He discussed them with me, yes, sir.

Q. Did he discuss the use of any different mattresses from any of those described in the designs?

Mr. Blair: Let him tell what he says, don't lead the witness.

Judge-Advocate: I don't propose to lead the witness, I only propose to expedite the examination.

Q. State fully if you can, in narrative form, Mr. Venable, each and every thing that was said at that interview between you and Capt. Carter.

A. He said to me in discussing the specifications, that there were three different designs and they were to be made according to those designs. I knew absolutely nothing about the manufacture or the use of the mattresses, never having had any experience in that line of business. He explained to me the difficulties attending the work, in the construction of the work and the vast amount of money required to be used in the plant on the work, and the executing of the work speedily as the specifications required it should be done.

Q. The vast amount of money?

A. The large sum of money necessary to be used in it.

Q. Well, was that all that he stated about a large sum of money, Mr. Venable?

A. I am not sure that he stated to me in round sums the amount of money that would be necessary to equip the plant sufficient to do the work; I am not sure that he stated that, but my impression is, my best recollection is that he said it would require something in the neighborhood of \$400,000; that was in reference to where in the specifications it was stated that so many boats and the equipment necessary
672 should be stated, you had to state the equipment, the barges, etc, in the specifications. That is my recollection and that we would have to build a wharf, we could not use the ordinary barges to deposit a great deal of the stone at Fernandina, but that we had to build a wharf out, a tram, out some considerable distance. It was merely in the way of showing to the interest of the contractors, giving the necessary information to predicate an intelligent bid upon it, all the difficulties surrounding the work. That is what I went there for; those things I discussed with him.

Q. Did he give you any information in regard to the designs of mattresses which would be mostly used?

A. No, sir.

Q. He didn't mention that subject?

A. Of the three kinds?

Q. Of the three types?

A. Of the three types, no sir, that is my recollection. Capt. Carter told me in reference to the stone to be used that No. 4, when I asked him the question, that No. 4 was intended to have Florida stone, the specifications covering No. 4, meant Florida stone.

Q. Do you know anything about Florida stone, Mr. Venable?

A. No, sir, I was in the granite business, and therefore, I didn't intend to bid on Florida stone, if I had put in the bid, but on my own stone, and afterwards to investigate the Florida stone.

Q. Did you prepare a bid or bids?

A. Yes, sir.

Q. Proposals for both improvements?

A. Yes, sir, or rather, I was preparing it and I intended to get McAlpin & Schley to put in the bid, they being local people here, my brother and I qualified on the bond for \$500,000, the bond required being half a million.

Q. You being the interested party, if the bid was successful, and furnishing the necessary capital?

A. Yes, sir.

Q. Did you submit those bids?

A. I did not.

Q. Why not?

A. I did not thoroughly understand the manner of the construction of the construction of the mats, and I could not get any information, not from him, I didn't ask him except in a general way, as I before stated, but I had had no experience, and I was afraid to undertake it, was one reason and the other reason was I came here primarily to sell my stone, being in the granite business and this requiring a large amount of stone.

Q. Did you gather any information in regard to the cost of construction of the different types of mattresses?

A. I could not get any information from any one here. Every one I went to gave me no information about it outside the office. The only information I got was as I told you, what Capt. Carter gave me.

Q. Was there anything in the requirements of the specifications in relation to those mattresses that had effect upon you?

A. Well, I knew from what little information I got, that one of the three classes or three designs, or two, that the

relative cost between the three was considerable difference; I did not know which of the three I would be required to put in, and on the question or score of prudence, I considered I would not bid, inasmuch as I had come for the purpose of selling stone, and I had made my contract, if the contract was awarded to The Atlantic Contracting Company, that they would take my stone at certain prices.

Q. That was before the bids were submitted?

A. Yes, sir, I think it was the day before.

Q. The day before the bids were to be submitted, you had a contract?

674 A. I made the contract or negotiated it with Capt. Green; I consummated it by having it signed by the President of the Company, John F. Gaynor.

Q. What Capt. Green is that? Do you know his initials?

A. D. B. Green of Stamford, Connecticut.

Q. How did you happen to enter into that contract, Mr. Venable?

A. Well, when I ascertained that clause one, two and three would cover my stone and I wanted to sell the stone I went to Green and Gaynor.

Q. Why?

A. Because my best judgment was that those gentlemen having had more experience than any one else and having had these contracts for a series of years knew best how to do the work and would be more liable to get it, and I wanted to sell the stone to them.

Q. You contracted with them then to furnish the stone for the first, second and third classes?

A. One hundred thousand tons to Savannah and one hundred and fifty thousand tons either to Fernandina or Brunswick at our option at a certain price agreed upon.

Q. The point of delivery to be agreed upon by you?

A. In the Fernandina work that is.

Q. Either to Fernandina or Brunswick?

A. The Cumberland Sound I should say? Yes sir.

Q. At what price?

A. For the Savannah work I was to receive one dollar and a half a ton of two thousand pounds on board the cars Savannah.

Q. The point of delivery?

A. On board the cars Savannah. I was to receive two dollars a ton on board the cars at Fernandina or one dollar

and seventy-five cents a ton aboard the cars at Brunswick, Ga., for classes one, two and three such as I should deliver there or here.

Q. Did you approach these parties upon this subject or did they approach you?

675 A. Well, I should say it was a mutual approach. I could not say they approached me or I them. I was just as anxious to sell as they were to buy.

Q. You casually met?

A. No, I think we met by design.

Q. By mutual design?

A. By mutual design.

Q. Do you know if they were aware you were a prospective bidder?

A. Yes, sir; when I received my specifications, after I had failed to get them by Mr. Osborne, when I received the specifications I got down to the bottom of the stair way or just to the corner, of the place over there where the office was, I met Ed. Gaynor whom I knew and had tried to sell stone on previous contracts and failed, and he said he would like to see me about the stone.

Q. He saw you had come from Captain Carter's office?

A. I cannot say that. I do not know where he saw me come from. I came down very fast.

Q. I thought you were coming down the stairs from the office when he met you?

A. I came out on the corner, I think I met him on the corner of the walk.

Q. A place contiguous to Captain Carter's office?

A. Close proximity. It was on the street very near where his office was situated.

Q. You were coming from the direction of Captain Carter's office?

A. I came down the stairway and out the door leading from his office.

Q. How far were you from Captain Carter's office when you met him?

A. I was just out on the street if I remember.

Q. A few steps or many?

A. A few steps.

Q. Well, that is near enough Mr. Venable?

A. I would like to be—that is my remembrance.

676 Q. Well, state what occurred, what conversation occurred between you?

A. I have stated that he said he wanted to see me about selling him the stone. I went to the hotel and met Captain Green and John Gaynor and several other gentlemen, who were here on the same mission.

Q. Well, we will confine the examination, Mr. Venable, to your relations and intercourse with Captain Green and Ed. Gaynor.

A. Well, I had nothing to do with Ed. Gaynor in selling the stone, I had no communications with him at all.

Q. With whom did you negotiate?

A. With Captain Green. And after I had determined the question with Captain Green and we had agreed upon the price, I wrote out the contract,—the contract is a written contract.

Q. Have you a copy of the contract, Mr. Venable?

A. No, sir, it is at home. It is in Atlanta, in my office.

Q. And this was all before the bids were opened?

A. I think the contract was signed the morning the bids were opened,—at twelve o'clock or one in the morning of the day the bids were opened.

Q. Then you did not put in your papers?

A. No, sir.

Q. What did you do with them?

A. I kept them.

Q. For how long?

A. I may have them now, I do not remember.

Q. Was any effort made to obtain them from you or by any party?

A. Yes, sir.

Q. By whom?

A. By John F. Gaynor, the President of the Company.

Q. Before or after the opening of the bids?

A. Before.

Q. How long before?

A. In the morning before.

Q. After or before the execution of the contract?

A. I will not be certain whether it was in the morning before or the night before the morning of the day. I believe that it was in the morning before.

Q. Refresh your memory, if you can, Mr. Venable, and inform me if it was before or after you had entered into the contract to furnish the stone?

A. It was after, sir.

Q. After?

A. Oh, yes, sir, yes, sir.

Q. Then it must have been in the morning before?

A. I think this contract, my contract, I am sure it was signed in the morning of the bidding. After that Gaynor requested me to surrender to him my papers,—the three papers that I had made out. I declined to do it because I had made my contract in good faith for the stone, and I thought if I did, I would be in a conspiracy, and I declined to do that. I simply told him I didn't propose to vitiate my contract. I thought it would be a violation of the law. I would not surrender my papers.

Q. Your papers were in due form for presentation?

A. Yes, sir.

Q. All proper acknowledgments made and sureties furnished?

A. I had qualified and my brother had qualified. I do not know whether or not McAlpin & Schley had signed the papers, or whether they had kept them there to be signed; but they were ready to be signed and prepared for presentation, minus the signatures.

Q. Could you have justified as sureties without having something to justify to, Mr. Venable?

A. Yes, I could simply swear that I was worth, my brother and I, over and above the amount of money required in the affidavit which we had previously made before the Clerk of the Court. I do not remember whether these people were there or not; they may have been, though I don't remember; that is the whole of it—I don't remember.

678 Q. But you do know that the papers were in your possession that morning?

A. I do know they were in my possession, and in a pigeon hole or box that was in room, and I pointed out the package to Mr. Gaynor.

Q. In that instance you do not remember whether the names of the ostensible bidders were affixed to the proposals?

A. That I do not know, therefore, will not say. I do know that I had qualified and my brother had qualified for the amount stated on the bond, which was a half million on each contract, five hundred for one and five hundred for the other.

Q. \$500,000.00 in each contract?

A. That I dont remember but the papers will show; but whatever it was we qualified for it.

Q. In view of your ability to become surety in so large an amount, Mr. Venable, why did you not make the bid in your name?

A. I thought putting it in the name of another, the two of us be— bondsmen, we could fix it then you see, afterwards, when it became known, if they wanted us to make another bond, if we were successful in the contract, then we could submit a different bond, you see. I did not want to be put to the expense and cost of hiring a bondsman to sign the bond when there was no certainty of our getting the contract. My brother and I could qualify for the amount put on the contract, and by putting the contract in the name of another and backing them, and on the other hand, by selling the stone and things of that sort, make a proper and straight contract.

Q. You preferred then to be a surety yourself rather than solicit others to become surety for you?

A. That's it, that is the motive that actuated us in the transaction.

Q. You were informed, Mr. Venable, by Capt. Carter 679 that Florida stone could be furnished under No. 4 of the specifications?

A. That is my remembrance.

Q. Did you make any statement as to your inability to furnish that stone?

A. No, sir.

Q. Did you discuss the subject of Florida stone with him at all?

A. I was not with him exceeding 20 minutes, I guess.

Q. That was not the question; did you discuss with him at all the question of Florida stone?

A. The only discussion I had with him was the conversation I have related about.

Q. Not as to the character of the stone?

A. No, sir; I am sure he told me that the fourth class stone was Florida rock, and that the specific gravity of the stone about that, I don't thing he said anything to me. I had made a calculation that it would be 155 pounds; I did not think that covered the Florida stone, and therefore, I made a contract with these gentlemen for one, two and three.

Q. You made an estimate for your own benefit of what fourth class stone should be under the specifications?

A. What the third class should be.

Q. Fourth class stone should be?

A. I didn't make any contract or any effort about the fourth class stone.

Q. I mean you made a calculation as to whether the Florida stone could fill it?

A. No, sir, I made the calculation for myself entirely because I was not in the Florida stone business, but in the granite business; I expected to sell whatever stone was required that filled the specifications of one, two and three from my own quarries, therefore, I did not pay any attention to the fourth class stone, which I knew from what he said, should come from Florida.

680 Q. What did you just mean by 155 pounds?

A. Well, I thought that the 2.4 set forth in the specifications, meant it should be 155 pounds to the cubic foot in reference to the specific gravity, 2.4, that is in there; I don't understand it either. You will understand in the specifications there, it says that fourth class stone should have a specific gravity of 2.4 and I thought that meant 149 to 155, something like that.

Q. Was Capt. Carter's statement in relation to Florida stone, confined to Florida stone of the character described in the specifications, or to Florida stone generally?

A. The Florida stone that the specifications covered, that the fourth class stone meant a Florida stone up to that standard.

Q. Now Mr. Venable, instead of getting your attorneys to procure specifications, why did you not go originally to Capt. Carter and get them as you did subsequently?

A. From what I learned when I arrived in Savannah, my judgment was that the best way for me to get the specifications,—I had endeavored to get them through Mr. Hancock, and then I went to Mr. Osborne as my friend, to get them in that way, but failing in that, I didn't want it to be known I came down here for the purpose of bidding at all.

Q. Why did you think it necessary to keep it secret, Mr. Venable?

A. Well, I thought that the Atlantic Contracting Co. knew everybody that came here and I wanted to avoid being with them or seeing them at all until I made up my mind whether

I should bid, or whether I should sell the stone, and after an effort I could not get information sufficient that would warrant me in bucking against such men of experience and influence as those men had, I concluded that the best thing for me to do was to sell the stone and not bid, and I made a contract to sell the stone and not bid.

Q. Did you make an effort to find out the character
681 of stone previously used by Green & Gaynor?

A. Only from hearsay.

Q. Did you ever hear from hearsay from Capt. Carter?

A. No, sir; he never told me about the Green & Gaynor stone, nor did he ever mention to me Green & Gaynor, that is my remembrance.

Q. His statement was in regard to the necessary plant, not the one now in use in these waters?

A. That is what he meant,—to show the difficulties attending the work and the amount of money required, and the contingencies arising from the appropriations not being forthcoming, though the work was going along,—on that line.

Q. Your testimony on that point was mainly as to Cumberland Sound, the difficulties that would attend the execution of the contract; how about Savannah Harbor?

A. Well, that the equipment for both Cumberland Sound,—

Q. That the equipment?

A. Which was necessary to carry out the work so as to do a certain amount required which was stated in the specifications.

Q. So that \$400,000.00 covered the value of the plant for both improvements?

A. Yes, sir, that's my recollection.

Q. It was then not for Cumberland Sound alone?

A. No, sir, I did not so understand it, nor did I say that.

Q. I want it to go upon the record that it did cover both places in justice to the accused.

A. Yes, sir, I would not do an injustice to him or any other man.

Q. I am aware of it, Mr. Venable.

A. We had to do that amount of work whether or not the appropriation was forthcoming or not, to carry out a certain amount so stated in the specifications.

Q. Did you gather from Capt. Carter's statement that the

trestle to which he referred would have to be constructed before the work was entered upon?; or it would become necessary later on?

A. As we filled out to it.

Q. It would not be an original expenditure before entering upon the execution of the contract?

A. I understood from him that the contract would not be executed unless this trestling was built and starting from shore as I understood it, going out.

Q. I am trying to time it.

A. My understanding was we would build it out as we filled in; we would build out on the fill.

Q. Then it would be a constant contingent expense not all entered into at once?

A. That is my understanding.

Q. The understanding that you got from that conversation with him?

A. Yes, sir.

Q. I will ask you one more question, Mr. Venable, when did you first see the advertisement calling for proposals upon these improvements?

A. It was a short time before I came down here; I came, I think, one day or two days before the letting.

Q. You saw the advertisement about six days before?

A. I don't know when I saw it; I came down a few days after I saw it; I don't know how long it had been running.

Q. I referred simply to when you first saw it?

A. That was a few days before I came.

Cross-Examination.

Questions by Mr. Charlton.

Q. Mr. Venable, who is the attorney of the Venable Construction Co. in Atlanta?

A. Attorney, the Hon. Hoke Smith.

Q. How long has he been attorney?

A. Since the organization of the company.

683 Q. Was he attorney of Venable Bros. previous to the organization of the company?

A. No, sir.

Q. He started with the corporation?

A. Yes, sir; he is not the attorney of Venable Bros. now.

Q. Simply the corporation?

A. Yes, sir, he is a stockholder and attorney for the Co.; he owns one third.

Q. You yourself are largely interested in it?

A. One third and my brother one third.

Q. And Mr. Smith the other one third?

A. Yes, sir, barring a share or two of the stock.

By the Court: I would like to ask the witness if he had seen the advertisement three or four weeks before the date of opening the bids, if it would have made any difference in the preparation of his bid?

A. I would have had ample time to have made preparation and have bid.

By the Court: Would you have had ample time to ascertain all the details, necessary details, about the construction of mattresses, so that you could have put in a bid in a satisfactory manner,—well matured?

A. I could not have put in a bid at any time satisfactory to myself, because I did not know which of the three classes or styles of mattresses could be used.

Q. Suppose the specifications had required a separate price to be stated for each style of mattress?

A. I would have had no hesitancy in bidding.

684 JAMES FOLEY a witness for the prosecution, having been duly sworn, testified as follows.

Direct Examination.

Questions by the Judge-Advocate.

Q. What is your name in full?

A. James Foley.

Q. What is your occupation?

A. Shipping business.

Q. What kind of shipping business, Mr. Foley.

A. Well, buying and selling ships, wrecking, etc.

Q. Buying and selling second hand vessels?

A. Yes, sir.

Mr. Charleston. Col. don't lead the witness.

Q. Well, what kind of ships did you buy and sell?

A. Sailing vessels principally.

Q. New or old?

A. Both.

Q. You bought both?

A. Yes, sir.

Q. How long have you been engaged in the business?

A. Eighteen or twenty years.

Q. Do you know anything about the value of the vessels owned by the Atlantic Contracting Company in the improvement of Savannah Harbor?

A. Yes, sir, I think I do.

Q. Have you seen the vessels they have in use?

A. Yes, sir.

Q. Do you know the number they have?

A. Yes, sir.

Q. And the names of the different boats?

A. Yes, sir.

Q. And the number of scows?

A. Not exactly the number of scows, no.

685 Q. You know enough of them to give your judgment as to the value of them?

A. I should say so.

Q. What in your judgment is their value?

A. Somewhere about \$10,000.00.

Q. Did you know them in 1896?

A. Yes, sir.

Q. How long before that time had you known them?

A. Known the plant?

Q. Yes.

A. Well, I suppose since it came here, on and off.

Q. What was it value in your judgment, in 1896?

A. That's what I told, you,—\$10,000.00.

Q. Ten thousand dollars, then that was not your present value that you estimated?

A. Somewhere about that.

Q. You stated that you deal in new and old vessels, what could that plant be put in entirely new for, vessels as good as those in use were when they were new?

A. Entirely new modern boats would be \$60,000 or \$70,000, I suppose.

Q. That would cover everything?

A. Yes, sir.

Q. Where were you in 1896, Mr. Foley?

A. Savannah, sir.

Q. Did you become aware that proposals were solicited through an advertisement for the improvement of Savannah Harbor?

A. Yes, sir.

Q. Did you make any application for specifications, as requested in the terms of that advertisement?

A. Yes, sir.

Q. Do you remember when?

A. I thing about a day before the contract was let, 686 or somewhere about that.

Q. To whom did you make it?

A. Mr. Connolly.

Q. Who was Mr. Connolly?

A. Capt. Carter's secretary.

Q. Why did you make it to him?

A. Well, he was in the office, I always considered my business with him.

Q. Was Capt. Carter there?

A. I believe so, I don't know.

Q. You did not see him?

A. No, sir.

Q. Did you receive the copy that you requested?

A. Mr. Connolly started to give them to me but stated he would see about it; he went in another room and came back and said I could not have them, that I was supposed to be a Cuban filibuster and could not have them.

Q. Then the only reason given you for not furnishing you the specification was that you were a Cuban filibuster?

A. I suppose so.

Q. You didn't get them?

A. Yes, sir, I got them afterwards, the next morning.

Q. How did you happen to get them the next morning?

A. Capt. Carter sent for me that evening and asked me to come up to his office the next morning, that he wanted to see me.

Q. Did you see him?

A. Yes, sir; Capt. Carter sent for me that evening and requested me to come to his office the next morning, and asked me if I wanted a set of the papers; I told him yes, if I hadn't wanted them, I would not have come for them; Capt. Carter then handed them to me and asked me if I wanted any information about how the work was to be done, and said he would assist me in any way he could towards figuring or 687 anything else. He told me that the contract would require a big plant to do the work, something about \$400,000.00.

Q. Then your application was for the Savannah Harbor only?

A. Yes, sir.

Q. You knew at the time that statement was made to you the value of the plant which was then in use?

A. That was my idea, yes, sir.

Q. Now, did you have any idea of bidding when you went for those specifications?

A. Well, I think not.

Q. Why did you want the specifications, Mr. Foley?

A. So as to know if I could get them; sometimes there are little contracts included in those.

Q. It was not the whole contract, it was simply to know if there were any little contracts which you could get in on?

A. That was all.

Q. Did you after having been refused by Mr. Connolly a set of those specifications, make any statement as to your probable action in the premises?

A. I told Mr. Connolly that I would get my attorney, Mr. Barrow, that evening or the next morning to come up and request them.

Q. Then Capt. Carter sent for you as you have testified to?

A. Yes, sir.

Q. Who sent,—after you had left their office, did Capt. Carter soon send for you?

A. That was in the morning that I went up for the papers; it was going on towards six o'clock that the Captain sent for me.

Q. Did he tell you why he sent for you?

A. No, sir, he simply asked me if I wanted a set of the papers.

Questions by Mr. Charlton.

Q. Are you a capitalist on a small scale?

A. A very small scale.

Q. About how large a scale?

A. I don't know.

Q. Let me put it in another way, how much property do you return for taxation?

A. In Savannah, none; yes, I do, I return some shipping property.

Q. How much, did you return a month or two ago; before this year?

A. For this year, none in Savannah.

Q. Do you pay even a poll tax?

A. No, sir.

Q. You don't even pay that?

A. No, sir.

Q. When you went to get these specifications, that was all a joke, wasn't it? You didn't want them, didn't need them, and you had no idea of bidding?

A. No, I had no idea of bidding.

Q. Aint the truth of the matter that you bet drinks with a man that you could get them, they were so easy to get?

A. I bet I could get them.

Q. You bet drinks you could get them?

A. I don't think I did, no.

Q. You did bet you could get them?

A. Yes, sir.

Q. How much did you bet?

A. Nothing.

Q. Just for any bet, that you could get them if you wanted them?

A. Yes, sir.

A. As a matter of fact, you did get them?

A. Yes, sir, eventually I got them.

Q. Mr. Connolly thought you were a Cuban filibuster-er?

689 A. Yes, sir.

Q. Well, are you?

A. Well, it is supposed so.

Q. Is Mr. Connolly?

A. I would not be surprised.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. You have a financial standing at the banks, Mr. Foley?

A. Yes, sir.

Q. What bank do you transact business with?

A. The Chatham bank.

Q. What is your credit there,—do you know, with that bank?

A. Anything I want within reason.

Q. What is it that you call within reason?

A. \$5,000.00.

Q. You could get \$5,000.00 from that bank any time you wanted it?

A. Yes, sir.

Re-cross Examination.

Questions by Mr. Charlton.

Q. Which bank is that?

A. Chatham bank.

Q. On your own personal paper?

A. Not on my own personal paper; they don't lend money on personal paper.

Q. If you got an indorser worth \$5,000, you can get \$5,000?

A. I can take any person's paper and get it.

Q. By your indorsement, get \$5,000?

A. I think so.

Q. How many vessels have you sold in the last few years?

A. I could not exactly say; it has not been all bought and sold in the vicinity.

690 Q. Has anything been bought and sold in this vicinity except an old wreck down the river for two or three hundred dollars?

A. I bought one in Key West.

Q. A wreck?

A. Yes, sir.

Q. How many have you bought in Savannah?

A. I could not say, very numerous.

Q. About one in the last five years—and that for \$300?

A. No, sir.

Q. Did you buy those wrecks in the storm of 1893?

A. I bought several of them.

Q. They were not worth very much?

A. To me,—yes, sir.

Q. If you had waited a while you could have got them for nothing?

A. No, sir.

Q. Did you buy them on your own capital?

A. Yes, sir.

Q. Do you keep a bank account in the Chatham bank?

A. Yes, sir.

2nd Re-direct Examination.

Questions by the Judge-Advocate.

Q. You were asked by the counsel whether you attempted to get the specifications so as to show how easy it was to obtain them?

A. The general impression was it was a little difficult to get the papers up there, that's the understanding.

Q. Then your effort was not based upon the intention to show how easy it was for you to get them, but to show that you could get them although it was considered difficult?

A. I supposed I could get them.

Q. That is that you had the right to demand them?

A. I had the right that anybody else had in this country to go up and demand them.

Q. Then it was not to show how easy it was to get 691 them that you went there?

A. No, sir.

JOHN W. O. STERLY, recalled for the prosecution, previously sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Judge-Advocate: You will remember, Mr. Sterly, that you are still under oath on this case, when you are recalled from time to time.

Witness: Yes, sir.

Q. Have you the River and Harbor Act of July 13, 1892?

A. Yes, sir.

Q. Read the paragraph, making the appropriation for the improvement of Savannah river, Ga.

A. (Reading) "Improving Savannah River between Augusta and Savannah: continuing improvement, \$35,000.

Q. Now, look at G. R., 13, 1892.

A. That paper is in evidence, that is the paper calling for the project of expenditure.

Q. Look at S. R., page 169. (Handing the witness the book) What is that?

A. It is a letter to the Chief of Engineers, under date of

July 27, 1892, in which Capt. Carter submits his project for the expenditure of \$35,000 for the improvement of the Savannah river between Augusta and Savannah.

Q. Q. Look at S. R., 2, 1892.

A. That is a letter from the Chief of Engineers, dated August 3, 1892, approving the project for the Savannah river, Ga., between Savannah and Augusta.

Q. Look at S. R., page 225, what is that?

A. It is a letter from Capt. Carter to the Chief Clerk 692 of the War Department, inclosing a copy of the advertisement, inviting proposals for repairing and constructing wing dams and shore protection in the Savannah river below Augusta, Ga., and requesting authority to publish the same in the following official newspapers: 3 insertions in Chronicle, Augusta, Ga.; 3 insertions in Morning News, Savannah, Ga.; 1 insertion in Engineering Record, N. Y., and 1 insertion in Engineering News, N. Y., and also requests authority to print 200 copies of accompanying specifications.

Q. What is the date, did you say?

A. May 19, 1893.

Q. Look at S. R., 5, 1893, (Here paper is produced by witness)

Judge-Advocate: I offer in evidence and read this communication:—

“United States Engineer Office,
Savannah, Ga., May 19, 1893.

“The Chief Clerk of the War Dept.,
Washington, D. C.

(Through Brig. Gen. Thomas L. Casey, Chief of Engineers, U. S. A., Washington, D. C., and Col. Wm. P. Craighill, Corps of Engrs. U. S. A., Div. Engineer, S E Division, Baltimore, Maryland)

Sir:

I inclose herewith a copy of an advertisement, inviting proposals for repairing and constructing wing dams and shore protection in the Savannah river, below Augusta, Georgia, and and request authority to publish the same in the following official newspapers:

- 3 Insertions in Chronicle, Augusta, Ga.;
- 3 insertions in Morning News, Savannah, Ga.;
- 1 insertion in Engineering Record, New York, N. Y.;
- 1 insertion in Engineering News, New York, N. Y.;

I also request authority to print 200 copies of accompanying specifications.

Very respectfully,

Your obedient servant,

693

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.

(2 enclosures)."

1st—Indorsement.

"U. S. Engineer Office,

9 Pleasant St., Baltimore, Md. May 24, 1893.

Respectfully submitted to the Chief of Engineers and recommended for approval.

WM. P. CRAIGHILL,
Colonel Corps of Engineers U. S. A."

2d, Indorsement.

Office Chief of Engineers,

U. S. Army. May 25, 1893.

Respectfully forwarded to the Chief Clerk of the War Department, with recommendation that the authority within asked for be granted. The specifications have been amended in this office.

By command of Brig. Gen. Casey,

H. M. ADAMS,
Major Corps of Engineers."

3rd—Indorsement.

War Department,

June 1, 1893.

Approved

DANIEL S. LAMONT,
Secretary of War.

Note: Two printed slips of the advertisement to be furnished this office for file.

694

4th—Indorsement.

Office Chief of Engineers,

U. S. A.

June 1, 1893.

Respectfully returned to Capt. Carter, inviting attention to the foregoing indorsements.

THO. LINCOLN CASEY,
Brig. Gen. Chief of Engineers.

Inclosures 1 and 2 accompanying."

Judge Advocate: The subsequent indorsements on this communication have reference simply to the auditing payment of the charges for advertising.

Counsel for the accused: What does the indorsement show about being received back in Savannah?; or what date did they receive it:

Judge-Advocate: June 2d—, received back June 2, 1893; the day after Sect'y Lamont had approved it. The inclosure referred to is received here June 2, 1893, is this, (Reading)

“United States Engineer Office,
Savannah, Ga., May 19, 1893.

“Sealed proposals for repairing and constructing spur dams and shore protection in Savannah River, Georgia, will be received at this office until 12 m. city time, on the 19th—day of June, 1893, and then publicly opened. Specifications, blank forms, and all available information will be furnished on application to this office.

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.”

The Court: What is the date of that?

Judge-Advocate: May 19, 1893, the same date as the communication from Savannah, asking for the authority to insert that advertisement in the papers named.

Judge-Advocate: S. R., page 230—“United States Engineer Office, Savannah, Ga., May 31, 1893.

General Casey, Chief of Engineers, Washington, D. C.
695 Authority to advertise for proposals improving Savannah River, below Augusta, was asked on May 19th. Please wire me if it has been granted.

CARTER,
Engineers.

Official Business.

Paid Gov. Rate.

Copy by mail.

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.”

Q. When did the first advertisement appear? Look at page 256.

A. June 4, in the Savannah Morning News.

Q. How many insertions?

A. Three insertions, June 4, 5 and 18, 1893.

Q. When did it appear in the Augusta Chronicle?

A. June 5, 6, and 18, 1893.

Q. When did it appear in the Engineering Record, New York, N. Y.?

A. June 10, 1893.

Q. And when in the Engineering News, New York, N. Y.?

A. The 8th, of June, 1893.

Q. The bids were to be opened on the 19th, of June?

A. Yes, sir.

Q. What was the date of the first issue of the specifications, S. R., page 235?

A. June 7, 1893.

Q. Look at at page 214 of the Savannah book,—read it.

A. (Reading)

“Savannah, Ga., March 10, 1893.

“Mr. A. J. Twiggs,

Post-Office Box 195, Augusta, Georgia.

Dear Sir:—

In reply to your letter of the eighth instant, I have the honor to state that the specifications for the work of improving the Savannah River, below Augusta, have not yet 696 been prepared.

Very respectfully yours,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.”

Q. S. R., 4, 1893 and S. R., 6, 1893,—give me both. (Here papers are handed to Judge-Advocate by witness) I offer in evidence, (Reading)

“A. J. Twiggs,

Consulting Engineer and General Contractor.

P. O. Box 195.

Augusta, Ga., Mar. 8, 1893.

“Cap. O. M. Carter,

U. S. Engineer,

Savannah, Ga.

Dear Sir:—

When do you think of letting the Savannah River work below Augusta? I am very anxious to get this work when it is let. I will be glad to bid on any river work or any small jobs that you may have in your district and beg that you put my name in your list for this class of work. With kind regards, &c.,

Yours very truly,

A. J. TWIGGS.”

A. J. Twiggs,
Consulting Engineer and General Contractor,
P. O. Box 195,

Augusta, Ga., June 6, 1893.

Cap. O. M. Carter,
U. S. Engineer,
Savannah, Ga.

"Dear Sir:—

Mr. Wheeler, a foreman for Gaynor, Green & Co., was here a few days ago and said the Sav. River work below Augusta would be let on the 17th. If you have the forms 697 for proposals ready, will you please send them to me. I am anxious to bid on the work. I wrote you several days ago, but as I have not heard from you, presume you are away.

Yours very truly,

A. J. TWIGGS."

Judge-Advocate: Page 235; I offer in evidence and read,
"United States Engineer Office,
Savannah, Ga., June 7, 1893.

Mr. A. J. Twiggs,
Post-Office Box 195, Augusta, Georgia.

Sir:

In answer to your letters of the first and sixth instants, I take pleasure in sending herewith one copy of the specifications for improving Savannah River, Georgia. Please consider the specifications carefully, and, if you desire to bid upon the work, notify me and I shall take pleasure in giving you all the available information concerning it and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid. By direction and during the absence of Capt. Carter.

Very respectfully,

Your obedient servant,

J. W. O. STERLY,
Chief Clerk.

(One enclosure)"

Judge-Advocate: Give me S. R., 7, 1893. (The paper is handed by witness) I offer in evidence and read from the same party,

“Augusta, Ga., June 10, 1893.

“Capt. O. M. Carter,
U. S. Engineers,
Savannah, Ga.

Dear Sir:—

698 Yours with one form for proposal for the improvement of Savannah river, received. Please send me the other two. I want to bid on the work.

Yours very truly,
A. J. TWIGGS.”

Judge-Advocate: Page 237. I read in evidence,
“United States Engineer Office,
Savannah, Ga., June 10, 1893.

“Mr. A. J. Twiggs,
Post-Office Box 195,
Augusta Georgia.

Sir:—

In compliance with request contained in your letter of the tenth instant, I send herewith two more copies of specifications for improving Savannah river, Georgia.

Very respectfully, ?

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.
C.

(Two inclosures.)”

Judge-Advocate: S. R. 8, 1893—(Reading)
“Charleston, S. C., June 10, 1893.

“Captain O. M. Carter,
Corps of Engineers, U. S. Army,
Savannah, Geo.

Dear Sir:

Please send me the specification and blank forms of proposal for repairing and constructing spur dams and shore protection in the Savannah river, Georgia, also specification and blank form for the removal of the wreck of the barque “Undine” now lying in Savannah Harbor, Ga.

Yours most obedient,

COLIN MCK. GRANT.
Charleston, S. C.”

699 Judge-Advocate: I offer in evidence the reply—(Reading)

“United States Engineer Office,
Savannah, Ga., June 14, 1893.

Mr. Colin McK. Grant,
Charleston, South Carolina.

Sir:

In answer to your letter of tenth instant, I send you herewith one copy of specifications for improving Savannah river, Georgia. Please consider the specifications carefully and if you desire to bid on the work, notify me and I shall take pleasure in giving you all the available information concerning it, and furnishing you with the two remaining copies of the specifications, necessary to enable you to submit your bid.

Verv respectfully,
Your obedient servant,

O. M. CARTER,
Capt Corps of Engineers U. S. A.

(One enclosure)”

Judge-Advocate: Whose writing is that Mr. Sterly, if you know, (referring to indorsements on letters to Colin McK. Grant)

A. Mr. Connolly's.

Q. Do you know that writing?

A. Yes, sir.

Judge-Advocate: (Reading the above) “One sent “Undine” sent June 10— one single S. R. sent June 14.” In the handwriting of Mr. Connolly, as the witness has testified, that is a memorandum in pencil on the letter. Look at S. R. 11, 1893. I read in evidence from the same party:—

“Charleston, S. C.,
June 15, 1893.

Captain O. M. Carter,
Corps of Engineer, U. S. A.
Savannah, Georgia.

“Dear Sir: Your letter to hand with one copy of proposal for improving Savannah River, Georgia. You will please send me the other two copies of blank proposal as I intend to bid for the work.

Yours most obedient,

COLIN McK. GRANT.”

Judge-Advocate: To which this response was made;—
(Reading)

“United States Engineer Office,
Savannah, Ga. June 17, 1893.

Mr. Colin McK. Grant,
Charleston, South Carolina.

Sir:

In compliance with your request of the fifteenth instant, I send you herewith two more copies of specifications for improving Savannah River, Georgia.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

(Two enclosures.)”

Judge-Advocate: Please enter on the record the fact that the letter from Colin McK. Grant, Charleston, S. C., bearing date of June 15, 1893, is stamped as received in the Engineer Office in Savannah, Ga., June 17, 1893, the same date the copies were sent.

Mr. Rose: It looks as if it was received on the 15th, and the reply was not sent for two days, as a matter of fact, it was sent the same day.

Judge-Advocate: It was briefed on the outside as having been written on June 17th,—that is apparently a clerical error.

Judge-Advocate: S. R. 9, 1893; this is a postal from Monroe, N. Y., and is as follows:

701 “Monroe, N. Y., June 10, '93.

“Dear Sir:—

Please send me plans and specifications for wing dams or any other work you may have by return mail and oblige,

Yours respectfully,

DAVID V. HOWELL,

Monroe, Orange County, New York.”

Judge-Advocate: Marked in pencil, “Sent one.”

Q. Whose handwriting is that, if you know.

A. Mr. Connolly's.

Judge-Advocate: Page 239; I offer this in evidence.

“United States Engineer Office,
Savannah, Ga., June 14, 1893.

“Mr. David V. Howell,

Monroe, Orange County, New York.

Sir:

In reply to your postal card of the 10th, instant, I send herewith one copy of specifications for improving Savannah

River, Georgia. Please consider the specifications carefully, and, if you desire to bid on the work, notify me and I shall take pleasure in giving you all the available information concerning it, and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

C.

(One enclosure.)"

Judge-Advocate: Look at page 242; I offer in evidence,
(Reading)

702

"United States Engineer Office,
Savannah, Ga., June 16, 1893.

Col. John F. Gaynor,

President The Atlantic Contracting Company,
84 Bay Street, Savannah, Georgia.

Sir:

I send you herewith in response to your oral request of this day, one set of specifications for constructing and repairing wing dams, and shore protection in Savannah river, near Augusta, Georgia.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

C.

(Three enclosures)"

Judge-Advocate: It appears from this abstract that five applicants received originally one copy of the specifications, two received one copy of the specifications, two received two additional copies, one received a full set of three, John F. Gaynor, President. That was on June 16th, three days before the bid was to be opened; the bids were to be opened June 19th.

Look at page 249 (Reading) I offer in evidence and read the following communication:

"United States Engineer Office,
Savannah, Ga., June 19, 1893.

Brig. Gen. Thomas L. Casey,

Chief of Engineers, U. S. A.

Washington, D. C.

General:

I have the honor to transmit herewith all proposals received for constructing and repairing wing dams and shore

protection in Savannah river, near Augusta, Georgia, and
703 to recommend the acceptance of the bid of Albert J.
Twiggs, of Augusta, Georgia, he being the lowest respon-
sible bidder.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.

(Four enclosures.)”

“Abstract of proposals for constructing and repairing wing
dams and short protection in the Savannah river, below Au-
gusta, Georgia., opened on June 19, 1893, by Capt. O. M. Car-
ter, Corps of Engineers, U. S. Army,

Number of Bidder	Name of Bidder. Residence.	Price for Mattresses Stone per cubic yrd.	Total
1	*Albert J. Twiggs Augusta, Ga.	\$0.74	\$12,520
2	The Atlantic Con- tract Company, John F. Gaynor, Pres- ident. New York N. Y.	0.87	12,825
3	**Colin McK Grant Charleston S.C.	1.00	17,100

Amount available, \$22,000.

*Bid recommended for acceptance, he being the lowest re-
sponsible bidder for the best and most suitable services.

**Informal Bid.

I hereby certify that the above Abstract of Proposals is cor-
rect.

O. M. CARTER,
Capt. Corps of Engrs. U. S. A.
Savannah, Ga., June 19, 1893.”

Judge-Advocate: That is a copy, gentlemen, of the ab-
stract.

Mr. Rose: No objection to it.

Judge-Advocate: No objection to it as the abstract?

Mr. Rose: None at all.

704 Judge-Advocate: I offer in evidence the three propos-
als referred to in the abstract just read. (To witness)
Look at those papers and if you can, identify them as from
the official record.

Witness: No. 1 is the proposal of Albert J. Twiggs for
the improvement of Savannah river, Georgia; No. 2 is the
proposal of The Atlantic Contracting Company, John F. Gay-

nor, President, for the improvement of Savannah river, Georgia; No. 3 is the proposal of Colin McK. Grant, for the improvement of Savannah river, Georgia. These are the articles of agreement, dated July 5, 1893, with Albert J. Twiggs of Augusta, Georgia, for repairing and constructing wing dams and shore protection in Savannah river, Georgia, this is the contractor's bond, \$20,000, of Albert J. Twiggs; this is the supplemental articles of agreement, entered into Nov. 6, 1893, between O. M. Carter, Capt. Corps of Engrs. U. S. A., of the one part and Albert J. Twiggs, Augusta, Ga., of the other part, for repairing and constructing wing dams and shore protection in Savannah river, Georgia; that is a copy of an extension granted of 14 days, Sept. 28, 1893, and this is a copy of an extension granted for 16 days, on October 26, 1893.

Judge-Advocate: The accused calls my attention to the fact that there was a clerical error in the abstract of proposals, forwarded by him to the Chief of Engineers,—that while he had placed above the column "Mattresses", that he should have put "Fascines",—that it is a clerical error and that only bids were called for fascines under this provision of the specifications, which I will read and have go on the record in connection with that statement. —(Reading)

"Fascines.—All fascines will be made of live brush, of cedar, water oak, myrtle, sweet gum or any other variety of wood approved by the Engineer Officer in charge. The fascines will be from twelve (12) to twenty (20) feet in length, and must be compressed tightly by an approved form of 705 choker, to a diameter of nine (9) inches at intervals of two (2) feet, where they must be bound firmly with wire or tarred rope of approved strength. The brush used shall be as straight and well trimmed as can be obtained; the fascines shall be carefully and thoroughly made and handled with care. They are to be placed in the works singly, or in mattresses, in such places, quantities and manner, as the Engineer Officer in charge may direct. When made into mattresses, the fascines will be packed together and secured by binding poles joined by ties of wire or tarred rope not more than two (2) feet apart, the form and dimensions of mattresses and the method of their construction to be such as the Engineer Officer in charge may approve. For measurement the fascines shall be piled on shore or on barges in such way as the Engineer Officer in charge may direct."

Judge-Advocate: I offer in evidence the proposals of the three parties named and call the attention of the Court to the fact that the proposals are to furnish seventy five hundred cubic yards more or less of fascines at seventy-four cents per cubic yard, is that satisfactory gentlemen?

Mr. Blair: Yes, sir.

Judge-Advocate: A copy of that will be attached to the record and marked Exhibit 51.

Judge-Advocate: The proposal of The Atlantic Contracting Company, John F. Gaynor, President,—a copy of this will be attached to the record and marked, Exhibit 52. The proposal of Colin McK. Grant, a copy of this will be attached to the record and marked, Exhibit 53, and also the contract entered into July 5, 1893, between O. M. Carter, Capt. Corps of Engrs. U. S. A. of the one part and Albert J. Twiggs, Augusta, Ga., of the other part, for repairing and constructing wing dams and shore protection in Savannah river, Ga.,—a copy of this will be attached to the record and marked, Exhibit 54.

Judge-Advocate: I read, "Subject: Extension of time, contract of A. J. Twiggs.—

706

"United States Engineer Office,
Savannah, Ga., Sept. 26, 1893.

Brig. Gen. Thomas L. Casey,
Chief of Engrs., U. S. A.,
Washington, D. C.

General:

The contractor for the Savannah River work, Mr. A. J. Twiggs, was delayed during the months of August and September, fourteen days, on account of high water, and I have the honor to recommend that the time for the completion of his contract be extended fourteen days, and that no deduction for the expenses of inspection and superintendence during such extension may be made.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs., U. S. A."

1st Indorsement.

Office Chief of Engineers, U. S. Army,
September 28, 1893.

Respectfully returned to Capt. Carter, Corps of Engineers,

approved. When such record as may be necessary has been made, this paper will be returned to this office.

By command of Brig. Gen. Casey.

(Inclo. 14 of 3028.

True copies,

THOS. TURTLE,
Major Corps of Engineers.

O. M. CARTER,
Capt. Corps of Engrs., U. S. A."

Judge-Advocate: (Reading)

707 Judge-Advocate: (Reading)

"Subject, Extension of A. J. Twiggs' contract, Savannah River Work.

United States Engineer Office,
Savannah, Ga., Oct. 23, 1893.

Brig. Gen. Thomas L. Casey,

Chief of Engineers, U. S. Army,
Washington, D. C.

General:

The contractor for the Savannah River work, Mr. Albert J. Twiggs, has asked for an extension of his contract for thirty days. On my recommendation the time for the completion of his contract was extended 14 days (See inclo. 14 of 3028). I have the honor to recommend that the time for the completion of his contract may be further extended 16 days, but that all expenses of inspection and superintendence during such inspection may be deducted from monies found to be due him, as provided in the specifications for the work.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs., U. S. A.

1st indorsement.

Office Chief of Engineers, U. S. Army,
October 26, 1893.

Respectfully returned to Capt. Carter, Corps of Engineers, approved. When such record as may be necessary, has been made, this paper will be returned to this office. By command of Brig. Gen. Casey,

THOS TURTLE,
Major Corps of Engineers.

Inclo. 15 of 3028.

True copies,

O. M. CARTER,
Capt. Corps. of Engrs., U. S. A."

708 Judge-Advocate: I also offer in evidence the supplemental articles of agreement entered into Nov. 6, 1893, between O. M. Carter, Capt. Corps of Engineers, U. S. A., of the one part, and Albert J. Twiggs, Augusta, Ga., of the other part, for repairing and constructing wing dams and shore protection in Savannah River, Ga. A copy of this will be attached to the record and marked Exhibit 55.

Mr. Rose: Will you get the original specifications that were sent to Washington, S. R., 5, 1893. It was stated in the indorsement of S. R. 5 that the specifications had been amended in the Chief of Engineer Office, as I recollect Col. Barr reading that.

Judge-Advocate: It was so stated.

Cross-Examination.

Questions by Mr. Rose.

Q. Will you be kind enough to find, if you can, in there, when that amendment was made? I will help you, if you will allow me. Is not that the amendment which I will read afterward, that was made in Washington, that interlineation in black ink?

A. I don't know, it resembled very much my handwriting.

Q. If it was your handwriting, it was not put in Washington by you?

A. No, its like this writing here (indicating)

Q. I am not as much an expert in your handwriting as you are yourself. In what papers were the advertisements directed to be made in that letter and how much in each paper?

A. Three times in the Chronicle, Augusta, Ga., three times in the Morning News, Savannah, Ga., once in the Engineering Record, New York, and one in the Engineering News, New York.

Q. That request was approved by the Department, was it not?

A. Yes, sir.

Q. In those papers and for the number of times you have mentioned in each paper?

A. Yes, sir.

709 Q. Was the advertisement printed in those papers and the number of times therein stated?

Judge-Advocate: I think the record shows it was, I read that it was in compliance with your request.

Mr. Rose: Just in that way. It wont do any harm to state it again.

Judge-Advocate: I have no objection.

Witness: Yes, sir.

Q. Was a copy of the proposed advertisement sent to Washington with that paper you have in your hand, as one of the inclosures?

A. Yes, sir.

Q. Did that come back to Savannah with the approval of the War Department?

A. Yes, sir.

Q. So that the advertisement so approved was the one actually published in the newspapers?

A. Yes, sir.

Q. You read or there was read a letter dated March the 10th, to A. J. Twiggs, in which it was stated that the specifications had not yet been prepared, do you remember that letter?

A. Yes, sir.

Q. That was true, was it not, at that time the specifications had not been prepared?

A. Yes, sir.

Q. This paper, S. R. 5, was received back in Savannah on what date?

A. The second of June.

Q. The second of June and the advertisements were put in the various papers immediately afterwards, were they not?

A. Yes, sir.

Q. In the first publication and the first issue after the date of their receipt here in Savananh?

710 A. Yes, sir.

Judge-Advocate: Was anything ever stated in the letter making the request, for authority to advertise, asking for approval of the form and substance of the advertisement?

Mr. Rose: Does not the letter show for itself?

Judge-Advocate: No, sir, it asks authority to publish.

Witness: The letter asks for authority to have the inclosed advertisement printed.

Judge-Advocate: Does it say anything about approving its form and substance?

A. No, sir.

By the Court: Besides the projects for expenditure which you have mentioned in your testimony, were there projects also prepared for the other works of Harbor and River Improvements in this district?

A. What other projects were there prepared?

By the Court: What different kinds of projects besides the projects for expenditure?

A. For the project of expenditure and how the work should be carried out.

By the Court: Well, preceding the project for expenditure, what project was prepared for any work? A project for expenditure is prepared immediately upon receipt of notice of an appropriation for work, is it not?

A. Yes, sir.

By the Court: Now, preceding all of those projects, was any other project prepared?

A. Yes, sir.

By the Court: What was that project for?

A. It was a project for the improvement of Savannah River.

By the Court: What did it state generally, what was its scope?

A. That I could not tell without having the records here.

711 By the Court: In general terms?

A. In general terms it provides for the improvement of the stream between Savannah and Augusta, at a certain cost and giving estimates of the quantities that would be needed.

By the Court: Quantities of what?

A. Quantities of materials that would be needed for building the dams.

By the Court: Did it state the general engineering method to be pursued in the improvement?

A. Yes, sir.

By the Court: Now, can you produce the projects for the improvement of Savannah River and Cumberland Sound, which were of force in 1896,—and in which the projects for expenditure were submitted and made and under which the expenditures were made?

A. Yes, sir.

By the Court: I would like to see those and see what they specified regarding the use of mattresses, the height to which

the mattress construction was to be carried in the break-water or jetty at the entrance to Cumberland Sound, and at the entrance to Savannah River.

Here the court at 1.30 o'clock p. m. took a recess to enable the witness to get the papers asked for.

Court met pursuant to recess at 1.55 o'clock p. m.

Present: All the members of the Court and the Judge-Advocate, the accused, his counsel and reporter, G. T. Cann, were also present.

JOHN W. O. STERLY, on the witness stand, testified as follows:

Witness: I brought all the papers over, Major, in which these projects were in operation, but as I am not an engineer, I cannot explain them.

By the Court: Have you the original projects?

A. I have the original projects.

712 By the Court: That was approved by the Chief of Engineers and the Secretary of War?

A. These are the printed copies.

By the President: That is the report of the Secretary of War?

A. The report of the Chief of Engineers.

By the President: The report of the Chief of Engineers and the Secretary of War?

A. Yes, sir.

By the Court: Is not the original copy, the original project on file in the office among the correspondence?

A. Yes, sir, I didn't know you wished the original copies.

By the Court: The printed copies as they appear in the annual report, are not always correctly and literally quoted from the original contract; they are simply outlined in general terms for the purpose of the annual report.

Mr. Blair: Perhaps Capt. Carter can tell from an inspection.

Judge-Advocate: You can get the original project?

A. Yes, sir.

By the Court: These are important projects of improvement; they are prepared sometimes by a Board of Engineers and sometimes by the local Engineer, approved by the Secretary of War, and under that general project of improve-

ment, all these improvements are made, and it is proper to know what the method, as outlined is.

Judge-Advocate: I think I understand what the member requires, and I will see that it is hunted up and brought before the Court.

Mr. Blair: We have it, if the Court please; is this what you desire, Major,—that that is marked in lead pencil. (Here Appendix M of the Annual Report of the Chief of Engineers for 1896 is handed to Major Stanton)

Major Stanton: That is the information I desire. This is for Cumberland Sound, I would like to see the same project for Savannah Harbor.

Judge-Advocate: Are you satisfied with seeing the printed report, or would you like the original paper.

Major Stanton: I am satisfied with this and desire to have it read.

Judge-Advocate: Do you desire to have it read, any part of it?

Major Stanton: I do.

Judge-Advocate: You have marked the parts you desire read?

Major Stanton: It is marked, as marked by Captain Carter.

Judge-Advocate: This is an abstract from the report of the Board of Engineers, dated Savannah, Ga., December 18, 1895, on page 1292 of Appendix M of the Annual Report of the Chief of Engineers for 1896, and the extract desired to be read is this;

By the Court: This regards what improvement?

Judge-Advocate: For the improvement of Cumberland Sound.

(Reading) "The following type of jetty is proposed: The foundation and apron courses should be of brush mattresses 100 feet in width and loaded with rip-rap stone. The ultimate jetty section should be composed of a foundation of brush mattresses, with a load consisting of a hearting of small stones covered with heavier stone. In going sea-ward the covering stone should increase in weight from 1,000 pounds to five tons as the low water depth increases from zero to twelve feet. Beyond that depth still heavier stone should be used. The side slopes should be as steep as such stone can stand. An ultimate crest width of ten feet at mean high water is sufficient:

Estimates:

425000 sq. yds, brush mattresses, at \$1 per sq. yd..	\$425,000
300000 cu. yds. of second class stone at \$3.25 per cu. yd.	\$975,000
125000 cu. yds. first class stone at \$6 per cu. yd.	\$750,000
Engineering and contingencies	\$200,000

Total\$2,350,000

714 Judge-Advocate: This report is signed by Peter C. Hains, Col. Corps of Engineers, Thomas H. Hanbury, Major Corps of Engineers, W. M. Black, Capt. Corps of Engineers, Frederic V. Abbot, Capt. Corps of Engineers, O. M. Carter, Capt. Corps of Engineers, Harry Burgess, Additional Second Lieutenant Corps of Engineers, Recorder and Brig. Gen. W. P. Craighill, Chief of Engineers, U. S. A., is the person to whom it is addressed. The accused desires in explanation of this that the charts shall be submitted to the Court, giving certain information when the chart is produced.

By the Court: I would like to inquire if that report is approved by the Chief of Engineers and the Secretary of War.

Judge-Advocate: I presume that would in the original report; this is an appendix from which I read, and that is not referred to in the appendix.

By the Court: The report has no force until it has received such approval, therefore, the original would be better.

Judge-Advocate: In that view I will have the original produced at our session tomorrow morning.

By the Court: And the same information regarding the mouth of the Savannah River.

Mr. Rose: The Savannah Harbor, Major.

Here the court at 2.5 p. m. o'clock adjourned until tomorrow morning Jan. 29th—at 11 o'clock a. m.

THOMAS F. BARR,
Col. & Asst. Judge Adv. Genl., Judge Advocate.

Supreme Court of the United States

No.

THE UNITED STATES OF AMERICA,

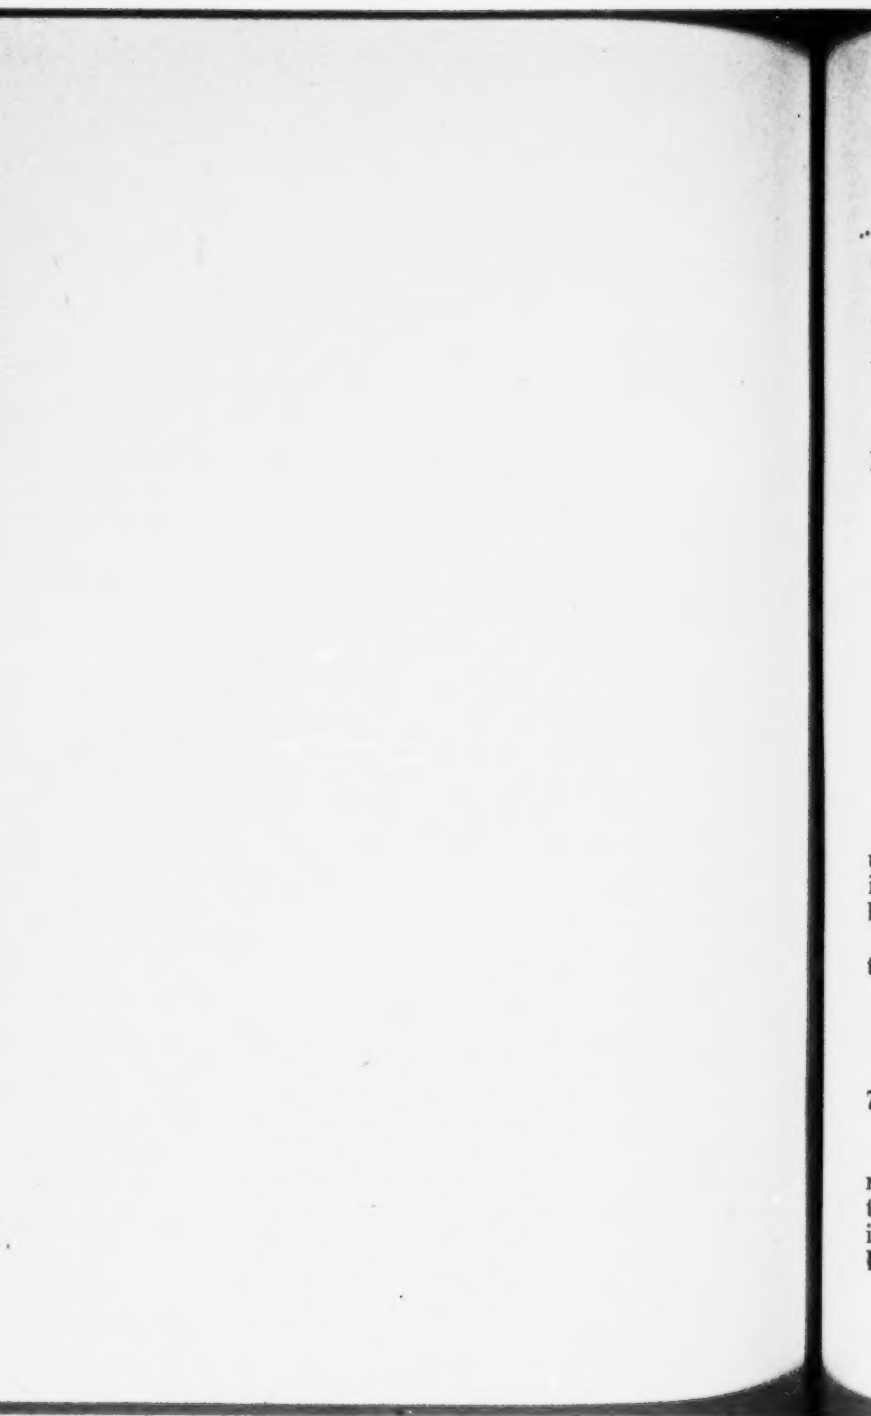

Appellants,

vs.

**OBERLIN M. CARTER, LORENZO D. CARTER, I. STAN-
TON CARTER, HORACE G. STONE, NATHANIEL
C. SEARS, THE INTERNATIONAL AUDIT COM-
PANY, ROBERT NELSON, AND LYMAN E.
COOLEY,**

Appellees.

Appeal from the Circuit Court of Appeals of the United States for
the Seventh Circuit.

5

United States Court Room,
Savannah, Ga.,
January 29th, 1898.

Court met pursuant to its adjournment of yesterday at seven o'clock a. m.

President: All the members of the Court and the Judge-Advocate.

The accused, his counsel, and the Reporter, W. O. Tarver, are also present.

The President: The Court will come to order.

ELBRIDGE R. CONANT, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Elbridge R. Conant.

Q. What is your place of residence?

A. Savannah, Ga.

Q. What is your profession?

A. Civil Engineer.

Q. Where did you graduate?

A. Massachusetts School of Technology, Boston.

Q. In what class?

A. 1889. I wish to modify that in this: I was not a graduate. I never took a full course there, but a special course in engineering, intending to resume my studies another year, but didn't go back.

Q. You have been in the service of the United States in an engineering district?

A. Yes, sir.

Q. When were you first so employed?

A. October 10, 1892.

Q. By whom?

A. By Capt. O. M. Carter.

Q. What was the nature of your first employment?

A. As a surveyor on work at Cumberland Sound, Ga. The nature of the work was instrumentally in locating mattresses that were sunk, in locating ranges, setting tide gauges, and acting in the capacity of Inspector when called upon by Mr. Carter, who was in charge of that work.

Q. You were at times, then, performnig the duty of an Inspector?

A. Yes, sir; rather infrequently, because he was on the ground nearly all the time.

Q. When acting as Inspector, you became familiar with what details of the work?

A. With more especially the sinking of the mattresses,—placing them on the range, so as to have the correct alignment, and in seeing that the stone deposited on them was placed on the mats, and that they were sunk in the proper shape.

Q. Did your duties as Inspector lead you to consider any other proposition than that they were properly sunk?

A. I can hardly say that I was called upon to inspect otherwise. The material, as a general thing, was inspected previous to its going into the work by Mr. Felber himself.

Q. That is as to the construction of the mattress.

A. Yes, sir.

Q. They had been inspected before you saw them?

A. I had seen them, but I would not consider myself that I was an inspector of the construction of the mattresses.

Q. You then inspected them as proper mattresses when they were sunk if you had anything to do with passing upon them at all?

A. Yes, sir.

Q. You knew the way they were constructed?

A. Yes, sir.

Q. You knew how the fascines of which they were built were made up?

A. Yes, sir.

Q. Describe one of those fascines.

717 A. I made frequent visits to what is called the brush camp where the fascines were made, in order to take the time or the number of men employed by the contractor, and, in that way, familiarized myself with the construction of fascines. The method was this: A squad of men would cut down brush, lop the limbs from trees, or obtain the same in either way; then another squad would take this brush, and place it on racks similar to several saw-horses placed in line; then perhaps the same party, or another, would take the choker and bind this brush together, and, at the same time, when it was held taut, wrap around it either wire or twine or cord, which, however, was employed in so doing in the case there, if my memory is correct, was the,—I cannot

give it the correct name,—but a tarred yarn, or something similar, of such strength that it would hold them together.

Q. Do you remember how far apart this yarn was?

A. No, sir; I do not. This being so long ago, and that being my first experience with the work, I cannot say whether it was tied at two foot intervals or three foot intervals.

Q. Can you remember about the diameter of the fascine after it was constructed?

A. My impression is that the diameter of the fascine, when delivered preparatory to putting it into the mattress, would be about nine inches; some would be more than nine inches, undoubtedly; some might be less,—I dare say would. The average diameter of these fascines was about nine inches to the best of my memory.

Q. Of what were they constructed?

A. They were constructed—You mean the special kind of brush?

Q. The material?

A. The material was brush. Much of it was cut directly as it grew. Some of it might have been lopped from trees; that is, the limbs from trees cut. It was an aggregation of brush.

Q. The brush, just as it was cut, was put on these horse and choked?

A. As a general thing, I consider that this brush was put in the fascine as it was cut. I dare say, in some instances where limbs protruded to make it very rough, they were lopped off, but the brush I may say was put into the fascines in its entirety.

Q. Where were you next employed?

A. I was next employed at Jekyl Creek, near Brunswick, Ga., on a small contract.

Q. Whose contract was that?

A. I think it was Mr. E. J. Gaynor's, Mr. Edward Gaynor.

Q. Who had the contract at Fernandina where you had been employed?

A. The same gentleman.

Q. Had his work there been completed?

A. Yes, sir.

Q. You were there as Inspector or what?

A. When I went to Jekyl Creek I was inspector. At Cumberland Sound, my rank was surveyer. I was in charge of the Jekyl Creek work while I staid there. From there, as you

asked me, I went as Inspector on one of the dredge boats on the Savannah River.

Q. Where next?

A. My next employment was at Augusta, Ga.

Q. Do you remember about the time you went there?

A. August 2, 1893.

Q. Under what instructions?

A. Under instructions from Capt. O. M. Carter.

Q. Were those instructions written or oral?

A. I had both, both written and oral.

Q. Have you with you the written instruction that he gave you?

A. No, sir; I have not.

Q. What has become of them?

A. The instructions that I received, along with other memoranda, was destroyed on the completion of the work. I turned over such as the office called for, and destroyed the rest.

Q. (Handing witness letter book) Read that, just to identify it. Are those the instructions given you?

A. Yes, sir.

719 Judge-Advocate: I offer in evidence and read from page 2634, letter-book, Improving Savannah River, Georgia, the following:

“Subject: Instructions for Mr. E. R. Conant, Inspector.

“U. S. Engineer Office.

“Savannah, Ga., August 2nd, 1893.

“Assume summer low water as 5.5 on bridge gauge.

“Remove all rock and fascines from old dams in channel
“at Blue House bar; rock to be piled up on barges for measurement; fascines to be bound for measurement, or estimated as in such condition. Fascines must be of two
“lengths, twelve feet and twenty feet. All others must be
“rejected. The brush must be free from limbs and choked
“absolutely tight at 2' intervals or less. If this is not done,
“fascines will be rejected.

“Each fascine must be staked to bank by four stakes 3" in
“diameter at small end, and 6' long for bottom layer, and
“one foot additional length for each extra course. These
“stakes must be driven down to their full length and flush
“with fascines.

“All rock must be placed in work by hand or pitched. The smallest face for any stone to measure 4".

“The contractor will provide all gauges, ranges, etc., as

"well as labor to set them. Banks must be carefully cut to
 "a slope of at least 1 to 1½ where shore protection is used.
 "This must be uniform.

"O. M. CARTER,
 "Capt. Corps Engineers U. S. A."

Q. What additional instructions did you have?

A. Besides these instructions, I was given a copy of the specifications and Capt. Carter, went over these specifications with me en route to Augusta,—and I think on the same date, that or the 3rd of August,—and explained to me 720 several of the paragraphs, if not all in the specifications, telling me what he desired, and explaining them in perhaps a little more detailed order than you have read.

Q. What did he state that he desired?

A. He stated that the work before this had been badly damaged by heavy freshets, and that demanded my instructions to be carried out and the specifications to be carried out in full on that contract.

Q. Did you examine the specifications carefully?

A. I did, sir.

Q. I will ask you if in connection with this letter of instructions fro Capt. Carter, you considered the specifications in relation to the character of stakes to be used? I ask if your attention was ever directed to that feature of the specifications in relation to the use of stakes?

A. I don't remember of such, but I do remember of this statement in my orders—instructions—I cannot remember of this being brought up, this particular feature of the stakes.

Q. That never, then, attracted your attention?

A. I cannot say now that it did. It might have at the time, but I don't recall that.

Q. You were governed in your actions by the instructions you had received from Capt. Carter?

A. Yes, sir.

Judge-Advocate: I offer in evidence, or rather, as it is already in evidence, I will read in this connection the following from the specifications: "When laid in shoal water, or "when required by the Engineer Officer in charge, the fascines will be fastened to the ground by stakes. There will "be, when stakes are used, at least two stakes for each fascine, or for each foot in length of mattress. These stakes "shall be at least five feet long for bottom layers and 721 "six feet long for any upper layer, and must be driven "until their heads are flush with the brush."

I read also paragraph "38. Fascines.—All fascines will be "made of live brush of cedar, water oak, myrtle, sweet-gum or "any other variety of wood approved by the Engineer Officer "in charge. The fascines will be from twelve (12) to twenty "(20) feet in length, and must be compressed tightly by an "approved form of choker, to a diameter of nine (9) inches "at intervals of two (2) feet, where they must be bound "firmly with wire or tarred rope of approved strength. The "brush used shall be as straight and well trimmed as can be "obtained; the fascines shall be carefully and thoroughly "made and handled with care. They are to be placed in "the work singly, or in mattresses, in such places, quantities "and manner, as the Engineer Officer in charge may direct. "When made into mattresses the fascines will be packed "together and secured by binding poles joined by ties of "wire or tarred rope not more than two feet apart. The "form and dimensions of mattresses and the method of their "construction to be such as the Engineer Officer in charge "may approve. For measurement the fascines shall be piled "on shore or on barges in such way as the Engineer Officer "in charge may direct."

Q. Now, as to the stakes driven, you were governed in your superintendence of the performance of that contract by these written instructions?

A. Yes, sir.

Q. And your demand of the contractor was a compliance with these instructions, as you understood them?

A. I cannot say that my demand of these instructions was entirely carried out. At first I did demand such to be
722 carried out, but circumstances were such that it was impossible in certain portions of the work to drive the stakes into the ground at the length specified there. The heads would become mashed before they would be driven to their entire length. Where they could be driven, and the ground was sufficiently soft, or comparatively soft, they were driven to their full length. In certain sections, where the ground was very hard, they were not driven to their full length.

Q. On account of the hardness of the earth?

A. Yes, sir; it was a clay bank.

Q. This was on the shore protection?

A. On the shore protection of the works.

Q. Did Capt. Carter frequently inspect the works while you were in charge?

A. Yes, sir.

Q. Did he give any instructions in regard to these stakes?

A. Yes, sir.

Q. What instructions?

A. I called his attention to the difficulty in driving the stakes as he required. This was when we were first starting that work, and he could not agree with me exactly; he thought that it could be done, and I remember in his remarks, of his mentioning the possibility of getting a hand pile driver and driving them if they could not be driven with a maul, but this was never put into operation. Where they were driven by mauls, they were only driven to such depth as they could be.

Q. Were they then made flush with the surface?

A. Not in every case.

Q. Were any instructions given as to making them flush with the surface?

A. Instructions are there printed. If it had been possible to drive them the full length, I should have demanded it, 723 but not being able to drive these stakes to the full length instead of chopping off the top, which was sometimes but not always done, we left a projection of six or eight inches above the surface, which I considered of benefit to the work.

Q. To that extent you exercised your own judgment?

A. I exercised my judgment, but called Capt. Carter's attention to the fact that I had exercised my judgment.

Q. You saw the first fascines constructed there?

A. Yes, sir.

Q. Where did you see them?

A. I saw them at the brush camp which was then situated about five miles below the City of Augusta, in close proximity to the work. Capt. Carter visited this brush camp on his first visit to Augusta, and I was with him at the time.

Q. That was your first visit?

A. Yes, sir, my first visit—the first day I arrived in Augusta.

Q. Were any fascines completed and ready for use?

A. There were some.

Q. How many?

A. To the best of my memory, a few; perhaps 75 or 100; perhaps only 50.

Q. Who was in charge of the laborers in constructing them, do you know?

A. I cannot remember. It is my impression they were all colored,—to the best of my memory.

Q. The Foreman and laborers?

A. Yes, sir, to the best of my memory.

Q. Do you remember how many were engaged in the work?

A. That day, I do not remember, but after that, from the time I assumed charge, I kept a general record of the number of employees, and made a ten-days return of such to the Office.

724 Q. Compared with the fascines with which you had been familiar, how did these fascines appear to you that you saw there?

A. The fascines that I saw on my first visit; I remember this, that at the time I understood that the contractor had a wrong idea of what was required in the way of fascines. It seemed that he thought it best to get a large amount of fine material and tie that together, instead of getting much wooded material, in the fascine. Now that was the fascine I saw on my first day. It was of a finer character than the fascines I had been used to on previous work.

Q. A better fascine than you had seen at Fernandina?

A. No, sir; I cannot consider it such, because the material in it was different; it was nothing but fine twigs, instead of getting branches and wooded material, whereas, at Fernandina, it was the reverse; more wooded material than fine.

Q. How as to its being choked and tied?

A. I remember that it was choked and tied, but I cannot remember whether it was tied,—I cannot remember the spacing between the binders.

Q. Do you remember what was used to tie the brush with?

A. I do not. I do not remember whether it was wire, or whether it was the same character of string—lath twine.

Q. Was it compactly drawn together?

A. That I can only answer in this way: that they were bound together,—being such fine stuff, fine material which he was getting—I don't think it was bound together nearly as tight as what it would stand; to the best of my memory they had no chokers on the ground.

Q. You didn't see any?

A. I don't remember seeing any chokers.

Q. Did you go over the whole camp?

725 A. It was a very small space, perhaps a few hundred feet square, and very easy to see all that was going on.

Q. Capt. Carter was with you on that occasion?

A. Yes, sir.

Q. What did he say in regard to these fascines?

A. He said they were not of the character which he required—the character of brush.

Q. Well, what action did he take?

A. He either himself, or instructed the foreman in my presence, then and there the process or the kind of fascine that he required, and helped to partially make one, if not entirely. I think he partially made one right on the ground.

Q. You don't remember whether it was finished before you left the ground or not?

A. I don't think the implements were on the ground at that time to finish it.

Q. To finish the fascine as he required it constructed?

A. No, sir; not in its entirety.

Q. Had that reached the stage of tying before you left?

A. I don't remember.

Q. The model then, or partial model, which you saw constructed under his direction, remained your future guide?

A. Yes, sir, as to the character of the brush, and from this he explained the choking what was required, and the spacing of the binders. That would not be required to be shown me by verbal instructions; I could gain a sufficient knowledge of carrying it out from the specifications.

Q. Upon the fascines subsequently made, subject to your inspection,—how were they tied?

A. To the best of my memory, by wire, throughout the contract.

Q. From that time until the time the contract was 726 completed, the fascines were tied or fastened by wire?

A. Fastened by wire.

Q. While on duty there did you become familiar with other improvements that had been made on the Savannah River in the vicinity?

A. A portion of my work was the addition of material to certain portions to the work which had been formerly executed.

Q. The specifications have reference to old material found at those points; that it could be used again if there was a sufficient quantity?

A. That portion you refer to was a very small part of the contract. It was simply the removal of one or two portions of some spur dams which had been detached from the shore

by former freshets. These I undertook to remove, but found it better to leave them alone, so I dare say very few yards of material was removed from the old dams.

Q. You found no material, then, which could be made into new fascines?

A. No, sir; no material.

Q. How were the fascines, which Capt. Carter required, to be trimmed and choked?

A. I was ordered to trim, or have the brush trimmed, before its being placed into the fascines, in such cases where that was necessary.

Q. How much did you cause them to be trimmed?

A. The brush in that locality was such that a great deal of it needed no trimming; some did.

Q. You mean there was but little foliage on it?

A. But very little foliage; some if it was as straight as an arrow, and with but very little foliage on it. This small brush, or small trees could be cut down and just bound together as a bundle of rods. In other cases there was considerable to be trimmed.

Q. Does the wood of that section grow straighter and 727 with less foliage than the wood in this lower country?

A. Yes, sir.

Q. Very much?

A. Yes, sir; there are patches of it that grow much straighter than what I have seen in close proximity to any of the work around here.

Q. How far from Augusta was that locality?

A. Patches of the brush that I have spoken of can be found anywhere from four,—well, from two miles to six or eight or nine from the work: the bulk of it I should consider was brought to the work from a distance of perhaps five or six miles to the best of my memory.

Q. Now, what were the instructions as to choking?

A. My instructions were explicit on that point.

Q. You say your instructions upon that point were explicit: Were not all the instructions you received from the accused explicit?

A. In this regard,—perhaps in that point,—they were more explicit than in some of the other details of the work.

Q. As to choking they were markedly explicit?

A. Yes, sir.

Q. In what way?

A. I should like to refer to the written instructions, to

that paragraph referring to my orders. I believe it says absolutely tight. (Reading:) The brush must be free from limbs and choked absolutely tight.

Q. Was that ever especially called to your attention by the accused?

A. It was.

Q. Upon what occasions?

A. On his visits to the works and on my receiving first instructions.

Q. (Handing witness photograph) Can you tell me what that photograph is?

A. I should judge that was a portion of one of the 728 shore protections that had been constructed previous to my going to Augusta, on previous work. The locality and all would indicate that.

Q. There are landmarks that enable you to recognize it?

A. Being so very familiar with the location, I think there is sufficient contour there to enable me to say that I think that was a portion of one of the old Jetties; I have walked over that.

Q. You had walked over that when you were on duty up there?

A. Yes, sir.

Q. In what condition did you find it?

A. This was on the high bank, on high ground, perhaps twelve or fifteen feet above the average stage of the water, and the remains were as shown by the photograph at the time I saw it.

Q. And if this was taken at a subsequent date, it still fairly represents what you saw?

A. I think it does to the best of my memory.

Q. How much brush did you find left there under the stone?

A. Some brush.

Q. How much?

A. In proportion to what was placed in it?

Q. That I don't suppose you know?

A. I was going to say. There was brush left there, not a great deal, but the brush was perhaps an inch or an inch and a half in diameter, and the remains of the finer stuff either had decayed, or was not be seen.

Q. Was there brush enough to keep the stone above the surface of the earth?

A. I think that much of the stone rested on the earth; in

fact, much of the material had silted in so as to make the body of the work stone and earth.

729 Judge-Advocate: I offer this photograph in evidence, and it will be attached to, or accompany, the record, marked Exhibit No. 56.

Q. (Handing witness another photograph) If you recognize that, what is it? •

A. I recognize that as one of the spur dams which had been constructed previous to my work at Augusta.

Q. That is a fair representation of what it was at the time you saw it?

A. As near as a photograph will show it, I think it is.

Q. In what condition did you find that?

A. The stone was very much displaced; there was some brush,—the larger sticks beneath the stones, and as you went into the bank on the high ground, much more would be left than at the outer end, which had been badly damaged by freshets.

Judge-Advocate: I offer this photograph in evidence, and it will accompany the record, marked Exhibit No. 57.

Q. (Handing the witness another photograph) What is that?

A. That is a similar spur, which I found about as represented here, on the work.

Q. How, as to quantity of brush or mattresses, you found beneath the stone?

A. About the same in all cases; the same in this as in the other. Some of the branches are shown here. I don't know the date of this photograph being taken. There might have been more brush at the time I saw it than at the time the photograph was taken. I don't know the length of time that has elapsed, but the general appearance of the brush was mainly—

Q. I show you that, not to show the condition of the work, but mainly for you to recognize the work, and want to know in what condition you found it at the time you were there
730 Is that an unfair representation of what you saw?

A. I don't consider it such.

Judge-Advocate: I offer this photograph in evidence, and it will be attached to the record, marked Exhibit No. 58.

Q. I hand you another photograph: What is that?

A. That is a spur, or shore protection. It is so near the bank that I would hardly know which to designate it. That I constructed under orders from Capt. Carter, in 1893 or 1894.

Q. That was constructed under your supervision, then?

A. Yes, sir.

Q. By Mr. Twiggs?

A. By Mr. Twiggs.

Q. Under that contract?

A. Yes, sir.

Q. Do you see any stakes driven there?

A. I do, sir.

Judge-Advocate: I offer this photograph in evidence, and it will accompany the record, marked Exhibit No. 59.

Q. I hand you another photograph: What is that?

A. That is a similar spur which was constructed by Mr. Twiggs, under my supervision.

Q. Do you see the stakes there?

A. In this case, I do not see the appearance of stakes. I see perhaps what might be one.

Q. (Handing witness magnifying glass) Will you take the glass and look at it?

A. I am quite sure that the spur was constructed in this way: The mattresses were made and sunk at a higher stage of water than is represented there; in that case it was sewed together by poles, and did not require stakes.

731 Q. Did not require stakes. You see no stakes there with the glass?

A. I see what might be one stake at the corner, that might be driven for the purpose of holding the mattress down as it was being placed.

Q. This is a good photograph of your completed work?

A. Yes, sir.

Judge-Advocate: I offer this photograph in evidence, and it will accompany the record, marked Exhibit No. 60.

Q. I hand you another photograph: What is that?

A: This is another spur, which was constructed by Mr. Twiggs, under my supervision.

Q. That is completed work?

A. Completed work. Perhaps I should mention, that having constructed so many of those spurs, I cannot identify some of them as being entirely new. Much of the work done by me in 1893 and 1894 was the repairing of old spurs, and I cannot say whether that spur there is one of the old ones repaired by placing new material on top of it, or whether it was built entirely new.

Q. I want you to testify whether that is a good sample of the completed work as accepted and finally paid for?

A. Yes, sir.

Judge-Advocate: I offer this photograph in evidence, and it will accompany the record, marked Exhibit No. 61.

Q. Can you identify that photograph which I hand you?

A. Yes, sir; a similar spur constructed by Mr. Twiggs, under my supervision.

Q. That is work accepted by your finally as completed?

A. Yes, sir.

Q. And a good photograph of it?

A. Yes, sir. I would call your attention to the fact that some of the stone, from the time the work was done until 732 the time this photograph was taken, has been brushed about some.

Q. Is it a fair representation?

A. In general, a fair representation. If the photograph had been taken at the time the work was completed, the stone, in some instances would show more regular.

Judge-Advocate: I offer this photograph in evidence, and it will accompany the record, marked Exhibit No. 62.

Q. I hand you another photograph: What is that?

A. That is a portion of shore protections constructed by Mr. Twiggs, under my supervision.

Q. Completed work?

A. Completed work, yes, sir.

Q. How about the stakes used there?

A. The stakes show.

Q. How many?

A. I can see a large number, perhaps six or a dozen, or perhaps more by taking the glass.

Q. From your knowledge of the locality, about how closely are the stakes driven?

A. The stakes were driven—Here again I am not certain, but in the twelve-foot fascines, two stakes were required for each fascine. In the twenty-foot fascines, I think four stakes were required for each fascine. That would have to be verified by a visit to the ground, and seeing the stakes; I don't remember.

Q. Your instructions were that each fascine must be staked to the bank by four stakes three inches in diameter at the small end, etc.; you complied with those instructions as to the number of stakes required

A. I think that must have been modified to some extent in

that in the short fascines two were required, and in the longer fascines four were required.

733 Judge-Advocate: I offer this photograph in evidence, and it will be attached to the record, marked Exhibit No.

63. Q. I call your attention again to Exhibit No. 56, the first photograph shown you: What do you find there on the surface?

A. The photograph shows a deposit of bricks, or portions of brick, on that portion of the shore protection.

Q. Whole bricks?

A. The indications are that some of them are whole, but more broken; most of them broken bricks.

Q. You remember having seen that?

A. I do remember of seeing that in one or two instances there.

Q. And you saw one of the old improvements, or place where improvements had been made, where the ballast used was of that character?

A. Yes, sir.

Q. Was there any delay in fulfilling the terms of this contract?

A. Yes, sir.

Q. What caused it?

A. The cause of the delay to some extent was due to very high water—freshets in the river. In other respects, I considered that the delay in the work was due to an insufficient force of employees on the part of the contractor.

Q. How early in the attempted execution of the contract was there a delay caused by freshets?

A. I should have to refer to my journals, or to data in the office for that; I don't remember. Some time previous to the time limit of the contract.

Q. Would you like to refresh your memory upon that point?

A. As to how nearly the completion—

Q. No; how early in the attempted execution of the contract was delay caused by freshets?

734 A. To the best of memory, when it was about half completed, or should have been about half completed, somewhere in September or October.

Q. How long after the beginning of work on the contract?

A. I am uncertain as to that: I could not make a reply.

Q. Have you any means of ascertaining that fact?

A. Yes, sir.

Q. What are they?

A. I have a journal which I could refer to.

Q. Have you it with you?

A. I have not.

Q. Where is it?

A. It is in the office of the Engineer.

Q. Here in Savannah?

A. In Savannah; yes, sir; on file with my other note-books of that work.

Q. Your turned it into the office with other papers and books?

A. Yes, sir.

Q. Will you designate it so I can send for it?

A. I can give a message where it can be found, I am sure. (At this point, the Court took a recess of ten minutes, for the witness to send after the books referred to.)

Q. You are now ready to answer; what is your answer?

A. I will refer to the daily journal kept by me on the work, and from time to time give the delays caused by excessive high water.

Q. Take the first thirty days of the work upon the improvement?

A. My first entry is on August 15th: River rises to 12 1/2 feet, so work is somewhat delayed. August 16th, river still high; no work was done sinking mats.

Q. What date was that last?

A. 15th and 16 of August.

Q. What date did the work under the contract begin?

735 A. I went there August 2nd or August 3rd, and the contractor had made some fascines. Active work did not start until about the 8th or 9th of August; that is, the putting of material into place.

Q. But he had done simply preparatory work?

A. Yes, sir; previous.

Q. Now, without stating each entry in your book, will you ascertain from it how many days in the first thirty days after work under the contract was commenced,—not preparatory work, but actual work under the contract,—how many days was the contractor prevented from working by high water, or other causes, outside of his own neglect?

A. You ask, as I understand it, in the first thirty days?

Q. Yes; take the first thirty days and aggregate the delays.

A. I should consider a fair estimate of about six or seven working days.

Q. Not a fair estimate, but I want the actual statement?

A. It was this way: When the river was only at a depth of perhaps eight or ten feet certain work could be done on shore protection, whereas, the sinking of mats could not be carried on at that depth. I considered the river high when it reached, perhaps, a height of fifteen or twenty feet necessitating, for the time being, not putting any material into place. I have the account—a report on the delay caused by the excessive high water.

Q. That shows the number of days' delay caused by high water during the first thirty days when work was being done under the contract?

A. My report would include, not the first thirty days, but up to the time the contract expired, which I don't remember.

Q. Your report covered the entire work from its first stages to its completion?

A. No, sir; to the time it should have been completed 736 by the terms of the contract; some time in—I don't remember the date—October or November possibly.

Q. You made a report, then, on the date when the contract should have been completed?

A. Yes, sir; about that time. I was asked by Capt. Carter to make a report, giving the number of days the contractor could not work due to excessive, high water.

Q. Do you remember the date when the contract expired?

A. No, sir; I do not.

Q. Had that date expired when Capt. Carter instructed you to make a report upon it?

A. That would have to be looked up in the correspondence; I don't remember. I believe it was before the completion of the contract, because he asked for an extension of time for those days, which, to the best of my memory, was fourteen days.

Q. Then, up to that date, there had been fourteen days' delay?

A. Yes, sir.

Q. Your reports showed that?

A. Yes, sir.

Q. And you don't know how much of that delay was in the first thirty days?

A. I will check myself on the six or seven days I gave you before.

Q. Yes, give us the whole of it: What is your answer?

A. I considered August 10th the first day that work commenced; that is, material was put into place. From August 10th to September 10th, I find eight days upon which the water was—upon which there was very little work done, due to excessive high water.

Q. What progress had been made up to the time the work was stopped by the high water?

A. Very small. Very poor progress; only one-third
737 of the work, or less, had been done that should have been done at the expiration of the contract.

Q. Yes, but taking out that time, necessarily you would have to deduct in determining what proportion of the work had been done?

A. Yes, sir.

Q. Now, deducting that time, how had the work progressed?

A. I should have to refer to my progress book, which I have among these (books previously referred to) which will show just the amount of work done at that date, and the total amount of work to be done.

Q. Do you know how many fascines had been put in place during that thirty days?

A. I can tell you in a moment; I have it in one of these books.

Q. I wish you would?

A. 674.67 cubic yards of fascines from August 10th to September 9th inclusive.

Q. Well, how many working days had that made?

A. The number of working days, excuse me for asking, that material was placed in the work?

Q. The number of working days not interfered with by high water?

A. I am not sure of Sundays,—twenty-one or twenty-two days—eighteen working days. I was not positive of one Sunday coming in.

Q. How much rock had he put in place?

A. 408.33 cubic yards.

Q. Now, as compared with the entire number of cubic yards of mattress, and the amount of stone that would have been completed in the sixty-one days, how would that be as fair progress of work?

A. I will ask to see the total amount which was supposed to have been put in that is given in the specifications.

Q. 7500 cubic yards of fascines, more or less, and 4000 cubic yards of rip-rap stone, more or less.

738 A. Considering sixty-one days as the time in which all the work, 7500 cubic yards of fascines and 4000 cubic yards of stone, should have gone into the work, in this eighteen days, to have completed the contract on time, he should have put into the work about 2200 cubic yards of fascines and about 1180 cubic yards of stone as against 674 and a fraction yards of fascines and 804 cubic yards of stone.

Q. Now, how large a force had he engaged on the fascine work?

A. Entry in my journal August 10th, 14 men in woods; entry August 12th, brush camp, 14 men. Of course this is not exact; it is as near as I could ascertain.

Q. It is your official estimate, however?

A. Yes, sir. August 17th, 24 men in woods; September 8th, I have an entry of only two men in the woods.

Q. You know what kind of day September 8th was, do you?

A. Fair weather and water favorable.

Q. On September 2nd?

A. September 8th.

Q. The date that there were two men in the woods?

A. Two men in the woods, yes, sir.

Q. Now, how many were employed where the work was going on?

A. September 6th, 10 men making mats, no mats sunk; August 17th, 12 men on the ways,—that is the same thing, constructing mattresses; August 12th, I have a memorandum force of men about as follows: Brush camp, 14; dams, 10, that is, on the work 10; quarry, 10.

Q. That will make 34 men employed, then, on that date?

A. Yes, sir.

Q. An unusually small number, aside from that two in the brush camp?

A. Some more; 1 steamer, 1 fireman, 1 engineer, three deck hands, 1 steamer drill at quarry, 3 barges, and 1 anchor; that would be embodied in my report for the ten days. I cannot give it from day to day; I will have to skip the dates.

Q. I wish to get a general idea; was there sufficient force to do the work that was to be done, working with reasonable speed?

A. No, sir; I don't consider that there was.

Q. There might have been a larger number employed?

A. Yes, sir.

Q. From the very beginning of the work?

A. Yes, sir.

Q. How many could have been employed to advantage?

A. I think twice that number could have been employed; they could have worked to advantage twice that number, or more. I could not say as to the distribution of the men in each place, but would give an estimate of about twice the number.

Q. That was with a view of completing the contract within the sixty days?

A. Yes, sir; with a view of completing the contract on time. This sixty days is just given to me for information now. I was not cognizant of the number of days.

Q. Did you make that calculation of sixty working days? It was from August 5th to October 5th that the contractor was given to do the work?

A. I think I called it sixty-one days.

Q. Now, it would have taken a pretty large force to have taken that contract up and completed it in sixty days, would it not?

A. Yes, sir; it certainly would.

Q. After the expiration of the date specified in the contract for its completion, what action was taken?

A. An extension was granted of, first, fourteen days; 740 and I remember also a second extension being granted of sixteen days. At the expiration of that time, a supplementary contract was made.

Q. This supplementary contract is in evidence already. (Handing witness paper:) That is the contract?

A. Yes, sir.

Q. This supplementary contract amends and modifies the original contract in certain particulars. Did Capt. Carter have an interview with you in relation to this supplemental contract and its requirements?

A. Yes, sir; after the contract was made. I had no interview with him concerning the articles of the supplemental contract, but after the contract was drawn up, I was told of it, and given orders to proceed in the matter.

Q. You were instructed as to the stipulations?

A. Yes, sir.

Q. What instructions did you then get from Capt. Carter?

A. I received instructions to allow the contractor to con-

time with his work as formerly; that the Government would get together such a plant as was necessary, and proceed to do a portion of the work, of the remaining work in connection with that done by the contractor; he was allowed to continue, and we did work by day labor; employed a plant to carry out that work.

Q. And any amount expended by you on behalf of the Government was to be deducted from the final payments made him under the contract?

A. Yes, sir; at cost.

Q. What work did you do; what operations did you direct?

A. On receipt of orders from Capt. Carter, I got such information as I could, as regards the purchase of stone, the getting together of a plant, the employment of hands, and then saw him and an agreement was made with the parties to furnish stone, and to go on with the work,—to employ day labor and to proceed immediately with work.

Q. It was only in relation to the stone work that you employed labor?

A. Entirely; the Government did that portion of the work independently of the contractor, with the exception that the contractor offered aid in such means as he could in the way of towing material from the camps and from the quarry to the works.

Q. Thereby saving an expenditure on the part of the Government?

A. Yes, sir.

Q. Did he do all that towing?

A. All the towing that was done at the Savannah River, near Augusta. The water is so low at times that we can pole barges back and forth without any other steam-power, or any other motive power, and in several instances I had his pole-men to pole lighters back and forth from the quarries to the work and from the brush camp to the work; otherwise I did not have any other vessel, tug, or means of getting the material to the work.

Q. Do you remember how much stone you put in place by day labor?

A. I can refer to the amount.

Q. Please do so.

A. (After referring to the records) I find that the first rock placed by the Government was on December 16th.

Q. Now, what was the total amount of rock placed from

December 16th to the time of the completion of the contract?

A. 1,590 cubic yards; 1,606 cubic yards, but there were a few,—17 yards,—deducted, which were not paid for by the Government.

Q. The Government paid for 1590 cubic yards of stone?

A. Yes, sir.

Q. At what price?

A. At \$1.50 per yard.

742 Q. At the quarry?

A. Delivered on barges at the quarry.

Q. By whom were those barges furnished?

A. The barge was furnished by the Government, built by Capt. Carter's order.

Q. Built by Capt. Carter's order for that particular purpose?

A. Yes, sir; for the purpose of conveying the stone and brush, and also fascines.

Q. Do you know the cost of that boat?

A. Yes, sir.

Q. How much was that?

A. Close to \$400.00; I can tell within one dollar or so. To the best of my memory, \$425.00 perhaps.

Q. Do you know how much of the cost of constructing that boat was charged to Mr. Twiggs, if any?

A. That I don't know. I think this barge was turned over to Mr. Twiggs at the completion of the contract; in fact, I am sure it was.

Q. So that it became his property?

A. Became his property.

Q. Now, from whom did you procure that stone?

A. I procured that stone from Mr. Reese of Augusta.

Q. Does he own the quarry?

A. No; the quarry was owned by another gentleman; he leased it.

Q. He was in possession of the quarry?

A. He was in possession of the quarry.

Q. How far from the work was that quarry?

A. A short distance; I can't remember; a mile or two; within a radius of one to three miles; not more than three, and not less than one mile.

743 Q. Was there any other quarry near that point?

A. Yes, sir; a quarry owned by Mr. Twiggs.

Q. How near to the quarry leased by Mr. Reese?

A. In close proximity; perhaps a quarter of a mile, or a little more.

Q. A quarter of a mile farther away, or a quarter of a mile nearer to the work?

A. I don't remember which was the closest to the works, the one owned by Mr. Twiggs or the one leased by Mr. Reese?

Q. Were the facilities equal for taking rock from the quarry owned by Mr. Twiggs as from that leased by Mr. Reese?

A. The same facilities.

Q. Why was not the rock taken from the quarry of Mr. Twiggs, the contractor?

A. By Capt. Carter's directions; his orders to us were to continue the work independently,—that is, to get material independent of Mr. Twiggs.

Q. He instructed you not to buy stone of Mr. Twiggs?

A. Yes, sir.

Q. Was there any other quarry except those two within a reasonable distance of where the work was going on?

A. No, sir; not to my knowledge.

Q. How far away would you have had to go for stone had there been competition?

A. I endeavored to get stone from Stone Mountain, from a company called I think the Blue Diamond Granite Company. There was at the hotel one of the managers of that Company at the time this stone was desired, and I had a conversation with him, hoping to get the stone.

Q. That stone would answer the requirements of the contract? It was of the same character as the quarries owned by Mr. Twiggs and Mr. Reese?

744 A. Yes, sir. I had not seen the stone, but being a granitic stone, I was satisfied it would be.

Q. That was the nearest stone from the work aside from the two quarries mentioned, within your knowledge?

A. To my knowledge. There might have been stone at a long distance, at Columbia, say, but the only opportunity I had of getting stone anywhere near the works was from these two quarries; I could get it far away. I made that a point to look up. I went to the various freight offices to see what rates could be made for the conveyance of the stone from distant quarries to the works, but I could not get satisfactory terms on account of the small amount, they said.

Q. You made an effort, however, to secure stone at as low a cost as possible?

A. Yes, sir.

Q. Where is Stone Mountain, where this blue granite is to be found?

A. It is, if I remember aright, 150 miles perhaps above Augusta. I think in the Northern part of Georgia.

Q. What were Capt. Carter's instructions to you in relation to the stone? State it as fully as you can.

A. As to the quality, or as to getting the stone?

Q. As to the party from whom it could be procured or not procured?

A. After going to the various freight offices, and after getting such data as I could, I had a personal interview with Capt. Carter, and he gave orders to me then to make this arrangement with Mr. Reese.

Q. He directed you to make the agreement with Mr. Reese: What did he say about Mr. Twiggs, the contractor?

A. He said he did not wish to enter into any agreement with Mr. Twiggs with regard to furnishing the stone.

Q. When you went out into the brush camp with Capt. Carter at Augusta, you say he instructed you how to make a fascine: Did he tell you the purpose for which the fascine was to be used, or enter into any explanation of why the fascine was constructed as he told you?

A. He did enter into a conversation in regard to the fascines.

Q. And what was that, in brief?

A. He told me that the work,—the up river work required a different class of fascines than the work on the harbor,—at the mouth of the river; that is, in the salt water and on the bars; that there he required a fascine which contained more wood and less fine material.

Q. You mean at Augusta?

A. At Augusta, yes, sir; more wood and less fine material.

Q. And the more wood and less fine material at Augusta was because the fascines there were mainly designed as shore protections, is that right?

A. As shore protection and also spur dams; especially for shore protection.

Q. And not primarily designed as silt gatherers, that is right?

A. Yes, sir; that is right.

Q. The fascines which you saw at Fernandina before you went to Augusta,—were you told that they were designed to be silt or sand gatherers, or did you know that?

A. I knew that, but I was also told that the purpose of these fascines which I had constructed under a previous contract at Fernandina were for the purpose of gathering the silt.

Q. You saw the fascines made in this engineering district after you left Augusta, didn't you?

A. Yes, sir.

Q. Down here in Savannah harbor?

746 A. I was not connected with the works in Savannah harbor at all after leaving Augusta.

Q. You saw at Jekyl Creek in 1894—?

A. Yes, sir; in 1895.

Q. Then did you see them at Cumberland Sound?

A. Yes, sir.

Q. After the Augusta work?

A. Yes, sir.

Q. The fascines constructed in 1895 at Jekyl Creek, which you saw, and those which you saw afterwards at Cumberland Sound, were designed as silt gatherers, were they not?

A. It was explained to me that they were for that purpose.

Q. And were made with more brush and fine stuff than the fascines at Augusta?

A. Yes, sir.

Q. You received another order about the fascines at Augusta, did you not?

A. Yes, sir.

Q. After the first order of date of August 2nd, 1893?

A. Yes, sir.

Q. If you will kindly look at page 281 of letter press book S. R. 1893, which I now hand you; I will ask you if you received that letter of instructions from Capt. Carter?

A. I did, sir.

Mr. Blair: I will read the first paragraph of this letter?

"Memo. for Mr. E. R. Conant, Inspector.

U. S. Engineer Office,

"Savannah, Ga., October 25th, 1893.

"For those mattresses resting directly on the bottom, fas-

"cines of slightly lower grade than those now used, and

747 "containing a small amount of brush, may be employed.

"For all courses above the bottom ones, the same char-

“acter of fascines now used will be employed.” The rest of the letter does not relate to fascines.

Q. You spoke of the fascines at Augusta being fastened with wire binders and not with tarred rope?

A. Yes, sir.

Q. Do you know the reason of that?

A. That was explained to me at the time. I have a recollection of having a conversation with Capt. Carter in regard to the wire and in regard to the rope. I think it was this: That in the fresh water the wire would last very much longer than this tarred rope, and that was the reason he desired or ordered wire to be used up there instead of the rope.

Q. And in the salt water work which you did or saw, the fascines were, as a rule, bound with tarred rope, were they not?

A. As a rule on the work I have been on, it was.

Q. On the salt water work?

A. On the salt water work.

Q. As a matter of fact, the tarred rope or lath yarn in salt water lasts better than wire, does it not?

A. In the work that I was on sanding up took place so quickly over the mattresses, that it was immaterial whether it was wire or tarred rope; that is, after it was one in place and imbedded in the sand.

Q. It made no difference whatever whether it had binders at all after it became sanded up?

A. I think in most of the improvements that I was on this was the case.

Q. After the mattress sanded up, it made no difference whether it was wire or rope—made no difference whether it was bound at all, or not?

748 A. I am sure wire would last but a short time in salt water. As to its lasting longer than tarred rope, I don't know.

Q. You don't know of your own knowledge?

A. No.

Q. You are familiar with the character of the brush in the vicinity of Fernandina and Savannah harbor, in a general way?

A. Especially in Fernandina.

Q. And you said in your direct examination that the character of the brush at Augusta, that the brush at Augusta is straighter, and freer from small branches than the brush at Fernandina?

A. Such can be obtained at Augusta.

Q. Easily obtained?

A. Comparatively so.

Q. Now, you could not, as a matter of fact, could you, get brush in the vicinity of Fernandina to make a straight fascine such as you used for shore protection on the river at Augusta?

A. Not without a great deal of cutting or trimming.

Q. Well, as a matter of fact, could you get in the vicinity of Fernandina perfectly straight brush which is comparatively easily obtainable at or near Augusta?

A. Well, it does not grow there. The same class of brush does not grow at Fernandina. I have never seen it as straight and with as little fine twigs as up the country,—up the valley of the Savannah river.

Q. Are you sufficiently familiar with the practical interpretation of the specification of works of this kind to say whether or not it is proper for the Engineer in charge to vary his specifications, or to vary his actual construction under the same set of specifications, so as to adapt the material to the end to be attained by the project? Do you understand 749 my question? May not an Engineer taking two contracts each containing a specification say with respect to the making of fascines, the nature of the specification being the same in both contracts, the object of the project in the two contracts being slightly different: Taking that set of facts, are you sufficiently familiar with the practical working of contractors to know whether the Engineer may vary the actual work of the fascines under the same specifications to suit the two objects?

A. I should think it would be better if the specifications had been previously arranged for different work. Slight changes, I think, could be made.

Q. To attain the different object in the two cases?

A. Yes, sir.

Q. I wish you would go around there and look at those fascines back of the table; will you please examine them?

A. I examined them when I was sitting over there.

Q. Will you try to lift one of them; just raise it slightly. I want you to get approximately its weight.

A. (The witness did so.)

Q. Now, read that tag there, right in front of you.

A. (Reading) "This fascine taken from Foot Camp, S. C., on November 10th, 1897, by S. M. Hale, Inspector."

Q. "This fascine." It is not a "bundle of brush" on there, is it?

A. No, sir.

Q. Do you know who S. M. Hale is?

A. Yes, sir.

Q. Is he employed in this engineering district?

A. Yes, sir.

Q. Was he employed by Capt. Carter in recent years?

A. Yes, sir.

750 Q. How does that fascine which you attempted to lift just now compare in weight with fascines down at Cumberland Sound when you first went there?

A. The fascines that were made in the work at Cumberland Sound when I was there were generally put into the work shortly after being constructed or made. Therefore, the material would be green, and would weigh much more than this fascine, which has been exposed to the air for the length of time which I should think it had been by its appearance; it would weigh more.

Q. And you could readily lift, if that fascine or bundle of brush would hold together, you could readily lift the whole thing with one hand easily?

A. I think I could lift it—I would not say with one hand.

Q. You practically did lift it with one hand just now?

A. I didn't try to lift the whole thing: I lifted up one end of it.

Q. How many men did it require as a usual thing, at Cumberland Sound, to lift a fascine such as was made down there?

A. In going over the works, I have seen them unloaded and loaded on the wagon. It is my impression that there were two men; that is, it took two men to load each fascine.

Q. Sometimes three, were there not?

A. That I cannot say, whether three men were lifting one fascine; there would be three men around the wagon,—sometimes three, or four, or five; I have certainly seen two, and undoubtedly seen three, but I think two would be right.

Q. Have you ever seen such fascine as that at Cumberland Sound, as the one you have just lifted?

A. I dare say I have seen some of the same character as that.

Q. Going into the work?

A. You asked me if I had seen any.

751 Q. Yes.

A. I think I have.

Q. Many, or a few?

A. You ask for the general average, do you?

Q. No. Answer me; many or few of as inferior?

A. I don't know what you would call many; what percentage?

Q. Twenty-five per cent. of them?

A. No, sir; I don't think that there was twenty-five per cent. of fascines used on that contract of the weight and of the bulk of that fascine I put my hands on.

Q. Which that would be if it were green?

A. Yes, sir.

Q. In other words, then, the bulk of the fascines at Fernandina, so far as your observation went, were better than that?

A. The average fascine that was used on that contract I do consider better than that fascine I have just handled.

Q. How at Jekyl Creek, in 1895?

A. The same class of fascine went into Jekyl Creek.

Q. You spoke a while ago of Mr. Twiggs having had permission to use some of the old material in his contract?

A. Yes, sir.

Q. That old material had been in for a couple of years, had it not?

A. It had been in for some time; I don't know just how long. I don't remember when the previous contract was carried out.

Q. Of course, the fascines were not fit to be used?

A. No, sir.

Q. Could not, in any event, have been properly used?

A. No, sir.

Q. You, as a matter of fact, never saw a fascine that looked like that go into any work, did you,—that exhibited over 752 there (brush in the court-room)—I mean dry like that?

A. Very seldom, if ever. The fascines were usually used as I have stated.

Q. They were green, live brush?

A. Green; put into the work immediately after construction on all the works that I was ever on.

Q. In this Exhibit No. 56 (photograph) concerning which you testified that you saw a lot of brick-bats on the shore protection; you don't know who built that shore protection, do you—I mean of your own knowledge?

A. Only that it was built a year or two years previously, by another contractor.

Q. Do you know whether it was built a year or two years previously, or built in 1878?

A. I don't know, sir.

Q. You don't know whether it was built in 1884, do you?

A. No, sir; that is, I don't know whether there was a contract in 1884. I know there were several contracts preceding the one upon which I was employed at Augusta, but the dates of which I don't know.

Q. Do you know, as a matter of fact, that there was a contract for improving the river at Augusta as far back, or further, than 1878, or thereabouts?

A. As to the year, I cannot say as to that. I had heard that there were previous contracts. When they were carried out, I do not know.

Q. Then you say you don't know whether, as a matter of fact, this shore protection shown by Exhibit No. 56 was built in 1878, or any other time since 1878, and prior to 1892?

A. I simply know it was built prior to 1892; I don't know the year.

Q. Then whether the contractor put the brick-bats on 753 that you have absolutely no knowledge?

A. No, sir.

Q. They might, for what you know, have been thrown there as refuse by somebody who wanted to dump his bricks—that is true, isn't it?

A. Yes, sir, as far as I know.

Q. I see on the back of each of these photographs is a legend that they purport to have been taken by John D. Twiggs, Jr.; do you know John D. Twiggs?

A. I know a Mr. John Twiggs; I don't know his initials.

Q. Is he a brother of Mr. A. J.?

A. I think he is a son of Mr. A. J.

Q. As an engineering proposition, what sort of a condition does this Exhibit No. 56 show the shore protection to be in; good, isn't it?

A. Yes, sir, I consider it such.

Q. As an engineering proposition, the jetty shown in Exhibit No. 57 is in excellent condition, isn't it? It is sanded up on both sides. Isn't it in excellent condition?

A. I would hardly say that I would consider that in excellent condition for the purpose for which it was built. It would be in excellent condition, provided further storms—future high waters were not expected. In that case, it might be broken away. Probably it was more regular preceding some other freshet than it is now.

Q. Do you remember that there was a great freshet in 1892?

A. I remember hearing that there was.

Q. The water rose 30 feet?

A. Thirty odd feet.

Q. And flooded the streets of Augusta?

A. Yes, sir.

Q. And yet that stood through that freshet?

A. For aught I know that was built previous to that freshet.

754 Q. You didn't build it?

A. No, sir.

Q. Mr. Twiggs didn't build it?

A. No, sir.

Q. It was there when you and Mr. Twiggs went up there?

A. Yes, sir. What was the date of the freshet, did you say?

Q. I mean the great freshet just prior to the Twiggs contract in 1892?

A. I am not sure whether in 1892 or 1891.

Q. 1893?

A. I don't remember the date.

Q. Now, Exhibit No. 59 which you saw was a shore protection built under the Twiggs contract, and shows the brush fascines very little if any silted up, or covered with mud or sand, does it not?

A. Yes, sir.

Q. Quite exposed, isn't it?

A. Yes, sir, exposed.

Q. If that is not covered with sand in a short time, the fascines will rot away, won't they?

A. Yes, sir.

Q. Rot away more quickly because alternately wet and dry; isn't that true?

A. Yes, sir.

Q. The same condition with respect to the fascines being exposed is shown by Exhibits Nos. 60 and 61, is it not?

A. You mean as to being exposed?

Q. Yes.

A. Yes, sir.

Q. The No. 62 (handing witness photograph)?

A. Yes, sir.

Q. Which one of these Exhibits; which one of the 755 structures represented by Exhibits 59, 60, 61 and 62 were built by you when you hired labor after Mr. Twiggs got his supplemental contract, and which ones were built by Mr. Twiggs?

A. I could not tell you from the photograph. I could refer to records in the office which would show. There is a map of each, and every one numbered, and data in my books which would show.

Q. The freshet prior to your going up there,—the one to which I have just referred, tore out bodily a portion of the prior improvements, did it not?

A. Yes, sir.

Q. It changed one jetty from the Georgia side to the Carolina side, didn't it; or from the Carolina side to the Georgia side?

A. I cannot certify to that. I heard of that: but I do know there was a portion of some of the spur dams which were separated from the bank,—that were wholly independent of the bank.

Q. From your observation of the effects of that freshet you can say, can you not, that it was an extraordinary freshet?

A. It was.

Q. In Exhibit No. 63, you spoke of the heads of stakes protruding; I call your attention to these two; how close are they apparently together?

A. Apparently two feet; or one and one-half, or two feet—I mean from center to center.

Q. Two feet?

A. Hardly that. Perhaps a foot and a half, or a foot; perhaps not more than 10 or 11 inches between the center.

Q. Can you say whether these are stakes or the stumps of saplings?

A. Being so close together,—there are three of them there—it is hard to say. They look more like stumps than they do stakes to my mind. but they may be stakes. The 756 heads seem somewhat battered as though they had been driven.

Q. On page 263½ S. R. letter-book, 1893, certain instructions were given you of date of August 2nd, 1893, in which it is said that each fascine must be staked to the bank by four stakes, three inches in diameter at the small end, and six feet long for the bottom layer; you say that was modi-

fied afterwards by Capt. Carter so that in short fascines you drove two stakes, and in the long ones four; I understood you to say so?

A. To the best of my memory. I have no data or memorandum concerning that, but I do remember some modification. I know there could not have been four stakes in 12-foot fascines. As you see, the fascines are of two lengths, 12 and 20 feet. In the 20-foot fascines, it is possible and probable that four stakes were required.

Q. But you state now that in other fascines as a matter of fact only two stakes were driven?

A. Yes, sir; I am sure of that.

Q. Now, in the specifications attached to the contracts, I find, "There shall be, when stakes are used, at least two stakes for each fascine or for each foot in length of mat-tress. These stakes shall be at least five feet long for bottom layers, and six feet long for any upper layer, and must be driven until their heads are flush with the brush". The specifications have said that at least two stakes must be driven in each fascine; it is no violation of the specifications to drive four, or to require four, is it?

A. No, sir.

Q. In other words, the specification has in contemplation the possibility of driving more than two?

A. Yes, sir.

Q. And the possibility of their being more than five feet in length when it says "at least five feet in length"?

757 A. Yes, sir. Might I add something to what I have just said to you?

Q. Yes.

A. That is in regard to the number of fascines. That happened five years ago, and until recently I have not thought of this. Now, it is possible there may be two or may be four stakes. That can be verified by sounding and found on the ground. To the best of my memory, there might have been two for the 12-foot fascines; I may be wrong.

Q. A portion of the delay in the execution of the Twiggs contract was due, as you have testified to high water, and Twiggs got a concession fourteen days for fourteen days of high water, didn't he?

A. I understood it that way.

Q. Then he got as an additional concession sixteen days more?

A. Yes, sir.

Q. They were not entirely on account of the days lost by high water?

A. My memory does not go back to the reason for giving that 16 days.

Q. It was not high water, was it?

A. I don't remember of it being high water, yet it may be; that will be contained in a letter from me to the office.

Q. What was the other reason that Mr. Twiggs was slow in his work? He was incompetent, wasn't he? Or, let me put in this way? He was not a very competent man, was he?

A. I could not answer that. I could not say he was not.

Q. You have stated elsewhere, haven't you, that you didn't consider he took hold of the work with the determination he should have?

A. Yes, sir.

Q. Or with the right motive: you stated that, too, didn't you?

A. Well, motive in what respect—in completing the contract?

Q. Well, I might ask you this: You were asked before the Engineering Board, were you not—I will ask you if 758 you did not state before the Board of Engineer officers down here, in September, "I don't consider that that contractor", meaning Twiggs, "took hold of the work with the determination that he should have, and with the right motive. I don't want to say he was dishonest, but I don't think he took hold of it as any contractor should." Did you make that answer?

A. I did, either that answer or something like that. I expect you have given it as it is there.

Q. That is correct as you then believed?

A. Yes, sir.

Q. And you know of no reason now to change your opinion in that respect do you?

A. I do not. There might be a modification made to that, but I am still of the same mind as I was then, that the contract was not taken hold of with the stimulus that it should have been.

Q. (Showing witness paper) In one instance the contract provided that he should begin August 5th, didn't it?

A. Yes, sir.

Q. It so provides, does it not?

A. Yes, sir.

Q. And he didn't really begin to put in his material until August 10th as you have testified?

A. Yes, sir, August 10th.

Q. Now there were 7500 cubic yards of fascines, more or less, called for by the specifications, were there not?

A. Yes, sir.

Q. And the contract extended from the 5th of August until the 5th of October? There were then, excluding Sundays, about 53 working days, were there not, and not sixty-one as you, by inadvertence, or I believe, the Judge-Advocate by inadvertence, stated it to you?

759 A. Yes, sir.

Q. There would be, leaving out Sundays, about 52 or 53 days?

A. Yes, sir.

Q. How much would that require of him to put in daily, to keep up with his work and finish in the time allotted,—how many cubic yards of fascines a day?

A. It can be very easily obtained.

Q. Divide 7500 by 53 and you will get it.

A. Do you ask me to do that?

Q. If you please.

A. 141, If I have made no mistake.

Q. About 140. Now, in the eighteen days you said that he put in about 674 cubic yards. I will answer for that—you did say that?

A. Yes, sir.

Q. And 18 into 674 goes 36 times, does it not?

A. Nearer 37 or 38.

Q. Call it 38; so that his actual rate of progress, instead of being 140, as it should have been, a day, was in reality only about 38?

A. Yes, sir.

Q. Now, on the stone work there were 4000 yards, weren't there? Divide that by 53 and you get 77, don't you?

A. About 76.

Q. He actually did, in the first eighteen days, $408\frac{1}{3}$, or at the rate of 22 per day?

A. 22 or 23.

Q. So that his actual rate of progress was to his necessary rate of progress, in order to complete his contract within the time, as about 22 is to 76,—about one-third?

A. It wasn't that, leaving out his extension of fourteen

days owing to bad weather—that is, providing there had been no freshets.

760 Q. He contracted to do it in 61 actual days?

A. That is correct.

Q. Now then, assuming that he had no bad weather, he would have had 53 working days, so that to figure it out as a contractor would, you would say he would necessarily have to progress at the rate of whatever the quotient of 53 divided into 7500 is in respect to the fascines, and whatever the quotient is of 53 divided into 4000 in respect to the rock. That is correct, is it not?

A. Yes, sir.

Q. Now, when you took hold of it you had no plant; when you took hold of it, acting under instructions from Capt. Carter, when the supplemental contract was made, you had no plant?

A. No, sir.

Q. Did you make more rapid progress than Mr. Twiggs made doing the same kind of work?

A. I think I did.

Q. You did, as a matter of fact?

A. I think I did make more rapid progress.

Q. Mr. Twiggs was out of humor at the rate of your progress, wasn't he? He didn't like it?

A. I would rather not answer in that way.

Q. Do you remember whether or not, on January 9th, 1893, you wrote to Capt. Carter referring to Twiggs in substance this: "Work proceeding very slowly", "very" underscored, "and on October 5th, the expiration of his time of contract, but one-sixth of the work had been done. As the water had been high on several days, I recommended that he should be allowed an extension of fourteen days. Still the progress of the work remained unchanged, and I urged him from time to time to increase his force, which he promised to do". Do you remember writing that in substance?

761 A. Yes, sir.

Q. That had reference to Twiggs?

A. Yes, sir.

Q. And you said in your direct examination that he might have employed twice as many men in the work with economy?

A. I do consider that.

Q. Did you say in that letter, in substance, that Mr. Twiggs, from the beginning, had employed incompetent help

and a force totally inadequate on a contract job of this kind?

A. Yes, sir.

Q. Do you remember making a complaint at one time that one of Mr. Twiggs' foremen,—making complaint to Capt. Carter, that one of Mr. Twiggs' foremen threw rock into the river instead of on the work?

A. I do remember some such report being sent to Capt. Carter by me.

Q. And what was that foreman's name, do you remember—Sibley, wasn't it?

A. I think that is correct. I would have to refer to the letter for exactness, but I think it was Sibley.

Re-direct Examination by the Judge Advocate.

Q. Do you know if Mr. Twiggs received any payment on this contract before its completion?

A. I believe not.

Q. Do you know if he was embarrassed in his operations for the want of funds?

A. I think he was; that is, I only have reason for that in that he complained to me that it was difficult to obtain money.

Q. In estimating upon the work under the specifications, as an Engineer would you not take as a standard of the probable cost to you the statement set forth in the specifications, and if it said not less than five feet, consider that five feet would be acceptable and would be the standard length of the stakes for instance?

A. I should adhere to that in making an estimate.

Q. You would estimate upon cost of stakes of that length?

A. I should.

Q. You were shown one of the photographs and asked if that was unusual in view of the improvements having been made two years before. Had the work been of the same character as that you supervised under the Twiggs contract, how long a period of time do you think would elapse before it would look like that (handing witness photograph)?

A. Might I see two or three prints of the mattresses?

Q. Take them all (handing witness photographs).

A. I notice in photograph 4 (Exhibit No. 59) that there is some of this stuff—grass—growing from the spur which was constructed in 1893 and 1894. Now from that time to this would give the time of—

Q. Assuming, then, that this was taken four years after the work under your supervision, what would be its probable life?

A. It would be—there would be more, I think, of grass and fine bushes growing from the silt which had settled among the mats.

Q. It would remain a solid mass of work, would it not?

A. It would remain filled more or less with this fine silt.

Q. Could it ever, constructed as it was, come to look like Exhibit No. 56?

A. Not the lower portion. That portion (indicating on photograph) could; this lower portion could not, because there would be frequent freshets that would clean off anything on that.

Q. You spoke of seeing more than one man engaged in carrying fascines at Fernandina, and sometimes two and even more, I understood you?

A. Yes, sir.

Q. That might have been necessitated by the fascines 763 being fragile instead of heavy, might it not?

A. It could be so.

Q. You say that 25 per cent. perhaps of the fascines you saw put in the work there were as poorly constructed as the one here, taking into consideration that it was fresh?

A. I didn't state 25 per cent. I believe, but I did state that I thought there was some percentage of fascines that got into the mattresses of just that order—, into the mattresses I saw sunk.

Q. How many fascines were 10 per cent, better than that (indicating bundles of brush in court-room), or were there any?

A. In my opinion there were in this way: That they were made more carefully. The brush might have been just the same brush as I see there, but there might have been more of that brush put into the fascines. I refer to the fascines in my work under the 1894 contract at Cumberland Sound; that they were more carefully constructed.

Q. Did you ever see as good a fascine put into the work at Fernandina as you caused to be put into the work at Augusta under the Twiggs contract?

A. No, sir; there was not.

Q. You never saw one at any other place?

A. No, sir.

Q. How far from Augusta is that place where you saw the brick-bats?

A. In close proximity; perhaps a few thousand feet outside of the City limits.

Q. Is there a good drive-way to it?

A. There is a road passing very near the head of these spurs, along in that section.

Q. Is there a dumping ground in the vicinity?

A. I don't recollect such.

764 Q. Were there any brick-bats dumped about that vicinity?

A. I don't recollect of seeing any.

Q. All you saw then were upon this work?

A. Yes sir.

Q. Were they well distributed over the work?

A. Apparently.

Q. Not in any pile at any one place?

A. No, sir.

Q. You say that under the terms of the contract Capt. Carter was justified in giving you these instructions to put down stakes of larger dimensions than those referred to in the specifications, and that he could have ordered you to put in more stakes; he could have ordered you to put in 20 if he so desired; there was no limit to his power; I so understood you?

A. Yes, sir.

Q. You spoke of an extraordinary freshet: Did it occur before the specifications for the Twiggs contract were dated, namely, May 19th, 1893?

A. I could not state that: I think it was. I think the freshet was in the Winter preceding, some four or five months previous to this contract being taken up at all, or the specifications being drawn up. I cannot state; I don't remember the exact date when the freshet occurred.

Q. When you took charge of the Government work under the Twiggs supplemental contract, taking complete charge, what experience had you had in carrying on the practical execution of such work?

A. With the exception of being assistant to Mr. Felber, at Cumberland Sound, and a short experience at Jekyl Creek, I had none in the way of constructing mattresses or river improvement work. I had had previous experience in other kinds of engineering work, sewer work, etc.

765 Q. You had the general education of an engineer?

A. Yes, sir.

Q. You had no experience, however, with the employment of labor and the purchase of material of a practical kind, had you?

A. Yes, sir; I had had.

Q. To what extent?

A. If I remember rightly, for about six months or so, in closing up a contract in Newton, Mass., on sewer work; I had more or less to do with the charge of the labor on the ground.

Q. Labor is somewhat higher at Newton, Mass., than it is at Augusta, isn't it?

A. Yes, sir; common labor cost anywhere from \$1.25, to \$1.50 to \$2.00, whereas, for common labor at Augusta, I paid 75 cents.

Judge-Advocate: Now, with the consent of Counsel, I will ask a few questions that I neglected to ask on the direct. Shall I put them now?

Mr. Blair: Certainly.

Q. (the Judge-Advocate continuing examination:) You were on duty supervising what is known as the Bangs contract?

A. Yes sir.

Q. At what point?

A. Cumberland Sound, Ga.

Q. The same character of work was going on as that which you have testified to?

A. Yes sir.

Q. Mattresses being sunk, stone work, etc?

A. Identically.

Q. Was that a very large contract?

A. \$170,000.00 was the amount.

Q. The amount of the contract or the amount paid?

766 A. I think \$162,000.00 was the amount paid. The appropriation, I think was \$170,000.00.

Q. You supervised that work?

A. Yes, sir.

Q. And it was upon your reports that payment was made?

A. Yes, sir.

Q. And it was \$162,000.00?

A. Yes, sir.

Q. Did you, as an Engineer, make an estimate of what the actual cost of that improvement had been to the contractors?

A. I did for my own knowledge, and I went into a careful estimate. Such estimate I supposed I had among my papers, but I cannot find it now.

Q. You were careful in making your estimate?

A. I was.

Q. Taking into consideration all possible factors?

A. I endeavored to,—everything connected with the expense of the contractor.

Q. What was the aggregate of your estimate?

A. The aggregate of the estimate was close to \$80,000.00. The details as to the price of the stone, brush, etc., I cannot give.

Q. You could to-day make up a similar estimate with the knowledge of the amount of material used, could you not, and the knowledge of the labor necessary to put it in place?

A. In the case of the estimate that I have given you, I gave the exact cost. That is, as near as I could,—the price of the stone which the contractor paid, and such other data which I could not get now.

Q. Then you knew?

A. Then I knew.

Q. Had actual knowledge of the facts?

A. Yes, sir.

767 Q. Had actual knowledge of the amount of labor that was necessary or was used in the contracts?

A. Yes, sir; and further, the weight of the cars of stone delivered on the works.

Q. You knew then all material that was put into place and the cost of it to the contractor, and the cost of the labor used in all branches of the work, and its final cost in place of all the work done under that contract?

A. As near as I could ascertain; I think I made a close estimate.

Q. And that was \$80,000.00 upon a contract upon which \$162,000.00 was paid the contractor?

A. I believe it was \$162,000.00; that would have to be verified.

Q. Whatever the amount may have been?

A. Yes, sir.

Q. At that same time, after you completed the Bangs contract where did you go?

A. I went to Jekyl Creek again and to Brunswick, to carry out two small contracts.

Q. Who had those contracts?

A. I think they were in Mr. Bangs' name, both of them; I am not sure. The Cumberland Sound was in the name of An-

son M. Banks; I should have to have that referred to the record to see whether it was Bangs or Gaynor.

Q. It was either Bangs or Gaynor?

A. It was of the same firm. I ought not to say that, but the gentlemen who have done the work for the last year or so.

Q. What plant was used in that work at Jekyl Creek?

A. One tug.

Q. Where did it come from?

A. It was the same plant as was employed on the work at Cumberland Sound

768 Q. Do you remember the kind of stone that was used there?

A. Yes, sir.

Q. What was it?

A. Florida rock, so called.

Re-cross Examination by Mr. Blair.

Q. In answer to the Judge-Advocate, you said that it may have been that two men were required to lift the fascine at Cumberland Sound because it was fragile: do you remember making that answer?

A. Not exactly in those words. I believe Col. Barr asked me if the fascine was fragile, if it would not require two men to lift the same, and I replied in the affirmative.

Q. Which, of course, is true, isn't it?

A. Yes, sir.

Q. But, as a matter of fact, do you remember any single fascine that was so fragile that two men had to take hold of it?

A. No, sir. I don't think the fascines were of such weight as to require two, but I think if you were to take one end of any fascine it would bend almost double so that it would be very inconvenient for one man to lift it.

Q. It would be very inconvenient for one man to lift them anyhow, by one end, stiff or limber, would it not?

A. Yes, sir.

Q. You were instructed in writing, were you not, in 1893, to follow the specifications in the Cumberland Sound and Jekyl Creek work—in May, 1893?

A. I was not in charge of the work at the Cumberland Sound in 1893.

Q. Where were you in May, 1893, if you were not at Cumberland Sound?

A. I was assistant to Mr. Felber. He had charge of that in the Spring of 1893. I don't remember just the month. 769 I then went to Jekyl Creek, and it may have been May, and it may have been June or July, somewhere along there.

Q. I will ask you to look on page 75, in letter-book J. C., 1893, and say whether or not you ever got a copy of that letter?

Judge-Advocate: Who was that addressed to, Mr. Blair.

Mr. Blair: Addressed to Mr. Felber, and noted in the post-script copy for Mr. Conant.

A. (by witness) Yes, sir.

Q. You received that then, did you?

A. Undoubtedly.

Q. In this letter of instructions is contained this sentence: "These ranges having been established, you will extend the foundation course with brush mattresses of the third design," etc. That is right, isn't it?

A. Yes, sir.

Q. And at the bottom, "a copy of the specifications is enclosed herewith"; that is right, isn't it?

A. Yes, sir.

Q. Look on page 114 of the same letter-press book, and say if you received that letter of instructions?

A. Yes, sir.

Q. It is signed by Capt. Carter, isn't it?

A. Correct.

Q. And in that occurs this language: "Care will be taken in constructing the mattresses to see that they are properly built, so that the settlement after construction may be reduced to a minimum",—that is correct?

A. Yes, sir.

Judge-Advocate: Who is that addressed to, Mr. Blair?

Mr. Blair: "Memorandum for E. R. Conant, Inspector, Jekyl Creek "jetty work", dated April 30th, 1895.

770 (Mr. Blair continuing the examination): Do you remember on or about June 26th, 1895, writing with reference to Cumberland Sound a letter to Capt. Carter in which this language occurred: "The mats are well sanded up, and all the work is in good condition"?

A. I do remember making a report on the condition of the work.

Q. In substance to that effect?

A. Yes, in substance to that effect; I don't know just how it was worded.

Q. Do you remember recommending a deduction of 1,000 square yards of mats in Cumberland Sound along about April 30th, 1895?

A. I remember making deductions for some mattresses some time during the contract, but don't remember the date.

Q. You don't remember whether it was 2,000 yards?

A. No, sir.

Q. Then whenever you considered the mattresses not up to the specifications, you recommended a deduction?

A. I recommended a deduction several times for mattresses and stone.

Q. Because not up to the specifications?

A. As interpreted by Capt. Carter.

Re-direct Examination by the Judge-Advocate.

Q. Your standard of mattresses was what you had found being accepted by the Engineer in charge, was it not?

A. Yes, sir.

Q. Your inspection and consideration of the subject didn't go beyond that?

A. No, sir.

Q. In that letter there also occurs this: "In water 771 four feet deep there will be three courses of mattresses; six feet deep, four courses; eight feet deep, five courses; ten feet deep, six courses. For the three-course mattress, the width will be 45, 25 and 20 feet; for the four course mattresses, 45, 30, 25 and 20 feet; for the five-course mattress, 45, 30, 25, 20 and 20 feet; and for the six-course mattress, 45, 30, 25, 25, 20 and 20 feet. It is desired that the mattresses may be built of such thickness that the crest will be at approximately mean low water." You found that in the same communication?

A. Yes, sir.

Judge-Advocate: There also appears in that letter on page 74 the following: "These ranges having been established, you will extend the foundation course with brush mattresses of the third design, 40 feet in width, followed by a second course 30 feet in width, upon which will be placed, if necessary, a third course 20 feet in width. Each course should be

built of a double thickness of mattresses, the grillage being of good sized poles, in order to obtain vertical height.

"These mattresses may be built on ways constructed on barges, and launched in place, if the contractor so desires. By building the mattresses in two courses, you will be able to economize on stone. It is thought that from two to four inches of stone will be enough for the double bottom course; from four to six inches enough for the second course, and on top of the third course,—if that be the crest,—a depth of one foot of stone will be placed.

"The crest should be at a height of five feet above mean low water mark. If the third course fails to bring the dam to this height, (five feet above mean low water mark) a fourth course of not less than 15 feet and not more than 20 feet in width will be constructed.

"A copy of the specifications is enclosed herewith."

722 The following questions were propounded by the court.

Q. What work is that for?

Judge-Advocate: This is for the Jetty work at Jekyl Creek.

The Court: I would like to ask the witness to read the specifications for the fascines at Cumberland Sound, and to state how the average of the fascines which he saw go into the work there compare with the requirements of the specifications.

Judge-Advocate: The contract of 1894, did you say?

The Court: Which ever contract he was there on.

Witness: 1894 and 1895 at Cumberland Sound.

Q. Read aloud the specifications for the fascines, and state how those that went into the work compare with the specifications in regard to quantity of brush that was put in the fascines, and the character of the brush, and the length of the fascines, and the tightness with which they were choked and bound?

A. (Witness reading): "All fascines will be made of live brush of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the Engineer Officer in charge. The fascines will be from thirty to one hundred feet in length, and must be compressed tightly by an approved form of choker, to a diameter of nine inches at intervals of two feet, where they must be bound firmly with wire or tarred rope of approved strength. The brush used will be as straight and well trimmed as can be obtained; the fascines shall be care-

fully and thoroughly made and handled with care. They shall be piled up on shore or on barges for measurement in such way as the Engineer Officer in charge may direct." First; "The fascines will be from thirty to one hundred feet in length." In construction, the fascines were in lengths from twenty-two or such multiple of twenty-two, so as to go, when laid connectedly, the full width of the mattress,—I don't remember whether it was 20 or 21 or 22 feet,—If the mattress was one hundred feet wide, there would be about five of those fascines to go in the width of the mat. As to the quantity of brush that was put in those fascines in 1894, as I have 773 stated before, would be more on an average than in the fascines that you see on the platform. The average fascine was better than those fascines there.

Q. But the question is, how much as compared with the quantity the specifications required to go into them?

A. Now, these specifications are interpreted in different ways by different engineers, as I have found out since I have been here, and each one has a different interpretation. It is pretty hard for me to say what percentage you might think should go in or what I might. I think myself that there should have been more material in a fascine than what is shown on the platform, to come up to the specifications. As to just how much more, it would be hard for me to estimate, but it should be more compact. There at Cumberland Sound, to accomplish the project, a fascine of about that character would collect the silt and sand more quickly, more readily. I have sunk mattresses there which, after being visited in twenty-four hours,—or hardly twenty-four in forty-eight hours, would show indications of being silted at that time. That was on a portion of the work with which I had to deal in 1894. I don't speak of the continuation of the jetties or the work done since, but of the portion of the work done in 1894, which was on the banks and a portion of it exposed almost at mean low water, so that silting took place almost immediately after the mattress was put in place. As to the diameter of the fascines, I think the average diameter in the specifications was carried out; some ran more than nine inches, and some, perhaps, would run less than nine inches.

Q. How high was that brush construction carried in the shoal places you just spoke of?

A. It was carried, I think, about one foot above mean low water in portions; perhaps some portions of it would be a little more than a foot. It was laid for the purpose of mak-

ing a foundation course to receive stone which was to be placed upon it in later work; that was Capt. Carter's conversation with me. You asked further as to the spacing of 774 the wire. In the specification was mentioned two feet.

I cannot testify that, in every instance, or in the bulk of the work, the wires were spaced just two feet apart. I know that the wiring was spaced sufficiently near, so that the fascine would be the same when placed in the mattress as when constructed. It might be three feet and might be two and a half feet. I would not say that the spacing was more than three feet by any means.

Q. How much brush did one of those fascines contain compared with one of these here,—how much more or how much less,—how much more?

A. From fifteen to twenty per cent. I should think would be a fair amount. There is one thing which has not been brought out in speaking to you. The brush obtained for the 1894 contract was a much better class of brush than is shown there. There was a section of territory adjacent to the works upon which a very good quality of brush grew, fairly straight, and easily to get into the fascines, and during that contract nearly all the material came from this one location on land owned by the Fernandina Development Co., of which the brush for the contract was purchased.

The following questions propounded by the court were suggested by the Judge-Advocate.

Q. You said the wires used?

A. I correct that; it was not wire; it was lath-yarn.

Q. As to the comparative cost of making one of those fascines, so-called, and those used under the Twiggs contract?

A. The cost would be increased in making the fascines for the Twiggs contract somewhat. The weight of the material would be so much that the conveying of it from the brush camp to the works would increase it.

Q. It would take the men longer to construct one?

A. It ought not to take much longer to construct it, 775 fascine for fascine; it occupied about the same position in the mattresses, but there was extra cost on account of handling it,—the weight.

Q. Was there not more material in it than in one of these?

A. Yes, sir.

Q. More than double as much?

A. Yes, sir.

Q. Was there not three times as much?

A. In some, I would hardly say three times as much, but in those for the shore protection, I would say three times as much.

Q. Any more?

A. I would hardly like to go above that.

Q. Allowing for the trimming also?

A. Allowing fascine for fascine; there was very little trimming to do there.

Q. I think you testified that the growth there is very straight, and with but little foliage?

A. Very little.

Q. The branches are light and easily fold together?

A. Yes, sir, cotton growth and gum trees, which in their early growth are very straight.

Q. Don't they grow to a very good height without any foliage, to any extent, on them?

A. Yes, sir; the height of the fascine used at Augusta.

Q. Straight poles without any brush?

A. Straight poles.

Q. Making a clean fascine?

A. Making a clean fascine of poles.

The following questions propounded by the court were suggested by Mr. Blair:

Q. How much more per square yard did it cost to haul the Augusta fascine than to haul the fascine you have just described, of 1894? How much did that extra weight you speak of increase the cost of transportation per square yard?

776 A. That would depend entirely upon the locality of the brush, and its distance from the works. Where it was constructed at Augusta, the distance was not very great to the landing; it was very short. In some other works, the brush had to be hauled forty or fifty miles on tows. I think that at Fernandina was hauled but a few miles, not more than tow or three. That used at Jekyl Creek some of it was towed from Fernandina to Jekyl Creek, the exact distance of which I am not acquainted with,—when I said forty or fifty miles, I fear I over-stated it.

Q. Then the increase in the cost of transporting the Augusta fascine was made up by the increased distance you had to haul the other fascine,—equalized?

A. I must speak of the work I was on. For the Fernan-

dina work, that was very favorable to the contractor; they had a shell road to haul everything on.

Q. What was the cost of hauling at Augusta, if you know, per square yard?

A. Everything there was considered in the cubic yard.

Q. Well, per cubic yard?

A. I would not like to make an estimate now.

Q. What was the cost of hauling it per cubic yard at Fernandina?

A. I would not like to give an estimate on that.

Q. All you remember is that it was just the same?

A. No, sir; I still think it cost more to haul one hundred cubic yards at Augusta than it did at Fernandina for those two contracts.

Q. I understand that the increased distance at Fernandina—?

A. I said the brush was gotten very near at Fernandina; at Jekyl Creek it was farther off.

Q. How would the cost of transporting one hundred cubic yards at Jekyl Creek compare with the cost of transporting it at Augusta?

A. I think, in that case, that the cost, if not equalized, would be—I don't like to make an estimate on that, as various things would have to be considered closely, the cost of 777 towage, etc. It cost a good deal to tow the brush from Fernandina to Jekyl Creek.

Q. When you spoke just now of the fascines at Augusta containing two or three times more material than certain other fascines you used, you made those fascines in the room here your standard of comparison?

A. I was asked that.

Q. And not the actual fascine used at Jekyl Creek, Fernandina or Cumberland Sound?

A. I referred to the fascines on the platform.

The Following Questions Were Propounded By The Court.

Q. Did you estimate the actual cost of the fascines made at Augusta, per cubic yard, delivered in the spurs?

A. The only way that can be obtained,—the exact cost could be obtained, would be to take the material which I placed in the spurs and shore protection at Augusta and take my cost,—the outlay I was put to in getting labor, etc., and get it in that way. I never made an estimate of the cost of it there.

Q. Do you know the actual cost?

A. I do not.

Q. Did you ever see a mattress of more than one course put in at Cumberland Sound?

A. Yes, sir.

Q. How many courses in it?

A. Up to seven courses, perhaps eight, but seven I remember.

Q. How much stone was put on them?

A. Stone was put on those mattresses, I think, two or three times; that is, when the mattresses were first sunk, a layer of perhaps six inches or nine inches,—something less than one foot.

Q. Was that put on top of the upper course, or was it put on intermediately?

A. It was put on the top course.

Q. None on the lower courses at all?

A. The lower courses, if I remember aright, were of 778 different widths from the top course; therefore, some of the rock would fall on the top course and some on the various widths of lower courses below.

Q. Now, how much stone was put on the top course where the mattress was seven or eight courses high?

A. I should have to refer to note books which are filed away for the exact statement, but, if I remember rightly, about nine inches when the mattress was sunk; then after that, after eight or ten or a dozen mattresses were sunk, they would come back again, and take some barges of stone and distribute the stone over the top of all.

Q. What was the ultimate quantity put on?

A. Not more than one and a half feet, perhaps a foot, thick for the covering.

Q. What was the size of the stone put on, on an average?

A. On an average it was—I could not state very closely the average weight of the stone, but it would vary probably from ten or fifteen pounds up to forty or fifty pounds; perhaps the average might be twenty-five. I have a very vague idea of the average of it.

Q. Under that weight of stone put on top of these mattresses, did you ever notice how much compression there was of the mattresses?

A. Yes, sir.

Q. How much subsidence was there of the mattresses due to the weight of the stone on the mattresses?

A. I would estimate from two to three feet depression; that is, in the seven-course mattress,—a very thick mat.

Q. After there had been seven courses of mattresses laid, how much stone was put on top ultimately,—what thickness?

A. I would estimate one and a half feet; that could be corrected by referring to the records.

Q. Now, what was the total height of the extreme, of the seven courses of mattresses and the eighteen inches of stone placed on top; what height did that form?

779 A. When it would first go into the work?

Q. After you got the stone on it; when you got the eighteen inches of stone on the seven courses of mats, what was the height after they had settled?

A. It would average, I believe,—after looking at some notes the other day,—about a foot to the course; that is, the seven or eight courses of mattresses would give a vertical height of seven or eight feet of jetty after the stone was placed upon it.

Q. That is to the top of the stone or to the top of the mat?

A. The stone, most of it would go into the jetty to a certain extent, so that the height gained by the stone was very little.

Q. How do you mean go into the jetty.

A. It would go down into the brush.

Q. Fall in between the brush?

A. Yes, sir; to a certain extent; it would be so heavy.

Q. After the eighteen inches of stone was placed on top, was the top of the brush mattresses visible?

A. Not very much; no, sir; there might be projecting poles or stakes but very little.

Q. Now, you say that some stone went down into the brush?

A. Yes, sir.

Q. Now, how thick did that leave the average course of the stone; that is, take the plane of the top of the brush and then measure from there to the plane of the top of the stone, what was that distance? How much was there of good, clean stone, of that stratum of stone,—how thick was it?

A. I would give that an average of about one foot. That is an estimate; I never observed it.

Q. Then, about thirty-three and one third per cent, or one third, of the stone went down below the level of the top of the mattress

A. Yes, sir.

Q. In what depth of water was this structure made, this kind of construction?

A. At various depths. It started at a depth—The 780 deep mattresses started where a depth of eight or nine feet of water was shown, but instead of increasing the mattresses beyond seven courses, they remained the same, and the water getting deeper all the time, would leave a depth of from one to five or six feet above them; that is, the sloping bottom at the outer end would give a depth of four or five feet of water on top; at the inner end, the jetty would be at about mean low water.

Q. Now, about the sanding up, how much sand accumulated against and under that structure? What was the character,—the extent of the sanding up?

A. In the in-shore work, as I called it, where there was but one course, or two courses, in many instances, the mattresses would be entirely covered up; that is, you could see the top poles and some of the rock, but the brush, in the main, would be covered. As the water deepened, it would show less sanding up on the sides, but the top of the mattresses would gather sand, and, on one side, the side from which the current was slack, or on the north-east side, there would be shoaling up of two or three feet,—three or four feet along there at the outer end. In my work, in 1894 or 1895, very much of the work was done in shoal water, so that the shoaling up was extensive. Only a short distance,—about a few hundred feet,—did I work in this deep water,—only a few mattresses.

Q. Were there any of these seven or eight course mattresses laid with eighteen inches of stone destroyed by the sea,—carried away.

A. When I left there, there was not. The jetty was in good condition. There were no holes in the jetty. Since then, I cannot report as to what occurred. I have not been on the ground myself, and know nothing about it, but, at the time the jetty was completed, it was in one continuous line without breaks.

Q. Now, I want to understand clearly about the ultimate height of that structure. You said you had seven courses of mattresses, and about eighteen inches of stone on top of them, and that some of the stone settled in the mats and 781 left about one foot on top; now, what was the ultimate height of those seven courses of mats with that remaining foot of stone on top?

A. The soundings taken a few days after the sinking of each mattress gave me,—in looking up from memorandum—an average of about one foot to the course, or about seven or eight feet vertical depth of jetty for the seven courses of mattresses.

Q. To the top of the stone?

A. To the top of the stone; but in the soundings, we were, of course, not very exact. It would be rough out there on the soundings, and it was more to keep a general track of the condition of the mattresses than to make a close survey of the vertical height of the jetty, so there is considerable error in the soundings taken as shown on an average on the inspectors' notebook; but the idea that I have is that the average height was about seven feet of vertical height, or about one foot to the course.

Q. According to the specifications, what height should each mattress have had?

A. If each mattress was constructed with two grillage poles,—double grillage of poles,—with nine inch fascines between, the vertical height of such mattress would be, supposing the minimum of the poles to be four inches, which I think the specifications call for,—would be twenty-five inches, provided the poles did not settle into the fascines at all.

Q. Suppose the seven courses had been made in exact accordance with the specifications, how high would they have been, with that eighteen inches of stone settled in among the mattresses so that it left a foot of stone on top?

A. If there was no settlement, or no settling in to each other, there would be seven times twenty-five inches added to eighteen inches.

Q. Didn't the bottom grillage of one mat settle into the top of the one below it?

782 A. It would.

Q. Then the first mat would count twenty-five inches; how much would each subsequent mat count in height?

A. In the mats, as they were constructed, there was not this double grillage of poles put in between the fascines.

Q. But, if built according to the specifications, what would each subsequent course have counted in height after making the bottom course?

A. With the exception of the lower course, it would be twenty-five inches. I believe there would be twenty-one inches for each course above, allowing four inches for the poles to settle into the mats underneath.

Q. Now, can you deduce from that the height that structure would be, if built according to the specifications, with seven courses of mattresses and eighteen inches of stone, part of which settled into the mattresses, leaving one foot on top?

A. About thirteen feet; a little less than thirteen feet.

Q. It did have what height?

A. It had after settlement due to the weight of the stone, about seven or eight feet.

Questions By The Court Suggested By The Judge-Advocate.

Q. I would like to ask if, in the ruins of the old improvements up there in the locality where the wood grows so straight and high before there was foliage, if you saw any indication of such wood having been used in the ruins of the old improvements that you saw at Augusta?

A. Yes, sir; there was the remains of some of the limbs in with the rocks.

Q. Not the limbs—I mean the body of the tree?

The Court: The time for taking testimony has expired; take no more testimony.

783 The Court: If there are no objections, the Court will adjourn until half-past ten o'clock Monday morning next.

(Court adjourned at 3.00 o'clock p. m.)

THOMAS F. BARR
*Col. & Asst. Judge Adv. Genl.,
Judge Advocate.*

784

United States Court Room,
Savannah, Georgia.

January 31, 1898.

The Court met pursuant to adjournment at 10.30 o'clock a. m.

Present,

All the members of the Court and the Judge Advocate;
The accused, his counsel and the reporter, G. T. Cann,
were also present.

The President: The Court will come to order, all the members are present.

Judge Advocate: May it please the Court, before proceeding with the examination of the witness who was on the stand at the close of our Saturday's session, I desire to make a statement, touching the record of the Court's proceedings. For the first time since the beginning of the Court, the rec-

ord was ready for me last night to examine, and I find that our reporter had been unfortunate in his typewriter in the early stage of the proceedings, and also some misapprehension on the part of the reporter as to the proper transcript to be made touching the administering of the oath to witnesses; but the record will be amended in those particulars. Pages that are not satisfactory, will be re-typewritten and the amendment will be made as to the swearing of the witnesses, and I trust now to be able to keep up day by day with the record, and I would like to ask the counsel, who each day got a copy of the proceedings as they were first typewritten, if at any time they have any objections to make to the record, if they will please state it to the Court.

Mr. Blair: Yes, sir.

Judge Advocate: I believe it has been wholly satisfactory as to the testimony taken.

Mr. Blair: We have not examined it with any great 785 care, but I think there are no material errors in it.

The President: The corrections have been made, you say?

Judge-Advocate: I have indicated the necessary corrections and they will be made, and carefully scrutinized as made, before the whole record is approved.

Judge-Advocate: (To counsel for the accused) You get your copy right straight along?

Mr. Rose: We have not yet got Saturday's.

Judge-Advocate: No, that is not quite completed; the reporter will be in with it in a few minutes.

ELBRIDGE R. CONANT, a witness for the prosecution, recalled, having been previously duly sworn, continued to testify as follows:

Questions by the Court.

Judge-Advocate: When I was examining this witness, I was examining him by the permission of the Court, which I presume still holds good?

The President: Yes.

Judge Advocate: (Reading) "I would like to ask if in the ruins of the old improvements up there, in the locality where the wood grows so straight and high, before there was foliage, if you saw any indication of such wood having been used in the ruins of the old improvements that you saw at

Augusta. A. Yes, sir, there were remains of some of the limbs, not with the rocks. Q. Not the limbs, I mean the body of the trees?"

By the Court: Now, answer that, please, Mr. Conant.

A. I don't know whether I can state whether those were limbs or the body of the trees. In many cases it was an entire tree, a small tree, that was used, not the limbs chopped from the larger trees,—is that the point that you want to bring out?

By the Court: Yes, I want the Court to understand what you saw there.

786 By the Court: You were shown Saturday some letters of instruction as to carrying out the specifications, were you given those at Cumberland Sound in 1894, when you went there after your work under the Twiggs' contract.

A. Yes, sir, just before going, I think I was on some other work. The next contracting job I had charge of was the Cumberland Sound work in 1894 and '95.

By the Court: How was that contract designated?

A. The contract for Cumberland—for the improvement of Cumberland Sound, Ga., and the contractor was Anson M. Bangs.

By the Court: Were you given any verbal instructions in relation to carrying out those specifications at that point?

A. I was, sir.

By the Court: What were they?

A. My instructions for that work were given partly by a telegram, stating where to commence the work, and the number of courses of mattresses and partly were verbal instructions given by Capt. Carter, I think, just previous to any of the work going into place.

By the Court: What were those verbal instructions?

A. The verbal instructions were that the work to be carried on under that contract was to lay a foundation course of mattresses upon which under later or expected contracts, the remainder of the jetty was to be built up of rock, that this foundation course would not require the class of fascines that I had used in my previous work at Augusta, that the fascines should be of finer material and should be constructed in the way, in the same manner that I had seen the fascines and mattresses constructed theretofore or under the contract for 1892 and 1893.

By the Court: Whose contract of '92 or '93?

A. That was in the name of E. J. Gaynor.

787 By the Court: How did the specifications in the Bangs' contract as to fascines differ from those in relation to those in the Twiggs' contract?

A. The specifications were the same, with the exceptions, I think, of the length of the fascines. I think in the Augusta contract the length of the fascines should be 12 to 20 feet, and in the specifications for the Cumberland Sound contract I think it was sixty to one hundred feet, or some different length.

By the Court: Did you ever see a fascine there one hundred feet in length?

A. No, sir, I never did.

By the Court: How long did you ever see a fascine, about what length?

A. They were made to my best memory about 20 feet, so that if I was building a mattress 100 feet wide, that would require a multiple of twenty, or about five fascines to extend the full width, without having them overlap too much.

By the Court: That then would not carry out the specifications?

A. Correct sir, it would not.

By the Court: Now, what other verbal instruction did you have at any time from Capt. Carter in relation to the whole work under the Bangs' contract?

A. The question of rock came up; that was understood to be that I should use the same Florida rock that I had been using previously, and which was passed upon as being what was wanted. The construction of the mattresses was explained; that they should be of so many courses,—I don't remember the number—at one portion of the work they should be single course mats or double course, and in another place they should be three or four courses, and then according to the depth of the water requiring them. The work was 788 also explained in a further light in that I got the understanding that it was not to be carried out in the manner which I had carried out the previous work at Augusta.

By the Court: I don't want your understanding, Mr. Conant, I want what Capt. Carter said.

A. He said he told me that the amount of the appropriation for that improvement was small, that it was coming separate from the other appropriations, that it would give but little benefit to the improvements of the harbor in general, that the work was more for preparatory work for work

to come after, that he did not require, did not wish, the fascines to be constructed in the same manner; in other words, it would be a benefit—well, I cannot state his exact words, but I understood from him I was not to carry out the contract in the specific way, or in the way I had carried out the preceding contract.

By the Court: You don't get my meaning, Mr. Conant, if you do, you don't explain it, I want to know what he stated to you in relation to the execution of the contract by the contractor.

A. He told me that he didn't wish me to carry out that contract, or to build the fascines in the manner that I had just built them at Augusta.

By the Court: You have stated that several times, Mr. Conant, what did he say in relation to the contractor himself?

A. He told me the contractor had bid very low on that work, less than what it could be done for, and he made other remarks.

By the Court: What were they?

A. That he didn't wish me,—I cannot remember the words, I can give you the meaning,—that he didn't wish the contractor pressed in that work; I cannot give you just the meaning of the words that he said to me, but that is the gist.

By the Court: Those were the instructions by which 789 you considered yourself bound, were they not?

A. Yes, sir.

By the Court: How often did he visit the works at Cumberland Sound at that time?

A. I think, I cannot say, about six times, I think. I have a memorandum about that. (Here the witness takes a memorandum)

Mr. Blair: A memorandum just made?

By the Court: Is that a memorandum just made?

A. The memorandum was handed to me.

By the Court: Well, is it one of your own memorandum?

A. No, sir.

By the Court: Then you need not refresh your mind with that.

A. I can give you approximately about six or eight times.

By the Court: Well, that is near enough; it is not particularly important. Did he accompany you to the works when you first entered upon your duty there?

A. Yes, sir, the works were very near the station and could be seen from the station, and he visited the works frequently.

By the Court: On your first visit there, did he accompany you or not?

A. I think on my first visit there was nothing to be done.

By the Court: He did not accompany you to go over the works or explain it?

A. No, sir, not on the first visit.

By the Court: Did he go over the specifications with you at any time?

A. No, sir.

By the Court: Over how many months did the Bangs' contract extend?

A. From November or thereabouts until the next May or June. June I believe,—June or July. I would have to 790 look that up to give the exact date; somewhere from November to July.

By the Court: How did you come to make a calculation as to the profit the contractor made under that contract?

A. I made it for my own benefit; I was not asked to make it at all; it was not an official matter.

By the Court: What was the actuating reason?

Mr. Blair: I submit, that has nothing to do with it.

Judge-Advocate: I think it follows the statement that the contractor had a losing contract.

Mr. Blair: Well, if what everybody thinks can be brought into the case,

Judge-Advocate: No, this is certain action taken by him; action taken as an official; he could not divest himself of his official character.

By the Court: What led you to make that estimate, Mr. Conant?

A. From personal motives.

791 Witness: The question was, I believe, what was my motive in making this estimate?

By the Court: What was your reason, not your motive.

A. My reason was for my own personal motive, and having no connection whatsoever with any official report, or with the contractors, or with Capt. Carter. It was the beginning of my engineering experience in this sort of work, and as heretofore, on other works I have been on, sewer work and various other works, I would make an estimate to enable me

to get an idea of the cost of that sort of work. I did it for that reason.

By the Court: Did you keep the estimate which you did make, secret?

A. No, sir, I didn't keep it secret at all.

By the Court: Did you make it known to the contractors?

792 A. Yes, sir, I showed it to the contractors, for this purpose—I wished to see if my estimate included some expenses which they could show me better than myself, asking them if they could point to any item I had wrong, or any item I had left out.

By the Court: Give that.

A. My memory is that they told me that I had a very fair estimate. I don't know just the statement they made to me, but that was the impression it conveyed.

Judge Advocate: I presume counsel have the right to cross-examine?

The President: Counsel have the right to cross-examine.

Cross-Examination by Mr. Blair.

By the Court: You said, Mr. Conant, yesterday or Saturday, that Capt. Carter told you not to get stone for Mr. Twiggs?

A. Yes, sir.

By the Court: State precisely what the conversation was you had with Capt. Carter—all of it.

A. Yes, sir. Previous to the expiration of the contract I had written in my reports to Capt. Carter that satisfactory progress had not been made, that material was not delivered on the works. A letter to me, I cannot remember the date, but it is on file, I think stated that the contractor can use fascines of somewhat lower grade, that is, containing more fine material, than I had been using, but to keep the work so that the stone and fascine work was in proportion, that is, not to let the fascine work get too far ahead of the stone work. His conversation, when we were at Augusta, just previous to making the contract with Mr. Twiggs, was that he was not able to bring the material to the works in such quantities as to keep the proportion of stone and of mattresses any where alike, that it was better to do the work independent of the contractor.

By the Court: That is, you made the statement to 793 Capt. Carter that Mr. Twiggs could not furnish his material fast enough, is that it?

A. I believe I did. I found I made some such statement that he didn't furnish the material fast enough to make the required progress in the work; the fascines.

By the Court: Then the inference was which you made that if he could not furnish the material for his own work, that he could not also in addition furnish it fast enough for the Government to work alongside of it?

A. That is true that he could not furnish the material, by material I wish it understood that it was the fascine, the mattress work. I did not say that he could not furnish stone enough to do the work, but that he could not furnish the fascines, and therefore, could not furnish stone to sink the mattresses, and keep it in condition.

By the Court: And your report was to Capt. Carter that he could not furnish material fast enough for himself and therefore, it was to be presumed that he could not furnish material fast enough for himself and the Government?

A. There is some report to that effect, yes, sir; a written report, I would like to have it referred to, if it is on file; my tri-monthly report.

By the Court: The fact was on this supplemental contract, that the Government and Mr. Twiggs were working side by side on the same work, were they not?

A. Side by side.

By the Court: Mr. Twiggs was doing what work he could, and the Government was doing work itself.?

A. Yes, sir.

By the Court: Both mattresses and stone?

A. Both mattresses and stone.

By the Court: Mr. Conant, do you remember a conversation which you had with Capt. Carter and myself (Mr. Blair) last Friday evening, between 10.30 and 11 o'clock, in the rotunda of the De Sota hotel?

A. I do sir.

By the Court: Do you remember at that time making the statement that the fascines used at Cumberland Sound did not look anything at all like these fascines in the Court room here?

A. I don't think I said, "didn't look anything like the fascines"

By the Court: Did not resemble?

A. You asked me for a comparison; I said I didn't think the fascines used at Cumberland sound,—that the fascines on the platform was a fair representation of the fascines used at Cumberland Sound during '94 and '95.

By the Court: Well, that's true, is it not?

A. Yes, sir, that's true.

By the Court: Do you remember at the same time and place, stating to the same persons that the fascines in 1894 and '95 at Cumberland Sound were so heavy that it took two men and sometimes three men to lift and handle one fascine?

A. I was asked if it did, and I did say that it did take two men to handle those fascines, loading them from the wagon; as to more than two, I cannot say I did: I did say there were more than two men around the wagon, sometimes undoubtedly assisting one another I do think that two men could handle the fascine, but not one.

By the Court:—And that it took two men because of the weight of the fascines?

A. Yes, sir, because of the weight.

By the Court: Now, when you made a comparison on Saturday between the fascines here in this Court room and the fascines at Cumberland Sound, and stated in effect that the fascines at Cumberland Sound contained 15 to 20 per cent more brush than the fascines here, did you mean 795 than the fascines here now or these fascines as they would have appeared when new, when green?

A. If the weight was considered, it would be more, because these are dry and light; if the brush is considered, there is practically the same amount of brush in the fascines now on the platform, as when the fascines were cut. There may be some more leaves or twigs that are broken off, but as to weight, they are very much lighter than when they were green.

By the Court: And your comparison was between the two sets of fascines, both being green?

A. Taking it that way, both being freshly cut.

By the Court: You made the statement a while ago that when Capt. Carter gave you instructions at Cumberland Sound and told you about the different kinds of fascines required in that work, from the kind required at Augusta, and you said in substance that the fascines you had at Cumberland Sound would be for the benefit, and then you stopped; for the benefit of whom? Making the different kinds of fas-

cine at Cumberland Sound from the kind you did at Augusta, you said that Capt. Carter told you that the kind down on Cumberland Sound would be for the benefit, and there you stopped and did not complete the sentence. For the benefit of whom,—did Capt. Carter tell you?

A. That demands an explanation. I started, if I remember aright, when I started on that remark,—that the fascines, that the contract for the Cumberland Sound called for, were for the purpose from an engineering point of view, of collecting silt and formed of a different material from the fascines used at Augusta. I think that was what I started to say when I was stopped.

By the Court: And that change was for the benefit of whom?

A. From an engineering point of view, that if the same material was not carried there, that the Government would receive the same benefit from that material which was there.

796 By the Court: Did he say the Government would receive the same benefit from the brush fascines at Cumberland Sound, the same benefit as it would receive from a fascine made of poles?

A. He did tell me that the fascines would give the same benefit as if they were in accordance with the requirements of the work at Augusta.

By the Court: Then it was for the benefit of the Government that the change of construction was made, was it, and not for the benefit of the contractors?—The benefit of the Government was not it?

A. No, sir, I cannot answer that it was for the benefit of the Government. I think it was for their benefit too.

By the Court: Who was present when that conversation occurred?

A. There was present the contractor himself, but I don't know whether he was within hearing of what was taking place or not, I believe there was nobody else present when that conversation took place.

By the Court: You saw the contractor?

A. The contractor was on the ground and in the building.

By the Court: You say the "contractor," do you mean Anson M. Bangs?

A. Excuse me, when I say the contractor, I mean a representative of the contractor was on the works, Mr. Gaynor.

By the Court: Which Mr. Gaynor?

A. Ed. Gaynor.

By the Court: Was he in the room?

A. When I say Ed Gaynor, I think it was Edward Gaynor; it is barely possible it was his brother; it was either Edward Gaynor or William Gaybor.

By the Court: Did you say he was present in the room?

A. I don't think he was in the room when the conversation took place, he was in the lower story of the building.

797 By the Court: When this particular statement was made to you as you say, by Capt. Carter, nobody heard it?

A. Well, I cannot say, of course, whether he heard it or not; he was in the building, but in the lower story. I don't say that he did not hear it; I don't say he did hear it, but I don't think he could have heard it unless he was within the immediate vicinity, that is, in the same room. He was not by our side, he was not standing near us.

By the Court: Then you don't know positively that he was in the room when that particular statement was made.?

A. When that particular statement was made,—no sir, I do not.

By the Court: What is your best recollection?

A. My best recollection, and I am sure he was not near us; he might have been within the threshold of the door, and he might have been in another room.

By the Court: This contract with Mr. Twiggs began on the 5th, of August, you stated work began,—was not it on the 10th of August, that's right, is it not?

A. Yes, sir.

By the Court: Was satisfactory progress made the first thirty days?

A. No, sir.

By the Court: Was satisfactory progress made the second thirty days?

A. No, sir.

By the Court: Was satisfactory progress made the last thirty days, the thirty days of the extension during October?

A. He was allowed to perform such work as he could from that time on until after the contract was taken away and the supplemental contract was made.

By the Court: I am speaking of the time before the supplemental contract, say, October?

798 A. No, sir.

By the Court: So in August, September and October, satisfactory progress was not made by Mr. Twiggs?

A. No, sir.

By the Court: Didn't you report at the time of the extension, to-wit, Nov. 5th, that Mr. Twiggs had done only approximately about one third of the work required?

A. It is contained in the report, some proportion, I don't know whether it was one third, one fourth or one fifth. I have not read the report since it went to the office.

By the Court: It was not more than one third?

A. I should ask to have the report referred to.

By the Court: I will ask you to read that at the bottom of the page, is that your handwriting?

A. Yes, sir.

By the Court: Now, refresh your memory by it, and I will ask you the question.

A. (Reading) "Work proceeding very slowly, and on October 5th, the expiration of his time of contract, but one sixth of the work had been done, as the water had been high on several days, I recommended that he should be allowed an extension of 14 days. Still the progress of the work remained unchanged, and—" do you wish me to continue reading, or is that the point you wish to bring out?

By the Court: Yes, go on. I want to know on the 5th, of Nov. how much of the work had been done.

A. I will continue until I come to it, (Reading) "Still the progress of the work remained unchanged and I urged him from time to time to increase his force, which he promised to do. Another extension of his contract is granted by me Nov. 19th." I have nothing here about Nov. 5th he had completed about one third of the work.

By the Court: You were asked Saturday if any payment had been made to Mr. Twiggs under the original contract?

A. Yes, sir.

By the Court: And you answered no?

A. I think I answered that I did not think that there was any payment made, that that could be rectified by referring to the office record; the payments to Mr. Twiggs or any other contractor never passed through my hands; it is not customary.

By the Court: But so far as you know, he had not been paid?

A. Yes, sir, as far as I know.

By the Court: You have seen the contract with Mr. Twiggs, have you not?

A. At the time, sir.

By the Court: Do you know of the provision, "Payments shall be made to the said Albert J. Twiggs monthly, if satisfactory progress is made."

A. Yes, sir.

By the Court: That contract called for about \$20,000 worth of work, did not it?

A. To the best of my recollection.

By the Court: And was a two months' contract originally, from the 5th, of August to the 5th, of October?

A. Yes, sir.

By the Court: Had he done \$10,000 worth of work at the end of the first 30 days?

A. No, sir.

By the Court: Had he done \$5,000 worth of work at the end of the first 30 days?

A. I think not, sir.

By the Court: Did the work at any time between the 800 5th, day of August and the 5th, day of November, when the supplemental contract was made, progress at the rate of \$10,000 worth of work per month?

A. No, sir.

Mr. Blair: In order that it may go into the record at this point, if the Court please, I will read the provision of the contract between Mr. Twiggs and the United States, with reference to payments: Section 46 of the specifications—"Rate of progress of work.—Work must be begun within 60 days of the signing and approval of this contract and must be vigorously pushed at such rate that the contractor shall earn not less than \$10,000 per month. The delay of ten fair working days on the part of the contractor to perform the average daily amount of work specified shall, at the discretion of the Engineer Officer in charge, subject the defaulting contractor to a forfeiture of his contract and all money remaining unpaid on account of work done under said contract." This is in the body of the contract on the last page thereof. "Payments shall be made to the said Albert J. Twiggs monthly if satisfactory progress is made, when the work contracted for shall have been delivered and accepted, reserving 10 per cent from each payment until the whole work shall have been so delivered and accepted."

Judge Advocate: I would ask the counsel to note the fact that the words "Monthly if satisfactory progress is made" is not in print, but in typewriting.

Mr. Blair: Also the name of Albert J. Twiggs.

Judge-Advocate: Necessarily that would be inserted.

Mr. Blair: And also the major part of the first page is in typewriting.

Judge Advocate; Certainly but the provision as to payment is an interlineation.

Mr. Blair; There is no suggestion that the interlineation was made after the execution of the contract?

801 Judge Advocate: Not at all, I simply want that noted at this stage, when the other part was put in.

President: There is the same provision made in the specifications.

Judge Advocate: It is not in the specifications, there is a provision as to the annulment of the contract, but not as to the monthly payments, and a further provision, that the general form of the contract can be seen at the office of the Engineer.

Mr. Blair: I call your attention to the Atlantic Contracting Company contracts of eighteen ninety six which have the same interlineation.

Judge Advocate: All right, I am willing to admit it may be in all the contracts, but I call your attention to the fact that the specifications on which the bids are made, do not require it.

President: The specifications give the mode and date of payment, don't they, they provide for monthly payments with 10% deductions, don't they?

Judge Advocate: I will read to the court, that feature. The provision in the specifications, under which the bids are made, will be found in the thirty-fourth paragraph: "Payments will be made monthly; a percentage of ten per centum will be retained from each payment until the completion of the contract.

President: Now read from the contract, if you please, 802 and see if there is a conflict.

Judge Advocate: Paragraph 25. (Reading) "The contract which the bidder and the guarantors promise to enter into, shall be, in its general provisions, in the form adopted and in use by the Engineer Department of the Army, blank forms of which can be inspected at this office, and will be fur-

nished if desired, to the parties proposing to put in bids. Parties making bids are to be understood as accepting the terms and conditions contained in such form of contract."

President: Now, if you please, refer to the contract itself and read it, and see if there is any conflict.

Judge Advocate: This is from the Twiggs proposal, upon which the contract is based.

President: You read from the specifications?

Judge Advocate: I read from the specifications on which his proposal was based, and the contract was based upon his proposal.

President: What is the fault between the stipulations in the specifications and in the contract itself?

Judge Advocate: That there is this insertion: "Payments shall be made to the said Albert J. Twiggs" and in addition to that there is put in type-writing "Monthly, if satisfactory progress shall be made" It does not say, satisfactory to whom, but simply says, generally.

Mr. Blair: I think I see the point which the Judge Advocate desires to make, and in order that the whole matter may

be together in the record, I desire to call the Court's attention to paragraph thirty-four, of the Savannah Harbor

Contract of eighteen ninety-six, of the Atlantic Contracting Company, in which the subject of payment is discussed, and in which it is stated that payments will be made monthly when funds are available, ten per-cent being reserved until the total amount thus retained is equal to ten per cent of the cost of completing the remainder of the contract as estimated by the Engineer Officer in charge, and it is not stated in the specifications in the Savannah Harbor Contract—there is nothing said in the specifications for the Savannah Harbor Contract with respect to payments if satisfactory progress is made. In the body of the contract for the Savannah Harbor Contract, with the Atlantic Contracting Company in eighteen ninety six, the same insertion is made with respect to satisfactory progress as is made in the A. J. Twiggs Contract, that I believe in precisely the same language. (Reading) "Payments shall be made to the said 'The Atlantic Contracting Co.' monthly, if funds are available, and the required progress is made in accordance with paragraph thirty four of the accompanying specifications.

Judge Advocate: Now, also read from the contract what progress was required under that contract which you have just read.

Mr. Blair: (Reading) "Rate of progress of work"—
"Work shall be begun within sixty days of the date of notification of approval of the contract and shall be prosecuted vigorously at such rate that the contractor shall earn, by the close of the fiscal year, ending June 30th, Eighteen ninety-eight, and during each subsequent fiscal year, until completed, the amounts pledged by Congress under the Act of June 804 Third, Eighteen Ninety-six, from which amounts, however, the necessary sums for Superintendents and contingencies must be deducted."

Judge Advocate: Now, I am willing to state without troubling Mr. Blair, to read from the contracts, that that is found in a majority of the contracts made with the Atlantic Contracting Company, that in the contracts, the same provision as to payment and progress, will appear, notwithstanding that it is not called for by the specifications and is not the form of contract which the bidder would be shown if he went to the Engineer's Office.

President: You mean the specifications are qualified in that particular?

Judge Advocate: I offer in evidence, may it please the Court, the form of blank contract, which is shown a bidder if he should call to see one; to be attached to the records and marked "exhibit 64"

By The Court: I would like to ask the question: Taking the average character of seven course mattresses that were built at Cumberland Sound in eighteen ninety-four, I would like the witness to tell me, how much material in brush, and in binder-poles there was to one square yard of that jetty or mattress: After allowing for the compression of the seven courses of fascines by the weight of eighteen inches of stone, and allowing also the proper proportion in volume of binder-poles. I would like that in cubic yards, and taking the contract price at fifty seven cents a square yard for single mattresses, I would like to know what they cost the Government per cubic yard and per cord?

805 A. Major Stanton, I don't think that without more time than I think the court would wish to give me now, I can answer that question, that is, a portion I can answer. The proportion of the poles and brush in that small section of mattresses would require some time for me to figure that out. I can perhaps answer a part of it, but could not go into details, and I shall like to give a fair answer.

President: The court withdraws the question, at the present time.

Judge Advocate: Mr. Conant, you came to me when the court had retired for deliberation and said you had some corrections to make; can you make them without having the testimony read to you?

A. I can sir.

Judge Advocate: Proceed.

A. I was asked the question as to the number of laborers employed by the contractor at Augusta; I read a few statements from my note book, but I do not think that that gives a satisfactory answer to the question, and would ask to refer to some of my ten days reports which I have here. They are impartial. During the ten days, ending August the tenth, that is the first ten days of the work, the average number of the employes, the laborers, was sixteen, for the working days of that ten days, the laborers. There was one foreman, with the exception of one day, when there was two; the next ten days between August the eleventh and August the twentieth,

I think the average number of laborers was sixty-seven. 806 Now, in this number I include as laborers, those at the quarry, and his laborers at the brush camp, and his laborers in making the mattresses, and the same in depositing the material. From the eleven days between August the twenty first and the thirty first, the average number of laborers was forty nine; from September the first to September tenth, twenty-six; from September tenth to September the twentieth, thirty-eight; From September twentieth to September thirtieth, seventy-five; I can go further, if you desire.

Judge Advocate: I am not asking you now, it is for yourself.

A. I do it in justice to the Contractor. I made a positive statement that no brush went into the mattresses at Cumberland Sound, as good as that that went into the work at Augusta; at Augusta, there was, at one time, about seventy yards rejected. I received a letter from Captain Carter saying that a slightly, I don't remember just the words, that fascines could be put into the lower part of the mattresses with less weight of material than they used before I used those fascines, or the ones rejected. Those fascines I do not consider any better than many of the fascines used at Cumberland Sound, so that my statement that no fascines were used was erroneous, and I wish to make that modification. I also made a statement in regard to the silting of the spurdams

at Cumberland Sound, and compared them with the siltings in Augusta; in that, I said that the spurs at Augusta were not intended to silt up, did not silt up. I am wrong in that,

to some extent, a portion of the spurdams at Augusta 807 would not silt up, the material would not gather between them, and in Major Stanton's question to me, comparing the fascines at Cumberland Sound with the fascines mentioned in the specifications, and the vertical height of the jetty, I found this morning in looking over my sounding books, that the vertical height of the jetty obtained by the seven course mattresses was just at the time of the sinking, somewhat more than a foot to the course, but after the total settlement, after a month or so, and the jetty was in place, my statement was correct, but just at the time of the sinking, when the stone was put on, or when the mattress was put there, there would be something more than a foot rise, for each course of mattresses; if it could be readily referred to, I would also like to ask what I said about the material in the fascines at Cumberland Sound, in answer to Major Stanton's question.

Judge Advocate: The question is, How much, as compared with the quantity the specifications required to go into them, and your answer is, "now these specifications are interpreted in different ways, by different Engineers" that is your answer and you continue "as I have found out since I have been here, and each one has a different interpretation. It is pretty hard for me to say what percentage you should think should go in, or what I might think. I think myself, that there should have been more material in a fascine than what is shown on the platform to come up to the specifications; as to just how much more, it would be hard for me to estimate, but it should be more compact; there at Cumberland Sound to 808 accomplish the project, a fascine of about that character would select the silt and sand more quickly, more readily."

Witness: That is enough of that, I don't wish to refer to that, it is simply in regard to the material placed in a fascine, the amount, I had recollected that I didn't give the correct answer in regard to that, and wish to so state; I wish to corroborate that and say, I do not think they were made as carefully as what the specifications would intend, that the amount of material required to come up to the specifications would be very much more than what is shown in

the fasceines on the platform. If I said ten or fifteen per cent more, I should say very near double more.

Judge Advocate: I think you did not testify to that, you testified there was used, ten or fifteen perhaps fifteen or twenty per cent used more in those fasceines; that was not your answer as to what should have been used. What was used, that was your testimony.

A. Now, I say, what should have been used.

Mr. Rose: He did testify as to what should have been used in another part of his testimony he testified as to what should have been used.

Judge Advocate: Is that all?

A. That is all.

President: The question asked by the court was withdrawn for the present.

Judge Advocate: Is it to be renewed by the court

By the Court: It will be renewed subsequently, if the witness will prepare the answer at his convenience.

809 Judge Advocate: You can prepare the answer to that question.

A. Yes-sir.

Mr. Blair: I presume the Judge Advocate will warrant him not to consult with anyone.

Judge Advocate: It would certainly not be proper the question is to come from you alone and not from anyone else.

At this point reporter Geo. T. Cann, was relieved by reporter W. O. Tarver.

810 ALBERT J. TWIGGS, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge Advocate.

Q. Will you please give the reporter your full name and place of residence?

A. Albert J. Twiggs, Augusta, Ga.

Q. What is your profession?

A. Civil Engineer and Contractor.

Q. Where were you educated?

A. Virginia Military Institute.

Q. When did you leave there?

A. In 1871.

Q. Since that time you have been engaged in your profession?

A. Yes, sir.

Q. What has been the nature of your duties?

A. Do you mean from that time until now?

Q. From that time forward, showing the labor in which you have been engaged?

A. For a few months I did nothing; then I was employed as a bridge engineer under John D. Clark; then for a short time on the South-side Road, Virginia; then I went on the Port Royal Road as Assistant Engineer, and after the road was completed, for a short time I did nothing.

Q. That was in the construction of the road?

A. Yes, sir. I did some little work around Augusta of a private character, and was afterwards an engineer of bridge construction on the Port Royal Road; then later on the following year, I was made Chief Engineer and Roadmaster. I served in that capacity for about two years. I resigned, I think, about March, 1877,—somewhere about there. I went to Virginia, and spent the summer in Staunton, Va., and did some work on the water-works there. I was then appointed Assistant Engineer on the Augusta & Greenwood Railroad, and served for a few months, and was made Chief Engineer of the Augusta & Knoxville R. R. After the completion of that road, I was made General Superintendent, and held that position until the Savannah Valley Road was to be laid out, and I took that by contract.

Q. Was that your first contract?

A. Of any importance. I helped to build a small road, the Louisville & Wadley Railroad, of about ten miles, during the time I was superintendent of the Augusta & Knoxville Railroad. I gave up the railroad business at that time, and went to contracting; that is, I commenced work on this Savannah Valley Road, which was not completed, as the funds gave out. After that I then went down to Georgetown, and built, and furnished all the cars and equipment for the Georgetown & Lane Railroad. After building that road, I worked for a short time in Phosphate Works near Charleston. At the end of that time, I went back to the Savannah Valley road, and completed it. At the completion of that road, I went to the Cape Fear & Yadkin Valley Railroad, and built a portion of that road. Then I built the Augusta Southern road, running out eighty-one miles from Augusta, and also the Au-

gusta, Edgefield & Newbury Railroad, and I did a lot of the stone work for the City of Augusta on the dam after the freshet of 1888. I have since kept up and built all the iron bridges in Augusta, except one or two minor ones, and I did all the canal work. I built all the large dams around Augusta, including those at Langly and Bath, and I do generally all that character of work in that neighborhood. I built the Augusta Belt Line year before last, and last year the Augusta Terminal, and I now have the contract to build the Augusta Water-works.

Q. How large a contract is that?

A. About three hundred thousand dollars.

Q. Have you ever had any trouble on any contract on which you have entered?

812 A. Only with one, and that was with the Government. I omitted to state that I had a contract with the Government.

Q. That is the only contract in which you have been engaged on which you had any trouble?

A. Yes, sir.

Q. Have you ever made any efforts to obtain contracts in this Engineering District upon Government work?

A. Yes, sir.

Q. How often?

A. Twice, I think.

Q. In what years?

A. I don't remember the years exactly. I bid once on a contract below Augusta at the same time that Mr. George Denning of Augusta put in a bid. I don't remember the year.

Q. That was on the up river improvements?

A. No; that was below Augusta.

Q. But up the river from here?

A. Yes, sir. Then I put in a bid, I think above Augusta, on that work, if I am not mistaken; and then the contract I got in 1893.

Q. How did you obtain the specifications when you had it in contemplation to make bids?

A. I wrote to Capt. Carter for the specifications, and he sent me one copy. I then wrote a second letter for the two remaining copies, and got them.

Q. Each time you had it in contemplation to bid, you received but one copy of the specifications upon making your application?

A. I would not state every time, but as many as twice.

Q. Did you ever refrain from bidding at any time after you had prepared to bid?

A. Yes, sir.

Q. Upon what occasion?

A. Upon the occasion of the contract in 1891 below Augusta, previous to the one I executed.

Q. Under what circumstances?

813 A. I came down to Savannah with the intention of making a bid, and I met Mr. Gaynor——

Q. What Mr. Gaynor?

A. Mr. John Gaynor, Col. Gaynor, I think,—and I had a conversation with him, and he proposed that we should do the work together.

Mr. Blair: I presume, if the Court please, that the purpose of this question is to introduce similar evidence to that which was introduced the other day with respect to a conversation between one of the Gaynors and somebody else in the absence of Capt. Carter. The witness has started to state such a conversation and we object to the admission of such evidence. I understand, if the Court please, and it is so stated in the first volume of Winthrop, citing an opinion of one of the Attorney Generals, that a Court Martial is bound by the ordinary rules of evidence that obtain at common law. (Addressing the Judge-Advocate) Is that the object of the question?

Judge-Advocate: The object of the question is not to show conversation, but acts.

Mr. Blair: I will let it proceed a little further before I object.

Judge-Advocate: Conversation necessarily attends the act, and the conversation will be necessary for the understanding by the Court of how the actions came about. I conceive that that was covered by the ruling of the Court when the question was raised before.

Q. (Judge-Advocate continuing) You did not bid?

A. I did not.

Q. You were about to give your reasons when Counsel interposed his objection?

A. Mr. John Gaynor approached me at the hotel——

Q. Was Captain Carter present?

A. No, sir; I don't think I saw Capt. Carter during my visit down here at all on that occasion.

814 Q. Go on.

A. Mr. Gaynor proposed, as I said—

818 Judge-Advocate: You will answer my question, Mr. Twiggs.

A. Mr. Gaynor proposed that I should enter into this contract with him, and I told him that I wanted the rock work, and, after considering the work some hour or two, we concluded that I should do the rock work, but it wasn't quite as much as I thought I ought to have; then he gave me five hundred dollars additional. The five hundred dollars he paid. I didn't bid; I went back home.

Q. Was the five hundred dollars paid before or after the bids were opened?

A. After.

819 Q. Where was the contract to be executed? Where was the improvement to be made?

A. It was to be made below Augusta; it was the contract of 1891,—the one previous to the contract that I executed.

Q. And how near to the point where the improvements were made under your contract?

A. At the same place; I prepared nearly all the work that he did at that time.

Q. That he did under that contract of 1891?

A. Yes, sir.

Q. Now, as to your contract; I will ask you, to have interrogatories, to begin at the beginning as to your first application for your first specifications, and carry it out to the times the bids were opened?

A. Capt. W. T. Gibson, of Savannah, I think, sent me a paper with the advertisement in it. I was looking for it, as I had asked him to do so, he being a Savannah man, and, as soon as I got it, I applied to Capt. Carter for specifications. He sent me one copy, and then I wrote, asking him for the other two copies. On June 10, 1893, I received a letter from Capt. Carter enclosing the two remaining copies.

Q. That you had asked for?

A. Yes, sir. I looked over the ground pretty thoroughly, and came down on that occasion to make a bid. I then met Mr. Edward Gaynor, I think it was. I think that was his name, and he came to the hotel to see me, and asked me if I intended to bid on the work, and I told him yes, I did, and he said, "I know you and John had a little difficulty on the

last work, and he don't like to have much to say to you, but I thought I would come to you, and talk to you on the subject." I said, "What do you want?" He said, "Well, what will you take to go home, and not bid on that contract?" I told him that I was going to bid; that the Gaynors didn't have money enough to give me to keep me from bidding. He 820 said, "You can't make anything on it." I said, "maybe not, but I am going to bid on it anyhow", and he continued to talk to me on the subject and make me offers. He offered me one thousand dollars before the bids were opened. He had two bids in his hand. In the meantime, John Gaynor joined Ed, and made me the same proposition to pay me a thousand dollars, and made it up to five minutes before we went into Capt. Carter's office, and the bids were put in. I think a man by the name of Grant put in a bid also. My bid being the lowest by four hundred dollars, or something in that neighborhood, Capt. Carter recommended the acceptance of my bid.

Q. The contract was awarded to you, and you entered into the contract; do you recall the day when you were to begin work under it?

A. I think it was about the 5th of August. I actually began on the first day of August.

Q. After you had secured the contract, were you approached by anybody,—after the bids were opened?

A. Yes, sir; Ed Gaynor asked me why not let them have it, and I said, "It is out of the question now". He said, "You can just throw up the job, and not do it." I said, "How about my bondsmen; I have given a bond to execute the contract." He says, "Oh, we can attend to that."

Q. Did you know before the bids were opened how many bidders had sent in proposals?

A. No; I knew there would be at least three.

Q. How did you know that?

A. Because there was a man by the name of Grant here who would bid, at least I supposed he would.

Q. That you knew of your own knowledge. Did you acquire any information of the number of bidders expected to bid?

A. No, sir; not on that occasion. On the previous occasion I did,—on the occasion that I did not bid.

Q. Then, we will go back to that. What information 821 did you acquire then as to the number of bidders?

Mr. Blair: From whom?

Judge-Advocate: From any person.

A. From Mr. John Gaynor, I got it.

Q. You did get the information?

A. Yes, sir.

Q. And from Mr. John Gaynor?

A. Yes, sir.

Q. How was it imparted to you?

A. I suggested to Mr. Gaynor that probably there might be some other bid put in. He said, "Oh, no, there is not." I said, "How do you know?" He said, "I will find out," and he wrote a note, and called a bell boy, and sent it off. I don't know where he sent it to, but I thought he sent it to the Engineer's office.

Q. He sent out a note?

A. Yes, sir.

Q. And received a reply?

A. Received a reply, and said, "There are no other bids". He made the statement after he received the reply.

Q. That was for the contract of 1891?

A. Yes, sir.

Q. Having received this contract, work upon which was to be begun August 5th, when did you begin work?

A. On the first day of August, Tuesday morning.

Q. What was the character of your work then?

A. I began to get fascines.

Q. What steps did you take towards entering upon your contract? What help did you gather together?

A. Mr. Gaynor had just finished a contract on the up-river—

Q. Which Gaynor?

A. I don't know which Gaynor; it was the concern of Gaynors, but I don't know which.

Q. Well?

822 A. And there was a contract that had been begun sometime previous to that, and I left it, and went back and finished it during the spring. The hands he had there—I went then in a few days,—I don't remember the exact time, but a very short time,—down to my brush camp. I employed the same foreman he had had, and the principal men in the camp were the ones that had worked for Mr. Gaynor.

Q. Did you yourself employ these men, or did you permit the foreman to employ them?

A. I permitted the foreman to employ the men.

Q. Or to designate them for employment?

A. Yes, sir.

Q. How many men did you employ?

A. I don't remember, but something over twenty.

Q. Do you remember what you paid them?

A. Seventy-five cents a day.

Q. All but the foreman?

A. All but the foreman, and I gave him a dollar.

Q. How did you get your material together?

A. I made; that is, the men made the benches by driving stakes in the ground, and cut the brush, and proceeded to make the fascines.

Q. Those were the ways on which the fascines were to be constructed?

A. Yes, sir.

Q. Where did you purchase the material?

A. I purchased it from Mr. Dunbar Lamar at that particular time. At least, I didn't purchase it; he gave it to me. He didn't charge me anything for it.

Q. What did you first tie the fascines with?

A. I bought from the Augusta Hardware Co. some lath-yarn that they told me Mr. Gaynor had used, and they had left. I asked if that was the proper material to use, and they said, "Yes, it is exactly like what we sold Mr. Gaynor; this is a part of it."

823 Q. When did you first see Capt. Carter after the contract was entered upon?

A. On Wednesday morning, August 2nd.

Q. Who was with him?

A. Mr. Conant.

Q. That was August 2nd?

A. August 2nd; yes, sir.

Q. How many men had you employed when he came there?

A. I don't know, sir; some twenty or thirty probably.

Q. How many fascines had you constructed?

A. I suppose between one and two hundred, something like that. We had just commenced; we did a little work on Tuesday and up to the time Capt. Carter got there on Wednesday morning.

Q. Did Capt. Carter visit the brush camp?

A. Yes, sir. I met Capt. Carter at the hotel, and he introduced me to Mr. Conant. Capt. Carter drove down to the brush camp in the buggy with me, and Mr. Conant drove a buggy behind. Capt. Carter visited the camp, and looked at

the fascines, and said they would not do, and he said he would show me how; and he took a hatchet, and cut the strings of a bundle, and trimmed everything off except the poles, and he put it in, and put several others in the bundle himself, and instructed the men that that was the way he wanted it built; and he said that the lath-yarn would not answer, that I must get wire. I told him that that was exactly the same as that which had been used by Mr. Gaynor, and he said he didn't think so, if Mr. Gaynor used that kind, he would like to know, and I told him I could soon satisfy him when we got back to Augusta, that I would go to the Augusta Hardware Co's. with him, and they would tell him what Mr. Gaynor had used, and we did. Capt. Carter and myself went back and met Mr. Dougherty, who was the senior member of that concern, and Capt. Carter asked him what kind of material Gaynor had used, and he told him what it was exactly, and Capt. Carter told me, "I didn't know he was using this kind of material here, and it will not do for this work." Then after that, I got the wire.

Q. You got your wire, and used it for those fascines?

A. Yes, sir.

Q. How about the instructions as to choking?

A. He told me I must get chain chokers, and use long levers, and that the fascines must be choked down to nine inches. I then got the chain chokers, and made the fascines as near like Capt. Carter told me and showed me as possible to do, and Mr. Conant improved on it a little.

Q. You had to take apart all the fascines which had been constructed?

A. Yes, sir; I took apart all the fascines that had been constructed and used the material to construct others.

Q. Now, had you seen the fascines used in that contract of 1891?

A. Yes, sir.

Q. At that place?

A. Yes, sir; I made myself very familiar with that contract.

Q. Had you seen them constructed?

A. Yes, sir.

Q. Had you been present when they were made?

A. Yes, sir.

Q. Were they choked in the manner in which you were required to choke the fascines?

A. No, sir; they were choked the same as the first ones I made.

Q. And trimmed like those you made?

A. They were not trimmed at all; the brush was cut down, and just put in the racks, and tied with string.

Q. And in executing your contract, you followed that as a standard?

A. Yes, sir; I had seen several contracts on the river, and thought that was the standard, and expected to do the work that way myself.

825 Q. Now, some of these works were upon improvements that had been made under that contract of 1891, were they not?

A. Yes, sir.

Q. You were authorized to use the material that you found there, as I understand your contract?

A. I could not find any.

Q. You were authorized to?

A. Yes, sir.

Q. Did you find any?

A. I found very little. I worked in that vicinity not more than a week. It was very hard to get it, and I had to move farther down the river. I could not get any in that vicinity that would fill the specifications.

Q. Then you had to cut it?

A. Yes, sir.

Q. Did you get any out of the old works?

A. None whatever. I tore out the two dams, and there was not enough brush in the two to measure a quarter of a cubic yard; so little that Mr. Conant would not measure it at all.

Q. How far did you have to carry your stone, to execute the contract?

A. I carried it from three to six miles,—from three to five.

Q. How did you transport it?

A. On barges towed with a steam-boat; I floated it down the river, and towed it back.

Q. What was the name of the foreman that you had employed first?

A. Emory Sibley was the principal foreman. I had Stephen Hill, and the foreman in the brush camp was named Madison Carr,—the same man Mr. Gaynor had.

Q. Now, as to the range stakes, do you remember what your specifications required in the contract?

A. The specifications in regard to the range stakes, 826 It has been so long ago since I read the specifications that I have forgotten.

Q. Not the range stakes, but the supporting stakes through the fascines?

A. The pegs to be driven?

Q. Yes?

A. Required them to be three inches at the small end and six feet long.

Q. The specifications required that?

A. No, sir; the specifications said five feet or over.

Q. But you were required to furnish stakes six feet long?

A. Yes, sir; and, when they were not, Mr. Conant measured them, and rejected them.

Q. How close were the fascines packed in place?

A. In making the mat?

Q. Yes?

A. Packed as close as we could pack them with a lever.

Q. How could you drive such stakes as you have mentioned through the fascines?

A. It was very difficult; we would drive them down as best we could, and sometimes they would hit a rock or a piece of wood below, and we could not get them down. Many of them never got down to the full depth.

Q. How many did you use to a fascine?

A. I used four to a twelve foot fascine, and six to a twenty foot fascine.

Q. Those stakes were driven on the shore protection improvements?

A. On the shore protection and on the jetties also. The jetties were first built with mats, and we put loose fascines on top, and they were pinned with these pins; there were two pins on the mats, and four on the shore protection.

Q. Did you experience any delay in your work?

A. Yes, sir; a great deal.

Q. What caused the delay?

327 A. The delay was caused to a great extent by freshets. As every one familiar with the river swamp knows, after a freshet it is probably ten days when it is almost impossible to do anything in the swamp at all. It is muddy and boggy, and, while the water at the City gauge shows a lower height, it has frequently not gone out of the swamp, and fre-

quently Mr. Conant thought I should work when really the land was covered with water where the fascines grew.

Q. Then on a sunny day, notwithstanding that the water had gone down, it wasn't a good day to work under the contract?

A. No, sir; sometimes a week would elapse before you could get to them, and I have floated fascines out with bateaus to the river bank, in order to carry them up to the work.

Q. From the mattress camp where you made the fascines?

A. Yes, sir.

Q. You had to transport them with horses or mules?

A. I transported them with horses or mules except those I floated to the river bank, and from there were put on barges, and taken up the river in tow.

Q. How far did you have to transport them by wagon?

A. From a few hundred yards to two miles.

Q. How far by steam-boat?

A. From six to twenty-two or twenty-three miles.

Q. Do you remember, under the contract of 1891, where the brush was obtained for making the fascines?

A. Yes sir.

Q. Where?

A. From the same place I began to get the brush on Dunbar Lamar's place, principally, and got some from Mr. Hedge and some from a negro.

Q. There was plenty of brush there that you could have used to make your fascines had you been permitted?

828 A. Yes, sir; similar to that used heretofore.

Q. Similar to that used under the previous contract?

A. Yes, sir.

Q. Do you know whether that contract was let in the name of Gaynor, or did you simply infer that it was a Gaynor contract?

A. I simply inferred that it was a Gaynor contract.

Q. Why did you so infer? Who had charge of the contract?

A. Mr. Wheeler had charge of the contract.

Q. Who was Mr. Wheeler?

A. Foreman for Mr. Gaynor.

Q. At that point or other points?

A. He had been at other points, but at that time, he was at that point.

Q. He had been in the employment of the Gaynors, to your knowledge, before that time?

A. Yes, sir.

Q. Was he in his employment subsequent to that time?

A. I don't know, sir; I never have seen him since.

Q. You never have seen him since that time?

A. Yes; I saw him in Savannah on one occasion, but I don't know what became of him.

Q. While driving these stakes, did you encounter any accident with your fascines?

A. Yes, sir; in driving the stakes on the shore. We had to bind them first with wire a foot from the end, and then every two feet, and, in driving the pins down through them, they would sometimes hit the wire and burst the wire; that would not stand.

Q. What did you do then?

A. Had to take them up and rebind them, and put them back again or put others in their place.

Q. You could find no straight poles in the vicinity?

A. No, sir; none that Mr. Conant considered straight.

829 Q. How near could you find them?

A. I hauled poles all the way from five to twenty five miles; I don't think I got but very few nearer than five miles.

Q. Did you learn of any at any point distant that you could get?

A. Yes, sir; I told Mr. Conant that it was impossible to get the poles he required, and he said that Capt. Carter said when he came up from Savannah the other day, he saw plenty on cars at Millen, and I would have to get them.

Q. How far is Millen from the place where the work was?

A. About fifty miles.

Q. Now, in the work done previously, under the contract of 1891, did you see any stakes driven as you had driven them?

A. Yes, sir.

Q. How many to the fascine did you find in place?

A. Only one.

Q. Of what dimensions?

A. It was about fifteen inches long, not exceeding eighteen,—and about fifteen. We didn't have a rule to measure it at the time.

Q. Was it entire or had it rotted off at the time?

A. It was entire. Several of them in there at that time could be seen on the works.

Q. Those could hardly be called stakes?

A. They were about an inch and a half in diameter stripped.

Q. How did you pull them out?

A. They were a little rotten at the time, and, in order to get them out without breaking them, it was necessary,—the ground was soft,—with another stick, and we dug around it, and then pulled it out.

Q. Was it sharpened at the end?

A. I don't remember whether it was sharpened or just cut off.

Q. Try to remember what its appearance was after you got it out?

A. It was a split piece of wood about an inch and a half in diameter. As I remember, it was about one-quarter of a round piece. The piece had the appearance of having been split in two twice.

Q. Was it sharp enough at the point, as you saw it, to drive in still?

A. Yes, sir; at that point, it could have been driven in. Both end of it were of equal size.

Q. Was there life enough in it to show that it was in the same condition as when driven?

A. Yes, sir.

Q. You are willing to swear, then, that the peg that you drew out was as it was driven?

A. Yes, sir.

Q. And you finally pulled it out with your hands, you say?

A. Yes, sir.

Q. Were there any of your fascines rejected?

A. Yes, sir; very many of them.

Q. At what point?

A. At almost every point where they were carried on the river, and principally after we got to Augusta.

Q. For what reason?

A. If a fascine was six inches or so too short, it was rejected; if it was six inches or more too long, it had to be cut off. As the fascines were unloaded from the lighters, there was a sub-inspector by the name of George Bynum on the wharf, and we had to unload one fascine at a time to enable George to examine the wires, and, if a wire was loose, George would have that thrown aside, and we would bring the men up and rebind them before they could go into the works.

Q. Bring men up from where?

A. The brush camp.

Q. Five miles away?

A. I would let them stay until I got a good pile, and then bring the nearest men.

Q. And you had to cease work, to rebind these fascines?

831 A. No, sir; didn't cease work. Stopped the other work that the men were doing that we brought up to rebind them.

Q. But you lost the work of those men where the fascines were being constructed?

A. Yes, sir.

Q. How about rechoking at that point?

A. That is what I spoke of just now; that they were loose.

Q. Did you have to construct ways there?

A. Yes, sir; had to construct ways for the purpose of rechoking.

Q. When was the high water,—the great freshet or flood in the river?

A. In 1888.

Q. That was the last great freshet?

A. No, sir; we had a tolerably good freshet in 1890, I think on the 9th of March.

Q. Was there any freshet subsequent to the time of the execution of the contract of 1891?

A. Not to amount to anything.

Q. Was there any to cover the works put in under the contract of 1891 which you were repairing?

A. Any high water would cover them except the work up on the bank. The work up on the bank,—the shore protection,—has never been covered with water since it has been put in.

Q. It has never been covered by water yet?

A. No, sir; not the top end of them. I examined them a few days before I came down.

Q. You were unable to carry out the terms of the contract as to the time.

A. Yes, sir.

Q. What were the reasons that caused your delay?

A. In the first place, I didn't expect when the contract was made to be held down to the exact time. I knew I could not complete the contract in that length of time.

832 Q. There was nothing in the specifications about two months time?

A. I don't remember about the specifications. I know I had always been accustomed, in all work I had ever done, where the work got along allright—

Q. You entered into the contract, however, knowing its terms?

A. Yes, sir; I knew all the terms of the contract.

Q. And now, I have asked you as to the causes of your delay?

A. High water was a great cause, but the principal cause was the manner in which Mr. Conant acted towards the work.

Q. He was in charge of the work?

A. Yes, sir.

Q. In what particulars did his action delay you?

A. I was not allowed to do any work whatever unless Mr. Conant was present. If he would get down late in the morning, I would have my whole force waiting to sink the mats, and would have to wait until Mr. Conant arrived. If he wanted to get off in the afternoon, everything must stop until he got back the next day; that occurred frequently.

Q. How many times do you think that occurred?

A. I could not state; as much as a half a dozen or more times.

Q. You asked for an extension?

A. Mr. Conant in sinking the mats would put the range stake on one side of the river, and he would sit on the other side, and I had to put the marker out on the end of the mat. He would sight them, and, as a mat went down, if it was more than six inches out of place, I would have to pull them up or pull them in place, and frequently there was so much rock on the mat, it was impossible to do it, and I would have to stop the work until the steamboat could come there and pull them in place. It probably had gone to the quarry, and I would have to wait until it got back to put them in place. And then

Mr. Conant would not allow me to work on more than one 833 jetty at a time. I asked him frequently to allow me to put on more men and work on more, but he would not, and, in that way, my force was limited to a small number of men.

Q. How many bases of work were there?

A. Forty or fifty.

Q. And you were strictly limited to labor upon one at one time?

A. Yes, sir.

Q. Did Capt. Carter visit the work you were engaged upon frequently?

A. No, sir; not frequently. I think he did about three or four times, or two or three times.

Q. Did you see him there?

A. Yes, sir.

Q. He might have been there oftener?

A. Yes, sir; as much as two or three times; he might have come oftener. I don't know.

Q. You may have seen him three times?

A. May have seen him more. I saw him every time he came, but don't remember the number of times.

Q. Did you have any conversation with him in regard to the hardships you were experiencing?

A. I did.

Q. What complaints did you make?

A. After Capt. Carter came to the work,—I expected to see him at the hotel, and went to the hotel, but when I got to the hotel, he had left and gone to the Union Depot, and I went out to the Union Depot, where I found him, and I told him that it was a great hardship not to receive monthly payments; that I made my calculations on receiving monthly payments, to carry on the work, and he explained to me the terms of the contract, and stated that, unless certain progress was made, he could not make those payments. I had always considered him very friendly to me, he seemed to be, and
834 I asked him if there was no way to get around that. He said, "If you will write to the Secretary of War, or get your Congressman to do that, if he will advise it, I will be glad to do it."

Q. "If he will advise it"?

A. Yes, sir; or allow it,—something to that effect, but that was the sum and substance of it.

Q. (Handing witness paper) What is that?

A. That is a letter written by myself to Mr. Black October 25th, 1893 making the request.

Q. The letter or a copy of it?

A. Copy of the letter.

Q. Will you read it, and see if it is an accurate copy of what was contained in your letter?

A. Yes, sir; as well as I can remember, that is a copy of it.

Judge-Advocate: This is a copy of a letter written by Mr. Twiggs It is offered in evidence—

Mr. Blair: That is not the original; you don't think that is—

Judge-Advocate: Yes, sir; I will read it and put it upon the record. It was written at the suggestion of the accused, and I think it is admissible. All papers are required, as a rule, to go back to the Department, and the originals are in Washington. I would prefer them, but—

Mr. Blair: I have no objections.

Judge-Advocate: (Reading)

“A. J. Twiggs,

Consulting Engineer and General Contractor,

Augusta, Ga., October 25, 1893.

“Hon. J. C. C. Black,
House of Representatives,
Washington, D. C.

“Dear Sir:

“I wish to ask a favor of you if it will not give you too much trouble. I have the contract for building the jetties in the Savannah River below Augusta. My contract requires that \$10,000 worth of work shall be done per month. On account of the continued freshets and storms, I have been unable to accomplish this amount. There will be due me at the end of this month about \$5,000. Capt. Carter says he can't pay me anything on the work unless the Secretary of War authorizes him to do so, and advised me to write to you and get you to see the Secretary and ask him to allow the payments; that he will recommend it if the matter is referred to him. He was here today and examined the work done. He says that it is entirely satisfactory and had no fault to find. I am doing the work for about half what has been paid for this work heretofore and have accomplished twice as much as has ever been done before for the same amount of money, but as you know the work cannot be carried on without money to meet expenses,—if the payments are made monthly, I will be able to finish the work in good shape and the Government will be benefitted as well as myself. If they are not, I am afraid I will be forced to give up the work, as you know my means are limited. It seem to me that it is to the interest of the Government to encourage a contractor who does satisfactory work at a smaller price than has ever been paid before. I would not trouble you, but this is a very important matter to me. It means all that I have in the world, and Captain Carter advised me to make this request of you, as the only means by which he could make any

payments. I hope this will not give you any trouble or inconvenience.

"I would not ask it if it could be avoided. I will be glad if you will attend to it at once,—as every day means much to me.

"With kind regards, etc.,
I am, yours very truly,

A. J. TWIGGS.

836 "Respectfully referred to the Secretary of War with the request that same be allowed.

J. C. C. BLACK."

And then there is simply a brief placed below. (Reading)

"Augusta, Ga., October 25, 1893.

"A. J. Twiggs, Contractor.

"Asks that Secretary of War authorize Capt. O. M. Carter to make monthly payments to him for work done on jetties in Savannah River, below that City"

"3rd indorsement.

Office Chief of Engineers, U. S. Army,

October 28, 1893.

"Respectfully referred to Capt. O. M. Carter, Corps of Engineers, for report.

"To be returned.

"By command of Brig. Gen. Casey:

"H. M. ADAMS,

"Major, Corps of Engineers.

"4th indorsement.

"United States Engineer Office,

"Savannah, Ga., October 30, 1893.

"Respectfully returned to the

"Chief of Engineers, U. S. A.,

"Washington, D. C.

"With the statement that Mr. Twiggs has been at work under his contract nearly three months and has not done in all that time as much work as the specifications require to be performed in 15 days. He was delayed about 14 days by high water. But the reason for the very unsatisfactory progress made is that he is not familiar with the work, has unskilled foremen, and an insufficient force of laborers. From present indications, he will not be able to complete the
837 work, if at all, for several months. This delay will cause the loss of the best working weather and may postpone the completion of the work until next summer.

"The terms of Mr. Twiggs' contract prohibit any payment

until all of the conditions of the contract have been complied with. The conditions of the contract not having been fulfilled no payments have been made, and Mr. Twiggs was informed that none could be made until the terms of the contract were carried out.

"He is in error in stating that I advised him to make a request that I be allowed to make payment and that I would recommend payment, or that I stated that the progress of the work to be satisfactory.

"I distinctly informed him that the progress of the work was very unsatisfactory and that I should make no payment unless the terms of the contract were changed, or unless I was ordered by superior authority to do so under the terms of the present contract.

"O. M. CARTER,
"Capt., Corps of Eng. U. S. A."

Q. (Judge-Advocate continuing examination) Did you receive any money under the contract until after its completion?

A. None at all, sir.

Q. You had two delays, as I understand, of fourteen and sixteen days?

A. That was the amount allowed, yes, sir.

Q. Two extensions I should have said. And then you entered into a supplemental contract for the completion of the work?

A. Yes, sir.

Q. Mr. Conant still remained in charge of the work under the supplemental contract?

A. He did.

Q. What part were you allowed to take in the work being done?

838 A. I was allowed to continue to do what work I could. I had to give up a part of my plant to Mr. Conant in order for him to—

Q. What part of your plant did you give up?

A. One lighter and the use of the steamboat when they should require it.

Q. How much of a force of men did he employ?

A. That is hard to state; he employed everybody in the country that wanted work.

Q. How large a force? Can you estimate?

A. It would be hard to say. I would not be surprised if it did not reach one hundred men or more.

Q. It was the same class of labor that you had employed?

A. Some of it was, and some of the men I would not employ.

Q. I mean the same class of labor,—they received the same pay?

A. Yes, sir; the same pay.

Q. That walk in life; the same character of laborers, not as to the individual character of each laborer or as to the value of each one, but the same class?

A. Yes, sir.

Q. Under the terms of the contract, you were required, in the final adjustment of your contracts, to pay for such labor as he employed?

A. Yes, sir.

Q. What were you required to pay for the laborers employed in the manufacture of fascines?

A. Seventy-five cents.

Q. What had you been paying?

A. Seventy-five cents.

Q. What were you required to pay under the supplemental contract as expended for the same class of work?

A. From seventy-five to ninety cents.

Q. How do you make the distinction?

A. Some paid seventy-five, some eighty-five and some 839 ninety cents, and I think there was one man at \$1.25.

Q. What was his employment?

A. I don't know that it was any more than any of the others, except that he was at work on one of the boats. I had hired the same man for seventy-five cents before he went with Mr. Conant.

Q. The same man you had been paying seventy-five cents?

A. Yes, sir.

Q. What other expenditures were made and charged to you?

A. He hired a horse from the stable whenever he so desired. I think that amounted to sixty or seventy-five dollars.

Q. That was charged to you in your final adjustment?

A. Yes, sir.

Q. How was it charged?

A. I don't know exactly how it was charged. I never had an itemized statement furnished me at all. Then on one occasion Mr. Conant broke a buggy at the wharf, and sent that to the black-smith shop and had it repaired, and charged that. His telegrams were charged, and his room rent at the

hotel, and offices expenses here at Savannah \$450.00, or in that neighborhood, were charged.

Q. Office expenses in work on your contract?

A. Yes, sir.

Q. The supplemental contract that would be?

A. The supplemental contract or the principal contract, it don't appear which, but I remember something over four hundred dollars for office expenses.

Q. Was there anything constructed for use at your expense?

A. Yes, sir; one lighter.

Q. How much was the cost of that to you?

A. I have no idea. I never saw an itemized statement. Mr. Conant said the other day that it cost \$400.00.

Q. It was turned over to you at the completion of the contract?

A. No, sir; it was brought to Savannah, and I wrote Capt. Carter several letters on the subject, and I think he referred the matter to the Secretary of War, or somebody, and he wrote me that he had received authority to turn it over to me.

Q. And was it turned over to you?

A. Yes, sir.

Q. What was its value when it was turned over to you?

A. Very little; it was a poorly constructed lighter and very small.

Q. How much could you get one constructed for like it?

A. That lighter contained about four thousand feet of lumber, \$10.00; about \$2.00 worth of nails, about \$2.00 worth of caulking, and put the labor at \$50.00; it would be about \$90.00 for the lighter.

Q. Do you think you could construct one like it for one hundred dollars today?

A. Yes, sir.

Q. Of the same dimensions?

A. Yes, sir.

Q. And in fact, its counterpart?

A. Yes, sir; I have built a good many lighters.

Q. How many inspectors were used under the supplemental contract?

A. Five I think.

Q. At what rate of compensation, do you know?

A. I do not, sir.

Q. You don't know how it was charged, do you?

A. No, sir. In saying five inspectors, I included this man George Bynum, who Mr. Conant put to inspecting the fascines at the wharf. I think there were four white men.

Q. What was each inspector doing?

A. Well, Mr. Woolfin, I think, had charge; he and Mr. Ford were looking after the work Mr. Conant was having done.

Q. That is, they were foremen as well as inspectors?

A. They were in the capacity of foremen instead of inspectors. Mr. Hale was inspector on my work, and Mr. Conant overlooked him, and Conant and Bynum inspected the fascines,—went down the river occasionally where they were loaded on the lighters, and there was a man by the name 841 of Gardner. I don't know what he did. Every time I saw him, he was in the buggy with Mr. Conant; he was an assistant of some kind.

Q. Were you required to pay for his services?

A. Yes, sir.

Q. Do you know how much a day?

A. About two dollars a day, I think.

Q. Do you remember the total amount that was expended under the supplemental contract by Mr. Conant's directions?

A. Approximately, I do.

Q. Approximately, how much?

A. About seven thousand dollars,—a little over seven thousand dollars I think.

Q. Do you remember what your total account against the Government was under the contract?

A. I think it was about seventeen thousand dollars; somewhere in the neighborhood of seventeen thousand dollars,—that is, including Mr. Conant's work; my account outside of that was thirteen thousand dollars and something.

Q. That was for the jetty work?

A. Yes, sir.

Q. How much for the shore protection?

A. That is all the same, sir.

Q. Your total bill was \$13,170.00?

A. Yes, sir; about thirteen thousand dollars, my recollection is.

Q. You paid about in the vicinity of \$7,000?

A. \$7,000, yes, sir.

Q. How much did you get for that work which you paid seven thousand dollars or more?

A. Less than four thousand dollars.

Q. You never have had an itemized statement sent to you?

A. No, sir. I have never seen one. I saw that (paper shown witness) paper I suppose, for that is my signature. I signed the voucher for it; that is all I have had.

Q. (Handing witness paper) That is your signature?

A. Yes, sir.

Judge-Advocate: We offer now in evidence the "voucher No. 50, month of February, 1894, Appropriation for Improving Savannah River; applied to that work between Augusta and Savannah. Accounts of O. M. Carter, Capt., Corps of Engineers. Pay to Albert J. Twiggs, etc., etc." A copy of this will be attached to the record marked Exhibit No. 65.

Q. (Examination continued) When the Government was carrying on a part of the work under that supplemental contract, do you know how much was paid for rock by Mr. Conant?

A. \$1.50 a yard.

Q. Where delivered?

A. Delivered in the quarry.

Q. You own a quarry, do you not?

A. Yes, sir.

Q. Near to the quarry from which that stone was quarried?

A. About four or five hundred yards.

Q. As easy of access as the quarry from which the stone was taken?

A. Equally so.

Q. How much could you have supplied it for at the point where it was delivered?

A. Do you mean at the cost? I could have supplied it at my contract price.

Q. How much would it have cost you to deliver it?

A. Deliver it in the same place,—less than seventy-five cents.

Q. You made an effort to deliver it?

A. I made an effort; yes, sir.

Q. You asked to be permitted to furnish the stone?

A. Yes, sir; I did. I asked Mr. Conant and Capt. Carter also at the Planters Hotel.

Q. Your quarry could have furnished it?

843 A. Yes, sir; at any time. There was no time that it could not have furnished double the amount of stone necessary. I frequently had to take off the quarry force.

The stone accumulated so I had no place to put it, and, when I quit work, there was over 200 yards left.

Q. There was stone enough quarried to have done all this work?

A. No; not quarried, but it could have been.

Q. Do you know the condition of the other quarry?

A. Yes, sir.

Q. Had there been more stone quarried there than at yours?

A. A good deal more; mine was a new quarry, just opened for this work.

Q. Was there as much stone that had been quarried and was on had for delivery at that time?

A. No, sir.

Q. That quarry had to be worked to get the stone and your quarry had the stone ready for delivery?

A. Yes, sir.

Q. How much?

A. I could not say; I would keep the force of hands necessary to have the stone ready all the time, and I would frequently take the hands away from the quarry, and work them elsewhere.

Q. And for seventy-five cents, you could have delivered it at the point where it was delivered?

A. Yes; I could have delivered it on the lighter.

Q. How much for lighterage to the point where it was to be used?

A. It would have been loaded, and the cost of the lighterage down was very little. There would have been some cost to tow the lighters back.

Q. And the cost of handling the stone?

A. Yes, sir.

Q. You can estimate that?

A. Mr. Conant loaded the stone himself; furnished the 844 wheel-barrows and the men to load it.

Q. But what I am trying to get at is what you could have done it for?

A. Counting the stone at 75c at that point of delivery,—the quarry—

Q. Then how much could you have got it to the point for where it was put in use and charged for at \$1.74?

A. I could have gotten it for an actual cost of \$1.00 put into the work.

Q. Had you been permitted, you could have saved that
74c?

A. Yes, sir; very easily.

Q. You are confident of that?

A. Yes, sir.

Q. You stated that you had a conversation with Capt. Carter and Mr. Conant about using this stone,—what was that conversation?

A. I told Mr. Conant first that I could furnish the stone, and he said, "Well, I will let you do it, and I will write to Capt. Carter about it," and two or three days elapsed, and he told me that Capt. Carter said it could not be used, and he would have to get it elsewhere. In the meantime, Capt. Carter came up, and Mr. Rees went to the Planters Hotel to see Capt. Carter at the time, and I met him there,—met Capt. Carter, and went to his room, and told him that I could furnish every bit of the stone without any trouble, and he told me he would look into the matter, and let me know later. He didn't say whether I could or could not, but I didn't hear anything more from him, and I didn't do it.

Q. Was any grading of banks done by you?

A. Yes, sir.

Q. Is that called for by the contract?

A. I think it is, sir.

Q. Was there any payment to be made for grading the banks?

A. None whatever. It was in the specification that no extra charge for the preparation of the bank will be allowed.

Q. How were you required to grade the bank?

845 A. I was required to grade the bank from the water to the top of the bank just as Mr. Conant saw fit to have it done.

Q. To what depth would you have to cut to grade?

A. It would be very great; in one instance, six feet.

Q. The previous work, had it been graded at all?

A. No, sir; it may have been levelled off a little, but showed no evidence of having been graded at all.

Q. Had it not been cut below the surrounding surface?

A. No, sir; not at all. In other words, it stands today like it was put in,—all extends above the surface.

Q. I show you a photograph which is known in this case as Exhibit No. 56; what is that?

A. That is the top end of a shore protection built by Mr. Gaynor, or Mr. Wheeler for Mr. Gaynor.

Q. Do you recognize it?

A. Yes, sir.

Q. What is that covered with?

A. That is covered with brick-bats.

Q. You have seen it within a recent period?

A. Yes, sir.

Q. You have seen it; do you know when it was put on?

A. It was put on sometime during the,—I cannot say exactly when,—but during Mr. Gaynor's contract.

Q. The contract of 1891?

A. I don't remember whether in 1891 or the one previous.

Q. Do you remember the date of the one previous?

A. Two years before that.

Q. Was that covered by the great freshet of 1889? It was in 1889, I believe you said?

A. 1888; yes, sir.

Q. Then it had not been constructed in 1888?

A. It hadn't been constructed in 1888.

846 Q. Was it covered by the freshet of 1890?

A. In 1890 it would have been covered if there—I think that protection was built under the last contract; it is possible that it might have been built under the one previous.

Q. Would there not be the same evidence of the previous freshet about it?

A. Yes, sir; there is no mud on the rock and none settled on the brick.

Q. Do you remember when you first saw the brick on that place?

A. I saw them hauled there.

Q. By whom?

A. By wagons owned by Joe Murray.

Q. At the time the improvements were going on under the contract for the Government?

A. Yes, sir; they were hauled from a brick-yard on the Port Royal Road known as Bassford's Brick Yard.

Q. I hand you a photograph known as Exhibit No. 57; what is that?

A. That is a jetty on the bar at Sand Bar Ferry built by Mr. Gaynor.

Q. That was built under the contract of 1891?

A. I think it was. There are only two jetties remaining now of Gaynor's that have not been repaired, and that is one of them.

Q. That is in that condition at present?

A. Yes, sir.

Q. When was this photograph taken?

Mr. Rose: Was he present?

A. I was present when it was taken. It was taken Nov. 22nd.

Q. That is your writing?

A. No, sir; my son's writing.

Q. Did you find any indications of brush left there in the fascines?

A. No, sir; none whatever. In one of them, there are evidences of a few poles the fascines were tied to, but no other indications of brush at all on either of them.

Q. When was that taken? I think I have asked you that.

847 A. 1897.

Q. You were present when these were taken?

A. Yes, sir.

Q. Were these all taken at one date,—all these pictures?

A. Yes, sir; all within a few hours of each other.

Q. I hand you exhibit No. 58; what is that?

A. That is the other jetty I referred to,—the pieces I referred to as being shown in the photograph. Here is one, and right in the end there (indicating) are two more, as they show on the work

Q. That is all the brush you could find?

A. Yes, sir.

Q. Did you find any pegs there?

A. No, sir; no pegs at all.

Q. I hand you Exhibit No. 59; what is that?

A. That is a spur dam on the Georgia side just above Kirkpatrick Bar.

Q. That is your work?

A. Yes, sir.

Q. When was that put in?

A. In 1893.

Q. And this photograph was taken, as you say, in November, 1897?

A. 1897; yes, sir.

Q. Four years after the completion of the work?

A. Yes, sir.

Q. I hand you Exhibit No. 60; what is that?

A. That is a shore protection farther up the river, probably a quarter of a mile.

Q. Constructed by you under the same contract?

A. Yes, sir.

Q. In 1893?

A. Yes, sir.

Q. Photographed in Nov., 1897?

A. Yes, sir.

848 Q. I hand you exhibit No. 61; what is that?

A. That is a photograph of a jetty built by Mr. Gaynor and extended about one hundred feet by me, I think, and repairs were put on top of it from the shore out to the end.

Q. And that is as you left it?

A. As I left it.

Q. That was under the same contract,—1893?

A. Yes, sir.

Q. I think you have had no other contract since?

A. No, sir; I have done no work down on the River since.

Q. And it was taken in November, 1897?

A. Yes, sir.

Q. I hand you Exhibit No. 62; what is that?

A. That is a spur dam just above, the first one above my dam that you showed me,—on the Georgia side.

Q. That is your work?

A. Yes sir; that was meant particularly to show the shore protection. The light was bad when it was taken. The rock comes up there, and on top of the hill, does not show in the photograph.

Q. It becomes a shadow there in the likeness?

A. Yes, sir.

Q. I hand you now Exhibit No. 63; what is that?

A. That is a jetty too, or rather a shore protection on top of the hill next to these brick; it is the nearest one to it.

Q. Do you see the stakes there that were driven under your contract?

A. Yes, sir.

Q. Many of them?

A. There are probably a dozen left that were not knocked down.

Q. Are there any stumps of trees left there?

A. No stumps; only the trees that grow there.

Q. I mean thos that are cut off here (indicating)?

A. No, sir; they are all stakes, and show where they
849 have been driven with a maul. I placed my hat there when it was taken, so you could compare, to show the size of the stakes.

Q. An ordinary size hat?

A. The same hat I am wearing today.

Q. For the purpose of comparison, to show the size of the stakes?

A. Yes, sir.

Q. In that first Exhibit I showed you; you said you saw brick-bats being hauled there by Joe Murray,—who is Joe Murray?

A. A man who owned teams and hired them.

Q. Do you know who he was employed by?

A. By the Gaynors' firm.

Q. Employed to carry those brick-bats?

A. Yes, sir.

Q. You said you went into partnership with Mr. Gaynor in the contract of 1891, by which you were to have the rock part of that contract and \$500.00 additional; did you carry that contract out?

A. I did so far as I was allowed to. I didn't get any of the rock at all.

Q. You were simply willing to carry it out?

A. Willing to carry it out; I carried my machinery to the quarry preparatory to beginning work.

Q. Why didn't you carry it out?

A. Mr. Wheeler, who was in charge, told me that Mr. Gaynor had said nothing at all to him about it, and he didn't know me in the business; that he was going to do the work himself, and that I had better write Mr. Gaynor. I wrote Mr. Gaynor several times, and never got a reply from him. In the meantime, Mr. Wheeler went on with the work.

Q. Did you get any compensation for what you did do?

A. Yes, sir.

Q. From whom?

A. From Mr. Wheeler through Maj. W. T. Gary, his attorney in Augusta.

850 Q. As a result of legal proceedings?

A. Yes, sir.

Q. Instituted by yourself?

A. Yes, sir; he compromised the matter.

Q. You have testified that you saw the fascines used under the contract of 1891, and also as to the construction of those used under your contract?

A. Yes, sir.

Q. Did you see them made into mattresses at each place?

A. Yes, sir.

Q. How differently were they made, if they were differ-

ently made, when put into the mattresses,—how differently were the mattresses constructed?

A. Mr. Gaynor's mattresses were constructed two or three different ways according to the depth of the water he put them in. If the water was very deep, he would put about four poles or six poles to the mat, to hold them together, two on one end and two on the other end and two on the sides, and usually two poles were laid flat on the lighter,—he had no ways to build them on,—and the fascines were laid on top of them and bound with string; sometimes a second pole was put on top, and the two poles were bound together.

Q. Did you ever see any wire used there?

A. None at all. I didn't know that wire was to be used in the construction of mats from what I saw there.

Q. Did you ever see anything different used for tying fascines together than that you used in the first fascines constructed by you?

A. No, sir; except in those constructed by me, I never saw anything but lath-yarn.

Q. How did you construct your mattresses?

A. The poles had to be the full length of the square of the mat, whatever it happened to be, except in case of the 851 32 mats, when the poles had to be 32 feet long one way, but were allowed to be pieced the other. I had to make ways on the lighter and on the wharf, to build the mats on, and slide them in the water. The poles were first put down, and in squares of four feet a second row of poles crossed them; they were wired together, and the first fascines placed on the poles and wired to the poles. The other fascines were crowded against them until we got on half a dozen, and then we used the lever to push them down as tight as possible until the mat was finished. Then a second row of poles was put on, and wired through to the bottom. A man got underneath the fascines and we had to make a hole through them the best way we could, and we had an iron hook that we ran through there and caught the bottom pole with the hook,—then the lever was hooked into a pole which was run through the top of this hook, and two men would get on it, and press the fascines as close as possible, and then they were wired, and on top of this was a second row of poles wired again with double wires, so as to make two ties at every point.

Q. Those fascines constructed in that way were, of course, much heavier than those you had constructed before Capt. Carter reached the camp?

A. Yes, sir.

Q. How many of those could you transport in a wagon at one time?

A. It depends upon the weather. After a freshet, when the ground was soft, I could not sometimes put over four on a two horse team. Sometimes I would have to have two extra mules to haul them, and four or five was a good load for four mules. Then again, when the road was good, we could sometimes put on six.

Q. Now, the amount of labor that you yourself performed on that contract, did the amount you received for it come within your expenditures?

A. Very nearly.

Q. It didn't prove a loss to you?

852 A. But very little, if any.

Q. How did you come out on the part that was done for you by the Government under Mr. Conant?

A. Something over three thousand dollars loss; about three thousand I think.

Q. How much did you lose on the whole contract?

A. I lost between three and four thousand dollars; I don't remember exactly.

Cross-Examination by Mr. Blair.

Q. What kin are you to John D. Twiggs, Jr.?

A. He is my son.

Q. Did he take those photographs?

A. Yes, sir.

Q. What kin are you to Marion Twiggs, of Augusta?

A. He is my youngest brother.

Q. What kin are you to Paul E. Twiggs?

A. He is my first cousin.

Q. How did you happen to be with your son when these photographs were taken?

A. I took him down there for the purpose of taking them.

Q. At whose suggestion?

A. My own suggestion.

Q. Just out amusing yourself taking photographs?

A. No, sir.

Q. Who asked you to have them taken?

A. I asked myself.

Q. Did you expect to sell them or what?

A. No, sir; I did not. Capt. Gillette tried to get a pho-

tograph and his camera failed; something was the matter with it, and it would not work, and I think I told him that I had a son who had a camera and was tolerably expert in the business, and I would have him to take some, and send them down to him.

853 Q. And he acquiesced in that?

A. Yes, sir.

Q. You volunteered to Capt. Gillette to take these photographs?

A. Yes, sir.

Q. And who selected the sites and places to photograph?

A. I did myself.

Q. You picked them out?

A. Yes, sir. I picked out Mr. Gaynor's because they were the only ones left.

Q. In the 1891 contract, you say you made an agreement with Mr. Gaynor to do the stone work?

A. To get out the stone.

Q. And he gave you five hundred dollars in addition?

A. Yes, sir.

Q. And you then agreed not to put in your bid?

A. I did.

Q. You had your bid all prepared; you were going to put in a bid?

A. Yes, sir.

Q. Told Gaynor you were?

A. Yes, sir.

Q. And then in consideration of five hundred dollars and the stone contract, you didn't put it in?

A. I did not; no, sir.

Q. You say that in 1893 Gaynor became very wicked, or implied that, and offered you one thousand dollars, and you indignantly rejected that?

A. I didn't say indignantly.

Q. You said the Gaynors did not have money enough to keep you from putting in a bid?

A. Yes, sir; I said that.

Q. It was an awful bad thing in 1893 for anybody to offer you money not to bid?

A. Not any worse than any other time, I suppose.

854 Q. Not any worse than it was in 1891, was it?

A. No, sir.

Q. What occasioned your change of heart between 1891 and 1893?

A. No change of heart or anything else.

Q. But you were indignant in 1893, were you not, when he offered to buy your bid?

A. Yes.

Q. But you were not indignant in 1891?

A. I didn't consider it buying in 1891. I considered that I had an interest in the contract with him, and he had deceived me in that one, and I had reason to believe he would do it again.

Q. You said just now that you cut part of those fascines a hundred to a hundred and twenty-five, that you built immediately after the second day of August, when Capt. Carter came up there?

A. Prior to the 2nd of August.

Q. You cut them all apart?

A. Yes, sir.

Q. And not one went into the work?

A. Not a single, solitary one.

Q. How many were there?

A. I didn't count them; judging from the pile, there was over one hundred.

Q. Suppose Mr. Conant testified here that about seventy fascines that you had constructed after that did go into the work?

A. It doesn't make any difference if an angel testified it, my statement is the fact.

Q. It depends upon the angel?

A. No.

Q. So Mr. Conant is wrong in that, is he?

A. He certainly is.

Q. You say you got Mr. Gaynor's foreman, Madison Cobb?

A. Yes, sir.

Q. Was he an expert man in the making of fascines?

855 A. I consider him such.

Q. You got him for that?

A. Yes, sir.

Q. And he knew all about how the fascines were made when Mr. Gaynor was doing the work under the 1891 contract?

A. Yes, sir.

Q. Suppose Mr. Conant should say that he never had any experience whatever in fascine or mattress work, what would you say to that?

A. Say it wasn't true.

Q. Suppose he reported to Capt. Carter, "I find that Mr. Twiggs' foreman on the works had never seen a mattress, and knew nothing of jetty work"?

A. That referred to Sibley, and not the man in the mattress camp, in the fascine camp.

Q. Suppose he made such a statement as that about Sibley, would it be true or not?

A. Sibley had never seen the work done prior to that, but I had, and I thought Mr. Sibley had ordinary intelligence, and I had intelligence enough to show him. I never failed to instruct a foreman before.

Q. Suppose Mr. Conant testified here that he only required you to drive two stakes on a twelve foot and four on a twenty foot fascine, what would you say to that?

A. I would say he had forgotten what he did do.

Q. Suppose Mr. Conant had testified that he paid that quarryman, Reese, \$1.00 a yard for stone on the barge, what would you say about that?

A. I would say that Mr. Conant is mistaken again, because I saw Mr. Conant's men loading the barges, and he bought the wheel-barrows, and charged the wheel-barrows to me, to load it with.

Q. Did you ever seen his account?

A. I never had a detailed statement, but he paid 856 these men by the day, and his men loaded them; the rest of the men didn't touch them.

Q. How do you know Mr. Reese didn't pay the men?

A. Because he told me he didn't.

Q. That is your only reason?

A. Yes, sir.

Q. You say that the man Murray who was employed by Mr. Gaynor, threw the bricks on that work?

A. I say he hired the teams to do it; Murray's teams did the hauling.

Q. Murray's teams did the hauling?

A. Yes, sir.

Q. That threw those bricks on that shore protection?

A. Yes, sir.

Q. And you say Mr. Gaynor's foreman employed Murray?

A. Yes, sir.

Q. How do you know that?

A. Because I saw Gaynor's foreman and men placing the brick where he threw them on there, while I don't know abso-

lately that he employed him; somebody else might have employed him.

Q. You never heard the contract of employment made?

A. No, sir.

Q. Never saw any money pass?

A. No, sir.

Q. Just because the brick were thrown on there, and you saw some men who worked for Mr. Gaynor distributing them, you make the assertion that Gaynor employed that man to haul the brick?

A. That was the natural inference from that.

Q. You don't make it from any other fact?

A. No, sir.

Q. When were you paid for your work?

A. After the work was completed.

Q. What month?

857 A. The voucher shows in February, I think.

Q. Your receipt is dated the 21st day of February, 1894,—is that correct?

A. I suppose it is.

Q. Do you know whether it is correct or not?

A. The records are more correct than my memory; that is my signature.

Q. Now, do you know, as a matter of fact, that you were paid in February, 1894?

A. I remember that I was paid the day I signed that voucher.

Q. Do you remember whether that was in February or March?

A. From the date of the voucher, I would say it was in February?

Q. You are sure it was not in March?

A. If it was, it seems to me that the voucher ought to be dated that way.

Q. Did you ever tell anybody in Augusta early in April that the Government had not paid you a dollar?

A. No, sir.

Q. Did you ever tell a man by the name of Browton, in the employ of the Augusta Hardware Co., between the first and the eighteenth day of April, that the Government had not paid you a dollar on that contract of 1894?

A. I don't know a man by the name of Browton.

Q. Do you know a man in the Augusta Hardware Co.?

A. Yes, sir.

Q. Do you know a man by the name of John Broughton?

A. No, sir.

Q. Do you know anybody concerned in the Augusta Hardware Co.?

A. Yes, sir.

Q. You know the corporation,—you know that there is such a company?

A. Not now; there was such a corporation or company.

Q. There was in 1894?

858 A. Yes, sir.

Q. Did you know anybody connected with that company in 1894?

A. Yes, sir.

Q. Did you ever say to anybody connected with that Company, in the month of April, 1894, that you hadn't been paid one dollar by the Government on this contract?

A. No, sir; I did not. I said this. I remember probably what you are driving at. I said that I hadn't made a dollar; that the Government put hands on at my expense, and expended everything that I had earned. I didn't say that I hadn't been paid a dollar I said, instead of making anything, I had lost all I put into it.

Q. You didn't say that you hadn't yet received a dollar for the work done?

A. No, sir.

Q. Therefore you were unable to pay.

A. No, sir; I said I hadn't made any. I borrowed money from the bank in Augusta—

Q. Never mind that. I want an answer to my question. You didn't say that?

A. No, sir; I did not say that.

Q. You said Lamar gave you the brush you put into those fascines?

A. Yes, sir; everybody did; I didn't pay out a nickel for it.

Q. You didn't promise to pay a dollar to anybody for the brush?

A. No, sir.

Q. A free gift was it?

A. Yes, sir.

Q. Mr. Conant testified that the material out of which you made the fascines was hauled only a distance of five or six miles; you said just now that some of it was hauled as far as twenty miles?

A. Yes, sir; some of it over twenty.

Q. So if Mr. Conant made that statement, it is not correct?

859 A. It is not correct.

Q. Mr. Conant must be a pretty bad man?

A. I thought he was when he inspected my work.

Q. You say you could have put that stone in the work for one dollar a yard?

A. At an actual cost of one dollar, yes, sir.

Q. You expected to make the seventy-four per cent out of the Government?

A. I did.

Q. You didn't have any agreement to divide that with anybody?

A. No agreement at all to divide it.

Q. Going to keep that yourself?

A. Exactly, sir.

Q. You had a difficulty with Mr. Conant up there, didn't you?

A. I did.

Q. And your difficulties finally culminated in an encounter?

A. I slapped his face, and he ran; that was all the encounter there was.

Q. Some people would call that an encounter?

A. I didn't call it much.

Q. It wasn't much for you you mean?

A. No, sir.

Q. Didn't you report to Capt. Carter that Mr. Conant was armed,—that he had a pistol or something?

A. Yes, sir; I have that letter, if you want it; I wrote Capt. Carter

Q. Was it true that Mr. Conant had a pistol?

A. I thought so; he always carried one. I didn't see it, but the manner in which he acted after I struck him, led me to believe he did.

Q. Did he try to draw it?

A. I thought he did, and I rushed on him, and that time I was going to do him up sure enough, but he out ran me.

Q. Did Capt. Carter ever tell you that Mr. Conant
860 reported that he did not have a pistol at that time?

A. Yes, sir.

Q. What did you say to that?

A. I told him it might have been true and might not. I frequently saw him with a pistol, and he told me he carried it,

and from the movements he made, I expected him to draw his pistol.

Q. Now about the buggy,—you say that Mr. Conant hired a buggy, and charged it up to you?

A. Yes, sir.

Q. Whose buggy?

A. Mr. Geo. H. Hernigans.

Q. That wasn't in the voucher you signed?

A. It wasn't put down as one of the items.

Q. But whose buggy did he have repaired?

A. Mr. Geo. H. Khernigan's. A man by the name of W. R. Stafford, near the City wharf, repaired it.

Q. Did you ever ask for an itemized statement about this buggy, or any other repairs,—about the buggy that was hired and the buggy that was repaired?

A. No; I said I would like to get an itemized statement of the full account, and that voucher you see is the only one I got.

Q. Then you don't know positively that he charged the buggy hire to you?

A. Yes, sir.

Q. How do you know that?

A. He Conant, told me so.

Q. When?

A. Told me it was being done. Prior to the time that the Government took charge, I loaned Mr. Conant a buggy whenever he wanted one, and I offered him the same buggy to use, to reduce expenses, and he would not accept it. He said he had authority to hire one, and that he would hire it from the livery stable.

861 Q. Where did this conversation take place?

A. On the wharf somewhere; I don't remember the exact spot.

Q. About the day?

A. About the date he was putting on that force.

Q. After the supplemental contract was made?

A. Yes, sir.

Q. Was anybody else present at that time?

A. I don't remember whether there was or not.

Q. How do you know the room rent was charged to you?

A. I don't know that the room rent was charged to me except what Mr. Conant told me.

Q. When did he tell you that?

A. He told me that all the expenses were charged to me,

and he was allowed so much for office rent, and he put in his room, and I went to the Hotel after that, and the Clerk told me he made out his vouchers.

Q. You didn't see the vouchers?

A. No, sir.

Member of the Court: I move that we adjourn until tomorrow morning.

The Court: What hour shall we adjourn to?

Judge-Advocate: Until eleven o'clock, if you please.

The Court: If there are no objections, the Court stands adjourned until tomorrow morning at eleven o'clock a. m.

(At 3.00 o'clock p. m. Court adjourned.)

THOMAS F. BARR
*Col. & Asst. Judge Adv. Genl.
Judge Advocate*

862

United States Court Room,
Savannah, Georgia,
February 1st, 1898.

The Court met pursuant to adjournment at eleven o'clock, A. M. this morning.

Present:

All the members of the Court and the Judge Advocate.
The accused, his counsel, and the reporter, G. T. Cann,
were also present.

President: The Court will come to order. All are present.

Judge Advocate: (Having called Mr. A. J. Twiggs to the stand) You are still under oath Mr. Twiggs, you will remember.

Mr. Twiggs: Yes, sir.

ALBERT J. TWIGGS, a witness for the prosecution, having been previously duly sworn, testified as follows:

Cross-Examination (Continued)

Questions by Mr. Blair.

Q. Mr. Twiggs, suppose it had been stated by Mr. Conant that he urged you from time to time to increase your force

and you promised to do it, what would you have to say to that?

A. I would have to say this sir; that he did tell me that I could work more men, and I asked him where and he said why I could put one hundred men on this jetty, from one end to the other, I thought there was not room for them and I thought my judgment was better than his.

Q. He only permitted you to work on one jetty at a time?

A. Yes, sir, only one, and he said I could work one hundred men on the jetty in a space of one hundred feet.

Q. Did you ever admit that Mr. Conant's foreman did more work with the same number of men than your foreman did?

863 A. No sir.

Q. Suppose Mr. Conant said that you had admitted that?

A. I should say it was untrue, sir.

Q. Did you ever try to hinder and delay Mr. Conant in his work?

A. Never, sir. On the contrary I always quit my work to accommodate him. It was frequently the case that I had to stop work with the steamboat and turn the boat over to him.

Q. Did you ever hamper him and make excuses for not turning over the steamboat?

A. No sir, I never did. The steamboat was always turned over when it appeared. Some times it was down the river and we would have to wait until it could come.

Q. Then if Mr. Conant should say that you did hamper him by not bringing the steamboat up promptly, and by interposing captious delays on him, what would you say about that?

A. I should say it was untrue, sir.

Q. Did you ever tell Mr. Conant on Monday or Tuesday that a certain Mr. Evans, a hardware merchant or wire merchant, in Augusta, would not have any wire until Friday, in order to delay Mr. Conant in his work?

A. No, sir, I dont remember any such conversation. I might have told him that he told me that he would not have it until such a day, but it was not for the purpose of delaying him.

Q. Did you ever go down below your own farm and get material?

A. Yes, sir, ten miles below. I got a great deal, the most I got was below my place.

Re-direct Examination.

Questions by the Judge Advocate.

Q. Mr. Twiggs, any hampering of Mr. Conant in his work and delay, would have added to your loss would not it?

A. It would sir, I realized that.

Q. It was to your interest not only that his work but your own should be expedited?

864 A. Exactly, sir.

Q. You were asked as to a statement, as to whether you made a statement at a certain place in Augusta, that you had not been paid under your contract,—did you make that statement in those words?

A. I did not, sir.

Q. Do you recall the conversation?

A. Yes, sir.

Q. Please narrate to the Court the exact conversation as you recall it?

A. I said that I had received nothing whatever from the contract, that the checks that I received was a little less—or rather, the account that I had at the bank, that I turned it over to, and that I didn't get one dollar from it.

Cross-Examination.

Questions by Mr. Blair.

Q. What bank was this note owing to?

A. It was not a note, I owed some notes, but I had a certain line of credit with a bank and had overchecked the account; I would check until it ran up to a certain amount and then give notes for that amount. It was Fleming Thomas & Co.

Q. Where, in Augusta?

A. In Augusta, yes, sir.

Q. About how much was this open account, the aggregate of this open account and those notes at the date, Feb. 21, when you received the check from the Government?

A. I could not tell you the exact amount, but it was more than the check.

Q. And did you indorse the check over to Fleming & Thomas?

A. I don't know whether I did or not, I must have done it if I had put it in the bank for collection.

865 Q. Did you put it in there, the check?

A. I think I did, that is my usual custom.

Q. That is a large check, you ought to remember where you put it.

A. I would not have put it anywhere else.

Q. Have you any distinct recollection upon it?

A. Not more than my general business habits.

Q. Did you state positively just now you turned it over to them?

A. Yes, sir, as I would any other business paper.

Q. And that there was not a dollar coming out of it to you?

A. Yes, sir.

Q. Who was this man of the Augusta Hardware Company that you made this statement to?

A. Mr. Dougherty.

Q. What is his first name?

A. John Bones Dougherty.

Q. Where was the statement made?

A. In his store in Augusta, the Augusta Hardware Company's store.

Q. About when?

A. About the time he wrote that letter to Capt. Carter, I suppose.

Q. Have you any recollection about it?

A. I could not say the date, no sir.

Q. Do you know who else was present?

A. I don't think there was any one else present that I remember.

Q. What part of the store did the conversation occur in?

A. Well, I could not say that; the store is about 300 feet long, I was all over it, attending to my business with him, and I could not tell which side it was.

Q. Is the man dead?

A. I don't know sir, I have not heard of him in several years; he left Augusta.

Q. What was he in the firm?

A. I think he was—he was the firm,—I think.

866 Well, it was a corporation, was not it?

A. Yes, sir, it was a corporation in name, I think Mr. Dougherty and his wife probably own the whole thing.

Q. Was he president or vicepresident or general manager, if you know?

A. I don't know sir, positively.

Q. Do you know where he is now?

A. I don't know, sir.

Q. Was he the managing man of the concern?

A. He was, sir, the only other two men in the concern that I knew of at the time was a man by the name of Hill, who was the book-keeper, and John Bones, if I remember correctly; there may have been another one; I have been trying to remember, I don't think that there were any others there.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. I would like to have you recall that interview and state as fully as you can the exact conversation; you were in debt to this person, were you not?

A. Yes, sir.

Q. There was a question of your ability to pay?

A. There was, yes, sir.

Q. Now narrate as fully as you can the exact language that was used.

A. It is a very hard matter to do that; it all was long ago and I never expected to hear of it again. I can relate the substance.

Q. Give as near as you can?

A. Some time after winding up the matter, George asked for a payment of his account; I told him he would have to wait some time, that the Government work had been finished, but I didn't get one dollar out of it, but I had to pay the 867 bank and he would have to wait until I could do some other work, that I had lost all the cash I had myself, or owned, and therefore, was unable to pay it.

Re-Cross Examination.

Questions by Mr. Blair.

Q. Have you paid it yet?

A. I don't know, the thing went into the hands of a receiver.

Q. You don't know whether you have paid it yet or not?

A. No, sir, I think I have; I may not; I lost a good deal of money about that time. Some accounts have been paid and some have not.

ELBRIDGE R. CONANT, recalled as a witness by the Court, having been previously duly sworn, testified as follows:

The President: The reporter will repeat the question of yesterday.

Reporter, reading: I would like to ask the question, taking the average character of the seven course mattresses that were built at Cumberland Sound in 1894; I would like the witness to tell me how much material in brush and binder poles there was to one square yard of that jetty or mattress; after allowing for the compression of the seven courses of fascines by the weight of the 18 inches of stone, and allowing also the proper proportion in volume of binder poles; I would like that in cubic yards; and taking the contract price at 57 cents a square yard for single mattresses, I would like to know what they cost the Government per cubic yard and per cord?

A. I have estimated the cost of brush per cubic yard at \$2.45, by the cord, \$11.50, and the poles one cubic yard, \$2.44, and by the cord, \$11.46.

The President: Is that sufficient answer?

868 By the Court: Well, now, in one square yard of the jetty, how much of that material was there, that's the question. To every square yard of jetty, seven courses high, how many cubic yards, or in cubic yards, how much material was there?

A. There was 1.4 cubic yards of brush, and .23 cubic yards of poles per square yard.

By the Court: 1.63 altogether?

A. .23 of poles and 1.4 of brush.

By the Court: That makes 1.63 altogether. How much depression was there due to the weight of stone?

A. I consider the depression from 10 feet and a half to seven feet, one foot per course.

By the Court: How many grillage poles were there between two consecutive courses of fascines?

A. I made 16 courses for the seven, 16 grillages for the seven courses, a double grillage on the bottom and a double grillage on top of the first, and then between each consecutive course, a double grillage with poles.

By the Court: What do you mean by a double grillage of poles, how high was that grillage, what is the distance from the top of one layer of fascines to the bottom of the fascine

next above, that vacant chamber formed by the grillage, that vacant chamber, how high was it?

A. That would be about 8 inches, 8 or 9 inches; that is between the first, where there were double grillages of poles, between every course after the first there would be the same, there would be two layers of poles.

By the Court: Do you know what the price of fire wood per cord was at that time at Fernandina?

A. I cannot give it exactly, but I believe it was \$2 or \$2.50, that is an estimate of mine; it was about \$2 or \$2.50 in that vicinity.

869 By the Court: From your knowledge of the locality, can you tell me what there was in the local conditions that affected the cutting and gathering of that brush and transporting it to the jetty, and putting it in that jetty that made it cost the United States so much in comparison with a cord of wood? by a cord of wood you understand I mean 128 cubic feet, do you not?

A. Yes, sir.

By the Court: That is between 11 and 12 dollars for brush, and how much did you say for the wood?

A. I estimate between \$2 and \$2.50 per cord; I may be mistaken. I cannot see why that would cost proportionately four or five times more.

By the Court: I wish you would consider that very carefully and tell me what there was in the local conditions, why it should cost so much more to get a cord of brush, to cut it, to gather it, to bind it into bundles and fascines, transport it to the jetty and put it in there, why it should cost so much more than the market price of a cord of ordinary fire wood.

A. I can state the instances, some of the instances which arose.—with the brush in putting it in, but I cannot see where such great difference should be; there should not be such great difference between good cord wood and good brush. That leaves a very large margin, a very large profit in getting the brush and the mattresses. There is the making of it and the hauling of the fascines to where the mats are made, and the towage out, the sinking and the elements of the weather, some days, of course, there could be nothing done, but there would be the same conditions arising, even if it was wood taken to the same locality.

870 By the Court: Was the brush much scattered so that the parties had to range over a large tract to gather it?

A. To a certain extent that would be true.

By the Court: Was that the fact?

A. Yes, sir, it was scattered over a considerable extent, though I should think within a radius of 2 or 3 miles for that contract.

By the Court: Was it more scattered than a growth of timber from which fire wood would be cut?

A. No, sir, I do not consider so, except that the timber would have to be conveyed from a longer distance; there was no timber immediately on the island to be used.

By the Court: Was it difficult brush to handle, was it thorny and rough so it would tear the men's hands and tear their clothes and take time or bothersome to handle to tie up, that would cost something?

A. Most of that was;—done; I should think it was pretty rough brush.

By the Court: What kind of brush was it?

A. Mostly scrub oak.

By the Court: What we call "black cat"?

A. I am not acquainted with that name; some myrtle and some bay.

By the Court: In the transportation, in putting it in the jetty, was the position exposed, was it so difficult and exposed?

A. Yes, sir, it is a very dangerous locality, Cumberland Sound.

By the Court: You said the other day it was not so much exposed as to cause the destruction of mattresses, if they were put in seven feet high?

A. Because the mattresses are not brought up above mean low water where the mats are sunk in deep water, there is not that limit; on the shoal work they were brought up to mean low water, but the sand would silt in so as to make 871 the binder tighter and tighter.

By the Court: Were any lost in sinking and getting them in place?

A. Yes, sir.

By the Court: How frequently?

A. I recollect three or four; there might have been not more than half a dozen, I can recollect three or four; there might have been several more than that.

By the Court: When the mattresses were on the scow, ready to put in place, was there much time lost in smooth water by waiting for the tide to sink them?

A. Yes, sir, they always had to wait for a certain per centage of tide to put them in place.

By the Court: Was much time lost, or was it so managed as not to lose much time?

A. Well managed, I considered. There could not be but one sunk a day, and then if the water was rough, there could not be any sunk that day; it might be a week before any was sunk.

By the Court: Taking all those losses into consideration, can you find any reason for this wide disparity between the cost of brush and the cost of cord wood?

A. No, sir, I cannot.

By the Court: I think you testified the other day that twice as much brush ought to have gone into the fascines, is that right?

A. I believe that was my statement, not perhaps twice; I think I gave rather a different proportion. Didn't I say about 20 per cent?

By the Court: I think you said the fascines actually used at Cumberland Sound, contained about 20 per cent more brush than that fascine there; (Indicating the fascine in the court room)

872 A. That is what I referred to; I thought there should be double the amount of brush than there is in the fascine here, not double the amount of brush in the fascines used at Fernandina and Cumberland sound, that was my intended answer.

By the Court: Were you in a position to know whether or not at the awarding of the contract in 1894 any different conditions were anticipated which were not realized, but which would induce the belief that that material would cost more put in the jetty than the contract price, which amounted to about eleven or twelve dollars a yard: that is, would have induced the belief that that price was too low?

A. The same work had been done or practically the same work had been done before at Cumberland Sound several times; the same elements were considered, or had been considered in previous contracts that there were in this contract of '94 and '95, except that the '94 and '95 contract, in that, the jetty was to extend further out to sea; so the further you went beyond the shoals, the more the liability of losing mattresses would be. That is all. The other elements remained the same in the '94 and '95 contract as in the '91 and '92 contracts and other classes of contracts exactly.

Mr. Conant: I would like to ask the Court, knowing that they desire the truth, and an exact understanding of the conditions for the privilege of a few moments of their time, to bring up a few questions, which I answered to appertaining to the work.

The President: You can merely correct your testimony of yesterday, if that is your desire, you can do so; do you wish to correct answers to specific questions?

A. I cannot remember whether some of the questions came up yesterday or came up Saturday afternoon.

The President: That is immaterial if you wish to correct it.

The Witness: In giving my testimony for fascines, 873 can I extend my testimony, or simply correct it, do I understand?

The President: You can correct the testimony and give the answer that you desire to the question; what was the question?

The Witness: The question was the description of the fascines used at Augusta.

The President: Very well, what did you say?

The Witness: I described the fascines and in my orders it was stated that they should be a certain length, 12 and 20 feet; well, this was explicit, yet I exercised some judgment in the length of the fascine, and would order that any fascines, varying 3, 4, or 5 inches from the 12 and 20 feet, was measured, and was allowed and was paid for; paid to the contractor. I was also asked about the cost of the plant, and of the lighters that I constructed; I found this morning in looking over the reports, that the cost of the lighter was \$180; I believed I testified that the cost of the lighter was \$400; I hadn't looked it up but relied on my memory previous to this morning. I testified about Capt. Carter coming on the work and inspecting the work and going over it; he did so; he made 8 trips to the work besides calling me to Savannah 3 or 4 times. I was questioned as to the cost of the work, I believe; the cost of my work compared to the cost of the contractors'; I wish to show a statement which enabled me to judge the cost of the work done by me and the cost of the work done previously. In an entry on my journal, on Dec. 2. I have this from Contractor Twiggs. It says he has spent \$8,000 for labor more or less, and \$6,500 for plant. This is very much more, the total amount than the amount of material for which he had been paid on that date—, many times

more. I spoke about the contract; I gave testimony about the contract with Mr. Reese as to rock; the agreement was that Mr. Rees was to load the rock on the lighter, which I bought at \$1.50 a yard. I testified about the contract 874 with Mr. Reese as to the price to be paid him for rock, and the agreement. The agreement was that it should be loaded on the lighter at the quarry, for which I have an entry in my journal of such terms and in my report. That is all, Mr. President, I have othed things to bring up, but they would not come in the answers to my testimnoy.

The President: At the proper time you can bring them up. The record is correct, is it, Mr. Conant?

The Witness: Yes, sir.

Mr. Blair: We perhaps would want to ask a question or two on the new matter brought out, if the Court will permit it.

The President: The Court will adopt the question, if it is proper.

Mr. Blair: I would like to ask, if the Court please,

The President: Question by the Court.

Q. If the witness made Mr. Twiggs cut off any fascines, because they were six inches or more too long, or rejected any fascines because they were six inches too short.

Judge Advocate: I make no objection to that question, but I call attention to the fact that that would properly be brought up by calling the witness for the defense.

The President: He has substantially answered that in the correction he made this morning.

Mr. Blair: He went up to 5 inches; he said, fascines that were 5 inches too long were paid for, and 5 inches too short were allowed for and not rejected.

Judge Advocate: I make no formal objection.

The President: You withdraw the objection?

Judge-Advocate: I make no objection.

The President: The Court has no objection; it may be answered.

Witness: Five inches I could have extended that to six inches. My journal shows 12 feet 5; when I said 5, I meant 3 or 4 more or less over the length given me by Capt. 875 Carter, that I used discretion in allowing a few inches over, and if it fell a few inches short, he was paid for exactly what the fascines measured on the scow on the ground.

By the Court: The answer is not quite complete; I asked

him if he rejected any fascines if they were six inches too short.

A. I intended to extend that, no, sir, do not. If there might have been some one fascine cut off, or two or three fascines that extended over the jetty, it is possible, but the orders were not given, or the general class of fascines were not cut off 6 inches or 5 inches or that distance above the rest.

Mr. Blair: I would like to ask the witness if he delayed the contractor by being late in the morning at any time, or stopped the contractor by leaving the work early in the evening?

The President: This is a little irregular if the Judge Advocate objects to it.

Judge-Advocate: I certainly object to his using one witness of the prosecution to contradict another. If they desire to call him at another stage, they can do it.

Mr. Blair: Of course, it would shorten the matter a little, we are only trying to get at the facts in the case.

The President: Under the objection the witness cannot answer the question.

Judge-Advocate: I desire that everything shall be done decently and in order, even in arriving at the facts in the case.

876 MADISON COBB, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate:

Q. What is your name, Mr. Cobb?

A. Madison Cobb.

Q. Where do you live?

A. In Augusta.

Q. Augusta, Ga.?

A. Yes, sir.

Q. Where did you live in 1892?

A. In Augusta.

Q. What was your employment?

A. Well, my regular employment was laboring wherever I could mostly get work to do.

Q. Whom did you work for?

A. I used to work for Mr. Wheeler on the river and Mr. Gaynor, and under Mr. Austin.

Q. Mr. Wheeler, Mr. Gaynor and Mr. Austin?

A. Yes, sir.

Q. What work did you do for Mr. Gaynor?

A. I worked for him down below here under Mr. Gaynor.

Q. What did you do for Mr. Wheeler?

A. I made fascines for him away up the river, up above Augusta, also down below Augusta.

Q. Did you do any work for Mr. Wheeler in 1893?

A. I don't remember the year, whether it was 1893 or not, it was the same year that Mr. Twiggs had his contract.

Q. How long before Mr. Twiggs had his contract, were you at work for Mr. Wheeler?

877 A. I did some work down here for him; I was taken sick and then went up there, and when Mr. Wheeler came up there in a week or two weeks, and went up the river, I went with him up there.

Q. How long before the Twiggs' contract was that?

A. I reckon I worked for Mr. Wheeler up the river about a month; then I came down and in about 5 or 10 days I came back down and then I went to work for Mr. Twiggs.

Q. We will get to that by and by, Mr. Cobb; what work were you doing for Mr. Wheeler?

A. I was making fascines for him.

Q. For what use were the fascines put?

A. Put in the river for making a run for the fall boat that goes up the river.

Q. Was Mr. Gaynor there at the time?

A. No, sir; Mr. Gaynor was not there.

Q. Did you see Mr. Gaynor there at any time during that time?

A. No, sir.

Q. Do you know who had the contract for the work that was being done?

A. I heard it was his.

Q. No matter what you heard; do you know?

A. No, sir; I was under Mr. Wheeler and Mr. Austin.

Q. How long were you engaged in making fascines?

A. I reckon I stayed up there about a month before I left him.

Q. Were you making them yourself or superintending their construction?

A. I was making them and I was foreman. I was at the braces.

Q. At the braces?

A. Yes, sir.

Q. That is, the ways on which the fascines are made?

A. Yes, sir.

Q. Did you say bench or braces?

878 A. Bench, the way you stand them up in the ground.

Q. I should call them ways, or horses. How were those fascines made Mr. Cobb?

A. We made them out of brush and poles, and drew them down with stretchers.

Q. What kind of stretchers?

A. We had rope stretchers.

Q. How were they tied?

A. We tied them down until they were a small bundle and then tied them with tarred cord.

Q. How large cord was it, or was it cord, or what was it, describe it?

A. It looked like a kind of grass, but it looked like it was tarred with tar, something like that.

Q. It was not woven, or twisted rope?

A. No, sir, it was not twisted, it did not have a twist in it.

Q. How close together did you tie those fascines?

A. Sometimes about four or five strings to a bundle.

Q. How long were the bundles?

A. Some of them, well we made some up there about ten feet long, some we made eight; I don't think we made any twenty feet ones up there, no, I don't think we did.

A. What kind of brush did you use?

A. Well, it was Willow, and anything most we could get hold of, that we could get hold of that was good to make fascines out of.

A. How near the place where you were making them did you procure the wood or brush? How near the place where you were at work?

879 A. Some times they would be right close to the work, and then again it would be a pretty good distance.

Q. What is a pretty good distance?

A. Some times it would be a mile from the work.

Q. That is, you had to go to get the brush to make the fascines of, did you have to go as far as a mile to get the brush for the fascines?

A. Some times we did, and some times it was close to the

work. Some times we would be working out in the river, and they would be right out in the swamp, right by the river bank.

Q. Look at those fascines back there, and see how those compare with the work you did. (Pointing at the fascines on the platform in the Court-room.)

A. That is something like, but we did not have oak, we hardly used oak up there at all.

Q. As to the quantity of material used, the amount of brush in the fascines?

A. Yes, sir, the bundles were about as much.

Q. As compared with these?

A. Yes, sir, we used brush just like that.

Q. Well, as to the size?

A. The size of the brush.

Q. The size of the fascine after it was made?

A. Some bundles were larger, and some were about that size.

Q. How about their being compressed, how close together were they tied, as compared with these?

880 A. That looks about like we made them up there.

Q. That you call choking don't you?

A. Yes, sir, that's choking.

Q. These are choked. Compare the choking of these, with the choking on those you made.

A. Yes, sir, just about the same, it looks to me like.

Q. Did you trim the brush?

A. Yes, sir, we trimmed off the limbs that was hanging off after we got the bundle tied down. If any limbs were hanging off loose, we cut those off.

Q. That was the extent of the trimming?

A. Yes, sir.

Q. Now, did you remain in that employment until that work was completed there?

A. No, sir, I taken sick up there and came to Augusta just before we got through.

Q. By whom were you next employed?

A. By Mr. Twiggs, he employed me next.

Q. Mr. A. J. Twiggs?

A. Yes, sir, Major Twiggs.

Q. Upon what work?

A. Upon the work up there, just this side of Augusta, just this side of the bridge.

Q. One of the river improvements?

A. Yes, sir.

Q. I mean your particular work was what?

A. My particular work?

Q. Yes, sir.

881 A. It was making the fascines for him.

Q. You were personally engaged in making them, and with others; did you work yourself in making them?

A. No, sir, I only gave instructions for them to be made.

Q. You were his foreman?

A. Yes, sir.

Q. How many men did you have employed?

A. I think we had about thirty six men.

Q. You taught them how to make fascines, as you had yourself made them at the previous place?

A. Yes, sir, I did.

Q. How did they compare with those you had made; were those as well made?

A. Yes, sir, they were made, just about as I made the rest of them where I first started, just about the same way I made Mr. Wheeler's up the river. I made his, about the same way.

Q. You know the Mr. Gaynor about whom you spoke; you worked for Mr. Gaynor?

A. Down here, I did; down here at Tybee, or Daufuski Island, somewhere up that side. I worked for him and Mr. Wheeler, and also for Mr. Austin.

Q. How did you start in, or how did you instruct your men to start in to make fascines?

A. I first got the stretchers made, and when I got to the swamp I got the stubs built and got them tied correct, and then got them cutting down the bushes and laid them in and showed them how to start and what to do with it, and
882 made some bundles for them and showed them what I wanted done.

Q. Did you ever see a chain used for a choker?

A. No, sir, never did.

Q. Not at any of those works?

A. None of the works I was ever at. I never saw a chain choker.

Q. Did you see Captain Carter? You know Captain Carter, don't you?

A. No, sir, I don't know him personally, I saw the gentleman in the camp there.

Q. This is Captain Carter here, do you recognize him?

A. He looks like the gentleman to me, that came up there sure (looking at Mr. Rose)

Q. Well, were you foreman of the camp when he came up there?

A. I was, sir.

Q. Who was with him?

A. Mr. Conant was with him.

Q. Well, what took place?

A. Well, when they came up there, they looked at the brush, and the objected to them, and Mr. Carter, I believe his name was, taken a hatchet I suppose, and cut the loose brush and trimmed it, and showed me exactly how he wanted it made, so I made them as near as I could like he said he wanted them made.

Q. They became a new industry? Had you ever seen the kind of fascines made that Captain Carter instructed you to make?

A. No, sir, I never did make any that way.

Q. You had never seen any?

A. No, sir.

883 Q. Did you engage the men as laborers?

A. Yes, sir.

Q. Who were under you?

A. Yes, sir.

Q. At what rate of pay?

A. Seventy-five cents, sir.

Q. Seventy-five cents a day?

A. Yes, sir.

Q. Now you have said Captain Carter took a hatchet and opened one of the fascines and then gave a lesson in the construction of them?

A. Yes, sir.

Q. Tell me how he went to work to do it.

A. Well he said that he wanted the fascines made out of the stems and of the limbs, he didn't want any brush in them. He wanted them made out of firm wood, straight poles. He didn't want any leaves, or fine limbs on them. He wanted them made out of the stem of the tree.

Q. How long were they?

A. Well, we made some twelve feet, and some twenty feet long.

Q. How long stems did you use?

A. We used them to reach from one end of the rack to the other, twenty feet.

Q. What had you been using in tying the fascines?

A. Tarred cord.

Q. How did that compare with the cord or string that you had used before under Mr. Wheeler.

A. The very same stuff.

884 Q. The very same stuff?

A. Yes, sir, the very same material.

Q. Did Captain Carter say anything about the use of such material?

A. He might have said it to Mr. Twiggs, I didn't hear it myself, I knew a change was made and we had to use wire.

Q. You didn't hear the statement, but they ceased to use the material they had used for tying, and used wire thereafter?

A. Yes, sir, we did away with what we had been using, and used wire after he had left.

Q. Did I understand you to say that you had never seen a chain choker used when you were in Mr. Wheeler's employment?

A. That's right, sir.

Q. Do you know of one being required to be used under Mr. Twiggs?

A. Not until Mr. Conant came up there I did not.

Q. Then there was one required to be used there?

A. Yes, sir.

Q. Can you describe it?

A. Yes, sir; we cut a couple of long levers, I suppose about that high, indicating, and trimmed one end off, and had a chain made with a ring in it in the one end, and slipped it over the end of the stub and drove it down as tight as we could get it at each end, and that is what we used after Mr. Carter came up there.

Q. Well, what force did you apply to it?

A. We had three men; two standing at the rack, and one cutting brush and bringing it to the rack, three men to a bench.

Q. The force you used in that choking generally?

A. We had two men to it.

885 Q. Two men to that?

A. Yes, sir.

Q. You choked them tighter with the chain than they had been choked before?

Mr. Blair: He never said that.

Q. Well, how did you choke them as compared with the choking of the fascines you had made before?

A. Well, I don't know as they was any tighter.

Q. Well, what force had you applied in choking them before?

A. I had the very same men before at the bench.

Q. I don't mean what force of men, I mean power, not the number of men.

A. The levers being longer, having longer levers we had more force to apply than we had before, and you could draw the bundle more tighter because you had more levers.

Q. That is with the chain?

A. Yes, sir, the levers were longer.

Q. That is what I was trying to get at.

A. Yes, sir.

Q. It choked them tighter?

A. Yes, sir, than the ones we had at first.

Q. You have worked for Mr. Gaynor before that time before you were with Mr. Wheeler, with whom you were then engaged, I so understood you, didn't I?

A. Mr. Wheeler was the first man I worked for on Government work.

Q. You said that you had worked for Mr. Gaynor; where was it you had worked for Mr. Gaynor?

886 A. Down below here.

Q. What place?

A. I don't remember the place between here and Tybee, or Daufuski.

Q. Near there?

A. Yes, sir.

Q. What were you doing there?

A. I was working on the river helping to make mats, and driving pilings.

Q. You helped to make mats?

A. Yes, sir.

Q. Did you see the fascines that went into those mats?

A. Yes, sir, I did.

Q. What fascines were used?

A. They were hardly fascines at all, they were hardly as good as these, (indicating fascines in the Court-room)

Q. Did you see any of them handled?

A. Yes, sir, I handled a good many of them myself.

Q. About how many men did it take to handle those?

A. If they were stout enough to hold up those twenty

feet ones didn't take two men, but sometimes they looked like they were going to break in two and it would take three men and sometimes they would break.

Q. Sometimes they would break?

A. Yes, sir, sometimes they would come in two.

Q. What became of them after they were broken?

A. Each man taken the pieces and carried them to the gin, and put it down there and put both ends together and wired it down.

Q. It still went into the mattresses?

887 A. Yes sir, it still went in.

Cross-Examination.

Questions by Mr. Charlton.

Q. How long have you been here in Savannah?

A. Living in Savannah?

Q. Yes.

A. I never did live here, only when I was down here working.

Q. When did you come here?

A. Saturday morning. I left home Friday.

Q. Were you in the Court House last Saturday?

A. Saturday gone?

Q. Yes.

A. Yes sir, I was here Saturday gone.

Q. Were you here yesterday?

A. Yes sir.

Q. Heard the witnesses testify?

A. Yes sir, I was here yesterday.

Q. Did you look at that brush carefully?

A. No sir, never looked as close as now.

Q. All the notice you have taken is what you have taken since you have been here?

A. Close notice, yes sir.

Q. That is all the close notice you took?

A. Yes sir.

Q. Yet you say that brush is like the fascines made for Mr. Wheeler and like the fascines made under Mr. Twiggs and like the fascines made under Mr. Gaynor?

888 A. Yes sir, that is just about like I made them.

Q. Do you see the bottom one of that pile?

A. No sir, I never noticed the bundle well, they are all brush.

- Q. That is all you know about them, that they are brush?
- A. Yes sir.
- Q. Just look around there.
- A. Yes sir, it is all brush.
- Q. When did you get off the chain gang?
- A. I never been on there.
- Q. The last time up in Augusta?
- A. I never was on one in my life.
- Q. Which County was it, you were on one?
- A. Me, I never been on any one.
- Q. You have not forgotten about that, are you certain about it?
- A. I know it.
- Q. Do you know Jerry Searls?
- A. Yes sir, I know him.
- Q. Now, remembering Jerry Searls, are you still confident you have never been on the chain gang?
- A. I is sir.
- Q. Under Mr. Wheeler they used a rope choker didn't they?
- A. Yes sir, we used rope.
- Q. Did anybody teach you how to make that rope choker?
- A. Yes sir.
- Q. Who made it, who worked it?
- A. They had some old ones when I worked for them, I used them.
- Q. They took three men?
- 889 A. Yes sir, there were three men on the bench always.
- Q. The difference under Mr. Twiggs was they used a cane choker?
- A. Yes sir, we used a chain choker.
- Q. When this gentleman came up there, didn't he show you how to choke (meaning Mr. Rose)?
- A. I don't know whether he showed me or not.
- Q. You would not be apt to forget him?
- A. I don't know whether he came and showed me personally or told Mr. Twiggs how he wanted it done. I know we made the chain, I had to go on what Mr. Twiggs told me after he was gone.
- Q. You are certain he showed you how to make fascines because he used a hatchet?
- A. Yes sir, he showed Mr. Twiggs and we had to make them as Mr. Twiggs told us.
- Q. Was his head as gray then as now?

A. I never noticed that at all.

Q. He was quite as fat?

A. I never noticed that at all.

Mr. Blair: I think the record ought to show that this last witness—the gentleman this witness identified as Captain Carter was Mr. Rose.

Judge Advocate: I desire to suggest to the Court, there are two ways to impeach a witness. One is to show that what he has testified to is untrue; another is to impeach his credibility, and that I must protest against the line of cross-examination that has been commenced with the witnesses. That can only be for the humiliation. The colored witness may perhaps have found his way in the chain gang 890 for some petty offense and still be a truth telling witness, and I trust we are not to have a repetition of that because I don't wish to interpose objections to any course pursued by the counsel. I want in this case, in the most generous manner I can, to offer the utmost latitude in the cross examination.

Mr. Charlton: I desire to say that whenever the opportunity occurs I shall ask any question which will develop to this Court, the surroundings and circumstances of any witness. The question I ask is entirely admissible. It is asked for the purpose of letting the Court find out whether the man who has testified, although he may not be caught in a falsehood, that whether from the circumstances of his life he is such a man as will give truthful testimony. It is entirely admissible in a Court of Justice, and if the Judge Advocate desires to interpose objections, he must do it, because I intend at every opportunity, until the Court rules I shall not, to ask just that line of questions.

The President: It is the duty of the Court to protect witnesses, and it will endeavor to do so.

STEPHEN M. HILL, a witness for the prosecution having been duly sworn testified as follows:

Q. Mr. Hill, please state your full name and place of residence.

A. Stephen M. Hill.

Q. Stephen M. Hill?

A. Yes sir.

Q. Residence?

891 A. I can't tell you the number, I live in Hamburg, S. C. right over the bridge.

Q. Where were you living in Eighteen Ninety three?

A. Augusta.

Q. From August to November?

A. Yes Sir.

Q. What was your employment?

A. Well, Railroading the biggest part, on and off.

Q. From August to November?

A. No sir, I was employed by Mr. Twiggs I believe, at that time.

Q. By Mr. Twiggs?

A. Yes sir.

Q. What was the nature of your employment?

A. I was running a gang of hands, sort of overseeing them.

Q. What were the hands doing?

A. They were driving down pegs, and pinning down fascines for bank protection.

Q. How large were the pegs?

A. About three inches at the smallest end. I don't know what the diameter at the top was, I didn't measure that.

Q. How long were they?

A. About five or six feet.

Q. Did you superintend their drawing, did you say?

A. Yes sir.

Q. How much force was required to drive them?

A. To a peg?

Q. Yes sir?

A. Two men.

892 Q. Through what were they driven?

A. Through the fascines.

Q. Right through the fascines themselves?

A. Yes, sir, into the ground.

Q. Any difficulty in driving them?

A. Yes, sir, pretty hard; the pegs were so tall, you could not get up to them to drive good, and so large you could not get them through the fascines without its busting the bundles and tearing them up.

Q. Did you see the fascines burst by the driving of the stakes or pegs?

A. Yes, sir.

Q. What was done with the fascines then?

A. Taken out and tied, and bundled up again.

Q. How would you get the fascines out after the other pegs had been driven, after the one driven to break them?

A. Well, sir, you would have to pull them all out and get them out the best way you could.

Q. How many would you have to pull out at one time to get them out and remake it?

A. One bundle or one section.

Q. At any place where a fascine was burst by a stick being driven through it after other sticks were in, how did you get it out.

A. We just pulled the fascine out and took it out and tied it and knocked the pegs up or broke them off or got them up the best way we could and put down fresh ones.

Q. Now, after the fascines were in the water were you 893 ever told they were too long?

A. Yes sir.

Q. By whom?

A. Mr. Conant.

Q. Well, what did you do then?

A. I would have to cut them off.

Q. Did you have to take them out of the water to cut them off?

A. No sir, we would cut them off with an axe.

Q. Well, after they were in the water?

A. We would take them out and cut them off.

Q. Did you see any that were in the water taken out and cut off?

A. Yes sir, I have taken them out myself.

Q. Was any pile driver used there?

A. No sir, Mr. Conant said the stobs had to be driven down if we had to send off and get a steam pile driver.

Q. None was used?

A. No sir, I didn't see any.

Q. What do you know about sinking the mats?

A. I sunk a great deal of them.

Q. A great many of them?

A. Yes sir.

Q. Well, how about determining the proper place in which they were sunk;

A. Well, we had lines to go by, stobs on the bank.

Q. Who established the lines?

A. Mr. Conant.

Q. Well, what success did you have in meeting the requirements?

894 A. Right sharp time. We would get four or six inches out of the way and we could not get them back.

Q. Were you required to get them back into place?

A. Yes sir, we had to stop the steamboat and get her to come up and pull them back.

Q. Did that delay the work?

A. Yes sir.

Q. How long would you have to wait under such circumstances or did you have to wait for the steamboat?

A. Yes sir, we had to wait all the time for that. I could not say exactly, from one hour or a day. The boat would be down the river the greatest portion of the time.

Q. How often did that occur?

A. Well I don't know sir, I couldn't say exactly, it has been so long now.

Q. Well, arrive at as definite a number as you can?

A. I suppose two or three times a week, I suppose somewhere along there.

Q. For how many weeks, two or three times a week for how many weeks? Was that occurring all the time?

A. No sir, not all the time, I could not say exactly how many weeks it was that it occurred.

Q. Had the rock been put in place before those mattresses had to be pulled into line, had the rock been put in place to hold the mattresses down before they were pulled into line?

A. Yes, sir, some rock was there, on the mattresses, to hold them down.

895 Q. Well, could they be pulled into line with the rocks on them?

A. No sir, we got them in with the steamboat.

Q. Well, what was done with the rocks?

A. I had to make my hands go down there, dive down, and get them off, and come back on the lighter so I could get them back into place. Where it was not diving, it was wading.

Q. (I show the witness exhibit 63) Do you recognize what this is a photograph of?

A. Yes sir, I worked on the jetties, I could not say what place it was.

Q. Is it not on the work on which you were engaged, or is it a photograph of the work on which you were engaged?

A. Yes sir, I think it is.

Q. Can you discover any stakes or pegs there?

A. Yes sir, quite sharp of large pegs here. I see quite a number of those.

Q. You see the mans hat there?

A. Yes, sir.

Q. Now did you see pegs of that comparative size or stakes driven in the work?

A. Yes sir, I have driven a lot of them myself. Usually I drove them of that kind.

Q. All you drove were of that kind?

A. Yes, sir.

Cross-Examination.

Questions by Mr. Charlton.

Q. When did you come to town, Mr. Hill?

A. Saturday morning

896 Q. Were you here yesterday when Mr. Twiggs testified?

A. Yes, sir.

Q. Heard his testimony?

A. Yes, sir.

Judge-Advocate: I desire to state as regarding the presence of the witness when the case first began. I started to ask Counsel as to their desire in the premises. I have no objection to the presence of the witness.

Mr. Charlton: We have no objection.

The President: The Court will remove them at the request of either party.

Mr. Blair: We have no objections.

Mr. Charlton: None in the world, and have urged none.

AMORY SIBLEY, a witness for the prosecution, being duly sworn testifies as follows.

Direct Examination.

Questions by the Judge-Advocate.

Q. What is your full name?

A. Amory Sibley, Augusta, Ga.

Q. Were you employed from Augusta to November Eighteen Hundred and Ninety three?

A. I was employed under Captain A. J. Twiggs, on the Savannah River, placing in jetties and sinking mattresses.

Q. What was the nature of your employment.

A. Well, sir, I superintended the making of mattresses, the sinking of mattresses, the pinning down of fascines,
897 both on the jetties, the top dressing of the jetties, and on the shore protection and the excavation of shore protection.

Q. Then you were Superintendent for Mr. Twiggs?

A. Yes, sir.

Q. Did you see the fascines first made there under that contract?

A. I did sir.

Q. Who was the foreman?

A. Madison Cobb.

Q. And you saw the new ones subsequently, of course?

A. Yes, sir.

Q. What was the difference in their construction?

A. The latter was made all of wood, with no brush. I went down one morning with a force of hands, and a load of brush, and fixed the fascines. Mr. Conant came down just as I finished. He and George Binar. I was just fixing to untie the lighter and tow it up the river and Mr. Conant got off the boat on the barge and walked around and said none of those fascines are good, I reject them. I asked what the trouble was, and he said "I don't want them, they are not up to the specifications as what are required by Captain Carter" I unloaded them; in the meantime he went off and left George there. He had a negro named Gus, who paddled him up sometimes.

Q. How were those fascines made that he rejected?

A. I don't know, he said something about Captain Carter rejecting some of the first ones when he was there. I never saw Captain Carter in my life until Saturday. These were rejected by Mr. Conant when I sent for him myself.

Q. How long after the work began on the contract?

898 A. I don't remember that exactly, it was the first part of the work.

Q. Well, were they of the same character as the fascines that were used in the work?

A. No, sir, he made us get them much more woody, poles in fact. They were not of the same character at all, because the last ones were made of wood poles and these were not brush; and after I had got the lighter unloaded and he left this man George there and showed me the class he could use you know, I saw I could not get enough. There was not enough to pay for the towing of several hundred bundles and I stopped. Mr. Conant came up in the meantime, and I asked him to walk to the brush camp with me, which was not very far out in the river swamp. He showed me the character of brush he wanted used in making these fascines. He walked out there and showed me exactly I could not see much, if any

difference between the ones rejected and the kind he pointed out, notwithstanding we went to work and made the class he said he wanted; we went and hauled that class that Mr. Conant wanted. When we got on the wharf, he had George to investigate every bundle and saw there was not a loose wire on it, and every bundle that had a loose wire was thrown aside and rejected, and a good many of those he said there was not enough wood in them.

Q. That was at the place where the fascines were to be used?

A. Yes, sir, out where we made the mattresses.

Q. They were rejected at their final destination?

A. The first load was rejected right on the bank, and the high water washed them away, and it not only washed those away that were on the bank, but there were hundreds in the woods at the benches, that we would not haul after he condemned them.

899 Q. After they were rejected, you left them there; how about the stakes that were used?

A. The pins that were used in driving them in?

Q. They were called stakes I think, in the contract?

A. We used four foot pins on some of the jetties and work not far out from the river bank. When we got further out in pinning down the top, we dressed off the tops of the jetties with twelve foot fascines. After we sunk the mattresses a certain height, then those jetty fascines were pinned down for a certain distance we used four foot pins or pegs and as the river bed slopes down and it was deeper towards the end of the jetty. He made us use pins that averaged from four to six and nine feet, some of them just as far as a man could reach with a maul. He said they had to go through the fascines from the top of the jetty.

Q. How about the stakes that were used; the reporter has not your reply?

A. Well, some of the stakes we used in pinning down the fascines in the shore protection Mr. Conant required to be six feet in length, six inches at each end, three inches at the small end in diameter. When we attempted to drive them down with forty pound mauls we found it was just entirely impossible to drive them down by physical force, and Mr. Conant said they had to go down there if Captain Twiggs had to send and get a steam pile driver.

Q. Was there difficulty encountered in procuring the necessary material for fascines in the vicinity?

A. Yes, sir, we had to go twenty odd miles to get it. He told me in regard to getting the poles, I went for the 900 poles myself, and showed the hands what class to cut, and what size to cut I had several hundred hauled up on the wharf and Mr. Conant said they were too crooked, and said that down here about Millen, we could get all we wanted, and that we had to send down there to haul them up by train.

Q. How far was that away?

A. Fifty three miles to Millen.

Q. Now how was the line determined where those mattresses should rest when they were sunk?

A. The place was staked off from the bank, and Mr. Conant would never let a mattress be sunk that was from two to six inches out of place. He has delayed me; that was my principal work he has delayed me day after day, with the barges anchored out and stones on it, the mattresses around it, and we would float one around, and it would go down the stream out of the way, from two to six inches, and it was impossible to pull it right up plumb at times.

Q. How was the line determined, by range stakes on either bank?

A. Yes sir, and he stood on the abnk and watched it.

Q. How was the sinking of the mattresses, how was the line arranged?

A. His man George would go around and sink it and see when it was level; he has kept me there day after day until the steamboat came.

Q. You didn't understand my question. How was the mattress itself marked, to bring it within the range line?

A. How were they brought around in the jetty?

Q. After the mattress was sunk out of sight, how could they sight the place where the mattress was going down?

901 Q. It was sounded to find the line?

A. Mr. Conant would sit on the bank, and mark it by the poles alongside the lighter.

Q. Was it from the sounding the range line was determined, was there any other way?

A. Boat poles were used.

Q. Did you ever experience delays in the performance of your duties?

A. yes, sir, I have much, as I told you, mattresses anchored out around the lighter, and stone, and George has come down there and told me, Mr. Conant will be down here at such a time, and Mr. Conant would come down here at

the time he said, but my men had to sit there until he did come, waiting for those mattresses to be sunk.

Q. Did you have any employment for them until he did arrive?

A. No, sir.

Q. How long were you ever delayed at one time, waiting?

A. The longest delay we ever had was when we were fooling with mattresses trying to sink them and the mattresses got out of place six or eight inches, and he made us wait all day for the steamboat to come.

Q. All, day, from what time in the morning?

A. It happened between nine and ten o'clock in the morning.

Q. Did the steamer come at all that day?

A. The steamer came very late in the evening. Captain Twiggs was very mad with me.

Q. Well, how about the fascines, if they were too long.

A. Whenever one was too long, and placed in a mattress, it was cut off to make it even, and when it was short he rejected it.

902 Q. What excess of length was permitted?

A. About that distance, sir (indicating)

Q. Well, what should you estimate that distance?

A. If we had a hatchet, we would chop them off in the water.

Q. What distance would you estimate that distance of your hand?

A. About six or eight inches. He required them to be even. When a fascine was brought there and some ends stuck out, a little end would cause it, Mr. Conant rejected it, and laid the fascines there on the wharf, where the negro George examined the lot, and they were loose. He was the principal one that examined them, and they were thrown out. When Mr. Conant came there, I called his attention to the fascines, and asked him if that wood was not sufficient, and he said, "they are pretty good, but there is a lot of loose wires in there, George says so; a lot of those bundles have crooked sticks in them and I don't propose to use that lot for fascines." Some of those bundles I hauled home and burned and fired the steamer with them, they were such good wood.

Q. Wood that was rejected could be used for fuel?

A. Yes, sir; we fired the steamboat with them, and Captain John Baler and I carried them home and used them in my stove.

Cross-Examination.

Questions by Mr. Charlton.

Q. Mr. Sibley, what was your first experience with the construction of fascines?

A. That year, sir.

Q. About what time that year?

A. When the work commenced.

903 Q. That was the first time you had ever seen one?

A. Yes, sir.

Q. The first time you had even seen one constructed?

A. Yes, sir.

Q. About what month was that?

A. August, Eighteen Ninety Three.

Q. About what time?

A. Well, I don't remember exactly sir.

Q. The early or late part of the month?

A. I was in Capt. Twiggs employment the seventh of August, Eighteen Ninety three.

Q. Well, how long did the employment continue?

A. Until the end of that jetty work.

Q. When was that ended?

A. I think it was ended somewhere in the spring of Eighteen Ninety Four.

Q. When were the fascines rejected, the ones you have just spoke of by Mr. Conant?

A. Which ones, the ones used for Mr. Twiggs?

Q. Yes, sir.

A. They were rejected at odd times.

Q. You spoke of a large lot rejected at once?

A. Yes, sir, a large lot were rejected for loose wires; we brought the whole brush camp up there and choked those bundles again and wired them.

Q. Well what became of those?

A. Which ones?

904 Q. The ones you are talking about?

A. We used them, the crooked poles though, we didn't use.

Q. About how many were rejected for not being properly wired at that time?

A. I forgot how many loads were on the wharf at one time. They were thrown out, and the high water carried them away.

Q. How much of this collection you have just talked about, as much as one hundred?

A. Nine hundred

Q. How many went in the work after being properly wired, eight hundred and fifty?

A. A very small per cent of them, because he claimed so many crooked poles were in them.

Q. Well, about what percent?

A. I suppose we used one hundred or one hundred and fifty after repacking them, he rejected them.

Q. What became of the balance of them, the seven hundred and fifty.

A. I could not tell you how many there was, they were just piled up there.

Q. What became of them?

A. I told you a lot of them floated off.

Q. Well what percentage floated off?

A. That I could not tell.

Q. Half?

A. I suppose, as I told you we lost about nine hundred fascines.

Q. Well, did the nine hundred float off?

905 A. I suppose so, they went off from the wharf upon the high water

Q. They just dissappeared, you don't know what became of them do you?

A. Like some of the mattresses; we had a large quantity of mattresses float off.

Q. Just answer this question, you can get to the mattresses afterwards; what became of the nine hundred fascines rejected, except the one hundred and fifty used in the work?

A. I don't know sir, they went down the river.

Q. How much?

A. All that was in that lot went down the river.

Q. All went down the river except what was in the jetty?

A. Yes sir, I hauled two or three truck-loads of them home for cooking purposes.

Q. How many fascines were on a dray-load?

A. I don't know, the bundles were pretty heavy.

Q. Well, about how many fascines on a dray-load?

A. You must remember, they were twelve and twenty feet long, I could not tell you how many.

Q. Don't you know whether there was one or ten?

A. Yes sir, I suppose seven or eight.

Q. Seven or eight to the dray load?

A. Yes, sir.

Q. What sort of a dray.

A. A two wheel dray.

Q. A long body, or a short body?

A. It was just a flat dray.

906 Q. Like those they have here?

A. No sir, I have not seen any here since I have been here.

Q. You say those fascines were on the wharf?

A. Yes, sir.

Q. What is the size of that wharf?

A. About forty feet.

Q. Long?

A. No sir, wide.

Q. Well about how long?

A. Have you ever been to Augusta?

Q. I have had the honor to be there several times.

A. Have you been on that wharf?

Q. No sir, I don't think I ever did. I am quite sure the Court has not.

A. There is a deck foundation, and it slopes away to the top of the bank. Those fascines that were rejected were piled down here as much as possible, out of the way.

Q. Now, will you be kind enough to tell me the dimensions of the wharf? It was forty feet wide, and how long?

A. About four hundred feet I reckon.

Q. Four hundred feet by forty? Has that wharf got any name?

A. None that I know; the Augusta wharf, that is all I know.

Q. The Augusta wharf?

A. Yes Sir

Q. Are there many wharves in Augusta?

A. That's the only one I know of

Q. That is the only wharf in Augusta?

907 A. That I know of.

Q. At the foot of what street?

A. It is on Bay Street.

Q. Does Bay Street run down to the river?

A. Yes Sir.

Q. Do steamers land at that wharf?

A. Yes sir.

Q. Was there any merchandise on it at that time, the fascines were there?

A. On the wharf? There was no merchandise on the wharf during high water; they don't leave any merchandise on the wharf in high water.

Q. When the fascines were put on the wharf, it was not high water

A. No sir, it was not

Q. Was any merchandise on the wharf when the fascines were put there?

A. I don't know, there was not any out on the end where they were

A. Any cotton on the wharf?

A. No sir.

Q. And freight of any character

A. That is a question I can't answer; there may have been freight by the brick shed, where it comes down; there is an elevated part, maybe forty or fifty feet wide that runs back into the wharf seventy five or eighty feet.

Q. The steamer from Savannah stops at that wharf?

A. The Decatur and Ethel were running there then.

Q. They go up pretty well loaded?

908 A. Sometimes they don't, and sometimes they do.

Q. They come down pretty well loaded?

A. I have seen them come down pretty slack loaded.

Re-direct Examination.

Questions by the Judge Advocate

Q. You spoke of hauling seven or eight of those fascines on a dray. Over what kind of roads could you haul those?

A. It was very heavy pulling from there up to the Street.

Q. That was in Augusta, that that hauling was done?

A. It was right there in Augusta. I had them carried to my house.

Q. They were on City roads?

A. Yes sir

Q. How many could be hauled to the place where they were made in the swamps?

A. No sir, they were hauled from the wharf to my house through the City Streets

Q. How many of those fascines could be hauled on a dray where they were constructed in the swampy land?

A. We hauled on a four mule team, eighteen or twenty bundles of the twenty foot fascines, to a load.

Q. You saw them on there Mr. Sibley, did you see them on the drays? the fascines?

A. No sir, I just told them to go down there and haul me two loads home.

Q. No, we are talking about different things?

A. Yes sir, I see that

909 Q. I want to know, you say it was a heavy load for a dray, the seven or eight fascines you had hauled to your house over the City road?

A. Yes sir.

Q. What I want to ask you about, is, the load that could be carried through the swampy land where the brush fascines were made.

A. Yes sir, well I say that the roads have been there so I have only seen twenty one of the twenty foot bundles hauled on four mule team.

Q. Well, that is hauling three times as many as you hauled in the City?

A. But that is a four mule team.

Q. Yours was a two mule team?

A. No sir, it was a one mule team.

JOHN W. BOHLER, a witness for the prosecution being duly sworn, testified as follows:

Direct Examination.

Questions by the Judge Advocate.

Q. What is your full name,?

A. John W. Bohler.

Q. What is your occupation?

A. Well sir, I am farming now, and steamboating together.

Q. Farming and steamboating?

A. Yes sir.

910 Q. What were you doing from August to the close of '93?

A. I was working for A. J. Twiggs.

Q. In what capacity?

A. Running his steamboat, master of the steamboat.

Q. You were the pilot of it?

A. Pilot and captain.

- Q. Pilot and captain of the boat?
A. Yes, sir.
Q. On what work was the boat employed?
A. The jetty work of the Government contract of 1893.
Q. Carrying material?
A. Yes, sir.
Q. What material did it carry?
A. We hauled fascines and poles and other material that was used on the work.
Q. You hauled the fascines from the place where they were constructed to the place where they were used?
A. Where they were used, yes, sir.
Q. Do you remember the fascines their dimensions?
A. Yes, sir.
Q. What were they?
A. Twenty feet and twelve.
Q. Do you remember anything about their weight?
A. Yes, sir, I can come pretty close to it; a 12 foot fascine it would have taken 2 men to handle them, where they could get at them well. It often taken 3 men in places. On the 20 foot fascines we used four men to store them away on the boat.
Q. That is for storage?
A. Yes, sir.
Q. They were hauled to the place of landing and there transferred to the boat?
A. Yes, sir.
911 Q. And it was on that transfer that you saw the number of men required to handle them?
A. Yes, sir.
Q. Did you see them as they were brought to the landing?
A. Yes, sir.
Q. How were they brought?
A. They were brought in a wagon.
Q. What kind of a wagon?
A. A 4 horse wagon.
Q. A four horse wagon or four animals? How many could be transferred at a time?
A. Well, sir, the swamp roads after a freshet are pretty soft, about three to five bunches from four to five.
Q. You saw them often brought to the landing?
A. Yes, sir, and when the roads were in good condition, they could bring from 7 to 8 of the 20 foot fascines.

Q. Seven to eight when the roads were good, even on swamp roads?

A. Yes, sir.

Q. Did anybody have a better opportunity than you to learn how they were transported?

A. No, sir, I don't think so, sir.

Q. How far did you have to take the fascines to the place where they were used in the improvement?

A. We got them down as low as 22 miles down the river at a place called "Hungry Swamp."

Q. Did you get a great many there?

A. Yes, sir, a great many of them there, the greatest portion of them?

Q. The greatest portion used under the Twiggs' contract?

A. Yes, sir.

Q. Did you have any work to do on the mats?

912 A. No, sir, except putting them up into place sometimes with the steam boat.

Q. You did have that kind of work to do?

A. Yes, sir.

Q. Frequently?

A. Yes, sir, very often; I could not state how often sir, exactly.

Q. Well, approximately, if you can, the number of times the boat was engaged in that business.

A. I reckon it was 2 or 3 times a week, sir.

Q. Your boat was the one boat that was called upon to perform that work, I suppose?

A. Yes, sir.

Q. How was word conveyed to you that you were required?

A. To pull those mats up?

Q. Yes, sir.

A. I could not get any word until I came up with the steam-boat.

Q. Then you found your services were needed when you reached there?

A. Yes, sir.

Q. When you reached there, what was the condition of things at the works?

A. Well, sir, the mats would be out of place a few inches, six or seven inches.

Q. Well, what were the laborers employed there doing?

A. Sitting around there, not doing anything, sir.

Q. Did you ever attempt to move the mattresses with the rock on them with the boat?

A. Well, yes, sir, when there were a few rock on them you could hook up and try to pull them up, and you sometimes could pull them up.

Q. You could sometimes pull them without moving the rock?

A. Yes, sir.

Q. When you could not so remove them what was done?

913 A. The hands would have to get in the water and get them out the best way they could.

Q. You saw the character of stakes that were used in the work?

A. I hauled a good many on the steamboat.

Q. You hauled a good many?

A. Yes, sir.

Q. They were prepared where the fascines were prepared?

A. Some of them and some were close to the town.

Q. Did you witness the driving of them?

A. I seen some of them drove, yes, sir, a great many.

Q. Well, with what ease would they drive in the ground?

A. The stakes were 6 feet long, they were beveled on two sides, to drive in between the bundles of fascines, and they were drove in with mauls, two men on a stake.

Q. Did they drive home?

A. No, sir, sometimes they would and sometimes they would not, very often they would break the bundles or fascine and they would have to be taken out and re-wired, the wood was so large three inches at the small end.

Q. And it would burst the fascines?

A. Yes, sir.

Q. Were the fascines that were delivered aboard your boat at the landing place, measured there when you first received them?

A. Sometimes I have seen them measured on the land.

Q. Were they measured at the point where you put them off?

A. They were measured on the barges and some on the steamboat.

Q. Whom did you see them measured by?

A. Mr. Conant.

Q. Well, if they were not satisfactory, what action was taken?

A. He condemned them and threw them out, sir.

Q. Well, for what reason, wherein would they be unsatisfactory?

A. If they would be with crooked timber in them, fine or having crooked places from slack wire, if it was green 914 wood when it was cut, when it was seasoned the wire would slack up and they all had to be re-wired.

Q. Did you lose any mats at any time?

A. Yes, sir.

Q. In trying to haul it into place, was that it?

A. Yes, sir.

Q. How was it lost?

A. Torn up by towing it with the steamboat.

Q. How was it lost?

A. We have tore up several of them by towing them around by the steamboat; they were not measured until after they were taken to the work.

Q. Do you know what has become of the mattresses that were lost?

A. Yes, sir, one of them I seen a year ago 14 miles from Augusta, lodged in a bite.

Q. What sort of condition?

A. In good condition, it was a 20 foot mat.

Q. Hanging together well?

A. Yes, sir.

Q. Did you do any work on the old improvements of the river?

A. We went down below the Port Royal bridge and tore up one jetty, one or two, I don't remember which.

Q. You were personally engaged in that?

A. I was there with the steamboat and towed them up the river.

Q. Did you find any brush there?

A. None worth speaking about, none worth measuring, Mr. Conant didn't measure it.

Q. The stone was there?

A. Yes, sir, some few, I suppose we get over 20 yards from the portion we tore up.

Questions by Mr. Charlton.

Q. You were a steamboat man?

A. Yes, sir.

Q. Did you have anything else to do with the operation of that work except conducting the steamboat?

A. No, sir.

Q. Where did you find this mat that you speak about in the bite, how far below Augusta?

A. It was below Brier Creek, between Briar Creek and Haygoods, about 140 miles below Augusta.

Q. That is almost to Savannah.

A. The way the steamboat went, about 140 miles.

Q. How far from Savannah?

A. From the way the steamboat has to go it is 300 miles.

Q. About half way?

A. Only 202 according to the surveys.

Q. How did you come to recognize that mat 140 miles from Augusta?

A. It was there on the bank.

Q. You recognized it as soon as you saw it?

A. Yes, sir.

Q. Who would be apt to know better about the capacity of the wagons to haul fascines, you or the superintendent?

A. Well, sir, I was.

Q. Why?

A. Because he was on the work and I was down in the swamp, hauling them up.

Q. I thought you were on the steamboat?

A. Yes, sir, the wagons would haul them to the landing, and I would transfer them to the boat.

Q. Then the superintendent was not a judge of it?

A. I don't think he knew so much about it.

916 Q. Does he know very much about what he testified to? He was just as positive about that as anything else.

A. I say I had seen more hauling than he had.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. You said you recognized this mat as the work that had been done by Mr. Twiggs, had you ever seen mats like these?

A. No, sir.

Q. No where else?

A. No, sir.

WILLIAM H. PATTERSON, a witness for the prosecution, being duly sworn, testified as follows:

Q. What is your full name and place of residence?

A. W. H. Patterson.

Q. What is your place of residence?

A. Atlanta, Ga.

Q. What is your business?

A. I am a dealer in investment securities, bonds and stocks.

Q. In what business were you engaged in 1896?

A. In the same business then that I am now, and in the stone business in addition; a granite business.

Q. Did you become aware in 1896 that proposals were called for for bids to make improvements in the waters of this engineering district?

A. Yes, sir.

Q. Did you propose yourself to become a bidder?

A. No, sir, I did not.

Q. Did you propose to take any interest in any bid?

A. I desired to furnish stone.

Q. What steps did you take?

917 A. I first procured copies of the specification, then I came to Savannah I think, the day before the bids were to be opened, and talked with one, I am not sure, whether it was more than one, but certainly one contractor, about stone.

Q. Who was the contractor?

A. Mr. Gaynor.

Q. Do you know his full name?

A. I believe it is E. H., I know he is called Ed. Gaynor; I had met him a few times prior to that here.

Q. You talked with him about furnishing the stone?

A. Yes, sir.

Q. Furnishing it to him?

A. Yes, sir.

Q. Did you make a price on your stone?

A. I did.

Q. Do you remember what price it was?

A. No, sir, I do not.

Q. Do you remember that the specifications called for different classes of stone?

A. Yes, sir.

Q. First, second, third and fourth?

A. Yes, sir.

Q. What kind of stone did you propose to offer?

A. I am clear as to the first and second classes, and I think I made a figure on third class stone.

Q. You had no stone to meet the requirements of the fourth class?

A. No, sir.

Q. Do you remember what figures you made?

A. I do not, sir, not accurately. The best recollection I have about it is that I proposed to furnish first, second and third class stone for Savannah at something like \$1.25 a yard; it may have been \$1.35, I cannot remember distinctly, 918 and for Fernandina, for the Cumberland Sound work, as I understood it, I think at \$1.60 or \$1.70 a yard.

Q. Was that a yard or ton?

A. A cubic yard, as I remember it, it may have been tons.

Q. It was for whatever quantity is called for in the specifications, if the specifications called for yards it was for yards, and if for tons, it was tons?

A. It is my recollection that the specifications called for yards, it has been quite a long time ago.

Q. What kind of stone did you propose to offer for?

A. Granite.

Q. Do you know the Venable quarries?

A. Yes, sir, very well.

Q. The same kind of stone?

A. Practically.

Q. Were you enabled to dispose of that stone at the price you named?

A. No, sir.

Q. Were you present when the bids were opened?

A. Yes, sir.

Q. Do you remember who was present?

A. No, sir, there were a good many people I did not know.

Q. Can you recall any one that you did not know?

A. I think the Venable Bros. were here; I am quite sure one of them was in the room; I think both were; I am not positive as to both; a Mr. Moore of Mobile and a young gentleman, who I was told was his son, I think was there; a man by the name of Walker from Lithonia, another stone man,

and the two Gaynors, I think, John Gaynor and Edward Gaynor, and I think Capt. Green was there and quite a number of others who I did not know.

Q. You have not a definite recollection?

A. No, sir.

Q. You saw all the parties you have named while you 919 were here that day?

A. Yes, sir. I think they were in the room at the time of opening the bids. I am not positive as to all of them.

Q. Now, did you see any bids put in?

A. Yes, sir, I went in Capt. Carter's office a little while before twelve o'clock; a few minutes before, and a gentleman who was pointed out to me as Capt. Carter, I had never met him, I do not know that I see him now, of my own knowledge, he and another man were behind a desk or table, as I remember it, and there were four piles of envelopes, large official envelopes alongside of each other on the table; just a little bit before the clock struck twelve, or began to strike, one of the Gaynors, I think it was John Gaynor, and I think Capt. Green, came in together, and after the clock began to strike twelve, one of those two gentlemen walked over to the table and laid down two large envelopes, and either Capt. Carter or the man at the desk placed them on the pile. As soon as the clock finished striking, they began to open the bids.

Q. How many piles were there?

A. I think there were four.

Q. After the bids were opened, did you have any conversation with them about furnishing the stone?

A. Yes, sir, I saw Ed. Gaynor at the DeSoto that afternoon and asked him where I was on rock, and he said he didn't know; I said, "You have got other propositions from other people, am I high or low?" He said, "I can't tell you that now." I think I can get stone furnished cheaper than any one was bid." And he said, "I'll see you later;" and it will be later when he sees me, I have not seen him since.

Q. Do you know how many bids there were in each pile, Mr. Patterson?

A. I think there were four, I cannot be positive, it has been so long ago.

Q. How long before the bids were opened, Mr. Patterson, did you give prices to Mr. Gaynor as to what you would furnish that first, second and third class stone for?

A. It was during the morning; I think before I gave him the proposition I asked him how late I could hand it in to him, and he mentioned an hour; I cannot remember, it seems

to me it was eleven o'clock, it may have been ten; I don't remember distinctly, it was that morning, an hour or two before the bids were filed.

Q. Did you hear anything about Florida stone being used, —that would have been of no interest to you I suppose, Mr. Patterson?

A. No, sir, I had no interest in Florida stone, as I remember it, Mr. Gaynor, when I was talking with him about stone, said he would have to use granite for first, second and third class stone, but he could use Florida stone for the fourth class stone, and there was no use for me to bid on that.

Q. Was that before or after the bidding?

A. Before.

SAMUEL M. HALE, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate:

Q. I will take you right to the subject of the examination in relation to the Twiggs' contract. You remember you have been sworn heretofore, and that always remains going through the entire trial.

A. Yes, sir.

Q. You were an inspector at the time the Twiggs' contract was being executed?

A. Yes, sir.

Q. Were you on duty in Augusta at that time, at any time?

A. Yes, sir, during that time, yes, sir.

921 Q. Do you know anything of the inspection of the fascines?

A. Yes, sir.

Q. As to their length and construction?

A. Yes, sir.

Q. Do you know anything of the fascines being of too great length?

A. Yes, sir, well, they used both lengths, yes, sir as to the length.

Q. But if they were longer than the specifications required, what was done?

A. If they were four inches or more longer, they were always cut off; I was told to cut them off.

Q. Told to cut them off, by whom?

A. Mr. Conant, the inspector in charge.

Q. Do you remember when he went up there?

A. Yes, sir, on December 11th.

Q. Did Capt. Carter come up there while you were there?

A. Yes, sir.

Q. Did you have a conversation with him in regard to the manner in which the contract was being carried out?

A. Yes, sir, Capt. Carter asked me regarding the trouble that happened there, he said that Mr. Conant had told him something about stone being used that I had condemned, and then he asked me about the way that Mr. Conant treated Mr. Twiggs, or something to that effect. I told him at the time that I didn't think Mr. Conant was doing what was right, that is, in such a way as that; that was the impression I intended to leave with him.

Q. Doing right in what, Mr. Hale?

A. What I meant is I didn't think he treated Mr. Twiggs right in the matter.

Q. Do you mean in a social or business way?

922 A. Social and business way?

Q. Well, how in a business way?

A. Well, in a business way, in the first place, of course, I had never seen the specifications, it is true, but he went to extremes in several things, such as cutting off those fascines at six inches, those that were in a wire bundle, and there was only a part of the fascines projecting out, instead of putting them down stream, he would have all those little ends cut off.

Q. As to his criticism of the work of Mr. Twiggs?

A. He claimed that Mr. Twiggs would never do anything that he told him to do; he said Mr. Twiggs would always say things that he would never do, which I found to be different.

Q. As an inspector how in your judgment was that work being done?

A. Well, I think that the work was done all right, except that Mr. Conant did go a little too far in some things.

Q. How was it you differed with Mr. Conant in his views as to the way Mr. Twiggs was working?

A. Well, sir, as I say, about this brush matter, and then about the sinking of the mats and things of that kind. Of course, if I had gone by the specifications, I would have been somewhat different from that; I would not have held everything to the inch, it is true; I mean I think he went a little too far in this case.

Q. Too rigid?

A. Yes, sir.

Q. This was on Jan. 5th, you say, that Capt. Carter came, when did you return to Savannah?

A. January 7th.

Q. You told Capt. Carter about this difference of view between Mr. Conant and yourself?

A. Well, I told him Mr. Conant was too hard, I thought, with Mr. Twiggs, or something to that effect, I cannot
923 remember the words exactly.

Q. When did you return to Savannah?

A. January 11th, the 7th, I mean to say.

Q. Did you return again to Augusta?

A. No, sir.

Q. Where did you go then.

A. I was sent to report to Mr. Gieseller at first on different little surveys being done on the river. And then afterwards to Mr. Cooper, and then I was on several surveys after that on the annual surveys.

Q. But never again while the Twiggs' contract was in force did you go to Augusta?

A. No, sir.

Cross-Examination.

Questions by Mr. Charlton.

Q. What had been your experience as an inspector before you went to Augusta?

A. I had never been an inspector of mats before.

Q. You never had been?

A. No, sir.

Q. How long were you at Augusta engaged in the work of inspecting?

A. From Dec. 11, to Jan. 7th—.

Q. Less than a month?

A. Yes, sir.

Q. Where did this conversation occur with Capt. Carter that you have referred to?

A. On one of the jetties or dams that we were building.

Q. Who was present?

A. Albert Twiggs and I were talking there when Capt. Carter came up.

Q. Was Mr. Twiggs present,—did he hear it too?

924 A. No, sir.

Q. Just you and Capt. Carter?

A. Capt. Carter called me aside and asked about the matter.

Q. You had been less than a month at the work of inspector, and did not know the specifications?

A. No, sir, I didn't know them.

Q. Yet you undertook to tell him that Mr. Conant was not carrying them out properly?

A. No, sir, I did not say he was not carrying out the work properly.

Q. What do you mean to say?

A. I meant in some things he went to extremes.

Q. In other words, he was oppressing Mr. Twiggs, is that the idea?

A. He would have things done that were unnecessary, as I thought.

Q. Mr. Conant was your superior officer?

A. Yes, sir, of course, I had nothing to say to him about it.

ROBERT B. WOOLVIN, a witness for the prosecution, being duly sworn, testified as follows:

Questions by the Judge-Advocate.

Q. Where do you live?

A. I live at Abbeville, Ga.

Q. Where were you employed in the latter part of 1893?

A. I was assistant inspector of the contract work of Albert J. Twiggs, Augusta, Ga.

Q. How long were you so employed?

A. I was employed about three months; I went there about the first of Nov. and left about the first of Feb. or probably a few days afterwards.

Q. Were you employed by Mr. Twiggs or by Mr. Conant?

925 A. I was employed by Capt. Carter; I was in the employ of the Engineering Department.

Q. You were there as an inspector?

A. Yes, sir.

Q. Well, how was the work done, Mr. Woolvin?

A. Well, sir, according to my judgment, I think the work was done according to the contract.

Q. Were you furnished with a copy of the specifications?, —when you went there?

A. I looked over the specifications twice in Mr. Conant's room.

Q. He had a copy in his room and you went over them with Mr. Conant?

A. Yes, sir.

Q. As to the fascines, construction, length, etc.?

A. Yes, sir, the dimensions.

Q. Now when those fascines were brought to the point where they were to be used, did you inspect them there?

A. They were inspected on the barges and sometimes fas-

cines were brought up to the boat and piled up on the wharf and measured on the wharf?

Q. Did you do that work?

A. I have done some of it and Mr. Conant did some also.

Q. When the fascines were longer than the specifications called for, what action was taken?

A. I never cut off any fascines on the work.

Q. Did you ever find any that were too long?

A. I have seen a few too long.

Q. Did you ever find any that you yourself measured that were too long?

A. The fascines, the way they were piled up, was how we found out one end would project over, and that is the way they were measured.

926 Q. You never ordered any reduced in length?

A. No, sir.

Q. You never ordered any to be cut off?

A. No, sir.

Q. Were any ordered to be cut off to your knowledge?

A. Not to my knowledge, I have heard Mr. Hale speak about it; I didn't know anything about the orders; I don't know whether there were any orders concerning that or not.

Q. You know there was a supplemental contract made, don't you, with Mr. Twiggs?

A. Yes, sir.

Q. Did you remain while that was in force?

A. I was foreman on that part of the work.

Q. You were a foreman at that time?

A. I was placed on that part of the work as I suppose, foreman.

Q. How many inspectors were employed there under Capt. Carter, in superintending or inspecting the work done under that supplemental contract?

A. Well, there was no inspector except myself, Mr. Conant looked over that portion of the work as it went on.

Q. You were the only inspector besides Mr. Conant?

A. I was the only inspector on the part that the Government was doing, when they had taken a part from him.

Q. I am alluding to the inspectors, that their services had to be charged to Mr. Twiggs.

A. I don't know what were on duty at the brush camp, I don't know anything about them; I know only about the construction.

Q. You have referred only to the inspectors over the Government work, how many inspectors in addition were over Mr. Twiggs' work?

A. Two, Mr. Ford and Mr. Hale were there; that is about all I know that were sent up for inspectors.

927 Q. You saw the fascines, of course, that were used, being there as an inspector, had you seen any of the fascines that had been used on the improvements of two years previous, or the year previous?

A. The brush there on the shore protection had decayed, and you could not tell much about that; that's about the amount of that

Q. You had never seen any of the fascines as they were in their original condition?

A. No, sir, there was not any whole, I never saw any you could handle, though we repaired several of the dams.

Q. You never had seen any of the fresh ones?

A. No, sir.

Q. You went over the work where the old improvements had been made

A. Yes, sir, I have been over that work, I repaired some of it.

Q. Did you find any stakes in place?

A. I found some stakes.

Q. You had used stakes under the Twiggs' contract?

A. Yes, sir.

Q. How did they compare, those used on the Twiggs' contract, and those used in the ruins?

A. They didn't look so good, the stakes, as those used by Mr. Twiggs, from what I could see of them.

Q. How about the dimensions, were they as large?

A. Not as I could see. I remember one day Mr. Twiggs pulled up one that was placed in the shore protection; he taken it up with his hands; it was two inches in diameter, two and a half, maybe.

Q. At its smallest or largest end?

A. You might say the largest end.

Q. Two inches or two and a half?

A. Something about that.

Q. How long was it?

A. Twelve or fifteen in the ground and fifteen or 928 eighteen inches above the ground.

Q. Did you take it in your hand?

A. I did not, Mr. Twiggs just pulled it out and showed it to me.

Q. How did he pull it out?

A. He just worked it with his hands.

Q. There was vigor enough left that he could work it loose without breaking it?

A. I judge it was 12 or 15 inches in the ground, something like that.

Q. How about the stakes used under the Twiggs' contract?

A. They were 5 or 6 feet in length, as well as I remember, that was what the specifications called for, 5 or 6 feet.

Q. How large were they at the taper end, the small end?

A. Well, they were about 3 inches, I suppose; that is what Mr. Conant told me to have the sizes, to receive them; that was my instruction; whether there was anything said about the diameter in the specifications, I don't remember.

Q. In relation to those pegs, you saw how many of those were left in place?

A. Those of the former work?

Q. Yes.

A. I don't know, I never noticed particularly. You would just see one now and then; I never noticed particularly about that. On top of the bank there were very few and of course, where the dams were submerged, you could not see any of them.

Q. This was on the shore protection those were used?

A. This was on the shore protection.

Q. Was there much brush, if any, around the one Mr. Twiggs pulled out?

A. There was brush in the dam, but it was so decayed that you could not tell anything about it; several freshets had passed over it, and it seemed as if it had been done several years ago

929 Q. I mean just in the vicinity of the spot where he pulled out the stake.

A. I never noticed that particularly; I could not well see, I never noticed about around the stake.

Cross-Examination.

Questions by Mr. Charlton.

Q. That was your first visit there as inspector?

A. That was my first visit there as inspector.

(Here the Court at 1.50 o'clock p. m. adjourned until tomorrow Feb. 2, 1898, at 11 o'clock a. m.)

THOMAS F. BARR,
Col. & Asst. Judge Adv. Genl
Judge Advocate.

930

United States Court Room,
Savannah, Ga.,

February 2nd, 1898.

Court met pursuant to its adjournment of yesterday at eleven o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his Counsel, and the Reporter, W. O. Tarver, were also present.

The President: The Court will come to order.

J. W. O. STERLY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. You furnished from the office a statement of the final settlement with Mr. Twiggs under his contract, and subsequently a statement of the details of expenditures made on behalf of the Government and charged to him. I want you to show how the statement of expenditures was made up: Now, as to the contract work; look at the work done for the United States under the supplemental contract.

A. The total amount of work done by the United States under the supplemental contract, \$3,912.81.

Q. How was that made out in detail?

A. 1549.52 cubic yards of Fascines at 74c, \$1,146.54; 1589.75 cubic yards of stone at \$1.74, \$2,766.17.

Q. How was the charge for mileage made; take there the charge of \$84.48?

A. Mileage for Capt. Carter, for traveling in connection with this work; there was eight vouchers,—no; four vouchers.

Q. For what amount and when?

A. Voucher No. 2, December, 1893, pay to Capt. O. M. Carter for mileage, \$21.12, for traveling from Savannah to 931 Augusta and return, 27th and 28th of November. Voucher No. 3, 1893, mileage, pay to—

Q. What month?

A. Traveling on the 9th of December to the 10th of December, from Savannah to Augusta and return, \$21.12, pay to Capt. O. M. Carter. Voucher No. 19, January, 1894, mileage, \$21.12, fro travelling from Savannah to Augusta and return, January 5th to January 10th, pay to Capt. O. M. Carter. Voucher No. 16, February, 1894, mileage, pay to Capt. O. M. Carter, \$21.12, for traveling from Savannah to Augusta and return, 5th of February to 7th of February, 1894.

Q. Please state how the aggregate of the charge for traveling expenses, \$94.22, was made up?

A. Voucher No. 7, December, 1893, pay to R. B. Woolvin, Inspector, traveling expenses, \$14.16; for Traveling from Abbeville, Ga., to Augusta, Ga., via Savannah, on Nov. 1st to 4th, 1893/ Voucher No. 6, January, 1894, pay to E. R. Conant, Inspector, for traveling expenses, \$10.87, for traveling from Augusta to Savannah and return, December 1st to 2nd, 1893. Voucher No. 8, January, 1894, pay to Campbell Ford, Foreman, traveling expenses, \$10.96, for traveling Savannah to Augusta, Dec. 11th to 13th, 1893. Voucher No. 15, January, 1894, pay to S. M. Hale, Inspector, traveling expenses, \$10.96, Savannah to Augusta, December 11th to 13th, 1893. Voucher No. 18 pay to S. M. Hale, Inspector, for traveling expenses \$6.51, traveling from Augusta to Savannah on January 6th and 7th 1894. Voucher No. 24, January, 1894, pay to E. R. Conant, Inspector, traveling expenses, \$10/42, for traveling from Savannah to Augusta and return on the 30th of December, 1893. Voucher No. 23, February, 1894, pay to E. R. Conant, Inspector, traveling expenses, \$12.42, for traveling from Augusta to Savannah and return on January 20th to 21st, 1894. Voucher No. 24, February, 1894 pay to E. R. Conant, Inspector, traveling expenses, \$8.96, traveling from Augusta, Ga., to Savannah, February 11th to 13th, 1894. Voucher No. 25, February, 1894, pay 932 to Campbell Ford, Inspector, traveling expenses, \$8.96, traveling Augusta to Savannah, Feb'y 11th to 13th, 1894.

Q. How many vouchers did the office rent at Augusta require?

A. Four vouchers.

Q. What amounts?

A. Voucher No. 6, December, 1893, Planters Hotel Co.,

office rent, \$12.00. Only a part of this voucher, \$8.80, is charged to this account.

Q. Part of the time, then, wasn't covered by the supplemental contract?

A. No, sir; from the 20th of October 1893, until the end of that month.

Mr. Rose: That was 16 days extension.

Judge-Advocate: Well, the whole month isn't charged, I understand from the witness.

Q. Did I so understand you, Mr. Sterly?

A. Yes, sir; this deduction starts from the 20th of October, 1893, when the second extension commenced.

Q. Yes; commenced with the second extension?

A. With the second extension.

Q. That was sometime before the supplemental contract went into effect?

A. 16 days. Voucher No. 12, January, 1894, Planters Hotel Co., office rent, \$12.00, for the month of December, 1893. Voucher No. 22, February, 1894, Planters Hotel Co., office rent for the month of January, 1894, \$12.00. Voucher No. 3, November, 1893, Planters Hotel Co., office rent, \$12.00, for the month of October, 1893.

Q. You have read that October one, have you not?

A. Yes, sir: I just see that there is an error in the original statement. These vouchers have been deducted from the payment. This Voucher No. 6 was for the full month of 933 November, and I gave that as for October.

Q. You will have to rectify it with the reporter?

A. I read Voucher No. 6, December, 1893, as being payment for October. It should have been voucher No. 3, November, 1893, and Voucher No. 6 is for office rent for November, 1893.

Q. Now, how is the item of pay-rolls, laborers, \$2,558.63 made out?

A. The pay-rolls for laborers as follows: Voucher No. 4, December, 1893, payroll for December, \$448.30.

Q. What is the next one?

A. Voucher No. 1, January, 1894, \$511.88, payroll for December, 1893. There are several payrolls for one month.

Judge-Advocate: I call the attention of Counsel to the fact that, on this pay-roll, the rate of pay for the laborers is stated at from \$1.50 to 75c per day, the largest amount

appearing on the first page being \$14.25; the largest amount on the second page being \$8.25; the largest amount on the 4th page being for labor with team \$20.00; the largest amount on the last page \$42.75, labor with team, Geo. H. Kehrigan.

Q. What is the next?

A. Voucher No. 4, 1894, payroll for first ten days in January, \$559.76.

Q. What is the next one?

A. Voucher No. 21, January, 1894, for the second ten days in January, 1894, \$495.69. Voucher No. 2, February, 1894, for the last ten days in January, \$365.32.

Judge-Advocate: I call the attention of the Court to the fact that upon the last page of that payroll appears the name of W. R. Stafford, blacksmith, who is paid for 2 days, 29th to 30th, inclusive, at \$2.00 a day, \$4.00.

Q. What is the next one?

A. Voucher No. 19, February, 1894, \$167.40, for Feb. 1st to 15, 1894.

Q. Now, the vouchers as to telegrams?

A. Voucher No. 13, February, 1894, Western Union 934 Telegraph Co., telegrams, \$5.14.

Q. How much?

A. \$4.54; 60c of this account is previous to the second extension.

Q. Now as to the superintendence of the work? which aggregated \$1,067.67; how was that made up?

A. Voucher No. 1, December, 1893, payroll for November, \$220.00.

Q. Who was the party, and what for?

A. I should have stated another voucher first. This was for services of E. R. Conant, Inspector, R. B. Woolvin, Inspector and Geo. Barnum, Boatman, \$220.00 for services in November, 1893.

Q. What is the next one you find there?

A. Voucher No. 1, November, 1893, payroll for October, 1893, \$130.00. 11 days of this are charged to Mr. Twiggs, \$47.67,—E. R. Conant, Inspector, and Geo. Barnum, Boatman. The next one is Voucher No. 2, January, 1894, payroll for December, 1893, \$359.00, E. R. Conant, S. M. Hale, R. B. Woolvin, Campbell Ford, Gus. Collier and George Barnum.

Q. How much for each?

A. E. R. Conant, \$100.00; S. M. Hale, \$60.00; R. B. Woolvin, \$90.00; Campbell Ford, \$60.00; Gus. Collier, \$20.00; George Barnum, \$29.00

Q. Go to the next one?

A. Voucher No. 36, January, 1894, S. M. Hale, services, \$72.00, \$21.00 charged to Mr. Twiggs. Voucher No. 3, February, 1894, payroll for January, 1894, \$280.00, Conant, Woolvin and Ford,—\$100.00 to Conant, \$90.00 to Woolvin and \$90.00 to Ford. Voucher No. 18, February, 1894, \$140.00, Conant \$50.00,—Woolvin \$45.00 and Ford \$45.00. This is for half of the month of February.

Q. That was the completion of the work?

A. Yes, sir.

Q. Now you may take up the vouchers for material and read them one after another, the aggregate being \$2,878.01.

A. Voucher No. 5, December, 1893, Andrew Hanley, Oakum, \$4.50; voucher No. 5, January, 1894, Augusta 935 Hardware Co., Sundries, \$49.00; voucher No. 7, January, 1894, J. T. Butler, brush and poles, \$30.00; voucher No. 9, January, 1894, E. D. Reese, Broken Stone, \$719.29; voucher No. 10, January, 1894, John J. Evans, Sundries, \$71.42; voucher No. 11, January, 1894, Geo. R. Lombard & Co., Bolts, Pins, Washers, etc., \$9.88; voucher No. 13, January, 1894, Perkins Mfg. Co., Lumber, \$80.06; voucher No. 14, January, 1894, Z. T. Keener, bateau and paddles, \$9.00; voucher No. 16, January, 1894, W. R. Stafford, Sundries, \$31.15; voucher No. 17, January, 1894, J. M. Landrum, brush and poles, \$25.00; voucher No. 29, January, 1894, N Paulsen, Rope and Anchor, \$53.77; voucher No. 21, February, 1894, E. D. Reese, broken stone, \$1,665.34; voucher No. 31, February, 1894, Ephraim Tweedy, Brush, \$15.00; voucher No. 34, February, 1894, G. R. Landrum, Brush, \$15.00; voucher No. 32, February, 1894, John J. Evans, Sundries, \$38.13—

The Court: Upon that voucher, see what those sundries may be charged as.

Witness: It is dated Augusta, Ga., Jan. 31, 1894, 1 water bucket 15c, 1 doz. shovels, \$3.25—

The Court: That is enough.

Witness continuing: Voucher No. 43, February, 1894, Maurice Walton Wire, \$27.87; voucher No. 33, Feb., 1894, B. W. Fair, Poles, \$33.60.

Q. The next item is a charge for office expenses, Savannah, \$483.82; how do you make out that statement?

A. Voucher No. 7, October, 1893, payroll for October, 1893, \$335.00, 11 days charged to Mr. Twiggs, \$122.83,—M. A. Connolly, Julius H. Grundel and James Green. Voucher No. 5, November, 1893, payroll for November, 1893, \$185.00; one half of the month charged to Mr. Twiggs,—M. A. Connolly \$150.00, James Green \$35.00. \$185.00 is the total of the payroll, and half of that is charged to Mr. Twiggs. Voucher No. 9, December, 1893, J. W. O. Sterly, services, for Dec. 16th to 31st inclusive, \$87.50. Voucher No. 35, January, 1894, M. A.

Connolly. \$150.00 for services during the month of January, 1894.

Q. What work was Mr. Connolly engaged upon during that month of January?

A. He was employed as a clerk in the office.

Q. What doing?

A. Checking reports, writing, indexing, and filing letters, and reports.

Q. What work was he doing in that month which he had not been doing in any other month?

A. He was doing the same work he always did.

Q. What work, to your knowledge, did he do in connection with the Twiggs contract.

A. In connection with the Twiggs contract, he did the same work,—checking the reports as they came in every ten days. He checked the amounts, stamped them, and filed them away; that is, the reports. Then he had to write the letters, copy the letters, send them away, and brief the incoming letters.

Q. Was he engaged on any other work during that month? than the Twiggs contract?

A. Yes, sir; his regular routine office work.

Q. What was his salary?

A. \$150.00.

Q. Now I see in one month one half of your salary is charged to Mr. Twiggs; that is in December, 15 days, \$87.50; how much of that time did you devote to the Twiggs contract?

A. I don't know how to answer that question. If the work came in—It did not come in at one time. Just how much I worked during that one month for Mr. Twiggs, I could not say.

Q. What other work was going on in this engineering district at that time?

A. Work in Savannah Harbor,—dredging and jetty work.

Q. Two different contracts?

A. Yes, sir; then there was snagging operations on 937 the Ocmulgee and Oconee Rivers, and I cannot very well single out just how much time I would have devoted to one particular part of them.

Q. Did you ever have to work over hours?

A. I never keep myself down to office hours strictly.

Q. Was there any increase of force during the time of the work done under the Twiggs contract?

A. The same office force.

Q. Was there any reduction of force immediately after the Twiggs contract had expired?

A. No, sir; but a few months afterwards—

Q. I mean immediately afterwards?

A. No, sir.

Q. I see the name of Green down here, once for eleven days and once for fifteen; who is Green?

A. Messenger in the office.

Q. They charged 11 days in October and 15 days in November for messenger service?

A. Yes, sir.

Q. There has always been a messenger in the office?

A. Yes, sir.

Q. He wasn't employed especially because of the Twiggs contract?

A. No, sir.

Q. Give me G. R. 58 of 1890; what is that?

A. Letter from the Chief of Engineers under date of September 20th, 1890, notifying Capt. Carter of the passage of the River and Harbor Bill on September 19th, 1890, and requests him to submit projects for the expenditure.

Q. Give me S. R. page 33?

A. October 6th, 1890, Capt. Carter submits project of expenditure, for \$25,000.00 appropriated by Act of Congress for improving the Savannah River between Augusta and Savannah.

Q. S. R. 16?

A. S. R. 16 is a letter from the Chief of Engineers,

938 dated Oct. 13, 1890 notifying Capt: Carter that he approves project for Savannah River between Augusta and Savannah.

Q. That was October 13th, 1890, do I understand?

A. 1890.

Q. What date did you find when the specifications were submitted and request for authority to print forwarded?

A. July 1st, 1891.

Q. Under what date did you find that authority to advertise was given?

A. Under date of July 8, 1891.

Q. When was that authority received in the engineer office here?

A. July 13, 1891.

Q. What was the date of the advertisement on the specifications?

A. July 1st, 1891.

Q. When were bids to be opened?

A. On the 1st of August, 1891.

Q. What was the date of the first issue of specifications?

A. July 20, 1891.

Q. In what papers was the advertisement inserted, when and how often? Page 147.

A. Chronicle, Augusta, Ga., July 16, 18 and 25, 1891; Morning News, Savannah, Ga., July 16, 18 and 25, 1891; Engineering Record, New York, July 18, 1891; Engineering News, New York, July 18, 1891.

The following papers were identified by the witness, and offered in evidence and read by the Judge-Advocate:

File S. R. 20, 1891.

"Wilmington, N. C., July 18, 1891.

"Capt. O. M. Carter,

Corps of Engineers, U. S. Army.

"Dear Sir:

"Please send me specifications for repairing and constructing wing dams and shore protection to the Savannah River below Augusta, Ga.

Oblige,

Yours truly,

LOUIS L. HANBY."

P. O. Box 72

S. R. Letter Book, 1891, page 126.

United States Engineer Office,
Savannah, Ga., July 20, 1891.

"Mr. Louis L. Hanby,
P. O. Box 72,
Wilmington, North Carolina.

Sir:

I enclose herewith one copy of specifications for Savannah River work. Should you decide to bid upon the same, two more copies will be sent you upon application.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs. U. S. A."

File S. R. 21, 1891.

"Wilmington, N. C., July 21, 1891.

"Capt. O. M. Carter,
Savannah Ga.

Sir:

As I expect to bid on the Savannah River work, you will please mail me two more copies of the specifications and oblige,

Yours truly,

LOUIS L. HANBY."

United States Engineer Office,
Savannah, Ga., July 22, 1891.

Mr. Louis L. Hanby,
Wilmington?, N. C.

940 Dear Sir:

In reply to your request of the 21st inst., there are sent you herewith, two more copies of specifications for Savannah River work.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs. U. S. A."

File S. R. 22, 1891.

The Maryland Granite Company,
The Rocks, Md., July 18, 1891.

Capt. O. M. Carter,
Corps of Engineers, U. S. A.,
Savannah, Ga.

Dear Sir:

Will you please furnish us the information and blank forms to enable us to bid for repairing and constructing wing dams and shore protections to the Savannah River below Augusta, Georgia, and oblige,

Yours respectfully,

THE MARYLAND GRANITE CO.,
W. B. SPRAGUE,
Manager.

S. R. Letter Book, 1891, page 129.

United States Engineer Office,
Savannah, Ga., July 22nd, 1891.

Mr. W. B. Sprague,
G. M. Maryland Granite Co.,
The Rocks, Md.

Sir:

There is sent to you with this, one copy of specifications for work in Savannah River, below Augusta, Ga. Should
941 you decide to bid upon the work, two more copies will be sent you upon your application.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs., U. S. A.

File S. R. 23, 1891.

A. J. Twiggs,
Consulting Engineer and General Contractor,
P. O. Box 195,

Augusta, Ga., July 23, 1891.

Capt. O. M. Carter,
Savannah, Ga.

Dear Captain:

One copy of the specifications for the Savannah River work below Augusta rec'd. I would like to make a bid for the work. Please send me two more copies, and oblige,

Yours very truly,

A. J. TWIGGS.

Letter Book S. R., 1891, page 134.

United States Engineer Office,
Savannah Ga., July 25, 1891.

Mr. A. J. Twiggs,
Post Office Box 195,
Augusta Ga.

Sir:

In compliance with your request of the 23rd inst., there are sent to you herewith, two more copies of specifications for Savannah River work.

You will please notice that the bids will be opened at this office at 12. o'clock M., city time, instead of in New York.

942

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

Q. (continuing examination) Did you find any entry in the books indicating a written application by Mr. Twiggs for the one copy of the specifications which he refers to as having received?

A. There is a letter sent to him on page 127.

The Judge-Advocate continued to offer in evidence, and read papers identified by the witness as follows:

S. R. Letter Book, 1891, page 127.

United States Engineer Office,
Savannah, Ga., July 20, 1891.

Mr. A. J. Twiggs,
No. 427 6th St., Augusta, Ga.

Sir:

I enclose herewith one copy of specifications for Savannah River Work. Should you decide to bid upon the same, two more copies will be sent you upon application.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engineers, U. S. A.

Judge-Advocate: There is no record that he had made a written application for that.

File S. R. 24, 1891.

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

945

File S. R. 27, 1891.

July 25th, 1891.

Capt. O. M. Carter,
Corps of Engrs., U. S. A.,
Savannah, Ga.

Dear Sir:

I received one copy of specification, etc., for the Savannah River work. Will you kindly send me the other two copies

to Charleston, S. C., as I intend to make a proposition for this work.

Yours respectfully,

J. FRIDAY,
Charleston Hotel.

Letter Book S. R., 1891, page 139.

United States Engineer Office,
Savannah, Ga., July 28, 1891.

Mr. J. Friday,
Charleston Hotel,
Charleston, S. C.

Sir:

In compliance with your request of the 25th inst., two more copies of specifications for Savannah River work are sent you herewith.

You will please note that the bids will be opened at this office at 12 o'clock M., city time, on the first day of August, and not in New York.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

Judge-Advocate: That is the last of the written applications for specifications. (And continues to offer in evidence papers identified by the witness, as follows:)

946 S. R. Letter Book, 1891, page 131.

United States Engineer Office,
Savannah, Ga., July 21, 1891.

Mr. John F. Gaynor,
Fayetteville, N. Y.

Sir:

In compliance with your request, there is sent to you today one set of specifications relating to the works in Savannah River, below Augusta.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

S. R. Letter Book, 1891, page 135.

United States Engineer Office,
Savannah, Ga., July 25, 1891.

Mr. F. M. Jones,
Savannah, Ga.

Sir:

In accordance with your request, there is handed to you herewith, one copy of specifications for work to be done in Savannah River, below Augusta, Ga., with the information that should you decide to put in a bid, two more copies of specifications will be sent you or given to you upon application.

Very respectfully,
Your obedient servant,
O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

S. R. Letter Book, 1891, page 136.

United States Engineer Office,
Savannah, Ga., July 25, 1891.

947 Mr. Samuel R. Adams,
Camden, S. C.

Sir:

In accordance with your request, there is handed you herewith, one copy of specifications for work contemplated in Savannah River, below Augusta, Ga., with the information that should you decide to put in a bid on this work, two more copies of the specifications will be given or sent you upon application.

Very respectfully,
Your obedient servant,
O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

Q. Now have you the abstract of bids there?

A. (Witness handed Judge-Advocate the papers called for)

Judge-Advocate: I offer in evidence and read the abstract of proposals, with a letter from Capt. Carter to the Chief of Engineers as follows:

“United States Engineer Office,
“Savannah, Ga., August 1, 1891.
“The Chief of Engineers, U. S. Army,
Washington, D. C.

General:—

I have the honor to transmit herewith, all proposals received for repairing and constructing wing dams and shore protection in Savannah River, below Augusta, Ga., and to recommend the acceptance of the bid of John F. Gaynor, Fayetteville, N. Y., he being the lowest responsible bidder.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt., Corps of Engineers, U. S. A.”

“Abstract of Proposals for Construction and Repairing
948 Wing-dams and Shore Protection in the Savannah River,
below Augusta, Georgia, opened on August 1, 1891, by
Capt. O. M. Carter, Corps of Engineers, U. S. Army.

Jacob Friday, Charleston, S. C., bid on mattresses, \$1.61 per cubic yard and on stone, \$3.15 per cubic yard; Samuel W. Skinner and Thomas E. Wallace, Wilmington, N. C., bid on mattresses \$2.10 per cubic yard and on stone \$3.10 per cubic yard; John F. Gaynor, Fayetteville, N. Y., bid on mattresses \$1.29 per cubic yard and on stone, \$2.69 per cubic yard.

“Amount available, about \$15,000. Bid recommended for acceptance, he being the lowest responsible bidder for the best and most suitable services,” with a mark against this and against the name of John F. Gaynor.

“I hereby certify that the above Abstract of Proposals is correct.

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.,
Savannah, Ga., August 1, 1891.”

Q. (Continuing examination) Do you know when work began under this contract?

A. Work began on the 5th of October, 1891.

Q. Do you know when it was closed?

A. On 20th November, 1891.

Q. Do you know when the Gaynor contract in Savannah Harbor was closed in the year 1891?

A. On August 11, 1891.

Q. Have you the proposals and contract there for this work?

A. (Witness handed Judge-Advocate papers called for)

Judge-Advocate: I offer in evidence the proposals referred to in the abstract, together with contract entered into with John F. Gaynor, and the Contractor's bond to accompany the contract. Copies will be attached to the record marked Exhibits 66, 67, 68 and 69.

949 I also offer the contractor's bond, John F. Gaynor as principal and B. D. Green and Thomas F. Gaynor as sureties in the penal sum of \$10,000, for the faithful performance of the contract: Copy of this will be attached to the record marked Exhibit No. 70.

Q. Now give me S. R. 13, 1892?

A. That is the River and Harbor Bill.

Q. What year?

A. July 13th, 1892, appropriating money for the Rivers and Harbors.

Q. Give me the date of submitting project of expenditure in relation to Savannah River above Augusta?

A. July 27, 1892.

Q. Give me the date of approval of the project?

A. August 8, 1892.

Q. Give me the date of submitting the specifications and request for authority to advertise?

A. August 18, 1892.

Q. Give me the date of Authority to advertise,—to print specifications and to advertise?

A. August 25th, 1892.

Q. What was the date of the advertisement on the specifications?

A. August 18, 1892.

Q. And published with that date of August 18, 1892?

A. Yes, sir.

Q. What was to be the date of the opening of the bids?

A. September 19, 1892.

Q. What was the date of the first issue of specifications?

A. September 3, 1892.

Q. In what papers did the advertisement appear and for how many times?

A. Savannah Morning News six times, August 31, Sept. 1, 2, 3, 16 and 17, 1892.

Q. The same dates in the News & Courier of Charles-
950 ton and in the Times-Union of Jacksonville?

A. Yes, sir.

Q. How often in the Engineering News, New York?

A. September 1st, 8th and 15th, 1892.

Q. Marine Journal, New York?

A. September 3, 10 and 17, 1892.

Q. How many specifications were printed?

A. 200.

Q. How many were sent to the Chief of Engineers?

A. 125 copies.

Q. Leaving 75 copies in the office?

A. Yes, sir.

Q. How many copies of those specifications are now on
hand?

A. About 35.

Q. When did you count them?

A. A few days ago.

Q. Within a few days there were 35 left?

A. Yes, sir.

Q. And these specifications were printed and issued in
1892?

A. Yes, sir.

The following papers identified by the witness were of-
fered in evidence and read by the Judge-Advocate:

File S. R. above, 3, 1892.

Stewart Stone Company,
Columbia, S. C., 3rd Sept., 1892.

Capt. O. M. Carter,
U. S. Engineer Office,
Savannah, Ga.

Dear Sir:

Please send specification for the work to be done under
you in Augusta, Ga., and oblige.

Respectfully yours,

STEWART STONE CO.,

A. R. STEWART,

Gen. Mang.

Savannah, Ga.

Dear Sir:

Yours of the 6th inst., enclosing specifications for the improvement of the Savannah River above Augusta, received. I desire to bid on this work, and will be glad to get all the necessary information as early as possible. I would like to go over the work, and if you have any one that you wish to send over it, I can send a boat up the R. R. and have it hauled over to the River, and have two men come down with us. The trip can be made down the river in one day. Please let me hear from you, and aboliqe,

Yours very truly,

A. J. TWIGGS.

P. S.—I have on hand a good supply of work tools, steam drills, etc, having just finished a stone contract.

Dear Sir:

Will you please send me specifications and papers requisite for bidding on all work under your jurisdiction, and oblige,

Yours very truly,

R. G. Ross.

S. R. above letter book, 1892, page 20.

Savannah, Ga., Sept. 8, 1892.

Mr. R. G. Ross,
Jacksonville, Fla.

Sir:

In compliance with your request of the 6th instant - - -
I herewith enclose one copy of specifications for - - -
Improving Savannah River above Augusta, Ga.

For original letter see Savannah Harbor Book.

Judge-Advocate: That seems not to have been written on official paper. "United States Engineer Office" does not appear.

Q. Now, have you that original letter?

A. No, sir; I have not.

959 Mr. Rose: It was copied by mistake in the wrong book.

Judge-Advocate: No; it is an extract evidently.

Witness: It is an extract.

Judge-Advocate: That contains the gist of the response. One copy of the specifications for improving the Savannah River above Augusta was sent him with a communication of which this appears to have been a partial copy. That ends all the instances in which specifications were sent in response to a written application.

Q. How many were issued in response to oral applications?

A. Three copies.

Q. To whom?

A. John F. Gaynor. The letter is copied on page 12.

Judge-Advocate: I offer in evidence and read this letter:

United States Engineer Office,
Savannah, Ga., Sept. 3, 1892.

Col. John F. Gaynor,
Fayetteville, N. Y.

Sir:

In compliance with your verbal request of yesterday, there is sent you herewith one complete set of specifications for the work of improving the Savannah River above Augusta, Ga.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

Q. When did work begin on this contract?

A. Work began on Oct. 14, 1892.

Q. When was it closed?

A. June 26, 1893.

Q. Do you know when the work was suspended?

A. From the 15th of November, 1892, to the 12th of June, 1893.

Q. Those are the facts as they appear from the official 960 records of the office?

A. Yes, sir.

Q. Does any record appear of any specifications having been sent to W. H. Walsh?

A. No, sir.

Q. Have you the letter from Capt. Carter transmitting the bids,—the abstract of proposals?

A. Yes, sir (Handing Judge-Advocate papers called for).
Judge-Advocate: I offer in evidence and read:

United States Engineer Office,
Savannah, Ga., Sept. 19, 1892.

“Brig. Gen. Thomas L. Casey,
Chief of Engineers, U. S. A.,
Washington, D. C.

General:

I have the honor to transmit herewith all proposals received for improving Savannah River, about Augusta, Georgia, with abstract of same, and authority is requested to award the contract to Wm. H. Walsh, the lowest responsible bidder, the prices being deemed reasonable.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

Judge-Advocate: The Abstract referred to is as follows:
"Improving Savannah River, Georgia, above Augusta, opened September 19, 1892, by Capt. O. M. Carter, Corps of Engrs., U. S. Army"

Marion Applegate, Haysville, Pa, bid for rock excavation, 1,000 cub. yards, \$4.60, amounting to \$4.600; for fascines, 1,500 cubic yards, \$1.60, amounting to \$2,400; riprap stone, 1,000 cubic yards, \$2.45, amounting to \$2,450; clearing river bank 20 miles, \$65.00, amounting to \$1,300; total, \$10,961 750. Wm. H. Walsh, Fernandina, Fla., bid on rock excavation, 1,000 cubic yards, \$4.25, amounting to \$4,250; for fascines, 1,500 cubic yards, \$1.50, amounting to \$2,250; for riprap stone, 1,000 cubic yards, \$2.75, amounting to \$2,750; for clearing bank 20 miles, \$35.00, amounting to \$700.00; total \$9,950. Albert J. Twiggs, Augusta, Ga., bid for rock excavation, 1,000 cubic yards, \$5.00, amounting to \$5,000; for fascines, 1,500 cubic yards, \$1.25, amounting to \$1,875; for riprap stone, 1,000 cubic yards, \$3.50, amounting to \$3,500; for clearing river bank 20 miles, \$50.00, amounting to \$1,000; total \$11,375.

Remarks: Amount available \$10,000.00.

"Bid recommended for acceptance, "with an asterisk against the name of Wm. H. Walsh "he being the lowest responsible bidder for the best and most suitable materials and service.

"I hereby certify that the above Abstract of Proposals is correct.

O. M. CARTER,
Capt., Corps. of Engrs., U. S. A.
Savannah, Ga., Sept. 19, 1892."

"A true copy,

J. W. O. Sterly,

Notary Public" with seal.

Judge-Advocate: A copy of this will be attached to the record marked Exhibit No. 71.

Q. Give me the proposals and the contract.

A. (Witness handed the Judge-Advocate the papers called for)

Judge-Advocate: I offer in evidence the three proposals named, the articles of agreement,—contract,—between Capt. Carter and Wm. H. Walsh, and the Contractor's bond, in the penal sum of \$10,000, with W. H. Ray and Chas. C. Ely as sureties, which will be attached to the record marked Exhibits Nos. 72, 73, 74, 75 and 76.

Q. (Continuing examination) In giving the detailed
962 statement of the expenses of the office, you gave a state-
ment of a months salary of Mr. Connolly being charged
to Mr. Twiggs?

A. Yes, sir.

Q. Did Mr. Connolly at that time occupy any other official
position outside of his employment in the office?

A. He was United Commissioner.

Q. Was any of his time given to the performance of his
duties as United States Commissioner during that period?

A. He worked after office hours as Commissioner.

Q. Was any of his official time as clerk in the office de-
voted to that? Did it take him away any of the hours of the
day?

A. Yes, sir; at that time, do you mean?

Q. During that period? During that month?

A. That I cannot remember.

Q. As United States Commissioner, he heard causes,—
heard complaints

A. Yes, sir

Q. Had he any other matters to occupy his attention that
you are aware of?

A. He was doing general office work as clerk in the office,
—anything that he had to attend to.

Q. Any employment that took him away from his office,
or from the Government work in his office?

A. At that time?

Q. At that time; I only want to cover that period?

A. I don't remember.

Cross-Examination by Mr. Rose.

Q. Referring to these contracts of 1890; was the advertise-
ment published in the newspapers authorized by the War
Department?

A. Yes, sir.

Q. And for the number of times authorized by the De-
partment?

A. Yes, sir.

963 Q. And in the form authorized by the Department?
Just compare the copy of the printed advertisement
fastened to the bill with the other one.

A. Yes, sir.

Q. The same is true, is it not, of the 1892 contract? If not true, tell me wherein it differs?

A. That is the same.

Q. Let me briefly state it: request was asked for the publication of an advertisement in certain newspapers for a certain number of times in each news paper?

A. Yes, sir.

Q. That request was approved by the War Department as asked, and that advertisement was published in the newspapers asked for and the number of times asked for?

A. Yes, sir.

Q. The instructions of the War Department,—the approval of the war department, was carried out by the Engineer Officer?

A. Yes, sir.

Q. And can you tell me how soon the publication was begun after the receipt in Savannah of the approval of the advertisement? Take the 1890 contract?

A. Take the 1890 contract.

Q. That came back on the 13th and was published on the 16th I think?

A. On the 16th.

Q. The papers show that it came back from Washington, or at least was received in Savannah on the 13th?

A. On the 13th.

Q. Will you give me the dates when the advertisement came back from Washington and the first publication was made, in the 1892 contract; that is, above Augusta?

A. It came back from Washington and was received in Savannah Aug. 29th, and the first publication was August 31, 1892.

Q. Do you know what the intervening day was,—the 30th,—whether it was Sunday or not?

A. That I do not know.

Q. You stated in answer to Col. Barr, that the official records showed that work on the 1892 contract was stopped from the 15th of November, 1892, to the 12th of June, 1893; have you those official records here?

A. No, sir. I remember it was on account a letter was written and it must be in the copy book, but not the authority. Capt. Carter's application is in the copy book.

Q. Will you let me see it? Do you remember why it was done, from the examination you have made of the records?

A. On account of the extreme cold weather, and the men had to work partly in the water, and for that reason—

Q. And for that reason it was not completed until warm weather?

A. Yes, sir.

Q. You testified that, in the 1892 contract, there was no record of the specifications having been sent to Mr. Walsh?

A. Yes, sir.

Q. And that Mr. Walsh put in a bid?

A. Yes, sir.

Q. Mr. Applegate put in a bid for that contract?

A. Yes, sir.

Q. Will you find me the record showing the sending of specifications to him?

A. There is none.

Q. There is no record?

A. No, sir.

Q. Will you take voucher No. 1, with reference to work done under the Twiggs contract, and tell me how many laborers there are on that voucher at 75c per day?

A. 56.

Q. How many are there at \$1.00 a day?

A. 20.

965 Q. Does that include the blacksmith,—just a dollar?

A. 21.

Q. Now, did you count the first name on the list?

A. That man is \$1.50 man.

Q. What is he?

A. He is the recorder.

Q. Is there any other \$1.50 man on the whole list?

A. Yes, sir.

Q. How many more?

A. One.

Q. What is he?

A. He is a laborer,—Geo. Barnum.

Q. Where is that?

A. Item No. 2.

Q. Wasn't he a superintendent?

A. I don't know.

Q. I noticed in your giving the amounts paid to employes for traveling, that they differed from the amounts paid to Capt. Carter when he went up there; do you know what employes were allowed at that time under the law?

A. Actual expenses.

Q. What was the Engineer Officer allowed?

A. The Engineer Officer was allowed eight cents a mile at that time.

Q. That accounts for the difference in the one case of \$21.12 and \$10.42; does it not?

A. Yes, sir.

Q. You spoke of other work going on at the same time in the Savannah District,—at the time work was going on by the Government under the Twiggs contract?

A. Yes, sir.

Q. Did the Government have any laborers employed working on the work being performed by the contractors outside of Mr. Twiggs?

A. Laborers on that work?

966 Q. Savannah District outside of the Twiggs contract?

A. Yes, sir.

Q. Where?

A. Ocmulgee and Oconee Rivers.

Q. Who had that contract?

A. That was all hired labor.

Q. I mean of any contract that was then in force where the contractor was doing the work?

A. Savannah Harbor.

Q. Who was the contractor?

A. Atlantic Contracting Co. for the jetty work and P. Sanford Ross for the dredging.

Q. What laborers did they have paid on the Government payrolls?

A. They were not paid on the Government rolls.

Q. Were there any laborers carried on any other contract, where a contract was in existence, and the contractor was performing it, where laborers were carried on the payroll, as at Augusta under the Twiggs contract?

A. No, sir.

Q. Were any supplies purchased for the work the same way as under the Twiggs contract?

A. Yes, sir.

Q. What contract was that?

A. No; I misunderstood you.

Q. Was any supplies purchased by the government for the performance of contract work other than the Twiggs contract in 1893?

A. No, sir.

Q. So that the bills that came in for the purchase of supplies for the Twiggs contract,—that came here to the office at Savannah,—had to be checked up, and their correctness ascertained by the office here?

A. Yes, sir.

Q. And no other bills of like character came into the 967 office during that time?

A. Oh, yes, sir.

Q. For contract work?

A. Not for contract work, but bills.

Q. Speaking with reference to contract work, was there a payroll like the Twiggs contract payroll?

A. No, sir.

Q. Sometime was taken in the office, by the office employes in Savannah, in making out those payrolls and checking them up?

A. No, sir; the payrolls were not made out in the office here; they were made out in Augusta.

Q. They were checked up in Savannah?

A. Yes, sir.

Q. The bills were checked up in Savannah?

A. Yes, sir.

Q. The office time was taken up in doing that?

A. Yes, sir.

Q. As I understand you, the time expired under the Twiggs contract on the 15th of October for him to complete the work?

A. On the 5th.

Q. The original contract time was to the 5th of October?

A. Yes, sir.

Q. He was given an extension of 14 days?

A. Yes, sir.

Q. Without any charge for superintendence?

A. Yes, sir.

Q. The next extension was one for 16 days, without charge for superintendence, is that right?

A. That is right.

Q. Both of those extensions had the approval of the Chief of Engineers?

A. Yes, sir.

Q. Down to the time of the first extension without superintendence, was there anything charged against him for Superintendence?—the 14 days?

A. No, sir.

Q. Nothing was charged. Have you the original contract there? Clause No. 35 of the specifications of the original contract provides that, should the time of the completion of the contract be extended, all expenses for inspection and superintendence during that period of extension, the same to be determined by the Engineer Officer in charge, shall be deducted from the payments due, or to become due, the contractor: Do you recall that being in the original specifications?

A. Yes, sir.

Q. And the deductions made for inspection and superintendence during the 16 days, and before the execution of the supplemental contract, were made under that clause?

A. Yes, sir.

Q. The supplemental contract which was executed by Mr. Twiggs, and bears date of 6th of November, 1893, provides that all expenses of inspections and superintendence during such extension, as well as all excess of the cost of the work done, or to be done, by the said party of the first part, Capt. O. M. Carter, Corps of Engineers, is to be deducted from any moneys due, or to become due, said parties of the second part: Now, the expenses deducted after the 6th of November for superintendence and inspection were deducted in pursuance of the provisions of the contract?

A. All deductions were from the 20th of October.

Q. But the first deductions were made under the provisions of the original contract?

A. Yes, sir.

Q. And the authority gave 16 days extension with superintendence to be paid for by Mr. Twiggs?

A. The first deductions were made upon Capt. Carter's recommendation and the approval of the Chief of Engineers.

969 Q. The 16 days?

A. Yes, sir.

Q. And after that, made under this contract?

A. Yes, sir.

Q. The other deductions were for work actually done, or payments actually made, as reported by Mr. Conant?

A. Yes, sir.

Q. Mr. Conant hired those laborers?

A. Yes, sir.

Q. And made the purchases?

A. Yes, sir.

Q. And reported the amounts due for labor and for purchases?

A. Yes, sir.

Q. And those are the payments for superintendence and inspection?

A. Yes, sir.

Re-direct Examination by the Judge-Advocate.

Q. How could you check off the payrolls here in this office if they were made in Augusta?

A. Checked this off with the daily record of time, and saw whether the computation was right.

Q. You didn't check off each name?

A. No, sir; of course, didn't know the men.

Q. Who did that work?

A. I did.

Q. You were employed as Chief Clerk here?

A. Yes, sir.

Q. Regardless of any contract being in process of execution?

A. Yes, sir,

Q. Did the accused, Capt. Carter, ever at any time, submit a request to the War Department, for the approval in form and substance of an advertisement?

A. Not in that way; no, sir.

970 Q. Did he ever give the form in asking authority to advertise?

A. He asked authority to advertise.

Q. Did he ever refer to the form or date of the advertisement in any letter asking authority to advertise? Can you find it?

A. No, sir.

Q. You know what those letters have been?

A. Yes, sir.

Mr. Rose: The letters will show for themselves, it seems to me; I don't want to object.

Judge-Advocate: The letters are already in.

Mr. Rose: (Reading) "I herewith enclose copy of advertisement, and request authority to advertise—"

Judge-Advocate: Go on.

Mr. Rose: (Reading) "I enclose herewith copy of advertisement inviting proposals for improving Savannah River above Augusta, Ga., and request authority to publish

the same in the following newspapers:" Now that advertisement was the advertisement approved, and which contains the dates and times.

Judge-Advocate: If you can find any approval of the advertisement, I should be very glad to have it submitted to the Court for their consideration.

Mr. Rose: It is in the specifications, which are approved, and there is a copy that went with that letter, and came back from the War Department as one of its enclosures.

Judge-Advocate: That is a question to be determined. I certainly cannot infer times and date, and that the form and substance of the advertisement has been approved. Maybe the Court can. That is a matter to be submitted to the Court hereafter. That matter will be submitted for their elucidation, but I cannot find it in the documents before the court.

Q. (By the Court) I want to know whether the compensation of Mr. Sterly and Mr. Connolly and the messenger boy, and charged to the Twiggs contract, was in addition 971 to the salary paid them by the Government?

A. No, sir; it was not in addition; we were in regular employment.

Q. (By the Court) I want to know if the vouchers read state whether those on file for Capt. Carter's account were audited by the proper officer in Washington?

A. Yes, sir; they were audited.

(At this point in the proceedings, Reporter W. O. Tarver was relieved by Reporter Geo. T. Cann.)

972 (Second take Feb. 2, 1898 by G. T. Cann.)

JOHN C. BAXTER, a witness for the prosecution, being duly sworn, testified as follows.

Direct Examination.

Questions by the Judge-Advocate.

Q. What is your full name?

A. John C. Baxter.

Q. What position do you hold under the United States

A. Chief of Division Treasury Department, Office of the Auditor for the War Department.

Q. In that capacity you have the custody of the papers from the Engineers Corps of the army?

A. I have, and the accounts that come from there.

Q. Please produce the account current of Capt. O. M. Car-

ter, Corps of Engineers, from Dec. '96 to Dec. '97 inclusive.

A. I have not got it; they were not called for. December '96 to December '97, did you say?

Q. Yes.

A. They were not called for.

Q. What accounts current of Capt. Carter have you?

A. Dec. '96 to July '97 inclusive.

Q. Nothing beyond July '97?

A. He rendered no account since then.

Q. You have the last account then that he rendered?

A. Yes, sir.

Q. You have those accounts current there?

A. I have. (Here the account are produced and handed to counsel for the accused by the Judge-Advocate)

Q. Give me, if you please, voucher No. 30, the account of December 1896?

A. Be kind enough to state what appropriation it pertains to.

973 I have here the improvements, the different works, you know you have not given me the name of the improvement yet.

Q. No, I am looking to see if I can find that in the specifications. I have a simple memorandum of what I wanted. For improving the Harbor at Savannah, Ga.

A. And now give me the number of the voucher again.

Q. No. 30, Dec. 1896.

A. I don't believe I have that voucher here, it is not in the list called for.

Q. Have you voucher No. 8, July 1897?

(Here the witness produces a voucher)

Judge-Advocate: I offer in evidence voucher No. 8, for the month of July 1897, Appropriation for Improving the Harbor at Savannah, Ga., applied to that work, accounts of Capt. O. M. Carter, Corps of Engineers. (Here the Judge-Advocate reads the contents of voucher, No. 8); and also reads the following "Paid to the Atlantic Contracting Company by Edward H. Gaynor, Treas. for jetty work, board and lodging \$230,749.90, paid by check No. 270,536, dated July 6, 1897, for \$230,749.90, on the United States Assistant Treasury, New York, N. Y." A copy of this voucher will be attached to the record and marked, Exhibit No. 77.

Judge-Advocate: Give me number 9 for July 1897, Cumberland Sound; (Here the witness produces the paper)

Judge-Advocate: I offer in evidence and will read

Voucher No. 9, for the month of July 1897, appropriation for improving Cumberland Sound Ga., and Fla., applied to that work, accounts of Capt. O. M. Carter, Corps of Engineers, (Here the Judge-Advocate reads the contents of the paper) In addition to the brief statement of the character of the paper made by me, there appears, (Reading) "Paid to 974 The Atlantic Contracting Co., Edward H. Gaynor, Treasurer, for jetty work and meals, \$345,000.00; paid by check No. 270,537, dated July 6, 1897, for \$345,000.00, on the United States Assistant Treasurer, New York N. Y."

A copy of this will be attached to the record and marked Exhibit No. 78.

Judge Advocate:—I call attention to the fact that while this appears to be submitted by Edward H. Gaynor, as Treasurer, the signature is not the same as the Edward H. Gaynor who receipts these accounts. It appears that the total of the amounts charged in this statement amounted to \$403,923.12, and this voucher, as I read, was paid for \$345,000.00, leaving a balance of \$58,923.12. I desire to pass these vouchers to each member of the Court, the signatures appear so entirely different I would like to have you examine them; there are two of them (Here the vouchers are passed the members of the Court).

Judge Advocate:—I offer in evidence the accounts current of Captain O. M. Carter, the accused, for December, 1896, for January 1897, for February, 1897, for March, 1897, for April, 1897, for May, 1897, for June, 1897, and for July, 1897, for the purpose of showing to the Court that there is nowhere acknowledged the receipt by the accused of the sum of \$132.10 alleged to have been received from one Alfred Hirt for the United States on or about December, 1896, set forth in the Specification eleven to charge three.

Copies of these will be attached to the record, marked, Exhibit 79, 80, 81, 82, 83, 84, 85, and 86.

Judge Advocate; (to the witness) These are all the vouchers you have, I think, that I have asked for; you have other vouchers; but you have not those mentioned by me; I will look for them elsewhere, and, if I cannot find them, I will ask you to procure them from head-quarters in Washington for me.

Here the Court, at 2:50 o'clock P. M. adjourned until 11 o'clock A. M. tomorrow, February 3, 1898.

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

975

United States Court Room,
Savannah, Georgia,
February 3, 1898.

The Court met pursuant to adjournment to-day, at 11 o'clock a. m.

Present.

All the members of the Court and the Judge Advocate.

The accused, his counsel, and the reporter, G. T. Cann, were also present.

FRED R. HOWARD, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. State your full name?

A. Fred R. Howard.

Q. Where are you employed?

A. United States Engineer Office, Savannah, Ga.

Q. What are your duties?

A. Stemographer and typewriter.

Q. Is there more than one typewriting machine in the office?

Q. Yes, sir, there are three.

Q. You operate upon all of them?

A. I have used all of them at times.

Q. Can you testify as to the work from any one of those machines?

A. I can testify as to the work of the machine which I am using now, and do use all the time regularly.

Q. Look at the typewriting in this statement of accounts, these two papers I hand you and say if you can testify to what machine those were printed on?

A. Those were printed on the machine which I am using now regularly.

Q. How do you determine that fact?

976 A. By peculiarity in two of the capital letters?

Q. What letters are those?

A. One is the capital T and the other is the capital E.

Q. What are their peculiar characteristics?

A. In the E, the lines of the E are not squarely at right

angles, there are corners knocked off of it, in the peculiar way as is the case in my machine.

Q. Do you find that peculiarity manifested in each statement of accounts there, page after page?

A. I do, yes, sir.

Q. On each page of those statements. Now, have you ever seen any paper like that on which those are typewritten?

A. Yes, sir.

Q. Where?

A. We have considerable of it in our office; I use it almost every day.

Q. There are water marks in each by which you recognize it?

A. Yes, sir.

Q. Read those water marks.

A. It is marked "Persian Bond." I recognize it also by the size, color and weight.

JOHN W. O. STERLY, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:

Direct Examination.

Questions by the Judge Advocate.

Q. Mr. Sterly, look at the date of that account, state what is the date of its receipt and by whom signed.

A. 6th, of July, 1897, for \$345,000.00, The Atlantic Contracting Company, Edward H. Gaynor, Treasurer.

Q. Do you know where Mr. Gaynor was on that day?

977 A. No, sir, I do not.

Q. Do you know if Mr. Gaynor signed the receipt on that day?

A. He did not sign the receipt on that day.

Q. When did he sign it?

A. He signed that receipt the 30th, of June, 1897, but the date was not filled out.

Q. Was the amount filled out?

A. Yes, sir.

Q. The full amount filled out there?

A. \$345,000.00 for Cumberland Sound, was filled out.

Q. Were these statements attached?

A. No, sir.

Q. That is the signature of the accused, Capt. Carter?
(Showing witness a paper)

A. Yes, sir.

Q. When was that affixed?

A. Capt. Carter signed that voucher right after Mr. Gaynor had signed. This was not filled out, but the receipt had been filled out for \$345,000.00, and attached to the voucher.

Q. None of those charges were upon that paper, when certified to by the accused?

A. No, sir.

Q. Where was Capt. Carter, if you know, on July 6th?

A. On the 6th, of July?

Q. Yes.

A. Capt. Carter was either in New York or in Sandy Hook. He went north with the Secretary of War, but on the 6th, he must have been about New York.

Q. When was that "6th" placed in there, do you know the date?

A. The 6th, was put in there,—I put that in there, I cannot tell exactly, probably, the 6th, or 7th.

978 Q. Did you inform Capt. Carter anything in relation to the final statement of this account?

A. No, not of this account, not Cumberland Sound. I received instructions to date the check by the date of the stub; the check is dated the 6th. I received instructions.

Q. When did you receive those instructions?

A. That i don't remember; though it was the 6th, otherwise, I would not have dated it.

Q. From whom did you receive the instructions?

A. From Capt. Carter.

Q. Where was he when he so instructed you?

A. Either in New York or about New York.

Q. By letter or by wrie?

A. I am not certain as to that, whether it was by wire or by letter; I think it was by wire.

Q. Was the check book in your possession?

A. The check book?

Q. Yes.

A. Yes, sir, in the safe.

Q. Were all the checks in it?

A. No, sir, the check for that account was made out at the same time that the voucher was made out and Capt. Carter took the check with him, complete in every respect, except as to date.

Q. Did you fill out the stub in every way except as to date?

A. Except as to date.

Q. At the same time you made out the check?

A. Yes, sir.

Q. The check was made out in your handwriting?

A. Yes, sir.

Q. Now, did you communicate with Capt. Carter on the 6th, of July in any way?

A. Not the 6th, of July.

979 Q. The date of this voucher, the date of the receipt signed by Mr. Gaynor?

A. No, sir, I communicated with him on the first.

Q. What did you communicate to him?

A. I telegraph to him the amount of work done for Savannah Harbor.

Q. When did Capt. Carter leave here at that time, do you remember?

A. Capt. Carter left on the 30th, at noon.

Q. These statements are dated July 1st?

A. Yes, sir.

Q. When were they attached to that voucher?

A. They were attached to the voucher as soon as the account was made out from the report of operations, which came from Fernandina.

Q. Well, when were those reports received?

A. The reports included the last day of June and then are sent to Savannah; it must have been about July 1st, or 2d, probably July 1st, as it is dated the first of July.

Q. Was Capt. Carter in Savannah when those were received?

A. No, sir, he was not in Savannah.

Q. I see that each of these statements has "Approved" before the signature of Capt. Carter,—when were those signatures affixed, if you know?

A. They were affixed after Capt. Carter came back from New York.

Q. When did he return?

A. Capt. Carter, if I remember rightly, he returned on the 8th.

Q. The 8th, of July, 1897?

A. Yes, sir, he traveled on duty to Washington, the travel voucher will show that.

Q. There is a travel voucher which will show his absence at that time?

A. Yes, sir, on duty from Washington to Sandy Hook.
980 Q. This statement I have shown you is for the appropriation of Cumberland Sound?

A. Yes, sir.

Q. (It is already in evidence, may it please the Court) I show you the voucher for improving the Harbor at Savannah, Ga. (Handing witness a paper) that receipt at the foot of the voucher, is signed by whom?

A. By Edw. H. Gaynor, as Treasurer for the Atlantic Contracting Co.

Q. And the certificate as to the correctness of the account is signed by whom?

A. By O. M. Carter, Capt. Corps of Engrs. U. S. A.

Q. Do you know when those signatures were affixed?

A. They were all affixed on the 30th, of June, 1897.

Q. Was the body of the account filled out at that time?

A. No, sir.

Q. When was that filled out?

A. After the amount of work done during the month of June was known.

Q. Did you draw a check for that amount mentioned there, and what is it?

A. \$230,749.90.

Q. Did you fill out the check in your own handwriting?

A. I filled out the check to the order of The Atlantic Contracting Company, but not the date and not the amount.

Q. Did you fill in that "6th," is that your figure?

A. On the receipt?—yes, sir.

Q. What became of the check after you drew it?

A. Capt. Carter took the check with him.

Q. Did you make any entry on the stub?

A. I made the entry on the stub, The Atlantic Contracting Co., leaving the amount blank and filled that in the next day, as soon as I knew the amount.

981 Q. These statements of accounts, the separate statements of account, are marked "approved" by Capt. Carter?

A. Yes, sir.

Q. When did he affix his signature or his approvals?

A. After the voucher was completed.

Q. What date?

A. The voucher was complete on Capt. Carter's return; when exactly the voucher was completed, I don't know; I think the voucher was made out immediately, as soon as the amount was known.

Q. Do you know if when that check was drawn out, there were any funds available for its payment to the credit of the accused?

A. No, sir.

Q. You don't know?

A. There were funds available, but not enough to cover that amount.

Q. Do you know the amount to his credit in the sub-Treasury in New York?

A. I can refer to the book. The monthly statement of funds shows the balance on hand in the Assistant Treasury on June 30, of \$40,473.79.

Q. Now, when did you receive instructions as to the date to be inserted on the receipts, and in the stubs of the check book?

A. I received instructions on that date, the 6th, when I was instructed to date the check, July the 6th.

Q. Date the stub?

A. Yes, sir.

Q. And the receipt?

A. Yes, sir.

Q. How did you receive those instructions, by letter or by wire?

A. I cannot remember whether it was by wire or by letter.

Q. You remember that you were so instructed and complied with the instructions?

A. Yes, sir.

982 Q. Do you know who filled out those statements?

A. Each check?

Q. No, these statements of account, which I have shown you, the typewriting?

A. Yes, sir.

Q. Who did it?

A. They were made out in our office.

Q. By whom?

A. By Mr. Connolly.

Q. Mr. Connolly?

A. Yes, sir, it was done so as to have the bills correct, correct bills.

Q. It is Mr. Connolly's work? Any statements of that character filed by The Atlantic Contracting Company?

A. No, sir, that is made from our office computations. Those bills are made up from the office computations.

Q. And not statements of account that The Atlantic Contracting Company had so submitted?

A. No, sir, it was made from our office computations.

Q. I think I asked you yesterday as to these signatures, if these signatures on these different statements are Edward H. Gaynor's signatures,—if I did not, I do now. (Upon interruption by Mr. Rose) He testified as to his signature on the receipts. Did I show you these papers yesterday?

A. Yes, sir.

Q. Well, are these the signatures of Edward H. Gaynor?

A. It is apparently not.

Q. Have you any knowledge of the handwriting in which they are written?

A. They resemble Mr. Connolly's handwriting.

Q. Look at your copy book page 359, telegrams?

1983 A. There are two telegrams, July 1, 1897, Capt. O. M. Carter, Shoreham, Washington, D. C. Savannah, two hundred and thirty thousand, seven hundred and forty-nine dollars and ninety cents. Sterly."

Q. Any telegram in relation to the other statements of account?

A. No, sir.

Q. Then had that check been filled in for the amount, why did you telegraph the amount of that check to him; the amount of that check was not filled in?

A. This amount was not filled in.

Q. I understand that. The other one was filled in?

A. Yes, sir.

Q. This is a proposal of A. M. Bangs, that is already in evidence, can you tell whose handwriting that proposal is filled out in?

A. That is Mr. Connolly's handwriting, but the price was written by Mr. Galliger.

Q. Who is Mr. Galliger?

A. He is a clerk for The Atlantic Contracting Company. The President: Whose proposal is that?

Judge Advocate: A. M. Bangs, I so stated.

The President: What date?

Judge Advocate: Proposals that were opened Sept. 29, 1894.; the case in which Bangs received the contract.

By a member: What work?

Judge Advocate: The improvement of Cumberland Sound, Ga. The contract supervised by Mr. Conant.

Q. In whose handwriting is the guarantee filled out?

A. Mr. Connolly's handwriting.

Q. Who is the United States commissioner before whom the sureties justified?

A. Mr. Connolly.

Q. What is his full name?

A. Michael A. Connolly, U. S. Commissioner.

984 Q. Look at G. R. 58, 1890

A. This is a letter from the office of the Chief of Engineers, dated Sept. 20, 1890, notifying Capt. Carter of the passage of the River and Harbor Bill, and requesting him to submit a project for the expenditure.

Q. How as to the expenditure for Cumberland Sound, Ga.?

A. Improving Cumberland Sound, Ga. and Fla., continuing improvement, \$112,500.00.

Q. Look at page 66 of the letter book.

A. Capt. Carter submits on the 8th of October, 1890, to the Chief of Engineers, through Col. Wm. P. Craighill, Corps of Engineers, U. S. A., Division Engineer, S. E. Division, Baltimore, Maryland, his project of expenditure for Cumberland Sound.

Q. What was the date of approval of that project, if it was approved?

A. It was approved on the 23d, of March, 1891.

Q. What was the date of the request to advertise and authority to print specifications?

A. March 17, 1891.

Q. Six days before the approval of the project?

A. Yes, sir.

Q. When did authority to advertise reach Savannah?

A. On March 27, 1891.

Q. Was the date of advertisement of the specifications left at its original date, March 17th?

A. Yes, sir.

Q. When were bids to be opened?

A. On the 15th, of April, 1891.

Q. How many copies were printed?

A. Two hundred copies.

Q. What was the date of the first issue of the specifications to applicants?

985 A. April 3, 1891.

Q. When was the advertisement inserted in the authorized papers?

A. In the Savannah Mornings News on the 28th, of March, 29th, of March, the 30th, and 31st, April 13, and 14, 1891. The Marine Journal New York, on the 4th, and 11th, of April, 1891; the Engineering News, New York, April 4th, and 11th, 1891; the Engineering and Building Record, New York, April 4th, and 11th, 1891.

Q. Look at C. S., 23, 1890?

A. This is an application from G. W. Linder, of Wilmington, N. C.

Q. Read it.

A. (Reading) "Wilmington, N. C.,

Dec. 18, 1890.

"Lieut. O. M. Carter,

You will oblige me by sending specifications for building jetties in Cumberland Sound, and Fernandina Fla.

G. W. LINDER,
Wilmington, N. C."

Q. Page 149?

A. (Reading)

"Savannah, Ga. April 3, 1891.

"Mr. G. W. Linder,
Wilmington, N. C.

Sir:

In response to request contained in your letter of December 18, 1891, there is sent to you with this one copy of specifications for constructing jetty at entrance to Cumberland Sound, Ga and Fla.?. If after reading and considering it you desire to put in a bid on the work, two more copies of the specifications will be sent to you on your request.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs. U. S. A."

“Savannah, Ga., April 3, 1891.

Mr. E. D. Lukenbill,
Agent F. C. & P. R. R. Co.,
Fernandina, Florida.

Sir:

In reply to your letter of the 26th, of November 1890, 989 I send you with this one copy of specifications for constructing jetty at entrance to Cumberland Sound, Georgia and Florida, which will give you all the information you asked for, excepting the name of the successful bidder. That, of course, cannot be given until after the bids are opened.

Should you desire to bid on the work, two more copies of the specifications will be sent to you on your application.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

(One enclosure.)”

Q. Page 155.

A. (Reading)

“Savannah, Ga. April 3, 1891

Mr. John F. Gaynor,
Savannah, Georgia.

Dear Sir:—

There is sent to you to-day in a separate package, one set of specifications for constructing jetty at entrance to Cumberland Sound, Ga. and Fla.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.

(3 enclosures in separate package.)

Q. Page 153.

A. (Reading)

“Savannah, Ga. April 4, 1891.

Mr. E. L. Merkel, President,
Alabama Dredging and Jetty Co.,
8 N. Commerce St., Mobile, Ala.

Dear Sir:—

There is sent to you today in a separate package

990 one set of specifications for constructing jetty at entrance to Cumberland Sound, Georgia and Fla.

Very respectfully,

Your obedient servant,

O. M. CARTER,

X *Capt. Corps of Engrs. U. S. A.*

(3 enclosures in separate package.)"

Q. Do you find any application from Skinner & Wallace, of Wilmington, or P. Sanford Ross, for specifications under that contract, under that advertisement?

A. No, sir, I do not find any.

Q. Have you the letter transmitting the abstract of proposals?

(Here witness produces copy of letter)

Judge-Advocate: I offer in evidence and read,

"United States Engineer Office,

"Savannah, Ga., April 15, 1891.

"The Chief of Engineers, U. S. Army,

Washington, D. C.

General:

I have the honor to transmit herewith all proposals received for constructing jetty at entrance to Cumberland Sound, Ga., and Fla., with abstract of same, and authority is requested to award the contract to John E. Gaynor, the lowest responsible bidder, the prices being deemed reasonable.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.

(4 enclosures.)"

Q. Have you the abstract?

A. No, sir, this is just the copy.

Judge Advocate: Also the abstract referred to in the communication, a copy of which is in the letter press book.

991 "Abstract of Proposals for Constructing Jetty at Entrance to Cumberland Sound, Ga., and Fla., opened on April 15, 1891, by Capt. O. M. Carter, Corps of Engineers, U. S. A."

I will have a copy of this made and attached to the record, because it is in tabulated form.

Judge Advocate: A copy of this abstract will be attached to the record and marked Exhibit No. 87.

Judge-Advocate: Now, give me the proposals.

(Here proposals are handed to the Judge Advocate.) I offer in evidence the proposals referred to in the abstract, copies of which will be attached to the record and marked, Exhibit No. 88, Exhibit No. 89, Exhibit No. 90. Calling attention to the fact that on this date of March 17, 1891, the engineering office here in Savannah, Ga., specifications, as to mattresses, contained the following provision, under the third section of the specifications: "Mattresses, either of the following designs for mattresses, may be used at the option of the contractor." Then follows the description of the two designs of mattresses, which may be bid for in another place, "Separate bids will also be submitted for brush mattresses, which, at the option of the engineer in charge, may be substituted for those of logs and brush." I also call attention to the fact that the guarantors are B. D. Green, and Henry Berg, each of whom in the justification states under oath that he is worth pecuniarily the sum of \$50,000.00, over and above all his debts and liabilities.

Judge-Advocate: I also offer in evidence the articles of agreement between Capt. O. M. Carter, entered into May 4, 1891, and John F. Gaynor, for constructing jetty at entrance to Cumberland Sound, Ga. and Fla.; a copy of this agreement will be attached to the record, and marked Exhibit No. 91. I also offer in evidence the accompanying contractor's bond, with John F. Gaynor as Principal, and as sureties 992 B. D. Green of New York, N. Y., and Anson M. Bangs, of Fayetteville, N. Y., in the penal sum of \$75,000.00, a copy of this bond will be attached to the record and marked, Exhibit 92.

Q. When did work begin under that contract, Mr. Sterly?

A. Work began on the 23rd of June, 1891.

Q. When did it close?

A. On the 14th of Nov., 1891.

Q. Look at page 54 of the Fort Clinch jetties.

A. "Savannah, Ga., June 3, 1891.

Q. Read it.

A. (Reading)

“United States Engineer Office,
Savannah, Ga., June 3, 1891.

The Chief of Engineers, U. S. Army,
Washington, D. C.

(Through Col. Wm. P. Craighill),

Corps of Engineers, U. S. Army,
Div. Engineer, S. E. Div., Baltimore, Md.)

General:

The spur jetties constructed for protecting the shore line near Fort Clinch, Florida, have accomplished their purpose, but to the westward of them, where no work has yet been done, the bank has been rapidly cutting, and unless this is stopped, it is quite likely that a large area behind Fort Clinch will be converted into a lagoon. A great portion is now overflowed during exceptionally high tide. The sand taken from the shore, is moreover, washed into the navigable channel. An examination of this bank was made on May 9, 1891, and a personal examination was made by me on May 27, 1891. It is necessary that about 2,000 feet more of the shore line should be protected. Spur jetties of brush mattresses loaded with rip-rap stone, and located as shown on the sketch herewith, will stop the erosion now going on. These should consist of a single course of mattresses, fifty feet in width, 993 and loaded with twelve inches of rip-rap stone. Near the inner ends of the spurs, a second course will, in some cases, be needed. The work now required will cost about \$12,000.00, estimating brush mattresses at ninety-five cents per square yard, and rip-rap stone at \$3.40 per cubic yard in the work.

If this money is available, I have the honor to request that an allotment of \$12,000.00 may be made to be expended as recommended. The expenditure is necessary and the work should be done as soon as practicable.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Corps of Engrs. U. S. A.”

(One enclosure)??

Q. Have you the reply to that?

A. Yes, sir.

Q. Read it to the Court.

A. (Reading) "Office of the Chief of Engineers,
United States Army,
Washington, D. C., June 6, '91.

Capt. O. M. Carter,
Corps of Engineers,
Savannah, Ga.

(Through Col. Wm. P. Craighill, Corps of Engrs.
Division Engineer, of the Southeast Division,
Baltimore, Md.)

Capt.:

In compliance with your request, of June 3, 1891, recommended for approval by Col. W. P. Craighill, Corps of Engineers, Division Engineer, Southeast Division, the sum of 994 \$12,000.00 is allotted from the appropriation for Preservation and Repair of Fortifications, Act of February 24, 1891, to be applied to the protection of the shore of the Fort Clinch reservation, Fla., in the manner suggested by you.
By Command of Brig. Gen. Casey.

Very respectfully,

Your obedient servant,

JOHN G. D. KNIGHT,

Capt. Corps of Engineers."

1st Indorsement.

U. S. Engineer Office, 9 Pleasant St.,
Baltimore, Md., June 8, 1891.

Respectfully transmitted to Capt. O. M. Carter,

WM. P. CRAIGHILL,
Colonel Corps of Engineers, U. S. A.

Q. Look at page 58.

A. (Reading)

"Savannah, Ga., June 12, 1891.

"The Chief Clerk of the War Department,
Washington, D. C.

(Through the Chief of Engineers, U. S. A., Washington, D. C., and Col. Wm. P. Craighill, Corps of Engineers, U. S. Army, Div. Engineer, S. E. Division, Baltimore, Maryland.)

Sir:

I inclose herewith, a copy of an advertisement inviting proposals for construction of spur jetties near Fort Clinch, Florida, and request authority to publish the same in the following official newspapers:

4 insertions in Morning News, Savannah, Ga.

2 " " Engineering News, New York, N. Y.

2 “ “ Marine Journal, New York, N. Y.

And

2 “ “ Engineering & Building Record, N. Y.

995 I also request authority to print 200 copies of accompanying specifications.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs., U. S. A.”

(Two enclosures.)

Q. What was the date of the specifications and advertisement?

A. June 12.

Q. The same day on which the letter was written?

A. Yes, sir.

Q. When was authority to advertise received here in Savannah?

A. On June 22, 1891.

Q. When was the date given for the opening of bids?

A. July 10, 1891.

Q. When were the specifications printed and received?

A. I do not know when they were received.

Q. When were the copies sent to the Chief of Engineers?

A. On the second of July, 1891.

Q. What was the date of the first advertisement?

A. Morning News, Savannah, Ga., June 23.

Q. That's enough; I just want the date of the first advertisement in Savannah; what was the first date of the first advertisement in the New York papers?

A. June 27.

Q. 1891?

A. Yes, sir.

Q. Well, was that the date of the advertisement, or the date when it first appeared in the paper. The date when it first appeared in the paper, the date of the advertisement, was the date of the letter asking for authority to advertise,—is there any record of applications for the specifications there advertised?

996 A. There is no record on file among the Fort Clinch papers.

Q. No record of any specifications having been sent out?

A. No, sir.

Q. How many bids were received?

A. Two bids.

Judge-Advocate:—I offer in evidence and read:—

“United States Engineer Office,
Savannah, Ga., July 11, 1891.

The Chief of Engineers, U. S. Army,
Washington, D. C.

General:—

I have the honor to transmit herewith, all proposals received for constructing spur jetties near Fort Clinch, Florida, and to recommend the acceptance of the bid of William H. Walsh, he being the lowest responsible bidder.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.

(3 enclosures).

Judge-Advocate: And the abstract of proposals for constructing spur jetties near Fort Clinch, Fla., opened on July 10, 1891, by Capt. O. M. Carter, Corps of Engineers, U. S. Army. A copy of this abstract found on page 75, will be attached to the record and marked Exhibit No. 92.

Q. When did work begin on this contract?

A. On the first of October, 1891.

Q. And closed, when?

A. 3d, of October, 1891.

Q. When did the contract of John F. Gaynor for work in Cumberland Sound, Fernandina, close?

A. 14th, of November, 1891.

997 Q. Do you know who William H. Walsh is?

A. I have seen him once, but I do not know him now, I would not recognize him. I have been with him with the surveying party once in 1886, but I do not remember him.

Q. Is that the last time you saw him?

A. To my knowledge, yes.

Q. Have you ever seen his name in official papers here otherwise than in this bid?

A. There was another bid, there was another contract.

Q. There was another contract on which the same party bid?

A. Yes, sir.

Q. You simply know the fact, you don't know of his being here, and did not see him?

A. I did not see him.

Q. Give me those two proposals mentioned in the ab-

stract. (Here the witness hands the Judge Advocate the papers)

Judge-Advocate: I offer in evidence the proposals of Edward H. Gaynor, and William H. Walsh, referred to in the abstract just read; copies of them will be attached to the record, marked Exhibit No. 94 and Exhibit No. 95.

Q. Look at the writing in these two proposals and state, if you know, whose writing it is.

A. There is a different handwriting on these proposals.

Q. Written by different hands?

A. Yes, sir.

Q. How about the other, is that all written in one hand?

A. That is written in one hand, except as to the signature.

Q. Do you find any part written in those proposals that is the same handwriting as in the other?

A. Yes, sir.

Q. What part?

A. The prices are filled out in the same hand.

998 Q. In figures?

A. That is to my best knowledge, by comparing one dollar; it looks as if it has been written by the same man.

Judge-Advocate: I state to the Court that these proposals are the proposals referred to in the abstract.

The President: Two separate proposals?

Judge-Advocate: Yes, Edward H. Gaynor and William H. Walsh, the only two proposals that were received.

Q. And those are the proposals that you handed me of Gaynor and Walsh?

A. Yes, sir.

Q. Are you familiar with John F. Gaynor's handwriting?

A. I have seen it.

Q. Are you familiar with John F. Gaynor's handwriting?

A. He writes a very characteristic hand.

Q. Whose handwriting is that? (Upon interruption by Rose) Well, have you ever seen Mr. Gaynor write?

A. Yes, sir, I have seen him write.

Q. You have seen him write, that is the response to my question?

A. In the office, and the letter was copied in our copy book; he wrote an application.

Q. Well, give your judgment on that. (Handing witness a paper)

A. That looks very much like his writing, but it is written better than he usually writes.

Q. How is as compared, I hand you again the proposal of William H. Walsh, Exhibit No. 95,—how is it in the writing, compared with that there, the amounts inserted in the proposal?

A. This looks like the same handwriting, 99 cents,—and this proposal, 90 cents, it looks like it. This is written with a finer pen than that, and the one dollar.

Q. You put the similarity between cents?

A. This cents and that cents.

Q. The cents in which and the cents in what other?

999 A. The cents are nearly alike, but are written with different pens.

Q. As to construction and characteristics, they are alike?

A. They resemble his handwriting.

Q. I show you Exhibit No. 35, the proposal of The Atlantic Contracting Company, that is already in evidence, calling your attention to the handwriting, filling in the proposal,—do you recognize that?

A. It looks like the handwriting of John F. Gaynor.

Q. Comparing it with Exhibits 94 and 95, which you have been looking at before, where the amounts bid are carried out in both of those proposals, compared with that you have just testified, looks like the handwriting of John F. Gaynor, and see if they are by the same hand?

A. It looks the same handwriting.

The President: What two proposals are those?

Judge-Advocate: The same proposals that we have examined where the two bids were put in, one in the name of William H. Walsh, and the other Edward H. Gaynor.

Judge-Advocate: I offer now in evidence the Articles of Agreement entered into July 20, 1891, between O. M. Carter, Capt. Corps of Engineers, U. S. A., and William H. Walsh, Fernandina, Fla., for constructing spur jetties near Fort Clinch, Fla. A copy of this will be attached to the record and marked Exhibit No. 96; the witnesses to the signatures of Capt. Carter and William H. Walsh, are Michael A. Connolly and George D. Meigs. Prior to the name of William H. Walsh, is in pencil, "Sign here."

Q. Who is George D. Meigs?

A. George D. Meigs was the assistant engineer, employed in Savannah Harbor.

Q. Where was he on the date of the execution of that contract, if you know?

1000 A. He was in Savannah Harbor; he was assistant engineer, in charge of jetty constructions, in Savannah Harbor on that day.

Q. Do you know if he was in Savannah?

A. He signed a report on that day.

Q. What does that pencil memorandum, "Sign Here" mean?

A. That indicates the place where Mr. Walsh should sign.

Q. Well, if he signed it at the date there, it would naturally follow Capt. Carter's signature, would it not?

A. Mistakes are made sometimes; they sign them wrong; that is a precaution that has been put, "Sign here."

Q. Do you know if William H. Walsh was in Savannah on that day?

A. I do not.

Q. I also offer in evidence the contractor's bond, dated the 20th, of July, 1891, with William H. Walsh as principal, and W. F. McCaully, and Charles C. Ely as sureties in the penal sum of \$7,500.00; witnessed by George D. Meigs, R. Webb, Jr., and R. Webb, Jr., twice written, to be attached to the record and marked exhibit No. 97.

Q. Whose writing is that bond filled out by?

A. This is filled out by Mr. Connolly and this here by Mr. McCaully.

Q. There are two writings?

A. Yes, sir.

Q. Then Mr. Connolly was in the employment of the Government in Savannah at that time?

A. Yes, sir.

Q. How long was Mr. Connolly on duty in the office of the engineer here?

A. Mr. Connolly came to this office, I think it was in September or October, 1888, and remained until the 3d, the 2d, or 3d, of August, 1897.

1001 Q. Shortly after Capt. Carter's being relieved from duty here?

A. Yes, sir.

Cross-Examination.

Questions by Mr. Rose.

Q. Will you let me have Vouchers 8 and 9, for the payments in 1897? (To Judge Advocate). I hand you Voucher 8 and ask you to look at the bills attached to it and state whether on them appear your initials.

A. Yes, sir.

Q. Each one of them?

A. Yes, sir; that indicates that the computation is correct.

Q. There is a certificate on each one of those, is there not, that it is correct, signed by the assistant engineer?

A. Yes, sir.

Q. Who was assistant engineer?

A. E. A. Gieseler.

Q. In his own handwriting on each one of them?

A. The name occurring on each one is written by me and is approved by the assistant engineer.

Q. In whose handwriting is "E. A. G."?

A. In his own handwriting.

Q. On each one of those bills?

A. Yes, sir.

Q. Now, I show you Voucher No. 9, in relation to Cumberland Sound, and ask you if each one of those bills bears your initials?

A. Yes, sir.

Q. And it is certified by Mr. Gieseler that it is correct?; E.

A. Gieseler, that it is correct appear on each one of them, that is as far as his name goes.

A. Yes, sir.

1002 Q. I show you Exhibit No. 92, which is the bond for the faithful performance of the contract for constructing jetties at entrance to Cumberland Sound, Georgia and Florida, and ask you in whose handwriting the body of that bond is; the body of the bond purports to be signed by B. G. Green, John F. Gaynor, &c., in whose handwriting is the body of that bond?

A. That is my own handwriting.

Q. That was filled up by you while in office?

A. Yes, sir.

Q. The Judge-Advocate said you were not called as an expert, were you called as an expert in handwriting?

A. No, sir.

Q. You don't pretend to be an expert.

A. No, sir.

Q. You have seen John F. Gaynor sign his signature just once?

A. Just once, that is, write it once.

Q. I asked you if you have ever seen him write his signature except once?

A. Only once.

Q. In reading a letter of Mr. Buchardi, you stated the date of April 9th,—will you tell me when that appears to have been received in Savannah?

A. April 15.

Q. The reply was written on April 16th,—was it not, or the same day, I don't remember which?

A. on the 15th of April.

Q. The 15th, of April?

A. Yes, sir.

Q. And that letter on the 15th, of April, sent to Capt. Carter, is in reply to the one that you have in your hand?

A. Yes, sir.

Q. Will you look at Exhibits 88, 89 and 90, and tell 1003 me what the prices according to the proposals are?—for the different kinds of mattresses; this is an Exhibit 90, now?

A. \$1.22 for brush mattresses, \$1.22 per square yard for log and brush mattresses.

Q. That is all. Now, give me the same information in reference to Exhibit 88?

A. \$1.16 per square yard for brush mattresses, and \$1.20 per square yard for log and brush mattresses.

Q. \$1.16 and \$1.20. Now look at Exhibit 89 and give me the same information.

A. 97 cents for brush mattresses and 99 cents per square yard for log and brush mattresses.

Q. Referring to Exhibit No. 89, will you be kind enough to state before whom the sureties justified, that being the proposal of John F. Gaynor for constructing jetty at entrance to Cumberland Sound?

A. Certified to before S. F. B. Gillespie, U. S. Commissioner.

Q. Do you know Mr. Gillespie?

A. Yes, sir.

Q. He is the Deputy Clerk of the U. S. Court, here?

A. I think that is his title.

Q. And is also U. S. Commissioner, he was then at least?

A. He was at that time.

Mr. Rose: I would like to have it put upon the record and call the attention of the Court to the certificate attached to this proposal and signed by Mr. Gillespie. (Reading)

"I, S. F. B. Gillespie, U. S. Commissioner, do hereby certify that B. D. Green, and Henry Berg, the guarantors above named, are personally known to me, and that to the best of my knowledge and belief, each is pecuniarily worth over and above all his debts and liabilities, the sum stated in the accompanying affidavits, subscribed by him.

S. F. B. Gillespie, U. S. Commissioner."

1004 At this point in the proceedings of the day, 1:00 p. m., Reporter Geo. T. Cann was relieved by Reporter W. O. Tarver.

ROYAL SAWYER, (colored) a witness for the prosecution being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Royal Sawyer.

Q. Where do you live?

A. I live at the five mile bend,—five miles out on the Augusta Road.

Q. What do you work at?

A. I don't work anyways now particular; I am planting now mostly,—running a farm.

Q. Where were you at work in 1893?

A. In 1893, I was working then down to Thunderbolt.

Q. Who were you working for?

A. Mr. Tom Gaynor.

Q. How long did you work for him?

A. Up until 1894.

Q. Do you know what month in 1894?

A. I left there in July, 1894.

Q. What kind of work were you doing?

A. Tying brush handles.

Q. What kind of brush bundles?

A. 15 feet long.

Q. What were they to be used for?

A. Sinking on the jetty,—put down on the mattress,—carry it down, and make on mattress of it, and sink it on the timber.

Q. How did you make them?

A. We had a twister, a pole with ropes about that (indicating) long run through each end, and to the center of the pole, and two men would turn the stick, and one cut the brush and two tied.

Q. Two men were working with you in making the bundle?

1005 A. There was three men to the bench, one chopping and two tying,—one at the head of the bench.

Q. How much did you get a day for your work?

A. I was getting then 80c a day.

Q. Was that conditioned upon any amount of labor you should perform?

A. Yes, sir; that was what they was giving all the laborers then.

Q. You don't understand my question. Were you to be paid eighty cents a day no matter how much or how little work you did?

A. No, sir; fifty bundles was the day's work,—nothing less and nothing over.

Q. You had to produce fifty bundles a day to earn eighty cents?

A. Yes, sir.

Q. That was for the three men to produce, and not one man; the team of three men must make fifty bundles a day?

A. Yes, sir.

Q. I wish you would describe how you made one of those bundles?

A. We cut the poles—Had one man to cut the brush, and we cut the poles about fifteen feet long. If not, we had the pole go to about the center of the bench, and then we joined it, and took the brush, and one man would hold the twister while the other tied it, and put three strings between each of the feet. We had one foot in the center and two feet like them on each end of the bench, and then one cut the brush, any kind of brush it made no difference what kind, and we had a long pole that goes through there, so it would not buck, and we made that fifteen feet long, and put six or seven strings on the bundle.

Q. What kind of string did you use?

A. A little tarred string not quite as large as my finger.

Q. Twisted string?

A. No, sir; it wasn't twisted.

Q. How tightly could you tie them together in the way you have described?

A. We could make it as tight as we could hold it sometimes, according to how large a bundle would be. If we 1006 had soft brush it could not be tied so tight; sometimes, if it was hard poles, then it would be tighter.

Q. Was any standard given you, or any bundle of brush given you as a guide for you to make the bundles by?

A. No, sir.

Q. As to the size?

A. No, sir.

Q. As to the tightness with which they should be drawn together?

A. They only told us how they wanted them, but give us nothing to do it by.

Q. Was there anything in the kind of bundles you made? Did you have to make fifty bundles that would be accepted?

A. If we made fifty bundles, and they docked us, and took away ten or fifteen bundles, they didn't pay us for that.

Q. Then you made bundles that were not accepted?

A. They rejected some of them?

Q. Who rejected them?

A. The foreman.

Q. Who was Foreman over you?

A. Ed Burke was foreman then, but I was foreman once before I went into his gang.

Q. What became of those rejected bundles?

A. Hauled them down and put them in the mattresses the same as the others.

Q. You say that rejected bundles were taken away and put into the mattresses?

A. All hauled down.

Q. How many times did you see that?

A. Ever since I first started, and I commenced work in 1883 and worked until 1894.

Q. You commenced in 1883, and worked on what?

A. Making log mattresses then, and I worked until they commenced making the brush bundles.

1007 Q. When did they commence making the brush bundles?

A. I don't remember the year. Didn't keep any remem-

brance of it, but I was the first one that ever built a bench up here at Springfield on the Savannah River, and them times, they tied with wire then.

Q. Tied with wire first?

A. Yes, sir?

Q. When did they begin to tie with string?

A. Didn't tie with wire but about a month, and they tie with strings all fascines until now.

Q. You worked for Mr. Gaynor from 1893 to 1894?

A. Yes, sir.

Q. Will you go back and look at those bundles of brush on that platform?

A. (The witness did so) Yes, sir; some of them was the same kind, only they are dried out, and the leaves are away from between them; that is the difference.

Q. Those are like the ones you made in that eleven years?

A. Yes, sir.

Q. Did you ever make any better than those?

A. Looks much better when they have the leaves in it, but when the leaves dried down and dropped off, they was no better than them.

Cross-Examination by Mr. Charlton.

Q. Were you working for anybody else from 1883 to 1894? Were you always working for Mr. Gaynor during that time?

A. No, sir; I worked first for Mr. Welsh and Mr. Ed. Gaynor. I commenced over in Red Bluff with Willie Welsh, and after he went from the camp, I went to Mr. Nicholas' camp.

Q. And during that time, you were doing that kind of work from one camp to the other?

A. Yes, sir.

Q. Is that the best work you did during all that time, 1008 making bundles of brush like those (in Court room)?

A. Yes, sir; but when the leaves was in it, they looked better.

Q. You did the best work you could?

A. Yes, sir.

Q. What did those things look like which they rejected on you?

A. One was no better than the other, but they took the money away from us, and we had to do the best we could. The highest we got was sixty cents a day.

Q. Who was in charge in 1883, do you remember?

A. The head boss?

Q. Yes?

A. No, sir; I knew Capt. Green was one.

Q. You don't know who the United States Officer was in 1883?

A. No, sir; never heard of the big men at all.

Q. Did you go away from the camp? Were you in the camp all the time during the day while they were working on this brush?

A. Yes, sir.

Q. When were you foreman?

A. Down to Bonaventure and down to Sand Fly.

Q. How long ago was that?

A. In 1883.

Q. Now, you were at the camps all the time?

A. Yes, sir; at the camps.

Q. How did they get these bundles of brush down to the works?

A. Hauled them down in wagons.

Q. And then they put them on a boat?

A. On what they call a barge, and carried them down the river.

Q. Did you ever go with them?

A. No, sir. Staid at camp.

Q. Therefore you don't know what became of them after they carried them away?

A. No, sir.

Q. Your business was at the camp?

1009 A. Yes, sir.

Q. And you were doing the best you could to earn your money and sometimes they threw out bundles and took your money away from you?

A. Yes, sir.

Q. How long were you foreman?

A. Four months.

Q. Did you throw out anybody's bundles?

A. I had to do it; I had to or I wouldn't get anything myself. Sometimes when I could, I would try to slip it; I would help the boys out when I could. I knew how it was myself.

Q. But when the contractor was looking, you threw out bundles to please him?

A. When he was close up I did, but when he wasn't, I helped the boys out a little.

Re-Direct Examination by the Judge-Advocate.

Q. The teams that took the rejected bundles away were the same teams that took away the bundles that had been accepted?

A. Yes, sir.

Q. Who was Willie Welsh that you speak of?

A. He was a big, stout man.

Q. Was his name Welsh or Walsh?

A. We called him Welsh,

Q. What was his business?

A. He was boss of the camp and teams.

Q. Employed by Mr. Gaynor?

A. Yes, sir.

Q. You were employed by Mr. Gaynor and Mr. Walsh was his foreman at that time?

A. Yes, sir.

Q. What kind of mats were they making when you 1010 first worked there in 1883?

A. Making log mats.

Q. When they first commenced to make brush mattresses, were you there?

A. I could not tell you the year they commenced to make the brush mats. I never kept a remembrance of that year at all, and I wouldn't like to tell you what wasn't right.

Q. Was it soon after or sometime after you commenced to work there?

A. A good while; as far as I can remember, I think about in 1884. it was when they commenced the brush work, if I make no mistake.

Q. You can't remember the year when they first commenced?

A. No, sir; away back that far.

Q. Do you remember who was the foreman at the time you commenced? At the time you first commenced to make bundles of brush?

A. Ed Burke.

Q. Foreman of all the work?

A. No, sir; Mr. Wheeler was head foreman, a white man.

Q. I am speaking of the head foreman?

A. Mr. Wheeler was camp boss.

Q. Who was foreman of the brush camp?

A. Mr. Wheeler.

Q. Was that before or after Mr. Welsh or Mr. Walsh?

A. Mr. Welsh was foreman on the log work, but that was over on—

Q. I mean where you were at work?

A. Yes, sir.

Q. Do you remember what time it was when Mr. Walsh was foreman over you?

A. Yes, sir; he was foreman over me in 1884, I think was the first day I worked with him.

Q. How long did you continue to know him?

A. I knowed him from 1884; I knowed him when he first come from the North in 1884.

Q. How long afterwards did you know anything about 1011 him,—where he was at work?

A. The last I worked with him was, I think, in 1894; I worked with him one month.

Q. What were you doing then?

A. Tying brush then.

Q. Who for?

A. The same Company.

Q. What Company?

A. Atlantic Contracting Co.

Re-cross Examination by Mr. Charlton.

Q? Do you remember whether you made any brush fascines, or brush bundles, at Springfield in Effingham County?

A. No, sir; that was in Abercorn that we made the brush bundles.

Q. That is near Springfield?

A. No, sir; Abercorn is up here.

Q. In Effingham county?

A. Yes, sir; fifteen miles.

Q. You made these bundles of brush up there?

A. Yes, sir.

Q. You don't remember when that was?

A. In 1894.

Q. 1894 or 1884?

A. 1894.

Q. Were you not up there a great many years ago?

A. Yes, sir; but I worked won here in 1884,—Springfield

right up here,—and then left here and went over to Red Bluff in Carolina.

Q. Springfield is not a half mile from here?

A. Three miles.

Q. Whose place?

A. Mr. Taylor—

Q. Henry Taylor's place?

A. No, sir; but he looked over it.

1012 Q. Over on the Island?

A. No, sir; he has one place on the Island, but he has a place over here too.

Q. And that is the place you called Springfield?

A. Yes, sir.

Q. And you were up at Abercorn, too?

A. Yes, sir.

ELISHA WINTER, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Elisha Winter.

Q. Where do you live?

A. I live now in Chatham County.

Q. Have you ever been employed chopping wood to make bundles of brush?

A. Yes, sir.

Q. When was it?

A. It is pretty hard for me to tell exactly about the date, but I worked for Capt. Green and Mr. Gaynor, and then another gentleman, partner with him when he first come out here.

Q. How many years ago has that been?

A. Been considerable time; when the first commenced to work. I didn't keep track at all of the dates.

Q. Have you ever done any work of that kind on the upper Savannah River?

A. I worked here where they call the Banks; it is between the five and four mile road on the Augusta side of the River.

Q. Up near Augusta?

A. No, sir; between the four and five mile post on the Augusta Road on the River, where we worked.

1013 Q. Did you ever work making bundles of brush?

A. Yes, sir.

Q. What were they to be used for?

A. They called them fascines, to be put on mats; built the mats first, and then afterwards helped get the brush.

Q. How many did it take to make a bundle?

A. Three men to the bench.

Q. You were one of those three?

A. Yes, sir; I was one.

Q. What part of the labor did you perform?

A. Used the cuttin axe,—chopping axe we called them.

Q. What did the other two men do?

A. Twisted and tied.

Q. Who were you working for then?

A. Under the instructions of Mr. Wheeler at first.

Q. Mr. Wheeler was your employer?

A. Yes, sir.

Q. Was he your employer, or the superintendent of the work?

A. Superintendent of the work; my foreman was Ned Burke at that time; he over looked all the bundles we prepared during the day to see if they would pass.

Q. How much were you paid a day?

A. Paid different prices. I first worked for that firm for one dollar a day one season, and when they come out again, they knocked us to 75¢, and they fell from that season to the third season, when they knocked us down to 60¢ and I quit.

Q. Was that 60¢ for each of the three men?

A. No, sir; they made a distinction. The man at the bench got more; he was responsible, or supposed to be, for the bundles,—the size,—supposed to make them suitable for the boss to inspect and when they were not made to the satisfaction of the boss, we were not responsible for the size of the bundles,—he was the one to be responsible,—yet we
1014 didn't get any money if they wasn't allright. I have had the last one thrown away from me, and I taken my knapsack and walked home.

Q. How many did you have to do?

A. Fifty bundles to tie between three men, and I had to chop brush enough for the fifty bundles.

Q. What kind of brush did you cut?

A. Anything we could get,—pine, myrtle, sweet-gum, and

all other kinds that grew in the woods that want too large, and a great many times, climbed a pine tree and cut it down, to get brush for to make the bundles.

Q. Were you paid 60¢ a day for cutting the brush and furnishing it to the two men to bundle up?

A. Yes, sir.

Q. Regardless of the number of bundles accepted to be used?

A. Well the same brush I cut would make fifty bundles, and I had to cut enough to make fifty bundles, or didn't get paid for the day's work.

Q. Suppose you did cut brush enough to make fifty, and fifty were not made, did you get your day's pay?

A. No, sir; I was paid by the number turned out from the bench.

Q. Now, if the full number had been made but the full number was not accepted, what took place then?

A. I only got paid at the rate of whatever the bundles accepted would come to at 60¢ a day.

Q. Did you see many bundles rejected?

A. Yes, sir; there want a day but what four or five up to a third of them would be throwed away.

Q. What became of them?

A. I saw them hauled out of the woods; I don't know, sir.

Q. Who did you see haul them out of the woods?

A. The teamsters.

Q. The same teamsters who hauled the others?

A. Yes, sir; took them that was throwed out, and
1015 hauled them down to the barges.

Q. How long ago was this last work you testified to?

A. The last time they cut up here at Abercorn.

Q. You don't fix the date?

A. No, sir.

Q. Only the fact that Mr. Walsh was foreman?

A. After that, I quit under Willie Welsh. Capt. Wheeler sent me to Bonaventure under Willie Welsh, and I said, "Captain, what are you going to allow me?" and he said, "Well, being as you are a good hand, if you will go down to Bonaventure, I will see that you get \$1.25 a day and get a bench in charge," and I went down there and worked for a day, and I went to Willie Welsh and said, "Capt Wheeler sent me down here to you under instructions that you would give me \$1.25 a day," and he said, "No; we can't give that;

we can get all the men we need here for fifty and seventy-five cents a day, and don't need you," and I didn't work again for him until the last time he worked at Abercorn.

Q. What kind of man is Mr. Walsh?

A. He weighed about two hundred pounds.

Q. And you called him familiarly "Willie?"

A. I called him Mr. Welsh.

Q. He was the foreman?

A. Foreman or superintendent.

Q. Who was the foreman, do you know?

A. Mr. Green or Mr. Gaynor from all the instructions I could get.

Q. Can you fix the year that you went down to see Willie Welsh?

A. I could not myself, because I don't exactly know; it was the season when they quit work up here, and went to Bonaventure.

Q. Five years ago or ten years ago?

A. I don't know, sir, about the time; I could not give exactly the date they left off work up on the Savannah River.

1016

Cross-Examination by Mr. Charlton.

Q. When you started to work there, they were building the log mattresses?

A. When I first started.

Q. Do you remember the Lieutenant that used to come up on the tug?

A. I don't know that I would know him if I was to see him now.

Q. You don't remember his name?

A. No, sir; he knows me I guess; he took my name, and said that was the way he wanted the brush made, and Mr. Green would keep me there to see that it was fixed up in that way.

Q. Would you know his name if you heard it?

A. I don't think I would.

Q. You don't remember the year when you first started?

A. No, sir.

Q. How long after the war?

A. A good long while after the war, because I don't think it has been but five or six or eight or nine years since I worked for them.

Q. How long before the yellow fever?

A. Sometime after the yellow fever.

Q. When you first worked on the log mattress?

A. Yes, sir.

Q. You were working on that matter when they first started building these bundles of brush?

A. I worked for them when they built the first mat for the jetty work, but they moved from there, and come down to the Banks the following season. They generally goes away from here to the North, and when they come back, I would fall in with them again.

Q. How many years did you work for them?

A. I worked with them four seasons.

Q. In succession, one right after the other?

A. No, sir; they went down here to Red Bluff, and it was too far, and I didn't get money enough, and I wouldn't go down with them.

1017 Q. You were working with them building log mattresses?

A. Yes, sir.

Q. And worked with them when they started to build these bundles of brush?

A. Yes, sir.

Q. You did your work well?

A. Yes, sir.

Q. The best you knew how?

A. Yes, sir.

Q. You did good work?

A. That was with them.

Q. You had the reputation of doing good work?

A. Yes, sir.

Q. And you say sometimes they would take some of your work and throw it out, and say it wasn't the kind they wanted, and dock your pay?

A. Yes, sir.

Q. Those bundles that they took away, and said you hadn't done good work on, were just as good as those they did pay you for, weren't they?

A. They said not, but they used them.

Q. Didn't they seem to you to be just as good as the others?

A. Yes, sir.

Q. You saw no difference in them?

A. The only difference I saw was that I didn't get paid

for them. I lost a square day's work once. I had a contest with my foreman about it, but I had to lose it just the same.

Q. Who was the foreman?

A. Ned Burke was supposed to be our foreman.

Q. Did he throw out any of your fascines?

A. Yes, sir.

Q. Did you work under Royal Sawyer?

A. No, sir; I don't think I worked much under Royal; he may have inspected some, but not many.

1018 Q. When the contractor was looking, he would throw out your bundles?

A. Yes sir.

Q. And when he was not looking, he would pass them?

A. He was pretty strict when he wasn't there, too.

Q. And finally used you so hard that you quit?

A. Yes, sir.

Q. Drakey is Mr. Taylor's place?

A. No, sir; it is Mr. Keller's.

Q. What place did Royal refer to up here as Springfield?

A. I only know it as the Banks place.

Q. How far?

A. Between the three and four mile stone, which would make it five miles from the City where they worked the way they went.

Q. Were you working there at the same time Royal was?

A. Yes, sir.

Q. Now, those bundles that they would not pay you for, and threw out were they tied up as tight as the others?

A. They claimed not.

Q. I am asking for your judgment?

A. We would fix them just the same; we would not know one from the other.

Q. You tried to fix them the best you could?

A. Yes, sir.

Q. And yet these people came along, and would not use the bundles and would not pay you for them?

A. Yes, sir.

Q. But you did the best you could, to try to get your money?

A. Yes, sir.

Re-direct Examination by the Judge-Advocate.

Q. How long ago did you work under Mr. Walsh the last time?

A. I don't know, sir; the last time I worked under 1019 Mr. Welsh was when he was up at Abercorn; that is all I know.

Q. Is that the last time you ever saw him?

A. That is the last time I ever saw Mr. Welsh; I haven't seen him since.

EDWARD BURKE, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Edward Burke.

Q. Where do you live?

A. Up in the woods three miles from Savannah.

Q. Where were you at work in 1892?

A. Up here between the four and five mile post,—up here to the Taylor place.

Q. What were you doing?

A. Foreman in the woods, making fascine bundles; making these same bundles of brush.

Q. You were foreman?

A. Yes, sir.

Q. How many men did you have under you?

A. Some weeks I had sixty and fifty, and all like that,—from fifty to sixty men.

Q. How many men did it take to make a bundle?

A. Three.

Q. What was their different work?

A. Two men to the bench and one chopping.

Q. Do you know what pay they received for it?

A. Yes, sir.

Q. How much?

A. In 1892, he was paying one dollar to the man; that 1020 was three dollars for the fifty bundles; that was in 1892.

Q. He paid a dollar to each of the men,—to each of the

three men; the man who cut the brush and the men at the bench got the same rate of pay?

A. Yes, sir.

Q. Now, how much work did they have to do to earn that pay?

A. Fifty bundles.

Q. If they didn't make fifty bundles a day, their pay was reduced?

A. Yes, sir.

Q. If any of the bundles were not accepted, what took place?

A. Yes, sir; if any bundles was dumped, of course, he always hauled it, and never left it there.

Q. If they made fifty bundles, and they were not all accepted, how much pay did they get then?

A. Pay for what was accepted. If they made fifty, and took out ten, they got pay for forty.

Q. That is at the rate of \$1.00 a day for fifty bundles as a day's work, and they only got paid at that rate for forty if ten were thrown out?

A. Yes, sir.

Q. What became of those bundles that were rejected?

A. Hauled them down to the tug.

Q. Who hauled them down to the tug?

A. The wagon carried it down there.

Q. The same teams that took away those that were not rejected?

A. Yes, sir; the same teams.

Q. Now, in 1894, where did you work?

A. Up to Abercorn, between fourteen and sixteen miles.

Q. Who was superintendent in 1892 over you?

A. Arthur Wheeler and Jack Sweeney.

Q. Now, in 1894, where were you working?

A. Between fourteen and fifteen miles up.

1021 Q. On the Savannah River?

A. On the Savannah River.

Q. Who was your superintendent?

A. A man by the name of Jane Nicholas.

Q. Do you know who was the contractor doing the work?

A. The Gaynors; all I know is Mr. Ed Gaynor.

Q. Were you a foreman there?

A. Yes, sir.

Q. How many men were employed there?

A. I was running up to about seventy some days.

Q. How much were the men paid that year for their labor?

A. In 1894, sixty cents a day for fifty bundles.

Q. Where did you work last year?

A. Last year I didn't stay with them over a month, and that was in South Carolina. I went over there and staid there a month. He promised to pay me \$1.25 a day, and after I got there, they wouldn't pay me but a dollar a day, so I didn't stay but a month, and quit. I worked over there about forty men. While I was there, he was paying them at the rate of three cents a bundle.

Q. He wasn't paying them by the day then?

A. No, sir; three cents a bundle.

Q. Do you know how much the men earned a day?

A. Yes, sir.

Q. Were there many rejected when they were paying three cents a bundle?

A. No, sir; in the month I was there, they didn't reject any at all; because they got such small pay, they could not reject any.

Q. I saw you look at your cuff; have you a memorandum upon it?

A. Yes, sir.

Q. What is that for?

A. That is just the year; I could not remember it.

Q. I wish you would go back and look at those bundles on that platform and handle them.

1022 A. (The witness looked at the bundles as requested)

Q. Are those anything like the bundles that were made when you were foreman?

A. No, sir; I made them better than that.

Q. You did make them better than that?

A. Yes, sir.

Q. If they were no better than that, you rejected them?

A. That is so.

Q. How did they look as compared with those?

A. What I used to make would go twelve inches all the way through, and string was tied around it.

Q. You had to make them twelve inches?

A. Yes, sir.

Q. Were your instructions to make them twelve inches?

A. Yes, sir.

Q. Who instructed you to make them twelve inches?

A. The boss over me.

Q. Who was he?

A. Jane Nicholas.

Q. The bundles you made had the brush on them?

A. Yes, sir.

Q. You never saw any of the same bundles after they got dried up, and in that (bundles in court room referred to) condition?

A. Oh, yes, sir.

Q. Where did you see them?

A. On the yard sometimes; there would be old bundles laying around there.

Q. How long?

A. Sometimes a month or so.

Q. Could a bundle of brush get to look in a month or two like those do you think?

A. By laying down on the yard in the winter time; 1023 would not be like that in the summer, because everything was green.

Q. You don't understand my question. Could a bundle of brush,—brush such as you superintended the making of, become as light and dry as that in a month or two?

A. No, sir; it would not turn as dry as that.

Q. Have you ever, then, seen any of those you made as dry as those in the Court room?

A. No, sir.

Q. Have you ever seen them with the leaves taken off of them?

A. No, sir.

Q. Then you cannot very well compare thos (in the Court room) with the ones you made?

A. No, sir.

Cross-Examination by Mr. Charlton.

Q. Your name is Edmund Burke?

A. Yes, sir.

Q. Whilst you were there, you did honest work?

A. Yes, sir.

Q. Did the best you could?

A. Yes, sir.

Q. And they told you they wanted them twelve inches through?

A. Yes, sir.

Q. You choked them up as tight as you could?

A. Yes, sir.

Q. And when they didn't choke them up tight that way, what did you do?

A. Rejected them.

Q. But, as far as you knew how, you did the best you could under those instructions?

A. Yes, sir.

Q. What is that you have got on your cuff?

1024 A. That is just to keep me in memory; that is 1892.

Q. Is that your writing? Did you write it?

A. No, sir; I only put that down.

Q. Who wrote it for you?

A. I put it there.

Q. Who told you to?

A. I told myself.

Q. You just wanted to remember the dates by it?

A. Yes, sir; just the years.

Q. Some of these boys talked about a choker; do you remember a choker at the camp,—the thing that they tied the bundles up with?

A. Yes, sir.

Q. Did they have a choker there?

A. Yes, sir.

Q. How many men worked on that choker?

A. Two.

Q. One on each side?

A. Yes, sir.

Q. When they choked it down, who tied it up?

A. One held the stick after they choked it, and the other man done the tying.

Q. The other man tied it up?

A. Yes, sir.

Re-direct Examination by the Judge-Advocate.

Q. You say that, in choking, one man could hold it while the other tied the string?

A. One man to hold it after the two choked it.

Q. How long a stick was used in the choking,—for the choker?

A. You can choke one fifteen foot bundle in about five or seven minutes.

Q. Not how long it took, but how long were the levers,
1025 the handles, what you choked it with,—the sticks?

A. Stands about three feet.

Q. Do you mean the horse on which the brush rests?

A. No, sir; here is the choker with a hole in the center,
and that is about three feet long.

Q. Then one and a half feet on each side; that is what you
mean?

A. Yes, sir.

Q. And how long was the rope attached to it?

A. What you twist it with?

Q. Yes?

A. Sometimes the rope would be three and a half and some-
times four feet long.

Q. The rope on the choker?

A. About four feet or something like that.

Q. Do you know Willie Welsh or Walsh?

A. Yes, sir; I worked with him a while.

Q. Where?

A. In South Carolina.

Q. How long ago?

A. Awhile in 1891.

Q. In what part of the year, do you remember?

A. No, sir; somewhere about the first of May, I think.

Q. What were you doing then?

A. Building these same bundles of brush.

Q. He was the foreman of the brush camp?

A. Yes, sir; I was foreman awhile. I was foreman I
suppose about four months after I went over there.

Q. Was he foreman of the brush camp, or foreman of other
kind of work?

A. No, sir; the brush camp.

Q. Had nothing else but that?

A. Not at that time.

1026 Q. Was he a white man?

A. Yes, sir.

Q. Who did he work for, do you know?

A. Mr. Gaynor.

Q. Which Mr. Gaynor?

A. Mr. Ed Gaynor.

RUFUS HABERSHAM, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

- Q. Tell me your name in full?
A. Rufus Habersham.
Q. Where have you been at work recently?
A. I been at work at different places.
Q. Where were you at work in 1893 and 1894?
A. Working for Mr. Gaynor.
Q. Where?
A. My first commencement was 10 miles out from Savannah.
Q. What year was that? That was in 1894, was it?
A. 1894.
Q. How far from Savannah?
A. About ten miles.
Q. What were you doing?
A. Chopping logs and chopping down trees.
Q. What were they used for?
A. They was using it for jetty work; that was what they said.
Q. Were you engaged in that year in the making of bundles of brush?
A. No, sir; I was engaged in chopping down trees.
Q. What were you doing in 1895?
A. In 1895, they came down to between the five and,—about three miles from Savannah.
1027 Q. Who did you work for then?
A. Mr. Gaynor.
Q. What doing?
A. Chopping logs there.
Q. Were you engaged in the making of bundles of brush that year?
A. Well, I did in the latter part, engaged in making brush.
Q. Who was your foreman?
A. Ned Burke.
Q. Did you make these bundles?
A. Yes, sir.
Q. Do you know what they are called?
A. That is all I knew of them,—called them bundles for jetty work.

Q. You worked yourself in making the bundles?

A. Yes, sir.

Q. How many men with you?

A. Had two besides myself.

Q. What part of the work did you do?

A. He give me the head of a bench.

Q. What did the other two men do?

A. One was chopping, and the other one held the choker while I tied the bundles.

Q. How long were the bundles you were required to make?

A. Fifteen feet.

Q. How large through?

A. Twelve inches through.

Q. How many bundles a day were you required to make?

A. They allowed fifty bundles for our day's work.

Q. How much pay did you receive a day?

A. For making these bundles, I didn't receive but eighty to seventy-five cents.

Q. From eighty to seventy-five cents a day?

A. Yes, sir.

1028 A. Yes, sir.

Q. Did you get that if you didn't make fifty bundles a day?

A. I made fifty bundles every day, and then didn't get paid, because some of the bundles were rejected; these bundles that were rejected, I didn't get no pay for.

Q. How many bundles were rejected of your work?

A. I have had a whole day's work rejected, and was authorized to come back the next day to over-wrok them,—cut them loose, and repair them over, and, when I went back the next morning, they was all gone.

Q. When you went back to get the material to have them made over, they had disappeared?

A. Yes, sir; and I got no pay for it at all.

Q. Did you ever work at the same business after 1895?

A. Yes, sir.

Q. Where?

A. At Gibbons Landing.

Q. Who did you work for then?

A. I don't know who the employer was, but the same foreman, Ned Burke.

Q. Do you know who the white man was that was superintendent?

- A. No, sir.
Q. You worked upon the same business?
A. The same business.
Q. You had other men with you?
A. Yes, sir.
Q. You were one of a team of three men?
A. Yes, sir.
Q. How much pay did you receive a day then?
A. Received sixty cents a day then.
Q. Each of you?
A. Yes, sir.
1029 Q. How many bundles did you have to make a day to entitle you to sixty cents a day each?
A. Fifty bundles.
Q. Just the same number that you had been required to make before?
A. Yes, sir.

Cross-Examination by Mr. Charlton.

- Q. When did you say you first started?
A. My first commencement with Mr. Gaynor was at Drakey's place.
Q. Up the River here?
A. Up to Monteith chopping logs.
Q. In 1894?
A. 1894 as near as I can come at it.
Q. Three or four years ago?
A. Longer than that.
Q. You can remember how much longer?
A. Seven or eight years, if I am not mistaken.
Q. How long before your second work that you were talking about, under Edmund Burke?
A. My second work was about four or five years before I went to work with him.
Q. What size trees were you cutting down?
A. I was cutting,—the largest tree was from three feet to two and four feet through.
Q. Four feet through?
A. Yes, sir; some logs measured four feet.
Q. What was the smallest tree you cut down?
A. A foot and a half or a foot.
Q. A foot and a half or a foot?

A. Yes, sir.

Q. When you got to building these bundles of brush, did you work honestly at the work?

1030 A. Yes, sir; done all I could.

Q. They told you they wanted them twelve inches, did you choke them up tight?

A. Yes, sir.

Q. As tight as you could?

A. Yes, sir; tight as I could.

Q. You did good, honest work, did you?

A. Yes, sir.

Q. And after doing that, they would throw them out, and not pay you?

A. Yes, sir.

Q. And those they threw out were just as good as those they took, as far as you could see?

A. As far as I could see; I did just as hard work on them.

Q. And one day they threw out your whole day's work?

A. Yes, sir.

Q. And told you you would have to make them over, but when you got back, they had carried them off?

A. Yes, sir.

Q. But they were done just as well as the others?

A. Yes, sir.

1031 JOHN B. McCARTHY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. You have already been sworn as a witness in this case?

A. Yes, sir.

Judge-Advocate: Mr. McCarthy is a witness from the office of the Chief of Engineers in Washington, and, in response to a memorandum submitted by a member of the Court, who desired to have certain papers sent for, he has produced them.

Q. You produced all the papers that were asked for in this memorandum?

A. Not all that were asked for in that memorandum. In connection with the memorandum is the original copy of the

annual report of Capt. Carter for 1897, which is in the office here.

Q. That was called for in this memorandum?

A. Yes, sir. The two previous requests I have got, with a letter explaining them, from the office.

Q. (handing witness paper) That second item, then, the one marked Savannah Harbor, is that the one?

A. I had that with me, and this is the answer to that.

Q. Have you a statement of the papers?

A. Yes, sir. (Hands the Judge-Advocate the papers)

Judge-Advocate: The first paper called for is Capt. Carter's project for improvement of Cumberland Sound, Ga. June 17th, 1895; June 22, 1895, Colonel Hains' indorsement recommending same for approval. The first is the report of the Board of Engineers, dated Savannah, Ga., December 18th, 1895. Does the Court desire it to be read?

The Court: Yes.

Judge-Advocate: (After reading the paper referred to) A copy of this will be attached to the record marked Exhibit No. 98.

The endorsement on the back is a brief of its contents with the notation, "Printed in Annual Report Chief of 1032 Engineers, 1896. Copy to Secretary of War accompanying and Feby 8, 1896 on inclos. 8. April 23, 1896, copy hereof to Senator Frye with letter based on inclosure 9." In red ink there is an entry upon this "2 inclosed tracings."

Witness: They are with the papers in Washington. I made no request for the tracings.

Judge-Advocate: The original tracings were not sent with the papers, but there are blue prints at the headquarters here and I will submit them. When the blue prints are received, they will be attached to Exhibit No. 98 as 98a and 98b.

Q. The next paper called for was—?

A. The next project and prior projects.

Q. These inclosures are copies of the originals and the endorsements.

A. Yes, sir; press copies.

Q. Nothing here that is not there (indicating)?

A. Nothing there that is not there (indicating), except they are press copies of the office letters sent here.

Judge-Advocate: The next paper called for was the project of Capt. Carter of June 22nd, 1896, which is already—

The Court: I think it would be more connected if you can ascertain what action was taken by the War Department upon this report of the Board of Engineers.

Judge-Advocate: His project is short. Do you desire to have it put upon the record again?

The Court: This report must have been approved or disapproved. What had he to guide him in submitting the project?

The President: What was the Board's report?

Judge-Advocate: Nothing appears there.

Q. Give me letter from Capt. Carter of date of June 17, 1895.

A. (Witness handed Judge-Advocate the paper called for)

Judge-Advocate: This is the original letter from Capt. Carter to the Chief of Engineers, submitting project for the improvement of Cumberland Sound, Ga., and Florida, 1033 dated Savannah, Ga., June 17, 1895, and typewritten, but the 17 is scratched out and 12th put in pencil. The accused assures me that it is the same project as submitted by the Board of Engineers.

The Court: We want the action on the report you have read. A definite project has been submitted by the Board, consisting of half a dozen officers, to the Chief of Engineers. Now we want to know whether that project was approved, and directed to be carried out, or whether it was disapproved.

Q. (Addressing the witness) Have you any information among those papers?

A. Here is the approval (handing Judge-Advocate the paper).

Q. What is this you hand me?

A. The press copy of an endorsement on the official paper, Office of Chief of Engineers, August 3rd, 1896, signed by Col. McKenzie, Acting Chief of Engineers.

Q. In relation to what?

A. Cumberland Sound.

Mr. Rose: That is the project of expenditure, and not of the work. That is in evidence already,—the original.

Judge-Advocate: In response to the telegram that was sent, there comes from the Office of the Chief of Engineers a communication enclosing certain papers. We will commence with the first paper of June 17, 1895, which has already been submitted. Then the report of the Board submitting project has already been submitted.

The Court: Can you state to the Court what action was taken upon the report of the Board?

Judge-Advocate: These papers will show the manner in

which the recommendations of the Board got into operation.

Copy of the communication to which I referred, the project of Capt Carter of June 17, 1895, which he says, with some slight modifications, is the same as the project of the Board, will be attached to the record marked Exhibit No. 69.

1034 Q. If you will take these papers,—I have taken these two out,—and identify the papers one by one; bring them out and identify them?

A. Feb. 7, 1896.—Hon. W. B. Hooker, Chairman River and Harbor Committee, House of Representatives, requested copy of report of Board; Feb. 8, 1896, Chief of Engineer submits copy to Secretary of War; Feb. 13, 1896, letter of Hon. W. B. Hooker, back with notation, "Copy of report handed to Mr. Hooker Feb'y 12, 1896." Here is the communication (handing out paper) with that notation on it; that covers that case. April 21, 1896,—Copy of Report of Board requested for use of Senate Committee on Commerce. This is the paper (handing paper out) showing that copy was sent to the Senate Committee on Commerce in connection with the River and Harbor Bill. April 23, 1896, Chief of Engineers sent copy of report of Board to Senator Frye, Chairman of Senate Committee on Commerce. I haven't that letter, but I have a press copy of his letter here. Here (handing paper out) is the press copy of the letter sent Senator Frye. June 19, 1896,—Letter to Capt. Carter directing submission of project for expenditure. This is the paper (handing it out). Sundry Civil Act of June 4, 1897, appropriated for Improving Cumberland Sound, Georgia and Florida: For continuing Improvement, three hundred and fifty thousand dollars. June 10, 1897,—Letter to Capt. Carter directing submission of project for expenditure of above. June 15, 1897, Capt. Carter submits project in compliance with above. Here is that paper (handing out paper). "All letters mentioned above are herewith, except Capt. Carter's project of June 22, 1896, which is in Mr. McCarthy's custody." I had it, and that was here a moment ago. These are all the papers I identified, and these are the ones referred to in this letter of transmittal.

Q. These are all the papers from the official files of the Engineer Department?

A. Yes, sir.

1035 Q. Have you made search for any authority for Capt. Carter to modify the terms of the project of the Board?

A. Yes, sir.

Q. Have you found any such authority?

A. Nothing.

Q. Have you found any request for such authority?

A. No, sir.

Q. Had such request and such authority been filed,—been in the office, would you have found it?

A. Yes, sir.

Q. There would have been record of it?

A. Yes, sir. The conclusion of the letter says that there was none.

Q. You have made a search for it?

A. I made a search myself.

Q. And had there been such authority, you would have found it?

A. Yes, sir.

Mr. Blair: We would like to have it appear on the record here in connection with that project of the Engineer Board which has been read, that it was never approved by the Chief of Engineers, but was written into the River and Harbor Act of June 3, 1896, and thereby was approved by Congress. It never received the approval of the Chief of Engineers, or anybody connected with the War Department, but is specifically mentioned in the Act of June 3rd, 1896, and approved thereby.

Judge-Advocate: That fact will necessarily appear when we pursue this subject in the morning; however, it is well enough to have it on the record even now that the project was approved by the Act of Congress, which has been read already.

Witness: Maj. Stanton's request also covered another matter, and I would like to get rid of that.

Q. (Judge-Advocate continuing) What is that paper?

1036 A. Paper in connection with building a training wall down at Cockspur Island Oyster Bed. He asked for the original paper, and any endorsement or letters there were, or letters relating thereto.

Q. You identify that as what?

A. As the official record from the office of the Chief Engineer, and answers that question as far as the record there answers it.

Q. That is what?

A. The file number of it is 7913, enclosure 6, dated June 22, 1896. It is the project submitted by Capt. Carter for ex-

penditure of appropriation of June 3, 1896, \$5,000 for Improving Harbor at Savannah, Ga.

Q. Is that the only project in relation to Cockspur Island?

A. That I supply in reply to that request. That answered the request that was handed me in Maj. Stanton's handwriting.

The President: The hour of adjournment has arrived, and the Court stands adjourned until tomorrow morning at eleven o'clock.

(Court adjourned at 3.00 o'clock p. m.)

THOMAS F. BARR

Col. & Asst. Judge Adv. Genl.

Judge Advocate.

1037

United States Court Room,

Savannah, Ga.,

February 4, 1898.

The Court met pursuant to adjournment this morning, at 11 o'clock, a. m.

Present.

All the members of the Court and the Judge-Advocate.

The accused, his counsel, and the reporter, G. T. Cann, were also present.

* * * * *

1044 Judge Advocate: Is it the desire of the Court that I shall read all these papers as they are submitted by the Chief of Engineers consecutively? There is here the project for improving Cumberland Sound, antedating the project of the Board, of Capt. Carter, which he says that the Board adopted his report with some slight modification.

The President: If the accused desires the reading of the whole papers,—if you now desire it, you can read the extracts.

Judge-Advocate: I cannot tell where the modifications are, I think if they are spread upon the record, one after the other, it will be just as the history which the Chief of Engineers gives here.

Mr. Blair: The accused says he can point out the modifications.

By a member: If they are not too long I would like to have them read.

Judge-Advocate: I shall offer these in evidence, each of

these papers, so they may be attached as exhibits without putting them upon the record. (Reading.

“United States Engineer Office,
Savannah, Ga., June 17, 1895”

The 17 is erased and 12 in pencil placed over it. (Here the Judge Advocate reads a revision of the project of Improvement of Cumberland Sound, Georgia and Florida, under date of June 17, 1895, by O. M. Carter, Capt. Corps of Engrs. 1045 U. S. A. to Brig. Gen. Wm. P. Craighill, Chief of Engineers, U. S. Army, through Lieut. Col. Peter C. Hains, Corps of Engrs. U. S. Army, Division Engineer, S. E. Division, and also reads the first, second and third indorsements thereon, and states—

Judge-Advocate: A copy of this is already attached to the record, marked Exhibit 99, but was not fully read. The report of the Board of Engineers, referred to, was read first at the request of one of the members of the Court.

Judge-Advocate: The next paper as offered in evidence is as follows:

“Committee on Rivers and Harbors,
House of Representatives, U. S.
Washington, D. C.
Feb’y 7, 1896.

Gen. W. P. Craighill,
Chief of Engineers,
Washington, D. C.

Sir:

I would thank you to forward for the use of the Committee on Rivers and Harbors, a copy of the report made recently by a Board of Engineers, designated to investigate Cumberland Sound (Georgia and Florida)

Very respectfully,

W. B. HOOKER,
Chairman.”

1st Indorsement.
Office Chief of Engineers, U. S. Army,
February 8th, 1896.

Respectfully submitted to the Secretary of War. The report called for, of which a copy is herewith, was not intended for use outside the office of the Chief of Engineers; but there is no objection to its going to the Committee on Rivers and Harbors of the House as requested by Hon. Mr.

Hooker, Chairman, unless to send it would be a violation of the spirit of Section 13, River and Harbor Act of

1894, as follows:—That no preliminary examination, survey, project, or estimate for new works, other than those designated in this act, shall be made."

W. P. CRAIGHILL,
Brig. Gen., Chief of Engineers."

Judge-Advocate: The paper is indorsed, War Department, Washington, Feb. 7, 1896, Hon. W. B. Hooker, Chairman R. & H. Committee, requests copy of recent report of Board on Cumberland Sound, copy of report handed to Mr. Hooker, Feb. 12, 1896." A copy of this will be attached to the record and marked Exhibit 100. I offer in evidence and read a letter from the Committee, on Commerce, United States Senate, Washington, D. C., April 21, 1896, to Gen. Wm. P. Craighill, Chief of Engineers, U. S. Army, requesting copy of Capt. Carter's report on improvement of Cumberland Sound, Ga., in which estimate of cost was increased, together with a memorandum attached thereto, reciting that Gen. Craighill directed that a copy of report of Dec. 1, 1895, by Board of Engineers, be furnished Senator Frye, and that said copy was sent accordingly, with E. D. letter of April 23, 1896, date of this memorandum is April 25, 1896. Copy of this will be attached to the record and marked Exhibit 101.M. The inclosed letter referred to in that memorandum is, "Office Chief of Engineers, United States Army, Washington, D. C., April 23, 1896.

Subject,—Cumberland Sound.

Hon. Wm. P. Frye,
Chairman Committee on Commerce,
United States Senate.

Sir:

I am in receipt of letter of 21st, instant, from the 1047 Clerk of your committee, and, to comply with request therein, I enclose a copy of a report of Dec. 18, 1895, by a Board of Engineer Officers, on the subject of the improvement of Cumberland Sound, Georgia and Florida.

Very respectfully,

Your obedient servant.

WM. P. CRAIGHILL,
Brig. Gen. Chief of Engineers."

A copy of this will be attached to the record and marked Exhibit 101. A.

Judge Advocate: The next thing referred to in the communication from the Chief of Engineers, is the River and Harbor Act of June 3, 1896. This is a statute of which the

Court will take judicial notice, but I spread upon the record the appropriation covering that subject; "Improving Cumberland Sound, Georgia, Continuing Improvement, \$5,000.00, provided that contracts may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate two million, three hundred and forty-five thousand dollars, exclusive of amount herein and heretofore appropriated."

JOHN B. McCARTHY, recalled as a witness for the prosecution having been previously duly sworn, testified as follows.

Direct Examination.

Questions by the Judge-Advocate:

Q. You produced these papers yesterday, Mr. McCarthy; that memorandum of June 19, 1896, of a letter to Capt. Carter, asking for the submission of a project for the expenditure of certain amounta appropriated; I see no signature attached nor address in these papers?

A. This is a form on which the letter is written and it is a regular printed form of the office. (Handing the Judge Advocate a printed form)

Q. This is an office paper?

A. We just make a copy of the address and this printed matter runs in here (indicating) with this interlineation, "And your judgment as to its worthiness".

Q. This is the first impression?

A. Yes, sir.

Q. What is this other impression?

A. There is a signature very faint at the bottom, "A. McKenzie", the "Lieut Col." is rather indistinct. The "A. McKenzie" is very indistinct;; in addition to this memorandum, this regular form of detailed information follows.

Judge Advocate: I don't think it necessary to read the statement in regard to the passage of the act, calling for the amount of the expenditure; it will of course, go in the exhibit.

(Here the Judge-Advocate reads a letter from the Office of the Chief of Engineers, U. S. Army, Washington D. C., dated

June 19, 1896, to Capt. O. M. Carter, Savannah, Ga., upon the printed form above referred to, with this interlineation in ink, "And your judgment as to its worthiness", the impression only taking the ink, and the three letter press copy book pages attached to said letter.

Judge-Advocate: A copy of the communication just read will be attached to the record, marked Exhibit No. 102.

Judge-Advocate: I offer in evidence and read letter of Capt. O. M. Carter to Brig. Gen. Wm. P. Craighill, Chief of Engineers, U. S. Army, dated June 22, 1896,

Subject, project of expenditure Cumberland Sound, 1049 Georgia, together with the indorsements thereon. A copy of this will be attached to the record and marked Exhibit, No. 103.

By a member: The printed circular letter, calling for that project, called for a resume of the project then in force. This project for expenditure states that that project was a project for the Board of Engineers.

Judge Advocate: Yes.

By a member: I would like a description of the ultimate jetty section read from the report of Engineers, near the close of the report, just about the end.

Judge Advocate: (Reading— The following type of jetty is proposed. The foundation and apron courses should be of brush mattresses, 100 feet in width and loaded with rip rap stone; the ultimate jetty section should be composed of foundation of brush mattresses with a load consisting of a hearting of small stones, covered with heavier stone, in going seaward the covering stone should increase the weight from 1,000 pounds to five tons, as the low water depth increases from zero to twelve feet. Beyond that depth still heavier stone should be used. The side slopes should be as deep as such stone can stand. An ultimate crest width of ten feet at mean high water is sufficient."

By a member: Now I would like a description of the ultimate jetty section read as quoted from the report of the Board of Engineers. Now, this report, as I understand, is to give a resume of this project of improvement by the Board of Engineers.

Judge Advocate: (Reading) "The project contemplates the formation of a channel across the bar, not less than 19 feet deep at mean low water. This is to be accomplished by the construction of two jetties of stone, with a mattress heart-

ing wherever admissible, resting upon a foundation mat-
1050 tress of brush starting from the shores on opposite sides
of the entrance, and extending seaward upon converg-
ing lines, so directed that the ends will be aprallel to each
other and about 3,900 feet apart."

By a member: Now, I would like from the records of
the office, the authority for stating that that project called for
mattress heartings wherever admissible, after stating, that
is the approved project of that date.

The President: There are two projects submitted, one by
Capt. Carter, on June 12, 1895, another by the Board of En-
gineers, dated, I think, June 18, 1895.

Judge-Advocate: The report of the Board was December
18, 1895.

The President: December 1895, yes; that is the later one.
The report of the Board of Engineers, is subsequent to the
project submitted by Capt. Carter.

Judge-Advocate: His first project.

By a member: His first project which the Board of En-
gineers amends in certain particulars; now we wish to know
which of those projects was approved by Act of Congress.

Judge-Advocate: That is a question, I presume, to be de-
termined by the practice of the Department.

The President: No, I think you have it in your papers
there, the Act itself.

Judge-Advocate: The Act itself does not refer to anything
but the Cumberland Sound appropriation, does not refer to
anything, to any reports specifically.

By a member: Which of those projects was sent to the
Committee of Congress.

Judge-Advocate: This portion from the report of the
Board of Engineers.

The Court: Both to the House and Senate Committee.

Judge Advocate: Both to the House and Senate Commit-
tee.

1051 By a member: That was the report as appears from
these papers

The President: That is the only project that Congress act-
ed upon?

Judge-Advocate: The only project, so far as these papers
have yet shown that was submitted to the Committee of
Commerce in the Senate, and of Rivers and Harbors in the
House, for the appropriation of Cumberland Sound. There
is no specific mention made of any project by name.

Mr. Rose: It says, the "present project".

Judge Advocate: By any officer or member, but in the report of Capt. Carter, is mentioned an appropriation for improving Savannah Harbor.

By a member: I would like very much to see the authority for stating in the project for the expenditure that the project then in force, that is the project of the Board of Engineers, authorized a mattress hearting.

By a member: I think that is right in that paper.

Judge-Advocate: I have asked this witness already if there is any authority found in the records of the Department for any modification of the report of the Board of Engineers, and he has stated that he is unable to find it.

By a member: It is right there in those papers.

Mr. Blair: The authority for that is in the indorsement, I presume, it is approved by the Secretary of War.

The President: That is the report after the appropriation is made.

Mr. Blair: That is the report speaking of mattress hearting to which Major Stanton refers.

By a member: What I refer to specially is the statement that the approved project was to build a jetty of mattress hearting; I would like to know the authority for that statement.

Judge Advocate: There is a statement in this letter 1052 from the office of the Chief of Engineers which, if the counsel will permit to be read to the Court, shows a view that obtains in the office of the Chief of Engineers upon this very point.

Mr. Blair: Of course, that is Gen. Wilson's statement of what Gen. Craighill intended, I think this will make it plain perhaps, to the members of the Court: (Here Mr. Blair shows a blue print map to the Court)

The President: We will just drop this matter at the present time.

Judge-Advocate: Have you any objection to that? (Referring to the letter)

Mr. Blair: I don't think we ought to be bound by that statement now of Gen. Wilson, Gen. Craighill will be here on the stand, and he can explain it.

Judge-Advocate: Have you any objection to having that go on?—as the concluding part of this letter when I reach it, and as the views that obtain in the Engineer Office now? They

are certainly still engaged in the execution of that project in the Engineer Office.

Mr. Blair: I think Gen. Craighillne—could state whether there has been any modification himself; he ought to be here; he is the man who approved the project.

Judge-Advocate: A copy of that will be attached to the record and marked Exhibit No. 103. (Referring to letter from Capt. Carter to the Chief of Engineers, dated June 22, 1896, submitting project for expenditure of appropriation of June 3, 1896, \$5,000.00, for improving Cumberland Sound, Ga.)

Judge-Advocate: I offer in evidence and read
Subject, Sundry Civil Act.

Office of the Chief of Engineers,
United States Army,
Washington, D. C. June 10, 1897

“Capt. O. M. Carter,
1053 Corps of Engineers,
Savannah, Ga.

Captain:

There is inclosed herewith a copy of the Sundry Civil Act, approved June 4, 1897. This Act contains items, (on page 38) for Works of Improvement within your district as follows: Improving Harbor at Savannah, Ga: for continuing improvement, \$350,000.00; Improving Cumberland Sound, Georgia and Florida, for continuing improvement, \$350,000.00.

Please submit at an early a day as practicable projects for the expenditure of the amount appropriated, specifying to what portion of the works you propose to apply the funds reference being had to the approved plans and to the estimates upon which the present appropriations are based.

By command of Brig. Gen. Wilson.

Very respectfully,

Your obedient servant,

A. MACKENZIE,
Lieut. Col. Corps of Engineers,

(One inclosure)”

Judge-Advocate: To which this response was made. (Reading) Letter of June 15, 1897, from Capt. O. M. Carter to Brig. Gen. John M. Wilson, submitting projects for expenditure of \$350,000.00, Act, June 4, 1897, for improving Cumberland Sound Ga., Continuing improvement.) (All the indorsements thereon being also read.)

Judge-Advocate: A copy of this will be attached to the record marked Exhibit, No. 104.

Judge-Advocate: The balance of the communications from the office of the Chief of Engineers, is the statement of the view of the office upon the appropriation.

Mr. Blair: There seems to be some misapprehension 1054 in the minds of some of the members of the Court, with respect to this letter of June 22, 1896, by Capt. Carter, to Gen. Craighill, with respect to a project for the expenditure of \$5,000.00, then appropriated for for the Cumberland Sound Improvement. The second page of the letter contains this statement: "This is to be accomplished by the construction of two jetties of stone, with a mattress hearting wherever admissible." The project, as the Court will see, of the Board of Officers was, that there should be a foundation course of mattresses, and stone laid upon them; a foundation course or courses of mattresses. An examination of the tracings or blue prints, which accompanied that report, and a measurement of the outlines of the jetties therein shown, will demonstrate when the number of square yards of mattresses recommended by the report of the Board of Officers, is taken into consideration, that the foundation course of mattresses necessarily must have consisted of six or more mattresses. Now, the accused says, and this will be sworn to later, that the phrase or clause that a mattress of hearting wherever admissible, is a stereotyped phrase appearing in numerous old reports, from 1881 down; that it crept into this letter and the other that the Judge Advocate read, by inadvertence; that the project has been carried out as will be shown in the evidence, precisely as recommended by the Board of Officers: There has been in fact, no hearting of mattress; none was ever intended, none was ever in the mind of the accused, and to show that the phrase which has, as I say, crept in by inadvertence, was purely an inadvertence, the final paragraph in the letter, I think, demonstrates: "Any work executed should consist in extending and raising both jetties, as provided in the project approved by the Act, and in the report of December 18, 1895," which is the report of the Board of Officers.

1055 By a member: Will you look at the indorsement of the Chief of Engineers and see what it says with reference to that matter, or it may be in Col. Hains' indorsement: It says the basis of the project is the report of the Board of Engineers.

Mr. Blair: Yes, sir; this is the indorsement of the Chief

of Engineers: (Reading) "The project upon which this appropriation is based was formulated and recommended by a Board of Engineers." That is the one you refer to?

By a member: Yes, sir.

Mr. Blair: The last paragraph, as I stated, in the letter of Capt. Carter, states that any improvement should consist in extending and raising both jetties, as provided in the project approved by the Act and in the report of Dec. 18, 1895; so I make that statement to remove as far as possible, any misunderstanding about it, and by the courtesy of the Judge Advocate.

Judge-Advocate: There were two responses to the letter of the 19th, of June, 1896, from the Chief of Engineers, and one was inadvertently based upon the project for the expenditure for Savannah Harbor. (Here the letter of June 22, 1896, from Capt. O. M. Carter, to Brig. Gen. Wm. P. Craighill, submitting project for expenditure of appropriation of June 3, 1896, \$5,000.00 for Harbor of Savannah, Ga., together with the indorsements thereon, is read by the Judge Advocate, in evidence)

Judge-Advocate: This is offered in evidence and a copy will be attached to the record and marked, Exhibit No. 105.

1056 JOHN W. O. STERLY, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:

Direct Examination.

Questions by the Judge Advocate:

Q. Give me G. R., page 31, 1889?

(Here witness produces the book and page asked for)

Judge-Advocate: I offer in evidence and read
3rd Indorsement.

U. S. Engineer Office,
Savannah, Ga., April 27, 1889.

Respectfully returned to

Chief of Engineers, U. S. A.,
Washington, D. C.

Mr. M. J. Wheeler is from Fayetteville, N. Y., and was in business there with his brother some years ago. so I am informed. They failed and he states that it will be impossible

for him to do any work without being embarrassed by his creditors. I do not think that Mr. Wheeler has much property of his own. He probably relied upon his bondsmen to supply the money necessary for carrying on the work.

O. M. CARTER,

1st Lieut. Corps of Engineers, U. S. A."

Q. Where are the original papers?

A. The original papers are in Washington, in the office of the Chief of Engineers.

Q. Retain copies of papers sent there for final file are made out in your office, are they?

A. Yes, sir.

Q. Are these copies of those original papers? (Hand-
1057 ing witness papers)

A. Yes, sir.

Judge-Advocate: All these are offered in evidence. (Reading)

"Pulaski House,
Watson & Powers.

Savannah, Ga., April 16, 1889.

Lieut. Col. J. A. Smith,
Corps of Engineers, U. S. Army,
Portland, Maine.

Colonel:

Mr. M. J. Wheeler, whose bondsmen I am upon a bid for work in the Kennebec river, informs me that he wishes to be excused from entering into contract under that bid, because of some old business complications that were revived when it was known that he was a successful bidder for some work. At his request I beg leave to ask that the contract be given to me in my name, as his principal bondsman.

I think I am entitled to this, as his failure is due to circumstances unforeseen and unknown to me when I went on his bond.

Yours resp'y.,

B. D. GREENE."

First indorsement.

U. S. Engineer Office,
Portland, Me., Aug. 20, '89.

"Respectfully forwarded to the Chief of Engineers, with the recommendation that the contract be authorized with the principal bondsman of the bidder. Mr. M. J. Wheeler is now so situated that he cannot carry on the contract without great

embarrassment to himself, and consequent inconvenience to the Government. The work will therefore be facilitated 1058 by making the contract as required by Capt. Greene.

JARED A. SMITH,

Lieut. Col. Corps of Engineers, U. S. A.

Second Indorsement.

Office Chief of Engineers, U. S. Army,
April 25, 1889.

Respectfully referred to Lieut. O. M. Carter, Corps of Engineers, with the request that he make inquiry relative to the responsibility and business connections of Mr. M. J. Wheeler.

By command of Brig. Gen. Casey:

THOS. TUTTLE,

Captain Corps of Engineers."

Judge Advocate: These precede the indorsement which I first read from the official letter book. It is briefed as follows:

"Savannah, Ga., April 16, 1889.

1st, 2d, and 3d, indorsements, Greene, B. D.

M. J. Wheeler, bidder, for work in Kennebec river, Me., in whose favor the award has been made, asks to be relieved from entering into contract, former business complications coming up to embarrass him, and requests that contract may be made in his (Greene's) name as principal bondsman on the bid."

Judge-Advocate: File mark "G. R., 26, 1889. U. S. Engineer office, Savannah, Ga., Received Apr. 27, 1889."

Q. What is that paper? (Handing witness a paper)

A. That is a proposal of William H. Walsh for improving Cumberland Sound, Ga., opened Sept. 10, 1892.

Q. That is from one of the original copies in your office?

A. Yes, sir.

Judge-Advocate: That I find is already in evidence as 1059 Exhibit No. 27. I call attention to Exhibit 27, which was the proposal of William H. Walsh to be opened Sept. 10, 1892, that the guarantee is signed by William F. McCaully, of Savannah in the State of Georgia and Myron J. Wheeler, of Savannah in the State of Georgia, dated Sept. 9, 1892, and in the justification of the guarantors, William F. McCaully signed this oath: "I, William F. McCaully, one of the guarantors named in the within guarantee, do swear that I am pecuniarily worth the sum of \$75,000.00, over and above all my debts and liabilities.

WILLIAM F. MCCAULLY,

Before Michael A. Connolly, United States Commissioner,"

and "State of Georgia, County of Chatham, I, Myron J. Wheeler, one of the guarantors named in the within guarantee, do swear that I am pecuniarily worth the sum of \$75,000.00 over and above all my debts and liabilities.

Signed, MYRON J. WHEELER,

Before me, Michael A. Connolly, United States Commissioner. Certificate, I, Michael A. Connolly, United States Commissioner, do hereby certify that William F. McCaully and Myron J. Wheeler, the guarantors above named, are personally known to me, and that, to the best of my knowledge and belief, each is pecuniarily worth, over and above all his debts and liabilities the sum stated in the accompanying affidavit, subscribed by him.

Signed, Michael A. Connolly, United States Commissioner."

This is already in evidence.

Q. Do you know who M. J. Wheeler is?

A. Mr. Wheeler is a foreman—he was a foreman of the Atlantic Contracting Company.

Q. Foreman of what kind of labor?

A. I have never seen him on the work, he has come to the office.

Q. His name does not appear upon any reports at the office?

1060 A. No, sir, but he has come for instructions to the office.

Q. Instructions of what kind?

A. I don't remember exactly what it was; I overheard just a small part of the conversation.

Q. You don't know then?

A. I don't know.

Q. Then it is only by reputation that you know the character of his employment at all?

A. I cannot say that exactly; Capt. Carter addressed a communication to Mr. Wheeler. I do know. Capt. Carter addressed a communication to him, when he was working on the Savannah river.

Q. How did he address it?

A. "Memorandum for Mr. Wheeler."

Q. Memorandum in relation to what kind of work?

A. How much fascines would be needed; I don't know exactly whether it is fascines; I know there was a memorandum in relation to work on the Savannah river, which is copied in the copy book; I saw it the other day, but I cannot remember the substance of it now.

Q. Well, that is enough, I think. You have the papers in relation to the Brunswick Harbor contract, May 31, 1889, with you?

A. Yes, sir.

Q. And of the Altamaha river, Dec. 20, 1892?

A. No, sir, I have no papers here for that.

Q. Well, never mind that then; give me the papers in relation to Brunswick harbor.

Judge-Advocate: I will not consume the time of the Court by reading all of this. This was a contract of May 31, 1889; the contract of Charles C. Ely; the date of the advertisement was April 24, 1889; the date of opening the bid was May 13, 1889; the letter requesting authority to print and advertise was April 24, 1889. It was approved April 27, 1889, and 1061 received in Savannah April 29, 1889; fourteen days before the opening of the bids; 150 specifications were printed, and there is no record of application and issuing of specifications. The bid of Charles C. Ely was recommended. I will not consume the time of the Court, reading this.

Mr. Blair: Was he the lowest bidder, Colonel?

Judge Advocate: The abstract of proposal shows that there were two bidders, David V. Howell, who bid for fascines per cubic yard, 67 cents; for stone, \$3.47, a total of \$11,020.00; Charles C. Ely, of Savannah, Ga., bid for fascines, per cubic yard, \$1.34, and for stone, \$3.41, amounting to \$13,215.00; an asterisk against the name of Mr. Howell, says "Informal", and against the name of Mr. Ely is a cross, which is "Bid recommended for acceptance". I shall have to look at the letter. The asterisk and then one word in here, "Informal", that is against the name of Mr. Howell, whose bid was \$11,020.00. The letter of transmittal referred to is this,

"United States Engineer Office,
Savannah, Ga., May 13, 1889.

The Chief of Engineers, U. S. Army,
Washington, D. C.

General:

I have the honor to transmit herewith all proposals received for stone and brush work in Brunswick Harbor, Ga., with abstract of same, and authority is requested to award the contract to Chas C. Ely, of Savannah, Ga.

"The bid of Mr. Howell is informal, being unaccompanied by a guarantee and being made out only in duplicate, and in view of these facts and of the fact that Mr. Howell failed

while executing work upon Savannah river some years ago, I do not think his bid should be considered.

I estimated the price of fascines at \$1.25 per cubic 1062 yard, and of stone at \$3.25 per cubic yard. Mr. Ely's bid is somewhat above these figures, but it is important that work should be done and completed at the earliest practicable moment, and I think that under these circumstances, it is more economical and advantageous to the Government to award the contract at his figures than to re-advertise the work.

Very respectfully,

Your obedient servant,

O. M. CARTER,

1st. Lt. Corps of Engrs. U. S. A.

(Three enclosures.)"

Judge Advocate;—And this communication, "U. S. Engineer Office, Savannah, Ga., received May 20, 1889." (Reading)

"National Hotel,

Monroe, N. Y.

Chas. H. Dix, Prop'r.

Monroe, N. Y., May 11, 1889.

Col. O. M. Carter,

Dear Sir:

I received your proposals last evening through John S. Howell, too late for me to make the papers out with proper securities, and for this reason I have concluded to send you the inclosed informal bid. Should I come out the lowest, I will at once give you good security for the amount required on the contract, and do the work as fast as you expect it to be done.

Very truly,

Yours, D. V. HOWELL,

Box 36 Monroe, N. Y."

1063 Judge-Advocate: The proposals of Mr. Howell and of Mr. Ely will be attached to the record and marked Exhibit, No. 106, and Exhibit No. 107.

Judge-Advocate: A copy of the contract with Mr. Ely will be attached to the record and marked Exhibit No. 108.

Judge-Advocate: I offer in evidence also the contractor's bond, with Jacob Paulsen and John F. Gaynor as sureties for the penal sum of \$4,000.00; a copy of which will be attached to record and marked Exhibit No. 109.

Q. Give me G. R., 72, 1889.

A. I have not got that paper.

Q. G. R. 72, 1889?

A. That must be among that file there. (Indicating) This file or this file, Colonel (Indicating)

Q. That is it, is it?

A. G. R. 72, 1889, yes, sir.

Q. These are papers of the same nature as those quoted and copied from the originals sent to the Engineer Office?

A. Yes, sir.

Judge Advocate: I offer in evidence and read 'Ross and Sanford, Contractors

Savannah, Ga., Dec. 20, 1889.

Lieut. O. M. Carter,

Corps of Engrs. U. S. A.,

Savannah, Georgia.

Dear Sir:—

On July 3rd, 1889, I received (On a/c of jetty work at Brunswick Ga.) cheque No. 139164, on U. S. Asst. Treasurer, at New York, for \$3,929.95. In forwarding the same (through the mail) from here to New York, it was lost, consequently, I have received no benefits from it. I respectfully ask that

I be reimbursed for same by duplicate check or 1064 otherwise, and oblige,

Very truly yours,

CHAS. C. ELY."

First indorsement, U. S. Engineer Office, Savannah, Ga., December 20, 1889.

Respectfully forwarded to the Treasurer of the United States, Washington, D. C.

I am unauthorized to issue duplicate cheques for sums exceeding in amount \$2,500, and respectfully request that such steps as may be necessary to secure a compliance with Mr. Ely's request, contained in within letter, may be taken.

O. M. CARTER,

1st. Lt. Corps of Engrs. U. S. A.

G. R. 72, '89."

Judge Advocate: I find here the original letter of Mr. Ely, and these are the indorsements after the indorsement of Capt. Cartee, which has been read. The indorsement of the 'Treasury of the United States.

December 26, 1889.

Respectfully referred to the Secretary of the Treasury.
Writer so advised J. N. Huston.

Treasurer U. S.

Treasury Department,

December 28, 1889.

Respectfully returned to O. M. Carter, Lieut. U. S. Engineer Corps, Savannah, Ga., with the information that, unless he chooses to issue a second original check, for the amount in question, at his own risk and upon his own authority, it will be necessary for the party in interest to apply to Congress for relies, or await the expiration of three fiscal years 1065 from the date of lost check, when, if the check is still outstanding and unpaid, its amount will be covered into the Treasury to the credit of the appropriation, 'Outstanding liabilities', and to the personal credit of the payee, under the provisions of Section 306, revised statutes of the United States, and be then subject to claim under the provisions of Section 308, Revised Statutes, copy herewith.

It is the practice of United States disbursing officers to issue two checks in payment of one voucher of this amount, in order to bring the amounts of checks within the limit prescribed by law for the issue of duplicates.

GEORGE S. BATCHELLER,

Assistant Secretary.

Mr. Blair: You say you have the original letter of Mr. Ely?

Judge Advocate: Yes, sir.

Mr. Blair: Did you read the letter head, Ross & Sanford?

Judge Advocate: I did read the letterhead. That contains a printed circular from the Treasury Department, containing the same information that that indorsement conveys. (Meaning G. R., 72, 1889)

Q. Is G. R. 46, also here?

A. Yes, sir.

Judge Advocate: This is an Act of Congress, directing the issue of a duplicate of a lost check, drawn by O. M. Carter, Lieutenant United States Engineer Corps, in favor of Charles C. Ely, (Reading)

"Whereas, it appears that O. M. Carter, Lieutenant Engineer Corps, United States Army, did, on the third day of July, eighteen hundred and eighty nine, issue a check Numbered one hundred and thirty nine thousand, one hundred and

sixty four, upon the Assistant Treasurer of the United States, at New York, in favor of Charles C. Ely, for the sum of 1066 three thousand, nine hundred and twenty nine dollars and ninety five cents, in payment of contract work done at Brunswick Georgia, which check is alleged to have been lost in transmission through the United States mails, by Benjamin D. Green, of Philadelphia, Pennsylvania, to whom it had been assigned; and;

Whereas, The Provisions of the Act of February sixteenth, eighteen hundred and eighty five, amending Section thirty six hundred and forty six, Revised Statutes of the United States, authorizing United States disbursing officers and agents to issue duplicates of lost checks, apply only to checks drawn for two thousand five hundred dollars or less; therefor,

Be it Enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That said Lieutenant O. M. Carter be, and he is hereby, instructed to issue a duplicate of said original check, under such regulations in regard to its issue and payment as have been prescribed by the Secretary of the Treasury for the issue of duplicate checks, under the provisions of Section thirty six hundred and forty six, Revised Statutes of the United States.

Approved June 13, 1890

Judge Advocate: Indorsed:

State Department. Furnishes duplicate of a certified copy of Public Act No. 155, approved June 13, 1890, directing the issue of a duplicate of a lost check, drawn by Lieut. O. M. Carter, for \$3,929.95, in favor of Chas. C. Ely, in payment for work done at Brunswick, Ga.

First Indorsement.

June 24, 1890.

Respectfully forwarded to Lieut O. M. Carter, Corps of Engineers, for his information. To be returned, By command of Brig. Gen. Casey,

THOS. TURTLE,
Captain Corps of Engrs."

1067 Second Indorsement.

United States Engineer Office,
Savannah, Ga. June 28, 1890.

Respectfully returned to
The Chief of Engineers, U. S. A.
Washington, D. C.

Record made
1st, Lieut. Corps of Engrs U. S. A.

Judge-Advocate: I offer in evidence (Reading)
"Treasury Department,
Office of the Secretary,
Washington, D. C., July 14, 1890.

O. M. Carter,
1st Lieut. U. S. Engineers,
Savannah, Ga.

Sir:

I have the honor to inform you that the duplicate of check No. 139164, drawn by you July 3, 1889, upon the Assistant Treasurer of the United States at New York, in favor of Chas. C. Ely, for \$3,929.95, has been approved payable to Benjamin D. Green, and in compliance with a request contained in a letter addressed to this Department by Mr. Green, on the 9th instant, the check has been this day been sent to the Assistant Treasurer at New York, to be held by him until Mr. Green's return from Europe.

Respectfully yours,
GEO. S. BATCHELLER,
Assistant Secretary.

Q. What are these, Mr. Sterly?

A. These are proposals of the Atlantic Contracting Company for improving the Altamaha River, opened in Savannah the 19th of November, 1892; the proposals from the Atlantic Contracting Company for improving Brunswick Harbor, Ga., opened March 4, 1893, and the proposal of the Atlantic Contracting Company for improving Darien Harbor, Ga., opened Nov. 29, 1892.

Q. Will you look at each one of those proposals and tell the Court in whose handwriting they are filled out?

A. The proposal for the improvement of Darien Harbor has been filled out by two different persons.

Q. Describe the extent to which the writing of two different persons appears.

A. The prices appear to be the same; the prices appear to have been filled out by John F. Gaynor, and the balance of the proposal by Mr. Connolly.

Q. That is in which contract?

A. In the contract for Darien Harbor.

Q. Now, take the next contract, how about that?

A. That is a proposal for improving Brunswick Harbor; the prices are filled out by John F. Gaynor; the other writing I don't know.

Q. How about the next one?

A. That is a proposal for improving Altamaha river; partly filled out by John F. Gaynor, the prices are filled out by him, but I don't know the other writing.

Q. Take that first one that you testified was written by Mr. Connolly and Mr. Gaynor, and read to the Court Paragraph 14.

A. Paragraph 14,—“Proposals must be prepared without assistance from any person employed in or belonging to the military service of the United States, or employed under this office.”

Judge-Advocate: I don't think it is necessary to attach this to the record; I simply want that fact drawn out.

Q. Mr. Connolly was employed in the office of the date 1069 of these contracts, was he not?

A. Yes, sir.

Q. Mr. Sterly, you have been preparing a compilation containing a detailed statement of the work done in this engineering district, under certain contracts, will you please bring it out? (I will furnish counsel for the defense with a blue print of this, have already). What is that?

A. This is a statement which I made up from the official record giving the name of the bidders, the work, the date of opening the bids, the quantities to canvas bids, prices of bidders, the total amount of bid, proposals, guarantors and amount, date, bond, date of the contract, the sureties and amounts and names of the contract, the quantities used, the amount earned, and superintendents, in each contract prepared under Capt. Carter. This is for only such contracts as relate to stone and brush or fascines and mattress work, not for dredging.

Q. These are for the contracts made by contractors when Capt. Carter was in charge, only?

A. Yes, sir.

Q. You said they are made up from the official records of your department, how about the superintendence, was in behalf of contractors,—was that made up from your records?

A. No, sir, it was not, I got the information from Mr. Cooper.

Q. Then with the exception of the entries in that column, everything there is from the official records of the department?

A. Yes, sir.

Q. Do the records of the office show every superintendent on behalf of the Government on the work?

A. Yes, sir.

Q. Every one that is there named?

A. Yes, sir.

Q. What is the meaning under that column of 'quantities used to canvas bids'?

1070 Q. By that is meant the quantities which the contractor is expected that will be used in the work, and it is also used for computing the bids to see which bid is the lowest.

Q. It is the basis on which contracts are awarded?

A. Yes, sir.

Q. Prices are given on each material bid for, and then canvassed on the basis that that is the amount that will be required in the work?

A. Yes, sir.

The President: Taken from the specifications?

A. Yes, sir.

Q. Are all bidders shown these who bid on the work?

A. Only those bidders who bid on the mattresses and on stone work and brush work.

Q. What are these red figures in this left hand column?

A. The red figures relate to the contracts arranged as to dates.

Q. That is at that point arranged by dates, numbering consecutively down that column?

A. Yes, sir.

Q. Take that contract No. 1 for 1889 for Savannah Harbor, now how many square yards of mattresses were used to canvas bids?

A. 1,000,000 square yards.

Q. How many were actually used?

A. One hundred and six thousand, nine hundred and twenty eight and decimal seven.

Q. What per cent is that an increase?

A. About 7 per cent.

Q. You have made a calculation on each of these, have you not?

A. Yes, sir.

Q. How many cubic yards of fascine were used to canvas bids?

A. None.

Q. How many were used?

1071 A. There were used 3,291.13.

Q. I am referring to No. 1, Mr. Sterly.

A. Yes, sir.

Q. 3,291.01?

A. 3,291.13.

Q. Was there a supplemental contract?

A. Yes, sir, there was a supplemental contract.

Q. How many cubic yards were used to canvas the bid of rock?

A. 25,000 cubic yards of rip rap rock.

Q. How many were actually used?

Q. 11,682.84.

Q. What per cent is that a decrease?

A. 53 per cent.

Q. Who was the contractor?

A. The contractor was W. T. Gaynor.

Q. Now take contract No. 3, what is its date?

A. May 31, 1889.

Q. Who was the contractor?

A. Charles C. Ely.

Q. What was the work to be done?

A. Jetty work in Brunswick harbor?

Q. What amount of brush fascine was used to canvas bids?

A. 3,500 cubic yards of fascine.

Q. What was actually used?

A. 6033.24.

Q. What per cent increase is that?

A. Seventy per cent.

Q. How much rock to canvas bids?

A. 2,500 cubic yards.

Q. How much do you find used?

A. 988.78.

Q. A decrease of what per cent?

A. Of sixty per cent.

1072 Q. Take contract No. 4, what is that?

A. That is a contract in Savannah river.

Q. Under what date?

A. Under date of 13th, Sept., 1889.

Q. How many cubic yards of fascine to canvas bids?

A. 2,000.

Q. How many actually used?

A. 4572.93.

Q. What per cent is that of increase?

A. 128.

Q. How much rock to canvas?

A. One thousand cubic yards.

Q. And the amount used?

A. 1,158.57.

Q. Never mind the decimals, an increase of what per cent?

A. 16 per cent.

Q. Who was the contractor?

A. William T. Gaynor.

Q. Now, take No. 5, what is that?

A. Contract No. 5 is a contract with John F. Gaynor for work in Savannah harbor, dated Nov. 5, 1890.

Q. What quantity of mattress to canvas the bid?

A. 50,000 square yards.

Q. And the amount used?

A. 72,178.

Q. An increase of what per cent?

A. Of 44 per cent.

Q. What quantity of fascines to canvas?

A. 40,000.

Q. 40,000 what?

A. Cubic yards.

Q. And the amount used?

A. 54,894.

1073 Q. An increase of what per cent?

A. An increase of 37 per cent.

Q. How much rock was used to canvas bids?

A. 38,000 cubic yards rip rap stone.

Q. And the amount used?

A. 29,583.

Q. A decrease in the amount of rock of what?

A. Of 23 per cent.

Q. Now, this contract, No. 6, whose contract was that?

A. That was the contract of John F. Gaynor, for work at Brunswick Harbor and Jekyl Creek.

Q. What date?

A. Under date of March 2, 1891.

- Q. How many square yards of mattress to canvas?
A. 2,500.
Q. And used?
A. 2,282.
Q. A decrease of what?
A. Of ten per cent.
Q. And in the fascines to canvas, what amount?
A. 6,000 cubic yards.
Q. And the amount used?
A. 8,004 cubic yards.
Q. An increase of what per cent?
A. Of 33 per cent.
Q. What amount of rock was used to canvas bids?
A. 3,000 cubic yards of rock.
Q. How much was used?
A. 2,074 cubic yards.
Q. Being a decrease of what per cent?
A. Of 32 per cent.
- 1074 Q. Now, take contract No. 7, who was the contractor?
A. John F. Gaynor.
Q. What was its date?
A. May 4, 1891, for work at Cumberland Sound.
Q. What amount of brush mattresses were used to canvas the bid?
A. 50,000 square yards.
Q. What amount was used?
A. 61,528.
Q. An increase of what per cent?
A. Of 22 per cent.
Q. How much rock was used to canvas?
A. 17,000 cubic yards.
Q. How much actually used?
A. 11,812.31.
Q. A decrease of what per cent,—have you not got that figured out there?
A. No, sir.
Q. Never mind, we wont stop for the figuring, take contract No. 9, whose contract is that?
A. That is a contract of John F. Gaynor.
Q. What date and what for?
A. Date of Sept. 9, 1891, for work at Savannah river.
Q. Take No. 17, what is that?
A. That is a contract with Albert J. Twiggs, for Savan-

nah river, under date of July 5, 1893, and a supplemental contract of Nov. 6, 1893.

Q. How does the amount of fascines and rock used to canvas bids in those contracts compare?

A. In both contracts they canvas bids for 7,500 cubic yards of fascines.

Q. How much rock?

1075 A. And for 4,000 cubic yards of rock.

Q. The same used as to both contracts in canvassing the bids?

A. Yes, sir.

Q. Look at Mr. Gaynor's contract, and see how many fascines were actually used?

A. 4,861.

Q. A decrease of what?

A. Of 36 per cent.

Q. Now look at Mr. Twiggs' contract and see how many fascines were actually used?

A. 7,232.

Q. Well, what is the percentage there?

A. That is a decrease of 3 per cent.

Q. How much rock did Mr. Gaynor use?

A. Mr. Gaynor used 3,352 cubic yards.

Q. How much was that a decrease?

A. 16 per cent.

Q. How much did Mr. Twiggs use?

A. Mr. Twiggs used 6,742 cubic yards.

Q. What increase per cent was that?

A. 68 per cent.

Q. Now, you have got a pencil there, work that out another way; how many yards of rock did Mr. Gaynor use to 1,000 yards of fascine?

A. He used 3,352 cubic yards of rock to 4,861 cubic yards of fascines.

Q. How many yards of rock would that make to one thousand yards of fascines.

A. 689 cubic yards.

Q. Do the same figuring in regard to the Twiggs' contract.

A. 932 cubic yards.

Q. What per cent would that be more than used in proportion to the fascines to that used by Mr. Gaynor?

1076 A. 45 per cent.

Q. Now, take contract No. 10, whose contract is that.

A. Edward H. Gaynor's.

Q. What was the work and the date?

A. Sept. 16, 1892, for Cumberland Sound.

Q. How much brush was used to canvas the bid under that contract?

A. 80,000 square yards.

Q. How much was used of the brush?

A. 107,735.

Q. What per cent is that an increase? Well, state it roughly, it is about 33 per cent.

A. 34 per cent.

Q. Well, how much was used to canvas the rock bid?

A. 28,000 cubic yards.

Q. How much was used?

A. 13,684.

Q. A decrease of what per cent?

A. Of 51 per cent.

Q. Now, take contract No. 11, what is that contract generally called?

A. That is the big contract, the contract the Atlantic Contracting Company people call the "Big Contract."

Q. What is the date?

A. Oct. 22, 1892, for Savannah Harbor.

Q. That was the first continuous contract let, was it not Mr. Sterly, or do you know?

A. That was the first continuous contract.

Q. Now, what quantity of mattress was used to canvas bids in that big contract?

A. 350,000 square yards of mattresses.

1077 Q. And how much was used?

A. 1,363,572 square yards of mattresses.

Q. An increase of what per cent, an increase of how many square yards?

A. Of 1,013,572.

Q. An increase of what per cent?

A. 289 per cent.

Q. That is nearly four times as much as was used to canvas bids?

A. Yes, sir.

Q. That is three times increase?

A. Three, yes, sir.

Q. Well, 288, that is nearly four times as much mattresses were used really as was canvassed?

A. Yes, sir.

Q. Now, what was the basis of canvassing bids for fascines in that big contract?

A. 300,000 cubic yards of fascines were canvassed for.

Q. And used?

A. There were used 208,124.

Q. A decrease of what per cent,—well, how many cubic yards was the decrease, never mind the per cent?

A. 91,876 cubic yards.

Q. Fascines were paid for by the cubic yard?

A. Fascines were paid for by the cubic yard, yes, sir.

Q. Mattresses were paid for by the square yards?

A. By square yards.

Q. What were the different rates, how much for a cubic yard of fascines?

A. Cubic yard of fascines, \$1.60.

Q. And a square yard for mattresses?

A. 95 cents.

Q. How much large rock to canvas in the big contract?

1078 A. 50,000 tons.

Q. How much used?

A. There was none used.

Q. How much small rock or rip-rap to canvas?

A. 200,000 cubic yards.

Q. And how much was used?

A. 127,764 cubic yards.

Q. What was the price of the large rock?

A. The price of the large rock was \$2.60 per ton.

Q. What was the price of the small rock.

A. The price of the small rock was \$2.95 per cubic yard.

Q. What per cent was the decrease in small rock?

A. 37 per cent.

Q. Besides leaving out the large rock entirely?

A. Yes, sir.

Q. Now take contract No. 14?

A. The Atlantic Contracting Company, 0892 Dec. 20, 1892, for Darien Harbor.

Q. Who was the contractor, The Atlantic Contracting Company?

A. The Atlantic Contracting Company.

Q. How many fascines to canvas?

A. 10,000 cubic yards.

Q. And how many used?

A. 15,068.

Q. An increase of what per cent,—well, never mind that, it is apparent that it is about 50 per cent; how much rock was used to canvas?

A. 1,000 cubic yards.

Q. And how much was used?

A. None.

Q. Now, take No. 15?

A. The contractor was the Atlantic Contracting Company.

1079 Q. What date?

A. March 1, 1893, for Jekyl Creek, Water Way, between Savannah and Fernandina.

Q. What amount of mattresses to canvas bids?

A. 9,000 square yards of mattresses.

Q. How much mattresses used?

A. 17,171.—square yards of mattresses.

Q. What per cent of that is an increase?

A. 9 per cent, 90 per cent.

Q. How much rock was used to canvas?

A. 3,000 cubic yards.

Q. And what amount was used?

A. 1,253 cubic yards.

Q. If you have not got the percentage already made, never mind that, now take No. 18, what is that?

A. The contract of Ansom M. Bangs, of the date of Nov. 15, 1894 for Cumberland Sound.

Q. What was the basis of bids on mattresses there to canvas?

A. 50,000 square yards.

Q. And what was the amount used?

A. The amount used was 213,334.

Q. That is over 4 times as much as was canvassed?

A. Yes, sir.

Q. How much rock was used to canvas the bid?

A. 30,000 cubic yards.

Q. And how much used?

A. 18,748 cubic yards.

Q. Take contract No. 19?

A. Contract with W. T. Gaynor, of the 20th, of April, 1895, for Altamaha river, Darien Harbor, Jekyl Creek and Water way.

Q. Who was the contractor?

1080 A. William T. Gaynor.

Q. What was the amount of mattresses used to canvas the bids?

A. 7,000 square yards.

Q. And what used?

A. 10,903 square yards.

Q. What was the amount of fascines to canvas?

A. 8,000 cubic yards.

Q. Cubic yards, and how much used?

A. 13,213 cubic yards.

Q. How much rock was used to canvas?

A. 7,000 cubic yards of rock.

Q. What was used?

A. 2,657 cubic yards.

Q. What is contract No. 19?

A. Contract, No. 19.

Q. It was simply the amount of rock used?

A. The rock used, 2,657 cubic yards.

Q. Now take contract, No. 20, what is that?

A. Contract No. 20, is the contract with the Atlantic Contracting Company of October 8, 1896 for Savannah Harbor.

Q. Now, what was the basis of canvassing bids as to mattresses under that contract?

A. 200,000 square yards of mattresses.

Q. When did work begin under that contract?

A. Work began on the 12th, of Jan. 1897.

Q. How much has already been used of mattresses?

A. I gave the wrong date; work began on the 3d, of Dec. 1896.

Q. Now, how much has been used of the mattresses under that contract? You have testified there were 200,000 square yards used to canvas bids; now how much has been used so far as the work has gone?

A. 255,830 square yards of mattresses.

1081 Q. Up to what date?

A. Up to July 31, 1897.

Q. Do you know how many linear feet of breakwater is yet to be constructed?

A. 1,000.

By a member: What work is this for?

Judge Advocate: This is for Savannah Harbor, the present contract for Savannah Harbor.

Q. How wide were the mattresses used in the breakwater?

A. 100 feet wide.

Q. How many feet have already been constructed?

A. About 7,000 feet.

Q. And how many courses high?

A. Three courses high.

Q. Taking 3 courses, 100 feet wide for a distance of 1,000 feet, gives how many square yards?

A. 33,333 square yards.

Q. That is the number of yards it would take to complete the breakwater, as started, is it?

A. Yes, sir.

Q. How much rock has been used to sink those 250,000 square yards of brush mattresses?

A. 21,729 cubic yards up to July 31, 1897.

Q. Now take contract No. 21, what is that?

A. 21 is the contract with the Atlantic Contracting Co. of Oct. 8, 1896, for Cumberland Sound.

Q. That is the present contract?

A. Yes, sir.

Q. Look at Capt. Carter's project of June 12, 1895?

By a member: How much rock was canvassed for getting that last contract, No. 20, rock?

Judge-Advocate: 200,000 square yards of mattresses.

1082 By a member: Of rock—21,729 delivered, how much was canvassed?

A. There was canvassed 25,000 cubic yards of first class stone, 25,000 cubic yards.

Judge Advocate: It is already in evidence that the bids upon first and second class stone, were by the ton of 2,000 pounds; third class stone and fourth class stone per cubic yard.

Q. Now, what was the basis there for rock?

A. First class rock, 25,000 tons; second class rock, 25,000 tons, third class rock, 50,000 cubic yards and fourth class rock, 100,000 cubic yards, and there were used 21,729 cubic yards, of fourth class rock.

Q. And how much, was any used of the first and second class under the existing contract?

A. No, sir.

Q. Now, we will go back to No. 21, that we were considering; I understood you that there was none of the first, second and third classes used?

A. There was for Savannah Harbor only fourth class rock used.

Q. Now, we will go to contract No. 21?

A. The contract with the Atlantic Contracting Company.

Q. You have got that, now I ask you to look at Capt. Carter's project of June 30, 1895.

The President: You made a mistake in giving the amount of stone as 200,000 tons of stone.

Judge Advocate: He has just read as to the stone.

The President: Yes, but I think he made a mistake there.

Judge Advocate: In what way?

The President: He has called that from the specifications. (You referred to the specifications in making that out? (To Witness—

Witness: Yes, sir.

1083 The President: These are specifications for Cumberland Sound?

Judge Advocate: This is Savannah Harbor.

The President: You were on Savannah Harbor a moment ago.

Judge Advocate: Yes, sir, but we went back to Savannah Harbor by request of Major Stanton; we are now upon Cumberland Sound.

Q. What is the estimate of Capt. Carter's project, June 30, 1895?

A. 425,000 square yards of brush mattresses.

Q. And the amount of rock?

A. 300,000 cubic yards of second class stone.

Q. And how much of the large stone?

A. 125,000 cubic yards of first class stone.

Q. Third class stone?

A. First class stone.

Q. Now refer to the table, how many square yards of mattresses were used to canvas?

A. 200,000 square yards.

Q. How does that compare with Capt. Carter's estimate in his project, just referred to?

A. 225,000 square yards less.

Q. And of rock to canvas?

A. 50,000 of the first class, 75,000 tons of the second class, 100,000 cubic yards of the third class and 250,000 cubic yards of the fourth class.

Q. A total of 125,000 tons of the first and second class, and of 350,000 cubic yards of the third and fourth class?

A. Yes, sir.

Q. How many square yards of brush mattresses were used up to July 31, 1897?

A. 446,102 square yards.

1084 Q. How many yards of rock used?

A. 9814 cubic yards.

Q. How many cubic yards of rock was to that to one square yard of mattress?

A. Every 45 square yards of mat received one cubic yard of stone.

Q. Then there was one 45th, of a cubic yard of stone to each square yard of mattress?

A. Yes, sir.

Q. Now, take the contract, No. 1, and read the following items, the name of work, date of contract, name of contractor?

A. Savannah Harbor, William T. Gaynor, Jan. 16, 1889.

Q. The name of the guarantors?

A. B. D. Green, for \$20,000, and Jacob Paulsen for \$20,000.

Q. Name of the sureties and amount?

A. Eli I. Bangs, \$35,000, Edward Gaybor, \$35,000.

Q. Now, the total amount of the bid?

A. \$168,550.00

Q. How much has been paid on it?

A. \$109,753.76.

Q. Now, contract No. 2, and give me the same information?

A. Contract No. 2, Ansom M. Bangs, Jan. 31, 1889, Cumberland Sound, guarantor Eli I. Bangs, for \$20,000, Edward Gaynor for \$20,000, and the contractor's bond for \$30,000, Eli Bangs for \$30,000 and Edward Gaynor for \$30,000.

Q. The amount of the bid?

A. The amount of the bid is \$123,500.00.

Q. How much has been paid on that?

A. \$95,939.92.

Q. Now, take No. 3,

A. Charles C. Ely, May 31, 1889, Brunswick Barbor, amount of bid, \$13,215, the guarantors are Jacob Paulsen for \$3,000 and W. F. McCaully for \$3,000, the contractor's
1085 bond is for \$4,000, the sureties and amount, Jacob Paulsen, \$4,000 and John F. Gaynor, \$4,000; the amount paid, \$11,456.28.

Q. Now, take No. 4?

A. William T. Gaynor, Sept. 13, 1889, for Savannah river, the total of the bid \$4,400, the guarantors and amount are, Eli T. Bangs, for \$2,000, and John F. Gaynor for \$2,000; the contractor's bond for \$1,800, the sureties and amount, John

F. Gaynor, \$1,800, Eli T. Bangs, \$1,800, and the amount paid \$5,587.31.

Q. Now give me No. 5.

A. Contract No. 5, John F. Gaynor, Nov. 5, 1890, for Savannah Harbor, the total of the bid is \$227,500, the guarantors are B. D. Green for \$50,000, and Jacob Paulsen, \$50,000; the contractor's bond is for \$75,000; sureties and amount, B. D. Green, \$75,000, Jacob Paulsen, \$75,000; the amount paid, \$245,850.57.

Q. Now, take No. 6?

A. John F. Gaynor, March 2, 1891, Brunswick Harbor and Jekyl Creek, the total of the bid is \$21,270, the guarantors and amount, Ansom M. Bangs, \$10,000, William F. McCaully, \$10,000, the contractor's bond is \$15,000, sureties and amount, William F. McCaully, \$15,000, and B. D. Green, \$15,000; the total \$21,944.60.

Q. That is the amount paid?

A. That is the amount paid.

Q. Now, give me No. 7.

A. Contract No. 7, John F. Gaynor, May 4, 1891, for Cumberland Sound, the total of the bid, \$107,830, the guarantors and amounts, B. D. Green, \$50,000, Henry Berg, \$50,000, the contract, bond \$75,000, sureties and amounts, B. D. Green, \$75,000, and Anson M. Bangs, \$75,000, the amount paid, \$100,908.05.

Q. Now, take No. 8.

A. William H. Walsh.

Q. The date of the contract?

1086 A. July 20, 1891, jetties at Fort Clinch Fla., total of bid, \$15,004, the guarantors and the amounts, the proposal, of Charles C. Ely, \$5,000, and W. F. McCaully, \$5,000, the bond is for \$7,500, sureties and amount, W. F. McCaully, \$7,500, Charles C. Ely, \$7,500, the amount paid is \$11,899.71.

Q. Now, No. 9.

A. John F. Gaynor, Sept. 9, 1891 for Savannah river, the total of the bid is \$18,915, the guarantors and amounts, William H. Ray, \$5,000, John H. Gaynor, \$5,000, the bond is for \$10,000, sureties and amounts, B. D. Green, \$10,000, Thomas F. Gaynor, \$10,000, the amount paid \$15,289.34.

Q. No. 10?

A. William T. Gaynor, Sept. 16, 1892, Cumberland Sound, the total amount of the bid is \$184,520, the guarantors and amounts, B. D. Green, \$75,000, William T. Gaynor, \$75,000.

Q. What is the note there, is there is one, as to the sureties on the contract?

A. That B. D. Green and William T. Gaynor are also on the bond for Savannah Harbor and Cumberland Sound at the same time.

A. Now look at No. 11?

A. The Atlantic Contracting Company, Oct. 22, 1892, Savannah Harbor, the total of the bid if \$1,686,500; the guarantors and amount Anson M. Bangs, \$375,000, William T. Gaynor, \$375,000, The bond is for \$500,000; the name of the sureties and amounts, William T. Gaynor, \$300,000, B. D. Green, \$350,000, Anson M. Bangs, \$350,000, the amount earned is \$2,110,869.53.

Q. Is there a note there as to the sureties?

A. Yes, sir.

Q. What is the note?

A. B. D. Green and Wm. T. Gaynor, on bond for Savannah Harbor and Cumberland Sound at the same time.

1087 Q. For what amount in each bond?

A. B. D. Green is on Savannah Harbor for \$350,000, and on Cumberland Sound for \$100,000, William T. Gaynor is surety on Savannah Harbor for \$300,000, and for Cumberland Sound, \$100,000.

Q. Look at Contract 10, and give me the amounts there.

A. \$162,245.88.

Q. Now, give me No. 12.

A. William H. Walsh, October 24, 1892, Savannah river, above Augusta; the total of the bid is \$9,950; the guarantors and amounts, H. M. C. Smith, \$5,000, and Jacob Paulsen, \$5,000. The bond is for \$10,000, sureties and amount, William H. Ray, \$10,000, Charles C. Ely, \$10,000, the amount earned, \$9,421.68.

Q. Now, take 13.

A. The Atlantic Contracting Company, Dec. 20, 1892, for Altamaha river, the total of the bid, is \$9,090, the guarantors and amounts, Elton A. Smith, \$5,000, William H. Ray, \$5,000, the bond for \$10,000 name or sureties and amounts B. D. Green, \$10,000, William T. Gaynor, \$10,000.

Q. The amount paid?

A. The amount paid \$11,840.95.

Q. Now take No. 14?

A. The Atlantic Contracting Company, Dec. 20, 1892, for Darien Harbor, the total amount of the bid \$15,185, the bond

is for \$20,000, sureties and amount, B. D. Green, \$20,000, William T. Gaynor, \$20,000, the amount paid, \$23,433.98.

Q. Now take No. 15.

A. The Atlantic Contracting Company March 1, 1893, Jekyl Creek and Water Ways between Savannah and Fernandina, the total amount of the bid is \$19,680, the guarantors and amounts are Edward H. Gaynor, \$10,000, W. H. Ray, \$10,000; the bond is for \$15,000, the name of sureties and amount, \$XX Anson M. Bangs, \$15,000, Eugene Hughes, 1088 \$15,000, the amount paid, is \$21,495.78.

Q. Now take No. 16.

A. The Atlantic Contracting Co., March 20, 1893, Brunswick Harbor, the total amount of the bid is \$19,070, the name of the guarantors and amounts, William H. Ray, \$10,000, W. F. McCaully, \$10,000, the bond is for \$15,000, the sureties and amounts are Ansom M. Bangs, \$15,000, Eugene Hughes, \$15,000, the amount paid \$16436.93.

Q. Take 17.

A. Albert J. Twiggs, July 5, 1893, total amount of the bid, \$12,510, the guarantors and amounts, are Jesse Thompson, \$15,000, William H. Numberger, \$15,000, the contractor's bond is for \$20,000, the sureties and amounts are Jesse Thompson, \$20,000, William H. Nunberger, \$20,000, amount earned \$17,083.59.—The contractor earned \$13,170.78, and the United States, \$3,912.81, which gives the total of \$17,083.59, deducted from contractor for mileage, superintendence, hire of men, purchase of material, \$7,185.18, amount paid contractor, \$9,898.41.

Q. Look at No. 18.

A. Ansom M. Bangs, Nov. 15, 1894, for Cumberland Sound, the total amount of the bid is \$88,500, guarantors and amounts, John F. Gaynor, \$75,000, William T. Gaynor, \$75,000, the contractor's bond is for \$100,000, sureties and amounts, William T. Gaynor, \$100,000, and Edward H. Gaynor, \$100,000, and the amount paid \$159,097.10.

Q. How much was that bid?

A. The bid was \$88,500.

Q. How much paid?

A. \$159,097.10.

Q. Give me No. 19.

A. William T. Gaynor, April 20, 1895, Altamaha 1089 River, Darien Harbor, Jekyl Creek, and Waterway, the total of the bid was \$48,000, the proposal guarantors and

amounts, John F. Gaynor, \$40,000, Edward H. Gaynor, \$40,000, the bond is for \$40,000, the sureties and amounts \$ John F. Gaynor, \$40,000, Wm. H. Gaynor, \$40,000, the total amount paid \$45,590.13.

Q. Look at No. 20.

A. The Atlantic Contracting Co., Oct. 8, 1896, for Savannah Harbor, the total amount bid \$835,000, guarantors and amounts are Eli I. Bangs, \$250,000, and Eugene Hughes, \$250,000. Anson M. Bangs and John Hughes, are sureties on Cumberland Sound contract of Oct. 8, 1896, for \$500,000 each.

Q. What is the name of the sureties?

A. Ansom M. Bangs and Eugene Hughes. The contractor's bond is \$500,000, sureties and amount, of Savannah Harbor, Ansom M. Bangs, for \$500,000, and Eugene Hughes for \$500,000, the amount paid is not filled out as the contract has not been finished.

Q. Give me No. 21.

A. 20, The Atlantic Contracting Co., Oct. 8, 1896, for Cumberland Sound, the total amount of the bid, \$2,141,250, the guarantors and amounts, Eli I. Bangs, \$250,000, Eugene Hughes, \$250,000, the bond is for \$500,000, the sureties and amounts, Anson M. Bangs, \$500,000 and Eugene Hughes, \$500,000.

Q. Any note there?

A. Ansom M. Bangs and Eugene Hughes are also sureties on Cumberland Sound contract of Oct. 13, 1896.

Q. The amount paid is not carried out as to that contract?

A. No, sir.

Q. The contract has not been completed.

Here the Court at 2.50 o'clock p. m. adjourned until tomorrow morning, Feb. 5th, at 11 o'clock.

THOMAS F. BARR,

Col. & Asst., Judge Adv. Gen'l, Judge Advocate.

United States Court Room,
Savannah, Ga.,
February 5th, 1898.

Court met pursuant to its adjournment of yesterday at 11.04 o'clock a. m.

Present: All the members of the Court and the Judge-Advocate.

The accused, his counsel, and the reporter, W. O. Tarver, were also present.

The President: The Court will come to order.

Judge-Advocate: May it please the Court, I wish to interrupt the examination of Mr. Sterly for a short time, to place a witness on the stand, the Chief Clerk of the War Department, whose duties require that he should return as soon as possible.

JOHN TWEEDALE, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. Please state your full name?

A. John Tweedale.

Q. What is your official position under the government.

A. Chief Clerk of the War Department.

Q. How long have you held that office?

A. Since 1882.

Q. When you became Chief Clerk, and for the period subsequent, what was the practice of the Department in passing upon requests for authority to advertise.

A. The requests come, in accordance with the regulations, to the Chief Clerk of the Department, and then they are submitted to the Secretary of War for his action. The Secretary decides in what papers the advertisement shall be inserted, and gives instructions accordingly, and thereupon approves the request for authority.

1091 Q. Is any other matter submitted to him in connection with that request for authority to advertise?

A. Nothing whatever, but the papers show the intermediate endorsements.

Q. What action, if any, is taken in the Department upon the copy of the proposed advertisement?

A. The copy of the proposed advertisement is merely

looked at, to see whether there are any superfluous words in it. The regulations require that it shall be concise in matter; that is as far as the advertisement is looked at.

Q. The approval of the Secretary given to that request to advertise, how far does it go towards approving the form and dates of the advertisement?

A. That is not considered.

Q. Not at all?

A. Not at all.

Q. To whom is that left,—the question of dates?

A. That is left to the advertising Officer, who knows all about those things; the Department knows nothing about it.

Q. Why is it that the authority of the Secretary of War is necessary to advertise?

A. The law requires it.

Q. Do you recall the statute?

A. If I remember, it is Section 3828 of the Revised Statutes.

Judge-Advocate: I call the attention of the Court to the law found in the Revised Statutes of the United States, Second Edition, 1878, page 749, Section 3828.

(Reading) "No advertisement, notice, or proposal for any Executive Department of the Government, or for any Bureau thereof, or for any office therewith connected, shall be published in any newspaper, except in pursuance of a written authority for such publication from the head of such Department; and no bill for any such advertising, or publication, shall be paid, unless there be presented, with such bill, a copy of such written authority."

Q. In passing upon a request for authority to advertise, and submitting it to the Secretary of War, if the proposed advertisement bore a date prior by four or five weeks to the date on which you submitted it to the Secretary, would that date be a factor in passing upon the question?

A. Not at all.

Q. It would not matter what the date was?

A. No.

Q. Nor how long anterior to the date submitted?

A. No, sir.

Judge-Advocate: I submit to the witness a request of the accused, under date of June 4, 1896, for authority to advertise, inviting proposals for constructing jetties in Cumberland Sound, Georgia.

Q. That (handing witness paper) is a communication ad-

dressed to you; that (handing witness paper) is the proposed advertisement that accompanied it; and this (handing witness paper) is a copy of the specifications submitted with the letter. That is Exhibit No. 50. You note the date of approval is August 15, 1896, by Secretary of War Lamont; you have noted that fact?

A. Yes, sir; I have seen that.

Q. And that the advertisement has the date of June 6th?

A. Yes, sir.

Q. That advertisement appears to have been acted upon as to its contents in what way? Please state.

A. The approval of the Secretary of War was only to authorize the officer, Capt. Carter, to insert the advertisement in the newspapers designated in the letter. The dates that are fixed here, of course, hadn't anything to do with the approval of the Secretary of War.

Q. You see some changes made in the form of the advertisement; what are those changes?

A. These are superfluous words that are crossed out in accordance with the regulations: "U. S. A., All, Corps." They were regarded as superfluous and stricken out in order to reduce the cost of advertising.

A. Do you remember when the specifications were submitted to you?

A. At the same time.

Q. The same file number?

A. The same file number; inclosure 2 of that paper.

Q. Look at the change of dates there.

A. "Savannah, Ga., Aug. 29, 1894. Aug. 29, 1894," is stricken out, and "June 6, 1896," inserted. The "6" is written in black ink, and the balance in red ink.

Q. Was that in that shape when it passed through your office?

A. There is nothing on these specifications to indicate whether it was or not. I would say, from my knowledge of such things, that the changes were not made in the office of the Secretary of War.

Cross-Examination by Mr. Blair.

Q. Will you say that the changes just referred to were not made in the War Department in Washington?

A. I can only speak for the office of the Secretary of War.

Q. Will you say they were not made there?

A. I would say that, from my knowledge, of what they do in the office of the Secretary of War that it would be a very extraordinary thing to make these changes in the specifications in the office of the Secretary of War.

Q. You would not say they were not made by the Chief of Engineers?

A. I would not.

Q. In this form of advertisement, which you have inspected, and concerning which you have testified that 1094 certain words were stricken out,—where were those words stricken out?

A. They might have been stricken out in the office of the Chief of Engineers, or in the office of the Secretary of War.

Q. You cannot say which?

A. I could not say.

Q. What was the advertisement authorized to be printed by Capt. Carter in the War Department?

A. The advertisement the Secretary of War authorized to have printed was authority for Capt. Carter to advertise for bids for constructing jetties at Cumberland Sound. The details, of course, of that advertisement were left to him.

Q. To whom?

A. To Capt. Carter.

Q. Why, then, were those words stricken out?

A. "United States, Corps," and "All."

Q. Yes.

A. Because the regulations require that the advertisement shall be concise and shall have no superfluous words.

Q. Suppose Capt. Carter had recast that whole advertisement,—put in into different language, but conveying practically the same meaning, would that have been authorized?

A. I think it would, unless he had made the advertisement so long that it would have been more expensive.

Q. Is there any regulation or instruction from the War Department authorizing district engineers to change portions of advertisements after they have come back?

A. I cannot testify to that; that would be a matter of regulation in the engineer department.

Q. Is there any regulation authorized by the Secretary of War, that you know of, which permits or directs, district engineers to change the wording in any part of an advertise-

ment which has come back to him through the Secretary of War?

1095 A. So far as I know, there is no regulation authorizing that.

Q. Or directing him to do it?

A. There is no regulation preventing him, or directing him to do it.

Q. Then the authority for him to recast, or change, any portion of that advertisement is merely an implied, and not a written, one?

A. The officer is required by his commission to do everything necessary for the benefit of the service, and the obligation rests upon him.

Q. Then the authority to change an advertisement after it has been approved by the Secretary of War is based solely upon the general duty of the officer to conserve the interest of the Government?

A. Yes, sir.

Q. And not upon any special regulation, written or printed?

A. No; there is no specific regulation requiring how he shall word an advertisement, except that he shall omit superfluous words and make it concise, and of course, it is his duty to see that the advertisement is correct.

Q. Then when it comes back to him in that form, there is no written or printed authority expressly authorizing him to make any change?

A. As far as I remember, I don't think there is.

Q. This regulation, or custom, as to advertisements, which you have testified to,—the whole matter of advertisements,—were they substantially the same from 1882 down to the present time?

A. Substantially from 1882 down to the present time. There were some slight changes where required by subsequent legislation.

Q. It does not affect anything to which you have testified this morning?

1096 *Re-direct Examination by the Judge-Advocate.*

Q. Is the date any part of the advertisement?

A. Not so far as the approval of the Secretary of War is concerned.

Questions by a member of the Court.

Q. Suppose an advertisement was sent by a district engineer to the War Department with the date of advertisement and the date of opening the bids inserted, and it received the approval of the Secretary of War, and came back to the district engineer, and it was manifest from the date of the opening of the bids which that advertisement bore, that there was not a sufficient length of time intervening between the first insertion of the advertisement in the newspapers and the date of the opening of the bids,—what would be the responsibility and duty of the district engineer in regard to that matter?

A. The regulation provides that he shall give 30 days' notice, and, if the advertisement when it came back to him,—if the dates were such that there would not be 30 days' notice, it would be his duty to comply with the regulations, and give it the notice required by the regulations.

Q. In what way?

A. He would have to change the dates in the advertisement. The Secretary of War could not change the dates for the reason that, if he did, there might be a delay in the mails, or from some cause,—and when it got back to the officer, there would not be the 30 days required.

1097 Questions by the Court.

Q. Is it customary for all officers to insert the dates in making their applications for authority to advertise?

A. Sometimes the dates are left blank.

Q. That makes no difference as far as the approval is concerned?

A. No, sir.

Q. Don't consider the dates in any particular in the advertisement?

A. No, sir; don't consider the dates. The Secretary is required to authorize the insertion of the advertisements, and his approval merely authorizes it to be inserted in certain newspapers named by him.

Q. The War Department, then, is governed in this particular by the general regulations of the army?

A. Yes, sir; by the general regulations.

Q. It is a rule then, laid down as a rule, in the paragraphs of the regulations, that in all advertisements for supplies, there shall be a period of thirty days intervening between the first publication of the advertisement and the opening of the proposals, as a rule?

A. As a rule.

Q. Do you adhere to that rule?

A. Yes, sir; except in cases of necessity.

Q. Does the Secretary in approving these advertisements ever find that necessary?

A. No, sir.

Q. Is he presumed to find it in any way?

A. No; he does not. That is a matter for the officer or Chief of the Bureau.

Q. Rests entirely with the officer?

A. Yes, sir.

1098 *Re-Cross Examination by Mr. Blair, with Permission of the Court.*

Q. Does that regulation prescribe that 30 days shall intervene, did I understand you?

A. I will show you the regulation.

Q. (Handing witness book) Paragraph 520 at the top of the page.

A. (Reading) "In cases of large purchases a period of 30 or more days should intervene between date of first publication and of opening proposals. In small purchases, from ten to thirty days should intervene, and when the public exigency (constituting an emergency) does not permit ten days to intervene the period should be for as many days as the circumstances will permit."

A member: I would like to have paragraph 519 read.

Witness: (Reading) "An officer charged with the duty of making a contract or purchase is responsible under the laws and regulations for his action. Permission or orders to make a contract or purchase without inviting competition will not justify the procedure, and will not be given."

The President: You didn't finish the first paragraph you were reading.

Witness: (Continuing to read from paragraph 520) "Advertising for proposals by newspapers, in accordance with Article LIV, will be adopted when time permits, and the quantity or value of the purchase, or character of the services, in the opinion of the purchasing officer, will justify the expense. When notice of less than thirty days is given, advertising by circulars (sent to principal dealers) in the localities where the supplies or services are desired, and posted in public

places, is permissible. A purchasing officer may advertise by newspapers and circulars at the same time."

The Court: Now refer to Article LIV, paragraph 505, taken in connection with that.

Witness: (Reading) "505. Advertisements in newspapers, announcing sales of property or inviting proposals for furnishing labor or supplies, will, as a rule, allow thirty days to intervene between date of first publication and date of sale or opening of bids. If necessity require, a shorter period may be allowed, but no period of less than ten days will be designated except in case of emergency. No officer will authorize the publication of an advertisement beyond the morning of the day on which the sale or opening of bids is to occur, and no payments will be made for continuing such publication beyond the period authorized."

Q. (Mr. Blair continuing examination) These regulations are published by authority of the Secretary of War?

A. By authority of the Secretary of War.

Q. And the Secretary of War may at will, revoke or change any of these regulations?

A. No; the Secretary of War is bound by the regulation until he publishes another regulation amending it. He must publish it; he cannot, in any case that just comes before him, change it.

Judge-Advocate: I will read to the Court the direction accompanying the issue of regulations always, for the regulations of 1895 as well as all previously issued. (Reading)

"War Department, Oct. 31, 1895.

The President of the United States directs that the following Regulations for the Army be published for the government of all concerned, and that they be strictly observed. Nothing contrary to the tenor of these Regulations will be enjoined in any part of the forces of the United States by any commander whomsoever.

DANIEL S. LAMONT,
Secretary of War."

Witness excused.

J. W. O. STERLY, a witness for the prosecution, previously sworn, resumed the stand and continued to testify as follows:

Direct Examination by the Judge Advocate.

Q. You have your chart with you again?

A. Yes, sir.

Q. Referring to contract No. 21 of the table, you testified yesterday that there were 9813 cubic yards of stone used under the present contract at Cumberland Sound, is that correct?

A. There was an error in that statement which I have corrected.

Q. By reference to the public records?

A. Yes, sir.

Q. You have it now correct?

A. Yes, sir.

Q. What is the amount?

A. I omitted to put in this table 11,985.84 cubic yards of fourth class rock, and the rock which was in the column for third class rock I had erroneously put in the column for the fourth class rock.

Q. With the correction, how many cubic yards of rock was used to one square yard of mattress?

A. With the correction, there was $1/20$ of a cubic yard used for every square yard of mattress.

Q. Instead of $1/45$ as you stated yesterday?

A. Yes, sir.

Q. Are there any other corrections?

1101 A. Yes, sir; in contract No. 11.

Q. What is the correction you made there?

A. The cross against the name of W. T. Gaynor should be removed so that the remarks read: "B. D. Green on bond for Savannah Harbor and Cumberland Sound," at the same time omitting "W. T. Gaynor." In contract No. 10, the cross should be removed from "W. T. Gaynor," and the name of the surety changed from W. T. Gaynor to John F. Gaynor. In contract No. 2, the surety Edward Gaynor, should be changed to B. D. Green. I changed on the table, contracts Nos. 20 and 21. I made it distinctive that the first class and second class rock was by tons, and the third and fourth class rock was by cubic yards. In contract No. 14, I had ten

tie piles put in the wrong column. They are put now in the column for "clusters of fender piles." In contract No. 11, I inserted 50,000 lineal feet of pile work in the column of "Quantities to canvas bids." In the "Amounts Used" I inserted "lineal feet" of pile work, 39,548. Those are all the corrections I have found. I have not been able to check all of these prices.

Q. You will check them as soon as you have time?

A. Yes, sir.

Q. Comparing that item by item, with the public records?

A. Yes, sir.

Q. So that you can come before the Court and testify to its absolute accuracy?

A. Yes, sir. I have added in the column of "Superintendence United States," under contract No. 19, the name of E. R. Conant, and T. J. Daniels. I have added under the column "Superintendence Contractors," Contract No. 9, the name of M. F. Wheeler, and I have added to the table the Act of Congress under which the money was appropriated and a column, showing when work was begun and work ended under each contract, with the exception of Savannah Harbor and Cumberland Sound, present contract, which was not then completed.

Judge-Advocate: I want to state to the Court that I have worked Mr. Sterly very diligently, and to a late hour every night, every since my arrival here, and it is not to be wondered at that some trivial errors have crept into a compilation involving so much labor as this.

Q. Read the bidders on contract No. 6.

A. The name of bidders: Charles C. Ely and John F. Gaynor, contract for Brunswick and Jekyl Creek.

Q. Who was the successful bidder?

A. John F. Gaynor.

Q. Was that on contract No. 6?

A. On contract No. 6.

Q. Who are the sureties for Charles C. Ely?

A. Jacob Paulsen for \$10,000, and W. H. Ray for \$10,000.

Q. Who are the bidders on contract No. 8?

A. Edward H. Gaynor and William H. Walsh, for jetties at Fort Clinch.

Q. Who are the sureties for Edward H. Gaynor?

A. John F. Gaynor for \$5,000, and W. H. Ray for \$5,000.

Q. Who are the sureties for William H. Walsh?

A. Charles C. Ely for \$5,000, and W. F. McCaully for \$5,000. They are the guarantors on proposals.

Q. Who are bidders for contract No. 10?

A. Charles C. Ely, William H. Walsh, and Edward H. Gaynor.

Q. Whose are Charles C. Ely's guarantors?

A. Jacob Paulsen for \$75,000, and W. H. Ray, for \$75,000.

Q. Who were W. H. Walsh's guarantors?

A. W. F. McCaully for \$75,000 and Myron J. Wheeler for \$75,000.

Q. Do you know who Myron J. Wheeler is?

1103 A. He was foreman for the Atlantic Contracting Company. He was at one time foreman for John F. Gaynor, on the Augusta work.

Q. Take contract No. 16, who are the bidders?

A. Contract No. 16, Charles C. Ely and the Atlantic Contracting Company.

Q. Take the bids for brush mattresses and stone for Cumberland Sound for 1891; what are the bids?

A. S. W. Skinner and T. E. Wallace, \$1.16 for mattresses per square yard.

Q. How much for rock?

A. \$4.08 per cubic yard.

Q. Who was the other bidder?

A. John F. Gaynor, 97 cents per square yard for mattresses and \$3.49 per cubic yard for rock; P. Sanford Ross, \$1.22 per square yard for mattresses, and \$3.59 per cubic yard for rock.

Mr. Rose: There are two bids on two different kinds of mattresses in that contract; one for log mattresses and the other for brush mattresses.

Q. (The Judge Advocate continuing) Read the bids for log and brush mattress.

A. S. W. Skinner and T. E. Wallace, \$1.20; John F. Gaynor, 99 cents; P. Sanford Ross, \$1.22.

Q. That is the same price that P. Sanford Ross bid for the mattresses?

A. For the mattresses.

Q. Take the contract for 1892.

A. Charles C. Ely, \$1.32 per square yard of mattress, \$3.78 per cubic yard of rock; W. H. Walsh, \$1.26 per square yard of mattress and \$3.72 per cubic yard of rock; Edward

H. Gaynor, \$1.05 per square yard of mattress and \$3.59 per cubic yard of rock.

1104 Q. Now in 1894.

A. Ansom M. Bangs, 57 cents per square yard of mattress, and \$2 per cubic yard of rock; R. G. Ross & Co., 85 cents per square yard of mattress, and \$2.85 per cubic yard of rock; Rittenhouse R. Moore, 90 cents per square yard of mattress and \$2.80 per cubic yard of rock.

Q. How does the bid of R. G. Ross & Co., compare with the bid of the successful bidder two years before?

A. Edward H. Gaynor bid in 1892 for mattress \$1.05 per square yard, and Ross & Co., bid under this contract in 1894 85 cents per square yard of mattress; Edward H. Gaynor bid \$3.59 per cubic yard of rock in 1892, and Ross & Co. bid \$2.85 per cubic yard of rock in 1894.

Q. What are the prices in 1896 per square yard of mattress?

A. The Atlantic Contracting Co., \$1.10 at Cumberland Sound.

Q. How much for rock?

A. First class rock, \$5.25 per ton; second class rock, \$5.25 per ton; third class rock, \$3.90 per cubic yard, and fourth class rock, \$3.50 per cubic yard.

Q. How do the quantity of brush mattresses to be used in 1896 compare with those to be used in 1894?

A. There were to be used in 1896 200,000 square yards of mattress, and in 1894. 50,000 square yards of mattress.

Q. Now compare the quantities of rock.

A. There were to be used in 1894 30,000 cubic yards of rock, and there were to be used in 1896 125,000 tons of rock, and 350,000 cubic yards of rock.

Q. Take contract No. 3 of Charles C. Ely, Brunswick harbor, May 1, 1889; when did the River and Harbor Bill making the appropriation, pass?

1105 A. August 11, 1888.

Judge-Advocate: I shall have to ask the Court for a recess. My stenographer has an exhibit which I wish to use at this point.

At this point, 11.40 a. m. Court took a recess until 12.12 p. m., when Court was called to order, and the examination of the witness continued as follows:

Q. I hand you miscellaneous letter book, No. 5, and on page 160 there is a letter from the accused to the Chief of Engineers, stating that, "The bid of Mr. Howell is informal, being

unaccompanied by guarantee and being made out only in duplicate, and in view of these facts and of the fact that Mr. Howell failed while executing work upon Savannah River some years ago, I do not think his bid should be considered." Is there any evidence on file in the office of the District Engineer in Savannah here that Mr. Howell ever failed on a contract?

A. No, sir.

Q. You have looked for that?

A. Yes, sir.

Q. How many months had that appropriation been available when that contract was made?

A. I don't remember the date of the passage of the Bill, whether it was in August or September, 1888.

Q. You may refresh your memory by looking on this chart.

A. Nine months.

Q. How long did it take to do the work?

A. Two months and six days.

Q. How much was the total of Ely's bid?

A. The total of Ely's bid was \$13,215.

Q. How much was Howell's?

A. \$11,020.

Q. How much less was that than Ely's?

1106 A. \$2,195.

Q. How much was Ely paid on the whole contract?

A. Ely was paid \$11,456.28.

Q. Have you made a computation of how much it would have cost if Howell had been given the contract and had done the same work?

A. Yes, sir.

Q. What would it have cost?

A. Quantities used at Howell's price, \$7,473.34.

Q. Saving to the Government, how much?

A. There is a difference of \$3,982.94.

Q. How many checks were drawn to Charles C. Ely under that contract?

A. There were three checks drawn.

Q. Which one was lost in transmission by B. D. Green?

Mr. Blair: There is no evidence that B. D. Green lost a check.

Judge-Advocate: There is evidence by Act of Congress, that B. D. Green enjoyed the proceeds of it; that the loss was his.

Mr. Blair: The check was lost by the United States in the mail.

Judge Advocate: Yes, but I think the evidence will show that it was lost in transmission by B. D. Green, and that an Act of Congress was made in his behalf, and that he received the proceeds. The Act of Congress is in evidence.

Q. (Judge-Advocate continuing) Look at S. R. page 143.

A. (Witness handed the Judge-Advocate the book and page referred to)

Judge-Advocate: I offer in evidence and read the following:

United States Engineer Office,
Savannah, Ga., Sept. 7, 1891.

1107 Mr. John F. Gaynor,
Fayetteville, N. Y.

There are sent you herewith, for execution and prompt return by registered mail, articles of agreement in quintuplicate and bonds in triplicate for work of repairing and constructing wing-dams and shore protection in the Savannah River, below Augusta, Ga.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A.

(8 enclosures.)

Q. Page 145, same letter book, who put that "M. F. Wheeler, Pulaski House, Savannah, Ga." there?

A. It is Mr. Connolly's writing.

Judge-Advocate: I offer in evidence and read the following:

"Memorandum.
"United States Engineer Office,
"Savannah, Ga., Sept., 14, 1891.

"Mr. M. F. Wheeler,

"Pulaski House, Savannah, Ga.

"Fascines for Savannah River,—near Augusta.

"(1) At Sand Bar Ferry, Georgia Side of River:

For Dams 'A' and 3.

150 cubic yards fascines 20 feet long.

150 cubic yards fascines 15 feet long.

"(2) At Course's Bar, Georgia Side of River:

Dam #6 (upper) and Dam #9, (middle).

150 cubic yards of 15 foot fascines.

“(3) At points about 200 feet, 600 feet and 1,000 feet below East Boundary St., of City of Augusta, on Georgia side of River:

Not more than 1,800 cubic yards of 20-foot fascines.

“(until further orders).”

“G. W. B.”

1108 Q. What do those initials indivate?

A. George W. Brown.

Q. Who was George W. Brown?

A. He was assistant engineer, in the employment of the office.

Q. In September 1891?

A. Yes, sir.

Judge Advocate: I offer in evidence and read:

“United States Engineer Office,
Savannah, Ga., Sept. 28, 1891.

Mr. M. J. Wheeler,
Gen Delivery P. O.,
Augusta, Ga.

Sir:

Please let me know at once when you will be ready to begin work at Augusta.

Very respectfully

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A.”

Judge-Advocate: The next letter appears to be a duplicate of that letter, with the added memorandum in pencil, “Mr. Wheeler’s Augusta address is Atkins House. M. A. C.”

Q. Who was that written by and whose initials are those?

A. M. A. Connolly’s.

Q. That memorandum is in Mr. Connolly’s writing?

A. Yes, sir.

Judge Advocate: I offer in evidence and read:

“United States Engineer Office,
Savannah, Ga. Sept. 28, 1891.

Mr. John F. Gaynor,
Fayetteville, N. Y.

Sir:

There is sent you herewith, copy of contract entered
1109 into with you for repairing and constructing wind-dams
and shore protection in the Savannah river, below Au-

gusta, Georgia, approved by the Chief of Engineers, U. S. Army, Sept. 18, 1891.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engineers U. S. A.

(i inclosure)''

Q. (Showing witness S. R. letter book, page 153) Whose writing is that?

A. Mr. J. B. Connolly's handwriting.

Q. Another Connolly?

A. Yes, sir.

Judge-Advocate: I offer in evidence and read telegram as follows:

"Savannah, October 5 1." evidently 1891.

"M. J. Wheeler, foreman Atkins House, Augusta, Ga.? Inspector arrives tomorrow morning Central road. Meet him. Carter, Engrs. Paid Off Business Government rate."

Q. Have you examined the records to see if any communication could be found addressed to the inspector or to Mr. Gaynor during the life of that contract?

A. I have not found any record.

Q. Have you made diligent search?

A. Yes, sir, I have.

Q. Such a search that, if such record existed, you would have found it?

A. I would have found it.

Q. Then you can testify that there is no such record 1110 in the office?

A. Yes, sir unless there is a letter copied in the wrong book.

Q. That is an accident that could take place in the office?

A. That is an accident that might take place.

Q. Who did the copying of the letters?

A. In most cases Mr. Connolly, but nearly every body in the office copied, just as we had time. If Mr. Connolly was pressed with work, I did it or Mr. J. B. Connolly did it.

Q. Who was the clerk principally engaged upon correspondence?

A. Mr. M. A. Connolly.

Q. Did each of the other clerks when so engaged, do their own copying?

A. Sometimes the third clerk copied,—very often he copied; anybody who had time copied, to facilitate the work.

Q. Do you know of any copy book or letter press book in the office, outside of these books which you have designated, having relation to the different improvements?

A. No, sir, I do not.

Q. You have had occasion to go over the different letter books kept in the office at that time,—August, September, October and November, 1891?

A. Yes, sir.

Q. You have gone pretty fully through that period, or entirely through that period?

A. From time to time, I go always over the records,—over the correspondence.

Q. While in the progress of this investigation?

A. I have gone pretty thoroughly over all the records.

Q. And have not found anything in the books, any communication of any kind addressed to Mr. Gaynor or Mr. Wheeler in relation to that contract?

A. I haven't found anything.

1111 Q. Do you keep an index to your letter press book?

A. Yes, sir; it is right attached here.

Q. Will you examine the index or have you examined the index?

A. I have examined the index.

Q. No such communication, then, is indexed?

A. No, sir.

Q. If instructions were copied at all in any book, it was in some book that did not belong to the office records?

A. Yes, sir.

Q. Or found among the office records?

A. Yes, sir.

Cross-Examination by Mr. Rose.

Q. Yesterday you testified with reference to the bid for the work at Darien that part of it was in the handwriting of John F. Gaynor and part in the handwriting of Mr. Connolly?

A. Yes, sir.

Q. Do you know whether, at that time, Mr. Connolly was a United States Commissioner?

A. He was a United States Commissioner at that time.

Q. You yesterday gave testimony here with reference to the amount of work done under each one of these contracts?

A. Yes, sir.

Q. How often were reports made to the Division Engineer and to the Chief of Engineers as to the progress of the work here?

A. To the Chief of Engineers every month.

Q. That was through the Division Engineer?

A. The Division Engineer received a copy.

Q. And those reports, in every instance, showed the amount of work done the preceding month?

A. Yes, sir.

Q. Both of mattress and of rock work?

1112 A. Yes, sir.

Q. Or any other kind of work?

A. Yes, sir.

Q. Was there an annual report made to the Chief of Engineers?

A. Yes, sir.

Q. Did that annual report show the contracts that had been let during the preceeding year for the various improvements?

A. Yes, sir.

Q. Did it show the names of the bidders on each one of those contracts?

A. Yes, sir; on the abstract which was attached.

Q. And the amounts bid for each kind of work, or material, by each bidder?

A. The total amount bid.

Q. And the amount per yard or per ton?

A. Yes, sir.

Q. And that report to the Chief of Engineers was afterwards published?

A. That was published.

Q. And accessible to any one?

A. Yes, sir.

Q. When the abstract of proposals or bids was sent to the Chief of Engineers, were the proposals themselves all sent to the Chief of Engineers?

A. No, sir.

Q. They were not?

A. One copy.

Q. A copy of each proposal?

A. Of each proposal was sent to the Chief of Engineers.

Q. One of those was an original?

A. They were made out in triplicate, and one sent to the Chief of Engineers.

Q. Not only the successful, or lowest bidder, or the
1113 one recommended by the engineer in charge, but one of
all of them?

A. Yes, sir.

Q. When the bid was awarded by the Chief of Engineers,
and notice received here, a contract was executed with the
successful bidder, was it not?

A. Yes, sir.

Q. That was executed in how many parts?

A. Five parts.

Q. Were they sent, the whole five, to Washington to be ap-
proved by the Chief of Engineers, or were any of them?

A. Yes, sir; but not all five.

Q. How many?

A. I have to refresh my memory on that.

Q. They were all sent, were they not, and then came back
again?

A. (After reference to book) The contracts were all sent,
but I am looking here on account of the bonds; in former
years they were sometimes sent in triplicate, and then in
duplicate.

Q. The contracts were all sent?

A. Yes, sir.

Q. In sending the proposals submitted, the guarantees at-
tached to the proposals formed part of it?

A. Yes, sir.

Q. And they went to Washington?

A. They went to Washington.

Q. With reference to the contract itself, was the bond of
the contractor attached to the proposal and sent to Washing-
ton?

A. After the contract was approved.

Q. After the contract was executed, and sent to Washing-
ton, to be approved by the Chief of Engineers, was the bond
sent with it?

A. Yes, sir.

Q. And that came back approved?

1114 A. Yes, sir; one copy came back.

Q. You have testified this morning as to the prices
for rock in Cumberland Sound, in 1894 and 1896,—the prices
bid?

A. Yes, sir.

Q. In one case, \$3.90, and in the other \$5.25, for first class
rock; do you know, of your own knowledge, whether the rock

under those two contracts was to be put in the same place? Do you know where the rock was to be put under the 1896 contract,—in what part of the work?

A. No, sir, I do not.

Q. I show you a book stamped “20”, the regulations; read what it says on the first page?

A. (Reading) “Regulations for the goveenment of employes of the United States Engineer Department in the District of Savannah Georgia, 1892”.

Q. Do you recognize that as one of the books from the Engineer Office?

A. Yes, sir.

Q. Do you know the signature, or handwriting, of Marion Twiggs?

A. Yes, sir.

Q. Look at the pencilled name there and tell me in whose handwriting that is?

A. That is Marion Twiggs’ handwriting.

Mr. Blair: It is Defendant’s Exhibit No. 7 for identification.

Q. The Judge Advocate produced the other day, and read part of, an article of agreement and specifications attached, dated Oct. 28, 1886, for constructing training walls &c., in Savannah Harbor and River, Ga.; (Handing witness paper) do you recognize that as the paper?

A. Yes, sir; I recognize that as a paper from Gen. Gilmore’s office.

Q. From the office of the engineer here in Savannah?

A. Yes, sir; came from Gen. Gilmore’s office.

1115 Do you know whether a supplemental agreement was made in relation to that same work?

A. I think in December.

Q. (Handing witness paper) That is the supplemental agreement that relates to this contract,—the one I just showed you?

A. Yes, sir; Merrifield’s handwriting.

Mr. Rose: I desire to read from the paper produced, and read in part, by the Judge Advocate. He read that part in relation to bundles of compact brush. I desire to read the advertisement as it appears in the specifications. (Reading)

“Advertisement. United States Engineer Office, Army Building, New York, September 11th, 1886. Sealed proposals, in triplicate, to be opened at 12 o’clock noon, on the 30th, day of Sept—1886 are invited for the construction of Wind Dams

and Training Walls in Savannah Harbor and River, Georgia, for the construction of jetties at Cumberland Sound, Georgia and Florida, and also for continuing work upon the jetty in Brunswick Harbor, Georgia."

The rest of it is in relation to proposals for each of the works, I don't care to read that. It is signed, "Q. A. Gillmore, Colonel of Engineers, Brevet Major-General U. S. A."

I desire to read and have on the record, from the supplemental contract in relation to the contract I have just read, the following: "The fascines shall be made of live brush, well trimmed, the butts placed in alternate directions and closely choked. They shall be from ten to twenty feet long, from twelve to fifteen inches in diameter, and tied with from four to six bands of wire or tarred rope, and shall be placed in the work singly or in mats, in such places, quantities and manner as may be directed by the Engineer in charge." This

supplemental contract was between Col. Q. A. Gillmore 1116 Corps of Engineers, of the One Part and John F. Gaynor, of the Other Part and is dated Dec. 22, 1886. The original contract of October 28, 1886 provides for compact bundles of brush on top of the logs.

Q. (Handing witness papers) Do you recognize these as papers from the files of the Engineer Office?

A. Yes, sir.

Q. One is the signature, as you plainly see, of Gen. Gillmore.

A. Of Gen. Gillmore; yes, sir.

Mr. Rose:—I desire to read, and have upon the record the following letter:

"October 8th, 1881.

Brig. Gen. H. G. Wright,
Chief of Engineers U. S. A.,
Washington, D. C.

General:

I have the honor to transmit herewith a copy of an advertisement, inviting proposals for continuing the construction of jetties at the entrance to Cumberland Sound, Florida, and have to request that, if approved, it be forwarded with the accompanying letter to the Chief Clerk of the War Department.

Very respectfully,

Your obedient servant,

Lieut. Col. of Engineers.
Brevet Major-Gen. U. S. A."

The signature is so dim I cannot read it.

Q. (Handing witness paper) Is that a paper from the files of the Engineer office?

A. Yes, sir.

Mr. Rose: The paper shown the witness is indorsed 1117 "Articles of Agreement, entered into Nov. 26, 1881, between Lieut. Col. Q. A. Gillmore, Lieutenant Colonel of Engineers, of the One Part, and A. M. Newton, of New York City, of the Other Part, for constructing jetties at entrance to Cumberland Sound, Florida and Georgia."

The advertisement which is at the head of the specifications, is as follows:

"United States Engineer Office,
Army Building, New York, October 11, 1881.

"Sealed proposals in triplicate, addressed to the undersigned, will be received at this office until 12 o'clock, noon, on the first day of November, 1881, at which time and place they will be opened in the presence of bidders, for continuing the construction of jetties at the entrance to Cumberland Sound, Florida.

Q. A. GILLMORE,
*Lieut. Colonel of Engineers, Brevet Major-
Gen. U. S. A.*

The other letter that was identified by the witness is dated Nov. 1, 1881. The Court will bear in mind that bids according to that advertisement, were to be opened the first day of November, and the advertisement was dated the 11th of October; nineteen days. (Reading)

"Nov. 1, 1881.

"Mr. A. M. Newton,
149 Front St., New York, City.

Sir:

You are hereby notified that your proposal for improvement of entrance to Cumberland Sound, Florida, in response to my advertisement, dated October 11, 1881, is accepted, subject to the approval of the Chief of Engineers.

The necessary contract papers will be prepared as soon as practicable.

1118

Very respectfully,

Your obedient servant,

Q. A. GILLMORE,
*Lieut. Colonel of Engineers, Brevet Major
Gen. U. S. A.*

Q. (Handing witness paper) I show you three papers and

ask you if they are from the files of the Engineer Office in this city?

A. Yes, sir.

Mr. Rose: I read first from one of the papers just identified by the witness, the following letter.

“November 4 2“ “

I judge it is 1882.

“Brig. Gen. H. G. Wright,
Chief of Engineers, U. S. A.,
Washington, D. C.

General.

I have the honor to forward herewith a copy of an advertisement, inviting proposals for building Training Walls and Wing Dams in Savannah Harbor and River, Ga.

“If approved, I have the honor to request that it be forwarded with the accompanying letter to the Chief Clerk of the War Department.

Very respectfully,”

The name is faded out

“Lieut. Col. of Engineers, Brevet Major-Gen. U. S. A.”

Fastened to this is the following letter:

“November 4 2

“Sir:

I have the honor to inclose herewith a copy of an advertisement inviting proposals for constructing Training Walls and Wing Dams in Savannah Harbor and River, Ga., and respectfully request authority to publish the same in the 1119 following named official newspapers:

6	insertions in the New York, N. Y. Times,
6	do do New York N. Y. Commercial Adv.;
6	do do Philadelphia Pa. North-American;
6	do do Baltimore Md. American;
6	do do Savannah, Ga., Recorder;

Very respectfully, your obedient servant,
Lieut. Col. of Engineers,
Brevet Major-Gen. U. S. A.”

“To the Chief Clerk War Department, Through the Chief of Engineers, U. S. A.
(One Encl.)”

And fastened to that is the following advertisement:

“Advertisement.

“United States Engineer Office,
Army Building, New York, Nov. 4, 1882.

“Sealed proposals in triplicate addressed to the undersigned, will be received at this office until 12 o'clock, noon, on the 20th day of November, 1882.” (The “20” is erased in blue pencil, and above is written in the same blue pencil “18.) “at which time and place they will be opened in the presence of bidders, for continuing the construction of Wing Dams and Training Walls in Savannah Harbor and River, Ga.

“Specifications, instructions to bidders, blanks for proposals, etc., may be obtained at this office, or from Capt. James C. Post, Corps of Engineers, Charleston, S. C.

Q. A. GILLMORE,

Lieut. Colonel of Engineers, Brevet Major-Gen. U. S. A.”

I read from the paper identified by the witness, and indorsed. “Articles of Agreement, entered into Dec. 20, 1882, between Capt. James C. Post, Corps of Engineers, of the One Part, and Eli T. Bangs, of the Other Part, for Constructing Wing Dams, &c. in Savannah Harbor and River, Ga.”

The advertisement is as follows:

“Advertisement.

United States Engineer Office,
Army Building, New York, Nov. 4, 1882.

“Sealed proposals, in triplicate, addressed to the undersigned, will be received at this office until 12 o'clock, noon, on the 18th day of November, 1882, at which time and place they will be opened in the presence of bidders,” etc. Signed, “Q. A. Gillmore, Lieut. Colonel of Engrs., Brevet Major-Gen. U. S. A.”

Q. I show you three papers and ask you if they are from the files of the Engineer Office in Savannah?

A. Yes, sir.

Mr. Rose: The first paper just identified by the witness, is a letter dated,

“Nov. 14 2.

“Sir:

I inclose herewith copy of an advertisement dated Nov. 18, 1882, inviting proposals for Improving Savannah River above

Augusta, Ga., and respectfully request authority to publish the same in the following named official newspapers.

6 insertions in the Savannah, Ga., Morning News;

6 " " Atlanta, Ga., Republican;

6 " " New York, N. Y., Times.

A copy of specifications for the work is also inclosed, and authority to have 250 copies printed is respectfully requested.

Very respectfully your obedient servant,

Q. A. GILLMORE,

Lt. Col. of Engrs., Brevet Major-Gen. U. S. A."

Q. That signature is in the handwriting of Gen. Gillmore, is it not?

1121 A. Yes, sir.

Mr. Rose: The second paper identified by the witness is as follows:

"Advertisement.

United States Engineer Office,
Army Building, New York, Nov. 18, 1882.

"Sealed proposals, in triplicate, addressed to the undersigned, will be received at this office until 12 o'clock, noon, on the 9th day of December, 1882, at which place and time they will be opened in the presence of bidders, for removing rock and other obstructions, and building Wing Dams in the Savannah River, above Augusta, Ga."

That is all I care to read. The rest of it is in relation to the specifications,—where they may be obtained. Signed, "Q. A. Gillmore, Lieut. Colonel of Engineers, Brevet Major-Gen. U. S. A."

The third paper identified by the witness, bears the following indorsement: "Articles of Agreement entered into Jan. 5, 1883, between Capt. James C. Post, Corps of Engineers, of the One Part, and William H. Browne, of Brooklyn, N. Y., of the Other Part, for Improving Savannah River, above Augusta, Ga."

The advertisement preceeding the specifications is as follows:

"Advertisement.

United States Engineer Office,
Army Building, New York, Nov. 18, 1882.

"Sealed proposals, in triplicate, addressed to the undersigned, will be received at this office, until 12 o'clock, noon, on the 9th, day of Dec. 1882, at which time and place they will

be opened in the presence of bidders, for Removing rock and other obstructions, and Building Wing Dams in the Savannah River, above Augusta, Ga." * * *

1122

Signed "Q. A. GILLMORE,
Lieut. Col. of Engineers,
Brevet Major-Gen. U. S. A."

Q. I show you four papers, three fastened together and one other one, and ask if they are from the files of the Engineer Office?

A. Yes, sir.

Mr. Rose: The first one is a letterpress copy of a letter, as follows:

"Jan. 11, 1883.

"Brig. Gen. H. G. Wright,
Chief of Engineers, U. S. A.
Washington, D. C.

General:

I have the honor to transmit herewith copy of an advertisement inviting proposals for the improvement of the Altamaha River, Ga., and a draft of the specifications for the work.

I have to request that, if approved, they may be forwarded to the Chief Clerk of the War Department, with the accompanying letter addressed to him.

Very respectfully, your obedient servant,

JAMES C. POST,
Capt. of Engineers, U. S. A.

(Three inclosures)"

The next paper identified by the witness is a letterpress copy as follows:

"Jan. 11, 1883.

Sir:

I have the honor to inclose herewith a copy of an advertisement inviting proposals for Improving the Altamaha

River, Ga., and respectfully request authority to publish 1123 the same in the following named official newspapers, viz: "

I don't care to read the newspapers to fill up the record.

There are five of them in New York, Philadelphia, Baltimore, Charleston and Savannah.

"A draft of specifications for the work is also inclosed, and authority to have 250 copies printed is respectfully requested.

"It is desirable that the proposals should be opened not later than the 7th ult.

Very respectfully,

Your obedient servant,

JAMES C. POST,

Captain of Engrs. U. S. A."

"To the Chief Clerk,

War Department, Washington, D. C.

"Through the Chief of Engineers U. S. A.

"(Two Encls.)"

The other paper identified by the witness is endorsed,

"Articles of Agreement entered into March 19, 1883, between Capt. J. C. Post, Corps of Engineers, of the one part, and Robert L. Burnett, of Savannah, Ga., of the other part, for Improving Altamaha River, Ga."

The advertisement is as follows:

"Advertisement.

United States Engineer Office,

Army Building, New York, Jan. 15, 1883.

"Sealed proposals, in triplicate, addressed to the undersigned, will be received at this office until 12 o'clock, noon on the 7th, day of February, 1883, at which time and place they will be opened in the presence of bidders, for Removing Rock and Building Wing Dams in the Altamaha River, Ga."

Signed

"JAMES C. POST,

Capt. of Engineers, U. S. A."

1124 A Member: Is the amount of those contracts there?

Mr. Rose: In the contract with Eli T. Bangs of Dec. 20, 1882—

A member: Give us the proposal date, that will give it to us.

Mr. Rose: I haven't the proposals here. I am only going to state from the specifications the quantity of work required. This (contract of Dec. 20, 1882 with Eli T. Bangs referred to) is one in which the advertisement is dated the 4th, of Nov.; the bids were to be opened on the 18th, of Nov. (Reading)

"It is estimated that under these specifications from 120,000 to 140,000 square yards of mattress work, and from 15,000 to 20,000 cubic yards of stone, will be required."

Then it also states that "the attention of bidders is especially invited to these two conditions, and no bid will be entertained which does not promise to do at least \$20,000

worth of work a month, beginning with the 9th, of Dec. next."

The bond required of the contractor is for \$80,000, with two sureties.

In the contract which was introduced, and which I read, dated Nov. 26, 1881, with A. M. Newton of New York City, in which the advertisement is dated Oct. 11, 1881, and was begun on the first of Nov., it is stated that the sum of \$100,000 has been appropriated for this work.

In the two contracts the one with Robert S. Burnett, of March 19, 1883, and the other with William H. Browne of Jan. 5, 1883; the advertisement in the Burnett contract is dated Jan. 15, 1883 and bids are to be opened on the 7th, day of Feb. 1883. It is stated that the sum of \$15,000 has been appropriated by Congress for this work. In the Browne contract the advertisement is dated Nov. 18, 1882, bids to be opened on the 9th day of December 1882, and it is stated that the sum of \$15,000 was appropriated by Congress 1125 for this work with which it is proposed to continue the work.

Q. I show you a paper and ask you if you identify that as being from the records of the Engineer Office?

A. Yes, sir; it is.

Judge Advocate: All the papers that have been read from and which you have there are admitted to be from the Engineer Office in this city, and will be considered as having been identified by the witness.

Mr. Rose: I would like to put upon the record, the Regulations of 1881. I read from the U. S. Army Regulations, dated 1881, page 142. paragraph 1459:

"Officers in advertising sales of property, or for proposals for contracts, or for proposals for supplies, will, as a general rule, allow thirty days to intervene between the date of the first publication of the advertisement and the date designated in such advertisement for the sale to take place or for the opening of bids; but a shorter period than thirty days may be designated if the interests of the service, as reported by the officer advertising, should render it advisable."

Judge-Advocate: May I ask you, at the same time, to read another paragraph, as they go quite together. Will you please read paragraph 1486.

Mr. Rose: At the request of the Judge-Advocate, I read from page 150, paragraph 1486:

"When the public exigencies do not require the immediate

delivery of supplies, or the immediate furnishing of transportation or other services, advertisements shall be published for a reasonable time to allow persons at a distance to compete, and a proper time, to be set forth in the advertisement, will be given the successful bidder to make deliveries or to furnish the supplies, transportation, or services after the award."

And I call the attention of the Court and the Judge-Advocate to the fact that nothing is said there with reference to entering into contracts.

I read from paper indorsed, "Articles of Agreement, entered into Jan. 30, 1880, between Lieut Col. Q. A. Gillmore, Corps of Engrs., of the one part, and John Brady, of Brooklyn, N. Y., of the other part, for Constructing a Crib Jetty in the harbor at Brunswick, Ga."

The advertisement preceeding the specifications is as follows:

"Advertisement.

United States Engineer Office,
Army Building, New York, Dec. 30, 1879.

Sealed proposals, in duplicate, addressed to the undersigned, will be received at this office until 12 o'clock noon, on the 12th day of January, 1880, at which time and place they will be opened in the presence of bidders," etc.

Signed, "Q. A. GILLMORE,
Lieut. Col. of Engineers,
Brevet Major-Gen. U. S. A."

And the specifications state that about \$12,000 is available for this crib work.

I read from Articles of Agreement entered into Sept. 4, 1880, between Lieut. Col. Q. A. Gillmore, of the one part, and Lara, Ross & Co. of Washington, D. C. of the other part, for Constructing jetties at the entrance to Cumberland Sound, between Georgia and Florida. The advertisement is as follows:

"Advertisement.

United States Engineer Office,
Army Building New York, Aug. 3, 1880.

"Sealed proposals in duplicate, addressed to the undersigned will be received at this office until 12 o'clock, noon, on the 31st day of August, 1880, at which time and place they will be opened in the presence of bidders."

Signed. "Q. A. GILLMORE,
Lieut. Col. Engrs.
Brevet Maj.-Gen. U. S. A."

1127 The Court: What is the date of application for authority to advertise?

Mr. Rose: I haven't that letter here. We have not been able to get that, but it must be prior to the date of this advertisement,—must be the same date or prior.

I don't find the amount to be expended under this contract stated in it. The only evidence as to the size of the contract is that a bond of \$10,000 is required.

I read from paper indorsed, "Articles of Agreement, entered into Nov. 26, 1880, between Lieut. Col. Q. A. Gillmore, Corps of Engineers, of the one part, and Anderson & Blaisdell of Boston, Mass., of the other part, for Improving Savannah River, above Augusta, Ga." The advertisement is dated "Army Building, New York, Oct. 26, 1880, and bids are to be opened Nov. 15, 1880. It is signed Q. A. Gillmore, Lieut. Col. Engineers, Brevet Major-Gen. U. S. A. \$16,000 was appropriated by Act of Congress for this work.

I read from paper, indorsed, "Articles of Agreement entered into Sept. 25, 1882, between Lieut. Col. Q. A. Gillmore, Corps of Engineers, U. S. A., of the one part, and Lara & Ross, of Staunton, Va., of the other part, for Constructing Jetties at Cumberland Sound, Ga., and Fla." The advertisement is dated, Army Building, New York, Aug. 12, 1882, bids to be opened on the 28th. of Aug., 1882. The amount of money available is not stated. The quantity of work is from 15,000 to 20,000 square yards of mattress work and from 8,000 to 10,000 cubic yards of stone. \$10,000 worth of work per month is required to be done, and the contractor's bond is \$20,000.

I read from Articles of Agreement, of Sept. 27, 1884, between Col. Gillmore of the one part, and Lara & Ross of Staunton, Va., of the other part, for Constructing Jetties in 1128 Cumberland Sound, Georgia and Florida. The advertisement is dated, Army Building New York, Aug. 16, 1884, and the bids are to be opened on the 11th day of September. It is signed by Q. A. Gillmore, Col. of Engineers, Brevet Major-Gen. U. S. A. 20,000 to 30,000 square yards of mattress work and 10,000 to 12,000 cubic yards of stone. \$7,500 worth of work is required per month. Contractor's bond, \$30,000.

I read from Articles of Agreement of July 22, 1880, between Lieut. Col. Q. A. Gillmore, Corps of Engrs., of the one part, and John G. Smith, of Charleston, S. C., of the other part, for removing a portion of a dry dock from St. Augustine Creek;

Ga. The advertisement is dated Army Building, New York, June 7, 1880, and the bids are to be opened on the 30th, of June, 1880.

I read from Articles of Agreement of June 2, 1882, between Lieut. Col. Q. A. Gillmore, Corps of Engineers of the one part and Dickerson & Paulsen of the other part, for Dredging in Savannah River, Ga. This advertisement is dated, United States Engineer Office, Army Building, New York, May 13, 1882, to be opened on the 25th day of May, 1882, and is an advertisement for the dredging of 35,000 cubic yards more or less, in the vicinity of Garden Bank, Savannah River.

I read from Articles of Agreement entered into Dec. 30, 1882, between James C. Post, Corps of Engineers of the one part, and Dickerson & Paulsen, of Savannah, Ga., of the other part, for dredging in Savannah river, Ga. The advertisement is dated Army Building, New York, Nov., 1882, bids to be opened on the 11th day of Nov., 1882, signed, Q. A. Gillmore, Lieut. Col. of Engineers, Brevet Major Gen. U. S. A. About 200,000 cubic yards, more or less, of material will be removed. The amount of the bond is \$10,000.

The Court: You do not give the amount of the one of Jan. 30, 1880?

1129 Mr. Rose: It does not state in the contract the amount.

The bids however, indicate the amount of work to be done. There seems to be attached a list of proposals which run from \$3,000 to \$4,950.

I read from Articles of Agreement entered into March 28, 1883, between Capt. James C. Post, Corps of Engineers, U. S. A. of the one part, and Dickerson & Paulsen of the other part, for Dredging in Romaly Marsh, Ga. The advertisement is dated Army Building, New York, Feb. 8, 1883; bids to be opened on the 26th of Feb., 1883, and is signed, James C. Post, Capt. of Engineers, U. S. A. It states that there is about 70,000 cubic, more or less of material to be removed. The bond is in the sum of \$5,000.

I read from Articles of Agreement entered into Nov. 26, 1884, between Lieut. Col. Q. A. Gillmore, Corps of Engineers, and P. Sanford Ross, for dredging in Savannah Harbor and River, Ga. The advertisement is dated, Army Building, New York, Nov. 3, 1884; bids to be opened on the 17th, of Nov., 1884, and is signed, Q. A. Gillmore, Col. of Engineers, Brevet Major-Gen. U. S. A. Material to be removed from 90,000 to 150,000 cubic yards. Bond, \$10,000.

I read from Articles of Agreement, entered into Nov. 26, 1884, between Col. Q. A. Gillmore, Corps of Engineers, and B. Sanford Ross of Jersey City, N. J., for Dredging in Romaly Marsh, Ga. The advertisement is dated Nov. 3, 1884, bids to be opened on the 17th of Nov., 1884, and is signed Q. A. Gillmore, Col. of Engineers, Brevet Major-Gen. U. S. Q. and says, the sum of \$10,000 is available for this work.

I read from contract entered into October 20, 1880, between Lieut. Col. Q. A. Gillmore, Corps of Engineers, and the American Dredging Company, for dredging in Savannah River, Ga. The advertisement is dated Army Building New York,

Sept. 11, 1880, bids to be opened Oct. 2, 1880, and is signed, 1130 Q. A. Gillmore, Lieut. Col. Engineers, Brevet Major-Gen. U. S. A. From 200,000 to 300,000 cubic yards of material was to be removed. Bond in the sum of \$10,000.

I read from contract entered into July 16, 1881, between Lieut. Q. A. Gillmore Corps of Engineers, and James E. Walter, of Savannah, Ga., for dredging in Brnswitk Harbor, Ga: The advertisement is dated Army Building, New York, Aug. 18, 1880, bids to be opened Sept. 7, 1880, and is signed Q. A. Gillmore, Lieut. Col. Engineers, Brevet Major Gen. U. S. A. It says it is the intention to devote about \$5,000 of the existing appropriation to this work. The bond is \$1,000.

I read from Articles of Agreement entered into Sept. 30, 1880, between Capt. James C. Post, Corps of Engineers, and Dickerson & Paulsen, for dredging in Savannah River, Ga. The advertisement is dated, Army Building, New York, Nov. 1, 1882; bids to be opened Nov. 11, 1882, and states that about 200,000 cubic yards of material are to be removed, and is signed Q. A. Gillmore, Lieut. Col. of Engineers, Brevet Major Gen., U. S. A. The bond is for \$10,000.

I read from Articles of Agreement entered into March 28, 1883, between Capt. James C. Post, Corps of Engineers, U. S. A. and Dickerson & Paulsen, for dredging in Romaly Marsh, Ga. The advertisement is dated Army Building, New York, Feb. 8, 1883; bids to be opened Feb. 26, 1883. About 70,000 cubic yards more or less, of material to be removed. Signed James C. Post, Captain of Engineers, U. S. A.

I read from Articles of Agreement entered into Sept. 24, 1884, between Lieut. Col. Q. A. Gillmore, Col. of Engineers, and John S. Howell, of New York City, for constructing jetty in harbor of Brnswick. The advertisement is dated Aug. 16, 1884. Bids to be opened Sept. 11, 1884, and is signed Q. A.

Gillmore, Colonel of Engineers, Brevet Major Gen. U. S. 1131 A. The bond is for \$5,000. 1,200 to 1,400 square yards of mattress work, and from 1,900 to 2,000 cubic yards of stone work.

The Court: The Court will take a recess of five minutes. (At 1:30 Court took a recess and was called to order at 1:35).

Mr. Rose: I read from Articles of Agreement entered into Oct. 30, 1896, between Col. Q. A. Gillmore, U. S. A., and the Savannah Dredging Company, for dredging in Brunswick Harbor, Ga. The advertisement is dated, Army Building, New York, Sept. 11, 1886, bids to be opened Sept. 30, 1886, and is signed Q. A. Gillmore, Colonel of Engineers, Brevet Major-Gen. U. S. A. From \$8,000 to \$11,000 of the existing appropriation is to be devoted to this work.

I read from Articles of Agreement entered into Sept. 1, 1884, between Col. Q. A. Gillmore, Corps of Engineers, U. S. A., and John F. Gaynor, of Syracuse, N. Y., for Constructing Training Walls and Wing Dams, in Savannah Harbor and River, Ga. The advertisement is dated, Army Building, New York, July 26, 1884; bids to be opened Aug. 16, 1884, and is signed Q. A. Gillmore, Colonel of Engineers, Brevet Major-Gen. U. S. A. The amount is 120,000 to 125,000 square yards of mattress work, and from 18,000 to 20,000 cubic yards of stone work. \$16,000 worth of work per month is required, and bond in the sum of \$80,000.

I read from Articles of Agreement entered into Dec. 5, 1884, between Col. Q. A. Gillmore, Corps of Engineers, and Edward H. Gaynor of Savannah, Ga., for Constructing Wing Dams, &c. in Savannah River, Ga. The advertisement is dated Army Building, New York, Sept. 18, 1884, bids to be opened October 17, 1884, and is signed Q. A. Gillmore, Colonel of Engineers, Brevet Major Gen. U. S. A. It is stated that it is expected that from \$9,000 to \$10,000 will be available for it. The bond is for \$6,000.

1132 I read from contract, dated Dec. 5, 1884, between Col. Q. A. Gillmore, Corps of Engineers, and Edward H. Gaynor, of Savannah, Ga., for Constructing Wing Dams, &c., in Altamaha River, Ga. The advertisement is dated Army Building, New York, Sept. 18, 1884; bids to be opened Oct. 17, 1884, and is signed Q. A. Gillmore, Colonel of Engineers, Brevet Major-Gen. U. S. A. From \$7,000 to \$8,000 is available for this work.

Contract, dated October 28, 1886, between Col. Q. A. Gill-

more, Corps of Engineers, and John F. Gaynor, for dredging in Savannah river, Ga. The advertisement is dated, Sept. 11, 1886; bids to be opened on the 30th of Sept., 1886, and is signed Q. A. Gillmore, Lieut. Colonel of Engineers, Brevet Major-Gen. U. S. A. Amount of work to be 125,000 to 150,000 cubic yards; contractor's bond \$20,000.

I read from Articles of Agreement entered into June 22, 1885, between Col. Q. A. Gillmore, Corps of Engineers and Edward H. Gaynor, of Fayetteville, N. Y., for Constructing Spur Jetty, at Tybee Island, Ga. The advertisement is dated May 20, 1885, bids to be opened June 11, 1885; contractor's bond \$1,000.

Articles of Agreement, entered into Oct. 30, 1886, between Col. Q. A. Gillmore, U. S. A., and Edward H. Gaynor, of Boston, Mass., for Constructing a Jetty in Brunswick Harbor, Ga. The advertisement is dated Sept. 11, 1886; bids to be opened Sept. 30, 1886, and is signed Q. A. Gillmore, Colonel of Engineers, Brevet Major-Gen. U. S. A. Required from 2,500 to 3,500 square yards of mattress work, and from 2,000 to 2,500 cubic yards of stone. The bond is for \$5,000.

Contract, dated Oct. 29, 1886, between Col. Q. A. Gillmore, Corps of Engineers, and Anson M. Bangs, for Construction of Jetties at Cumberland Sound, Georgia and Florida. The advertisement is dated Sept. 11, 1886; bids to be opened Sept.

30, 1886, and is signed Q. A. Gillmore, Colonel of Engineers, Brevet Major-Gen. U. S. A. Estimated that from 60,000 to 70,000 square yards of mattress work and from 25,000 cubic yards of stone will be required. Contractor promises to do \$12,000 worth of work per month and \$50,000 is the amount of the bonds.

(Addressing the Judge Advocate) Does the agreement as to papers from your office, cover these three books?

Judge Advocate: Certainly; anything that Capt. Carter receipted to me for.

Mr. Rose: I read from the files of the Engineer Office, Book, indorsed "Charleston Office, Savannah Harbor, June 1881-Dec., 1882." at page 403, letterpress copy book, as follows:—

"U. S. Engineer Office,
Charleston, S. C., Oct. 30, 1882.

"Mr. R. S. Burnett,
Savannah, Ga.

As requested in your letter of 27th inst, I beg to send you

1892

Court Martial Vol. 5—Sterly.

herewith a copy of specifications for work of improvement of Savannah River, below Augusta, Ga.

Very respectfully,

Your obedient servant,

JAMES C. POST,

Captain Engineers, U. S. A."

Page 406,

"United States Engineer Office,
Charleston, S. C., Nov. 2, 1882.

"Mr. William F. Bowe,

No. 104 Bay St., Savannah, Ga.

Dear Sir:—

Herewith inclosed, I beg to send you copy of specifications for the building of Wing Dams in Savannah River, Ga., below Augusta, dated New York, Oct. 13, 1882.

I also inclose diagram showing end of view of fascine 1134 wing dam.

Very respectfully,

Your obedient servant,

JAMES C. POST,

Capt. Engrs. U. S. A."

A member: Can you tell us when those bids were to be opened?

Mr. Rose: I may be able to do it later on, but cannot do it now. This one shows that the copy was sent on Nov. 2.

Page 407,

U. S. Engineer Office,

Charleston, S. C., Nov. 3, 1882.

"Mr. James E. Walter,

Savannah, Ga.

Dear Sir:—

As requested in your letter of the 2d, inst., I beg to forward you herewith in separate package the following blanks, &c., necessary to make a bid on the proposed work on Savannah river, Ga., below Augusta, viz—:

3 copies general instructions to bidders:

3 copies Specifications;

4 copies Proposals (i extra)

I also inclose a diagram showing end view of a fascine Wing Dam.

Very respectfully,

Your obedient servant,

JAMES C. POST,

Captain of Engrs. U. S. A."

Messrs. French Bros.

Rocky Point, Pender Co. N. C.

1141 Sirs:

There are sent to you by today's mail:

1 copy, specifications, relating to the construction of Training Walls and Wing Dams in Savannah Harbor and River, Ga.,

1 copy, specifications, relating to the construction of Jetties at Cumberland Sound, Ga., and Fla.;

1 copy, specifications, relating to the construction of a Jetty in the Harbor of Brunswick.

If you desire to bid, additional copies of these specifications, blank forms of proposals and general instructions to bidders will be sent to you upon application.

Very respectfully,

Your obedient servant,

O. M. CARTER,

1st, Lieut. Corps of Engrs. U. S. A."

Q. (Examination continued) Do you know when Capt. Carter first came to Savannah?

A. Yes, sir.

Q. When?

A. In August 1884; I know it from the records.

Q. Was it the 14th, of October, 1884?

A. That I don't know.

Q. Then you don't know when he came here?

A. I know that Capt. Carter came here in the fall or in the summer of 1884,—first to Charleston and then to Savannah.

Q. And who was then in charge of the Savannah District,—of works being done in this District?

A. Gen. Gillmore.

Q. He was in charge over Capt. Carter?

A. Gen. Gillmore was in charge over Capt. Carter.

Q. Directly?

A. Not when he came here first. When Capt. Carter 1142 came here first, he was under the direct charge of Capt. Bailey.

Q. And Capt. Bailey was preceded by Capt. Post?

A. Yes, sir.

Q. How long did Capt. Bailey stay here?

A. I don't know.

Q. When he went away Capt. Carter took his place?

A. Capt. Carter I think relieved him.

Q. Capt. Carter relieved Capt. Bailey and Gen. Gillmore?

A. Yes, sir; the District was divided and there were two Districts made.

Judge Advocate That can all be shown by orders.

Mr. Rose: I don't want to take up time if this witness can just state the fact; that is all.

Q. (Mr. Rose continuing examination) In referring to the paper, you have prepared, this morning, the Judge Advocate asked you how many brush mats were to be used; you meant by that, did you not, the amount stated there of brush mats, by which the bids were to be canvassed?

A. Bids to be canvassed,—which the contractors expected to use.

Q. The amounts stated in the specifications are the amounts by which the bids are to be canvassed, are they not?

A. The amount in the specification is,— The following quantities will be used for canvassing bids, and gives the contractor.

Q. I see it gives the contractor. The statement is, that the following amounts will be used for the purpose of canvassing bids?

A. That is right.

Q. (Handing witness paper) For instance,—read that.

A. (Reading) “For the purpose of canvassing bids, the following will be assumed as the approximate quantities of material, to wit:—”

Q. And then proceeds to state the amounts?

1143 A. Yes, sir.

Q. And that sentence ends with this statement: “But the foregoing quantities are liable to be increased or diminished as may be found necessary”?

A. Yes, sir.

Re-direct Examination by the Judge-Advocate.

Q. Was B. D. Green a subordinate of Gen. Gillmore?

A. Yes, sir.

Q. He was on duty in this engineering district under him?

A. Yes, sir.

Q. Gen. Gillmore's office was in New York, was it not?

A. Yes, sir.

Q. Did he frequently come to Savannah?

A. I don't know; I wasn't here at the time.

Q. After you came here, did he frequently visit Savannah?

A. Capt. Green?

Q. No; Gen'l Gilmore?

A. No, sir; Gen. Gilmore was sick at that time.

Q. Do you know when Gen. Gilmore died?

A. Yes, sir.

Q. What date was it?

A. On the 7th of April, 1888.

Q. Capt. Post is dead, is he not?

A. Yes, sir.

Q. Is Capt. Bailey living?

A. He is dead.

Q. How long was Gen. Gilmore an invalid, do you know?

A. He was an invalid for several years, and died of Bright's disease.

1144 Q. You were asked by Counsel in relation to the reports of the accused,—the annual report to the Chief of Engineers; did any of the reports of the accused, at any time, show that any modification of any existing contracts had been authorized? Do the records of the office give that information, do you know?

A. Do I understand the question right—?

Q. Was there in the reports of the accused to the Chief of Engineers anything that showed that, at any time, authority had been given to modify contracts that had been in process of execution during the year or during the period covered by the report? Well, let that go; it may tax your memory too much.

Q. In any of his reports, has he reported any modification of existing contracts in this Engineering District?

A. Yes, sir.

Q. Which one?

A. Capt. Carter has reported,—submitted projects of modification for Savannah Harbor and Cumberland Sound contracts.

Q. Since the present contracts were let?

A. Not that I remember.

Q. Has any authority to modify the contracts of 1896 been received at the office here in Savannah?

A. For Cumberland Sound it has.

Q. What change has been authorized?

A. There was a sailing that was made over the jetty,—South Jetty, Cumberland Sound.

Q. You can produce that paper, can you?

A. That is an appropriation of \$50,000, and a special appropriation was made for Cumberland Sound.

1145 Q. That wasn't a modification of existing contract?

A. No, sir; I am mistaken.

Q. Did you find any authority, or request for authority, for modification of the project of the Board of Engineers of December, 1895, for improvements in these waters?

A. I don't remember.

Q. Have you looked?

A. I have not looked lately.

Q. As Chief Clerk of the office, would you know if such modification had been made? Would it not come to you for record?

A. I would see the papers, but I have been so busy during the last few months, and previous,—before Capt. Carter went away, that sometimes papers were filed, and I did not have a chance to study them.

Q. You were busy before Capt. Carter went away?

A. Yes, sir.

Q. What was occupying your time?

A. My regular routine work at the office.

Q. Busier than usual?

A. Not busier than usual, but I have always been very busy, and some of those papers for the contract work, I could not testify to without refreshing my memory.

Q. I will ask you to make a diligent and thorough search of the records of the office, to find if any authority has ever been granted Capt. Carter, or was ever asked for by him, to modify the project of the Board of Engineers of December, 1895; you will look for that, will you?

A. Yes, sir.

1146 Q. Do you know if there has been any variation in the terms of agreement as to money paid by the government to contractors under existing contracts? Whether there has been any variation in the prices of mattress and for stone prior to July 31st last?

A. No, sir; the prices are the same as on the contract.

Judge-Advocate: I find, may it please the Court, that there was some further information in those papers submitted by Mr. Rose that I think it well should be spread upon the record, and I read first from the Articles of Agreement between Col. Gillmore and Anson M. Bangs for the Construction of Jetties at Cumberland Sound, Georgia and Florida. The work had in contemplation, and the advertisement called for bids upon, either of the following two designs of mattress, to be used at the option of the contractor:

“First Design.—This mattress is a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact, side by side, and firmly held by transverse pole binders spiked or bolted to them. There will be placed upon the raft of logs a layer of live wood brush sufficient to give five inches in thickness in the finished work, secured in place by poles lashed to the binders of the raft.

“The binders will be smaller logs or poles, not less than 5 inches in diameter at the small end, and placed not more than eight feet apart, and those on the outside will be close to the ends of the logs.

“Second Design.—This mattress will consist of a bottom grillage of poles, of an average diameter of at least 6 inches, and not less than 5 inches in diameter at the small end, placed from 4 to 6 feet apart between centers, both longitudinally and transversely, and the lower poles will be

parallel to the line of the jetty. The spaces between the upper poles of this bottom grillage will be filled in with smaller poles. Upon this raft will be placed two layers of stout, hard-wood, brush, crossing each other at right-angles, each course to be five inches thick in the finished jetty, to be followed by a top grillage constructed like the one placed at the bottom. The upper layer of brush will be placed at right angles to the line of the jetty. The poles of each grillage will be securely lashed together by suitable wire or rope lashings, and the upper and lower grillages will also be securely lashed together, in such manner as the Engineer in charge shall approve, so as to form a strong and compact mattress, not less than 16 inches thick in the finished work, the thickness being estimated between the bottom poles of the upper and the top poles of the lower grillage.

"The logs and poles may be loblolly or other cheap variety of pine, and must be of gentle taper and sufficiently straight. Logs will not be used that do not fit close enough together to hold all the stone securely even without the use of brush."

The contract price for the mattress in that contract was 47¢ per square yard.

I read from Articles of Agreement between Col. Gillmore and Edwd. H. Gaynor, dated Oct. 30, 1886, for Constructing a Jetty in Brunswick Harbor, Ga. Sept. 11, 1886, is the date of the advertisement; bids opened Sept. 30, 1886. (Reading)

"Details of Construction.

"This mattress is a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in 1148 diameter at the small end, placed in close contact side by side, and firmly held by transverse pole binders spiked or bolted to them. There will be placed upon the raft of logs a layer of live-wood brush sufficient to give five inches in thickness in the finished work, secured in place by poles lashed to the binders of the raft.

"The binders will be smaller logs or poles, not less than 5 inches in depth at the small end, and placed not more than 8 feet apart, and those on the outside will be close to the ends of the logs.

"The logs and poles used may be loblolly, or other cheap variety of pine, and must be of gentle taper and sufficiently straight. Logs will not be used that do not fit close enough together to hold all the stone securely, even without the use of brush."

The price paid, under which this contract was entered into was 55¢ per square yard.

I read from Articles of Agreement of December, 1882, be-

tween Capt. Jas. C. Post and Eli T. Bangs, Constructing Wing Dams &C., in Savannah Harbor and River, Ga. (Reading)

"The mattress is simply a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact, side by side, at right-angles to the line of the wall or dam, and firmly held there by transverse pole-binders spiked or bolted to them."

Price of mattress under this contract, 57¢ per sq. yard.

I read from Articles of Agreement entered into Nov. 26, 1881, between Col. Gillmore and A. M. Newton for Constructing Jetties at Entrance to Cumberland Sound, Georgia and Florida. (Reading)

1149 "The mattress is simply a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact, side by side, at right angles to the line of the jetty, and firmly held there by transverse pole-binders spiked or bolted to them.

"The binders will be smaller logs or poles, not less than 4 inches in depth at the small end, placed not more than 8 feet apart, and those on the outside will be close to the ends of the logs."

The price for mattresses bid, on which that contract was entered into was 97¢ per sq. yard, and live hard-wood, brush 8¢ per sq. yard.

Mr. Blair: How thick was the brush to be by the specifications

Judge-Advocate: (reading) "A layer of live, hard-wood, brush 9 feet wide and 6 inches thick in the finished work, firmly held down by two pole-binders, will, at the option of the Engineer in charge, be placed on the opposite edges of the mattress, and will extend about one foot beyond the ends of the logs."

Mr. Rose: Will you be kind enough to read that which is written, and state that it is written in?

Judge-Advocate: (Reading) "Payments shall be made to the said A. M. Newton monthly if satisfactory progress is made in the work contracted for," etc.

Mr. Rose: That is Form 19a?

Judge-Advocate: Form 19a.

Mr. Rose: And that "If satisfactory progress is made," is written in and not printed?

Judge-Advocate: Written in and not printed.

1150 Mr. Rose: And the same is true of the one of Oct. 30th?

Judge-Advocate: The same in Mr. Gaynor's contract.

Mr. Rose: "If satisfactory progress is made is written in, and it is on Form 19a?

Judge-Advocate: Yes, sir; the same on Mr. Gaynor's contract.

I read from Articles of Agreement entered into between Col. Gillmore and Lara, Ross & Co., Sept. 27, 1884, for Constructing Jetties in Cumberland Sound, Ga. and Fla. (Reading)

"Either of the following two designs of mattress may be used at the option of the contractor.

"First Design.—This mattress is a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact side by side, and firmly held by transverse pole-binders spiked or bolted to them. There will be placed upon the raft of logs a layer of live-wood brush sufficient to give five inches in thickness in the finished work, secured in place by poles lashed to the binders of the raft.

"The binders will be smaller logs or poles, not less than 5 inches in depth at the small end, and placed not more than 8 feet apart, and those on the outside will be close to the ends of the logs.

"Second Design.—This mattress will consist of a bottom grillage of poles, of an average diameter of at least six inches, and not less than five inches in diameter at the small end, placed from 4 to 6 feet apart between centers, both longitudinally and transversely, and the lower poles will be parallel to the line of the jetty. The spaces between the upper poles of this bottom grillage will be filled in with

similar poles. Upon this raft will be placed two layers 1151 of stout hard-wood brush, crossing each other at right-angles, each course to be five inches thick in the finished jetty, to be followed by a top grillage, constructed like the one placed at the bottom. The upper layer of brush will be placed at right-angles to the line of the jetty. The poles of each grillage will be securely lashed together by suitable wire or rope lashings, and the upper and lower grillages will also be securely lashed together, in such manner as the Engineer in charge shall approve, so as to form a strong and compact mattress, not less than 16 inches thick in the finished work, the thickness being estimated between the bottom poles of the upper and the top poles of the lower grillage."

The price for mattresses in the contract is placed at 59¢ per square yard.

I read from Articles of Agreement entered into Sept. 25,

1882, between Col. Gillmore and Lara, Ross and Co., of Staunton, Va., for Constructing Jetties at Cumberland Sound, Georgia. (Reading)

"Either of the following two designs of mattress may be used at the option of the contractor.

"First Design.—This mattress is a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact side by side, at right-angles to the line of the jetty, and firmly held there by transverse pole-binders spiked or bolted to them. There will be placed upon the raft of logs a layer of live wood brush sufficient to give five inches in thickness in the finished work, secured in place by poles lashed to the binders of the raft.

"The binders will be smaller logs or poles, not less than 4 inches in depth at the small end, and placed not more than 8 feet apart, and those on the outside will be close to the ends of the logs.

"Second Design.—This mattress will consist of a bottom grillage of poles, of an average diameter of at least six inches, and not less than five inches in diameter at the small end, placed from 4 to 6 feet apart between centers, both longitudinally and transversely, and the lower poles will be parallel to the line of the jetty. The spaces between the upper poles of this bottom grillage will be filled in with similar poles. Upon this raft will be placed two layers of stout, hard-wood brush, crossing each other at right-angles, each course to be five inches thick in the finished jetty, to be followed by a top grillage, constructed like the one placed at the bottom. The upper layer of brush will be placed at right-angles to the line of the jetty. The poles of each grillage will be securely lashed together by suitable wire or rope lashings, and the upper and lower grillages will also be securely lashed together, in such manner as the Engineer in charge shall approve, so as to form a strong and compact mattress, not less than 16 inches thick in the finished work, the thickness being estimated between the bottom poles of the upper and the top poles of the lower grillage."

The price to be paid for that mattress, under the terms of the contract, 85¢ per square yard.

I read from Articles of Agreement of Sept. 4, 1880, entered into between Lt. Col. Gillmore and Lara, Ross & Co., of Washington, D. C., for Constructing Jetties at the Entrance to Cumberland Sound, Ga. (Reading)

"The contractor will be allowed to choose between the three designs for the foundation mattress described below.

1153 "First Design.—This mattress is simply a raft or platform of round logs, not less than 12 inches in diameter, (nor less than 9 inches in diameter at the small end) placed close together, side by side, at right-angles to the line of the jetty, and firmly held there by transverse binders spiked or bolted to them.

"The binders will be smaller, logs, flattened on the lower side, and not less than 7 inches in depth at the small end, and the average depth through binder and log at the points of fastening will not be less than 19 inches. The binders will be placed not more than 8 feet apart, and those on the outside will be close to the ends of the logs. The spaces between the binders, except the two outside spaces, one on each side over the ends of the logs, will be filled with short logs, sawmill slabs, or other suitable material. This filling will be firmly held in place by pole binders, or by some other suitable method.

"Second Design.—This mattress will consist of the raft or platform secured by binders, as above described for the first design, the same to be overlaid with stout brush to an average depth of 7 inches, estimated in the finished work. The contractor will be allowed to make a layer of brush only four or five inches in average thickness, provided the sizes of the logs are correspondingly increased, so as to produce a mattress not less than 19 inches thick in the finished work. The brush is to be closely compacted, and firmly and securely held in place, and will project in the thick mats three to four feet beyond the ends of the logs.

"The logs used for the mattress may be loblolly, or other cheap variety of pine. They must be of gentle taper, and as straight as can be procured, and those of as nearly the same size as possible will be selected to go together.

1154 "Third Design.—This mattress will consist of a bottom grillage of poles of an average diameter of not less than 6 inches, and not less than 5 inches in diameter at the small end, placed in each course not more than five feet apart between centers, and the lower poles will be parallel to the line of the jetty. The spaces between the upper poles of this bottom grillage will be filled in with similar poles, or with sawmill slabs, or with an equivalent of stout brush, at the option of the contractor. Upon this will be placed two layers of stout brush aggregating 13 inches in thickness in the finished jetty, to be followed by a top grillage constructed like the one at the bottom. The poles of each grillage will be securely lashed together at the points of crossing, and

the upper and lower grillages will be firmly connected together by similar lashings, in such maner as the Engineer in charge shall approve."

Price for the foundation mattress, first designed, covered with one foot of rip rap stone, \$12.34 per lineal foot of a width of 54 feet; second design \$12.49 per lineal foot of a width of 54 feet; third design \$11.59 per lineal foot of a width of 54 feet.

I read from articles of agreement of Sept. 24th, 1884, between Col. Gillmore and John S. Howell, for constructing jetty in Brunswick Harbor, Georgia:

"This mattress is a raft of round logs not less than 9 inches in average diameter, and not less than 6 inches in diameter at the small end, placed in close contact side by side, and firmly held by transverse pole-binders spiked or bolted to them. There will be placed upon the raft of logs a layer of live wood brush, sufficient to give 5 inches in thickness in the finished work, secured in place by poles lashed to the binders of the raft.

"The binders will be smaller logs or poles, not less than 4 inches in depth at the small end, and placed not more than 8 feet apart, and those on the outside will be close to the ends of the logs.

"The logs and poles used may be loblolly, or other cheap variety of pine, and must be of gentle taper and sufficiently straight. Logs will not be used that do not fit close enough together to hold all the stone securely, even without the use of brush."

The price agreed upon in the contract for mattress of that character was 73-1/3 cents per square yard.

I read from Articles of Agreement of Sept. 1st, 1884, between Col. Gillmore and John F. Gaynor, for constructing training walls and wing dams, Savannah River and Harbor, Georgia. I think the terms are exactly identical with those just read, but I will read them:

"The mattress is simply a raft of logs not less than 12 inches in average diameter, and not less than 6 inches in diameter at the small end, placed in close contact side by side, at right angles to the line of the wall or dam, and firmly held by transverse binders spiked or bolted to them.

"The binders will be smaller logs or poles filled up with compact bundles of brush, placed parallel to the logs or mattress, to such depth as to give a thickness of not less than 6 inches when compacted in the finished work, secured in place by pole-binders, in such manner as the Engineer in charge

shall approve. The logs and binders used may be of loblolly, or other cheap variety of pine, and must be of gentle 1156 taper and sufficiently straight, and the brush will be live, hard-wood brush. Logs will not be used that do not fit close enough together to hold the stone safe even without the aid of brush."

The price agreed upon in this contract for such a mattress was 47 cents per square yard.

I read from Articles of Agreement of Dec. 5th, 1884, between Col. Gillmore and Edward H. Gaynor, for constructing wing dams in Savannah River:

"The dams will consist of brush made into fascines and loaded with stone or gravel. The fascines may, at the option of the Engineer in charge, be laid one at a time, or in mats, except where the water is over 4 feet deep, when they must be made into mats. When laid in shoal water, or when required by the Engineer in charge, the fascines will be fastened by stakes. There shall be, when stakes are used, at least two stakes to each fascine or to each foot in length of the mat. These stakes shall be at least 5 feet long for bottom layers and 6 feet long for the upper layers, should any be laid, and they must be driven until their heads are level with the brush.

"When any one layer of fascines is laid, the covering of stone may be from 6 to 10 inches thick.

"When more than one layer of fascine is used, each layer, except the upper one, shall be covered with stone or coarse gravel, or a mixture of both, from 4 to 6 inches in thickness.

"The second layer of brush shall be laid from 5 to 8 feet (as may be required) further up the stream than the lower layer, and the second layer shall be fastened and covered as the lower, and additional layers shall be similarly placed and covered, except that they shall be placed and laid each about 2 feet further up the stream than the one immediately below it, and the top layers covered with stone so described above, where a single layer of brush is used.

"In general, the volume of stone to a dam, after it shall become compacted, should not exceed one-half to one-third the volume of the fascine. Where coarse gravel is used, it may be necessary to apply it more liberally.

"The amount of stone or gravel to be used, and the manner of distributing it, will be prescribed by the Engineer in charge.

"At the juncture of each dam with the shore, there will be built 100 to 150 feet of shore protection 25 to 50 feet above, and 75 to 100 feet below, the center line of the dam. These shore protections will consist of a layer of fascines or loose brush as may be required, made into mats, sunk at the foot of the slope of the bank, extending out in the river and up the slope so far as may be necessary, and rip-rap stone will be distributed over said mat in such a manner and in such quantity as will be designated by the Engineer in charge.

"Similar shore protections may also be required at other points of the bank, in the section of the river indicated in these specifications, and will be executed wherever required by the Engineer in charge.

"The bank will be trimmed to a regular slope, and all trees, stumps, etc., removed before the building of the shore protection, and no extra charge for such preparation of the bank will be allowed.

"Fascines shall be made of live brush well trimmed and closely choked, 15 feet long, and from 12 to 15 inches in 1158 diameter at at the butt, and tied with four bands of tarred rope, the bands to be placed as the Engineer in charge shall approve. When made into mats, they will be closely compacted, and secured by at least three pairs of binding poles, joined by ties of tarred rope not more than two feet apart. The form of the fascine will be slightly tapering, and when made into mats, the butts will be side by side."

The price paid for fascines under this contract, 93 cents per square yard.

I read from Articles of Agreement entered into October 28, 1886, between Col. Gillmore and John F. Gaynor, for constructing training walls in Savannah Harbor and River, etc.;

"The mattress is simply a raft of round logs, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact side by side, at right angles to the line of the wall or dam, and firmly held by transverse binders spiked or bolted to them. The binders will be similar logs or poles, not less than 5 inches in diameter at the small end, and placed not more than 6 feet apart, and those on the outside will be close to the ends of the logs.

"The spaces between the binders will be closely filled up with compacy bundles of brush, placed parallel to the logs of the mattress, at such a depth as to give a thickness of not

less than 12 inches when compacted in the finished work, secured in place by pole binders in such manner as the Engineer in charge shall approve.

"At the option of the Engineer in charge, there will be placed upon the raft of logs, instead of the bundles of brush described, a layer of live wood brush sufficient to give 5 1159 inches in thickness in the finished work, secured in place by poles lashed to the binders of the raft.

"The logs and binders used may be of loblolly, or other cheap variety of pine, and must be of gentle taper and sufficiently straight, and the brush will be live, hard-wood, brush. Logs will not be used that do not fit close enough together to hold the stone safely, even without the aid of brush."

I am reading this mainly to get at the price bid and the kind of mattress bid upon. Mattress in the work will be paid for at the rate of 38¢ per square yard.

Counsel has called my attention to the following in the Supplemental Articles of Agreement:

"The fascines will be made of live brush, well trimmed, the butts placed in alternate directions and closely choked. They shall be from 10 to 20 feet long, from 12 to 15 inches in diameter, and tied with from 4 to 6 bands of wire or tarred rope, and shall be placed in the work singly or in mats, in such places, quantities, and manner as may be directed by the Engineer in charge. Fascines as finished and placed in the work shall be paid for at the rate of \$1.10 per cubic yard."

I read from Articles of Agreement between Capt. Jas. C. Post, Corps of Engineers, and Wm. H. Browne of Brooklyn, N. Y., for Improving Savannah River above Augusta, Ga., dated Jan'y 25, 1883:

"Details of Construction of Wing Dams.

"The wing dams will generally be composed of a compact pole-and brush mattress, overlaid with loose stone; but at some places the mattress may be omitted, and the dam be formed of stone alone, as shall be directed by the Engineer in charge. The mattress will be constructed of Willow or other suitable live brush. It will consist of a bottom grillage of poles, not less than six inches thick at the butt end, placed about six feet apart between centers, both longitudinally and transversely, and the lower poles shall be parallel to the line of the wing dam. Upon this grillage brush 1160 will be piled transversely to the line of the dam and to a height of not less than thirty inches, or more, so as to

secure a thickness of the layer of brush of not less than eighteen inches when fully compacted. A top grillage, constructed like the one placed at the bottom, will rest on top of the brush. The poles of each grillage will be firmly lashed together by wire or tarred rope lashings, and the upper and lower grillage will also be firmly lashed together, in such a manner as the Engineer in charge shall approve, so as to form a strong and compact mattress not less than eighteen inches thick through the brush in the finished work. The poles may be of a suitable variety of live pine, and must be of gentle taper, and as straight as can be procured."

The price for a mattress of that character was 92 1/2¢ per square yard.

Mr. Rose: Will you have it stated on the record that all of these contracts are made on form 19a, and that one of the conditions is, that if satisfactory progress is made, and that "if satisfactory progress is made" is written in? There seemed to be some point made on that the other day.

Judge-Advocate: Well, I will admit that it is in them without going over them,—that it is in all the contracts that have been made in this Engineering District.

Q. (Judge-Advocate continuing examination) Do you know who recommended that supplemental contract?

A. Lieut. Carter recommended it to Col. Gillmore.

Q. Counsel showed you a little red book; have you seen much of that red book of late years in the office?

A. Yes, sir; it is right in the office, but it has not been issued of late years.

Q. You mean that there are copies of it in the office?

A. Yes, sir.

Q. Have you seen it in the hands of employes for the government of them,—for their government?

1161 A. Those who are in the employment,—in the older employment, have them, but I have never seen that anybody uses the book.

Q. Has any employe of the Government, serving under the accused at headquarters, been called to account for disregarding the instructions contained in that book of late years, to your knowledge?

A. Yes, sir.

Q. To your knowledge, I asked?

A. Yes, sir; in 1894.

Q. Who was it?

A. A man named Schneider was discharged for violating a rule.

Q. What rule did he violate?

A. For accepting money from a contractor.

Q. Who was the contractor?

A. He accepted money from Chas. C. Ely and I think from Jacob Paulsen.

Judge-Advocate: Counsel calls my attention to the fact that I failed to read the Articles of Agreement between Col. Gillmore and Edwd. H. Gaynor, of June 22, 1885, for Constructing Spur-jetty at Tybee Island, Ga. The specifications for the improvement are in writing. (Reading)

"The jetty will consist of a raft composed of round logs 30 feet in length, not less than 12 inches in average diameter, and not less than 9 inches in diameter at the small end, placed in close contact side by side, at right-angles to the line of the jetty, and firmly held by transverse binders spiked or bolted to them.

The Binders will be smaller logs or poles, not less than 5 inches in diameter at the small end, and placed not more than 7 feet apart, and those on the outside will be close to the end of the logs.

"The logs and binder used may be of loblolly, or other cheap variety of pine, and must be of gentle taper and sufficiently straight. Logs will not be used that do not fit close enough together to hold the stone safely.

"The raft will be laid in sections," etc.

1162 Price paid for a mattress of that kind, \$1.12 1/2 per square yard. The quantity is not mentioned.

Witness excused.

Judge-Advocate: That, may it please the Court, brings me to a close, and the time has arrived which I have indicated might arrive at any time, when I ask for a slight delay, and I ask that, when the Court adjourns, it adjourn to meet Tuesday morning at 11.00 o'clock. It will give me much needed time in the preparation of the case.

The President: If there are no objections, Court stands adjourned until Tuesday morning, Feb'y 8th, at 11.00 o'clock a. m.

(Court adjourned at 3.00 p. m.)

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl
Judge Advocate—

1163

United States Court Room,

Savannah, Georgia,

February 8, 1898.

Court met pursuant to adjournment of Saturday, February 5, this morning at 11 o'clock.

Present:

All the members of the Court and the Judge-Advocate.
The accused, his counsel, and the Reporter G. T. Cann,
were also present.

JOHN G. SMITH, called as a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination.

Questions by Judge-Advocate.

Q. Please state your full name and place of residence, Mr. Smith?

A. John G. Smith, Charleston, South Carolina.

Q. What is your business?

A. Sub-marine engineer and contractor.

Q. What were you doing in 1891?

A. I was engaged on the North Island Jetty work, Win-yaw Bay, Charleston, S. C.

Q. Off what coast?

A. Off the coast of South Carolina.

Q. What was your employment?

A. I was superintendent of jetty work.

Q. Who, at that time, had the contract for the improvement that were going on?

A. Will T. Gaynor.

Q. And you were superintendent for him over the work?

A. I was, sir.

Q. Do you know the accused here, Captain Carter?

A. Yes, sir.

Q. How long have you known him?

1164 A. Off and on for seven or eight years.

Q. Did you at any time see him at Georgetown or where these works were going on?

A. Yes, sir; on one occasion.

Q. On what occasion was that?

A. He came down—in answer to a telegram I sent a tug boat to Georgetown for him and bought him down to the Island.

Q. In answer to what telegram, who was that from?

A. Captain B. D. Green.

Q. Where was it sent from?

A. Philadelphia I think, sir, as near as I can remember.

Q. Have you that telegram?

A. No, sir, I have not.

Q. Have you tried to find it?

A. I have, sir.

Q. Made diligent search and been unable to find it?

A. I have been unable to find it.

Q. It asked you to send the tow boat where?

A. To Georgetown.

Q. To meet Captain Carter?

A. To meet Captain Carter and bring him down to North Island.

Q. Did you send the boat?

A. I did, sir.

Q. Did Captain Carter return with it to North Island?

A. Yes, sir.

Q. Who was the officer in charge of that district?

A. Captain Bixby.

Q. Captain Bixby of the Engineer Corps?

A. Of the Engineer Corps, yes, sir.

Q. What did Captain Carter do on his arrival?

A. He looked around and asked me how I was getting on with the work, and went from one end of the trestle, one way and the other, to see how everything was going on.

1165 Q. What time did he arrive?

A. He arrived about 10 o'clock.

Q. How long was he there?

A. Until about half past two or three in the evening.

Q. How extensively did he examine the work going on?

A. Well, he walked up and down the railroad track and went out on the end of the trestle and examined the machinery

and asked how I was getting along with the work. I told him I was getting along very well, I thought, for the amount of force that I had.

Q. How as to the character of the work, did he have any comments to make?

A. No, sir; no more than merely he asked me how I was getting along with the sheet piling. I told him. He asked me if I thought I would get along better if the sheet piling was done away with, I told him, yes, sir, a good deal.

Q. Would that have been a saving of money?

A. It would have been to the contractors; yes, sir.

Q. Did Captain Carter make any further examination of what was being done there?

A. Not of the work, no, sir. No more than looking around, that is about all the inquiries he made in regard to the work or the manner the work was being did.

Q. Did he make any examination as to the administration of business?

A. Yes, sir, he asked me how I was getting along officially. I told him I was not getting money enough to carry on the work as it should be. He asked me how was that, I told him I was only sent money, so much at a time, it didn't amount to a row of pins when I would get three or four vessels in. He asked me how that was, I told him Captain Green was only sending me \$2,000.00 at a time.

Q. Who was sending you only \$2,000.00 at a time?

1166 A. Captain B. D. Green.

Q. He was not the contractor?

A. No, sir.

Q. Will T. Gaynor was the contractor and Captain Green sent you the money. Well, what else did Captain Carter do?

A. I showed him the books.

Q. Did he ask to see them?

A. No, I asked him if he would like to look at them, he said well, he might as well, I pulled them out and he looked over them.

Q. Well, how long was he engaged in the examination?

A. Well, you could not say it was an examination, about 10 or 15 minutes to look over the books.

Q. Why did you consider you had authority to let him look at the books?

- A. Well, I had no direct cause.
Q. You knew that they were acquaintances?
A. I knew that they were acquaintances, yes, sir.
Q. Was not it rather an unusual thing, Mr. Smith, to show the books of your employers to an outside party?
A. Well, I knew that Captain Carter and Captain Green were pretty intimate, I had seen them together a great deal, I thought there was no harm in it.
Q. Where had you seen them together?
A. In Savannah.
Q. Frequently?
A. Frequently, yes, sir.
Q. At what point?
A. Why I saw them together a great deal in the Pulaski House.
Q. Well, how frequently do you think you saw them together, what hours of the day?
A. Well, as a general thing it was in the evening, after supper.
Q. Anyone with them?
A. No, sir.
1167 Q. Have you anything to show that Captain B. D. Green took an interest in that contract of W. T. Gaynor's at that time?
A. I have letters to show that he was connected with it. (Here the letters are produced by the witness and handed to counsel for the accused.)
* * * * *
1168 Judge-Advocate: I offer in evidence and read these communications: (Reading)

“New York, June 5, 1891.

“Capt. John G. Smith,
Georgetown, S. C.

Dear Sir:

I inclose letters received today. I have written Donaldson, saying I would be in Georgetown about the 25th, June, and asking him to wait till then if he was unable to come to any agreement with you. I wish you would write me what you can do. If you can settle it, also how much you did in May, and how you are getting along. I have not heard from

you since I was there; I shall have the launch next week. There seems to be some difference between you and Donaldson. Can't you reconcile it? We don't want a lawsuit. You and Donaldson might go to Savannah and all be together and settle it.

Yours, truly

B. D. GREEN."

1169

"New York June 30, 1891.

"Dear Sir:

In some way your telegram to Mr. Gaynor was covered up on his desk, so that I did not see it, or I should have sent you money before. I inclose \$2,000. I wrote you yesterday. I have ordered the iron and the Manilla rope.

Yours respectfully,

B. D. GREEN."

"New York, Nov. 7, 1891.

"Dear Sir:

Your telegram received. The arrangement I made with Dawson was that he was to have \$5 a day and his men \$2.50 a day, and board themselves. If they stayed through the winter and could do the work, I was to furnish transportation down there, but if they quit after a short time, this fare, amounting to \$23 each was to be deducted. Ed Gaynor will come up there in a few days and see you.

Yours truly,

B. D. GREEN."

"Does the current still continue strong? or what is the trouble?"

Q. Do you know the meaning of that phrase, who were all to be together in Savannah?

A. Well, what he meant sir, was so he could see the two; this man, Donaldson and John Gaynor; that's what he alluded to.

Q. John Gaynor was not the one who had the contract there, it was Will Gaynor, was not it?

A. I never saw Will Gaynor on the job. John Gaynor was the party, one of the parties I was supposed to look to.

Q. Did you receive any money from any of the Gaynors, for payment on the work?

- A. No, sir.
- 1170 Q. Who furnished the amounts?
- A. B. D. Green, all checks were made out and sent by him.
- Q. You said that here in Savannah, you have seen the accused and B. D. Green at the Pulaski House after dinner, was that at night?
- A. Yes, sir, after supper in fact, after supper.
- Q. How long have you seen them together at one time?
- A. An hour at a time.
- Q. Frequently?
- A. Yes, sir, frequently.
- Q. And how recently?
- A. Up to 1891 and 1892.
- Q. You have not been in Savannah so much since then?
- A. Not connected with the work.
- Q. Where were you in 1889?
- A. In 1889, I was on the Fernandina work.
- Q. Who was the contractor there?
- A. Anson M. Bangs.
- Q. Did you ever see him there?
- A. No, sir, never saw him on the works.
- Q. Who furnished the money there?
- A. The two first checks came in Anson Bang's name and the others came in Capt. B. D. Green's name.
- Q. Do you know Myron F. Wheeler?
- A. Yes, sir, well.
- Q. Was he there at that time?
- A. No, sir.
- Q. Where did you know him?
- A. I have known him on the Georgetown work and the Savannah work, and the Richmond, Va., work.
- Q. Did you know him in '91 or '92?
- A. Yes, sir.
- 1171 Q. What was his employment in '91 and '92?
- A. The first part of '91 I think he was connected here with the Savannah work.
- Q. Working for whom?
- A. For the Atlantic Contracting Co.
- Q. Where was he in '92?
- A. '92 he came down to Georgetown to relieve me.

Q. What was the nature of his employment?

A. Foreman.

Q. Foreman of what?

A. The Georgetown work.

Q. The entire work?

A. Yes, sir.

Q. Do you know what his compensation was?

A. I never knew him to get over \$75 a month; if he got any more, I never heard of it.

Q. Do you know William H. Walsh?

A. Yes, sir.

Q. Is it always pronounced that way?

A. No, sir, I always heard it called "Welsh."

Q. Always heard it pronounced Welsh?

A. Yes, sir.

Q. Did you know him in '91 and '92?

A. Yes, sir.

Q. What was he doing?

A. Foreman of a mattress camp.

Q. Do you know what he was being paid?

A. As near as I can remember, I never knew of his getting over \$50 a month.

Q. Do you know who Welsh is, what his origin is, where he came from, what his connections are?

A. Well, I know he is a cousin of John Gaynor's, he married in the family, he married a Miss Gaynor, I think, I 1172 am positive he married one of the Gaynors.

Q. Now, as to Myron J. Wheeler,—it is not Myron F?

A. Myron J.

Q. About his connections?

A. He is a relative by marriage.

Q. Of whom?

A. Of the Gaynors and Bangs.

Q. Do you know if Anson M. Bangs is related to the Gaynors in any way?

A. Yes, sir.

Q. In what way?

A. A brother-in-law, he married John Gaynor's sister.

Q. When the Bangs' contract was being executed, while the work was being performed?

A. To which contract have you reference?

- Q. That is the Bangs' contract about which you have testified?
- A. The Fernandina contract, yes, sir.
- Q. You say you never saw Bangs there?
- A. I never saw him on the work.
- Q. Did you see B. D. Green there?
- A. Yes, sir, on several occasions.
- Q. What was he doing there?
- A. He came down to see how the work was going on.
- Q. Did he give instructions in regard to it?
- A. No, sir, he said he saw no room for improvement. He stayed all night and went off the next morning.
- Q. Did he examine the work?
- A. Yes, sir, he never went outside.
- Q. You recognized his authority to examine the work and criticise it if he saw fit?
- A. Yes, sir.
- Q. Did you receive instructions by mail or wire from Anson M. Bangs in relation to that contract?
- 1173 A. No, sir, only when those two checks came that I got from Anson Bangs.
- Q. He sent the checks?
- A. Yes, sir, in a letter of instructions.
- Q. In a letter of instructions,—did you receive letters of instruction from B. D. Green?
- A. I got instructions before I left Savannah.
- Q. Did you receive communications from him in relation to that work?
- A. I received letters right along.
- Q. Did you receive letters from anybody else in connection with that work except Capt. Green?
- A. No, sir.
- Q. When Capt. Carter examined the book, did he make any comment?
- A. No, sir.
- Q. None whatever?
- A. No, sir, no more than when he started off going down to the boat, he asked me if I thought there was any more money in it to do away with the sheet piling, I told him yes, I thought there was a good deal more.
- Q. What did he say then?

A. Well, he said to continue on with it until such time as I heard further.

Q. Whom were you to hear from?

A. That he didn't say.

Q. Was there any one present when he made that statement except yourself?

A. Yes, sir, Mr. Twiggs was right behind me as we were walking out the house.

Q. Which Twiggs?

A. P. E. Twiggs, I think.

Q. P. E. Twiggs?

A. Yes, sir, Mr. Twiggs was an inspector on the work,
1174 I would like to state.

Q. Were you offered any position by any of these parties different from the one you occupied?

A. After I got the work started, and everything was going along very nicely, my understanding was I was to be sent to Orange, N. J., and I declined it, and I resigned.

Q. What were you to go to Orange, N. J., for?

A. To take charge of sewer work there?

Q. Who was it had that work, do you know?

A. The contract, as near as I remember was in Will. T. Gaynor's name; I am not positive about that.

Q. Any corporation mentioned?

A. I don't remember of any corporation being mentioned.

Q. Who asked you to go there?

A. John Gaynor.

Q. Any one else?

A. Yes, sir, Ed Gaynor, John and Ed Gaynor were present.

Q. Did any one advise you to go?

A. And I got a letter from Capt. Green, asking me to come up there and take charge.

Q. That was in Orange, N. J., when was that?

A. In the latter part of '91 or first of '92, I forget now exactly.

Q. Who was in charge generally at Georgetown?

A. I was up to this time.

Q. I mean what officer of the Engineers at the time?

A. Capt. Bixby.

Q. At the time they wanted you to go to Orange, Capt. Bixby was in charge?

A. No, sir, when they wanted me to go there, Major Stanton,—when they wanted me to go and report at Orange, N. J., Major Stanton was in charge.

Q. After Major Stanton had relieved Capt. Bixby?

1175 A. Yes, sir, he hadn't taken charge over a week or ten days.

Q. Did Capt. Carter say anything about what instructions he had to visit there, or orders he had?

A. No, sir, there was no such remark.

Q. Where was Capt. Bixby at the time he was there?

A. In Wilmington, that is, I suppose he was in Wilmington.

Q. That is where his office was?

A. Yes, sir, that was his office.

* * * * *

1180 This is a proposal of the Atlantic Contracting Company for the improvement of the Altamaha River, Ga., in 1892.

Judge-Advocate: I will mark that Exhibit 52A; a copy of which will be attached to the record, marked Exhibit 52A, to connect it with the previous exhibit.

* * * * *

1189 WILLIAM F. M'CAULEY, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. Please state your full name, Mr. McCauley.

A. William F. McCauley.

Q. What is your business?

A. My business now, I am Cashier of the Chatam Bank.

Q. You have been a resident of Savannah a great many years?

A. All my life.

Q. Do you know William H. Walsh, or Welch?

A. No, sir.

Q. Ever heard of him?

A. Yes, I have heard of him.

Q. When did you first hear of him?

A. I heard of him in connection with Colonel Gaynor.

Q. How long ago?

A. Oh, I don't remember, 8 or 9 years ago.

Q. What was the extent of your knowledge concerning him?

A. As foreman for Colonel John F. Gaynor, that is all I know about him, I never saw the man in my life to know him.

Q. Did you know Myron J. Wheeler?

A. I knew a Mr. Wheeler here, I don't know whether his name was Myron or not.

Q. What was his occupation?

1190 Q. What was his occupation?

A. He was foreman with Mr. Gaynor.

Q. When did you know him?

A. Ever since the Gaynor's have had contracts on the Savannah River, I don't know exactly how long ago.

Q. It was in connection with the Gaynors that you knew Mr. Wheeler?

A. Yes, sir.

Q. As you had known Mr. Walsh?

A. Yes, sir.

Q. I think they called that Welch here, don't they, Mr. McCauley?

A. I don't know, sir.

Q. Do you know anything about Welch's financial standing?

A. No, sir.

Q. Did you ever know anything of his financial standing?

A. No, sir.

Q. Do you know anything of Mr. Wheeler's financial standing?

A. No, sir.

Q. Never did?

A. No, sir.

Q. Did you ever go before Michial A. Connolly to execute affidavits?

A. Well, if I did the affidavits will show for themselves, I don't remember positively having done so, I may have done so, I have had some business dealings with Mr. Connolly.

Q. I show the witness "Exhibit 27", the proposal of William H. Walsh, Improvement of Cumberland Sound, Georgia. It that your signature, Mr. McCauley?

A. That is my signature, sir.

Q. And that also?

A. That's my signature.

Q. And do you remember making oath before Michael A. Connolley that you were worth \$75,000.00?

1191 A. I guess I did, sir.

Q. You remember the circumstance?

A. I guess so, yes, sir; it has been some time ago, I don't know the date of that contract.

Q. It is William H. Walsh, September 10, 1892.

A. It is some time ago.

Q. You didn't know anything about the financial standing of Mr. Walsh at that time?

A. No, sir.

Q. Pretty heavy bond for a man that you didn't know?

A. It is a bidders bond, but I have security.

Q. What security?

A. I had the word of Colonel Gaynor that I would be protected if I signed the bond.

Q. You signed it at the request of John F. Gaynor?

A. Yes, sir.

Q. I show the witness "Exhibit 95", the proposal of William H. Walsh, opened July 10, 1891, that also is your signature, Mr. McCauley, and seal?

A. Yes, sir, both of those are my signatures.

Q. And you justified before Mr. Gillespie?

A. I don't remember, I signed a number of bonds for a number of people at the time, I cannot state from memory who I qualified before.

Q. This is another bond for William H. Walsh, about whose financial standing you knew nothing positively?

A. No, I knew nothing.

Q. Were you also protected in signing that bond?

A. Let me look at that, Colonel, please.

Q. Certainly.

1192 A. Yes, sir.

Q. You were also protected in that, and I show you now "Exhibit 97", which is the contractor's bond of William H.

Walsh, Fernandina, Florida. In relation to that, that also is your signature, that is not a bidders bond?

A. Yes, sir; those are my signatures, both of them.

Q. You were protected in signing that bond?

A. Yes, sir.

Q. In the sum of \$7,500.00?

A. Yes, sir.

Q. That also is your signature, Mr. McCauley?

A. Yes, sir.

Q. And this?

A. Yes, sir; that's my signature.

Q. That is before Mr. King, Clerk of the Circuit Court?

A. I cannot remember positively, you know it has been some time ago, I qualified before each of these gentlemen, but I cannot remember which one I qualified before.

Q. Those were fully executed?

A. Yes, sir; I stand by my signature, whatever you see there.

Q. That was for Charles C. Ely?

A. Yes, sir.

Q. Was that for Mr. Ely alone, or for any one else?

A. I signed that for Mr. Ely, just as the bond stated, I knew nobody else in connection with it.

Mr. Rose: What number is that?

Judge-Advocate: That is "Exhibit 107".

Q. This is "Exhibit 46", I show the witness "Exhibit 46", proposal of Charles C. Ely, Improvement of Altamaha River, Georgia; Darien Harbor, Georgia; Jekyl Creek, Georgia; and so forth. That is your signature, Mr. McCauley?

A. Yes, sir; what is the date of that?

1193 Q. That is April 6, 1895.

A. Yes, sir.

Q. Justification in the sum of \$40,000.00?

A. Yes, sir.

Q. Your justification is in the sum of \$40,000.00?

A. Yes, sir.

Q. Were you protected in that bond?

A. Well, we have always been for Charles C. Ely, I don't remember that.

Q. You knowing of Mr. Ely's standing, would you sign a bond of that amount for him?

A. To do work, yes.

Q. That is your signature, Mr. McCauley?

A. Yes, sir.

Q. With Anson M. Bangs as co-surety?

Judge-Advocate: This is a proposal of John F. Gaynor, for constructing training walls at Brunswick Harbor, Georgia, and Jekyl Creek, Georgia, opened February 14, 1891, which will be offered in evidence and a copy attached to the record and marked "Exhibit 46A".

Q. That is your signature, and that is also your signature?

A. Yes, sir.

Q. And the justification?

A. Yes, sir.

Q. In September, 1892, Mr. McCauley, you yourself became a bidder, didn't you?

A. Yes, sir.

Q. That was with a view to secure what has become known as the big contract?

A. Yes, sir.

Q. You bid there for 300,000 cubic yards of fascines at \$1.74 per yard?

A. Yes, sir.

1194 Q. Have you been engaged in the construction of fascines before?

A. Never.

Q. How did you arrive at the figures?

A. That figure was made in my office.

Q. By whom?

A. By the members of my Company, I don't remember myself now exactly who did it.

Q. Well, who constituted the members of the Company?

A. Our Company, the Savannah Dredging Company is incorporated under the laws of the State of Georgia, we have a number of stockholders; the officers are Jacob Paulsen, President; W. F. McCauley, Secretary and Treasurer at the time those figures were made I was at home, I had been sick for some time with typhoid-malarial fever and Mr. Paulsen came to the house and we discussed the matter of making the bids.

Q. Was it an incorporated Company?

A. Yes, sir, I will explain the matter to you fully. We would have had considerable difficulty in getting bond for the Savannah Dredging Company, if we had not given one member of our Company, Mr. Paulsen, which is against the law to do that. So as not to violate the law I took the contract in my name, or would have taken it, had I been the successful bidder, which I was not. Mr. Paulsen qualified as bonds-

man and Colonel J. H. Estell qualified as bondsman on the bond.

Q. Were you at that time, Mr. McCauley, confined to your house as an invalid?

A. Oh, yes, I was in bed, I signed the papers before a Notary Public.

Q. You signed them in bed?

1195 A. Yes, sir.

Q. Then you have no personal knowledge of what you were bidding, or what you were stating?

A. As officers of the Company, we had discussed the prices together, it has been some time ago General, I dont remember now how we arrived at the prices. We watched the matter very carefully, went into all the details, and we put that figure in, feeling if we could get the work at that figure we would be safe and make some money out of it.

Q. Have you any recollection of the figures you made?

A. No, sir, I could not remember the figures at this time, at this date.

Q. In that bid I find, Mr. McCauley, you propose to use three steamers, that was for the Company?

A. Yes, sir, three steamers, three tug boats I suppose.

Q. Three steamers it says, what did that mean?

A. I dont know what we proposed to do at this date, it was a very easy matter for us to get boats, we had nine boats, and the Savannah Dredging Company had one boat.

Q. I call attention to one feature that perhaps you will remember, it being a striking one, the bid was \$1.55 per lineal feet for pile dam, which makes \$6.20 per piling, driving piles, three of them would make \$18.60?

A. For the cluster.

Q. That would make for the three pilings \$18.60?

A. Yes, sir.

Q. Do you recall any distinction the bids made between piles and pile dams?

A. No, sir, I do not. We bid the bid and we lost the bid and the whole thing has passed from my memory.

Q. And there was also accompanying that bid \$51.00
1196 for three piles driven in one cluster, that is a marked feature of the bids, can you recall any distinction on that point?

A. No, sir.

Q. You don't remember any didtinction on that point?

A. No, sir.

Q. Did you consult any parties outside the stockholders in your Company, or did any of them give you any information?

A. Not to my knowledge.

Q. You bid \$2.60 a ton for rock. Where did you propose to get it, for large rock?

A. I think we proposed to get in New York and Florida, I think.

Q. Did you investigate as to freight rates that you could obtain?

A. Yes, I suppose we did at the time, it is not likely we would make a bid of that character without investigating that.

Q. Do you know who wrote the proposal?

A. No, sir, I do not, I was in bed.

Q. This is the proposal, Mr. McCauley, do you recognize by whom it was filled out (Handing witness a paper)?

A. No, sir, I do not know.

Q. Did your Company have a Secretary?

A. I was the Secretary.

Q. Did you have an assistant?

A. No, I dont think I did, at that time there may have ben a clerk in the office.

Q. You did have a clerk in the office? This is filled up in a handwriting with which you are not familiar?

A. I dont know whose writing it is.

Q. You dont know whose writing it is?

A. No, sir, I dont know.

Q. It was not written in your presence?

A. Oh, no, I was too ill.

1197 Q. Entirely different colored ink?

A. Yes, sir.

Judge-Advocate: I show the witness "Exhibit 34."

Q. You had been in business before, Mr. McCauley, contracting with the Government, hadn't you?

A. We have done a little contracting with the Government, not a great deal with the Government, most of our work has been done with mining phosphate rock.

Q. You have done contracting with Captain Carter?

A. I think we had one, possibly more, we have not had many contracts under Captain Carter, I will say that.

Q. Do you recall the incident of the affixing your signature, or were you too ill?

A. I remember affixing my signature.

Q. Did you read the bids, or were they read to you?

A. Yes, sir, they were read to me, I had full knowledge of everything.

Q. It was a contract involving many hundred thousand dollars?

A. Yes, sir.

Q. The different items were explained to you?

A. Yes, sir.

Q. At that time you fully understood what you were signing?

A. Yes, I knew what I was signing, I was not able to get down to the office to make those papers up, in fact I was in bed; they brought an officer who administered the oath, I dont remember the name, I think it was Mr. Peed, I am not sure.

A. At the time, Mr. McCauley, you submitted the proposal you were surety on Mr. Walsh's bond at the request of Colonel Gaynor, were you not?

A. You mean the first bond you showed me?

Q. Yes.

A. I was on Mr. Walsh's bond at the request of Colonel Gaynor, yes, sir.

Q. About a week before. And about two months after, you were again a guarantor for the Atlantic Contracting company?

A. I dont remember, you have the documents.

Q. You dont remember the fact?

A. It ought to be a matter of record. What year was that?

Q. 1892, about two weeks after you made this bid.

A. Well, that would make it in November, I was out in November, I was taken sick the 18th of August, I got out about the 25th of September.

Q. After bidding unsuccessfully, you became his surety, you dont recall that?

A. I dont recall it.

Q. A week before the bids were opened, at his request you became his surety for \$75,000.00.

A. Yes, sir, will you ask me that question, I didn't exactly catch what you meant. What is the date of the bid I became surety on for \$75,000.00?

Q. September 10, 1892.

A. It was in 1891 I became surety, September 10?

Q. September 10, 1892.

A. September 10, 1892?

Q. Yes, sir.

Cross-Examination.

Question By Mr. Charlton.

Q. Now, it seems you were going on bonds for the contracts, and you were making bids and doing all those things, before and after, were you conspiring and confederating with the Gaynors and Captain Carter to defraud the United States Government?

A. I hardly think so, and I dont think anybody in Savannah thinks so.

1199 Q. I dont think so either, Mr. McCauley, I dont know where this evidence is tending. I thought I would give you the opportunity to say whether you were or not, you may be a divers person? Is it anything unusual for a man who was practically in the same line of business to go on each others bonds.

A. I never found any difficulty in getting bond.

Q. Is it not a common practice?

A. Yes sir.

Q. You do not regard a man as a bitter enemy because he happens to bid against you?

A. No sir.

Q. You are perfectly able to go on those bonds?

A. I consider so.

Q. Did go on them?

A. Yes sir.

Q. Do not repudiate any case?

A. No sir.

Q. You are at present the Cashier of the Chatham Bank?

A. Yes, sir.

Q. That is a responsible position?

A. I think it is generally regarded as a responsible position.

Q. You are pretty well familiar with the financial status and rating of people?

A. I know some, yes, sir.

Q. Will you be kind enough to tell me whether or not Mr. James Foley's name on a paper for \$5,000.00 could go through your Bank?

A. Secured by proper collateral.

Q. No, by his securing it himself, by his name alone.

A. No, sir, no ones name.

Q. If he had a man's name on it not worth that amount of money?

1200 A. No, sir.

Judge-Advocate: I am quite willing to divide Mr. Sterly as one of my witnesses, but I am unwilling to divide all my witnesses with you.

Mr. Charlton: That is the only question.

Judge-Advocate: Very well.

Q. I mean a name upon the paper which itself carries no financial responsibility. Could Mr. Foley's name by being put upon it enable that paper to get \$5,000.00?

A. Mr. Foley's connection has always been very satisfactory, he has always met his paper promptly, I don't think it would be proper to answer that question, it would have to go before the Board of Directors, I would not pass anybody's paper, not even yours, and I think a great deal of you.

Q. I understand that you had enough confidence in one of these terrible contractors to take his word for \$75,000.00?

A. Yes, and I would take it again, I did no more for him than he would do for us, it was simply a bidders bond. I knew the bond would expire in a few days, as soon as the contract was awarded he would secure other men and I would be released.

Q. Still you had reliance upon his word?

A. Yes, sir.

Q. Have you ever bid upon Government work anywhere else?

A. Oh, lots of times.

Q. In this neighborhood?

A. In this neighborhood.

Q. Outside of Savannah?

A. No, I have never bid outside of Savannah.

Q. Have you ever made efforts to get specifications in Charleston?

A. Oh, yes.

Q. Be kind enough to tell the court what your experience was.

1201 A. I remember when General Gilmore was in charge of the district prior to the time of Captain Bailey, I don't remember whether Captain Post or Captain Green was in immediate charge, my inclination is that Captain Post was in charge; there was a contract to be let in the Savannah River. We heard of it a week prior to the opening of bids, there was no time to get the specifications by mail so I rushed over to

Charleston and applied for the specifications and they gave me one copy. I asked the Chief Clerk to give me three copies, that we proposed to bid, he told me that he could not give me any more that he did not have any more at his disposal and if I wanted to bid I would have to make out the duplicate and triplicate myself, which I did. I stayed up all night writing. I thought there would be a lot of bidders and put the bid very low, and much to my surprise we got the bid.

Q. That was not Captain Carter?

A. Oh, no, that was not Captain Carter.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. Who was that clerk?

A. I don't remember.

Q. How long ago was it.

A. 14 or 15 years ago.

Q. Where was the office then?

A. In the Custom House building in Charleston.

Q. Oh, at Charleston?

A. Yes, sir.

Q. You made a personal application.

A. Yes, I went over to Charleston myself to get the specifications and they could only give me one copy.

Q. Were there any printed copies?

1202 A. Yes, sir, one printed copy, I made the other two myself, copied them out.

Q. After that generous distribution, so that they had but one copy left, you were the only bidder?

Mr. Blair: There was nothing said about a generous distribution of the specifications.

Judge-Advocate: There must have been because there was only one left.

Witness: Yes, I was the only bidder.

Re-cross Examination.

Question by Mr. Charlton.

Q. You don't know whether they had given them out, or didn't have them there?

A. No, sir.

Q. That is all they gave you?

A. That's all.

Q. Do you remember how large a contract it was, how much was involved?

A. It was only a small one, I don't remember now, possibly two or three thousand dollars.

1206 At this point in the proceedings of the day, Reporter Geo. T. Cann was relieved by Reporter W. O. Tarver, who reported until the hour of adjournment.

ANSON SMALL, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Anson Small.

Q. Where do you live?

A. Rose Juice, Ga., near Bluffton.

Q. Where were you living last year?

A. Rose Juice, Ga.

Q. What kind of work were you doing?

A. Working on the jetty last year for awhile.

Q. Who were you working for?

A. I was working with Mr. Welsh.

Q. What was Mr. Welsh doing?

A. Putting in fascines, and building them up.

Q. Those were bundles of brush?

A. Yes, sir.

Q. What kind of work were you doing?

A. I was working tying brush.

Q. Tying what?

A. Tying brush.

Q. The fascines that you spoke of?

A. Yes, sir; that is what they call fascines.

Q. How many of you did it take to make one?

A. Three of us; three of us worked together to a bench.

Q. How much did you get apiece?

A. 2 1/2c apiece.

Q. You were paid by the number you did?

1207 A. Yes, sir.

Q. Two and a half cents.

A. Yes, sir.

- Q. Who paid you?
A. Mr. Welsh.
Q. Did each man get 2 1/2¢ or all three of you?
A. Yes, sir; 2 1/2¢ to the bundle; that is, we made fifty bundles for a day's work.
Q. And you got 2 1/2¢ apiece for the bundles you made?
A. Yes, sir.
Q. And that was divided among three laborers?
A. Yes, sir.

Cross-Examination by Mr. Charlton.

- Q. Did you have to furnish your own clothes and living during that time?
A. Yes, sir.
Q. And there was \$1.25 to divide among the three of you?
A. Yes, sir; that is for fifty bundles.
Q. Living must be cheap over in Carolina?
A. No, sir; not cheap, but, of course, that was all we could get.

Re-direct Examination by the Judge-Advocate.

- Q. You had to take what you could get, did you?
A. Yes, sir.
Witness excused.
-

1208 HECTOR KINLAW, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

- Q. What is your full name?
A. Hector Kinlaw.
Q. Where do you live?
A. New Bluffton.
Q. Where were you living last summer?
A. Near Bluffton.
Q. Who were you working for?
A. Working for Mr. Walsh and Mr. Gaynor.
Q. What were you doing?

- A. Tying brush.
- Q. How many men were helping you? How many were there together?
- A. Three.
- Q. Making what they call fascines?
- A. Yes, sir.
- Q. How much did you get apiece for them?
- A. 3 1/2¢.
- Q. What men were with you?
- A. Anson Small and Moses Brandt.
- Q. That makes the three?
- A. Yes, sir.
- Q. How many bundles did you make in a day?
- A. Well, sir; called fifty bundles a day's work.
- Q. You called fifty bundles a day's work?
- A. Yes, sir.
- Q. How much money would you get for a day's work,—the three of you?
- A. The three of us divided it up, and the three of us got, I suppose it come to \$3.50; divided that up together and—
- Q. I will not ask you to do a sum in arithmetic for me. How often were you paid?
- A. Every two weeks.
- 1209 Q. How much did you get at that time? What sum of money was paid you at the end of two weeks?
- A. At the end of two weeks we drew two dollars apiece.
- Q. Two dollars at the end of two weeks?
- A. Yes, sir.
- Q. Now, try to recollect what you did receive; two dollars at the end of two weeks for two weeks only?
- A. Yes, sir; two dollars apiece.
- Q. Was that the most you ever received?
- A. Yes, sir; that was the best we got.
- Q. One dollar a week?
- A. Yes, sir.
- Q. How many bundles could you make every day?
- A. Every day we could not make fifty; some days there was no brush; some days good brush and some days there ain't.
- Q. What is the largest number you ever made in a day?
- A. Some days we make fifty bundles, and some days we didn't make but twenty, when the brush was scattering and scraped up.
- Q. What became of the bundles after you made them?

A. Hauled them. After we done make them, they marked them and hauled them.

Q. All of them?

A. Yes, sir.

Q. Took them away?

A. Yes, sir.

Q. Did you always get as much as 3 1/2¢?

A. No, sir.

Q. What did you get at other times?

A. Well, we got at the rate of about 40¢ sometimes.

Q. I mean for each bundle?

A. For each bundle, 3 1/2¢ a bundle.

Q. You always got the same price?

A. The same price.

1210 Q. Always?

A. The same price when I was working for them.

Cross-Examination by Mr. Charlton.

Q. You have always lived in South Carolina?

A. Yes, sir.

Q. About Bluffton?

A. Yes, sir.

Q. When did you come to Savannah this time?

A. I came to Savannah last Friday.

Q. Were you up here on Saturday?

A. Yes, sir.

Q. Where were you?

A. Up here.

Q. In this Court room?

A. No, sir.

Q. In the room over there?

A. Yes, sir.

Q. All of you?

A. Yes, sir.

Q. Was any white man in there with you?

A. No, sir.

Q. At no time?

A. No, sir; I didn't see any was in there.

Q. You were all just there together?

A. Yes, sir.

Q. What made you come over here? Who asked you to come over here?

A. To the Court?

- Q. Yes?
- A. I don't know rightly, sir, the gentleman's name.
- Q. Did you hear his name?
- A. Yes, sir.
- 1211 Q. Would you know it if I called it?
- A. Yes, sir.
- Q. Was it Mr. Hale?
- A. Yes, sir; that is his name.
- Q. What did Mr. Hale say to you?
- A. He asked me the same question what you asked me; asked me if I was at work on the brush work, and I told him yes, sir, and I up and told him, and then he went back, and come back, and I had a summons to come.
- Q. Did he tell you you would get anything?
- A. No, sir; didn't give me nothing.
- Q. Has he been with you since then?
- A. No, sir.
- Q. Have you had any talk with Mr. Hale since you have been here?
- A. No, sir.
- Q. Have you seen him since you have been here?
- A. Saw him this morning.
- Q. Did you have any talk at all with him?
- A. No, sir.
- Q. Did he have any talk with any of the other boys?
- A. I didn't notice that.
- Witness excused.
-

- 1212 A. M. MILLER, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

- Q. What is your name?
- A. A. M. Miller.
- Q. Where do you live?
- A. Near Bluffton.
- Q. South Carolina?
- A. Yes, sir.
- Q. Did you ever work in the brush camp?
- A. Yes, sir.

Q. When?

A. Over at Montpelier and near Bluffton.

Q. Did you work there last summer?

A. Yes, sir.

Q. Who for?

A. Mr. Welsh.

Q. Mr. Welsh was your foreman?

A. Yes, sir. Mr. Coles was foreman in the woods,—counted the brush.

Q. Coles counted the brush?

A. Yes, sir.

Q. Mr. Welsh was foreman at what place?

A. He was foreman at the same place; him and Mr. Coles together.

Q. You were making what they call fascines there?

A. Making brush.

Q. Putting the brush together?

A. Yes, sir; tying them together in bundles.

Q. How much did you get apiece for those bundles you made?

A. Mr. Coles was the boss man in the woods, and I asked him what he was paying, and he said he didn't know, and that I must work on until a certain time, and finally he referred me to Mr. Welsh, and I asked Mr. Welsh what he was paying, and he said 2 1/2¢ a bundle.

1213 Q. How many did it take to work on a bundle at one time?

A. Two at the bench and one chopping brush.

Q. How many bundles did you make in a day?

A. They allowed you to make fifty bundles, and, if you made more than that, of course, they would pay you extra, but we never made more than fifty bundles.

Q. Did you get more than 2 1/2¢ apiece for them at any time?

A. Not to my recollection, I didn't; they paid 2 1/2¢.

Q. How often were you paid?

A. Every two weeks.

Q. Who kept account of the bundles?

A. Mr. Coles.

Q. He was your own man?

A. He was in the woods keeping account of the bundles.

Q. He kept the books, did he?

A. He might have; he kept account of the bundles in the woods; he takes the number of bundles in the woods.

Q. And put it down on paper, and kept the account of it?

A. Yes, sir.

Witness excused.

1214 MARTIN ALLSTON, (colored) a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your name?

A. Martin Allston.

Q. Where do you live?

A. I live in Bluffton Township, Beaufort County, S. C.

Q. Did you work in the brush camp last year?

A. Yes, sir.

Q. Who for?

A. For Mr. Willie Welsh and Mr. Coles.

Q. What were you doing?

A. I worked on the mat one day, and I worked the balance of the two weeks in the brush work.

Q. You only worked there two weeks?

A. Yes, sir.

Q. What doing?

A. Tying brush bundles.

Q. How many men were at work in making up a bundle of brush? How many men did it take to make a bundle?

A. Three men; sometimes two.

Q. How much were you paid for making these bundles?

A. 2 1/2¢ a bundle.

Q. That was for the whole bundle?

A. Yes, sir.

Q. To be divided among the three men?

A. Yes, sir.

Q. How many did you make in one day?

A. Some days I could make up to 25 and some days up to 100,—depends upon the brush. If the brush was sticky, and it was hard to get into it, we made but very little that day, and some days, when we could get soft brush, of course, we had a good day's work.

Witness excused.

1215 JOHN W. O. STERLY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. Did you find any evidence of any special report submitted by Capt Carter during the contract of 1892, Savannah Harbor, indicating an excess beyond the estimate of the quantities of brush mattress

A. No, sir; I did not find any.

Q. It is not contained in any of the reports?

A. No, sir.

Q. Did the monthly reports made by the accused give summaries of the amount previously used?

A. The monthly reports gave the summaries during the months done, but not of previous months.

Q. Have you been able to find any reports, monthly or special, informing the Chief of Engineers or the Division Engineer, of the fact that the estimated amount of brush mattresses was being exceeded?

A. No, sir; I have not found any such report; there is no such report.

Q. There is no such report?

A. No, sir.

Q. There has been no such report.

Q. Have you the monthly reports of Capt. Carter with you for the months of August and September, 1893?

A. Yes, sir. (Handing the Judge-Advocate the papers).

Judge-Advocate: I offer in evidence two monthly reports of the accused for August and September, 1893. Report of operations for the month of September 1893, for Improving Harbor at Savannah, Ga., and Money Statement. The report of operations sets forth that "Jetty work, under contract with the Atlantic Contracting Company, and dredging, under contract with P. Sanford Ross, were continued during the month.

"Four of the large stone and brush barges and two of the largest dredges are still in the marsh, where they were driven by the storm of August 27th," and then states the amount of work done on the Marsh Island training wall, and that there were placed in the North Long Island training wall 26,293.33 square yards of mattresses

from 30 to 40 feet wide, which were loaded with 1,111.17 cubic yards of stone.

"In all, there were placed in the work during the month: 573 piles, making a linear advance of pile work 2,305 feet; 3 piles, making 1 cluster of fender piles; 32,007.77 square yards of mattresses; 3,686.36 cubic yards of stone; 12,945.33 cubic yards of fascines.

That is for September. In the summary of the August report, it is stated that there were placed in the work during the month:

717 piles, making a linear advance of pile work of 2,927 feet.

120 piles, making 60 groups of tie piles.

73,614.05 square yards of mattresses.

9,883.98 cubic yards of fascines.

5,067.20 cubic yards of stone.

Copies of these reports will be attached to the record, and marked Exhibits Nos. 110 and 111.

Q. (Continuing examination). What was the total amount of mattresses used under that contract up to September, 1893,—make it to include September, 1893?

A. 374,497 square yards of mattresses.

Q. What was the estimate of mattresses to be used? What amount was used to canvass bids?

A. 200,000 square yards.

Q. This is the big contract I am speaking of?

A. 350,000 square yards.

Q. Referring now to the contract of October 8th, 1896; have you looked thoroughly, as I asked you to the other day, to see if any modification of either of those contracts, 1217 Cumberland Sound or Savannah Harbor, have been authorized?

A. Yes, sir; I have looked.

Q. There is no evidence of any such authority?

A. No, sir.

Q. No evidence of any modification having been made?

A. I didn't see any.

Q. Or report?

A. I didn't see any report.

Q. Any reference to any divergence from the project for Cumberland Sound of the Board of Engineers of December, 1895?

A. No, sir.

Q. Take the contract of Charles C. Ely for Brunswick Harbor in 1889; did you find any correspondence between the contractor and the officer in charge concerning the carrying on of the work?

A. No, sir; except that the articles of Agreement were sent to him for signature, but nothing in regard to the carrying on of the work.

Q. Had Mr. Ely ever had a contract before that time?

A. He had had no jetty contract; he may have had a dredging contract but I don't think he had.

Q. No letter of instruction to him, or to others about the work, that you could find in the records. Did any question of difference arise in relation to the execution of the works,—any dispute?

A. No, sir.

Q. There was no correspondence at all in regard to the execution of the work?

A. No, sir.

Q. Have you the pay-roll for Ft. Pulaski, 1886?

A. Pay-roll for 1886?

Q. April, 1886?

A. The pay-roll is in the office boxed up with Gen. 1218 Gillmore's pay-rolls; I have in a copy book a copy of the time sheet.

Q. Did you find the names of Thos. H. Harvey, Jno. F. Gaynor and Wm. H. Walsh on that roll?

A. That is copied in the Savannah Harbor book.

Q. You do find that there?

A. Yes, sir.

Q. You have it there?

A. No, sir; Capt. McClure has that book.

Q. Page 163; do you find the name of Wm. H. Walsh there?

A. Yes, sir.

Q. How was he employed?

A. As a laborer.

Q. At what rate of compensation?

A. 15c per hour for 100 hours, \$15.00,—Preservation and Repair of Fortifications, Fort Pulaski.

Q. Look at that large table again that you brought with you, and tell me when John F. Gaynor commenced and finished at Fernandina, contract of 1891?

A. John F. Gaynor finished at Fernandina on the 14th of November, 1891.

Q. When did he begin, does it show?

A. On the 23rd of June, 1891.

Q. When did Wm. H. Walsh begin his contract, at Ft. Clinch?

A. He began on the 1st of October, 1891.

Q. Where is Ft. Clinch?

A. About three miles from Fernandina.

Q. Were any letters written to Walsh in regard to that contract?

A. Papers were forwarded to him,—contract papers were forwarded to him.

Q. No letters of instruction or letters in regard to the work going on?

A. No, sir.

Q. There are none to be found?

1219 A. No, sir.

Q. You have looked for them?

A. Yes, sir; not in regard to the execution of the work, but I think in the letter notifying him of the acceptance of the bid, that he was told he might prepare, and get his plant ready.

Q. Look at page 76, Fort Clinch Letter Book?

A. (Witness handed Judge-Advocate the book, and page requested.)

Judge-Advocate: I offer in evidence and read from, page 76, Ft. Clinch Letter Book:

“United States Engineer Office,
“Savannah, Ga., July 16, 1891.

“Mr. Wm. H. Walsh,

“Fernandina, Fla.

“Sir:

“I have to inform you that your bid of the 10th inst., for constructing spur jetties at Fort Clinch, Florida, has been accepted at the following prices:

“Brush Mattresses, \$.99 per square yard.

“Brush fascines, 1.57 per cubic yard.

“Stone, 3.59 per cubic yard.

“You may proceed to put your plant in proper condition for doing this work, pending the preparation of articles of agreement and bonds.

“Very respectfully,

“Your obedient servant,

“O. M. CARTER,

“Capt., Corps of Engrs., U. S. A.”

Also from page 80, same book:

“United States Engineer Office,
Savannah, Ga., July 20, 1891.

“Mr. Wm. H. Walsh,
“Fernandina, Fla.

“Sir:

1220 “I transmit herewith, articles of agreement in quintuplicate and bonds in triplicate, for work of constructing spur jetties near Fort Clinch, Florida. Please have them properly filled out at the earliest opportunity and then return them to this office by registered mail.

“Very respectfully,

“Your obedient servant,

“O. M. CARTER,

“Capt., Corps of Engrs., U. S. A.

“(8 enclosures)”

Marked in pencil: “Returned O. K. July 27, 1891.”

Also from page 85 of the same book:

“United States Engineer Office,

“Savannah, Ga., Aug. 26, 1891.

“Mr. Wm. H. Walsh,
“Fernandina, Florida.

“Sir:

“There is sent herewith, one copy of articles of agreement for constructing spur jetties near Fort Clinch, Florida. This has been approved by the Chief of Engineers, U. S. Army, under date of August 7, 1891.

“By direction and during the absence of Capt. Carter:—

“Very respectfully,

“Your obedient servant,

“M. A. CONNELLY,

“Clerk.

“(One enclosure)”.

Q. (Continuing examination, and handing witness paper)
What is that?

A. That is a letter transmitting check to Mr. Walsh.

Judge-Advocate: This is offered in evidence as the payment to Wm. H. Walsh, enclosing a check to Fernandina, Fla., sent by Capt. Carter,—a check for \$11,899.71, and the receipt at Georgetown, S. C., dated December 3rd, 1891, “Received the above check. Wm. H. Walsh.” The communication is sent to Mr. Walsh signed, “O. M. Carter, Capt., Corps of Engrs.”, with a “Cy”; evidently sent by Connolly.

Q. (Continuing examination) What was the total amount appropriated for Savannah Harbor in 1892; that is the continuous contract?

A. \$3,500,000.

Q. How much of that was spent for jetty work?

A. \$2,110,869.53.

Q. And how much was spent for dredging?

A. For dredging was spent, \$896,807.73.

Q. How many cubic yards of material was dredged?

A. 5,605,048.3 cubic yards.

Q. How much is provided for dredging in the contract of 1896, in Savannah Harbor?

A. 500,000 cubic yards, but that may be increased to 1,250,000 cubic yards, including the 500,000, should the construction work require more than one year before it is completed.

Q. Now, look at Cumberland Sound Book, N. 1; look and see if any letters were written to Mr. Bangs in regard to work in Cumberland Sound in 1894. When were bids accepted for that work,—page 434?

A. On October 4, 1894.

Q. When were the articles of agreement transmitted? Page 436.

A. On the 6th of November, 1894.

Q. When were the contract papers transmitted? page 444.

A. On the 27th of November, to Mr. Bangs.

Q. Do you find any letter on file from Mr. Bangs?

A. No, sir.

Q. Where were the contract papers signed?

A. The contract papers were signed in Savannah.

Q. Were you present?

A. Yes, sir.

Q. Did you witness the signatures?

A. I witnessed Mr. Bangs' signature.

Q. You saw him write it?

1222 A. Yes, sir.

Q. Look at the table, and see when work began under Mr. Bangs' contract and when it closed?

A. It began on the 28th of November, 1894, and closed on the 24th of June, 1895.

Q. In the period intervening between those dates, were any communications sent to Mr. Bangs aside from those having relation to the signing of the contract?

A. I don't know whether checks were sent; no other communications.

Q. No instructions or criticism of the work?

A. No, sir.

Q. Were any letters written to Mr. Walsh in regard to the Savannah River work above Augusta in 1892? That is the book we are waiting for, is it not?

A. Yes, sir; that is the book.

Q. Then we will go to the Bangs contract of 1888, for Cumberland Sound, page 438, No. 3 Miscellaneous?

A. On the 12th of January, 1889.

Q. The bid was accepted?

A. Yes, sir.

Q. Anson M. Bangs?

A. Anson M. Bangs, Fayetteville.

Q. When were the contract papers transmitted?

A. On the 12th of January,—on the same date.

Q. When were the articles of agreement returned? Look at page 10, Miscellaneous No. 4.

A. On the 24th of January, 1889.

Q. What is that?

A. It is a letter to Mr. Bangs on the 24th of January, 1889, returning the articles of agreement that they may be properly filled out.

A. Look at Page 38, the same book?

1223 A. That is a letter to Ansom M. Bangs of January 29, 1889. It is a letter stating that, through a clerical inadvertence, an error has been made. "In the Contractor's Bond the certificates as to the liability of each surety can be sworn to by them before a notary public.

Q. Look at page 97 of the same book?

A. On Feb'y 9, 1889, the contractor's bond is returned to him. "It does not appear that the postmaster at Fayetteville has any authority to administer an oath."

Q. Look at C. S. 7, 1889; what is that?

A. That is a telegram from John G. Smith, Fernandina, Fla., to Lient. Carter.

Q. Read it.

A. (Witness reading) "Lient. Carter, Savannah, Ga. Weather bad. Want about four hundred feet to deep water. Can you let me work deep water. In short blocked with material." Jno. G. Smith."

Q. Now look at page 460, Miscellaneous No. 4.

A. (Reading) "Paret, U. S. Engineer Office, Fernandina, Fla. Contractor wishes to work in deep water temporarily. Can this be allowed without damage to the Government's interests? Telegraph answer. Carter, Engineers. Official Business."

Q. Who was that sent to?

A. Paret.

Q. Who was Paret?

A. Assistant Engineer in local charge at Fernandina.

Q. Look at C. S. 8, 1889.

A. This is an answer from Paret, a telegram in answer to this one. "Fernandina, Fla., April 19, 1889. Lt. Carter, Savannah, Ga. No such emergency existing. Contractor might have such permission if not too general. Paret."

Q. Page 76-77, Miscellaneous No. 5?

A. Pages 76 and 77, is a letter addressed to Anson M. Bangs, Fayetteville, dated May 4, 1889, transmitting a check and the vouchers.

1224 Q. Fayetteville, in what State?

A. New York.

Q. Look at Page 308, same Book.

A. Page 308, June 7, 1889, transmitting a check for \$8,237.18, for jetty work done in May at Cumberland Sound.

Q. Transmitting to whom?

A. Anson M. Bangs, Richmond, Me.

Q. Look at page 311?

A. That is a press copy of voucher for \$8,237.18, sent to Bangs for signature.

Q. Now, page 431, same book?

A. It is a press copy of voucher for Anson M. Bangs, sent to Richmond, Me., for \$9,473.08.

A. Now, take the Savannah River, above Augusta, Book. When was work begun there; that is, under the Walsh contract?

A. On the 14th of October, 1892, and ended on the 26th of June, 1893.

Q. Did you find any letter on file from Mr. Walsh in regard to that work?

A. No other letters but those transmitting the contract papers.

Q. Look at page 28, S. R. above Augusta?

A. It is a letter notifying Mr. Walsh that the contract has been awarded him.

Q. Page 41, what pencil mark is that?

A. "Delivered O. K."

Q. Whose writing is that?

A. Mr. Connolly's.

Judge-Advocate: I offer in evidence, and read:

"United States Engineer Office,
Savannah, Ga., Nov. 16, 1892.

"Mr. William H. Walsh,

"Fernandina, Fla.

"Dear Sir:

"Herewith please find copy of contract executed with
1225 you, for improving Savannah River, above Augusta,
Georgia, approved by the Chief of Engineers, U. S. Army,
November 9, 1892.

Very respectfully yours,

O. M. CARTER,
"Capt., Corps of Engrs., U. S. A.

"(One enclosure)".

Marked in pencil, as the witness testified, "Delivered O. K.",
in the handwriting of Mr. Connolly.

Q. Now look at page 47, same book?

A. (Witness handed Judge-Advocate Book, and page)
Judge-Advocate: (Reading)

"United States Engineer Office,
Savannah, Ga., May 25, 1893.

"Mr. William H. Walsh,

"Fernandina, Fla.

"Sir:

"You will prepare to resume work on the upper Savannah
River not later than Monday, May 29, 1893, as the terms of
your contract require that all work on that River shall be com-
pleted on or before the 30th of June, 1893.

"Very respectfully,

"Your obedient servant,

O. M. CARTER,
"Capt., Corps of Engrs., U. S. A."

Q. (Handing witness paper) Do you know whose hand-
writing that is?

A. By comparing this with records on file, I should say it
is the handwriting of B. D. Green.

Q. What is the paper? What is the character of the paper?
What is its brief?

A. "Gaynor, Jno. F. will furnish brush fascines, and will

level rock on dams—for raising—for one dollar and ten cents per cub. yd.”

1226 Judge-Advocate: I offer in evidence and read:

“Savannah, Ga., Dec. 3, 1886.

“Lieut. O. M. Carter,

“Corps of Engrs., U. S. A.

“Savannah, Ga.

“Lientenant:

“In reply to your inquiry as to the cost of brush fascines for levelling dams already built and the levelling the rock to prepare dams for raising, I beg leave to say that I will do this preparatory work, and furnish the brush in place as required, for One dollar and ten cents (\$1.10) per cubic yard. I wish to say that, considering the greater distance brush has to be brought, and its scarcity, this price is twenty per cent below the price last year.

“Very respectfully yours,

“JOHN F. GAYNOR.”

“1st indorsement.

“United States Engineer Office,

“Savannah, Ga., Dec. 3, 1886.

“Respectfully forwarded to,

“Col. Q. A. Gillmore, Corps of Engrs., U. S. A.

“In the repairs to dams 26 and 33, as well as in the execution of work upon the Fig Island Jetty, and the various closure dams, it will be advantageous to use brush fascines instead of stone up to a height of from 3 to 5 feet above low water, and the enclosed communication from Mr. Gaynor is in response to my inquiry as to the price for which he would do this work. The fascines are to be made of live brush, well trimmed, the butts placed in alternate directions, and closely choked. These fascines will be from 10 to 20 feet long, from 12 to 15 inches in diameter, and tied with from 4 to 6 bands of wire or tarred rope, to be placed as the Engineer in charge shall approve.

They are to be placed in the work singly or in mats, in 1227 such places, quantities and manner as may be directed by the Engineer in charge.

“When made into mats, the fascines will be packed together, and secured by binding poles, joined by ties of wire or tarred rope, not more than two feet apart, the form and dimensions of mats and the method of their construction to be such as the Engineer in charge shall approve. For measurement, the fascines will be piled up either on shore or on a boat where they can be accurately measured. The price

will include levelling the dams preparatory to beginning work, and in general, whatever in the opinion of the Engineer in charge may be necessary to secure a good job.

"I do not think the price asked by Mr. Gaynor (\$1.10 per cub. yd.) is excessive.

"Should this proposition be accepted, I desire to begin work on dams 26 & 33 at once, in order to complete the work in that section, while dams 28 and 35 are being constructed.

"O. M. CARTER,

"1st Lt. Corps of Engrs., U. S. A."

Pencil memorandum on the brief: "Supplemental Articles of Agreement executed Dec., 1886. Letter to C. of E. Dec. Reply No."

Q. In whose handwriting is that pencil memo.?

A. James Gillmore's.

Q. James Gillmore?

A. Yes, sir.

Q. A clerk in the office here?

A. No, sir; he was in Gen. Gillmore's office.

Q. In New York City?

A. Yes, sir; he wrote that "Supplemental Articles of Agreement executed Dec., 1886."

Q. What you have just read was written by Mr. Gillmore, New York City

A. Yes, sir.

Q. And that memorandum down there, "Letter to C. of E."?

A. It is all written by him; it was written in the office in N. Y.

1228 Judge-Advocate: I desire to submit to the Court the letters from B. D. Green, which were in evidence this morning through the testimony of Capt. Smith, which he identified as having received from him, and this letter signed John F. Gaynor, Savannah, Ga. Dec. 3, 1886.

Q. (Continuing examination) That supplemental contract for fascines at \$1.10 per cubic yard was supplemental to the contract where mattresses were paid for by the square yard, or do you remember?

A. I don't remember.

Q. Do you remember the contract where the mattresses were 38c per sq. yard?

A. I don't remember that.

Q. Is it not on your chart?

A. I don't remember which contract it was.

Q. I think it is on your chart there. Your chart does not go back far enough for that?

A. No, sir.

Q. You can get that information by morning?

A. Yes, sir.

Q. Do you remember anything about that contract of 1886,—the Gaynor contract?

A. I have got some notes here; it maybe among those.

Q. Would that show what was paid for mattresses per sq. yard?

A. No, sir; I haven't got that.

Q. Would it show how many sq. yards of mattress were used under that contract?

A. I have the record in the office.

A. Judge-Advocate: I will ask you to get that tomorrow morning; also, the information about how many cubic yards of fascines were used in that contract, and give the supplemental contract at \$1.10, and how many sq. yards of mattress were used at the original price.

1229

Cross-Examination by Mr. Rose.

Q. I understood you to say that the monthly reports did not show the amount of work done the previous month on any of these contracts?

A. The monthly reports of operation show the amount of work done during the month.

Q. But not the amount of work done before?

A. Not the summary.

Q. Then, I understand you to say that there was nothing on record to show the amount of work done up to the time of making the report, is that right?

A. Nothing on file.

Q. Showing a summary of the work done up to the time of making that report?

A. No, sir.

Q. There is nothing of that kind?

A. Yes, sir.

Q. What is that?

A. That is the Engineers estimate, which is filed with the monthly report of operations, but I was asked if there was anything that goes to the Chief of Engineers.

Q. There is nothing that goes from the office of the En-

gineer in charge to the Chief of Engineers that shows a summary of the work done?

A. Yes, sir; the annual report.

Q. When is that sent?

A. At the end of the fiscal year.

Q. Was one sent with reference to what is called the big contract, in 1892?

A. Yes, sir.

Q. When was the first one sent after that contract was entered into?

A. 1st of July, 1893.

Q. And there was one sent on the 1st of July, 1894?

1230 A. Yes, sir; every year.

Q. The work wasn't then complete, was it?

A. No, sir.

Q. These reports are printed after they are sent to the Chief of Engineers?

A. Yes, sir.

Q. And you have sent reports for 1893 and 1894?

A. Yes, sir.

Mr. Rose: (Addressing Judge-Advocate) You do not wish me to identify them any further?

Judge-Advocate: No, sir.

Q. (Mr. Rose continuing) Will you take your chart there, and tell me the amount of mats that were used to canvass bids by?

A. Which contract; the big contract?

Q. Savannah Harbor, 1892?

A. 350,000 sq. yards.

Q. And that contract was entered into when?

A. On the 28th of October, 1892.

Mr. Rose, I read, and wish to have spread upon the record, from the Annual Report of the Chief of Engineers, 1893, Appendix N., page 1540, where it states:

"Altogether there were, therefore, put into the various works during the year 63,688.65 cubic yards of fascines, 240,708.95 sq. yards of mattresses," and the rest relates to other subjects.

I also read from Report of 1894, Appendix N, page 1134, in which it states with reference to Savannah Harbor work:

"Altogether there were, therefore, put into the various works during the fiscal year by the Atlantic Contracting Company: Brush mattresses, 699,536.65 sq. yards."

Q. (Mr. Rose continuing examination) And the amount, as I understood you, used to canvass bids by, was 350,000.

A. Yes, sir.

1231 Q. What was the amount of brush fascines, cubic yards, that was used to convass bids by, do you remember?

A. 300,000 cubic yards of fascines.

Q. The amount of sawed timber?

A. 800,000 feet.

Mr. Rose: I read from the Annual Report of the Chief of Engineers, 1894, Appendix N, page 3, dated Washington, Sept. 29, 1894. The statement is therein made that "During the fiscal year just closed there was used * * * 699,536.65 square yards of brush mattresses."

The same figures that are given in Capt. Carter's report, showing that the Chief of Engineers had these figures before him at that time. This is in his report to the Secretary of War.

Witness excused for the day.

The President: If there are no objections, Court will stand adjourned until 11.00 o'clock tomorrow morning.

(Court adjourned at 3.00 o'clock p. m.)

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

1232

United States Court Room,
Savannah, Ga.,
February 9th, 1898.

Court met pursuant to its adjournment of yesterday at 11.00 o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his Counsel, and the Reporter, W. O. Tarver, were also present.

The President: Court will come to order.

JOHN W. O. STERLY, a witness for the prosecution, previously sworn, resumed the stand, and testified as follows:

Direct Examination by the Judge-Advocate.

Q. I asked you yesterday what was the price per square yard in Mr. Jno. F. Gaynor's contract of 1886, for Savannah Harbor?

A. Thirty eight cents per square yard.

Q. What was the amount subsequently paid per cubic yard for fascines

A. \$1.10.

Q. What was the quantity of mats, the number of square yards used to canvass bids for that contract?

A. From 60,000 to 90,000 square yards of mats.

Q. And what the number of cubic yards of stone?

A. From 20,000 to 25,000 cubic yards of stone.

Q. What was the price per cubic yard of stone?

A. \$3.00 per cubic yard.

Q. Have you the supplemental contract?

A. Yes, sir.

Judge-Advocate: This paper, the supplemental contract of Dec. 22, 1886, between Col. Gillmore and John F. Gaynor, for Constructing Training Walls, etc., in Savannah Harbor and River, Ga, has been produced and read over before in 1233 the progress of this case, but, to complete the record, I shall have a copy of it attached to the record marked Exhibit No. 112.

Q. (Continuing examination) How many square yards of mats were used under that contract?

A. 40,980.45 square yards.

Q. Amounting in money to what?

A. To \$15,572.57.

Q. How many cubic yards of stone?

A. 17,670.98 cubic yards of stone.

Q. Amounting in money to how much?

A. To \$53,012.94.

Q. How many cubic yards of fascines?

A. 39,871.36 cubic yards of fascines, amounting to, in money, \$43,858.50.

Q. What was the aggregate amount of money paid on that contract?

A. \$112,444.01.

Q. When did work begin upon it?

A. Work began on the 28th of November, 1886.

Q. And closed when?

A. Closed on the 3rd of July, 1887.

Cross-Examination by Mr. Rose.

Q. Do you know whether there was a contract prior to the supplemental contract of 1886 for fascines?

A. Yes, sir.

Q. In 1884 or 1885?

A. In 1885?

Q. Yes; the supplemental contract was in 1886?

A. Yes, sir.

Q. Now in 1884 or 1885, was there any other contract for fascines?

A. There were fascines used under the 1884 contract, but the contract does not give any price for fascines.

Q. You are sure of that?

1234 A. That is another contract.

Q. Do you know whether there were any fascines paid for under the contract of 1884?

A. Under the 1884 contract?

Q. Do you know?

A. No, sir; I don't know; it was before my time.

Witness excused.

Judge-Advocate: I now propose, may it please the Court, to offer in evidence and read the copies of checks, with their endorsements, sent by Mr. Jordan, and certified to by him as Assistant Treasurer.

Mr. Blair: If the Court please, I would like to ask the Judge-Advocate if there is any other, or different, information contained in these checks than what was read to the Court in the beginning. I find by an inspection of the record that twenty type-written pages were taken up in a description of these checks, and I submit that, unless there is some different information to be conveyed by a second reading that such reading might be dispensed with.

Judge-Advocate: I am not going to read the entire check, but only the numbers, the amounts and the endorsements.

Mr. Blair: That was all read before.

Judge-Advocate: No, sir; the endorsements were not read, but only the payment of the checks.

The Judge-Advocate then read as follows from copies of checks signed by "O. M. Carter, Engineer U. S. A., Capt. Corps of Engrs., U. S. A."

"No. 200,308, December 31, 1892, Pay to the Order of The Atlantic Contracting Co., John F. Gaynor, President, \$20,000, paid Jan. 3, 1893, endorsed The Atlantic Contracting Co., John F. Gaynor, President, E. Burns, C. C. O. C.;" "meaning cash paid over the counter, which Mr. Jordan testified to.

Attached to the Record marked Exhibit 113.

1235 "No. 200,302, Dec. 16, 1892, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$8,507.45. Paid Dec. 20, 1892." Endorsed: "Pay to the order of Wm. T. Gaynor, The Atlantic Contracting Co., John F. Gaynor, President. Wm. T. Gaynor. Pay C. H. Patterson, Cashier, or order, Jas. H. Hunter, Cash. The Fourth National Bank of the City of New York, By F. M. Hinkle, Atty." Attached to the record marked Exhibit 114.

"No. 200,268, Dec. 3rd, 1892, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$5,000.00. Paid Dec. 5, 1892." Endorsed: "The Atlantic Contracting Co., John F. Gaynor, President. Pay to C. H. Patterson, Cash, or order, Jas. H. Hunter, Cash. The Fourth National Bank of the City of New York, by R. C. Thorp, Atty." Attached to the record marked Exhibit 115.

"No. 200,265, Nov. 7, 1892, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$3,265.61. Paid Nov. 21, 1892." Endorsed: "The Atlantic Contracting Co., John F. Gaynor President. Pay C. H. Patterson, Cash, or order. Jas. H. Hunter, Cash. The Fourth National Bank of the City of New York, by F. M. Hinkle, Atty." Attached to the record marked Exhibit 116.

"No. 200,312, Jan'y 10, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$25,416.81. Paid Jan'y 23, 1893." Endorsed: "Pay to the order of J. F. Gaynor, The Atlantic Contracting Co., John F. Gaynor, President. Pay Jas. H. Hunter, Cashier, or order, J. F. Gaynor. Pay C. H. Patterson, Cashier, or order, Jas. H. Hunter, Cashier. The Fourth National Bank of the City of New York, by F. M. Hinkle, Atty." Attached to the record marked Exhibit 117.

"No 200,322, Feb'y 4, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$37,722.83. Paid Feb'y 11, 1893." Endorsed: "21. Feb. 10, 1893: For deposit, The Atlantic Contracting Co., John F. Gaynor, President. Received payment through the New York Clearing House. American Exchange National Bank, Edward Burns, Cashier, Feb. 10, 1893." Attached to the record marked Exhibit 118.

1236 "No. 224,375, March 6, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$34,985.47. Paid March 14, 1893." Endorsed: "21, Mar. 13, 1893. The Atlantic Contracting Co., John F. Gaynor, President. Received payment through the New York Clear-

ing House. American Exchange National Bank, Edward Burns, Cashier, Mar. 13, 1893." Attached to the record marked Exhibit 119.

"No. 224,382, March 31, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$37,070.49. Paid April 14, 1893." Endorsed: "The Atlantic Contracting Co., John F. Gaynor, President. E. Burns, Cash." Pencil marked: "C. O. C.", meaning cashed over the counter. Attached to the record marked Exhibit 120.

"No. 224,385, April 3, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$20,584.51. Paid April 14, 1893." Endorsed: "The Atlantic Contracting Co., John F. Gaynor, President. E. Burns, C." and paid in cash over the counter. Attached to the record marked Exhibit 121.

"No. 224,386, April 3, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$3,493.72. Paid April 14, 1893." Endorsed: "The Atlantic Contracting Co., John F. Gaynor President. E. Burns, C." Paid in cash over the counter. Attached to the record marked Exhibit 122.

"No. 224,409, May 2, 1893, Pay to the order of the Atlantic Contracting Co., John F. Gaynor, President, \$30,000.00. Paid May 9, 1893." Endorsed: "21. May 8, 1893. The Atlantic Contracting Co., John F. Gaynor, President. For deposit, John F. Gaynor. Received payment through the New York Clearing House, American Exchange Nat'l Bank, Edward Burns, Cashier, May 8, 1893." Attached to the record marked Exhibit 123.

"No. 224,417, May 31, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treasurer, \$6,105.69. Paid June 5, 1893." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor Treasurer. For Deposit, B. D. Greene, A. Carr, A. C." Attached to the record marked Exhibit 124.

1237 "No. 224,418, June 3rd, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treasurer, \$3,309.40. Paid July 31, 1893". Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. Pay National Park Bank on order for collection account of Southern Bank State of Ga., James Sullivan, Cashier. James Sullivan, Cashier: Received payment through the New York Clearing House? National Park Bank, Geo. S. Hickok, Cashier, Jul. 31, 1893." Attached to the record marked Exhibit 125.

"No. 224,439, July 3rd, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treasurer, \$3,595.38, paid July 11, 1893. Edward H. Gaynor, Treas., Correct. O. M. Carter, Capt., Corps of Engrs., U. S. A.", evidently certifying to the signature. Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. W. T. Gaynor. E. Burns, C.", and "C" in pencil. Attached to the record marked Exhibit 126.

"No. 224,437, July 3, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treas., \$3,000.00. Paid July 11, 1893. Edward H. Gaynor, Treas., Correct. O. M. Carter, Capt., Corps of Engrs., U. S. A." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. W. T. Gaynor. E. Burns, Cash." Pencil "C". Attached to the record marked Exhibit 127.

"No. 224,438, July 3, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treas., \$7,558.83. Paid July 11, 1893. Edward H. Gaynor, Treas., Correct. O. M. Carter, Capt., Corps of Engrs., U. S. A." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. W. T. Gaynor, E. Burns, C." with a "C" in pencil. Attached to the record marked Exhibit 128.

"No. 224,431, July 3, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treas., \$5,968.18. Paid July 11, 1893. Edward H. Gaynor, Treas., Correct. O. M. Carter, Capt., Corps of Engrs., U. S. A." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. W. T. Gaynor. E. Burns, C." Pencil "C". Attached to the record marked Exhibit 129.

1238 "No. 224,432, July 3, 1893, Pay to the order of The Atlantic Contracting Co., Edward H. Gaynor, Treas., \$34,177.94. Paid July 12, 1893. Edward H. Gaynor, Treas., Correct. O. M. Carter, Capt., Corps of Engrs., U. S. A." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. For deposit, B. D. Greene. Received payment through the New York Clearing House, American Exchange National Bank, E. Burns, Cashier, July 11, 1893." Attached to the record marked Exhibit No. 130.

"No. 224,433, July 3rd, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treas., \$46,592.39. Paid July 11, 1893. Edward H. Gaynor, Treas., Correct. O. M. Carter, Capt., Corps of Engrs., U. S. A." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. W. T.

Gaynor. E. Burns, C.", with a pencilled "C". Attached to the record marked Exhibit 131.

"No. 224,449, August 3, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treas., \$39,075.00. Paid Aug. 7, 1893." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treas. E. Burns, Cash.", with pencilled "C. O. C." Attached to the record marked Exhibit 132.

No. 224,450, August 3, 1893, Pay to the order of the Atlantic Contracting Company, Edward H. Gaynor, Treasurer, \$5,700.47. Paid Aug. 17, 1893." Endorsed: "The Atlantic Contracting Company, Edward H. Gaynor, Treas. Pay National Park Bank, or order, for collection account of Southern Bank State of Ga., James Sullivan, Cash. James Sullivan, Cashier. The National Park Bank, per W. C. Taylor, Attorney." Attached to the record marked Exhibit 133.

"No. 224,451, August 3, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treasurer, \$5,000.00. Paid Aug. 14, 1893." Endorsed: "The Atlantic Contracting Company, Edward H. Gaynor, Treasurer. Pay to the order of Eugene Kelly & Co., Southern Bank of the State of Ga., James Sullivan, Cashier. Eugene Kelly & Co.", pencilled "OC". The messenger in that case was the one that was identified by Terry, as you remember Mr. Jordan testified to. Attached to the record and marked Exhibit 134.

1239 "No. 224,461, September 1, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treasurer, \$77,975.00. Paid Sept. 7, 1893." Endorsed: "Edward H. Gaynor, The Atlantic Contracting Co., Edward H. Gaynor, Treas., 21, Sep. 6, 1893. W. T. Gaynor. E. Burns, Cash. Received payment through the Clearing House, per pro Am. Exch. Nat'l Bk., N. Y., J. A. Carr, A. C." Attached to the record marked Exhibit 135.

"No. 224,462, Sept. 1, 1893, Pay to the order of the Atlantic Contracting Co., Edward H. Gaynor, Treasurer, \$4,500.00. Paid Sep. 26, 1893." Endorsed: "The Atlantic Contracting Company, Edward H. Gaynor, Treas. Pay National Park Bank, on order, for collection, account of Southern Bank State of Ga., James Sullivan, Cashier. James Sullivan, Cashier. Received payment through the New York Clearing House, National Park Bank, Geo. H. Hickok, Cashier. Sept. 26, 1893." Attached to the record marked Exhibit 136.

"No. 224,463, September 1, 1893, Pay to the order of The Atlantic Contracting Co., Edward H. Gaynor, Treas., \$4,-

500.00. Paid Sep. 19, 1893." Endorsed: "The Atlantic Contracting Co., Edward H. Gaynor, Treasurer. Received payment through the New York Clearing House; American Exch. National Bank, Edward Burns, Cashier, Dec. 21, 1894." Attached to the record marked Exhibit 205. On page 75 of this record, the amount of this check is given as \$87,473.00, while from copy of check just read, it appears that the amount is \$874.73.

"No. 224,415, May 25, 1893, Pay to the order of Edward H. Gaynor \$26,706.46. Paid June 5, 1893." Endorsed: "Edward H. Gaynor. For Deposit, B. D. Greene. J. S. Carr, A. C." Pencilled "O.C.", paid over the counter. Attached to the record marked Exhibit 206.

"No. 224,414, May 22, 1893, Pay to the order of E. H. Gaynor, \$8,404.53. Paid June 5, 1893." Endorsed: "E. H. Gaynor. For deposit, B. D. Greene. J. S. Carr, A. C." and in pencil "C. O. C."—paid over the counter, as the other one was. J. S. Carr does not seem to represent any bank. Attached to the record marked Exhibit 207.

Mr. Rose: It has been testified before that Carr was Cashier of the American Exchange National Bank.

Judge-Advocate: It doesn't seem to have gone through a bank.

Mr. Rose: It says, "A. C.", Assistant Cashier.

Judge-Advocate: Yes, but not Assistant Cashier of anything in particular. If acting as Assistant Cashier of the Bank, I would assume that the endorsement would so state. I am reading a description of the check.

"No. 269,455, May 4, 1895, Pay to the order of Anson M. Bangs, \$7,500.00. Paid May 3, 1895." Endorsed: "Pay to the order of John F. Gaynor; Anson M. Bangs. John F. Gaynor. 21; May 22, 1895. Received payment through the New York Clearing House; American Exchange National Bank, Edward Burns, Cashier. May 23, 1895." Attached to the record marked Exhibit 208.

"No. 269,454, May 4, 1895, Pay to the order of Anson M. Bangs, \$1,000.00. Paid Aug. 5, 1895." Endorsed: "Anson M. Bangs. Edward H. Gaynor. Pay C. H. Patterson, Cashier, or order, Jas. H. Hunter, Cashr. Received payment through the New York Clearing House; The Fourth National Bank of the City of New York, Chas. H. Patterson, Cashier, Aug. 5, 1895." Object for which drawn: Savannah Harbor Jetty Work." Endorsed: "The Atlantic Contracting Company, Edward H. Gaynor, Treasurer. For Deposit, B. D. Greene. Received payment through the New York Clearing House; American Exchange National Bank, Edward Burns, Cashier, July 6, 1895." Attached to the record marked Exhibit 236.

Mr. Rose: I notice that, in reading the last checks, you stated the object for which they were drawn, but you did not read the object in reading the other checks. I understand the object is stated on all of them.

Judge-Advocate: I didn't read the object stated in the

others, but they are before the Court as Exhibits, and they can read them. I had a purpose in reading these.

(At 1.55 p. m., Reporter W. O. Tarver was relieved by Reporter Geo. T. Cann.)

1263 ARTHUR S. COOPER, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:—

Direct Examination.

Questions by the Judge-Advocate:

Q. Mr. Cooper, what are guide piles? as undeestood in this engineering district?

A. Guide piles are piles driven on the axis of a dam, or on the side of a dam, to be used for the purpose of sinking mats or mattresses.

Q. When did you first see them used in this district?

A. About the middle of Sept., 1893.

Q. You were then the superintendent?

A. I was the Engineer-in-charge on the works of the construction work.

Q. Were you instructed to use guide piles?

A. No, sir, I was not. Shortly after the storm of Aug. 27, 1893, the contractor's plant was partly destroyed and scattered about, and the question came up as to how they should continue the work, and it was suggested that the mats be built on barges, instead of being built in place. Then when those mats were built on barges, the question came up as to how they should be launched and put in place. It was first thought they could simply launch them or simply put them in place by means of anchors and lines, the same as log mattresses were sunk, but the contractor's foreman suggested it might be advisable to drive piling to sink these mattresses against, and let them go down alongside the piling and thereby hold them in position. I told the foreman that if he wished to do so that that was his business and not mine (or the contractor's business) and if he drove this piling, the Government would not pay for them; he replied the contractor's are able to drive these pilings and pay 1264 for them, because it was better and handier to sink the mattresses in this manner.

Q. Did you get written instructions in regard to that matter?

A. Not at that time.

Q. Did you at any time get instructions?

A. I received a letter on Feb. 8th, requiring me to report a number of guide piles that had been driven up to that date.

Q. Have you that letter?

A. I have.

Q. Produce it.

(Here the witness produces the letter)

Q. This is a letter sent by Capt. Carter?

A. It is.

Judge-Advocate: I offer in evidence and read:

Memo. for Mr. A. S. Cooper, Asst. Engineer.

“United States Engineer Office.

Savannah, Ga. Feb. 8, 1894.

“At an early a date as practicable, you will send to this office a list of the number of piles driven in the North Long Island Training Wall and elsewhere, as guides for the sinking of mattresses; and you will hereafter submit with the usual tri-monthly reports, a list of such piles as may be, in the future, driven for that purpose.

O. M. CARTER,

Capt. Corps of Engineers, U. S. A.”

Q. What report did you make in response to those instructions?

A. Well, immediately, I didn't have time to count all that had been driven. I proceeded to report those that had been driven as the work advanced by the month; after that, a little more than a month, I had by that time counted those that had previously been driven and reported the number that had been driven.

Q. On the different improvements?

1265 A. On the different improvements.

Q. Have you any reports?

A. I have secured it from the office.

Q. This paper which you produce is from—

A. Is from the records of the office it is a letter written by me March 18, 1894.

Judge-Advocate: I offer in evidence and read, (Reading)

“Savannah, Ga., March 18, 1894.

“Capt. O. M. Carter,
Corps of Engrs. U. S. A.
Savannah, Ga.

“Sir:

In reply to your letter of Feb. 8th, 1894, I would state that as near as can be estimated, there had been 375 piles driven as guides for sinking mats up to that date. “No account of these were made at the time, as they were driven at the contractors’ request.

Very respectfully,
Your obt, Servant,

A. S. COOPER,
Asst. Engr.

Q. And in pencil there is written, “Allow, yes” Do you recognize that writing up there?

A. I think it is Capt. Carter’s; it is signed “O. M. C.”; it looks like his handwriting.

Judge-Advocate: There is a pencil memorandum to this letter, “Allow, yes, estimating linear feet”; then follows the computation, “375 x 4,” equal “1500 feet, pile work. O. M. C.”

Mr. Blair: Is this offered, Colonel, under the conspiracy charge or any particular specification?

Judge-Advocate: It is offered under the 8th specification to the 2d, charge; and other specifications where the same facts

1266 Mr. Blair: But, Colonel, pardon me for being persistent, to what specification does that relate?

Judge-Advocate: It is in relation to the 8th, specification which will be shown as the testimony proceeds.

Mr. Blair: The 8th specification charges him in 1897, with paying for certain linear piling which he ought not to have paid for.

Judge-Advocate: And this shows the initiation of the method of estimating the payment of paying for such piles.

Mr. Blair: In 1894?

Judge-Advocate: In 1894, yes; this is the origin of the practice. It will be connected.

Mr. Blair: That is under contract and these specifications are in open market bid.

Judge-Advocate: Well, I am simply showing the way in which the estimate was made.

Mr. Blair: All right.

Q. Have guide piles since that time up to the present been reported as guide piles?

A. They have always been so reported by me in all reports I have made.

Q. I refer to your reports.

A. Yes, sir.

Q. You may state, Mr. Cooper, what benefit there was, was it for the Government or for the contractor, that the guide piles should be used?

A. It was of benefit to the contractor, so to facilitate the sinking of the mats; he would get them in place much quicker and at less expense.

Q. Explain the report, please.

A. These piles, as I said, were driven on the axis or side of the dam, say, for instance—about 20 or 30 feet apart; sometimes less, depending on the size of the mat that 1267 was to be launched against the piling. Then as the mat was launched off the lighter, it would be hauled tight against these pilings, and rock thrown on, and the advantage of the piling is that the mat could get into place and be put in position much more quickly; whereas, if the pilings were not there, the mat would have had to be launched in open water, and then run lines and anchors on both sides, and on both ends, to haul it in position, by heaving on a capstan, which, of course, would be a much slower process, and then they would be only able to put in one mat a day, whereas, they have put in as high as four, by using the guide piles.

Q. Then it was greatly to their advantage and an actual economy for the contractors?

A. That is my opinion, yes sir.

Cross-Examination.

Questions by Mr. Blair:

Q. How were the mats launched and sunk in 1896, down here at Tybee, at the breakwater,—the detached extension?

A. They were launched in open water, and hauled into position by anchors and lines.

Q. No piles used?

A. No piles used for the reason that they could not be used.

Q. What contractor was it you talked with about driving these piles for guides?

A. With the contractor's foreman.

Q. Who was he?

A. Mr. Wheeler.

Q. Where?

A. It was about 2,000 feet below Dam 26, near Venus point.

Q. Savannah River?

A. Savannah Harbor.

1268 Q. Savannah Harbor?

A. Yes.

Q. When?

A. About the middle of Sept., 1893.

Q. Who was present?

A. I don't know whether any of their foremen were present or not.

Q. Any body but yourself and Mr. Wheeler?

A. There may have been, but it has been so long ago I cannot remember, there may have been John H. Gaynor.

Q. Now tell us that conversation again.

A. Mr. Wheeler suggested they would drive piles on the axis of the dam, or on the side of the dam in this instance, and launch the mat up against it. Do you want as near as I can, all of it?

Q. Yes.

A. Then I told Mr. Wheeler as I remember it, that I would consider that a very good method of sinking the mats, but I had no authority to pay him, and I did not see any reason why the Government should pay him for those pilings. As I remember he replied that it was to the Atlantic Contracting Company's interest to drive those piles, because it would advance their work in every way, and he considered that they were able, abundantly able, to drive those piles, and he was going to drive them. I told him, very well, as far as I was concerned, I could not pay for them.

Q. That is you mean the Government could not pay him?

A. Representing the Government, I mean, of course.

Q. You didn't pay him, representing the Government, you simply reported to Capt. Carter.

A. I reported it, yes, sir.

Q. You said just now you considered those guide piles, exclusively for the benefit of the contractor?

1269 A. Yes, sir.

Q. That's right, is it?

A. I think so.

Q. Did you ever make any other statement with respect to these guide piles, that they were for the benefit of the Government, and the public generally in order to mark the lines of the dam or the jetty?

A. I don't remember of making that statement.

Q. Well, did you, or didn't you?

A. I cannot say, I don't remember.

Q. Did you ever make it to Mr. Daniel, in 1896 or 1897?

A. '96 or '97, no sir.

Q. Or any other time to Inspector Daniel?

A. Not that I remember of, I may have said, they did mark the dams.

Q. Well, for whose benefit was it if they did mark the dams?

A. Of course, that would be some benefit to the river men in tacking about and beating up the river.

Q. Did you ever hear of any boats being lost by running into the Government works down here that were not marked?

A. I don't know that I know of any that were lost; I know of a good many instances where they have run into training walls.

Q. Have you ever heard of any people being drowned where they had run into the training walls around the harbor here?

A. Not to my recollection; I know that one boat ran into Dam 14 during the storm and was capsized and some men drowned?

Q. Didn't you order Mr. Daniel to report those piles as being of benefit to the Government and the public and they should be paid for, those so-called guide piles?

A. No, sir, I ordered him to report them because I had been ordered to report them. I never told him they should be paid for.

Q. At the time you ordered him to report them, or 1270 at any other time, did you ever make the statement that those piles were of benefit to the public, to serve as marks to locate a dam, or the improvements alongside of which they were driven?

A. As I said before, I don't remember of making that statement.

Q. Well, will you say that you did not or that you did?

A. No, I would not say either.

Q. Did you ever talk in respect to these guide piles to any

other of the contractors, the contractors' foreman, or employees except Mr. Wheeler?

A. When they were first driven, no.

Q. Later on?

A. Perhaps so.

Q. Well, do you know or not?

A. I can't remember all the conversations I ever had about guide piles; they have been using guide piles for the last four years.

Q. Well, do you know whether you talked with anybody else, connected with the contractors, or the contractors themselves, with reference to those guide piles?

A. All the instructions that were given in regard to guide piles, were given by me.

Q. Answer my question, if you please, if you can, if you cannot, say so?

A. I presume off and on, I have talked with all of them in regard to guide piles.

Q. Do you know any one specific occasion where you talked with anybody else than Mr. Wheeler, the contractor's men, or the contractors themselves?

A. No, I cannot remember of any specific case; as I said before, I have probably talked with all of them, about these piles, because that is quite an important part of the work.

Q. Well, will you say you have talked with all of them?

A. I would not make it so broad as that. The probabilities are I have, I cannot say exactly.

Judge-Advocate: Suppose you give a specific time, Mr. Blair, so he can answer it categorically then.

Q. Did you talk with anybody connected with the contractors, or the contractors themselves, or to any of the inspectors, Government inspectors, during the construction of the Cockspur Island training wall on this subject of guide piling?

A. I don't remember of any specific conversation, no. I remember of making the assertion that those guide piles were considerable bother to me in lining in mats. I had to locate my dams about 3 or 3 times as often as I would if they were not there.

Q. Whom did you say that to?

A. I think that was to the inspectors.

Q. What inspectors?

A. Hall and Ford.

Q. Where did you say it to Ford?

A. I don't know, I could not remember that.

Q. When?

A. Sometime in 1894.

Q. Did you ever state to anybody during the construction of the Cockspur Island training wall, that guide piles would benefit the public and the Government, because they marked the line of the improvements?

A. I may have said so. They are of benefit to the small boats in showing them where the dam is, otherwise, they might run on to it, and injure themselves. It is quite probable I said something of that sort, because it is really so.

Q. Then when you made the statement in your direct examination, that they were for the benefit only of the contractors, that was not an accurate answer, was it?

A. Yes, it is, they are for the benefit of the contractors; they incidentally benefit the small boats navigating the harbor.

Q. Don't they primarily benefit the very small boats generally that do not know the location of the improvements?

A. Certainly they do. They would benefit in that way, no doubt of it in the world.

Q. Why did not you make that full answer on the direct examination?

A. That is a matter that did not concern the contractors and did not concern the Government, that were building this wall.

Q. You were not building it for the benefit of the public?

A. Not for the benefit of small boats; it was for the benefit of navigation.

Q. Building it for the injury of small boats?

A. No, sir, not exactly. Those people who navigate the river, are supposed to keep themselves posted.

Q. As to everything under water and not marked?

A. Everything about the construction works, yes, sir. A man coming into the Savannah harbor, if he don't know the way, ought to employ somebody that does. It would be the best thing for him to do.

Q. That is your idea of the purpose for which the Government constructs works?

A. The Government is obliged to put their construction wherever necessary to complete the work, and it is not their duty to protect the small boats. They must put their jetties to do the work where they want it.

Q. And if they lay a death trap for small boats, it is all right is it?

A. If so, it will have to be so; they are not to blame for it. All the jetties are dangerous to small boats, they cannot be otherwise.

Q. Therefore, you do not mark them?

A. They are marked, that is, they are marked by buoys and cluster piles with range lights on them; that is done 1273 by the lighthouse department, that is not the engineering department; it is not the duty of the Engineer Officer to mark all those jetties.

Q. Are any of those works marked with cluster piles?

A. Some of them are, yes.

Q. Which ones?

A. Dam, 35 used to be marked with cluster piling, 26, 33 and 13.

Q. Any of these have guide piling on them?

A. No.

Q. Any of those marked with guide piling,—are they also marked with cluster piles?

A. Some of them were.

Q. Which ones?

A. The Cockspur Island training wall.

Q. Where?

A. At the outer end they have got two different clusters, to mark the outer end of the Cockspur Island training wall, to guide steamboats, tug boats and small boats, and keep them from running into the outer end. They were placed there by the contractor to protect small boats and the Government paid for it.

Q. The Government pays for driving cluster piles to protect small boats and tug boats. The Government drove piles on Cockspur Island training wall to mark the outer end, in order that tugs and small boats might not run into it?

A. Yes.

Q. But it does not drive guide piles or single piling anywhere else along the Cockspur Island training wall to mark it, is that your idea?

A. That is my idea. The guide piles were driven for construction purposes, and not for the purpose of marking the wall. When the wall was completed, then if necessary, the

Government would put up whatever marks they deemed proper. That is my idea.

1274 Q. That is your idea?

A. That is my idea. Those guide piles have the same relation to the construction of a jetty that a scaffolding does to a building. The scaffolding is torn down when the building is done. These guide piles may be torn down when the jetty was done.

Q. Notwithstanding I might go in a small boat and sail down the river over the public water, and nothing there to mark a training wall or a jetty, and I might drown because it is not marked?

A. That is another matter.

Q. You say that is no concern of the Government?

A. After the jetty is completed, if it becomes necessary, to mark it to protect small boats, the Government would mark it; it is not necessary to mark every 20 feet or 6 feet. Here is a straight wall, 2,000 feet long—

Q. How about during the construction, when putting up the work, when I might know it today and not to morrow?

A. There is always some mark there, some posts that the contractors use.

Q. Always?

A. Yes, sir. When they are building the jetty, they always have numerous posts there.

Q. Along the whole length?

A. Not along the whole length, but wherever they are working.

Q. Then for the most part, this work is all under water, or under water for half the time?

A. It is usually under water and at all times except at low water.

Q. Did you ever hear of any of the contractors wanting to cut those piles down, to low water mark, those guide piles?

1275 A. They were instructed to cut them down by the Engineer Officer.

Q. In writing?

A. No, I think I received verbal instructions.

Q. When?

A. I don't know.

Q. Where?

A. I don't know.

Q. From whom?

A. Capt. Carter.

Q. Concerning what work?

A. Concerning the harbor work, Savannah harbor.

Q. For what?

A. The entire harbor.

Q. What year?

A. That was in 1895.

Q. Was it done?

A. It was. You did not allow me to finish my answer; my answer was I received instructions to cut those guide piles down either at low water, or at about ten feet above low water, according as I thought in my judgment, would give the better appearance to the work, and that was done.

Q. Which, both?

A. Both.

Q. Down to low water and ten feet above low water?

A. Yes, sir, those crooked and ugly looking piles were cut at low water. Those that were straight and on about a line, so as to give a better appearance, were cut ten feet above low water.

Q. Were you not specifically instructed by Capt. Carter to leave certain guide piles above high water, to mark the line of the dams?

A. I was.

1276 Q. Then you did not cut them down to low water, or ten feet above low water, did you?

A. I did. I either cut them to low water, or ten feet above low water.

Q. You disobeyed your orders then, according to your statement?

A. Excuse me, I did not. I received instructions to either cut them at low water, or ten feet above low water,—how is that disobeying orders?

Q. You were instructed, as I understood you to say, to leave them ten feet above low water, to mark the dam?

A. Yes.

Q. You were?

A. Yes, sir.

Q. You are certain of that?

A. That is, part of them.

Q. Where, what part?

A. Well, as I said before, those piles which were crooked and out of line, were cut down at low water, and the straight

ones were left, so as to give a better appearance to the work.

Q. Well, how many did you cut down to low water?

A. Oh, I don't know; possibly a quarter or one third of them;—something like that.

Q. Name any particular place where under your orders, any of those so-called guide piles, were cut off at low water level, any that were paid for?

A. On the Cockspur Island training wall?

Q. Where, what part?

A. All along the wall, from one end to the other.

Q. How many?

A. As I said before, I think about one quarter.

Q. Who cut them off?

1277 A. The Atlantic Contracting Co.

Q. Under what foreman?

A. Under John H. Gaynor or Mr. Wheeler, I don't know which.

Q. In what year?

A. That was in 1895.

Q. In what month?

A. I think it was in August.

Q. Did you make any report of it?

A. I did not.

Q. Why not?

A. I was not told to. It was not necessary. The work was done. They had already been paid for it. It was not necessary to make a report, the piles had been paid for.

Q. About how many piles in number did you cause the Atlantic Contracting Co., in the month of August, 1895, to cut down to low water?

A. I could only give my opinion, I don't know exactly.

Q. Well, give us your best guess?

A. Well, I should say probably, about, between fifty and sixty.

Q. And those were cut down under the foremanship of John F. Gaynor?

A. Either John F. Gaynor or M. J. Wheeler.

Judge Advocate:—John H.

Q. John H. Gaynor?

A. John H. Gaynor or Mr. Wheeler.

Q. This was in August 1895?

A. Either in August or thereabouts.

Q. In the Cockspur Island training wall?

A. The Cockspur Island training wall.

Q. Now, let's go back to dam 31; did you or didnt you give any instructions to have guide piling driven along that dam and order the inspector to report the same, the number of the piles? for payment by the government because they were for the benefit of the government?

1278 A. I ordered the inspector to report the number of piles simply because I was ordered to have him report them.

Q. Did you or didnt you order the inspector to report the number of piles?

A. I did.

Q. At dam 31?

A. I did.

Q. Driven as guide piles?

A. Driven as guide piles?

Q. And did you tell the inspector at that time that he was to report the number driven for payment because they were of benefit to the government?

A. No sir.

Q. You did not make that statement to the inspector?

A. I dont think I did.

Q. Well, do you know whether you did or not?

A. Well, I could not say positively that I did not; I think not.

Q. Who was the inspector?

A. That was Mr. Daniels. If he says I made that statement I dont know whether I would contradict him or not, because I dont remember.

Q. You stated positively on the direct examination that those piles were for the benefit exclusively of the contractors?

A. Yes sir, I think so yet.

Q. You still think so, notwithstanding the fact you have said on the cross examination that those piles were for the benefit of the Government also?

A. I do. They act as a benefit to the small boats to show them where the line of the dam is. If those guide piles were along there say on the Cockspur Island training wall there are probably 300 to mark that dam where a half dozen would serve the same purpose, they simply being there to mark the 1279 wall, they would not pay for 300 piles to do the work of 3 or 4.

Q. If they were not marked at frequent intervals, how would I know if I was sailing my small boat over this harbor?

A. You ought to be able to see a straight line.

Q. Or in thick weather how would I know?

A. In thick weather you ought to be careful how you went.

Q. Therefore, the Government dont put any marks to show where I ought to go?

A. Not every 25 or 30 feet on the wall.

Re-direct Examination.

Questions by the Judge Advocate.

Q. In answering my question as to how it was a benefit, it was a financial benefit you have in view to the contractors?

A. That is what I have in view. The idea that they would facilitate their work very greatly by putting those piles in there.

Q. It was for their pecuniary advantage?

A. Decidedly.

Q. Now assuming that it became desirable in behalf of the public after experimenting at that time, to have guide piles appearing above the water, have you ever seen them provided for since in the specifications?

A. No sir, the guide piles have never been mentioned in the specifications. It does mention in the specifications however that the contractor will be required to furnish all necessary ranges and marks in constructing the different spur-dams and training-walls. That is all that is incorporated in the specifications.

Q. Assuming openings made at Cockspur dam, then Mr. Blair might get drowned if he tried to go through there where they were cut down to low water?

A. He probably would if his boat struck the dam.

Q. And in thick weather he might strike the piles?

1280 A. He certainly would if he didnt keep a sharp look-out.

Q. Are there not many shoals of about the same height of the improvements along the river?

A. There are some, yes.

Q. There are no piles put there to mark those shal places?

A. No, sir; some times buoys are placed in the channel to warn the shipping where the shoal places are.

Q. About how many guide piles are there in the Harbor of Savannah?

A. Under the contract of 1892 there was driven about 1000 guide piles. Under the contract of 1896 I dont suppose there are over 100.

Q. How were they paid for?

A. Paid for as linear feet of pile dams.

Q. What was the calculation?

A. Each pile was figured as equivalent to an advance of four feet.

Q. Four feet of dam?

A. Four feet of dam.

Q. Four feet of pile dam?

A. Yes, sir.

Q. What is a pile dam?

A. A pile dam is a dam constructed by driving two rows of piles 8 feet apart, and 8 feet apart in a row, and between those piles is placed the brush, and then some little stone on top of the brush to prevent it being torn out by storms.

Q. That is 8 feet for each pile or for each two piles?

A. Two piles advancing 8 feet, that would be equivalent to one pile advancing four feet.

Q. Then each guide pile was equal to four feet of the dam?

A. Yes, sir.

Q. Was any guide piling driven during the construction of the Oyster Bed training wall?

A. No, sir.

1281 Q. Was it necessary to keep boats off the breakwater during construction?

A. Well, it would be on the same principal as the Cockspur Island Training Wall. There is nothing to mark the Oyster Bed Training Wall at all. There was not even a cluster or buoy. The Oyster bed training wall was higher than the Cockspur Island training wall, and consequently more dangerous.

Q. As a matter of fact it was not a philanthropic act on the part of the contractors to put in those piles for the benefit of the public?

A. No, it was merely for their own benefit in advancing their work and facilitating their work in every way.

Q. Had you ever reported the number of piles driven until you were instructed to make the report upon the guide piles?

A. I did not report the guide piles because I didn't consider they should be paid for.

Q. You could not find anything about them in the specifications?

A. Nothing in the specifications, I didn't consider that they ought to be paid for them, and I didn't report them for that reason, and my letter shows I did not.

Q. And what reports you have made were in accordance with those instructions and based on them?

A. Yes, sir.

Cross-Examination.

Questions by Mr. Blair:

Q. I thought you were not governed by the specifications, it seems to me a few days ago you testified you didn't pay any attention to the specifications?

A. I testified I was not instructed to follow the specifications.

Q. But you were going to follow them about these guide piles?

1282 A. The specifications, as I understand it—

Q. Were you, or were you not?

A. The question of the specifications did not come up in regard to them.

Q. So you followed the specifications about guide piles, but you were instructed not to follow the specifications in regard to mats?

Judge-Advocate: He says they were not mentioned in the specifications, how could he follow anything not in the specifications?

Q. You looked in the specifications to see what was mentioned?

A. I knew it.

Q. You must have looked into them sometimes if you knew it.

A. Certainly; I certainly posted myself on the specifications and understood them thoroughly.

Q. You were not going to follow the specifications because you were not going to pay for guide piles because they were not mentioned in the specifications?

A. I said I didn't intend to report them.

Q. Did you, yes or no? Never mind an essay, Mr. Cooper; you can give that to the Judge-Advocate when he asks for the evidence, just give me plain yes or no?

A. I don't believe I understand you, I have forgotten now.

Q. You were not going to follow the specifications because you were not going to pay for the guide piles because they were not mentioned in the specifications?

A. I don't know whether that was your question or not, I suppose so.

Q. You were not going to pay for the guide piles, or recommend their payment because they were not mentioned in the specifications?

A. I don't believe I understand what you mean.

1283 Q. You were not going to pay for guide piles, or recommend their payment because they were not mentioned in the specifications. That is it, is it?

A. Yes, sir.

Q. Now, you say you read the specifications to find that out. Did you, or did you not read the specifications?

A. I did not read the specifications to find that out because I already knew it.

Q. You must, at some period of your existence have read the specifications to know that fact?

A. Certainly; several times.

Q. In answer to my question, did you, or didn't you read the specifications to find that out? What do you say?

A. I say no.

Q. You read them for some other purpose, did you?

A. Yes, sir.

Q. Then you remembered?

A. Yes, sir.

Q. That the guide piles were not mentioned in the specifications; that's it, is not it?

A. Yes, sir.

Q. That is what you mean?

A. Yes, sir.

Q. You were governed by the specifications to that extent that you were not going to pay for something that was not mentioned in the specifications?

A. The question of paying didn't occur to me at all.

Q. Were you governed by the specifications to the extent that you were not going to recommend payment for something not in the specifications?

A. Yes, sir.

1284 Q. You were?

A. Yes, sir.

Q. And you were not governed by the specifications, so far as they applied to the making of mats?

A. Yes, sir.

Q. That's true too, is it?

A. Yes, sir.

Judge-Advocate: You were governed by special instructions in both instances, were you not, Mr. Cooper?

A. Yes, sir, I followed the specifications where I had no special instructions. If I had special instructions that were contrary to the specifications I followed the special instructions in every instance.

Judge-Advocate: I so understood you.

Here the Court at 2.45 p. m. adjourned until to-morrow morning, February 10, at 11.00 a. m.

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl
Judge Advocate

1285

United States Court Room,
Savannah, Georgia,
February 10th., 1898.

The Court met pursuant to its adjournment of yesterday at eleven o'clock this morning.

Present:

All the members of the Court and the Judge Advocate.
The accused, his counsel, and the Reporter, G. T. Cann
were also present.

Judge Advocate:—I offer in evidence General Orders No. 6, Headquarters, Corps of Engineers, United States Army, Washington, D. C., April 17, 1897, and will spread upon the record only a part of it. The whole will be attached to the record.

(reading);—"In the case of River and Harbor Works, these summaries should state—

1. The original condition of the navigable channel way, harbor, or locality for which appropriations for improvement have been made, as to depth, width, and general availability for purposes of commerce.

2. The originally adopted project for the improvement and any important amendments, alterations, or additions, with brief reference to authority for such changes or additions and for changes in estimated cost.

3. The amount expended thereon up to the close of the fiscal year ending June 30, 1896.

4. The condition of the improvement, its availability or adaptability for the purposes of navigation and commerce, at that date." And to another provision, (reading) "Attention is specially invited to the requirements of General Orders No. 7, September 22, 1891, from these Headquarters,

that no modification of the approved project or plan for any work, or increased estimate for completion of any project, shall be submitted in the annual report of any officer 1286 without specific prior approval and authority of the department in each case".

"By command of Brig. Gen. Wilson:

JOSEPH E. KUHN,
Captain Corps of Engineers"

Judge Advocate:—This will be attached to the record and marked Exhibit 237.

JOHN W. O. STERLY, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:

Direct Examination.

Questions by the Judge Advocate:

Q. Mr. Sterly, what is that book?

A. That is Savannah Harbor Letter book, B, containing letters from Oct. 31, 1885 to Feb. 26, 1887.

Q. One of the official records of the Engineer Department?

A. Yes, sir.

Judge-Advocate: This, may it please the Court, is the letter book from which the counsel read the other day, the different responses which had been made to applications for specifications. Through inadvertence, probably, they failed to call for the requests, and had they done so, they would have learned, as I stated to the Court, that no letters of request are found in the year 1884, an index of papers made up here that were received from Gen. Gillmore's office, shows no receipt of any of any of those letters; there are other letters here, however, showing what was called for and to which the responses were read by Mr. Rose, and the letters are here now and opposite the answers that were made to them. These letters, I believe, all ask for specifications, and if it is conceded by the counsel who have examined the 1287 the letters, I will not spread them upon the record.

Mr. Rose: Just let me look at them again; I did not know what object you had, or on what line they were. Of course, we would like to read them. (Here the papers are handed by the Judge Advocate to counsel for the accused

for examination and returned by them to him after examination)

Judge-Advocate: The counsel, I understand, concede that in these letters which are here, that all ask for specifications and forms in the plural, and that serves the purpose of introducing the evidence for me, and as counsel and the Court both understand that the requests for 1884 had not been found, we have had the responses read, but the requests are not on file in the office.

Judge-Advocate: I offer in evidence and read,—

“United States Engineer Office,
River and Harbor Improvements and Fortifications on
South Atlantic Coast, Fortifications on Staten Island;
New York Harbor.
Army Building,

New York, Sept. 15, 1886.

1st Lieut. O. M. Carter,
Corps of Engineers, U. S. A.
Savannah, Ga.

Sir:

The advertisements for proposals for works in your District should appear in the Savannah Morning News tomorrow.

The specifications are in the hands of the printer and a number of copies will be sent you as soon as they are received.

If you have no blank forms of proposals, & Genl. Instructions to Bidders, please apply for a supply, or refer intending bidders to this office, and they will be forwarded to them direct.

Very respectfully,
Your obt. svt.,

JAMES R. GILMORE.”

1288 Mr. Rose: I would like to call the attention of the Judge Advocate and of the Court to the fact that the advertisements referred to in that letter, which is dated the 15th, the letter directing the advertisements to appear in the newspapers on 16th, the advertisement as printed is dated Sept. 16, 1886, for bids to be opened on the 30th, of September, leaving 14 days from the date of the first publication.

Judge-Advocate: Fourteen days. And at that time it appears to have been the practice to have given short terms of notice to prospective bidders, or to those who might become

bidders. There is no doubt the practice was as the counsel claims at that time.

Mr. Rose: The specifications were not printed then, until after the 16th, and it also appears that there has been no change in the rule or requirement with reference to time of advertisement, since 1882—1881, by Mr. Tweedale's testimony.

Judge-Advocate: The officer is dead but his methods may still be criticised. "The evil that men do live after them".

Mr. Rose: It is not always 'the good that dies with them.'"

Judge-Advocate: This is a paper that has been identified by the Officer of the War Department, that came with it, I offer it in evidence, (Reading)

"Subject, Repairs to Training Walls, etc., Savannah Harbor, Georgia, United States Engineer Office,
Savannah, Ga., Oct. 13, 1896.

"Brig. Gen. Wm. P. Craighill,
Chief of Engineers U. S. Army,
Washington, D. C.

General:

During the recent hurricane here, a Norwegian bark was blown against the Garden Bank Training Wall, completely wrecking the snag boat, Ocmulgee, which was moored there and breaking the piling and waling pieces of the training 1289 wall. Minor injury was done to the pile training walls at Marsh Island, Barnwell Island and Elba Island. It is important that the injury done at those places be repaired at once, that the brush piling may not be washed out. The cost of the necessary repairs will not exceed \$3,000.

I have the honor to request authority—to execute those repairs, by informal agreement or in open market, the prices for the necessary pile work, limber, iron, brush fascines, and stone, not to exceed those paid in the contract recently completed, viz—: \$1.60 per lineal foot for pile work; fender piles, \$50 per cluster; sawn timber, \$30 per M. feet; iron bolts, 5c per pound; fascines, \$1.60 per cubic yard, and stone, \$2.95 per cubic yard, payment to be made from the appropriation for improving Harbor at Savannah Georgia.

Very respectfully,
Your obedient servant,

O. M. CARTER,
Capt. Corps of Ebgrs. U. S. A."

"1st, indorsement,

Office Chief of Engineers, U. S. Army,

Oct. 17, 1896.

"Respectfully returned approved. When such record as may be necessary has been made, this paper will be returned to this office.

By command of Brig. Gen. Craighill,:

A. MACKENZIE,

Lieut. Col. Corps of Engineers."

2nd, indorsement.

United States Engineer Office,

Savannah, Ga., Oct. 19, 1896.

"Respectfully returned to the Chief of Engineers, U. S. A., Washington, D. C., Record made.

O. M. CARTER,

Capt. Corps. of Engrs., U. S. A."

Q. What is that paper, Mr. Sterly?

1290 A. That is Mr. Cooper's report of operations for mattress and stone work, Dec. 10th, to 20th, 1896, Savannah Harbor, for work done at Dam 31.

Q. And the red ink there?

A. Seven piles to be used as guide piles, and in red ink, "See Garden Bank Report".

Q. Whose writing is that?

A. Capt. Carter's.

Judge Advocate: I offer in evidence and read, Report of work done on dam 31, from Dec. 10, to 20, 1896, by the Atlantic Contracting Company, under contract of October 8, 1896. The only work reported is seven piles to be used as guide piles, and the total for the 20 days, seven guide piles with an asterisk and note in red ink, "See Garden Bank Report", signed by A. S. Cooper. The witness testifies that the memorandum in red ink is in the handwriting of Capt. Carter. And on the back of the report, signed by A. S. Cooper, "I have the honor to report that work was started on dam 31, this ten days by driving seven guide piles." A copy of this will be attached to the record and marked Exhibit 238.

Q. What is that paper, Mr. Sterly?

A. Mr. Cooper's report for work done at the breakwater between December 20th, to 31st, 1896, showing that four piles were driven for survey station.

Q. What is the memorandum there in red ink, whose writing is that?

A. Capt. Carter's.

Judge-Advocate: I offer in evidence this report only for the purpose of showing that four piles were driven for survey station, at the detached extension of oyster bed training wall, to which there is an asterisk against the 4, and there is this mark in red ink, "See Garden Bank Report", 1291 which the witness testifies is in the handwriting of the accused, and the total report on the bank is as follows:—

"I have the honor to submit my report of work done on the detached extension of the oyster bed training wall during Dec. 20 to 31, 1896, Besides other work there was four piles driven at the in-shore end of the work and built into a survey station for which I would recommend that the contractor be paid." A copy of this will be attached to the record and marked 239.

Q. What is that paper?

A. Mr. Conant's report for pile work done at Savannah during December 11, to 20, by the Atlantic Contracting Company, at Garden Bank.

By the Court: 1896?

Judge Advocate: Dec. 11 to 20, 1896. I offer in evidence and read this report of E. R. Conant Inspector, under date of Dec. 20, 1896,—"Report of Work done at Garden Bank, showing linear length of dam completed, 24 feet on the 14th, and on the 15th, eight feet, making a total for ten days of thirty-two feet; the total for the month and previously reported, none, total for the month, thirty-two.

By the Court: Thirty two piles or thirty two feet?

Judge Advocate: Thirty two feet of dam.

By the Court: Is that built or repairs?

Judge Advocate: Repair work on training wall and tie piles for Angler and Tocoa. With this report on the back, "I have the honor to submit the following report of repair work on Garden Bank training wall, during Dec. 11, to 20, 1896. Eight piles were driven, making 32 linear feet of dam". Signed "E. R. Conant, Inspector." A copy of this will be attached to the record and marked Exhibit 240.

Q. What is this paper, Mr. Sterly?

A. Mr. Conant's report of pile work, Dec. 21st, to 1292 31st, Garden Bank training wall.

Q. Report of work upon what?

A. The number of piles driven in linear length of dam completed.

Q. Garden Bank training wall. I see there are previ-

ously reported 8 piles being 32 linear feet of dam,—that is that report is it not?

A. Yes, sir.

Q. I see a memorandum, "Eleven piles, oyster bed, and 31 inclosed in brackets, See reports, 44" feet added, in whose handwriting is that?

A. Capt. Carter's.

Q. Making 76 feet of dam?

A. Yes, sir.

Q. "O. M. C.", that is O. M. Carter?

A. Yes, sir.

Q. And no work was done during the days that the report covers. I offer this in evidence; it is signed by E. R. Conant, Inspector, Dec. 31, 1896, and suggests that the Court look at this and the two preceeding papers. (Here the papers are handed around among the members of the Court).

Mr. Blair: It is admitted, Colonel, that the defendant put the red ink writing there.

Judge Advocate: It is also testified to.

Mr. Blair: I was simply saving time; I did not see why the Court should look at it.

The President: What is that?

Judge-Advocate: He stated that it was conceded that the defendant made the red ink writing. I desire that the Court look at these. It was not a hasty matter, but in writing.

Counsel for the Accused: Where is the voucher that accompanied the report?

Judge-Advocate: The voucher will be forthcoming in a moment.

1293 Q. What are those two papers, which I hand you, Mr. Sterly?

A. They are office computations for work done in Savannah Harbor, during Dec. 1896; work on breakwater and repair work.

Q. Well, explain what they are fully.

A. This paper here is the office computation for the repair work at Garden Bank training wall, and it shows that there were 5,975 feet of B. M. sawed timber used for waling and cross ties, at \$30, \$179.25; 828.1 pounds of iron bolts at 5c, \$41.41; 19 tie piles equal to 76 linear feet of piles at \$1.60, \$121.60. There was originally eight tie piles, equal to 32 linear feet, giving \$51.20; this was corrected to 19 tie piles, equal to 76 linear feet, at \$1.60, \$121.60; 85 miles corrected to 115 piles, cut off at the required height, at 10 cents,

\$8.50, corrected to \$11.50, giving a total of \$350.76, corrected to \$353.76, and that is checked by myself, that is, as to the correctness of the computation.

Q. As to the correctness of the computation?

A. Yes, sir.

Q. Where "8" in red ink is erased and "19" in black ink inserted, is that your handwriting?

A. No, sir.

Q. Whose is that?

A. Capt. Carter's.

Q. Where the 32 is erased and 76 placed there, is that yours?

A. No, sir, that is Capt. Carter's.

Q. That raising from \$51.20 to \$121.60, is that also Capt. Carter's?

A. Yes, sir; the ten cents is mine and the \$8.50 is mine; the \$350.76 is mine, and the balance is made out by Mr. Gieseler's. The \$350.76 is in my handwriting. That is the correct footing to make up the voucher.

1294 Q. Now, explain the second one.

A. This is an office computation, Dec. 1896, for Savannah Harbor, breakwater, 21,356.67 square yards of mats, and for 1,622.09 cubic yards of stone, fourth class, then there is the office computation, or multiplication, giving the total, of \$25,124.96, less ten per cent retained \$2502.50, leaving a total of \$22,612.46.

Q. Whose figures are those?

A. In red, Mr. Gieseler's; in black, Capt. Carter's.

Q. I see in there four piles were driven for transit station; I see there in pencil, "See Garden Bank Report, C." whose writing is that?

A. That is Capt. Carter's handwriting.

Q. What does the next sheet show?

A. The next sheet shows, Savannah Harbor, Cockspur training wall, Dec. 1896, 136.50 cubic yards of stone, fourth class.

Q. And the initial "C"?

A. Means that is correct, Carter.

Judge-Advocate: Blue prints of these papers will be attached to the record, marked Exhibits, 241 and 242.

(Here the papers are handed Mr. Blair)

Mr. Blair: There is no objection to these; it seems to be the personal property of the accused; it seems to be in the possession of the Judge Advocate.

Judge-Advocate: It is a retained voucher; the original voucher is in the Department in writing, I presume, in calling for that document, my predecessor failed to notice it. It was found in the office. It was not turned over to me any more than all the papers in the office were turned over for my use.

Mr. Blair: It is not an office paper, as I understand it.

Judge-Advocate: It was a paper found in the office.

Mr. Blair: It is the property of the accused, as I understand it.

By the Court: Is it a copy of this report?

1295 Judge-Advocate: It is a duplicate voucher.

Mr. Blair: It is a retained duplicate voucher, belonging to the accused, which seems to be in the possession of the Judge Advocate.

Judge-Advocate: And came to me in the course of my professional duties.

The Court: You say a duplicate is on file in Washington?

Q. What is that?

A. A voucher for the Atlantic Contracting Company for piling, timber, iron bolts &c., \$353.76.

Judge-Advocate: I make the statement in regard to this, this was not found among the private papers of the accused, it was found here in the office. He appears to have left it. With his consent, I will put it in evidence.

Mr. Blair: We have no objection to letting it go in evidence.

Judge Advocate: I can get the original, if it is so desired.

Mr. Blair: We want a copy put in evidence, if you please, Colonel, because the original belongs to the accused.

Judge-Advocate: A copy will certainly go in.

Q. Who made up that voucher, Mr. Sterly?

A. That voucher was made out by Mr. Austen, in the office.

Q. From what data?

A. From the office computation.

Q. The amount therein stated agrees with the computations?

A. Yes, sir.

Judge-Advocate: I offer in evidence and read, first the statement of account, Savannah, Ga., Dec. 31, 1896,

"United States Engineer Department, to The Atlantic Contracting Company, dr. aggregating \$353.76" and the letter attached thereto from Capt. Carter to Brig. Gen. Craighill,

dated October 13, 1896, and the indorsement also attached thereto, and the account also attached on Form 8; copies of these papers will be attached and marked, Exhibit 243.

Judge Advocate: And this also, Mr. Blair and Mr. Rose, was found among the retained papers of the accused.

Capt. Carter: This is not mine, it is an office record.

Q. What is this paper, which I hand you, Mr. Sterly?

A. This is Capt. Carter's report of operations, improving harbor, of Savannah, Ga., for Dec. 1896.

Judge-Advocate: I offer in evidence and read an extract from the report of operations for the month of Dec. 1896, signed by the accused, as a copy of the paper will be attached to the record, I will only read this extract:

"Operations during the month of December, 1896. Property has been cared for and miscellaneous office work done. In repairing Damage to Garden Bank training wall, 19 piles were driven, making an equivalent of 76 linear feet of pile work. As waling pieces and cross ties 5,975 feet of sawn timber, were placed in the work, for the fastening of which 828.1 pounds of iron bolts were used. One hundred and fifteen piles were cut off as required. The Atlantic Contracting Company began work under a contract of October 8, 1896, on December 3, 1896. There were placed in the breakwater at Tybee Roads 21,356.67 square yards of mattresses, and 1,622.09 cubic yards of fourth class stone. On the Cockspur Island training wall there were placed 136.50 cubic yards of stone. (Fourth class). Mr. Rittenhouse R. Moore, under his contract of October 6, 1896, was required to begin dredging on or before December 24, 1896. He has not yet begun work." Signed, "O. M. Carter, Capt. of Corps of Engrs. U. S. A. Jan. 9, 1897." A copy will be attached to the record and marked Exhibit, 244.

Judge-Advocate: That is of the same character as the papers I have been using. (Here a paper is handed to 1297 counsel for the accused).

Q. What is that paper?

A. Mr. Daniel's report of pile work done on dam 31 during February 1st to 10th, 1897.

Q. Who is Mr. Daniels.

A. He was an inspector in the employment of the office.

Q. Please state to the Court how many piles that indicates to have been driven?

A. 34 piles.

Q. How made up?

A. 17 piles driven on the 8th of February, 5 driven on the 9th of February, 12 on the 10th of February, giving a total of 34 piles.

Q. What is that memorandum in the column of "Remarks?"

A. "Single row of piles to mark line of dam".

Mr. Rose: Who made that report?

Judge-Advocate: Signed, as he testified, by T. J. Daniels.

Q. Is that Mr. Daniels handwriting?

A. Yes, sir.

Judge-Advocate: Mr. Daniels report reads "I have the honor to submit reports of pile work done on this dam, no mats being sunk during past 10 days". It is dated February 10, 1897. A copy of this will be attached to the record and marked "Exhibit 245".

Q. What is that paper?

A. Mr. Daniels' report for the second 10 days in February, 1897, showing that 26 piles were driven, or a total of 60 during the month.

Q. How many had previously been driven?

A. 34, giving a total of 60 during 20 days.

Q. What are those initials?

1298 A. "M. A. C." The check mark showing that the computation is correct.

Q. That is simply a check of the computation as on the report?

A. Yes, sir.

Q. Judge-Advocate: 26 for the month and 34 previously reported for 10 days, previously reported 34, a total of 60, the report is signed by T. J. Daniels, simply is. "I have the honor to submit reports of pile work done on this dam", that is dam 31. A copy of this will be attached to the record marked "Exhibit 246".

Q. What is that?

A. This is Mr. Daniels report for February 21 to 28, 1897 for work done at dam 31. He reports that no work was done, that the total for the month shows the number of piles driven, 60.

Q. Previously driven?

A. Yes, sir.

Q. Previously, during the month, and no work was done.

A. During this last report from the 21st to the 28th of February.

Judge-Advocate: This is signed by T. J. Daniels, inspector, who reports "I have the honor to submit report for past 8 days. No work being done". Signed T. J. Daniels, Inspector; and in the report "Previously reported 60". A copy of this will be attached to the record and marked "Exhibit 247".

Q. What is that paper, Mr. Sterly?

A. Office computations for work done during February 1897, Savannah Harbor on dam 31, the breakwater, Cockspur Island training wall, and it has a summary of the work done.

Q. That is for dam 31?

A. For dam 31, for the breakwater, for Cockspur Island training wall, and here is a summary (indicating).

1299 Q. I see there in pencil "Pay in open market 240 linear feet pile work at 1.60, \$384.00"?

A. Yes, sir.

Q. In whose writing is that?

A. The 60 piles at 2.40—

Q. Wait a moment, I asked you whose writing is that in?

A. "Pay in open market," Captain Carter's; 240 linear feet pile work at 1.60, \$384.00" in my handwriting.

Q. That is your handwriting?

A. Yes, sir.

Q. I see a line drawn through a statement on the same account, why was that drawn through there?

A. Captain Carter drew the line through "60 piles equal 240 feet pile work, 1.60, \$384.00."

Q. The same amount?

A. Yes, sir.

Q. Who instructed you to place that memorandum on there?

A. The memorandum "240 linear feet pile work?"

Q. Yes, who instructed you to correct the computation leaving out \$384.00 in one place and providing for its payment in another?

A. Captain Carter, there is the remark "Pay in open market."

Q. Was that his remark to you?

A. Yes, sir; pay in open market.

Q. But you said that you wrote that?

A. No, sir; Captain Carter wrote that.

Q. I misunderstood you then, that "Pay in open market" is in Captain Carter's handwriting?

A. Yes, sir.

Judge-Advocate: A blue-print of that paper will be attached to the record marked "Exhibit 248."

Q. What was the payment to be made in open market, Mr. Sterly?

A. The payment in open market was, it should be 1300 charged on any repair work done on Garden Bank and those places. It should be charged as repair work.

Q. Who made up that voucher?

A. The voucher was made by a clerk in the office from that computation.

Q. From that computation?

A. From that computation.

Q. This \$384.00?

A. \$384.00, equal to 240 linear feet of pile work at \$1.60.

Judge-Advocate: This is a retained voucher found in the office of the Engineer here. The accused states it is his personal property. I presume all his retained vouchers would be. You left them here when you went away (To the accused)?

Captain Carter: They were taken from me.

Judge-Advocate: Do you object to my using it, I will get the original?

Captain Carter: Oh, no.

Q. This was found in the Engineer's office, Mr. Sterly?

A. Yes, sir.

Judge-Advocate: I offer this in evidence.

Here the Judge-Advocate reads "Form 8, Voucher No. 27, Month of March, 1897, Appropriation for Improving Harbor at Savannah, Georgia, applied to that work, accounts of O. M. Carter, Capt. Corps of Engineers; Paid to the Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for pile work, amount \$384.00, paid by check No. 270492, dated March 10, 1897, for \$384.00, on U. S. Asst. Treasurer, New York, N. Y."

Judge-Advocate: A copy of this will be attached to the record and marked "Exhibit 249."

Judge-Advocate: I think I failed to state in regard to the previous voucher that it was for \$353.76, that it was paid by check No. 270439, dated January 12, 1897, for \$353.76, 1301 on the U. S. Asst. Treasurer, New York.

The Court: That is The Atlantic Contracting Company?

Judge-Advocate: Yes, both the Atlantic Contracting Company.

Judge-Advocate: I offer in evidence and read from the report of operations for the month of February, 1897, for Improving Harbor of Savannah, Georgia, a report of the accused, I will read this extract "Operations during the month of February, 1897, property has been cared for and miscellaneous office work done. The Atlantic Contracting Company, continued operations under contract of October 8, 1896. There were placed in the Cockspur training wall 3,345 square yards of brush mattresses and 173.21 cubic yards of fourth-class stone.

There were placed in the breakwater at Tybee Roads 17,500 square yards of brush mattresses and 1,266.58 cubic yards of fourth-class stone.

In dam No. 31 there were placed 2,306.66 square yards of brush mattresses, and 105.2 square yards of fourth-class stone.

In executing repairs 60 piles were driven as guides, being an equivalent of 240 linear feet of pile work.

Mr. Rittenhouse R. Moore, under his contract of October 6, 1896, has continued dredging in Rams Horn Creek. There were removed during the month 11,326 cubic yards of material. Progress has not been satisfactory.

An examination was made of a part of the site of the breakwater at Tybee Roads." Signed O. M. Carter, Captain Corps of Engineers, U. S. A., Savannah, Georgia, March 10, 1897.

A copy of this will be attached to the record and marked "Exhibit 250."

Q. What is that paper?

A. Mr. Daniels' report from May 1st to 10th, 1897, for mattresses and stone work done at dam 31, showing that 17 1302 guide piles were driven.

Q. There are some changes in that report. That is in making up?

A. Yes, sir; calculations and changes made to correct the report.

Q. And 17 guide piles that shows?

A. Yes, sir.

Q. That is signed by Mr. Daniels, the inspector?

A. Yes, sir.

Judge-Advocate: I offer this in evidence, the report of Mr. Daniels, for work done at dam 31, from May 1st to 10th, 1897, by the Atlantic Contracting Company, showing that 17 guide piles were driven. His report says "I have the honor to

submit reports for past 10 days," signed T. J. Daniels, Inspector. A copy will be attached to the record and marked "Exhibit 251."

Q. What are these two papers which I hand you?

A. They are Mr. Keating's reports for work done. The first is from May 10th to 20th, 1897, for work done at Elba Island Spur Dams, and the next one is May 21st to 31st, Elba Island Spur Dams.

Q. What do you find there as piles?

A. Linear length of dam completed 12 feet.

Q. That is the last report, how about the first one?

A. 12 feet.

Q. 12 feet?

A. Yes, sir.

Q. That work done between May 11th and May 20th?

A. Yes, sir.

Q. How many feet of dam completed in a second report?

A. There were none completed, there were carried forward 12; during the month 12.

Judge-Advocate: Those were paid under an authority from the Chief of Engineers in open market. Well, never mind, I have it here, Mr. Sterly.

1303 Judge-Advocate (To the counsel for the accused) He is another office computation (Handing papers to the counsel).

Q. You don't know about the authority about paying for that work at Elba Island Spur dam?

A. Not without looking at the other papers.

Judge-Advocate: I offer them in evidence. The report of P. J. Keating was "I have the honor to submit report of repairing pile work at Elba Island spur dams during May 11 to 20, 1897." And also, for the 11 days ending May 31, 1897, that one is not signed on the outside, but is signed on the inside. Copies of these will be attached to the record and marked Exhibit 252" and "Exhibit 253."

Q. What are these papers?

A. Office computations for work done during the month of May, 1897.

Q. Explain them.

A. For work done at the breakwater and for repairs. The work done at the breakwater shows that there were done 36,058.09. Repairs Jones Island's spurs, 32 linear feet of dam, and Elba Island spurs 12 feet, corrected to 80, giving a total of 44 linear feet, corrected to 112, 7 cluster fenders and 2 1/3

cluster fenders, giving a total of 9 1/3 cluster fenders, 44 linear feet of pile dam at 1.60, \$70.40, corrected to 112 linear feet of pile dam at 1.60, giving \$179.20. 9 1/3 clusters of fender piles at \$50.00, total \$466.67, a total of \$537.07, corrected to \$645.87.

Q. I notice that those corrections are in red ink and the original figures in black ink, erased and the corrections put in in red ink. Whose figures are those?

A. Those are Gieseler's.

Q. Mr. Geiseler, an Engineer in the office?

A. He made up the office computations.

1304 Q. Explain that one?

A. Office computation, May, 1897, work done at the breakwater, 15,040.01 square yards of mats, and on dam 31 19,462.12, giving a total of 44,502.13 square yards of mats, and there were used of fourth-class stone on the breakwater 1,693.47 cubic yards, and on dam 31 956.54 cubic yards, giving a total of 2,650.01. The computation is for 34,502.13 square yards of mats at 95 cents, \$32,777.02 and for 2,650.01 cubic yards of fourth-class stone at \$2.75, \$7,287.53, giving a total of \$40,064.55, less 10 per cent retained, \$4,006.46, leaving \$36,058.09. And the repairs on Jones Island's spurs, linear feet of dam, 32 feet; cluster of fenders 7. Elba Island spurs 12, corrected to 80 linear feet, 2 1/3 clusters of fenders, giving a total of 44, corrected to 112 linear feet and 9 1/3 clusters of fenders. 17 linear feet had been omitted in the first computation, therefore there is a correction of 44 linear feet of pile dam at 1.60, \$70.40, corrected to 112 linear feet of pile dam at 1.60, \$179.20. 9 1/3 clusters fender piles at \$50.00, \$466.67, giving a total of \$537.07, corrected to \$645.87.

Q. That 68 and 44 appear there in red ink. After the addition of them together you entered that 112?

A. Yes, sir.

Q. 68 feet is equivalent to 17 piles?

A. Yes, sir.

Q. And that had been omitted in this computation?

A. Had been omitted.

Q. There is a reference there in red ink, what does that say?

A. "68 feet of pile dam are an equivalent for 17 guide piles driven on dam 31."

Q. Whose writing is that. Mr. Geiseler's?

1305 A. That is Mr. Geiseler's.

Judge-Advocate: Blue prints of these will be attached to the record, marked "Exhibits 254, and 255."

Judge-Advocate: These are your original vouchers, Captain, you have no objection to their use (To the accused)?

Captain Carter: No, sir.

Judge-Advocate: These are retained vouchers belonging to Captain Carter and his property, I suppose to which he is entitled.

Q. What are these papers?

A. These are vouchers for repairs to training walls and spur dams paid to the Atlantic Contracting Company.

Q. Well, take the first one.

A. Voucher No. 7, for June, 1897, paid to the Atlantic Contracting Company for repairs to training walls and spur dams, \$537.07, paid by check No. 270527, dated June 4, 1897, on the United States Assistant Treasurer, New York. That is for 44 linear feet of pile dam, and for 9 1/3 clusters of fender piles.

Q. Now, what is that account?

A. This is a voucher for 68 linear feet of pile dams at 1.60 for \$108.80, which were omitted in the previous voucher, the voucher is for 112 linear feet of pile dam, 44 linear feet of pile dams paid for on voucher June 7, 1897, leaving 68 linear feet of pile dams at \$1.60, equal to \$108.80, and paid to the Atlantic Contracting Company by check No. 128676, dated June 19, 1897, on the Merchants National Bank, Savannah, Georgia.

Judge-Advocate: I offer in evidence and read those two papers.

Here the Judge-Advocate offers and reads Voucher No. 7, June 1897, appropriation for Improving Harbor at Savannah, Georgia, applied to that work, accounts of O. M. Carter, Capt., Corps of Engineers, paid to the Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for repairs to training walls and spur dams, amount \$537.07. Paid by check No. 1306 270527, dated June 4, 1897, \$537.07, on United States

Assistant-Treasurer, New York, and voucher No. 21, month of June 1897, appropriation for improving Harbor at Savannah, Georgia, applied to that work accounts of O. M. Carter, Captain Corps of Engineers, paid to The Atlantic Contracting Company, Edward H. Gaynor, Treasurer, for repairing training walls, and so forth, amount \$108.80, paid by check No. 128676, dated June 19, 1897, for \$108.80, on Merchants National Bank, Savannah, Georgia, copies of which are to be attached to the record and marked "Exhibits 256 and 257".

The Court: What entry is there in the column headed "Ap-

plication"? (This question being asked with reference to "Exhibit 256").

Judge-Advocate: "Repairs to training wall and spur dams.

Q. What is that paper?

A. Captain Carter's report of operations for the month of May 1897 for improving the harbor at Savannah, Georgia.

Judge-Advocate: I offer in evidence and read an extract from it "Operations during the month of May 1897, property has been cared for and miscellaneous office work done.

The Atlantic Contracting Company has continued operations under contract of October Eighth, 1896. There were placed in the breakwater at Tybee Roads 15,040.01 square yards of brush mattresses, and 1,693.47 cubic yards of fourth-class stone. There were placed in dam No. 31 19,462.12 square yards of brush mattresses, and 956.54 cubic yards of fourth-class stone; 17 piles were driven as guides.

In executing repairs to the Jones and Elba Island spur dams 44 linear feet of pile dam were constructed and 9-1/3 clusters of fender piles were driven.

Mr. Rittenhouse R. Moore, under his contract of October 6th, 1896, has continued dredging in Wright's

River. There were removed at this place 36, 750-3/10 cubic yards of material during that month. The survey of the channel from the city to the sea was completed on May 20th." Signed O. M. Carter, Capt., Corps of Engineers, U. S. A., Savannah, Georgia, June 10, 1897.

Judge-Advocate: That will be attached to the record as "Exhibit 258".

Cross-Examination.

Questions by Mr. Rose.

Q. Mr. Sterly, I understood you to say that on this work that the piles which you have been testifying to, are paid for in open market; am I right?

A. The piling in open market—it is under authority for repair work in open market under former contract prices.

Q. And not under the contract of 1896?

A. No, sir; the work to be done at certain places.

Mr. Rose: I read from a copy of a report of Captain Carter for the year 1897, being Appendix N of the Annual Report of the Chief of Engineers on page 1595 "There were driven on Oyster Bed training wall four piles to serve as guides, and

there were driven on dam number 31, 75 piles for the same purpose. All together, there were, therefore, driven 79 piles to serve as guides, which are an equivalent to 316 linear feet of pile dam.

In repairing the Jones Island and the Elba Island spur dam there were driven 32 piles, making 128 linear feet of pile dam; there were also driven $9\frac{2}{3}$ clusters of piles, making a total of 61 piles.

In repairing the Garden Bank training wall there were driven 73 piles, making 292 linear feet of pile dam; there were also driven 7 clusters of piles, making a total of 94 1308 piles; there were used 11,850 feet B. M. of timber, as walling and ties, and 1,632.7 pounds of iron bolts to secure them to the pile work.

All the above repair work was done in open market by the Atlantic Contracting Company at the prices of their contract of October 22, 1892."

Re-direct Examination.

Questions by the Judge-Advocate:

Q. Was there any authority given for repair work on dam 31?

A. No, sir.

Q. That was the regular contract in operation there?

A. That was the regular contract for stone and mattress.

Mr. Rose: Was it paid for under contract or in open market, the pile work on dam 31; now just answer that question Mr. Sterly?

A. It was paid for in open market, but in repairs.

Judge-Advocate: Repairs to what?

A. To some other place.

Judge-Advocate: To what place?

A. Not on dam 31.

Judge-Advocate: On one of the places for which authority had been received from the Chief of Engineers to make repairs?

A. To make repairs.

Here the Court at 12.35 o'clock P. M. takes a recess until 1.00 o'clock P. M.

The Court met pursuant to recess at 1.00 o'clock, P. M.

Present:

All the members of the court and the Judge-Advocate.

The accused, his counsel, and the reporter G. T. Cann, were also present.

Judge-Advocate: I call the Court's attention to the 1309 Ninth Specification to the charge of conduct unbecoming an officer and a gentleman, and offer in evidence a paper that has been identified by Mr. McCarthy.

Here the Judge-Advocate offers in evidence and reads a letter from G. Paulding, dated October 2, 1896 to General William P. Craighill, U. S. A., in the matter of the R. P. Parrott Estate, with reference to property on Hutchinson's Island, and also the First, Second, Third, Fourth and Fifth endorsements on said letter.

Judge-Advocate: A copy of this communication will be attached to the record with the endorsements, marked "Exhibit 259".

Judge-Advocate: I offer in evidence a copy of the map accompanying Captain O. M. Carter's report to the Chief of Engineers of May 26, 1891, showing the proposed Harbor line of 1889. The upper black line and showing there the land proposed to be given to the owners as an equivalent for that to be relinquished by them. The court will notice the amount to be dredged away from the upper and lower lines.

The President: What is the date of that?

Judge-Advocate: That accompanied the report of the accused to the Chief of Engineers of May 26, 1891. A blue print copy will be attached to the record and marked "Exhibit 260".

Mr. Blair: The red ink was not put there.

Judge-Advocate: I was about to state that. The members of the Court have seen this map, I will state that the writing in red ink was placed there for my information and is not part of the map.

Judge-Advocate: The report referred to is as follows:

Mr. Blair: If the Court please, not that we object to the report, or to the reading of Washington's Farewell Address, or anything else, except that it takes up time. Now, the 1310 simple question on this specification is did Captain Carter make a false statement, knowing it to be false? What is he did make a report in 1891, or what if he did make a report in 1886, I submit that the matter is wholly irrelevant. The only question is under this specification he makes a state-

ment which has been read to the court "when operations were to begin excessive rentals were demanded by property owners". The allegation is in that specification that that statement is false and Captain Carter knew it to be false. I state again, as I stated before that the defendant here is under very great expense, and we desire, above all things, to have this matter shortened as much as possible. We do not object to that report of 1891 on any other ground, except simply irrelevance. If Captain Carter made a false statement, why let them prove it and what he did. We will admit that he made the report of 1891.

Judge-Advocate: The Court will probably want to read it at some time, and it is to be attached as a record showing the existing state of things and the improvements in contemplation. It was referred to in his endorsement to the Chief of Engineers; as to Mr. Paulding's letter, you will remember, he invites attention to that for consideration to know if it is now as it was on the date of the specification, which is alleged to be false.

Mr. Blair. Is there anything in the report of 1891 which tends to show that the statement by Captain Carter is true or false?

Judge-Advocate: The Court may perhaps have to pass judgment upon that question, I dislike to give my judgment of what his statement was.

Mr. Blair: Why not read the report of General Gilmore?

Judge-Advocate: Because General Gilmore is not before the Court and the accused is, and in the endorsement, which is alleged to be false he refers to this report and invites attention. It is to go on the record anyway, I think I'll read it.

1311 Here the Judge-Advocate reads the report of Captain

O. M. Carter, dated May 26, 1891, on the cutting off a portion of Hutchinson's Island, Savannah Harbor, Georgia, Estate of Robert P. Parrot; G. Paulding, Executor, a copy to be attached to the record and marked "Exhibit 261", the report of the appraisers with reference to Kinsey is not read.

The President: The accused objects to the substance of this report?

Mr. Blair: There is no objection, if the Court please, except the frightful waste of time.

The President: You withdraw the objection then?

Mr. Blair: Yes.

Judge-Advocate: With "Exhibit 259", the Fifth endorsement referred to a report accompanying it of Pater C. Hains, Colonel Corps of Engineers, U. S. A., which has got misplaced and should have accompanied that report and I will read it and put it in as a part of "Exhibit 259".

(Here the report of Colonel Hains is read by the Judge-Advocate.)

Mr. Blair: Major Hains says "excessive rentals were required and he had examined the records.

Judge-Advocate: Yes, examined the records of the case and found that a part of the record.

Mr. Blair: Yes, and looked at the land.

Judge-Advocate: We are not trying Colonel Hains.

At this point Reporter G. T. Cann is relieved by Reporter W. O. Tarver.

1312 At this point, 2.00 p. m., in the proceedings of the day, Reporter Geo. T. Cann was relieved by Reporter W. O. Tarver, who continued to report the proceedings until the adjournment of Court.

* * * * *

1327 JACOB PAULSEN, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is your full name?

A. Jacob Paulsen.

Q. Do you live in Savannah?

A. Yes, sir.

Q. What is your occupation?

A. I am President of the Propeller Tow Boat Co. and also of The Savannah Dredging Co.

Q. I show you a map of Hutchinson's Island; will you point out the lots that are controlled by those Companies, or owned by them? Nos. 13, 14, 15, 16, 17 and fifty feet of 18 belongs to whom?

A. 13, 14, 15, 16 and 17 belong to the Propeller Tow Boat Co., and fifty feet of 18 belongs to the Savannah Dredging Co., and these (indicating on map) two lots belonged to the Savannah Dredging Co. but have been sold about a month ago, —about two hundred feet of them.

Q. How long have lots 14, 15, 16 and 17 been owned by the Propeller Tow Boat Co.?

A. 13 and 14,—they were bought later, and the other lots were owned by the Tow Boat Co. I guess twenty years ago. 13 and 14,—they were bought somewhere in 1885 or 1886.

Q. Do you remember whose estate 13 and 14 belonged to? What estate they were bought from?

A. No; we bought it from Colonel,—I forget his name.

Q. Was it Woodbridge?

A. I think he was representing the Woodbridge Estate.

Q. Now, did you ever own 18 and 19?

A. Yes, sir; the Dredging Co. owned 18 and 19.

Q. They do now?

A. Not now; they own fifty feet of 18; 200 feet has been sold.

Q. During what is known as the big contract, who owned lots 18 and 19?

1328 A. The Savannah Dredging Co.

Q. During that big contract, when the operations were to begin, did you have any conference with anyone as to the rentals that you should charge for the occupation of those lots when dredging was to go on?

A. I don't remember.

Q. Can you say you did not?

A. I don't remember that I had any talk with anybody about it.

Q. Did you ever establish the rental which you should charge?—ever decide upon the amount of rent you would charge the Government when they commenced operations for the improvement?

A. Yes, sir; it was long before that; I think that was in Gen. Gillmore's time.

Q. But I mean in 1892,—about the time when the contract was made in 1892?

Q. I don't remember, but I think that the contract that was understood would stand all right for 1892; the agreement rather. There was no contract.

Q. It was just a general understanding?

A. It was a general understanding.

Q. Did you make any demand for any rental from 1892 to 1896?

A. There was nothing done.

Q. You did nothing?

A. There was nothing done; no, sir.

Q. That applies to all that land controlled by you, the Propeller Tow Boat Co. and the Savannah Dredging Co.?

A. Yes, sir.

Q. You know Capt. Carter?

A. Yes, sir.

Q. You never made a demand of him, or of any other engineer officer, for a rental of any amount from 1892 to 1896?

A. No; I never made any demand.

Q. Did you ever take up any wharves, you or the 1329 Companies which you are President of, for purposes of speculation,—take possession of any wharves on the Island during that same period?

A. No, sir.

Q. Who were the owners of the Propeller Tow Boat Co.?

A. It is an incorporated company, incorporated under the laws of the State of Georgia, and has a good many stockholders.

Q. Are any of its stockholders present here?

A. It has more than I could mention.

Q. Are any of its stockholders present here besides yourself?

A. I don't know.

Q. Today?

A. I have seen some here this morning. I don't see any now.

Q. Are you looking in the right direction?

A. I don't know; I see Mr. Minis here; I know he is a stockholder.

Q. Look at this line of gentlemen here (indicating seats that the accused and his Counsel occupied) and say if you see a stockholder?

A. Capt. Carter is a stockholder.

Q. How long has he been a stockholder?

A. Twelve or thirteen years; I don't know exactly.

Q. How much stock does he own?

A. Capt. Carter owns one hundred and fifty shares.

Q. What is the par value of the stock?

A. The par value of the stock is one hundred dollars.

Q. What is its market value today?

A. I don't know.

Q. Is there any of it on the market?

A. There is no demand for any.

Q. Is there any sale for any?

A. No; I don't think so; there is no demand and no sale either.

Q. Has there been any profit upon it?

A. Not much of late.

Q. Has it ever been a profitable enterprise?

1330 A. Yes, sir.

Q. How much was the stock worth when Capt Carter became a stockholder?

A. I don't know.

Q. When was the Company organized?

A. It was organized, I think, somewhere along about 1882 or 1883; I don't know exactly.

Q. How long after the organization of the Company did Capt. Carter become a stockholder?

A. Shortly after Capt. Carter came here; I don't know when that was.

Q. Shortly after he came here?

A. Yes, sir; Capt. Carter has been a stockholder a long time.

Q. Was your stock quoted in the market at that time?

A. No, sir; it is a close corporation, and always has been.

Q. Always has been a close corporation?

A. Yes, sir.

Q. If any one wanted to get stock in it, could they get it?

A. When somebody wants to sell it.

Q. How could they find out?

A. Give it to a broker, and the broker would go around and sell it.

Q. Suppose anyone went to you as President of the Company, wouldn't you know about the value?

A. I would be a good man to go to.

Q. It has been a pretty successful enterprise?

A. Yes, sir; very.

Q. You have been quite well satisfied with it?

A. Yes, sir.

Q. It has not been one of your worst investments?

A. No, sir.

Q. You would not care today to give up your holdings in it?

A. I don't know about that; that depends on circum-

stances; if anybody brings money enough—you know money will buy most anything.

1331 Q. You say Capt. Carter bought his stock when?

A. Shortly after Capt. Carter came here.

Q. You don't recall the date?

A. No; I do not.

Q. Your stock books would show, I suppose?

A. Yes, sir.

Q. Do you know who he obtained it from?

A. No; that I do not know. I don't know who he bought it from; it has been a good long time ago; he might have bought it from me, for all I know.

Q. About that time, what was the stock worth?

A. At that time the stock was worth par.

Q. It was worth par at that time?

A. Yes, sir.

Q. And that was after Capt. Carter reached here that it was worth par?

A. Yes, sir.

Q. And for how long afterwards?

A. I don't know; may be a year or two.

Q. Well, it paid a good profit right along? It was a good investment for you for some years after that, was it not?

A. Yes, sir; very good.

Q. The books of the Company are still in existence?

A. Yes, sir.

Q. The Company is in existence?

A. Yes, sir; and flourishing, too.

Q. Your books show the profits year by year?

A. Yes, sir.

Q. There have not been many transfers of stock between parties, have there been?

A. Yes, sir; a good deal in former years.

Q. But from 1884 along up to 1890; were you doing a pretty good business?

1332 A. Yes, sir.

Q. Do you think that the stock could have been purchased any less from 1890 to 1892 than it could in 1885?

A. No; I don't think so.

Q. You don't think any of it could have been obtained at a less price?

A. No, sir.

Q. Where are the books,—in Savannah?

A. In the river; some of them might be out at sea; they are all in the water.

Q. You are speaking of the boats and I am speaking of the books?

A. Yes; I thought you said boats.

Q. The books of the Company?

A. They are in charge of the Secretary and Treasurer, Mr. Macauley.

Q. Mr. Macauley is your Secretary and Treasurer?

A. Yes, sir.

Q. He is now Secretary and Treasurer?

A. Yes, sir.

Q. And has been for a good many years?

A. Yes, sir.

Q. Can't you refresh your mind a little, and let me know who sold that stock to Capt. Carter?

A. I could not refresh it if I tried my best; I have been trying to think, but I cannot remember.

Q. Your stock book would show the name of the party from whom the transfer was made?

A. Yes, sir.

Q. That would hardly show the price?

A. No; it would not show the price.

Q. Have Capt. B. D. Greene and John F. Gaynor got stock in your Company?

A. No, sir; Capt. Greene has not; John Gaynor has.

Q. How about the Savannah Dredging Co., have they stock in that?

A. Yes, sir.

1333 Q. You have been in the dredging business a good while?

A. Yes, sir.

Q. And had some good, large, contracts?

A. Yes, sir.

Q. Is there any agreement among the Dredging Companies in these waters,—any business partnership, in order to facilitate their business?

A. I don't understand you.

Q. Is there any agreement among them as to a division of the work,—or the way to get work?

A. Am I on trial.

Q. No; indeed, I don't mean any reflection on you in the slightest degree.

A. Well, the question you asked me—

Q. It is a business proposition.

Witness; I beg the Court to protect me; I don't think I ought to answer that question.

Judge-Advocate: (Addressing witness) I would not say anything to irritate you or annoy or insult you in any way. The question I asked is a perfectly proper one, and it would be proper for you to answer. I am not charging you with any offense. I would not consider such a thing an offense. I would like to have you answer my question.

Witness: Does the Court say I must answer it?

The Court: What is your objection to answering the question?

Witness: The question is whether the dredging people have an understanding between themselves, I suppose to protect their mutual interests, and I am in and have been in the dredging business.

The Court: That is not a good excuse; answer the question.

Mr. Blair: I presume the Court will inform the witness,—I have no interest in it whatever,—that he is not compellable to answer any question that he does not desire to answer. I think the witness is under the impression that he is compelled to answer it.

The Court: On what ground?

Mr. Blair: As I understand the law, a Court Martial has no right to compel an answer from a civilian witness.

The Court: That is, that he can answer what questions he desires to answer?

Mr. Blair: I so understand the law. It has been so announced by an Attorney General.

The Court: He presents himself as a witness and is examined in part; he answers part of the questions, and can refuse to answer others?

Mr. Blair: I so understand the law. It is no concern of mine, but it seemed to me that the witness did not desire to go into his business, and that he did not desire to answer the question. and, I think, in fairness, the Court ought to instruct him as to what the law is.

The Court: The Court cannot punish him if he does not answer the question.

Judge-Advocate: Not because that is the law, but simply because an Attorney General has stated it to be the law. I shall never, so long as I appear in the service, concede that a Court Martial has not the same inherent power than any

Court under the Constitution of the United States has to enforce its mandates. A precept from this Court, when it subpoenas a witness, is as good as a precept from any Court in the land. That there is no penalty fixed by statute, is because there was no necessity for a penalty in the eyes of the legislators. They applied the remedy that was needed at the time for the administration of military justice. There was no way of bringing persons before a military court, and the statute was passed to give to the Judge-Advocate the right to issue process of attachment, to bring them before the Court to testify; that is the language of the law. 1335 Attorney General Garland held that, because there was no penalty attached, they could not be compelled to testify. Greenleaf, on evidence, held differently.

The Court: The Court understands that it has no power to inflict a penalty if he declines to answer.

Judge-Advocate: It is a fact that the Court has no power, under the statute, to inflict a penalty, but, as a question of law, I must protest, and have it put upon the record.

Mr. Blair: Then, I presume, going back to the original question, that the President will instruct this witness that he is not compellable to answer a question he does not desire to answer. That is in fairness to the witness, I submit.

The Court: (Addressing the witness) The Court will instruct you to the effect that, in case you do not answer the question, the Court has no power to punish you.

Q. (Judge-Advocate continuing examination) You decline to answer that?

A. Yes, sir; I don't think that I ought to answer that.

Q. You must be the judge; there is no penalty attached to your refusal.

Q. It appears from the testimony of Mr. Macauley, the Secretary of your Company, that he put in a bid for the contract of 1892; he was sick at that time, was he not?

A. Yes, sir; I think so.

Q. You had the matter under consideration, did you not?

A. Yes, sir.

Q. Were consulted with constantly as to how the bids should be made up?

A. Yes, sir; I went up to Mr. Macauley's house.

Q. You went up to Mr. Macauley's house?

A. Yes, sir.

Q. Do you remember making out the bid?

A. No; I do not remember making out the bid.

Q. You examined the specifications, I presume?

A. Yes, sir.

1336 Q. From time to time?

A. Yes, sir.

Q. And conferred with your people as to what you should bid, or what should be bid?

A. Yes, sir.

Q. I think I understand the reason why you didn't become a bidder as president of the Company,—why a personal bid was made, but you may state it?

A. The reason that a personal bid was made was on account of giving the security on the bonds, and I as President of the Company,—I had to go as one of the bondsmen, to furnish the bond.

Q. If Mr Macauley had been the successful bidder, you were in position to become his bondsman?

A. Yes, sir.

Q. And you would have become his bondsman if he had been the successful bidder?

A. Yes, sir.

Q. And, as a matter of fact, you did go on the bidder's bond; you were a guarantor on the bidder's bond?

A. Yes, sir.

Q. You were engaged in dredging mainly, were you not?

A. Yes, sir.

Q. Had you ever had a contract for jetty work?

A. No, sir.

Q. Had you ever familiarized yourself with jetty work?

A. Not a great deal; no, sir.

Q. Had you examined into the details of construction?

A. Yes, sir; I have seen a good deal of it.

Q. But I mean as to the cost of making and sinking fascines,—for instance, mattresses?

A. Yes, sir; I have seen a good deal of it.

Q. Have you seen the mattresses made?

A. Yes, sir.

Q. Have you seen the fascines of which they are constructed made in the woods?

1337 A. Putting the bundles together?

Q. Yes?

A. Yes, sir.

Q. Do you know how much it would cost you if you wanted to manufacture some of them?

A. No, sir; I did not go that far into it.

Q. Have you ever done pile work,—driving piles?

A. No, sir.

Q. These specifications call for fifty thousand tons, more or less, of stone, on which you bid \$2.60 a ton, or on which Mr. Macauley bid; did you know where your Company would get the rock?

A. I guess there would not have been any trouble in getting the rock

Q. Where were you going to get it?

A. Could get it from Florida or from New York; there would have been no trouble in getting the rock.

Q. Had you made any arrangements as to where you could get that rock from if you had been the successful bidder?

A. No, sir.

Q. Did you get any rates of freight from any point?

A. No, sir; we didn't go that far into it; we thought it was time enough after we got the contract, if we got it.

Q. There is one other feature here. I see you offered to do the pile work. You don't seem to be so familiar with this as you were with dredging. If this contract had been awarded to Mr. Macauley, under this bid, how were you going to do the jetty work

A. Couldn't we do it as well as other people?

Q. You say you hadn't gone into the cost of it; you don't seem to be very familiar with it?

A. Would it not be time enough after we got the contract?

Q. Perhaps it might for you. It was a pretty large contract; three and a half million dollars,—a pretty large contract to take without having made any arrangements; risking
1338 a good deal, would it not be, to go into an unfamiliar business of that kind?

A. Yes, sir; but that would not hurt anything as long as there was money in it.

Q. How did you know that there was money in it if you had not made any calculation?

A. At the prices, we would have got some money out of it.

Q. How do you know?

A. I am satisfied about it; like I know anything else.

Q. How did you reach that price of \$51.00 per cluster of fender piles?

A. I must acknowledge to you that Mr. Macauley has done the principal figuring on it, and I suppose he figured it out.

Q. Mr. Macauley testified that he did not do any figuring; that it was brought to him?

A. Which?

Q. This (exhibiting paper)?

A. That is not Mr. Macauley's handwriting. Mr. Macauley and I talked the matter over, and decided on the price, and it was filled out by the young man in our office. Mr. Macauley didn't fill it out, but Mr. Macauley and I talked the matter over.

Q. But you cannot account, as President of the Company, for why you put in \$51.00 per cluster of fender piles?

A. No, sir; I cannot. I didn't put that in, but I guess Mr. Macauley put it in.

Mr. Blair: On behalf of the accused, I ask that the Court meet at ten o'clock in the morning.

The President: If there are no objections, Court will stand adjourned until 10.00 o'clock a. m. tomorrow morning.

(Court adjourned at 3.00 o'clock p. m.)

THOMAS F. BARR

Col. & Asst. Judge Adv. Genl

Judge Advocate.

1339

United States Court Room,
Savannah, Ga.,
February 11th, 1898.

Court met pursuant to its adjournment of yesterday at ten o'clock a. m.

Present: All the members of the Court and the Judge-Advocate.

The accused, his Counsel, and the Reporter, W. O. Tarver, were also present.

The President: Court will come to order.

* * * *

1340 JACOB PAULSEN, a witness for the prosecution, previously sworn, resumed the stand, and testified as follows:

Direct Examination by the Judge-Advocate.

Witness: If you please, before we start, I would like to correct a statement I made yesterday. I stated yesterday that John F. Gaynor was a stockholder in the Propeller Tow Boat Co., and I made a mistake. He is not, and has not been.

Q. In giving your testimony yesterday, you said that, in

the bid which was prepared and signed by Mr. McCauley, you proposed to use Florida stone, did you not? That the bid you made was to furnish Florida stone?

A. No, sir; you misunderstood me. I didn't say that. You asked me where we could have gotten the stone, and I say that that was one place that stone was gotten from,—Florida. We might have gotten it somewhere else.

Q. I ask you, when you made that bid, where did you propose to get the stone, if you or Mr. McCauley had been successful?

A. We didn't look for it.

Q. You had no idea where you would get it?

A. No, sir; it was time enough after we **got the contract.**

Q. How did you happen to think of Florida stone? It 1341 is not mentioned in the specifications, is it?

A. I don't know. I know that Florida stone had been used here before. I don't say that we were going to get Florida stone. I only say that we might have gotten it there; it is only a supposition.

Q. Wasn't it a matter of some importance to you, if your representative had secured the contract, to know what kind of stone you could use, and what price you would have to pay for it? Wasn't that an important matter calling for the expenditure of three and a half million dollars?

A. I guess Mr. McCauley and I talked the matter over at the time. It is a long time ago, and I don't remember the circumstances,—what was talked and done at that time.

Q. Have you often made bids for such an important contract as that?

A. No; not such a large one as that.

Q. It seems to me that that is a matter that might be readily remembered?

A. I don't know; it has been a long time ago.

Q. Mr. McCauley, in his testimony, said that you proposed to get your stone from New York; do you remember anything about that in the discussion of the bids?

A. We talked about stone from New York and stone from Columbia, and stone from different places, but didn't decide that.

Q. You didn't discuss what it would cost you to get it here?

A. I don't remember; I guess we knew somewhere near what we could get it for, or else we would not have put the bid in.

Q. Who got the dredging under that contract, do you remember?

A. P. Sanford Ross.

Q. I asked you yesterday a question which you declined to answer, which, in my judgment, was as proper a question as though I had asked a railroad president of one of our great trunk lines if there had not been a railroad pool for the distribution of business.

1342 A. If what?

Q. It is as proper a question as though I had asked the president of one of the great trunk line railroads if there had been a railroad pool for the proper distribution of business, and you declined to answer. Do you still decline to answer the question I asked you?

A. Yes, sir.

Q. Had you any idea when you put in that bid that you would have any part of the jetty contract?

A. That is a hard thing to say; you might be ever so positive of getting a contract and be left.

Q. Had you any agreement with any party that you would put in that bid? Did you inform any outside parties that that bid was to be made?

A. I cannot answer; I don't remember.

Q. Did you ever have any discussion with the Gaynors, or with any Atlantic Co. representatives in regard to putting in a bid for that work?

A. No, sir.

Q. Never did?

A. No, sir.

Q. And none of your representatives, that you are aware of?

A. Had nothing to do with the Gaynors.

Q. Did you know they were going to make a bid?

A. I suppose so; yes, sir.

Q. You became one of the guarantors on that bidder's bond, I think?

A. Let me see, if you please, the signature. I signed a good many bonds.

Q. I think you testified yesterday that that was why Mr. McCauley made a personal bid?

A. Yes; but I would like to see the signature.

Q. I will show it to you by and by. Had you been successful in securing that contract, was it your intention
1343 to do the jetty work yourself or sublet it?

A. I didn't go that far into it.

Q. You went to the extent of having bids put in in the handwriting of one of your clerks you think?

A. Yes, sir; but I could not swear that it was.

Q. You don't really know who filled out that paper?

A. No; I don't remember. I have honestly been trying to remember who did it, and I can't do it; that is honest; that is the truth.

Q. I don't doubt your word.

A. As true as anything I have ever told; but at the same time, I stand to the bids. They were not put there without my knowing they were put there.

Q. And you have a full understanding of the bids?

A. It was a long time ago, but I remember that the bids were put there all right, and I signed the bond.

Q. Here is a very large contract, on which a man unfamiliar with the business, even with great wealth, might risk the loss of his entire fortune. Now, I want to talk with you, as a business man, about the making of these bids. Had you studied any of the old contracts for improvements in these waters?

A. I hadn't studied them much, but I knew if we got the work at that price, we would be all right.

Q. How did you know that? Where had you received information of that kind?

A. Well, how do we know anything else. We run risks, and sometimes we make a big mistake.

Q. Yes, but this is a very important matter in which to make mistakes?

A. Yes, sir; a good many others in the same way.

Q. A very important matter; I see you are under bond there for three hundred and seventy-five thousand dollars, which is a pretty large sum, for a man to be willing to fill a contract of that magnitude at prices of things of which he does not appear to know a great deal. You were to drive 1344 piles for \$1.55 per lineal foot for three piles, and then you wanted \$51.00 for a cluster of three piles; now, can't you remember something about that very striking feature of the bid?

A. No; I don't remember the details now, but I stand by them bids.

Q. Don't you recognize now that \$51.00 for a cluster of three piles is a good deal of money?

A. That is the reason I was on the safe side.

Q. But you would put in three at other places for \$18.00; don't you remember that feature of your bid?

A. I don't remember now.

Q. That was a striking feature of it. It attracted my attention,—that you would put in three piles for about \$18.00, but, if you put in three as a cluster, you were going to get \$51.00 for them; can't you recall why you made a bid of that kind?

A. No; I don't remember the reason, but there was some reason. Don't a cluster have to have a chain around it, and single piling don't.

Q. About the mattress work; had you any knowledge of how the mattresses were to go in,—how they were to be used,—singly, or in tiers one after the other?

A. I had some idea, I suppose, at that time; I don't remember now.

Q. Did you get any information from any source whatever except from the specifications?

A. I didn't get information from Mr. Gaynor.

Q. I asked you from any source?

A. I don't want to answer that.

Q. You decline to answer that?

A. Yes, sir; in fact, I don't remember who I got the information from, but there is no doubt that, at that time, the thing was talked over, and I got the information from somebody.

Q. Did you know Mr. Connolly?

A. I did.

Q. Did you get any information from Mr. Connolly?

A. I don't think so.

Q. Are you sure that you didn't?

1345 A. I would not swear that I did or did not; I don't remember that I got any from him.

Q. You must have obtained some information somewhere. Mr. McCauley, the ostensible bidder, was sick in bed for several weeks, and somebody must have been acting for the interest of your Company?

A. I went up there when Mr. McCauley was sick, and we talked the matter over, and made the bid.

Q. But when you went there, you must have possessed some information which you conveyed to him, and which was a subject of discussion; where did you get that information?—from anywhere else than in the specifications?

A. I guess I got some, but I cannot remember where I got it

from, but I didn't get any from Mr. Connolly, if my memory serves me right.

Q. I find here two proposals. One is by P. Sanford Ross and one is by the Savannah Dredging Co., with your name as President, for dredging in Savannah River, Georgia. The bids were opened October 15, 1890. I find that the progress of time has made a change in the appearance of these proposals that perhaps might not have been evident years ago; I call your attention to the "eighteen" cents there; do you see that?

A. Yes, sir.

Q. You see the "Located at Savannah, Ga."?

A. Yes, sir.

Q. You see that the ink is entirely of a different character from that which appears in the other part of the proposal?

A. It looks like it.

Q. Is it not very marked?

A. That is a different ink.

Q. That is the proposal of P. Sanford Ross. Now, let us look at this one over here; how is that "Eighteen & one quarter cents per cubic yard,"—how does that ink compare in appearance with the ink of the rest?

1346 A. I am no expert, but it seems to look alike.

Q. I mean with this (indicating) not with that (indicating),—with the remainder of the writing in ink there; how does that compare with the rest of it? Is it the same?

A. It don't look like it; it is a paler ink.

Q. Paler ink; different kind of chemicals. Now, compare that "Eighteen and one quarter" cents in your bid with that "eighteen" cents there; how does the color of that ink compare?

A. It looks something similar, don't it?

Q. I ask you; I have my judgment. How closely do you think they resemble each other,—those two entries?

A. I ain't any expert on the ink business.

Q. That does not require an expert; I mean the resemblance?

A. Yes, sir.

Q. Now, that is signed by you. That "eighteen and one quarter cents per cubic yard" for the dredging is your bid, and "eighteen cents" is the bid of P. Sanford Ross?

A. Yes, sir.

Q. And the two bids are in different colored ink from the rest of the writing there; that is so, is it not?

A. It looks like it.

Q. And the difference between your bid and the bid of Mr. Ross is a quarter of a cent?

A. Yes, sir.

Q. Did you have any understanding with Mr. Ross in regard to that bid?

A. I could not answer that.

Q. You decline to answer it?

A. Yes, sir.

Q. Then you are not going to tell us all you know this morning?

A. No; I don't think I have the right to tell you my private business. Supposing Mr. Ross and I did have an understanding, I don't think you have the right to go into my private business.

1347 Q. That is public business; it was an expenditure of public money that was involved; the public interest of every tax-payer in the Country is involved in that question?

A. I decline to answer it.

Q. You decline to answer?

A. Yes, sir.

Q. Let the proposals answer for themselves. Did your boats do any dredging under that contract?

A. Yes, sir.

Q. You did have some of the dredging?

A. Yes, sir.

Q. Did you have any of the dredging under the contract bid for by Mr. McCauley,—the big contract?

A. Yes, sir; we had some of that.

Q. You had some of each?

A. Yes, sir.

Q. Were you the successful bidder for that dredging or did you have a sub-contract?

A. For which contract?

Q. For either 1890 or 1892?

A. No; Mr. Ross didn't have dredges enough to put on to do the work with, and, of course, we helped him out.

Q. You did get some, then, of the contract?

A. Yes, sir.

Q. And some of the big contract of 1892?

A. Yes, sir.

Q. Who was the successful bidder for both of those contracts?

A. Mr. Ross.

Q. Who was the guarantor on the bidder's bond of Mr. McCauley with you?

A. I think it was Col. Estill; you have it there, ain't you?

Q. I am asking for the information of the Court?

A. I think it was Col. Estill. I signed a good many
1348 bonds, but I think Col. Estill was on that bond with me.

Q. Who is Col. Estill?

A. He is the proprietor of the Morning News.

Q. Here in Savannah?

A. That is right; John H. Estill, I think it was.

Q. I would like very much to find out who filled in that
bid?

A. I could not tell you to save my life. I have been trying
to remember it, but I don't remember it.

Q. You thought yesterday that it was one of your clerks;
which one did you think it was?

A. A young man by the name of Myers.

Q. Is he with you now?

A. No, sir.

Q. Do you know where he is?

A. No, I do not.

Q. He has left the City so far as you know?

A. No, sir; he is not in the City.

Q. Do you remember his initials?

A. No; I don't remember his initials; he belonged in At-
lanta.

Q. Do you know any of his friends here, that you could get
me his address in some way?

A. I might find out for you where he is.

Q. Will you kindly do so?

A. Yes, sir; I will.

Q. To the best of your recollection, that writing there is
that of one of your clerks, but you are not sure; now, the
handwriting below there (Referring to Exhibit 34, proposal
of W. F. McCauley) is different; do you recognize that. Can
you recall that?

A. No; I do not remember the writing. It is not Mr. Mc-
Cauley's writing.

Q. No; there (indicating) is Mr. McCauley's writing?

A. Yes, sir.

Q. And those two are different. The bids are put in,
1349 —the prices,—in a peculiar hand-writing, and then the
recital of the dredges and scows available appears in a
different handwriting?

A. You know, as a general thing, they don't put the bids in until the last minute,—until just shortly before they are going to be opened.

Q. Did you put this in personally?

A. I don't remember, but it is very likely I did.

Q. You don't remember whether you were present at the opening of the bids in 1892?

A. I was.

Q. And very naturally, you put in the bid?

A. Very likely I carried it over myself.

Q. You say it is always usual to put in these prices just before putting in the bid?

A. Generally, yes, sir; most always.

Q. Then, were these prices in there when Mr. McCauley signed these bids in his sick chamber, or were they put in subsequently?

A. I don't remember.

Q. Don't remember whether you broke or followed out the general rule?

A. I guess Mr. McCauley could tell you.

Q. But he was sick in bed?

A. But I reckon he could tell you whether the bids were there before he signed them or not.

Q. Did you examine these specifications with a view to determine the kind of mattresses to be used?

A. I could not remember that.

Q. There are three designs mentioned in the specifications. One calls for a mattress of this description: "This mattress is a raft of round logs not less than twelve inches in average diameter, and not less than nine inches in diameter at the small end, placed in close contact side by side, and firmly held by transverse pole-binders spiked or bolted to them.

The binders will be smaller logs or poles not less than five inches in diameter at the small end, and placed not more than eight feet apart, and those on the outside will be close to the ends of the logs. There will be placed upon the raft of logs a layer of live wood brush sufficient to give six inches in thickness to the finished work, secured in place by poles lashed to the binders of the raft." Did you ever see a mattress of that kind?

A. I don't remember.

Q. You were willing, then, to enter upon the construction of something you had never seen?

A. I guess I had seen it.

Q. Where had you seen a mattress like that?

A. I don't remember where, but I had seen a good many mattresses.

Q. But had you seen one that filled the requirements of that design?

A. I could not swear whether I had or not.

Q. Then you didn't know what it would cost to make a mattress of that kind,—of that design?

A. Not to a fine item.

Q. Then there was a second design to be considered, as follows: "This mattress will consist of a layer of closely-placed fascines crossed at right-angles by a second layer of like fascines placed at intervals of six feet. The brush must be carefully laid so as to break joints and to make a continuous fascine extending completely across the mattress. The fascines must be firmly held between binding poles made of live saplings of pine or other timber of a kind approved by the Engineer Officer in charge. These must be straight and of slight taper, and must not be more than five inches in diameter at the butts, nor less than two inches in diameter at the tips." Did you ever see a mattress that answered that description?

A. I don't remember.

Q. That is not a full description of it, but enough to give you my meaning. "Third Design.—This mattress will
1351 consist of a bottom grillage of poles of live saplings of pine or other timber of a kind approved by the Engineer Officer in charge. The poles must be straight, of slight taper, of an average diameter of four to five inches, and not less than three inches at the small end, and must be placed from four to eight feet apart between centres, both longitudinally and transversely, and spliced together with long scarf joints in a manner satisfactory to the Engineer Officer in charge. Upon this grillage will be placed a layer of closely compacted fascines surmounted by a top grillage similar in design to the one at the bottom. The poles of each grillage will be securely fastened together by suitable wire or rope lashings, and the upper and lower grillages will also be securely fastened together in such manner as the Engineer Officer in charge may approve." Did you ever see a mattress like that?

A. I guess I have, but I could not swear to it.

Q. Where did you see it?

A. I have seen a good many mattresses; I have seen lots of them, but I could not swear that they are of that dimensions, what I have seen.

Q. Which of those designs would have been the most expensive to construct had you gotten that contract? Which would have cost you the most money to make?

A. I could not remember.

Q. Did you know at the time?

A. I guess I had some idea about it.

Q. Is it your judgment that they could be made for the same price?

A. I suppose so.

Q. You think they could be made for the same price. The first design and the second design would not cost any more to construct and put in place than the third design described?

A. I don't know.

Q. And you didn't know when Mr. McCauley made this bid?

A. I guess we knew something about it at that time.

1352 Q. Did you have any information as to what kind of a mattress would be called for?

A. I don't remember.

Q. You said in regard to the stone that it was time enough, in your judgment, to arrange for procuring it, after the contract had been secured; how about the logs and the iron and the other material required? Had you made any investigation as to what it would cost you to procure those?

A. I don't remember, but we would have just as much time to get that as to get the rock, and there would not have been any trouble about the rock.

Q. Did you make any arrangements,—not what you might have done had you secured the contract,—but did you make any arrangements before putting in your bid?

A. No, sir.

Q. You didn't know where you would get the iron from?

A. No.

Q. And you didn't know where you would get the logs from?

A. No.

Q. And you didn't know where you would get the stone from?

A. No.

Q. Nor the brush necessary, or any of the other material mentioned in the proposals,—that is true, isn't it?

A. Yes, sir.

Q. The dredging part of the contract you were prepared to carry out? You knew what that would cost you?

A. Yes, sir.

Q. What dredges were you going to use in that contract, do you remember?

A. I don't remember, but I guess it is on the specifications.

Cross-Examination by Mr. Charlton.

Q. Just one or two questions. The Judge-Advocate asked you whether you had made any arrangements about your
1353 bid,—about the stuff you were to acquire; is there any difficulty in getting iron, logs, brush and stone around here?

A. No, sir.

Q. In spite of going on all of these bonds, you head is still above water, I believe?

A. Yes, sir; I hope so.

Q. You are reasonably solvent?

A. Yes, I hope so.

Q. When you went upon that bond, were you perfectly able to go upon it?

A. Yes, sir.

Q. Do you happen to know whether Col. Estill is one of the wealthiest men in Savannah?

A. Yes, sir.

Q. You know that is a fact?

A. Yes, sir.

Q. You stated yesterday that Capt. Carter was a stockholder in the Propeller Tow Boat Co., that he had 150 shares?

A. Yes, sir.

Q. Do you remember whether he bought all of those shares, or whether the Company issued some to him as a dividend from time to time,—issued to him and all of the stockholders as a dividend?

A. Yes, sir.

Q. It was a prosperous company?

A. Yes, sir.

Q. A great many responsible business people in Savannah were stockholders in it?

A. Yes, sir.

Q. And being prosperous, gave a dividend of stock to the stockholders?

A. Yes, sir.

Q. The Savannah Dredging Co. is a different organization?

A. Yes, sir.

Q. Does Capt. Carter own any stock in that?

1354 A. No, sir.

Q. And never has?

A. No, sir.

Q. The Capital stock of the Tow Boat Co. is what,—do you remember?

A. Three hundred thousand dollars.

A. That makes three thousand shares?

A. Yes, sir.

Q. And out of that, Capt. Carter happens to own at present 150 shares?

A. Yes, sir.

Q. I don't suppose the fact that a man owns stock in the same company that you do entitles him to a portion of the profit in other companies you own stock in? If it does, I would like to find that out, as I believe I have some in some companies with you.

A. No, sir; two companies; don't have any relationship.

Q. Nothing at all?

A. No, sir.

Q. At the time you put in this bid, did you or your partners, or anybody in your company, have any general information or knowledge in regard to the character of work to be done, and what it was apt to cost you?

A. Yes, sir; of course, we talked the matter over.

Q. It was a business venture?

A. It was a business venture, but I don't remember the circumstances.

Q. It has been six years now?

A. Yes, sir.

Q. It was constructed in 1892?

A. Yes, sir; that is right.

Q. And it was a business venture made by your concern, or by you and Mr. McCauley?

A. Certainly; a business venture.

1355 Q. And out of which you expected to make a profit, and it was honestly put in?

A. Yes, sir; why should we have gone to the trouble of getting Col. Estill to go on the bond if it was not to go in?

Q. But your bid was put in, as you say, being an honest business venture, out of which you expected to make a profit. Were the Gaynors or anybody shown your bid, or did they have anything to do with it?

A. They didn't have anything to do with it.

Re-direct Examination by the Judge-Advocate.

Q. So far as you know, the party who filled in those proposals, whose name you cannot remember, might have informed Gaynor of the amounts they inserted there?

A. I could not swear to that.

Q. So far as you know, that is true?

A. Yes, sir; that is true.

Judge-Advocate: That is quite evident from the proposals themselves.

Mr. Rose: The Judge-Advocate ought to go on the stand himself if he is going to testify; or will you sum up the case now or wait until we get through?

Judge-Advocate: Perhaps I might do so if I followed the example of Counsel.

Q. (Continuing examination) When was your last stock dividend?

A. In the Tow Boat Co.?

Q. Yes.

A. The last stock dividend was in December.

Q. Of this last year?

A. Yes, sir.

Q. How many shares to a hundred shares of stock?

A. How is that?

Q. How large was the dividend? How much was the
1356 distribution of stock? How many shares did you give
to the share-holders for each one hundred shares that
they held?

A. When?

Q. The last dividend?

A. We didn't pay any dividend.

Q. I mean the distribution of stock?

A. That was not done lately.

Q. When was that done?

A. Done I suppose in 1889 or 1890; somewhere along
there. I thought you asked me about the dividend.

Q. Then, how many stock dividends have been made by
the Tow Boat Co. since 1884?

A. I think one.

Q. How many shares were distributed for each one hundred
shares held by the stockholders?

A. One hundred.

Q. Just double?

A. Double.

Q. A handsome dividend?

A. Yes, sir.

Q. Then Capt. Carter didn't purchase one hundred and fifty shares in 1884 or 1885?

A. No, sir.

Q. He only purchased seventy-five?

A. No; he didn't purchase that, I don't think. If my memory serves me right, I don't think he bought the whole thing at one time.

Q. When did he buy it?

A. Capt. Carter became an owner in the Tow Boat Co., I guess, in 1888 or 1889.

Q. That was his first ownership in it, was it?

A. Yes, sir.

Q. Then yesterday, when you testified that he became an owner in it soon after his arrival here, that was a little inaccurate?

1357 A. I don't remember when he came here, nor am I positive about the years, but it seems to me it was about the time,—it might have been in 1890.

Q. It might have been in 1890?

A. Yes, sir.

Q. Will you look on your books, and let me know just when he became the proprietor of that stock?

A. Do you think that it is right for the president of a Company to give his stockholders away?

Mr. Blair: Capt. Carter has no objection.

Witness: It is generally the rule in banks and other institutions that we don't give our stockholders away

Judge-Advocate: Not in a criminal Court.

Witness: I don't want you to get me to give anything away that I have no right to.

Judge-Advocate: You have a right to tell that in a criminal Court, and this is a criminal Court.

Mr. Blair: Capt. Carter, the accused, gives you permission to tell all you know about his ownership in the Tow Boat Co.

The Court: The Court would like to make a remark. The witness has presented himself as a witness, and taken an oath to tell everything he knows in regard to the matter. The Court thinks he is morally bound to answer all questions which do not tend to incriminate himself, or that will not make him responsible for trial and punishment by a Court of justice, and, in refusing to answer these questions, the

Court considers that he is guilty of contempt of Court, but we are so placed by a ruling of the Secretary of War that we cannot, at the present time, mete out the proper punishment for that contempt.

Q. (Judge-Advocate continuing) Will you furnish that information?

A. Yes, sir; with pleasure, as long as Capt. Carter does not object.

Q. Since Capt. Carter does not object, you will furnish it?

A. Yes, sir; as near as I can remember. The first 1358 stock Capt. Carter bought was only five shares.

Q. Do you remember when that was?

A. It was in 1889 or 1890.

Q. Then I have asked you to go to your books and give us that information?

A. All right.

Q. If you will do that, I will be obliged to you?

A. I will do that.

Q. If you will get that information, and come back in the course of three-quarters of an hour or an hour, I will be much obliged to you.

A. All right, sir.

Witness excused, to get the information requested.

Judge-Advocate: Will the Court take a recess for a short time, please.

(At 10.55 a. m., Court took a recess until 11.30 a. m.)

The Court met pursuant to recess at 11.30 A. M.

Present:

All the members of the Court and the Judge-Advocate.

The accused, his counsel and the Reporter, W. O.

Tarver, were also present.

1365 Judge-Advocate: The proposals of P. Sanford Ross and The Savannah Dredging Co. for Dredging in Savannah River, Ga., opened Oct. 15, 1890, which were shown to Mr. Paulsen when he was on the stand, had not before been shown to the Court, and copies of them will be attached to the record marked Exhibits 262 and 263.

1377 JACOB PAULSEN, a witness for the prosecution, previously sworn, resumed the stand, and testified as follows:

Direct Examination by the Judge-Advocate.

Q. You have procured the information I desired, I understand?

A. Yes, sir. Capt. Carter bought the first five shares of stock on July 1st, 1890. He then, shortly afterwards, got five shares dividend. April 21, 1891, Capt. Carter bought one share from the Company.

Q. For how much?

A. At par. June 16, 1891, he bought four shares. January, 1892, he bought ten shares, and May 13, 1892, fifteen shares.

Q. Do you know what the shares were then rated at?

A. No, sir; I don't know what he paid for them.

Q. Dividends were being paid on them at that time; your Company was prosperous?

A. Yes, sir; the Company was earning dividends. They were paying dividends, and they were also accumulating a surplus fund, to build new iron boats. On October 22, 1892, Capt. Carter was credited with \$1,875.00.

Q. From the surplus was that?

A. No, sir; it was an extra issue of stock; and on Nov. 15th, along with the \$1875.00,—which was credited to Capt. Carter,—paid \$625.00 and got twenty-five shares of stock. Then in February, 1893, Capt. Carter bought twenty five shares of stock.

Q. What date in February?

A. Feb'y 20, 1893. March 10, 1894, he bought twenty shares, and May 27, 1895, thirty shares. That makes the 150 shares.

Q. In giving your testimony yesterday, you were mistaken in saying that Capt. Carter took some stock soon after he came here?

A. I said shortly after he came here; you misunderstood me.

Q. But, as a matter of fact, he never took any until 1890?

A. Yes, sir.

1378

Re-cross Examination by Mr. Charlton.

Q. I notice that \$1,875.00 was put to his credit; that was in the nature of a money dividend to be taken out in stock?

A. Yes, sir.

Q. It was put to the credit of every other stockholder in the same proportion?

A. Yes, sir.

Q. Will you state whether in 1890, when Capt. Carter bought his first five shares, the Tow Boat Co. had any contract with the United States Government in this District?

A. No; never did.

Q. Has it ever had any since that time?

A. Never. Never before and never since. Never had any contract; they don't do that kind of business.

Re-direct Examination by the Judge-Advocate.

Q. Do you ever do any towing for the Savannah Dredging Co.?

A. They have done it; yes, sir.

Q. Ever do any for Mr. Ross?

A. Yes, sir.

Q. You have done towing for those two?

A. Yes, sir; and for more, too. We hire the boats to do the towing.

Q. Then you did do towing for Ross and the Savannah Dredging Co.?

A. Yes, sir; and for Mr. Moore too.

Re-cross Examination by Mr. Charlton.

Q. You did towing for anybody that paid for it?

A. Yes, sir; for anybody that paid for it.

Q. It was a corporation for that business, to do towing?

A. Yes, sir.

Re-direct Examination by the Judge-Advocate.

Q. Did you do any for the Atlantic Contracting Co.?

A. We have towed for them, too. We have ten boats, you know.

1379 Q. It has been a very prosperous company?

A. We have boats to hire.

Witness excused.

Judge-Advocate: I read now, and ask to have it put on the record as evidence, from the Annual Report of Lieut. Carter, being Appendix O of the Annual Report of the Chief of Engineers for 1890, an extract from page 1261:

"In view of the foregoing the following plan of improvement is submitted:" (among the items of the project)

"A training-wall from the lower end of Marsh Island to Kinzey's Point and the widening of the unduly contracted region below Kinzey's Point," calling the attention of the Court to the fact that that is the Hutchinson Island improvement.

I also read from the specifications of the contract of 1892, which are already in evidence, the "Amount and Character of Dredging", paragraph 42.—"The following is an outline of the work required:

"Such parts of the pile and timber wharfing and revetment and such parts of the ship railways on Hutchinson's Island as project beyond the bulkhead line established in 1889 will be removed by the contractor and so disposed of by him as not to injure vessels or obstruct navigation. When this timber and other material has been removed, the shore of Hutchinson's Island will be excavated by dredging to a depth of 26 feet at mean high water and back to the established bulkhead line, and the contractor will then build on that line pile and timber wharfing or revetment which, in the opinion of the Engineer officer in charge, is equally as extensive, good, and desirable in every respect as that removed. The contractor will also alter or repair the ship railways, putting them, in the opinion of the Engineer Officer in charge, in equally as good and desirable a condition as they were at the time of their partial removal. The wharfing or revetment, with this foundation and backing of logs, stone, etc., is to be removed and disposed of by the contractor at a fixed price per lineal foot, measured along the line of the work, this price to include the replacing or rebuilding of the wharfing or revetment, and the alteration of the ship railways hereinbefore mentioned."

This is from the specifications of the big contract of 1892, dated Aug. 17, and the bids were opened September 17, 1892, in which P. Sanford Ross had the contract for dredging.

I read now from page 1457, Appendix M, Report of the Chief of Engineers for 1895,—report of Capt. Carter:

"Since the existing project for improving Savannah Har-

bor was adopted, the following appropriations have been made for this work:

“By act of Congress of—

“August 11, 1888, (unexpended balance) \$	4,035.05
“September 19, 1890	350,000.00
“July 13, 1892,	318,750.00
“March 3, 1893,	1,000,000.00
“August 18, 1894,	975,000.00
“March 2, 1895,	856,250.00

Total \$3,504,035.05.

“The entire amount estimated in my report of June 30, 1890, has now been appropriated, and it is expected that this will be sufficient to complete the improvement according to the project submitted in the same report. For the following reasons, however, it cannot be expected that the improvement will be permanent throughout the entire length of the river.”

I read from the Report of the Chief of Engineers for 1896, Appendix M, report of Capt. Carter, page 1222, this extract:

“The entire amount estimated in my report of June 30, 1890, as necessary for the completion of the present project of improvement has now been expended, the works of contraction have been completed, and the object of the improvement—that is, the establishment of a navigable channel 26 1381 feet deep at mean high water from the City to the ocean bar—has been attained.”

JOHN W. O. STERLY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. (Handing witness paper) Do you identify that letter?

A. Yes, sir.

Q. What is it?

A. It is a letter from the Acting Chief of Engineers to Capt. Carter relating to the Parrott Estate and the modification of the harbor line.

Judge-Advocate: I offer in evidence, and read:

“Office of the Chief of Engineers,
United States Army.

Washington, D. C., November 16, 1896.

“Capt. O. M. Carter,
“Corps of Engineers,
“Savannah, Ga.

“Captain:

“Referring to recent correspondence relative to the Parrott estate and the modification of harbor lines at Savannah, Ga., I have to inform you that Col. Hains will stop at Savannah on his way to or from Tortugas for the purpose of investigating the matter and making report thereon. You will furnish him with any information or other assistance that he may require.

“Very respectfully,

“Your obedient servant,

“A. MacKENZIE,

“Acting Chief of Engineers.”

Endorsed: “U. S. Engineer Office, Savannah, Ga. Received Nov. 13, 1896”. This was subsequent, as the Court will remember, to the endorsement of the accused, which bore date of Oct. 21, 1896.

1382 Mr. Rose: And prior to Col. Hains’ letter.

Judge-Advocate: Prior to Col. Hains’ letter, in which Col. Hains repeated, as the Court will remember, the statements in Capt. Carter’s letter.

Mr. Rose: In which Col. Hains said: “I therefore recommend. It is my own conclusion and recommendation.”

Judge-Advocate: He concluded in the language of the accused.

Mr. Rose: I don’t remember the language he used.

Q. (Handing witness paper) What is this?

A. A note written by Col. Hains in the Savannah Office to Capt. Carter, when he was here in Savannah.

Judge-Advocate: I offer in evidence and read:

“Nov. 27

“My Dear Captain:

“Sorry not to see you. Am two days late now or I would stop over till tomorrow.

“In regard to the Hutchinson Isl. matter, I would like to ask you whether or not other claimants than the Parrott heirs are now likely to make trouble, or is the trouble with them alone? If only with them, cannot some plan of agreement be

arranged? I understand of course that an appropriation will have to be available for it.

"The Department is anxious to settle the case in some equitable way.

"Yours truly,
P. C. HAINS."

"Capt. O. M. Carter,
U. S. Engrs."

Stamped on the back is: "U. S. Engineer Office, Savannah, Ga., Received Nov. 28, 1896", and then marked: "Savannah, Ga., November 27, 1896", indicating probably the return of the accused.

Q. (Handing witness paper) What is that?

1383 A. Copy of letter to Col. Hains in regard to the Harbor Line, Kinzey's Point, and Savannah Harbor Lines, from Capt. Carter. It is enclosure to S. H. 89, 1896.

Q. That had gone to the War Department?

A. Yes, sir.

Judge-Advocate: I offer in evidence and read:

"Subject: Harbor Line, Kinzey's Point, and Savannah Harbor Lines.

"United States Engineer Office,

"Savannah, Ga., November 28, 1896.

"Colonel Peter C. Hains,

"Corps of Engrs., U. S. Army,

"Division Engineer, Southeast Division,

"9 Pleasant Street, Baltimore, Md.

"Colonel:—

"Replying to your inquiry of the 27th instant, I have to state that so far as I have heard no claimants other than the Parrot heirs are causing any trouble in regard to the Savannah Harbor lines. There is no reason whatever why the Parrott estate cannot be settled on the present basis, since the City of Savannah agrees to give to all holders of property on Hutchinson's Island an equal amount of land in the rear of their present holdings. If it is desired to erect any buildings on the land, this can be done, placing such buildings not farther forward than the approved harbor line. The removal of the land in front at any time by the United States could only improve the value of the property. Since action by the United States can no longer injure, but rather improve the value of the holdings of the people on Hutchinson's Island, I see no reason why they should claim damages. As I have stated in my reports, it is impracticable at present to cut

off the projecting points of land, since the property owners on Hutchinson's Island, while interposing no objection to the present state of affairs, do object to the proposed changes, claiming excessive damages for the loss of the water 1384 front during the time the work of excavation and replacing of the wharves would necessarily continue.

"It is not practicable, without injury to the harbor, to get the enlarged cross-section by deepening instead of widening the river, and relinquishment of the adopted harbor line will work serious injury to the harbor. Since, as I have before stated, the present condition of affairs does not work any injury to any one and does not in any way interfere with the settlement of any estate, I am still of opinion that the existing harbor line should not be modified.

"If the property owners themselves could secure an appropriation sufficient to pay their claims, which I think excessive, the work of altering the shore in that vicinity could be done immediately.

"Very respectfully yours,

"Your obedient servant,

"O. M. CARTER,

"*Capt. Corps of Engrs. U. S. A.*"

Q. (Handing witness paper) What is that?

A. That is a letter from Capt. Carter to the Chief of Engineers in regard to cutting off Hutchinson's Island, Savannah Harbor, Ga., with endorsement from the Chief of Engineers.

Judge-Advocate: I offer in evidence and read:

"Subject: Cutting off Hutchinson's Island, Savannah Harbor, Ga.

"United States Engineer Office,

"Savannah, Ga., January 23, 1897

"Brig. Gen. Wm. P. Craighill,

"Chief of Engineers, U. S. Army,

"Washington, D. C.

"General:

"Complying with oral instructions received from you, I have the honor to state that I am of opinion that the 1385 cheapest way to settle the question of land projecting beyond the established bulkhead line on Hutchinson's Island, Savannah Harbor, is to dredge away said land. All of the owners of the property, with the exception of Mr. Willink, are willing to claim no damages from the United States, being contented simply that the present structures be moved to the rear of the existing wharf front or replaced

by others equally as good, the City of Savannah agreeing to give the wharf owners land in rear of their present holdings equal to that taken by the United States. Mr. Willink, whose property consists of a ship railway, desires rental for the time lost by him during the execution of the work. I am of opinion that \$300 per month will be ample rental and that the time required will not exceed four months. I am of opinion that the entire amount of land projecting beyond the bulkhead line can be removed, the present structures replaced and the rental of the railway paid for the sum of \$125,000.

"In this connection, and for details, I respectfully refer to my report of May 26, 1891.

"Very respectfully,

"Your obedient servant,

"O. M. CARTER,

"*Capt., Corps of Engrs. U. S. A.*"

"(Enclosures consisting of
papers left by Gen. L.
Craighill,—4 papers.)"

"1st indorsement?

Office Chief of Engineers,
U. S. Army,

"Feb'y 15, 1897.

"Respectfully returned to Capt. Carter. It does not appear that the removal of a part of Hutchinson's Island forms a part of the existing project for completing improvement of Savannah Harbor. The appropriation and legislation of the river and harbor act of July 13, 1892, provided for completion of existing project of improvement, at a certain limit of cost; work in accordance with such limit was carried out and reports indicate the project was completed.

"The work provided for by river and harbor act of June 3, 1895, does not, it is understood, include work of dredging a portion of Hutchinson's Island or such an expenditure as is contemplated herein.

"It therefore appears that if the widening of the river in the vicinity of Hutchinson's Island is to be carried out a new estimate must be submitted and a special appropriation for the work made. The presenting of such a report and estimate unless called for by concurrent resolution is prohibited by law.

"Further than this it is the opinion of the Chief of Engineers that while the United States might undertake to carry out the dredging required for widening the channel, it should

not be called upon to pay for land or private rights to be damaged by the proposed improvement of this harbor.

"As the proposed widening of the harbor by removing a portion of Hutchinson's Island does not now form a part of existing project; as any adoption of such a work through the legislation of Congress cannot be brought about for some time to come, and as the present condition is working injustice to private interests, it is the intention of the Chief of Engineers in the near future to recommend to the Secretary of War, such a modification of the harbor lines in Savannah Harbor as will, without permitting any future encroachment on the existing water way, permit those having riparian rights to exercise such rights fully.

"By command of Brig. Gen. Wilson.

"A. MacKENZIE,

"*Lieut. Col. Corps of Engineers.*"

And indorsement not signed is the second indorsement, which I will not read.

The Court will doubtless have observed, as I have read 1387 these papers yesterday and today, that the report of

Col. Hains to Gen'l Craighill, made Dec. 1st, 1896, calls attention to the fact that he was in Savannah on the 27th of November, but that Capt. Carter had gone to Jacksonville, and he didn't see him, but that he examined the records of the case and inspected the Island itself from a commanding position on the Savannah side of the River.

I call attention of the Court to Specification 8 of the third charge, "Conduct unbecoming an Officer and a gentleman," page 14.

Q. (Handing witness paper) What is that book?

A. Savannah Harbor Book No. 4.

Q. What is that letter I show you on page 45.

A. Letter from Capt. Carter in regard to the quarantine station, Savannah Harbor.

Judge-Advocate: I offer in evidence and read:

"Subject: Quarantine Station, Savannah Harbor.

"United States Engineer Office,

"Savannah, Ga., Feb'y 25, 1896.

"Brig. Gen. Wm. P. Craighill,

"Chief of Engineers, U. S. Army,

"Washington, D. C.

"General:

"On April 26, 1894, the Secretary of War granted to the

City of Savannah permission to build, outside the established harbor line at the new quarantine station near Savannah, certain temporary structures, provided

That the City of Savannah shall remove immediately, at its own expense, upon demand by the War Department, all structures erected or material deposited, by or under the authority of the said City, beyond the harbor line established January 19, 1893.

"There have been built by the City of Savannah beyond the established harbor line, wharves, tramways, engine sheds, fumigating house, etc. Considerable ballast has also 1388 been deposited beyond the harbor line.

The improvement of the harbor has now reached a point where it is necessary to open at once A-B-C shown on the blue print herewith. The point of land at the quarantine station projecting beyond the established harbor line should be cut away, and I have the honor to request that, in compliance with the terms of the permission granted by the War Department on April 26, 1894, the city of Savannah may be required to remove at once all structures built or material deposited beyond the established harbor line.

"Very respectfully,

"Your obedient servant,

"O. M. CARTER,

"*Capt., Corps of Engrs., U. S. A.*

(one enclosure)"

Q. (Handing witness paper) What is this?

A. This is a map or tracing of Oyster Bed Shoal, Savannah Harbor, Ga., 1896.

Judge-Advocate: This is identified by (Reading) "U. S. Engineer Office, Savannah, Ga., Feb. 25, 1896. Transmitted with my letter of this date. O. M. Carter, Capt., Corps of Engrs., U. S. A." It is the original from which the blue print was taken, and it is submitted in evidence. The blue print will be attached to the record marked Exhibit No. 264.

Q. (Handing witness paper) What is that?

A. Letter from the Chief of Engineers forwarding copy of letter to the Mayor of Savannah from the Secretary of War, directing the City to remove material deposited by its agents beyond established harbor line, at quarantine. "1st Indorsement. Office of Chief of Engineers, U. S. Army, March 12, 1896. Copy respectfully furnished Capt. Carter, Corps of Engineers, for his information. By command of Brig. Gen.

Craighill: A. MacKenzie, Lieut. Col. Corps of Engineers."

1389 Judge-Advocate: I offer in evidence and read:

"War Department,

"The Mayor, Washington, D. C., March 9, 1896.
of the City of Savannah, Ga.

"Sir:

"Under authority of section 3 of the river and harbor act, approved July 13, 1892, the Secretary of War under date of April 26, 1894, gave the City of Savannah, Ga., permission to build outside the established harbor line in the Savannah river at the new quarantine Station near Savannah, Ga., such temporary structures as might be necessary in connection with said Quarantine Station, upon the following condition, *inter alia* :—

'That the City of Savannah shall remove immediately, at its own expense, upon demand by the War Department, all structures erected or material deposited, by or under the authority of the said City, beyond the harbor line established, January 19, 1893.'

"It is understood that under authority of said permission, the city of Savannah has built beyond the established harbor line wharves, tramways, engine sheds, fumigating house, etc., and has deposited ballast beyond the harbor line.

"The work of improving Savannah Harbor has reached a point where the removal of the structures built and the deposits made by the City beyond the harbor line is necessary in its further prosecution.

"I have the honor, therefore, to request that the City of Savannah remove at once all structures erected and all material deposited by or under its authority beyond the harbor line established, January 19, 1893.

"Very respectfully,

"DANIEL S. LAMONT,

"Secretary of War.

1390

"1st indorsement

"Office of Chief of Engineers,
Y. S. Army,

March 12, 1896.

"Copy respectfully furnished Capt. O. M. Carter, Corps of Engineers, for his information.

"By command of Brig. Gen. Craighill.

"A. MacKENZIE,

"Lt. Col., Corps of Engrs."

Judge-Advocate: I offer in evidence and read:

“City of Savannah,

“Mayor’s Office,

“March 14, 1896.

“Hon. Daniel S. Lamont,

“Secretary of War,

“Washington, D. C.

“Sir:

“I have the honor to acknowledge receipt of your communication of the 9th inst. relative to the removal of tramways, engine sheds, fumigating house, etc., at the quarantine station of the City of Savannah, and beg to state that the matter will receive prompt attention at the next regular meeting of the City Council.

“Yours respectfully,

“HERMAN MYERS,

“Mayor.

“1st indorsement,

“Office of Chief of Engineers,

U. S. Army, March 18, 1896.

“Copy respectfully furnished Capt. O. M. Carter, Capt., Corps of Engineers, for his information.

“By command of Brig. Gen. Craighill.

“A. MACKENZIE,

“Lt. Col. Corps of Engrs.

1391 Judge-Advocate: I also offer in evidence and read:

“City of Savannah,

“Mayor’s Office,

“March 21, 1896.

“Hon. Daniel S. Lamont,

“Secretary of War,

“Washington, D. C.

“Sir:

“Replying further to your communication of the 9th inst., relative to the removal of structures erected beyond the harbor line established January 19, 1893, I beg to say that the communication and other letters and data connected with the subject matter have been referred to the Council of the City of Savannah, which had the benefit of a conference with Capt. Carter.

“In compliance with the request of Council, I beg to call your attention to the fact that the only structures erected beyond the harbor line, since its establishment have been a fumigating building and a small building erected for sailors’ quarters. We, therefore, understand that it would be the duty of the City of Savannah to remove, at its expense, those two

buildings, and also so much of the ballast deposited beyond the harbor line since its establishment; but we beg to call your attention to the fact that the most expensive and valuable improvements, namely, the wharves and tramways now beyond the harbor line, were erected and completed some years before the establishment of the harbor line. Their erection began in 1888 and was completed the early part of 1890. They were built at a heavy expense to the City of Savannah. Their removal would necessitate the removal of the quarantine officer's quarters, which is now within the harbor line, and practically the establishment of another station. We understand that the Government could not expect the City of Savannah to remove these wharves and tramways and establish another station at the City's expense, and that the Government could do so only under its powers of eminent domain, and by proceedings looking to compensation to the City of Savannah.

"I need not say that the City desires always to co-operate with the Government authorities in the establishment and maintenance of its harbor line, but at the same time, the City of Savannah would be bound, in justice to its citizens and taxpayers, to protect them in the matter of expense incident to the destruction of its station, and the removal of buildings erected before the establishment of the harbor line. It is also proper to add that we were compelled to establish our present station in 1888 on account of the government work and the shoaling of the waters in front of our former station, and this entailed upon the city a large expense.

"Very truly and respectfully yours,

(Signed) HERMAN MYERS,
Mayor."

"1st indorsement by brief from the Secretary of War to the Chief of Engineers.

2nd indorsement. Office of Chief of Engineers, U. S. Army.

"March 25, 1896.

"Respectfully referred to Capt. O. M. Carter, Corps of Engrs., for remarks. To be returned.

(Signed) A. MAC KENSIE,

"Acting Chief of Engineers."

"3rd indorsement. United States Engineer Office,
Savannah, Ga., March 27, 1896.

"Respectfully returned to the Chief of Engineers, U. S. A., Washington, D. C.

"In 1885, when dam No. 31 was built, the quarantine station

of the City of Savannah was situated on the Oyster Bed, nearly opposite Fort Pulaski. After the construction of that Dam, the anchorage north of the Oyster Bed began to shoal, and in 1888 three small wharves were built on Long Island to facilitate the discharge of ballast.

1393 "In February, 1889, I informed the City authorities that those wharves were too near the navigable channel, and that the continued occupancy of Long Island might be endangered by the impending establishment of harbor lines in that vicinity.

"The City of Savannah therefore applied for permission to establish its quarantine station on Cockspur Island. That permission was granted, and the conditions of the occupancy prescribed by the Secretary of War were accepted by the City on May 2, 1889. Nothing was done, however, on Cockspur Island, but in 1890, quarters for the quarantine officer, and two wharves for the discharge of ballast were built at the lower end of Long Island.

"The unlawful deposition of ballast at the new quarantine station threatening the stability of the navigable channel, after some correspondence, I suggested to the Mayor of Savannah on Oct. 16, 1892, that he request an official establishment of the harbor lines at that locality. The line was officially established January 13, 1893, and a tracing showing that line was sent to the Mayor of Savannah February 6, 1893. Since that date a fumigating building, a small building for sailors quarters, engine sheds, tramways, etc., have been built outside of the established bulkhead line, and an enormous quantity of ballast unlawfully deposited there. Those violations of Section 7 of the River and Harbor Act of 1890 were repeatedly reported to the U. S. District Attorney, as required by law, but, so far as know, no action was taken by him in the premises.

"The necessity for removing the projecting point of land at the new quarantine station was given in my letter to the Chief of Engineers dated Feb'y 25, 1896.

O. M. CARTER,
Capt., Corps of Enrs., U. S. A."

(1 Blue print herewith.)"

If there is a blue print that can be introduced further, I will obtain it if it is in the office.

1394 I offer in evidence and read:

“War Department,
“Washington, D. C., April 4, 1896.

“Sir:

“Referring to previous correspondence on the subject and replying to your letter of the 21st ultimo, with statement as to the structures and other obstructions that extend beyond the harbor line established January 19th, 1893, for which the City of Savannah admits responsibility, and is willing to undertake the removal of, I beg to say that the Department must require a literal compliance by the City of Savannah with the request contained in my letter of 9th ultimo, to-wit:

“That the City of Savannah remove at once all structures erected and all material deposited by or under its authority beyond the harbor line established January 19, 1893.’

“Very respectfully,

“DANIEL S. LAMONT,
“Secretary of War.”

“Hon. Herman Myers,
“Mayor of Savannah,
“Savannah, Ga.”

“1st indorsement

“Office Chief of Engineers,
U. S. Army, April 7, 1896.

“Copy respectfully furnished Capt. O. M. Carter, Corps of Engineers, for his information.

“By command of Brig. Gen. Craighill:

“A. MACKENZIE,
“Lieut. Col., Corps of Engineers.”

May it please the Court, I have reached the limit of my proper preparation of this case. I gave to the case all the hours of yesterday afternoon and last night, but was able to go only so far as the documentary evidence went which 1395 I have submitted. I have had numerous witnesses subpoenaed, but have had no opportunity to speak to them, to find out what will be their testimony, and I am unwilling to produce witnesses any further whom I have not had an opportunity to confer with, and I ask the Court to grant me an adjournment until 11.00 o'clock tomorrow morning.

The Court: If there are no objections, the Court stands adjourned until 11:00 o'clock a. m. tomorrow morning.

(Court adjourned at 1.15 p. m.)

THOMAS F. BARR,
Col. & Asst. Judge Adv. Gen'l, Judge Advocate.

1396

UNITED STATES COURT ROOM,

Savannah, Georgia, February 12, 1898.

The Court met pursuant to adjournment at 11 o'clock, A. M.

Present:

All the members of the Court and the Judge-Advocate.
The accused, his counsel, and the reporter, G. T. Cann,
were also present.

* * * * *

1478 ARTHUR S. COOPER, recalled as a witness for the prosecution, being previously duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate:

Q. Where were you employed Mr. Cooper, in April and May, 1896?

A. I was acting as engineer on the harbor, in charge of dredging and also in charge of placing some rock.

Q. Do you know where that part was where quarantine rock was being placed?

A. It was being placed on several dams, mainly on the Cockspur Island training wall.

Q. Was any record kept of the amount of stone that they placed there from the quarantine?

A. Yes, sir, a record was kept by the inspector.

Q. Have you anything to show what that record is?

A. I have his field notes and also the reports made by him.

Q. Have you them with you?

A. I have most of them with me.

Q. How many loads does that show to have been taken
1479 from the quarantine station? Never mind that just
now;—how many cubic yards of rock were placed on that
work during those two months, April and May?

A. April and May?

Q. Yes.

A. Six thousand, seven hundred and forty seven, decimal 96, cubic yards, placed in April and May, 1896.

Q. How many barge loads would that make?

A. That was fifty six barge loads.

Q. Was that of Florida rock?

A. There was no Florida rock being delivered at that time, the Florida rock stopped in August, 1895.

Q. How much of that was ballast, Mr. Cooper?

A. Well, I think it was all ballast; there was no other source of supply at that time. I think it must have all been quarantine rock.

Q. Do the records show the arrival of the barges from any place except the quarantine station?

A. Mr. Daniels' field notes have no memorandum of any of those lighters, except one, and of that one he states it was obtained from Smith & Kelly.

Q. One barge load?

A. One barge load.

1480 Q. Received fifty-five of them, from where?

A. From some other source, probably, quarantine.

Q. Why probably?

A. Because I don't know any other source they were getting rock from at that time, except quarantine and Smith & Kelly.

Q. At that time, did you see them get rock from quarantine?

A. I was down the river usually three times a week at that time, inspecting dredge work, and repeatedly saw them loading lighters at quarantine.

Q. Whose lighters were they?

A. The Atlantic Contracting Company's.

Q. Mr. Cooper, I hand you a blue print, that is in evidence here,—will you point out where the dividing line between Cockspur Island and Long Island is?

A. It is right at this point, just a little ways between lower quarantine station—

Q. There? (Indicating)

A. Yes, sir.

Q. That point there?

A. Yes, sir.

Q. Coming in which way?

A. Going straight back, nearly from the front of the river.

This portion here is Long Island, and this portion here, is Cockspur Island; but on the ground a person can hardly see the line. There was formerly a passage where boats could go through, that is now choked up so boats cannot pass.

Q. It is about through there?

A. Yes, sir.

Q. About from a point opposite the "T" in Capt. Carter's name,?

A. I judge so, or possibly, beyond his name entirely, to the east.

Q. From that point a little to the east?

A. About that way.

1481 Q. Down there, down through there, just past his name?

A. Yes, sir.

Q. I am going to interrogate you in regard to this indorsement, the indorsement of January 10, 1893, "The proposed harbor line, in the vicinity of the quarantine station, near fort Pulaski, is shown on the accompanying drawing by the heavy red line. It is probable, however, that in the further improvement of the harbor, it may be necessary to make a cut between Cockspur Island and Long Island"—that is the line you indicated there?

A. Yes, sir.

Q. "For the purpose of throwing a greater volume of water across Tybee Knoll, on the ebb-tide, in which case a location, shown by the broken red line," that you have there, "Would be more desirable." "For that reason I am of the opinion that for the present there should be adopted provisionally a harbor line as indicated by the broken red line previously mentioned, and that no structures should be allowed to project beyond that line." Signed by Capt. Carter. Explain what that cut was or was to be?

A. I think that was a suggestion made by Mr. Gieseler, and incorporated in Capt. Carter's report, with a view to securing a flow of the water into south channel over the Tybee Knoll; Tybee Knoll being a place that usually shows up, he expected to secure a better flow over there, by drawing the south channel water and making a cut right through here, parallel to the training wall, and make it wide enough to get a considerable flow over the Knoll.

Q. What affect would that have had upon the quarantine station, and the quarantine station upon that?

A. That of course, would have depended upon the final decision as to where that should have been located. It 1482 most likely would have had to be very close to the quarantine station. In that case it would have put the quarantine station on the point of the island instead of in the centre of it, on the lower point with the water on both sides.

Q. What difference would that have made, the execution of that plan, whether the harbor line was that indicated by the straight line, or that indicated by the broken line?

A. If there was any choice between the two, I should have thought the heavier line would have been better.

Q. Is there any connection?

A. That is, you mean, if the cut was made through?

Q. Yes.

A. Well, I don't know there would be.

Q. Between the two lines?

A. I don't see that it would affect the question one way or the other; I don't see why it should affect it.

Q. What has the cut to do with the harbor line at all?

A. I don't know that it has anything to do with it.

Q. You think it would have any effect upon it whatever?

A. No, sir, not that I see.

Q. Point out on that map the place where channel, A, B, C was.

A. I can in a general way; I cannot very accurately. The channel follows in this manner, and A, B, C was going down this way, as shown on the chart; the old channel goes down to the red light, the old channel having very many turns to it, and the new channel going straighter. The channel, marked A, B, C, on the drawing introduced yesterday, the A point was about here (Indicating) B point about here, in this position (Indicating) and the C point here, joining the old channel; then my pencil follows the old channel in this direction.

Q. What is the relation between that channel and the channel proposed through Cockspur Island?

A. The cut through Cockspur Island?

1483 Q. Yes.

A. No direct relation.

Q. None at all?

A. No.

Q. What was the reason for the harbor line?

A. Do you mean this harbor line at the quarantine station?

Q. Yes.

A. I could not answer that, Colonel, I don't know.

Q. How much channel is there there in front of that point?

A. Do you mean how far the quarantine station is from the channel? The quarantine channel itself is right next to the wharf, and the shipping channel is probably one thousand feet from the wharf.

Q. How wide is the river at that point?

A. Well, about 2,000 feet or a little more; I guess it is a little more than that.

Q. What is the opposite island?

A. This island straight across is not named, it is known as "Red Light."

Q. Is there a Jones Island there?

A. Jones Island is further up the river.

Q. Was there an engineering necessity to cut off that point, to make a channel in 1896?

A. If it was contemplated to put that channel there, A, B, C, I think it would have been advisable to cut that off.

Q. How about the natural channel on the opposite side?

A. If the natural channel is followed, the one that is used at the present time, there will be no necessity to cut it off.

Q. Is not it usual to follow the natural channel, if it can be done?

A. Well, sometimes there are reasons why the channel should be changed, and as has been changed on this harbor.

1484 Q. Was there any dredging done in the channel, A, B, C?

A. No, sir, there was no dredging done there.

Q. Not in December, 1893?

A. No, sir.

Q. Was there dredging in the natural channel in December, 1895?

A. Yes, sir.

Q. Was there dredging in April, 1896?

A. I think there was.

Q. There is the course of the natural channel? (Indicating)

A. Yes, sir.

Q. Here, I understood you? (Indicating)

A. A is about here.

Q. B?

A. Is about here.

Q. And C?

A. Right here, (Indicating)

Q. That would have been a change of the natural channel?

A. An entire change.

Q. And in April 1896, they were dredging over there? (Indicating)

A. Yes, sir, and also here, Colonel, in April. (Indicating)

Q. And in April also over near the other shore?

A. Yes, sir.

Q. And in April and May, 1896?

A. In April, 1896, the shoal next to Red Light, was dredged.

Q. That is in the natural channel, disregarding A, B and C?

A. Disregarding A, B and C.

Q. I would like to know where Tybee Knoll is.

A. Tybee Knoll begins about here (Indicating) and extends about a mile in that direction (Indicating) this channel here (Indicating) is known as Tybee Knoll channel.

Mr. Blair: I would like to have the witness again point out the line of the natural channel.

Witness: That is the natural channel (Indicating)

1485 Mr. Blair: That is the natural channel?

Witness: Yes.

Mr. Blair: All right.

Judge-Advocate: Who made that chart?

A. That is a progress sheet, showing the dredging on Savannah Harbor, as made by me at the end of each month, to show exactly where every cut was made on the harbor, and the date on which it was made.

Q. What is the scale?

A. Four hundred feet to the inch.

Judge-Advocate: I offer this in evidence; it is entitled, "Progress of Dredging Contract of 1892, Scale, one inch to 400 feet." It will accompany the record, marked Exhibit 268.

Here at 2.55 o'clock, P. M., the Court adjourned until Monday morning, February 14th, at 11 o'clock.

THOMAS F. BARR

Col. & Asst. Judge Adv. Genl Judge Advocate.

1486

UNITED STATES COURT ROOM,
Savannah, Georgia, February 14th, 1898.

Court met pursuant to its adjournment of Saturday, the 12th instant, at 11.00 o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.
The accused, his Counsel, and the Reporter, W. O. Tarver, were also present.

The President: Court will come to order.

Mr. Blair: My it please the Court, on Saturday I made a remark about the Court not being bound by the rules of evidence, and exception was taken to that remark by some of the members of the Court. The record, at page 335, shows that, in the examination of the witness Cooper, the Court asked a number of questions, and then the Judge-Advocate asked a question comparing the specifications of one contract with the specifications of another, to which Mr. Charlton objected, on the ground that the specifications were the best evidence themselves and that it was not fair to attempt to get that from the memory of the witness. Then the President of the Court said: "the Court is not now strictly bound by the rules of evidence, and the witness may answer the question. The Court adopts the question." Now, the explanation is somewhat personal to myself. I carried in my mind the statement made by the President of the Court that the Court was not bound by the rules of evidence as applying generally to any question which might be asked by the Judge-Advocate or by Counsel for the accused, and I see now, however, that the President meant to apply that rule, or that statement, to questions asked by the Court, because, the concluding portion of the President's remarks is that "The Court adopts the question, showing that the President had in mind that the Court itself, in asking the question, was not bound by the rules of evidence. I will say this: that other

Counsel besides myself, carrying the recollection of 1487 that statement by the Court, had the same idea that I had, and that we have refrained from making objections because we presumed that was meant to apply generally to all questions.

The Court: The Court is sorry that this erroneous impression should have prevailed for this length of time. What the Court intended to convey was this: that questions asked by the Court cannot be objected to upon the rules of evidence. The Court can ask any question which it sees fit, to elucidate

the case. If Counsel will recollect, this witness had passed through the direct examination, the cross-examination and the re-direct examination, and had been turned over to the Court, and, after the Court had asked a few questions, Counsel wished to ask a few questions, which were adopted by the Court, and could not be objected to on the grounds of rules of evidence.

ARTHUR S. COOPER, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. When your examination closed Saturday, I had before you rather an unsatisfactory blue print. I have here now what is known in this case as Exhibit No. 264, a Map of the Oyster Bed Shoal, Savannah Harbor, Ga., 1896. I will ask you to take that, and point out the line of the projected channel of A—B—C.

A. A B C is the channel beginning with the lower end of Long Island, crossing at point A and extending down to in front of Fort Pulaski where it is marked B, and then joining Long Island range at point C, and the old channel flows back in this (indicating) direction.

Q. That, then, (indicating) is the natural channel there?

A. Yes, sir.

Q. And A B C starts there and follows that red line; 1488 how many turns does that A B C channel make?

A. Three turns.

Q. Did you make an estimate of the cost of excavation attendant upon that project?

A. I made an original estimate in February, 1896, at Capt. Carter's request, of the number of yards it would take to dredge channel A B C only 100 feet wide, and, as I remember, that estimate was one hundred and fifty thousand cubic yards.

Q. What would that have cost?

A. At 16¢ a yard, that would be \$24,000, but estimating that the Government would have to cut off and remove these quarantine wharves,—cut off and set them back,—it would probably add about \$15,000 for removing and replacing these

wharves, and about \$9,600.00 dredging besides. That would make the total estimate for the channel \$48,600.

Q. And what was expended for dredging in the natural channel that was about opposite this point?

A. This other on range No. 5 and also on Elba Island range,—there was done after that date on that channel 130,000 yards of dredging.

Q. (By the Court) What was that added \$15,000 for?

A. For taking up and moving back the quarantine wharves.

Q. (Judge-Advocate continuing) That would have been necessitated by the adoption of the line A B C?

A. Yes, sir.

Q. How much more would it have cost to have excavated there and set back these wharves and done the necessary dredging than was expended in April and May on the main channel?

A. It would be about these two items, the removal of the docks and the extra dredging; a little more than that, however, because this was 150,000 yards, whereas there was actually dredged after that 130,000 yards out of the old channel.

Q. What advantage was to be derived from the adoption of the A B C channel.

1489 A. That channel is a much better channel than the old one. The turns are not so abrupt.

Q. Couldn't any turns whatever have been avoided?

A. You could have avoided two turns. You could have avoided the turn at A and the turn at C by producing range No. 4 at Long Island crossing until it met the line of the Long Island range back here; (indicating) then you would have had only one turn at point corresponding to B.

Q. How much more expensive would that be?

A. Considerably more expensive. I have made two estimates on this channel, one for 250 feet in width. The estimate I gave you was for 100 feet in width.

Q: What was the width of the natural channel?

A. 250 feet.

Q. What is your estimate?

A. My estimate of this straight channel I have just described is \$125,000.00 at 250 feet in width, and the channel A B C, 250 feet in width, including the removal of the quarantine wharves and placing them back where they would be

out of the way of the channel would be \$96,000.00; that is, both channels 250 feet.

Q. What advantage would the adoption of that central line have been for the Government, as to the future?

A. It would be a much straighter channel, and consequently the flow would be more apt to maintain itself than it would in this other channel. There had always been trouble at this point on account of these sharp turns.

Q. Liable to shoal up?

A. Yes, sir; liable to shoal up. Shoaling has taken place there frequently, and this straight channel would be more apt to maintain itself.

Q. It has been stated here that the establishment of the quarantine at this point, that is, the upper quarantine, threatened the channel; what is meant by that statement that has been made?

1490 A. There is something in that. These wharves project out into,—not into the channel exactly, but they are so built that they project into the strong flow on that shore, that being what they call the ebb tide bight of the river, and these ballast piles projecting out here, did obstruct the flow more or less.

Cross-Examination by Mr. Blair.

Q. You have given your opinion here as an expert on various engineering questions. I wish you would state what your experience as an engineer has been? Where were you graduated?

A. I graduated at the University of Wisconsin in 1881, after a four years course in the engineering department of the University of Wisconsin.

Q. A four years engineering course?

A. Yes, sir.

Q. Then what was your first service?

A. My first service was with the American Bridge Co., Chicago.

Q. Doing what?

A. Working up the details of construction of bridge work in the office. I will state that I had made a specialty of bridge work while at college, and intended to go into that branch of the business, and was employed by the Bridge Co., but the Company failed about that time, and the Chief Engineer of the

Mexican National Railroad came to Chicago about that time, and I went with him to Mexico.

Q. What did you do in Mexico?

A. I was working on different plans of construction work in the office,—in the office of the Chief Engineer.

Q. Railroad engineering?

A. Railroad engineering.

Q. How long did you stay there?

A. About six months.

Q. That brings you to 1882, does it?

1491 A. Yes, sir.

Q. Where did you go in 1882?

A. I was then employed with the Cleveland Bridge & Power Works for awhile at Cleveland, Ohio.

Q. What sort of work.

A. The same work I had in Chicago,—bridge work; details of construction of bridge building.

Q. How long did you stay there?

A. Only a few months, and then I was employed down to the Nickel Plate Road from Blockton to Buffalo, New York State.

Q. Railroad building?

A. Railroad building.

Q. Where did you go then?

A. From there I went to the Department of the Missouri, under the Chief Engineer of the Department of the Missouri.

Q. What sort of work there?

A. Topographical work,—on surveys and maps,—locating military reservations and work of that nature.

Q. What year did you leave there?

A. 1884.

Q. And came down here?

A. Came here.

Q. Then your experience in hydraulic engineering is limited to Savannah Harbor and Cumberland Sound, is it not?

A. No, sir; it is not.

Q. In what particular has it expanded from that?

A. I have had about six months experience on harbor construction at Segua, Cuba. Then after that I served as City Engineer of Superior.

Q. Wisconsin?

A. Wisconsin. As City Engineer, I had charge of \$750,000.00 worth of work,—sewer work and also considerable har-

bor work,—about \$150,000.00 worth of docking and dredging.

Q. Any tide there?

1492 A. No, sir; it was on the Lake.

Q. No running water?

A. Yes, sir; river emptying into the Bay.

Q. Was this on the river front?

A. Partly on the River front and partly on the bay.

Q. What other engineering experience?

A. Getting up sewer plans for West Duluth.

Q. What other hydraulic plans?

A. I think that was all.

Q. Then, with the exception of your work at Superior and your six months work in Cuba, your experience as an engineer in hydraulic engineering is limited to the harbor here and at Cumberland Sound?

A. In this district?

Q. Yes, in this district?

A. Yes, sir; in this district.

Q. Now, what engineering work have you done here in this engineering district?

A. It would take considerable time to tell that; I have had charge of a great many pieces of work. I can give you the main part of it briefly. I have had charge of the construction of the main part of the jetties in Savannah Harbor; that is the principal item.

Q. That is the work of an Inspector?

A. No; as an engineer.

Q. What engineering features did you have under your charge?

A. The construction of the jetties.

Q. Located by Capt. Carter?

A. No, sir; that is, he gave me the plan for the location, but I located the jetties myself.

Q. And the unskilled labor of the contractors' put the mats down,—that is true?

A. Yes, sir.

1493 Q. You didn't locate the jetties as an engineer, did you?

A. I located them on the ground, but not on the plan.

Q. You took the plan drawn by Capt. Carter, or under his instructions, and you followed that plan?

A. I followed that plan.

Q. What engineering skill did that involve,—or engineering discretion?

A. It involved considerable on account of the difficulties of construction. It is very easy to put on paper the location of a dam, but it is another thing to go and build it.

Q. What did you do as an engineer?

A. It requires a good deal of discretion, in many cases; a man may over-load his mats, and tip them over, or he may under-load them and storms tear them to pieces. It requires great experience and judgment to construct these jetties so that they will stay there.

Q. You were told to sink the mats and put the stone on them?

A. Yes, sir.

Q. And your engineering judgment came in just how?

A. Just as I told you.

Q. Pointing out the place to sink the mat?

A. No, sir; in the operation of sinking them, and using the proper amount of stone upon them, and seeing that they were not left in such condition that they would be destroyed, and matters of that kind.

Q. The mats were not built under your direction, were they?

A. No, sir.

Q. You simply inspected the mats?

A. Yes, sir.

Q. And inspected the stone?

A. Yes, sir.

Q. And you say you pointed out the places where the mats were to be sunk?

A. Yes, sir; located them instrumentally.

1494 Q. Did you actually do the work,—the instrumental work,—in locating them?

A. In a great many cases.

Q. What did you do that with?

A. The transit.

Q. That is the business of a surveyor, is it not?

A. Surveyor and engineer.

Q. It comes under the general head of surveying?

A. No, sir; I don't think so.

Q. What does it come under?

A. Under the general head of engineering.

Q. Then in addition to locating the places where the mats were to go, instrumentally, and, in addition to indicating to

the contractors where the mats were to go, and in addition to determining the amounts of stone that went upon the mats, what else did you do from an engineering standpoint?

A. It is simply a matter of judgment as to which dam should be built first, and, in order to facilitate the work, you would have to be working a good many times in different places at once, and, if one part of the work was pushed ahead of another, it might damage that other.

Q. And to whom were the questions referred as to whether one jetty should be pushed and the other stopped?

A. I have always consulted with Capt. Carter on that subject.

Q. You consulted with Capt. Carter, did you?

A. Yes, sir.

Q. And the result of the consultation was that you did thus and so?

A. Yes, sir.

Q. Went on with the work?

A. Yes, sir.

Q. Now, what else did you do?

A. I think Capt. Carter mainly relied on my judgment on that. I would talk the matter over with him, and say 1495 what I thought ought to be done, and he would say go ahead and do it.

Q. What else did you do as an engineer in this district?

A. I have had charge of a great many surveys in Savannah Harbor, and had charge of surveys on the Atlamaha, Oconee and Ocmulgee, and had charge of the construction work at Darien.

Q. You gathered your data from the instruments which you used,—by means of the instruments?

A. Yes, sir.

Q. In all this surveying work?

A. Yes, sir.

Q. You committed this data to paper, and they were turned into the office here?

A. Yes, sir.

Q. What other engineering work have you done?

A. As I said, I had charge of the construction work at Darien.

Q. The same sort of construction you have described?

A. The same as at Savannah Harbor?

Q. Putting the mats where indicated?

A. Yes, sir; then as I had charge of the Harbor work at Fernandina for one season.

Q. Leaving out your Cuban experience and your Superior experience, what plan did you ever originate, as an engineer, with reference to the improvements in this engineering district?

A. I have had a good deal to say in regard to planning the Savannah Harbor work in talking the matter over with Mr. Geissler. We would consult as to the advisability of different parts of the work, and my judgment was very often taken in preference to that of Mr. Geissler.

Q. What original conception ever came to you with reference to the plan of engineering work in this district?

A. I was not in charge of Savannah Harbor. I was only in charge under Capt. Carter. It was not my place to draw up the plan, and I was not asked to draw up the plan.

1496 Q. And in fact you never did?

A. Never did; never did claim any credit for planning the work in Savannah Harbor.

Q. Nor of Cumberland Sound?

A. No, sir; never did. I was simply executing the plans given to me to execute.

Q. Did you see every mat that was sunk at Cumberland Sound or Savannah Harbor?

A. Which contract do you refer to?

Q. All of them?

A. No; I didn't see all of them; but on this Savannah Harbor contract,—that big contract,—I think I saw at least nine-tenths of them.

Q. You were an inspector then, were you not?

A. No, sir; I was assistant engineer. I never served as Inspector on Savannah Harbor but one year,—the first year I came here.

Q. Now, when you saw nine-tenths sunk under the big contract, there was an Inspector under you?

A. Usually four Inspectors.

Q. And did the inspector have anything to say about where the mats should go?

A. No, sir.

Q. You did that?

A. I did that.

Q. And the other tenth that you didn't see sunk, who located those.

A. Those I didn't see go in, I told them where to put

them in all cases; there was no mat sunk without my direction.

Q. Have you been a student of engineering while you were at work in this district?

A. I keep up with all engineering subjects; I take seven or eight engineering publications, and read them all.

Q. You are familiar with the co-temporary literature of engineering?

A. I am.

1497 Q. Particularly hydraulic engineering?

A. As pertains to harbor work; I would not pretend to be an expert on the construction of water-works or anything of that kind, for I have had no experience in that; all my knowledge of that is theoretical.

Q. You think you are an expert on harbor work?

A. I think I am reasonably so. I do not pretend to stand at the head of the profession.

Q. Did you happen to carry in your mind the formula for the flow of water in an open channel?

A. No, sir.

Q. That is a fundamental proposition in harbor work, is it not?

A. It is not necessary to remember these things; we always have books of reference that we can refer to.

Q. Upon what does the velocity of a stream depend?

A. It depends upon the slope and also the size of the stream and very largely the depth. If it is a shallow stream, there would be more friction on the bottom and sides.

Q. Does it depend directly upon the head?

A. Well, the head and the slope would come together.

Q. The head and the slope are the same thing?

A. No; not exactly.

Q. In what do they differ?

A. The slope is the inclination of the river as between two points, and that slope may vary between any two; say, for instance, a slope may vary in that distance if it is a very small stream.

Q. What is the head?

A. Head,—you could hardly apply that to open water. The head would be applied to confined bodies of water.

Q. Then in harbor and river work, you don't speak of the head of the water?

A. No, sir.

Q. You speak merely of the slope?

1498 A. The slope.

Q. Now, then, does the velocity vary directly with the slope?

A. No, not entirely. It depends somewhat upon the size of the stream and the depth of the stream, on account, as I said before, the friction on the bottom.

A. Does any other element enter into it?

A. Nothing but the slope and the size of the stream and the friction on the bottom.

Q. In general, what causes water to flow?

A. The fact that one place is lower than another, or that may be produced by tidal phenomena; it may be, the rise of the tide may make it lower or higher in one place, and flow from that place to the other, or it maybe in one place the simple flow of the natural stream.

Q. It is gravity, is it not?

A. Gravity; yes, sir.

Q. Is the flow,—the velocity,—a direct function of the gravity?

A. No, sir; it would be if there was no friction on the sides of the river.

Q. And the only other element you take into consideration is the friction?

A. That is all.

Q. With that exception then, the velocity varies directly with the slope or the gravity?

A. I think it would; not directly,—there is constant quantities going in there. You would have to apply the formula. If it is twice as steep, there would be more than twice the velocity; it is not a direct ratio.

Q. What kind of a ratio is it?

A. It is a formula, and would have to be worked out by the formula.

Q. Does it vary indirectly?

A. As I said before, you must work it out by the formula.

You can not multiply that by two or three or any direct ratio; you have to apply the formula in all that work.

Q. That is a simple formula, is it not?

A. Yes, sir; a very simple formula.

Q. But you don't remember it?

A. I don't remember it.

Q. Did you ever hear of a formula V equal to C into the square root of $R S$?

- A. Yes, sir.
- Q. What is that formula?
- A. What is that formula again?
- Q. V equal C into the square root of R S?
- A. What does S signify in that?
- Q. I am asking you if you ever heard of that formula?
- A. Yes, sir; it applies to hydraulics, but I don't remember just now what S stands for; that would be given in the explanation of the formula when you refer to the text books.
- Q. Is not that a fundamental formula in hydraulics?
- A. That is used in hydraulics.
- Q. Is it not a foundation formula?
- A. You have got to bring in other matters there.
- Q. In the hydraulic formula V equal C into the square root of R S, what would you say V means?
- A. Velocity.
- Q. What does C mean?
- A. Some constant quantity.
- Q. Some constant coefficient?
- A. Yes, sir.
- Q. What is R?
- A. R probably stands for the perimeter.
- Q. For the perimeter?
- A. Yes, sir, or the depth.
- Q. Which?
- A. Both.
- 1500 Q. R would be both the depth and the perimeter?
- A. In some cases it would be the depth.
- Q. And what would S be?
- A. That I don't know.
- Q. And yet you say the velocity of a stream depends largely, if not exclusively, upon the slope, and, in this formula, you don't know what S means?
- A. You misunderstand me. I didn't say that. I said it depended upon the slope and also the size of the stream,—that is, the friction on the sides.
- Q. What would S be, the friction or the slope, in a hydraulic formula in which V represents the velocity of the water?
- A. Most likely S represents friction.
- Q. Then you would have your velocity dependent upon the constant co-efficient C into the square root of the perimeter multiplied by friction?
- A. Yes, sir.

Q. And you say that as an engineering expert?

A. As I told you before, I don't remember these formulas. If I was going to apply them I would look them up, and see what the explanation was where the formula is given. You always find them in books of reference, and engineers are not expected to remember all the formulas which they may use. I have used the formula for getting the velocity of the stream on the Oconee, the Ocmulgee and the Altamaha, and there is another quantity in that formula that you didn't give, —N.

Q. What would N mean?

A. I don't remember now; something about when you apply the pole float,—the distance from the float to the bottom of the stream has to come into the question in all matters of that kind, but an engineer cannot remember all of these things. If he wants to use them, he looks them up. You don't remember all of your legal references; you don't keep them in your mind.

1501 Q. I keep a few of them; the fundamental ones I think I remember.

A. You know where to look for them if you want them; you know where to find them.

Q. Oh, yes, I know the two different kinds of knowledge. Now, let us come back to R again, and find out what that is; you say it is the perimeter or the depth, did you say that?

A. I say I don't remember exactly all these matters. I know in working out the flow of a stream, you take into question the slope and the perimeter; that is, the distance from the point where the water strikes the shore on one side to the point where it strikes the shore on the other side; that whole area has to be taken into question.

Q. Is that the perimeter, that whole area?

A. Not the whole area, but the whole distance.

Q. Which distance,—on the surface of the water?

A. No, sir; not on the surface,—the bottom of the stream.

Q. Then that is the perimeter?

A. As I remember it, I think that is the perimeter. I would have to look up these matters; I didn't expect to have to pass a civil service examination when I came in here. If you want me to pass on these questions I would have to look them up.

Q. I want to find out how much of an expert you are. I want to know what the perimeter is?

A. That is my understanding of it.

Q. It is the distance measured along the bottom, is it?

A. Yes, sir.

Q. R represents that in the formula I have given you?

A. That is my recollection; I may be wrong.

Q. R usually stands for radius?

A. Yes, sir.

Q. But in this formula, it stands for perimeter?

A. Yes, sir; that is my recollection.

Q. Did you ever hear of such a thing as the mean hydraulic depth?

1502 A. Yes, sir.

Q. What is it?

A. The mean hydraulic depth is the mean of all the depths across the river or the stream to which you wish to apply the formula.

Q. And R/ would probably stand for that in the formula?

A. It might in some cases, yes, sir. It just depends upon what value has been placed upon R. R is used in a great many ways. It usually means the radius of a circle, but in other matters, it might mean something else. It means just whatever you wish to apply it to.

Q. But in the formula of velocity in an open stream?

A. It might mean the hydraulic radius.

Q. And not the perimeter?

A. Yes, sir.

Q. And S might mean or be the sign of the slope, might it not?

A. It might.

Q. The natural sign of the slope?

A. It might.

Q. Then you would have your velocity varying as the square root of the hydraulic radius multiplied into the sign of the slope, would you not?

A. Yes, sir.

Q. And that formula you say you don't carry in your memory, but you will find it in the books?

A. Find it in the books.

Q. As a hydraulic engineer, you would go to the books to find it?

A. Yes, sir.

Q. How wide is the present channel opposite the quarantine now?

A. 250 feet where the dredging has taken place, and where the natural channel is it may be wider.

Q. Is it wider?

A. It is wider in some places.

Q. How much wider?

1503 A. In some places there is a depth of twenty-six feet of water as wide as one thousand feet.

Q. In your estimate of 150,000 square yards necessary to make a straight channel across the Oyster Bed, did you estimate that material in place or on the scow?

A. You misunderstood the estimate; that 150,000 square yard estimate was on channel A B C.

Q. Well, on channel A B C, did you estimate that in place or on the scow?

A. All these estimates were in place. I will state, however, that these estimates are very rough, and might vary ten or fifteen per cent either way, more or less.

Q. What is the difference you make in your estimate in place and on the scow?

A. About ten per cent probably.

Q. Which would be the greater?

A. The estimate in the scow would probably exceed the estimate in place by about ten per cent.

Q. Was any dredging ever done on A B C range?

A. Not to my knowledge; not since I have been in the harbor.

Q. You are sure about that, are you?

A. I am positive; yes, sir.

Q. How wide would the channel have to be along the A B C range to be as wide as the present channel?

A. 250 feet.

Q. Between what points?

A. Between A and C.

Q. Between what curves?

A. What depth, you mean?

Q. Yes?

A. It would have to be about twenty feet deep, and I estimate my dredging to twenty-one feet, in order to secure twenty.

Q. And two hundred and fifty feet wide?

1504 A. Yes, sir.

Q. How wide is it between the twelve foot curves and the present channel?

A. I don't know; I would have to scale it on the map.

Q. Would you say it is five hundred or a thousand feet?

A. Let me see the tracing.

Q. From your memory, what do you say?

A. I don't remember where all the curves are in Savannah Harbor; there are too many of them.

Q. You ought to be pretty familiar with them; you have done a great deal of engineering work here?

A. I am probably more familiar with it than you are.

Q. I want the depth of the present channel between the twelve foot curves?

A. At what point?

Q. Say here (indicating, that is nearly opposite B?

A. About one thousand feet.

Q. You say that there was some talk about cutting through Cockspur Island, and making a new channel, or making a cut through Cockspur Island so as to come in where?

A. The cut would probably—It never was located, but, as I understood the project, it was about in this (indicating) direction, coming in nearly parallel with this.

Q. And for what purpose,—for what engineering purpose?

A. It was for the—This project, by the way, it was stated in the original statement that it might be necessary, but it wasn't stated that it would be done. That cut,—it was stated that it might be necessary. It was stated in one case that the flow on Tybee Knoll channel was not sufficient to maintain that channel, and it might be necessary to make this cut through here, (indicating) in order to secure ebb tide flow sufficient to maintain the depth over Tybee Knoll channel.

Q. On what engineering principle would it be cut 1505 through Cockspur Island to join the proposed channel?

A. It would be cut so as to have the flow as nearly parallel with the flow in the other as possible, because it is a well known principle that, if two streams come together at a sharp angle, it will produce eddies and fill up, and the nearer parallel you have them meet, the better,—the same as it is in sewer construction; you must have the intersection as nearly parallel as you can.

Q. Then that project, you say, was abandoned?

A. Yes, sir; it was found that it was not necessary, because sufficient flow was secured to maintain this depth across Tybee Knoll channel.

Q. Where was the original channel when you came here between Cockspur Island and Oyster bed training walls?

A. (Indicating) This channel here.

Q. That was the original channel when you came here?

A. Yes, sir; some smaller boats came up this (indicating) way, but any vessels of any draught came up this (indicating) way. At that time, in 1884, there was no channel around this (indicating) way.

Q. And that (indicating) was the channel, was it not?

A. No, sir; both of these channels; just as many came this (indicating) way as that (indicating) and possibly more.

Q. What is this Island named?

A. Oyster Bed shoal.

Q. The Island on which the red light is?

A. The red light. The main body of the shipping took this channel (indicating) here.

Q. In 1884?

A. In 1884.

Q. When was Dam No. 31 built?

A. In 1885.

Q. What for?

1506 A. For the purpose of stopping this (indicating on map) channel, and making the water flow down this way, and instead of having the water flow on both sides of this Oyster Bed shoal, it would flow on this side.

Q. With what point does Dam No. 31 connect?

A. When Dam No. 31 was built, it connected with only one point; the middle of it was out in the center of the stream, and the other end was on Oyster Bed shoal; it was built up to about three or five feet above low water.

Q. And was any extension made?

A. An extension was made in the 1896 contract.

Q. In a north-westerly direction?

A. The direction was very nearly the same; it turned twenty-five or thirty degrees, and went across to Turtle Island.

Q. Thereby closing that channel?

A. Not entirely,—twenty-five or thirty feet left in it.

Q. The effect of Dam No. 31 was to give you an increased flow on the present channel?

A. The effect of the extension?

Q. The whole structure?

A. I don't think the extension had any effect on that channel. The original structure did. It was expected that the extension would have an effect on it, but it did not as a matter of fact.

Q. Going back to the A B C range, in order to make that channel as practicable and as safe as the present channel, what yardage would it be necessary to remove?

A. Making it 250 feet wide, just the width of the channels dredged in Savannah harbor, it would be 440,000 yards, roughly.

Q. Now, in order to make it as practicable and as safe as the present shannel, what yardage would be necessary to dredge?

A. Four hundred and forty thousand.

Q. Making it uniformly two hundred and fifty feet wide?

A. Yes, sir.

Q. Although the present channel is, in places, considerably over one thousand feet?

A. No, not where it is dredged, it is not; wherever it is dredged, it is only two hundred and fifty feet.

Q. As a fact, as a physical fact, the present channel is, in places opposite the A B C range more than a thousand feet wide?

A. No, it is not.

Q. At no place?

A. That point I showed you was between a twelve foot curve. A twelve foot curve does not express the channel; it would take a twenty foot curve to express the channel.

Q. Is there no place between a twenty foot curve opposite the A B C range one thousand feet wide?

A. I don't think there is; let me see the chart, and I can tell you.

Q. (Handing witness chart) Now, looking at that tracing, how would you answer the question?

A. Well, may be pretty near it; somewhere near eight hundred or nien hundred feet in places.

Q. Then in making that dredging estimate, you didn't estimate the making of a channel as wide as the present channel?

A. Not as the natural part of the channel. I have made it as wide as the dredged part of the channel. In this estimate I made, I will state that, at the turning point, I estimated it considerably wifer than two hundred and fifty feet, —nearly four hundred feet, so as to give vessels a clear chance to turn; that is included in this estimate.

Q. And if you were going to dredge to make it as wide as the present chanel, that estimate would be very largely increased, would it not?

A. No; I would not change my estimate; I would estimate on the same basis to be dredged in all places in Savannah Harbor; I see no reason why one place should be dredged wider than another.

Q. I asked you the mere arithmetical question, if you 1508 were going to dredge it as wide as the present channel, your estimate would be greatly increased, would it not? In other words, twice two are four?

A. Possibly you would not dredge it in the same shape that natural channel is, because in some places it is wide and in some places it is narrow.

Q. I am putting a suppositional case. If you were going to make it as wide as the present channel, your yardage estimate would necessarily be increased, would it not?

A. As I say,—

Q. Can you answer that question Yes or No? If you were going to dredge the channel along the A B C range as wide as the present channel now is, would not your yardage estimate be greatly increased?

A. I would say yes, but I would qualify that by saying that it would not be a proper way to dredge it.

Q. I am not asking your opinion as to the propriety of doing it; I am asking you as to a physical fact?

A. That is true; but I simply put that explanation on the end of it.

Q. Opposite the red light on the present channel, as a matter of fact, how wide was it actually dredged?

A. That was dredged wider than 250 feet on account of it being right at the turn; exactly how wide, I do not know; I think probably 325 feet, possibly more.

Q. Nearer a thousand, was it not? Nearer 1,000 than 325?

A. No, sir.

Q. Was it as much as eight hundred?

A. I don't think it could possibly have been over 350.

Q. Was it dredged south of Black Buoy No. 11?

A. No, sir.

Q. Never since you have been here?

A. It was some years ago, but not in April, 1896.

1509 Q. I asked you at any time,—how wide was that channel opposite red light dredged?

A. At one time I think it was dredged somewhere near eight or nine hundred feet, but not down to the full depth; that was only to fifteen or sixteen feet.

Q. And how wide was it dredged to the full depth at that time?

A. That I do not know; I could not tell you.

Q. Now, as a matter of fact, nearly opposite the red light, the channel has a practicable depth for most vessels of about one thousand feet in width, has it not?

A. In most places. I think there is one place right opposite the Black buoy No. 11 where it is a little narrower than that,—probably not over four or five hundred feet.

Q. On A B C range, the water is shallow?

A. Quite shallow in some places.

Q. And you estimate contemplates dredging to the proper depth only on a 250 foot cross section?

A. 250 feet at the base; I figured the slope three to one on the sides.

Q. Three to one?

A. Yes, sir.

Q. In order to make that channel as practicable as the present channel in the vicinity of the red light, would you not have to dredge very much more than your estimate calls for?

A. Perhaps so; that is, if I had the depth on the sides the same as at the red light, it would be considerably more.

Q. Very considerably?

A. I say to have the depths of the side the same as at the red light channel, it would be considerably more dredging.

Q. You made surveys in the vicinity of the Oyster Bed training wall and the Cockspur Island training wall, and the Breakwater, the detached extension, didn't you?

A. Yes, sir; in October I made surveys of all these.

Q. And those maps are in evidence?

1510 A. Part of them are; the actual pattern of the surveys I think are not in evidence,—simply the compilation from the surveys.

Q. Who made the compilations?

A. They were made generally by myself and Mr. Grundel, the draftsman in the office.

Q. And your work is correct in all matters, is it?

A. There may be errors in it.

Q. Yes, your personal equations and other errors, but approximately your work is accurate and correctly done?

A. As near as I could; of course, there is no such thing as actual accuracy in that sort of work.

Q. But there is no intentional error?

A. No, sir; there is not.

Q. You personally made the surveys upon which those three charts are founded?

A. If you look at it in that light, I did not; I was in charge of the surveys.

Q. Made by your assistants and partly by yourself?

A. Yes, sir.

Q. Who worked under you?

A. The leadsman was Fred Jones, who is living on Tybee now.

Q. A fairly accurate man?

A. I found him a good leadsman.

Q. You used a lead, did you?

A. Yes, sir; done with lead.

Q. Not with a pole?

A. No, sir; the transitmen were Mr. Hale and Mr. Gignilliat.

Q. Good men at that work?

A. I think so.

Q. Then the data which you got yourself and through these assistants were turned into the office, were they?

A. Yes, sir.

Q. As far as you could check such matters, those data are accurate?

1511 A. Well, my notes were turned into the office, and Mr. Grundel did all the platting. I had nothing to do with that at all; and, after he had finished the platting on Ocyster Bed and Cockspur Island Walls, the crest of that being so narrow, the plat of this cross-section, in a good many instances, would skip that crest, and would not show it, and, in order to show that crest, I took a sextant, and, at low water, went on that wall and took different points, and located a point where I set up two angles with the sextant on the shore, and then sketched in between those points, to show the height of this crest; otherwise, the crest would have been much lower than it should have been, because the cross-sections might miss that, it being so narrow. This explanation I give was a matter of checking that data; that is the way I give it.

Q. Now, answer the question, please. I want to know if the data were correct as far as you could check it?

A. I believe it to be correct; as I said before, there may be errors in it.

Q. Correct in an engineering sense?

A. The survey might have been more extensive. I might have taken sections at closer intervals, but for the time I spent on it, I think it an accurate survey.

Q. Good work and fairly accurate?

A. Fairly accurate.

Q. And that is true with the data accumulated with respect to the Cockspur Island training wall and the Oyster Bed training wall and the detached extension?

A. I think so.

Q. Which survey did you make last?

A. The breakwater.

Q. That is the detached extension, it is called?

A. Yes, sir.

Q. And when did you make the Oyster Bed training wall survey?

1512 A. The Oyster Bed training wall survey I think was made on the 2nd day of October, 1897, and the Breakwater I think was made on the 7th day of October, 1897.

Q. And the Cockspur Island training wall?

A. The Cockspur Island and Oyster bed were made together. I made the inner half, I think on the 1st of October, or sometime in September.

Q. All that was made with a lead, was it?

A. Yes, sir; all made with the lead. I surveyed the two inner halves on one day and the two outer halves on another,—two days work.

Q. And you turned in your original bottom to the office?

A. Turned in the original notes; turned in the notes without reducing them even. The tide gauge was applied by Mr. Grundel, and the notes were reduced by Mr. Grundel; I had nothing to do with it.

Q. But you got the depth of the original bottom before you went in?

A. At that stage of the tide, but I didn't apply the tidal correction.

Q. That is true of all these charts?

A. Not all; sometimes the notes were reduced in the field, and turned in with the soundings corrected ready to plat.

Q. You got the data on all those three surveys?

A. Yes, sir.

Q. The three jetties, including the detached extension,—you got the data upon which the bottom was subsequently platted?

A. Yes, sir; I collected all the information, detail observations and all.

Q. Was that the original bottom? In every instance, is the original bottom shown?

Q. How do you mean? Do you mean the original bottom at the time my survey was made or at the time the jetty was built?

Q. I mean at the time the jetty was built?

A. At the time the jetty was built, the bottom was taken from my construction profiles.

1513 Q. On all three of the jetties?

A. No; the original bottom was taken from my construction profiles on Oyster Bed and Cockspur Island training walls, and on the Breakwater, it was taken from the survey I made Feb'y 3, 1896.

Q. And in that, you got the depth of the water, and it was subsequently corrected for the tide, is that right?

A. Yes, sir.

Q. You got the actual original bottom?

A. On Feb'y 3rd, the original bottom was taken, and then again when I made the survey of October 7, 1897; the original bottom was platted from those two surveys.

Q. When did you get the original bottom of the extension?

A. Feb'y 3, 1896.

Q. Before any work was done?

A. No; at that time, nearly 1,000 feet of the wall had been built.

Q. And as to this already built, you sounded over the mats as they went down?

A. Yes, sir; in making the profile of that 1,000 feet already built, I judged somewhat from the soundings taken as the mats were sunk and somewhat from the soundings on the side of the mats as shown by my survey of February 3rd.

Q. And you took those soundings?

A. Yes, sir.

Q. Did you on Oct. 6, 1897 survey—Did you determine the character of the bottom?

A. Not at that time; I knew the character of the bottom, because I had been on the construction work, and knew just what it was.

Q. You took soundings with a lead?

A. Yes, sir.

Q. A lead does not determine the character of the bottom?

A. No, sir.

Q. How did you know, then, when you were on the jetty and when you were off with the lead?

A. If you struck rock, you would feel that with the lead.

1514 Q. And if you didn't strike rock?

A. In regard to that point, I will say that I didn't require the leadsman to call out what he struck, whether rock or sand. I simply depended on the location of the jetty and the location of the soundings. If it platted a little off of the jetty, and the depth was so as to make it appear on the jetty, that sounding would be considered in that cross-section, and vice versa, if that sounding was so deep as to make me think it was off the jetty when it was on, it was thrown out of that section.

Q. How did you locate the soundings?

A. By two instruments,—one instrument on the head of the piles at the Breakwater and the other Instrument on Tybee light, consequently my intersections were at a right-angle; the greatest angle I had was perhaps sixty degrees.

Q. And how close could you locate the sounding in that way?

A. With these two instruments?

Q. Yes, sir?

A. I suppose within twenty feet; most likely within ten feet, but could be sure of it within twenty feet.

Q. What was the use, in taking these observations, to locate your soundings if, when you thought your sounding was too deep, you threw it out, and if, when you thought it shallow enough to indicate the jetty, you kept it in?

A. For this reason: If I did not locate my sounding, I would not know where my section was taken; I would not know whether it was at right-angles to the jetty or whether it was twisted all out of shape. I had to have these locations to show just where that section was, and to see if my line was near enough at right-angles to complete that survey.

Q. That was the only object?

A. The only object; otherwise I might have gone out there without any instrument at all if I could have located the point of the dam accurately enough; it would not have been necessary to have located it instrumentally.

1515 Q. Then when you got too much depth, you would say that is not the jetty?

A. You would have to use your judgment; would have to refer to both charts, both before and after, and see.

Q. Then with respect to the soundings which you thought too deep, and therefore threw out, because, as I understand you, you concluded that they were not on the jetty, that was a mere surmise on your part?

A. Yes, sir; it was. My surmise was this: my surmise was that my location was probably a little in error, and, if I left that sounding in, it would make the mean height of the jetty much less than it ought to be.

Q. And then when you got this data all together, you made your cross-sections or your cross profiles,—you calculated the mean height?

A. Calculated the mean height and also the center section. The mean height is shown in one longitudinal profile, and then in the other original profile, the actual profile of the center line is shown by myself by soundings that came at the actual center.

Q. And that shows the actual crest?

A. The actual crest of the center line; or if you take the mean, it shows the mean of the entire breakwater from side to side.

Q. Now the original profile you spoke of, along the center line, that shows the actual height?

A. Of the center line.

Q. Your mean height is, of course, a purely imaginary matter?

A. Yes, sir.

Q. There is no such thing, as a matter of fact, as a mean height to that jetty?

A. No, sir; that was simply put there for the purpose of illustrating what the height would be if the dam was levelled off.

1516 Q. In order to be perfectly clear about it,—assuming this book to be two inches thick and this next to be one inch thick, and the distance across each book to be the same, what would the mean height be?

A. It would be one inch and a half.

Q. It would be an imaginary line drawn half an inch—?

A. Half an inch below that and half an inch above the other; in other words, half an inch cut off the first book and put on to the other, and it would be level.

Q. Then, let us have another book on this side the same width as the other two and one inch high, what would be the mean height with this middle one two inches and two side ones one inch?

A. It would be one inch and a third on that basis; wait a moment, I have made a mistake,—one and about six-tenths, I should say.

Q. The effect, then, of putting the second book, and figuring its height, is to diminish the mean?

A. That increases the mean. Let's see; yes, sir, it would be to diminish the mean.

Q. Of course, it would diminish the mean?

A. Yes, sir.

Q. Now, the wider you consider these books and of the less height, the more that mean would be diminished?

A. Yes, sir; the more nearly it would approach the height of the small book.

Q. Or to state the same proposition differently, the narrower the high book is, the less the mean height?

A. Yes, sir.

Q. Have you got that height on the detached extension such as you described on the Oyster Bed and Cockspur Island training walls,—I mean the height on the center line,—the longitudinal center line?

A. I think that was shown; I am not certain about that; I think the height was shown along the center line in those two cases. I think I showed the height on the crest of 1517 the wall in the Cockspur Island training wall. The highest point is along on the center or on one side of the center, and that crest was shown on the compilation.

Q. And the crest was shown on the detached extension of the training wall?

A. I think I show that crest as the center line on Oyster Bed training wall, and on the other I did not show it as the center line.

Q. As to the detached extension, how does it appear,—as the crest or center line?

A. It appears as the center line, but that center line was only determined by soundings that actually came in the center, and that would not be as reliable as a profile constructed by means of the entire sections. Now, for instance, in one cross-section, you sometimes have eight or ten soundings, and sometimes only four. If I took ten soundings, it would give

me a better mean height than if I took the soundings that actually came in the center.

Q. The mean height is an imaginary height?

A. Yes, sir.

Q. I am talking about the height of the crest of the detached extension training wall?

A. No such thing as the crest. The mats were sunk and rock thrown as evenly over the mats as possible; no crest to it.

Q. There is one place, or one line along it that is higher than the others?

A. No, sir; there is not.

Q. Absolutely a horizontal surface?

A. Intended to be a flat surface. If there is one place higher than the other, it is purely accidental, but that is not true of the other two walls; they have a crest, but the breakwater has not as far as the present construction goes; it is supposed to be evenly distributed over the entire one hundred feet.

Q. Is it as a matter of fact?

1518 A. I think so. Of course, there are some places where it is badly torn up,—three or four hundred feet entirely destroyed, so that you could not say it was level, but it was intended to be.

Q. As a matter of fact, is it?

A. It is not.

Q. And yet you didn't plat the actual height?

A. To show the breakwater as it actually existed would have required a survey that would have taken nearly a month and it would have cost a great deal of money. I made this survey in one day, and showed it as near as I could; to show the actual height, would cost a great deal.

Q. You said yesterday that you saw the barges taking rock from the old quarantine station and putting it on the jetty; where did you see it loaded?

A. In one or two instances, I was present when it was loaded.

Q. How was it loaded?

A. On to the lighters by means of wheel barrows,—piled into the wheelbarrows and wheeled on to the lighters.

Q. The rock was lying there above low water?

A. The majority of it; I expect some of it might have been below low water.

- Q. They didn't take any below low water?
A. They might have taken a few, but not many.
Q. Do you know where the harbor line runs on the old quarantine station,—the harbor line as established in 1893?
A. For the quarantine station?
Q. Yes?
A. I think it cuts into these piers about one hundred feet.
Q. How about in respect to low water,—runs along to low water?
A. A little above it I think; I may be mistaken about that.
Q. Can you tell from this chart?
A. I think so. On the ballast piles, it is above low water; at other points, it is outside of low water, and between 1519 that and Station Johnson, it is above low water.
Q. Where the ballast was, the harbor line is practically low water?
A. Practically where low water was before the ballast was placed there.

Re-Direct Examination by the Judge-Advocate.

- Q. I understood you, in testimony heretofore given, that you had been in the employment of Capt. Carter several times?
A. I think I was recalled to his employment four times.
Q. When was the last time you returned for service under him?
A. In August, 1893.
Q. Did you make application for the position?
A. No, sir; I did not; I was at that time acting as city engineer of West Duluth, and Capt. Carter telegraphed me, and asked me if I would accept the position I held before on Savannah Harbor.
Q. Was that as a hydraulic engineer?
A. No, sir; I was serving as City engineer in West Duluth.
Q. I mean were you serving under him as a hydraulic engineer?
A. Yes, sir.
Q. Did he subject you to an examination such as Mr. Blair has gone through with this morning?
A. No, sir; he seemed very anxious for me to come back, and no questions were asked?

Q. You have made surveys under him since you were employed the last time?

A. Yes, sir; I have made several important surveys in the harbor.

Q. You have made estimates for him?

A. In a great many cases.

Q. He has adopted your estimates?

A. I think in all cases; there may have been some cases where he disregarded them.

Q. Something was said about the principal work being done by unskilled labor doing the work on the jetties; 1520 your duties would have been lighter if more intelligent and expensive labor had been employed, would they not?

A. I think they would.

Q. A large tunnel has been built under the Chicago River; which is the most important part of that work, drawing the plans and locating the tunnel, or the excavation of the tunnel itself?

A. I should think the construction of the tunnel would be the greatest; in fact, I know the Engineer who built it, and he said that work of that sort was enough to make a man gray haired in a few years.

Q. Did your experience in the field give you familiarity with the tidal flow, currents and erosion of mud?

A. Yes, sir.

Q. How would your qualifications on such subjects compare with those of a man who, for instance, might have drawn the original plans, but had nothing to do with the construction?

A. I think a man's best experience is that which he gets in the field,—better than drawing the plans.

Q. Where is the natural channel in that part of the River near the quarantine?

A. At what time.

Q. Is it on the line A. B C?

A. No, sir; that would have been the natural channel had it not been for the shoal which is right in the center of the river; the natural flow would probably have been a little to the north of A B C.

Q. There is a good, wide channel?

A. It is a little to the north of A B C.

Q. Then to abandon that channel and dig a new one across the shoal, and remove the only important structure in that vicinity, would require very serious reasons for so doing?

A. Yes, sir.

1521 Q. Did the project for improving Savannah Harbor adopted in 1890 provide for the purchasing or removing of the quarantine station?

A. I do not know of my own knowledge; I think it did.

Q. You haven't actual knowledge upon that point?

A. No, sir; I could not answer that.

Q. The records will show.

A. Yes, sir; I may be wrong.

Q. Did the new project of 1894; that is, the project involving the breakwater, involve any authority to purchase any part of the quarantine station or to pay for the removal at Government expense of that part of the quarantine station which was built before the harbor line was established?

Mr. Blair: I submit that the best evidence of that is the paper itself.

Judge-Advocate: If this witness, who is an engineer, can tell us, it will save me from introducing more documentary evidence.

Q. (Judge-Advocate continuing) Can you tell, Mr. Cooper?

A. I cannot.

Q. What were the dimensions of the barges that conveyed that quarantine rock?

A. One hundred feet long and about twenty-four or twenty-six feet wide.

Q. What was the average amount of rock delivered by each barge during that period?

A. I took the mean of all the lighters in April, and it was 122.

Q. 122 what?

A. Cubic yards, as the average on each lighter.

Q. Mr. Blair examined you as to the harbor lines of the quarantine station speaking in the present tense; are there any harbor lines at the quarantine station now?

Mr. Blair: I said harbor lines in 1892.

Judge-Advocate: I misunderstood you.

Q. (Continuing examination) Are there any lines now 1522 established at the quarantine station?

A. I don't know whether the Board of Engineers took any action on the quarantine station. I know the matter came up. I know there was a Board of Officers here to look into that matter, but the action they took, I don't know.

Re-Cross Examination by Mr. Blair.

Q. What specific cases did you ever make estimates for Capt. Carter in?

A. Here is one specific case right before you, where I made the estimate for that A B C channel.

Q. Any other?

A. I made the estimate of the dredging one time in the Marsh Island channel.

Q. When?

A. Sometime in 1894, I think.

Q. Any other?

A. I have made a number of estimates of the cost of surveys and estimates on the building of docks at different places.

Q. In this engineering district?

A. Yes, sir.

Q. What dock?

A. The Fort Pulaski and Fort Oglethorpe and also the dock at Tybee.

Q. Did you make estimates in any other cases?

A. I have made a number of estimates of the cost of certain jetties, a good many different jetties on Savannah Harbor.

Q. Did you ever make any estimate on mattress work?

A. I think so.

Q. Where?

A. As I said before, nearly all along the Harbor,—different jetties that were contemplated to be constructed.

Q. Cumberland Sound?

A. I don't remember making any estimates on Cumberland Sound.

1523 Q. When did you make your last estimate on mattress work?

A. I think it was when I was asked to give a rough estimate of the cost of Cockspur Island training wall.

Q. What year was that?

A. I think in the early part of 1894 or the latter part of 1893.

Q. What did you estimate the mattress work at?

A. I don't remember; I think my estimate of the cost of the entire training wall was half a million dollars.

Q. Can you give me the approximate figure you made as to the mattress work?

A. Somewhere in the neighborhood of 400,000 yards.

Q. How much a yard?

A. I didn't apply the prices; I only figured the quantities; Capt. Carter applied his own prices.

Q. You estimated the cost, didn't you?

A. At the contract price then in force, it would have been about half a million dollars, although I don't think I applied the price myself.

Q. Then you didn't estimate the cost?

A. Not actually; it was only the quantities upon which the cost was to be made.

Q. Is that statement true of these other estimates you have been talking about?

A. No; in case of the building of the wharf, I gave him the price.

Q. Did you estimate the cost of the mattress work in 1893?

A. Not the cost.

Q. In 1895?

A. No.

Q. In 1892?

A. No.

Q. In 1891?

A. I was not here in 1891.

Q. In 1890?

A. I wasn't here; yes, I was here a part of 1890.

1524 Q. In 1889?

A. I don't know whether I actually made an estimate of the cost of the mattresses then or not; it is possible that I did; I would not say one way or the other.

Q. So now you say you don't know whether you ever estimated the cost of mattress work at all since you have been in this engineering district?

A. I do not.

Q. What is your best recollection about that?

A. I say that my recollection is that my estimates were always in quantities and not in prices. I would give the number of square yards I thought necessary to construct a dam. and that opinion was made up by me from my personal knowledge of how many courses it would take to attain a certain height.

Q. And you say on this estimate you made in 1893, you estimated the quantity of the mattresses; about how much?

A. At somewhere between four hundred and five hundred thousand yards I think, for Cockspur wall.

Q. And the quantity of stone?

A. I don't remember; I could not say.

Q. (By the Judge-Advocate) Mr. Cooper, would like the notes of your testimony read to you?

A. No, sir.

Q. (By the Judge-Advocate) You are satisfied with it?

A. Yes, sir.

Witness excused.

1525 CHARLES S. HARDEE, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination by the Judge-Advocate.

Q. Will you please state your full name?

A. Charles S. Hardee.

Q. You are City Treasurer?

A. Yes, sir.

Q. You are the custodian of certain vouchers which I have asked you to produce?

A. Yes, sir; all vouchers connected with the case.

Q. Did you bring them with you?

A. I have them, sir (handing Judge-Advocate the vouchers)

Q. What are these vouchers?

A. They are copies of receipts given to these various parties at the time they turned the money into the treasurer.

Q. Four of these are dated in 1889?

A. Yes, sir.

Q. And there are three dated in 1896?

A. Yes, sir.

Q. These are from the City records?

A. Yes, sir.

Judge-Advocate: I offer in evidence these three receipts given in 1896 and the four given in 1889.

* * * * *

1528

Cross-Examination by Mr. Blair.

Q. Those receipts show three different sales in 1896, —three different sales, do they not?

A. Yes, sir; three.

* * * * *

1538 Judge Advocate:—I now offer in evidence the certificate of incorporation of the Empire Construction Company.

Mr. Blair.—We do not see the materialty of this.

Judge Advocate:—The evidence will show it. I promise to connect it with the case.

(Here the Judge Advocate reads the certificate of Incorporation of the Empire Construction Company, with Benjamin D. Greene, Augustine M. Newton, James E. Chandler, John M. Waddle, and John A. Roebuck as incorporators, and also the certificates thereto attached.

Judge Advocate:—That will be attached to the record and marked Exhibit 277.

Judge Advocate:—May it please the Court, I have intercepted an important witness in this case while absent from this station, Colonel Gillespie, he is not provided with his uniform, and will have to, necessarily, appear before the Court without uniform.

The President:—The Court will permit it.

Judge Advocate:—And that brings up a question which I had intended should be deferred until a later period, the question of the use by me of certain papers which were examined by a Board of Officers in an investigation which preceded this Court Martial and the case of the accused. In that behalf certain boxes were turned over to me as Judge Advocate of this Court and for use in the trial of this case, which were not opened until January 17th, last, when the boxes were opened in the presence of the accused and his counsel, 1539 after these preliminaries, which, at their request, I read to the Court, that they may be spread upon the record: (reading)

“Savannah, Georgia, January 17th., 1898.

Col. Thos. F. Barr,

Judge Advocate, G. C. M.,
Savannah, Ga.

Sir:—

The documents and papers which it is proposed you shall examine are strictly private memoranda to which neither the

Government of the United States nor any person has the legal right of access, save only upon my permission.

When I left Savannah last July, I committed them to the care and custody of my agent in that city. On my return I suffered the Board of Engineer Officers to examine them in confidence, coupled with the distinct condition that when such examination should have been completed they were to be returned to me.

Without my knowledge, and against my consent, they were sent from Savannah; and afterwards returned to this city, under seal of the War Department, addressed to the then Judge Advocate of the General Court Martial now in session here.

I have never consented to the taking of these papers from my possession; I have never parted with the property in them; and I do now protest against the proposed examination thereof, as a violation of my constitutional right to be protected against unreasonable searches and seizures.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Captain U. S. Engineer Corps.

Judge Advocate:—With my note, “received at 10-5 A. M. Jan. 17—1898, Thomas F. Barr, Ass’t Judge Adv. Gen’l., U. S. A.”

Judge Advocate:—This statement was then made by 1540 Mr. Blair, of counsel, (Reading):

Savannah, Ga., Jan. 17, 1898.

By Mr. Blair:—

On behalf of Captain Carter we protest against the presence of Major Adams during the examination of the papers of Captain Carter now sealed in the two boxes in the office of the Engineer in charge; his presence being in violation of the instructions as we understand them, given by the Secretary of War with respect to the opening of said boxes and the examination of the papers; those instructions being that said papers were to be examined by the Judge Advocate, including, of course, his assistant, in the presence of Captain Carter and his counsel, and in the presence of no other person.”

Judge Advocate:—To which I responded, “I have received no instructions of the character mentioned by the counsel. Major Adams is in Savannah at my request, brought here for the purpose of assisting me in this examination, he having

been a member of the Board of Officers appointed to investigate the allegations preferred against Captain Carter, and being familiar with the contents of the two boxes which were before the Board with the consent of the accused, and which are now under seal in this office. I conceive myself vested with authority to authorize such Officers of the Army as I may require, who are here by authority of the Secretary of War, to assist me and to be present at this examination. My understanding of the instructions received by my predecessor touching this matter, is that no unauthorized person shall be permitted to be present."

Judge Advocate:—Does the Court care to go into this question today?

The President:—What is the time?

Judge Advocate:—20 minutes to three.

Judge Advocate:—I can go perhaps a certain distance and consume a little time.

The President:—The Court will take a recess for five minutes.

1541 Judge Advocate:—I can go on now for a few minutes and consume a little time before the issue is raised which I understand is to be raised.

Mr. Blair:—Yes.

Judge Advocate:—Shall I proceed and consume such time as I may?

The President:—I desire that you do so.

GEORGE L. GILLESPIE, a witness for the prosecution, duly sworn, testified as follows:—

Direct Examination.

Questions by the Judge Advocate.

Q. Please state your full name, Colonel?

A. George L. Gillespie.

Q. Your official position?

A. Colonel of Engineers, United States Army.

Q. You identify that paper, or the copy, you have had the original?

A. That is a copy of the original.

Q. Original of what?

A. Original instructions from the Chief of Engineers.

Q. And what is that (handing witness a paper)

A. That is the original letter.

Q. You were President of the Board appointed by the President?

A. I was, yes, sir.

Q. For the investigation of certain allegations made in relation to the accused officer here present?

1542 A. Yes, sir.

Q. Was the Board appointed by the Chief of Engineers or the Secretary of War?

A. It was a War Department order, I think, I am not sure about that. It was a printed order, general, I think it was the War Department.

Judge Advocate:—I offer in evidence and read: (reading)

“Office of the Chief of Engineers,
United States Army,
Washington, D. C., Sept. 13, 1897.

Col. George L. Gillespie,
Corps of Engineers, Army Building,
New York City, N. Y.

Colonel:

By direction of the Secretary of War, I transmit herewith, for the use of the Board convened by S. O. No. 32, c. s. from these Headquarters, copies of reports from Col. P. C. Hains, Corps of Engineers, Division Engineer of the S. E. Division and Captain Cassius E. Gillette, Corps of Engrs., in charge of Savannah River and Cumberland Sound District, in reference to certain work performed by contract under the direction of Capt. O. M. Carter, Corps of Engineers, at the Savannah River, Georgia, and Cumberland Sound, Fla.

The Sec. of War directs that the Board shall make as complete and careful investigation of this whole subject as is possible and submit a report thereon at the earliest practicable date.

1543 The Board is authorized to call upon Captain Gillette for such clerical aid, including a stenographer, as it may deem necessary, and to call before it for examination and information, such officers of the Corps of Engineers and such employees of the United States who have been engaged upon the works of improvement at Savannah, Cumberland Sound and other localities within the Savannah Engineering District, as it may deem necessary.

The expenses of the Board will be paid by Captain Gillette from the appropriations for works under his charge.

It is requested that a complete and exhaustive investigation shall be made and a detailed report with results and recommendations shall be submitted at the earliest practicable date.

Captain Gillette will be instructed to afford the Board every opportunity to examine the records of his office and to furnish it with copies of any portion of these records that may be desired.

The Board will give Captain Carter ample opportunity to be heard before it submits its report.

The Secretary of War deems it best that the duties of this Board shall take precedence of other work committed to its members.

Very respectfully,

JOHN M. WILSON,

Brig. Gen'l., Chief of Engineers, U. S. Army."

(Two Enclosures)

Judge Advocate:—I do not consider it necessary to read those enclosures which were simply for the guidance of the Board in its investigation. And that is as far as I can go with this witness this afternoon, without raising the issue 1544 which will take some little time.

The President:—The hour for adjournment has arrived, cannot we meet at ten o'clock tomorrow?

Judge Advocate:—No, sir, we cannot.

The President:—If there are no objections the Court will stand adjourned until tomorrow morning at eleven o'clock.

(Here at 2:55 o'clock the Court adjourned until tomorrow morning, February 15th, 1898, at eleven o'clock.)

THOMAS F. BARR,

Col. and Asst. Judge Adv. Gen.

Judge Advocate.

1545

United States Court Room,
Savannah, Georgia,

February 15, 1898.

The Court met pursuant to adjournment at 11 o'clock, A. M.
Present.

All the members of the Court and the Judge-Advocate.
The accused, his counsel, and the reporter, G. T. Cann,
were also present.

The President: The Court will come to order—all present.

GEORGE L. GILLESPIE, a witness for the prosecution, having been previously duly sworn, recalled, testified as follows:

Direct Examination, Continued.

Questions by the Judge-Advocate:

Q. Do you recognize that book?

A. I do.

Q. Was that before the Board of Officers, of which you were President, in the investigation of the charges against Capt. Carter?

A. It was.

Judge-Advocate: This letter book is marked, "B."

Q. Do you recognize that one? (Handing witness a book)

A. I do.

Judge-Advocate: This is marked, "Letters 4, Jan. 16, 1890, to March 16, 1891."

Q. Was that book before the Board of Officers, for examination?

1546 A. It was.

Judge-Advocate: As a further mark of identification of the second book, at the request of counsel, it is marked, "Lieut. O. M. Carter, Private, January 16, 1890, to March 16, 1891."

Q. Do you recognize that book? (Handing book to witness)

A. I do.

Q. That was before the Board for the purpose of investigation?

A. It was.

Judge-Advocate: This book is marked on the back, "Let-

ters, March 18, 1891 to January 18, 1892," upon the side, "O. M. Carter, Corps of Engineers, U. S. A., March 18, 1891, to January 18, 1892."

Q. Do you identify that? (Handing witness book)

A. I do.

Q. That also was considered by the Board?

A. It was.

Judge-Advocate: This is marked on the back, "Letters, No. 1, August, 19, 1884 to September 29, 1886"; on the side, "August 19, 1884, to September 29, 1886, O. M. Carter, Corps of Engineers, U. S. A., Private."

Q. Do you identify this book? (Handing witness book)

A. I do.

Q. And that also was before your Board and there considered?

A. Yes, sir.

Judge-Advocate: This book is marked on the back, "No. 2, September 27, 1886, to September 23, 1888"; on the side, "September 27, 1886, to September 23, 1888, O. M. Carter, Corps of Engineers, U. S. A."

Q. Do you identify that book? (Handing witness a book)

A. I do.

Q. And that also was before your Board for consideration and examination?

A. It was.

Judge-Advocate: This book is marked, "Letters, 6, January 18, 1892, to January 6, 1893," on the side Capt. O. M. Carter, Personal."

Q. Do you recognize that one? (Handing book)

A. Yes, sir.

Q. Was that also before the Board for consideration?

A. It was.

Judge-Advocate: This book is marked, "Letters, 7, June 6, 1893 to November 25, 1895"; it is not marked on the side.

Q. Can you identify that one? (Handing book)

A. I do.

Q. And that also was before the Board?

A. It was.

Judge-Advocate: This book is marked on the back, "Letters 3, September 24, 1888 to January 16, 1890"; on the side, September 24, 1888, to January 16, 1890; Lieut. O. M. Carter, Private."

Q. Colonel, were all the letters copied into those books, official or private?

A. Partly official, purely so, partly private.

Q. Can you identify that book? (Handing book)

A. I, do, sir.

Q. That was before the Board for its consideration?

A. It was.

Q. Where did you obtain it?

A. The Board found it in the Government file case, turned over to it by Capt. Gillette, on its arrival here.

Q. How did the Board get into the case?

A. The case was found in the room that was said to be 1548 in the custody of the local officer.

Q. In what condition was it when you first saw it?

A. We found it screwed up in an open crate. The room was visited by the full Board, accompanied by Capt. Carter, the custodian was found there. The door was opened I think, by Capt. Gillette; he did not go inside; and on entering the room, the Government file case in question was pointed out to the Board, by Capt. Carter. There were a series of boxes there, marked "B 1 to 36." I think that is the identical number: I made a record of all the circumstances at the time, (Here the witness refers to a memorandum book), my record reads, "There were 36 boxes from B 1 to 36 in red letters."

Q. Those were file boxes in the case?

A. They were new boxes, apparently new, and the B stood for books.

Q. I refer now especially to the file case, how did you obtain access to it?

A. As soon as the file case was identified, I gave directions that the crating should be broken off, and afterwards I gave directions that the case should be transferred to the place that had been assigned to the Board for the conduct of its duties; and it was so transferred, under a force which was secured by Capt. Gillette at my request.

Q. Was the case locked?

A. The case was locked.

Q. How did you obtain access to it?

A. Capt. Carter gave me the key on the way from the place where it was stored to the engineer office.

Q. Where did he have the key?

A. He had it in his pocket and gave it to me personally.

Q. Was it a separate key, separate from other keys?

1549 A. That I have no distinct recollection about.

Judge-Advocate: I now offer in evidence. (To witness) This was found among those papers? (Handing witness a book)

A. After the case was opened, that was found in it.

Judge-Advocate: I now offer in evidence the Certificate Book of the Empire Construction Company.

Mr. Blair: To which we object, if the Court please.

Mr. Blair: If the Court please, we withdraw the objection to the introduction of the certificate book offered by the Judge-Advocate, and accompany the withdrawal by the statement that the book is not the private property of Capt. Carter, never was; he never had any knowledge of it, until;—never knew the book was in existence until this Board of Officers came down here, he didn't put it in the case.

Judge-Advocate: That savors much more like testimony than a statement to the Court; that it was there is plain, that it was found among his papers has been testified to: how it came there, is for him to explain, and that must be done by sworn testimony.

Mr. Blair: Unquestionably, Colonel, we intend to do that.

Judge-Advocate: I offer in evidence and read from this certificate book of the Empire Construction Company: (Here the Judge-Advocate reads from the stock certificate book of the Empire Construction Company all the certificates and stubs therein, in any degree filled out, together with all the indorsements thereon)

Judge-Advocate: That will accompany the record, and be marked Exhibit No. 278.

(The Judge-Advocate read from the above stated Exhibit as follows:)

Judge-Advocate: (Reading) Original ledger, folio 1, No. 1, name, Benjamin D. Green, shares 1,980, date, June 10, 1891, No. 1, incorporated under the laws of the state of New York, 1,980 shares. This is to certify that Benjamin D. Green is entitled to 1,980 shares of the capital stock of The Empire Construction Company, transferable only on the books of the Company, in person or by attorney, only on the surrender of this certificate; New York, June 10th, 1891; James E. Candler, Secretary."

The name of the president is not affixed; it is marked, "Cancelled, B. D. Green, President." It is filled out on the back, "For value received, I hereby sell, transfer and assign to Neal McLaughlin, 100 shares, Thomas Reilly, 100 shares, W. W. Hegeman, 100 shares, and John F. Gaynor, 800 shares."

Judge-Advocate: (Reading) Original ledger, folio 5, No. 2, name, Augustine M. Newton, shares 5, date June 10th, 1891." Then the form of certificate, "This is to certify that

Augustine M. Newton is entitled to 5 shares of the capital stock of the Empire Construction Company, transferable on the books of the company, in person or by attorney, only on the surrender of this certificate." Signed, "James E. Chandler, Secretary, New York, June 10th, 1891." The signature of the president is not attached. "Shares \$25 each, which is marked upon each certificate."

Judge-Advocate: "Original ledger, folio 6, No. 3, James E. Chandler, shares 5, date June 10th, 1891, the Empire Construction Company. This is to certify that James E. Chandler is entitled to 5 shares of the capital stock of the Empire Construction Company, transferable, &c., New York, June 10th, 1891." Signed, "James E. Chandler, Secretary." The president's signature is not attached.

Judge-Advocate: "Original Ledger, folio 7, No. 4, name John M. Waddle, shares 5, date June 10th, 1891, No. 4 Empire Construction Company. This is to certify that John M.

Waddle is entitled to 5 shares of the capital stock of the 1551 Empire Construction Company, transferable, &c. New York, June 10th, 1891; James E. Chandler, Secretary."

The signature of the president is not attached. It is indorsed "For value received, I hereby sell, transfer and assign to Edward H. Gaynor, Five shares of stock, within mentioned, and authorize W. Pellingham to make the necessary transfer on the books of the Company. Witness my hand and seal, this 18th, day of December, 1891. John M. Waddle, in presence of W. Pellingham."

Judge-Advocate: "Original ledger, folio 8, No. 5, name, John A. Roebuck, 2 Wall St. N. Y., shares 5, date June 10th, 1891; the Empire Construction Company. This is to certify that John A. Roebuck is entitled to 5 shares of the capital stock of the Empire Construction Company, transferable, &c., Signed, "James E. Chandler, Secretary, New York, June 10th, 1891. B. D. Green President. Received the above described certificate, John A. Roebuck, June 10th, 1891." On the back "For value received I hereby sell, transfer and assign to John F. Gaynor 5 shares of stock within mentioned, and authorize to make the necessary transfer on the books of the Company. Witness my hand and seal this 30th, day of June, 1891, John A. Roebuck, in presence of James E. Chandler."

Judge-Advocate: "Original folio 9, No. 6, John F. Gaynor, shares 5, transferred from John A. Roebuck, date June 30th, 1891, No. 6, The Empire Construction Company. This is to certify that John F. Gaynor is entitled to 5 shares of

the capital stock of the Empire Construction Company, transferable, &c., New York, June 30th, 1891. Signed James E. Chandler, Secretary." The name of the president does not appear.

Judge-Advocate: "Original 5, transfer Number 7, folio 10, No. 7, name Ed. H. Gaynor, shares 5, transferred from John M. Waddle, date December 18th, 1891, No. 7, This is to certify that Edward H. Gaynor is entitled to five shares of 1552 the capital stock of the Empire Construction Company, transferable on the books of the Company, &c. New York, Dec. 18th, 1891. James E. Chandler, Secretary." The name of the president does not appear.

Judge-Advocate: "Stock ledger 15, Folio 13, original No. 1, do 1, No. 8, Number of shares 100, to whom issued, Neal McLaughlin, dated September 10th, 1891, from whom transferred, Capt. B. D. Green. This certifies that Neal McLaughlin is the owner of 100 shares of the capital stock of The Empire Construction Company, transferrable, &c., 10th, day of September, 1891. James E. Chandler, Secretary." The name of the president does not appear.

Mr. Rose: Is not that mark cancelled across the face of it?

Judge-Advocate: Yes, that one is marked "Cancelled, B. D. Green, President."

Mr. Rose: And the others that were transferred are also marked cancelled?

Judge-Advocate: That is the second one, Mr. Rose, that has appeared having "cancelled" on it. The color of the certificate having changed, it was not so apparent.

Judge-Advocate: Stock ledger, folio 17, original No. 1, do 1, No. 9, number of shares 100, to whom issued, Thomas Reilly, dated September 10, 1891, from whom transferred, Cap. B. D. Green. This certifies that Thomas Reilly is the owner of 100 shares of the capital stock of The Empire Construction Company, transferable, &c., dated City of New York, this 10th. day of September, 1891. Signed James E. Chandler, Secretary." The name of the president does not appear. "Cancelled B. D. Green, President."

Judge-Advocate: Stock ledger, folio 21, original No. 1, do 1, number 10, number of shares 100, to whom issued, W. W. Hegeman, dated Sept. 10th, 1891, from whom transferred, 1553 Cap. B. D. Green, This certifies that W. W. Hegeman is the owner of 100 shares of the capital stock of the Empire Construction Company, transferable &c., City of New York, this 10th. day of September, 1891. James E. Chandler,

Secretary." The name of the president does not appear. And across the face of it, "Cancelled, B. D. Green, President."

Judge-Advocate: "Stock ledger, folio 9, original number 1, do, 1, No. 11, No. shares 800, to whom issued, John F. Gaynor, dated Sept. 10th, 1891, from whom transferred, Cap. B. D. Green, This certifies that Col. John F. Gaynor is the owner of 800 shares of the capital stock of The Empire Construction Company, transferable, &c., New York, this 10th. day of September, 1891. James E. Chandler, Secretary." The name of the president does not appear. It is marked across the face, "Cancelled, B. D. Greene, President."

Judge-Advocate: Upon the next certificate there appears no number of shares on the stub, and no name appears, and the certificate then reads as follows: "The Empire Construction Company, This certifies that.....

is the owner of nineteen hundred and eighty shares of the capital stock of The Empire Construction Company, transferable only on the books of the corporation in person or by attorney, on surrender of this certificate. In witness whereof, the President and Secretary have hereunto subscribed their names and caused its corporate seal to be hereto affixed at..... this..... day of..... A.

D. 189..... B. D. Greene President." The name of the secretary and the seal of the corporation does not appear. The certificate of transfer on the back is marked, "B. D. Greene", without any witness, just the signature, "B. D. Greene."

Judge-Advocate: That will accompany the record and be marked Exhibit 278.

1554 Q. What is that copy which I now show you, Colonel?

A. That is a copy of a letter, the original of which I have seen.

Q. The original was before the Board?

A. It was.

Q. Do you know what has become of that original?

A. I do not; the last time I saw it was in New York City, the morning the boxes were closed.

Q. Where was it then placed?

A. In the boxes, it was transmitted to the Judge-Advocate later.

Q. In the letter book?

A. In the file case.

Q. In the file case?—have you made a search for it in that file case since that?

A. I have.

Q. When was it?

A. Yesterday.

Q. With me?

A. Yes, sir.

Q. Did you make further search in other file cases?

A. I searched every file case that was presented to me.

Q. And the letter could not be found?

A. It could not be found, no sir.

Q. Who was that letter from?

A. B. D. Green.

Q. And to whom was it addressed?

A. Capt. Carter.

Judge-Advocate: I offer this copy in evidence.

Mr. Blair: We object, if the Court please.

Witness: I will correct my testimony in saying it was signed "B. D. Green", and say the letter was signed "B. D. G."

Q. Was there any index?

A. The index to the case showed it was "B. D. Green," 1555 Benjamin D. Green, I think was the exact way.

Mr. Blair: Have you got the index?

Mr. Rose: That must be in the file case.

Mr. Blair: If the Court please, in order that our objection may be more intelligible to the Court, I would like, with the permission of the Court, to cross-examine Col. Gillespie a little, to develop all the facts so far as he knows, them, about where and how those private papers were found. I think the Court will not have an intelligible view of this situation unless further facts are developed, and until they are, I can't make the statement to which the Judge-Advocate just now seemed to object.

Judge-Advocate: Any such statement in regard to a matter of that kind, was perfectly proper, and I am quite willing you should make one.

Mr. Blair: I submit it would conduce to a clear presentation of this case, if permission be given to me to cross examine Col. Gillespie.

The President: The paper is in possession of the prosecution, the presumption of law is that it is properly so, and of course, it rests upon counsel for the accused to show as he claims, that it is not in proper possession; to show that fact.

Judge-Advocate: If the issue is to be raised that these are not properly in my possession, the burden is with the accused to show it.

The President: Certainly,—with the accused to show it.

Judge-Advocate: He cannot show it by the cross-examination of a witness, which I have produced, for the simple purpose of identification.

Mr. Blair: This witness, if the Court please, has testified partially as to the facts concerning how he came into possession of these papers, and until his testimony is further developed, further explained, this Court does not know the facts in regard to it. I submit, it is a proper thing.

Judge-Advocate: Why not call him as a witness. You can call him as a witness to establish that fact.

Mr. Blair: I submit, I have the right to cross examine him on matters brought out on the direct examination.

Judge-Advocate: I have not got through with his examination. The cross examination comes after I get through with him.

By a member: I move the Court retire.

The President: The Court will retire.

Here the Court, at 11.45 A. M., retired to an adjoining room, for consultation, and the Court was closed. After which, at 12.5 o'clock, P. M., all the members of the Court being present,—the Judge-Advocate, the accused, his counsel, and the reporter, G. T. Cann, being also present, the Court was opened.

Judge-Advocate: May it please the Court, in the absence of the Court, during its deliberations, I sent to the file case, at the request of the accused and his counsel, and in the proper file case the original letter, which we had looked for so diligently, was found by the accused.

Mr. Rose: By Capt. Carter.

Judge-Advocate: Yes, by the accused; I make the correction; and it was among the letters, under "L", being smaller, was there inside, and necessarily, in such a search as we had to make, as the Court will understand, it was undersized and out of sight. I therefore, offer the original letter.

Q. Was that before your Board? (Handing witness letter)

Witness: That letter was before the Board.

Judge-Advocate: I offer the original of the letter now instead of the copy.

.

1580 Judge-Advocate: May it please the Court, I will premise my brief remarks with reading the protest, or request of the accused through his counsel, referred to by him in his opening statement; as follows:

"Savannah, Ga., Jan'y. 19, 1898.

"Col. Thos F. Barr,
Judge-Advocate,
General Court Martial.

"Sir:

I have the honor to request that you notify me when you propose to make any further examination of my private papers now in your possession, and that such examination or examinations, be made only in my presence and that of my counsel.

Very respectfully,
Your obedient servant,.

O. M. CARTER,
Capt. U. S. Engineers,
By FRANK P. BLAIR,
His attorney."

1581 Judge-Advocate: And this response, (Reading)

"Savannah, Ga., January 19, 1898.

"Captain O. M. Carter,
Corps of Engineers, U. S. A.
Savannah, Ga.

"Sir:

I have the honor to acknowledge the receipt of your communication, by Mr. Blair of counsel, of this date, requesting me to notify you when I propose to make a further examination of your private papers, now in my possession, and that such examination or examinations be made only in your presence or that of your counsel, and to reply as follows: It will not be practicable for me to take the action you request for the reason that the papers which were withdrawn by me in the presence of yourself and counsel for consideration, can only be examined and considered from time to time whenever my other duties of preparation of the pending case against you will permit. I cannot, therefore, comply with either of your requests.

Very respectfully,

THOMAS F. BARR,
Asst. Judge-Adv. Gen. U. S. A. Judge-Advocate,
G. C. M."

And I will state further, in making that examination, in the presence of counsel, I most carefully abstained from peering into any purely private and personal correspondence; I passed to the counsel for the accused papers for placing in a separate box, that in my judgment had no bearing upon this investigation, that could not become material and relevant in

this investigation. Nothing was withdrawn by me which, in my judgment, might not possibly have a bearing upon this case. They were placed in a box, locked in the presence of the accused and his counsel, and have never since been unlocked by any person but myself. And further, that within a week, that for fully a week, the accused has had in his possession an order from the Secretary of War, giving to him possession of the box which contained what I thought was purely personal to himself.

* * * * *

1587 This is a letter which was yesterday identified by Col. Gillespie: (Reading)

“Savannah, Ga., September 21, 1897.

“Col. G. L. Gillespie,

Major C. W. Raymond,

Major H. M. Adams.

Corps of Engineers.

“Sirs:

As soon as possible, after being advised of the charges against me, upon which the present examination is based, I obtained permission from the Chief of Engineers to return to Savannah, for the purpose of preparing for my defense. Prior to my departure I had sent to Savannah by Mr. Connolly a letter addressed to Mr. Sterly, my former Chief Clerk, and a man in whom I had unbounded confidence, and who was entrusted with many of my personal matters, requesting him to deliver to Mr. Connolly for me the key to my residence and also the key to a certain room in the Southern Bank Building, in which I had left wine cases, books, private and personal notes, letters and papers, and also private papers belonging to my father-in-law Mr. Westcott, whose business I have been transacting. “It was reported to me that Mr. Sterly delivered to Mr. Connolly the key to my residence, but declined to deliver to him the key to the room or to deliver the cases or their contents. I left New York on the 16th, and on the 17th, en route I wired the Chief of Engineers requesting permission to have access to the public records and to my private and professional notes and papers, in the presence of Capt. Gillette. On my arrival at Savannah on the evening of the 17th, I found two 1588 telegrams awaiting me, both from the Chief of Engineers, the one granting my request, the second revoking this permission, the revocation being based, as I believe, upon representations made from Savannah. I have thus been deprived of the right to see my private papers or to take posses-

sion of my own property. * * * I have such confidence in the members of the Examining Board that I unreservedly place myself in your hands, and shall be glad to deliver to you the keys to the only case which I believe is locked, and I give you full authority privately to open it and examine all of its contents. If there be things therein which, in your judgment, need explanation, please request such, but as to those things of a private character, referred to herein, and which have no relation to my official duties, I respectfully request that they be turned over to me and that their contents be treated by you as confidential.

Very respectfully,

O. M. CARTER,
Capt. Corps of Engrs."

Judge-Advocate: I here omitted two or three paragraphs, a copy of the letter will be attached to the record and this letter will be submitted to the members of the Court for their inspection.

* * * * *

1593 The President: Counsel for the accused wish to be heard further?

Mr. Blair: No, sir.

The President: We will take that letter with us, if you please. (Here the letter is handed to the President)

Here at 1.40 o'clock P. M., the Court retires to an adjoining room for consultation, and the Court is closed. After which at 2.10 o'clock, P. M. the Court returning, all the members of the Court being present, and also the Judge-Advocate, the accused, his counsel, and the reporter, G. T. Cann, being present, the Court was opened, and the President announced:—

The President: The Court has decided not to sustain
1594 the objection.

Direct Examination Continued.

Questions by the Judge Advocate:

Q. How is that signed? (Handing witness the letter)

A. B. D. G.

Q. You are familiar with that "B. D. G."?

A. I have seen it many times.

Q. What in your judgment, does that stand for?

A. B. D. Greene, I suppose.

Judge-Advocate: B. D. Greene. I read this letter now:

"Hoffman House, Broadway, Madison Square.

New York, Oct. 25, 1888.

"Dear Carter:

Yours at hand. Could not do dredging as cheap as you say and work only 4 months in 2 years. Nobody can afford it. Craighill pays 16¢ at Richmond, where a dredge can be taken away to Phila. or N. Y. at small expense when the work is done. The block of marble is at B. S. & E's, and has been for two weeks. Mr. See says he can do nothing with a block of such irregular shape and quality. It is a hard looking specimen to send to a marble man. It has disgusted Mr. S. and he don't seem to care to have anything more to do with it. As John goes to Chili on Thursday, Nov. 1st, we can't very well handle the marble, even if it were good, which I doubt. About 6 mos. from now \$6,000,000 harbor work is coming up in Chile, and we have assurance of our ability to get it. We are now looking for a first class man to go with John as an expert. The first thing we shall tackle will be a tunnel 3,000 feet long and we can have as many millions R. R. work proper as we choose to take probably we shall go for about \$4,000,000 contract; but John can tell better when 1595 he gets there. We have the preference, and John goes down on the ship with the general manager of the syndicate; so you see our show seems good. Now, I want to do up Chas'n, Savh., and Fernandina by July 18th, next, so that we can go down by that time, if not before. "This, I think, is the chance of our lives. Now let that dredging, so John and I can sell our stock, and hurry up the two works all you can, so we can get going by New Years. This is important. This Chile business is business, and I think within 90 days we will be into that tunnel. What do you think of this? Of course, the scheme which I outline when I first wrote you about Chile a month or more ago will be carried out, and a year hence will find us both struggling with the Spanish lingo. Of course, you don't want to say anything now to anybody about John's going away. He hates to go just before election, but it can't be helped. We are negotiating with O'Brien & Clark for their best Engineer to go down. Shall have to pay him \$500 a month and expenses, but we must have a good man. He went up and fixed the West Point tunnel the other day for the West Shore R. R.

Put that dredging through on the basis of working only a

part of every other year, and no outside work, and you will see it is worth 18¢ to 19¢.

Yours truly,

B. D. G.

My address is 2 E. 15—St."

Here, at 2.15 o'clock P. M., Reporter G. T. Cann, was relieved by Reporter, W. O. Tarver.

1596 At this point, 2.15 p. m., in the proceedings of the day, Reporter Geo. T. Cann was relieved by Reporter W. O. Tarver.

Judge-Advocate: I do not find on the letter book of the accused the letter to which that was a response, within a reasonable time. The last letter copied in the book is a letter—

Mr. Blair: I think you will find the letter to which that one of Capt. Greene's is a response copied in the official letter book in the office.

Judge-Advocate: I propose to read this one.

* * * * *

1597 Judge-Advocate: I call the attention of the Court to the fact that the index under the letter "G" shows "B. D. Greene, 334, 415, 434 and 518."

Mr. Rose: I would like to call the attention of the Court at the same time to the fact that "518" is not in the same hand-writing, and was not put in by Capt. Carter, as I am informed.

Judge-Advocate: I offer the letter, and ask the Court's judgment upon it in relation to this case.

The Court: The Court will retire.

The members of the Court then, at 2.30 p. m. withdrew to an adjoining room, and the Court was closed. After which, at 2.50, p. m, the members of the Court resuming their seats, the Court was opened, and the President, in the presence of the accused, his counsel, the Judge-Advocate and the Reporter, announced:

The Court has decided not to sustain the objection.

1598 Judge-Advocate: I do not know that I shall have time to read that letter.

The Court: That will necessitate an adjournment then.

A Member: I move that we adjourn until tomorrow morning at eleven o'clock.

The Court: If there are no objections, the Court will stand adjourned until tomorrow morning at 11.00 o'clock a. m.

(Court adjourned at 2.50 p. m.)

IN THE
Supreme Court of the United States

No.

THE UNITED STATES OF AMERICA,

Appellants,

vs.

OBERLIN M. CARTER, LORENZO D. CARTER, I. STAN-
TON CARTER, HORACE G. STONE, NATHANIEL
C. SEARS, THE INTERNATIONAL AUDIT COM-
PANY, ROBERT NELSON, AND LYMAN E.
COOLEY,

Appellees.

Appeal from the Circuit Court of Appeals of the United States for
the Seventh Circuit.

1599. United States Court Room,
Savannah, Georgia,

February 16, 1898.

Court met pursuant to its adjournment of yesterday at eleven o'clock a. m.

Present:

All the members of the Court and the Judge-Advocate.
The accused, his Counsel and the Reporter, W. O. Tarver, were also present.

The President: Court will come to order.

GEORGE L. GILLESPIE, a witness for the prosecution, previously sworn, resumed the stand.

Judge-Advocate: I read a letter which was ruled upon by the Court as admissible yesterday:

"September 23 8.

"Dear Captain:

"There may be some delay in getting out specifications for works, as everything goes to Craighill who is away a great part of the time. Will send as soon as they are out. I send you a clipping about the Ashland Bridge. A paving Co. has just been organized here that I can get 50 shares in."

Judge-Advocate: It then goes on to name the shareholders, which I think immaterial, unless Counsel desire it. (Continues to read letter as follows:)

"The scheme is this: The Vulcanite Co., of N. J., controls patents for sheet pavement similar, and in fact exactly the same as the new vulcanite or coal tar distillate pavement used in Washington. This Company in Savannah gets from this Vulcanite Co. the exclusive right to lay said pavement in S. C., N. C., Ga., Fla., Ala., Miss., Tenn., La. and Tex. The Vulcanite Co. agrees further to sell to the Savannah Co.

asphalt and other materials at cost and to furnish expert 1600 labor when wanted at cost. The Savannah Co. gives the Vulcanite Co. 50 shares of its stock and a royalty of 15¢ per square yard for each yard of pavement laid. The Savannah Co. already have a contract here for 48,000 square yards of paving, and will get another one soon (about January) for 50,000 more. At the present prices there is a profit in the 48,000 yards of about \$21,000 after paying royalty &c.,—or within \$4,000 of enough to pay back the original amount put in. I think it is a good thing, but don't like the clause agreeing to buy asphalt &c. from the Vulcanite Co. at cost, as that is too indefinite and may increase so as to eventually eat up the profits of the local Company. The contract with the City of Savannah is at \$2.35 per yard. A clause in the agreement prohibits calling for more than fifty per cent. of stock subscribed. I have nothing to invest just now, as my money is tied up at home in Ohio, but I thought you and John might like to take \$1250 or \$2500 worth of stock (25 or 50 shares). The money is to be paid in at once,—a call has already been made, and work begun by October 15th to Nov. 1st.

“A contract for stone has been made with the Central Railroad at \$1.70 per ton of 2240 crushed delivered in City. I shall look into the matter fully, as I really think there is a good deal of money in it for the amount invested. At any rate the Company is composed of good men who are in good faith. I only have a few days to decide, as the Company must have all its money paid in soon and if I don't take the stock it has been offered to men here. Let me know if you wish to venture in it.

“By the way I think you can get the C. R. R. to agree to deliver from 500 to 1,000 tons granite at their wharves daily at from \$1.50 to \$1.70 per ton of 2240 lbs.—perhaps less. I had the block of marble shipped to Evans and wrote him to send it up to Batterson, Lee & Eisele.

“I sincerely hope the Chili scheme is not a paper one only. It looks too bright to last. Fever is awful in Florida and I fear it is in Fernda. Backman, the dentist, wanted me 1601 to speak to you about his rooms. He wants you to take the ones you used to have once more. Don't fail to let me know definitely about your wishes in the matter of the Paving Co., as I must decide and pay in the boodle if I come

in. It is hot and sultry here, but I know you are having charming weather.

"With kind regards,

"Yours truly,

"O. M. CARTER."

A copy of the letter of Sept. 21, 1897, of the accused to the Board of Officers, which I read to the Court yesterday, and a part of which I omitted to read, will be attached to the record marked Exhibit No. 279.

Direct Examination of the Witness by the Judge-Advocate.

Q. Do you know John F. Gaynor?

A. I do.

Q. Did he appear before the Board of Officers, of which you were President, as a witness?

A. He did at one of the sessions in New York City.

Q. Did the question of the ownership of the Empire Construction Co. and the Atlantic Contracting Co. come up for consideration in his examination?

A. He was examined on the subject of both companies and their organization.

Q. What did he state in relation to their relation to each other?

Mr. Blair: May it please the Court, I object. Col. Gaynor is living. He can be called and put on his oath, and he can then be cross examined by the accused. The statement which Col. Gaynor made, or is supposed to have made, before this Board was not under oath, and we submit that it cannot properly bind this accused in any way.

Judge-Advocate: I submit that the declaration of any of these persons named in the indictment which you are passing upon is competent evidence,—declaration made by them 1602 either under oath or without oath; that a prima facie conspiracy has been established before the Court here involving John F. Gaynor, and any declaration he may have made subsequent to that time is admissible and competent evidence.

The Court: The Court will retire.

The members of the Court then, at 11.11 a. m., withdrew to an adjoining room, and the Court was closed; after which,

at 11.15 a. m., the members of the Court resuming their seats, the Court was opened, and the President, in the presence of the accused, his counsel and the reporter, announced:

The objection of the accused is not sustained.

Judge-Advocate: (Addressing witness) Please answer the question.

A. I asked him if yhe knew of the existence of the Empire Construction Co., and he said he did; that it was organized to do work in Orange, N. J.; that it performed the contract there under the general conduct of Mr. Newton, who I think he said was General Manager, and one of the stockholders, and that, on the completion of that contract, the Company went out of existence. He was next asked if the membership of the Atlantic Constructing Co. was not the same as that of the Empire Construction Co. with a different name. He said, practically in terms, that Newton was not a member of the Atlantic Constructing Co. He was next asked why the Empire Construction Co. went out of existence. His statement was that, in the execution of their contract in Orange, N. J., they got into embarrassments which resulted in law suits, and, in fact, they were in bad odor in the community, and found it advisable to go out of existence as soon as possible.

Q. As to the ownership other than Mr. Newton?

A. His testimony was to the effect that he was an owner, but he gave no other names.

Q. Now, as to the relation or succession of the Atlantic Contracting Company to the Empire Construction Company?

A. He was asked a question as to the interval of time between the death of one company and the birth of the other. He replied, in terms, that he didn't know; that the information would be found in the Savannah office, as they had to produce their papers of incorporation of the new company.

Q. That is of the Atlantic Contracting Co.?

A. The Atlantic Contracting Co.

Q. Was any other witness, before your Board, examined as to ownership in the two companies?

A. I think not.

Cross-Examination by Mr. Blair.

Q. You testified yesterday, in substance, that when the Board met here, you went with Capt. Gillette and Capt. Carter to a room in the Southern Bank, where was stored this file case containing these papers and other matters belonging to Capt. Carter; you stated, I believe, that there were boxes numbered from B1 to B36,—is that right?

A. Yes, sir.

Q. Was there anything else besides these boxes and the file case in question in that room?

A. There were three or four boxes marked W, which Capt. Carter said was wine; one box marked G, which he said contained a gun, and one box marked T, which contained a tent. Besides these boxes, there was nothing but the file case.

Q. You said there was a custodian there; who was it, do you know?

A. I don't know his name.

Q. An employe of the Engineer Office under Captain Gillette?

A. Said to be; yes, sir.

Q. He took his orders from Capt. Gillette at that time, didn't he?

A. Yes, sir.

Q. You said that box was uncased, that the crate
1604 was taken off the box before it was moved out of the room in the Southern Bank Building?

A. I found it contained in an open crate.

Q. By whom was that crate taken off?

A. By my orders, by this janitor and a colored man.

Q. By this custodian who was there?

A. Yes; a white man and a colored man.

Q. Then you stated that, on your way over, Capt. Carter gave you the key to the box,—to the crate?

A. Yes, sir.

Q. He had previously given you a letter which was read here yesterday, had he not?

A. He gave me that letter immediately on the organization of the Board.

Q. That was 10.00 o'clock in the morning of the 21st of September, 1897, was it not?—the organization of the Board,—or thereabouts.

A. No, sir; somewhere about noon; I think between twelve and one o'clock.

Q. In what room did you organize?

A. In the private office of Capt. Gillette.

Q. And then you proceeded to the place where the boxes and the crate were, and prior to leaving the room of organization that morning, or that noon, you received the letter in question from Capt. Carter?

A. I had better state the circumstances under which that letter was delivered.

Q. No.

A. If you want to find out the date—

Q. If you please, I would like to know whether you received that letter prior to going over to the room where the crate and boxes were?

A. The letter was received immediately after the organization of the Board.

1605 Q. And that was prior to your going over to the room in the Southern Bank Building where the articles in question were?

A. Yes, sir; immediately prior.

Q. The Judge Advocate stated yesterday that you received those papers in the crate by virtue of the letter which Capt. Carter had delivered to you?

Judge-Advocate: I don't think I so stated, Mr. Blair.

Q. (Mr. Blair continuing) By what authority then did you take and examine these papers in the crate,—in the file case?

A. A few days before I left New York for Savannah,—I think on the evening of the 17th,—I received a telegram from the Chief of Engineers, notifying me that Capt. Gillette had been directed to turn this property over to the Board on its arrival in Savannah.

Q. Have you that telegram?

A. It is in New York City, unless it is here. I didn't expect to appear here, consequently I brought no papers with me.

Q. Had you ever seen a copy of the telegram sent to Capt. Gillette in that behalf?

A. I have not.

Q. Did you bring the telegram which you received from the Chief of Engineers, as you have stated, down with you on the 21st of September?

A. I did.

Q. It was here?

Q. It was here?

Q. Did you exhibit that to Capt. Carter?

A. I have no remembrance of having done so.

Q. Did you make any answer in writing to the letter of Capt. Carter to you authorizing you to examine the papers?

A. I did not.

Q. No reply in writing?

A. I think not.

1606 Q. What became of the articles that were in that room, so far as you know?

A. The file case?

Q. All of the articles which you saw in that room in the custody or charge of the custodian when you entered?

A. Let me understand you; the articles that were left in the room or the file case?

Q. All the articles left in that room, so far as you know?

A. Capt. Carter gave me a supposed index of the contents of these boxes marked B-1 to B-36, and, on examination, I found it an incomplete index, and, on the statement of the man who is said to have packed these boxes,—I took his word for it,—that they contained nothing but official books, they were examined or two of them were and found to contain printed books, and I concluded that it was a matter which I could turn over to Capt. Carter, which I did; what he did with it, I don't know.

Q. B-1 to B-36 you turned over to Capt. Carter?

A. I don't know that I did, consecutively; Nos. 29 and 31 the index indicated might also contain some matter of information,—I do not know what boxes; I don't recall the numbers,—but I had these two boxes brought over to the office and opened, and the articles taken out, and they were found not to contain what we supposed. There were only two of the boxes of that series that were opened, and the lids were put back on the boxes and screwed down, and the boxes returned.

Q. What did those boxes contain?

A. So far as I know, nothing but printed books.

Q. In reference to the cases marked W?

A. They were not opened at all.

Q. They were turned back to Capt. Carter?

A. They were left where they were, and turned over to him.

Q. And the other case marked E, if you know?

A. I don't know of any such.

Q. T and G.?

1607 A. T and G were left in the same condition as the other boxes of B.

Q. Then you had a file case, as you say, over to the Engineer Office. Who went with you into that room?

A. Which room?

Q. The Engineer's Office?

A. Major Raymond and myself, and Capt. Carter I think,—I am not sure,—I don't know of any one else.

Q. Major Adams?

A. Major Adams did not at that time; he was not present.

Q. Who was present when the file case was opened?

A. The Board only; Major Adams, Major Raymond and myself.

Q. Are you positive of that?

A. I think I am.

Q. Well, immediately after the file case was opened, who were present besides the three named?

A. I don't remember.

Q. Within say a half an hour from the time the file case was opened, is it not true that there were present in the room, besides the three members of the Board, Capt. Carter, Capt. Gillette, and the clerk Sterly?

A. Capt. Gillette made a statement at some time, I cannot remember now when,—that that file case contained certain papers that belonged to the office file. I told him then if that was true, he should go into his office and write a statement to that effect to me, which he did, and whether Sterly came in and brought that paper or not, I do not remember, but Sterly was never there at any time during the whole time that case was in the office; he had nothing whatever to do with it.

Q. Was Capt. Carter in that room at any time, just at the opening of the file case, or immediately thereafter?

A. I don't think he was. There was no reason why he should be there, and I don't think he was there.

Q. Is not this about true: that at one time,—at some
1608 time,—say just at the opening of the file case, or immediately thereafter, some statement was made by Sterly, or by Capt. Gillette to Sterly, in the presence of Capt. Carter, that certain evidence was in that file case throwing light upon this case, and then is it not true that Sterly was asked in what that evidence was contained, and he took from the file case certain letter press books?

A. Sterly never approached the file case the whole time it was open.

Q. Did Sterly, under any circumstances similar to those I have detailed, point out any portion of the contents of that file case to the members of the Board?

A. I think he identified one book which had no number to it.

Q. And what was that book, if you remember?

A. I think that, after the books were taken out, that there was one book which he said was marked B,—I am not certain, but I think it was,—and that book was identified as containing certain information essential to the case.

Q. How soon was that after the file case was opened?

A. That I do not remember.

Q. Who was present when Sterly identified this book?

A. I know of no one except the members of the Board, and Capt. Carter possibly.

Q. Capt. Gillette?

A. He may have been there; he was not there all the time.

Q. This, of course, was in the room where the file case was open?

A. Yes, sir.

Q. How long did Sterly remain in that room?

A. A very short while; not two minutes, I think.

Q. Was he called in for the purpose of identifying any of these books and papers, or was this identification made while he remained in there from the time the case was opened?

A. As I remember, he was simply called in to identify the particular book to which I referred when I asked Capt. Gillette to make his statement in writing. That was the only time 1609 he was called in to identify any paper contained in that case.

Q. Was that after Capt. Gillette made his statement in writing that certain books in there properly belonged to the official files of the Engineer Office?

A. To my remembrance, it was.

Q. When, with respect to the moment the file case was opened,—when did Capt. Gillette make that written statement?

A. My impression was that Capt. Gillette made that statement before the file case was opened.

Q. Did he advise you at the time he made that state-

ment how he became possessed of the information of the character indicated?

A. He simply, as I remember it, stated to me that Sterly had told him. That is all I remember about it.

Q. Did he state anything more that Sterly had told him with reference to the contents of the file case?

A. I don't remember that he did.

Q. Only that there were files in there that properly belonged to the Engineer's Office?

A. And a private memorandum with reference to matters that he and Capt. Carter alone knew.

Q. A private memorandum with reference to Capt. Carter's affairs?

A. Yes, sir.

Q. Capt. Gillette, then, as I understand you, told you that Sterly had given him that information?

A. Yes, sir.

Q. Now, at that time, did Capt. Gillette, in writing, indicate in addition to the official matter, or matter properly belonging to the office of the Engineer of this District,—did he in that writing indicate to you that there were other matters tending, perhaps, to implicate Capt. Carter?

A. I do not remember that he did.

Q. Was Sterly at that time asked to indicate the other matter non-official?

1610 A. What other matter?

Q. Supposed to be in that file case?

A. That was only a general statement from Sterly to Capt. Gillette that that case contained matters, and, on that statement, I got the particular letter.

Q. Did Sterly when he came in and picked out the book B,—did he at that time indicate any of the other matter bearing upon Capt. Carter's case?

A. He didn't pick out any book; he didn't put his hand on any book; he only indicated a book, and when that was over, he was dismissed; that was the only service he was there for.

Q. What became of the contents of that file case, I mean after you gentlemen had examined it down here, and completed your labors here, what became of the contents of that file case?

A. The two boxes were brought over from this room,—empty boxes—

Q. Room in the Southern Bank Building?

A. Southern Bank Building.—Which contained nothing at all; apparently empty boxes.

Q. B-29 and 31?

A. I think those are the numbers. They were brought over, and, under the direct supervision of Maj. Raymond and myself, all that was in that file case was packed absolutely, and Capt. Carter was notified.

Q. Who did the manual labor in packing those things from the file case in the two boxes?

A. A colored man.

Q. Was anyone else present besides you three gentlemen?

A. No, sir.

Q. Now is that true of all the contents of the file case?

A. Yes, sir; everything.

Q. Didn't you turn back some of the contents of the file case to Capt. Carter?

A. No, sir; not at that time.

1611 Q. Were they sealed then your presence?

A. They were screwed down and sealed with wax, and sealed in such a way that they could not be opened again without our knowledge.

Q. Then what became of the two boxes?

A. They were sent by express to my address in New York City.

Q. Your office?

A. My own office in New York City.

Q. In the Army Building, New York.

A. Yes, sir.

Q. The Engineer office there?

A. Yes, sir.

Q. Now, when were those boxes next opened?

A. I could not say definitely.

Q. Do you remember the circumstance of their being opened, without attempting to give the date?

A. They were opened by the Board.

Q. Some servant performing the manual labor of opening them?

A. One of the clerks in Maj. Adams' office.

Q. Go back a moment; while the papers were here in Savannah, did Capt. Carter have access to them at any time?

A. He had perfect liberty to examine them in the presence of the Board, and was so notified repeatedly.

Q. And at no other time, of course?

A. No other time, because they were in my custody.

Q. It is true, is it not, that Capt. Carter was excluded from the examination begun by you on the 21st of September?

A. Excluded.

Q. Did you not ask him to retire after the case was opened, or about that time?

A. I did.

Q. When did you next invite him into the room, or give him permission to examine these private papers?

1612 A. I think the next day when the session of the Board began, with a stenographer. He was given permission to examine them any time he chose in the beginning of the session.

Q. Was that in the session of the Board?

A. In session of the Board.

Q. In the presence of the other members?

A. In the presence of the other members.

Q. Now, coming back to New York, you say you remember the circumstance of the boxes being opened there?

A. I do not remember the particular circumstances; they were under my custody, and we were at perfect liberty to open them at any time.

Q. You saw them opened?

A. Yes, sir.

Q. The seals were broken on your presence?

A. Yes, sir.

Q. Then you made a further examination,—I mean the members of the Board?

A. Yes, sir.

Q. Now, in the examinations in New York City, were all of the examinations that were made, made in the presence of all the members of the Board?

A. No; that was not possible, because Major Adams and myself were examining these matters while Maj. Raymond was away. Maj. Raymond's station was in Philadelphia, and he was necessarily away, but the examination was made with no other persons present except Capt. Carter.

Q. About what time of the day were the papers shipped from Savannah to New York, if you remember, approximately?

A. They were shipped Friday night. We left on Saturday. Friday night, September 24th.

Q. They were shipped on the 24th, Friday, and 1613 probably were not opened until Monday?

A. I could not tell when they were opened. I left here Saturday noon, and reached New York Sunday night, and was in my office Monday.

Q. They were not opened before Monday then?

A. No, sir.

Q. Capt. Carter was not notified of your intention to ship them away from here?

A. It was not necessary to notify him.

Q. As a matter of fact, he was not, was he?

A. I met him in the lobby of the hotel Saturday morning and I told him I had shipped them the night before, and those boxes contained absolutely all that the file case contained.

Q. Then he was not notified Friday that they were to be shipped?

A. No, he was not; the property was not in his hands.

Q. You say in New York, at times examinations were made when Maj. Raymond was not present; who else was present at any of those examinations besides Maj. Adams and yourself?

A. No one, unless Capt. Carter himself.

Q. Then you completed your report about the 21st, did you not,—No; about the 11th of November, was it not?

A. I could not tell you the date; it was sometime in October or November.

Q. When you completed your report, where were the boxes?

A. In the same place where they had been from the beginning; in Major Adams' office.

Q. That is next to your office?

A. Yes, sir; on the same floor.

Q. And how long did they remain there?

A. Only three or four days after the report was submitted.

Q. Where did they go then?

A. They had been sealed previously; as soon as the 1614 Board made its report, the boxes were sealed again, and kept in store in Major Adams' office, and four or five days subsequently, they were turned over in that condition to Col. Clous.

Q. You testified yesterday that a copy was made of a

letter signed B. D. Greene, or B. D. G., and you identified that letter, that being a letter sent supposedly by Capt. Greene to Capt. Carter; that is right, is it not?

A. Yes, sir.

Q. You identified that letter as having been written,—the letter of which yours was a copy,—as having been written by B. D. Green because the index of the case showed that it was B. D. Greene,—Benjamin D. Greene,—I think that was the exact wording; will you find the index? This (handing witness file of papers) is the file referred to, I believe?

A. Possibly I may have been mistaken; that was my testimony I know. I do not see any index there.

Q. There is no index?

A. I do not see any there.

Q. It is arranged alphabetically, with leaves stamped with the various letters of the alphabet?

A. Yes, sir.

Q. The letter which was read this morning, beginning on page 518 of this letter book, and which you identified yesterday as having been written by Capt. Carter, is the copy which you have in your hand, is it not?

A. This is a letter press copy of the original letter.

Q. To whom is that addressed?

A. It has "Dear Captain" on it.

Q. No other name of the addressee?

A. Not in this place.

Q. Now, turn to the index, kindly, will you; under the head of "G", you find on that page, "Greene, B. D."; that is right, is it not?

1615 A. Yes, sir.

Q. And opposite that, you find the figures, "333, 415, 434" in ink?

A. Yes, sir.

Q. And the figures "518" in pencil?

A. That is true.

Q. Who wrote the figures "518"?

A. I have no knowledge at this time; I may have done it myself.

Q. Is it not true that you did do it?

A. I could not swear to that.

Q. They are not in the same handwriting as the figures in ink, are they?

A. No, sir; not at all.

Q. And you think you may have done so yourself?

A. I may have done so.

Q. The copy of the letter, the original of which was read in evidence yesterday, which was signed with the initials "B. D. G." which you identified,—the copy you identified?

A. Yes, sir.

Q. You did not say how you knew it to be a copy,—a true copy?

A. Why could I testify that it was a copy?

Q. Yes; how do you know it is a true copy?

A. Simply because I had read the original a number of times, and in reading that, I knew they were practically the same.

Q. Who made the copy, if you know?

A. I would have to look at that first if it is here. (Counsel handed witness the paper) I think that was made by my own typewriter

Q. In your own office?

A. Yes, sir.

Q. When?

A. That I could not say; sometime during the investigation, but I could not say when.

Q. Before the report was made up?

A. Yes, sir.

1616 Q. What other letters, if any, were copied at that time?

A. Quite a number.

Q. Did you compare them with the type-writer?

A. Not individually.

Q. You did not personally type-write the letter?

A. I did not.

Q. Nor any of them?

A. No.

Q. Nor did Maj. Raymond nor did Maj. Adams?

A. No.

Q. They were done by a clerk or clerks?

A. Yes, sir.

Q. Did you compare them,—you or any member of the Board, to your knowledge,—compare the copies with the original at or about the time they were made?

A. No, sir.

Q. So that your testimony with respect to their being,—any one of them being a true copy, would be merely from your recollection of the original, having read that, and then at a subsequent time read the copy?

A. And my confidence in the type-writer himself.

Q. You said there were a number of others; what others were copied as nearly as you can recollect,—all the Greene letters?

A. I think so.

Q. And were the letters to Capt. Greene by Capt. Carter copied out of the letter press copy books?

A. I think they were.

Q. About how many, in all, of those copies were made, if you can remember?

A. I think not to exceed ten or twelve.

Q. In whose possession did those copies remain after they were made?

A. Kept in the safe by Maj. Adams.

Q. Until what time?

1617 A. I cannot say definitely; it was after the report was made.

Q. How long after the report?

A. That I could not say.

Q. Is it not true that they remained there until quite recently?

A. Probably they did; I cannot say definitely; I have no recollection of that point at all.

Q. You consulted yesterday a memorandum book, and testified from the entries made therein; what is that memorandum book?

A. It is a memorandum book of the Division Engineer of the Northeast Division; I am the Division Engineer.

Q. It must have some reference to these matters?

A. No; it is a book I take with me as Division Engineer of my Division, and I record everything I see in respect to the works under the charge of officers who constitute my Division, and coming down here, I used the memorandum book to record things, as they occurred.

Q. And in that, you have a memorandum concerning some of these paper

A. Yes, sir; up to the time the Board closed.

Q. A memorandum of the contents of the file case?

A. I didn't take that; it was simply a history of the Board's operations during the time it was here.

Q. I noticed you look at it before you identified either one of these books or the letter of Capt. Greene?

A. Yes, sir.

Q. What memorandum did you consult then?

A. In the examination of these papers, such letters as seemed pertinent to our inquiry were noted in my book,—the number of the book and the page put down.

Q. That you retained with you?

A. That I retained,—Yes, sir.

Q. After you completed the examination of the papers in New York, or during your examination of the papers in New York, did you make any disposition of any of the papers; I mean, did you return any to Capt. Carter?

A. I did.

Q. By authority of the Secretary of War?

A. At the request of Capt. Carter himself.

Q. And you separated, then, some of these papers?

A. They were in a separate paper of themselves; I only transferred one package of papers.

Q. There were a great many packages of papers?

A. This was one particular package of papers which he said contained information with regard to a special subject, which I had never opened nor any member of the Board.

Q. Letters of condolence?

A. He said they were.

Q. And that, and that alone, you returned?

A. Yes, sir.

Q. Then you sealed the boxes, and subsequently they passed into the possession of Col. Clous, still sealed?

A. Yes, sir.

Q. I would like to ask this question: During the time those papers were in New York in your office, or the office of Maj. Adams, did any person have access to the boxes, or their contents, or either of them, save the three members of the Board and the typewriters whom you have mentioned, and Capt. Carter?

A. The typewriters only saw the papers that were submitted to them. The contents of the boxes were not known to anybody except the Board; no one had access to the boxes at all, and the only case in which any matter, to my knowledge, was given over to any other person, was when it became necessary for me to identify Capt. Carter's presence at certain points outside of his District; I turned a few of those small diary books over to Capt. Gillette, which contained the dates that Capt. Carter was at certain points.

Q. Did you examine those diaries sufficiently to know that that was all they contained?

A. I ran through them, and it seemed to me that it 1619 was nothing but a diary—

Q. Of what year?

A. I think 1893, 1894, 1895 and 1896; but I think I only gave him 1893 or 1894 of them; he hadn't the whole series; it was only for one particular year, and my recollection now is that it was the year 1895.

Q. Did you hand him anything else to look at?

A. Nothing at all; he never saw any other paper, to my knowledge.

Q. This is the book B, which you spoke of as having been pointed out by Sterly?

A. Yes, sir; this is the book.

Q. Turn to page 10, if you please; at the bottom of the page you will find, "Copied here by direction of Capt. C,—Why?" in blue pencil; do you know the handwriting there?

A. I do not know that I ever saw that; don't think I ever saw that.

Q. Will you not tax your memory, and say whether or not that was not called to your attention, that letter, as being the letter which made the book which you hold in your hand an official letter book and as justifying Sterly's statement,—the first part of his statement, in which he said there were records in it which belonged to this office,—records among these private papers?

A. No, sir; I do not remember anything of the kind.

Q. Then you never saw the blue pencil writing on that page?

A. I don't think that I did.

Q. You referred awhile ago to having heard certain statements made by John F. Gaynor before the Board of Engineers; was there a stenographer present at that time?

A. There was.

Q. Taking minutes of the statements?

A. Yes, sir.

Q. Mr. Gaynor was not sworn, was he?

A. No, sir.

Q. You had no power to administer an oath?

A. No, sir.

1620 Q. Do you remember such a question as this: "Do you know anything about the Empire Construction Company?" to which Mr. Gaynor answered, "Oh, yes". Do you remember such a question and such an answer by Mr. Gaynor, before that Board?

A. I remember it.

Q. Do you remember a question like this: "When was that organized, before or after the Atlantic Contracting Company?" to which answer was made, "Long before. We done some work over in Orange, the Empire Construction Company." Do you remember that?

A. I believe that is what was said, to the best of my belief.

Q. Again, "Did you ever do any other work except in Orange? A. that is the only place we worked, I think"; is that correct?

A. I think so.

Q. Again: "Q. Did you ever get your stock in it? A. No; it never was issued, I don't think",—is that right?

A. I think so.

Q. Again: "Q. Who had charge of the stock book? A. My brother, Will Gaynor, had it. He went there and worked at that and he had all the papers, and I had forgotten all about it when I heard that it turned up in this investigation afterwards." Do you remember that question and answer?

A. To the best of my knowledge.

Q. "What was the cause of the extinction of the Company? A. Because we got through, finished up what we went there to do in Orange". Was that the question and answer?

A. Yes, sir.

Q. Do you remember this question: "It had about the same membership as the Atlantic Contracting Company apparently? A. No. Newton was to have one-third of that —John Newton's share was to be one-third. I don't remember exactly, but he had about one-third of it." Do you remember that question and answer?

A. Yes; referring to the Empire Construction Company.

Q. Then do you remember this question: "With 1621 that exception the organization of the Atlantic Contracting Company seems to have been something of a reorganization of the Empire Construction Company, the same men and about the same shares except in that one instance. Do you know any reason why you changed the name, why you reorganized or that new company was organized?

A. I don't know why we did it; only we were not in very good graces in Orange. We had a lot of lawsuits and we wanted to get that company out of existence as soon as we could. We killed horses and men and had everybody pounding us and

we wanted to get out of it." Do you remember that question and answer?

A. I believe that is what he said.

Q. "Q. About how long an interval elapsed between the death and the birth of the other? A. I don't know. You can find out. I don't know about that. You can see the dates because you have the papers in your office when that other was organized; we had to send them all down to your office, every year when we bid on the work." Do you remember that question and answer?

A. Practically; yes, sir.

Q. Do you remember this question: "What percentage of the stock of that Company did B. D. Greene own? A. He owns one-half." Do you remember that question and answer?

A. Yes, sir.

Q. "Q. And you the other half?" to which answer was made: "Yes, sir, with the exception of these two little amounts of either five or three shares that my brothers William and Edward held for the purpose or organization". Do you remember that question and answer?

A. Yes, sir.

Q. "Q. Who is the treasurer of the Company in fact? A. William Gaynor is the Treasurer." Do you remember that?

A. Yes, sir.

Q. "Q. In name, but who is otherwise in fact? A. The fact of it is William is Treasurer and he hands over the 1622 vouchers to Capt. Greene or myself just as it happens to be. We are in fact the Treasurers". Do you remember that question and answer?

A. Practically so.

Q. Do you remember this question by Capt. Carter, at the bottom of page 30: "If anybody besides yourself and Capt. Greene had had any interest whatever in any way in the Atlantic Contracting Company, would you have known of it? A. I should think so; certainly I would." Do you remember that question and answer?

A. Yes, sir.

Q. "Q. I want to ask you this, whether directly or indirectly to me or to anyone for me in any way whatever, has anything either from The Atlantic Contracting Company or anything in which you have been engaged ever been given

to me? A. No, sir. I can answer that positively." Do you remember that question and answer?

A. To the best of my knowledge, that was his reply.

Q. You stated yesterday that, among the papers in the file case,—that there were papers in the file case partly official, purely so, and partly private; now, what official papers did you find in there,—purely official papers?

A. Quite a number of them. I don't remember now, but there were papers from the Chief of Engineers addressed to him officially and signed officially.

Q. Relating to work in this district?

A. Relating to work under his charge.

Q. Many of those letters?

A. I think that each one of those books contains quite a number of them,—ten or fifteen I think; I think I can identify a number.

Q. (handing witness file of papers) I would like you to pick out one that is purely official?

A. I didn't say in this; I said in those books. I don't know about this; (file case) I possibly might find some here. (Handing out papers) Here is one; here is another; here is another.

Q. Does this first one relate to the work in this district?

1623 A. It is in relation to the withdrawal of a book from the Library in Washington. I think that it is official as much as anything can be.

Q. It has nothing to do with this District?

A. He evidently applied for it from the Library in Washington for work in this District; it is the "River Clyde". It is a work on hydraulics.

Q. Suppose Capt Carter had been relieved from work in this District, of what benefit would that letter be on file to his successor?

A. It is notice about a service rendered by him when he was here.

Q. And suppose when Capt. Carter should have been relieved, and stationed somewhere else, the question should come up about Capt. Carter having written for this book, who would be the proper person to have that letter?

A. I think it ought to be kept on the records of this office.

Q. Suppose, for instance, Capt. Carter should have been sent from here down to Galveston, and the question should

come up, who would be personally responsible for that book?

A. He has to return it; it is only given for a limited time.

Q. Capt. Carter would be responsible?

A. Capt. Carter would be.

Q. And growing out of that, suppose a question should arise as to whether or not he had received that letter?

A. It would be here on the files of the office to show that he had.

Q. Would it not be more proper that he should take that letter with him?

A. I think not, because the original letter, on which the book was obtained, would be on file in this office, and the reply should be here, I think.

Q. You think that an engineer officer, who may be stationed all over this Country, should be put to the inconvenience, in an investigation growing out of that book 1624 for instance, to send back to each one of the places where he had previously been stationed, to find out whether or not he had received such a letter?

A. The book can only be kept out of the library for a certain definite time, and I think the receipt should be on the files of the office where the book was.

Q. Notwithstanding that he might be held personally responsible for the price of it?

A. Yes, sir.

Q. And notwithstanding that it is not gotten officially?

A. It is so regarded by myself as an official letter; I don't think that the Chief of Engineers corresponds with an Officer unofficially in this way.

Q. (Handing witness paper) Here is another letter that you picked out; has that anything to do with work in this district?

A. No; but then the officer served in this district, and all communications addressed in an official way to the Chief of Engineers should go on that file.

Mr. Blair: I will read this letter to the Court, so as to show the witnesses' idea of what constitutes an official and an unofficial document:

“Office of the Chief of Engineers,
United States Army,
Washington, D. C., Sept. 27, 1888.

“Lieut. O. M. Carter,
“Corps of Engineers, U. S. A.,
“Savannah, Ga.

“Sir:

“I have to acknowledge the receipt of the following named book, of the return of which to the Library of this Department you advised the Chief of Engineers in your letter of the 22nd instant:

“Great Campaigns in Europe, 1796-1870.
1625 “By command of Brig. Gen. Casey:

“Very respectfully,

“Your obedient servant,

“CLINTON B. SEARS,

“*Capt., of Engineers, U. S. A.*”

Q. (continuing examination) I believe you said such a book would not go on the property return?

A. No, sir; belongs to the office of the Chief of Engineers; it is only a loan to him.

Q. And notwithstanding the fact that that is a receipt that Capt. Carter on that day did return that book, which does not relate to Engineering work in this district, and notwithstanding the possibility that that book might subsequently be lost, and Capt. Carter be called upon to explain it, yet he should not have that receipt in his possession?

A. He gave no receipt for it.

Q. That is the receipt of the Chief of Engineers to him, that he has returned the book?

A. Yes, sir; but it is an official book, drawn from the official library, in an official way, and is consequently official,—the whole matter is official.

Q. Then you would regard an officer's retained vouchers as official, would you?

A. An officer's retained vouchers?

Q. An Officer's retained vouchers as official papers, would you?

A. Yes, these papers.

Q. His retained copies?

A. These retained copies are retained for his own protection; no, sir, that is his private property, kept for his own personal protection.

Q. Is not this a voucher?

A. Not in that sense, because there is no money spent.

Q. There might be a pecuniary liability on this?

A. Yes, sir; but it was only a loan. The library is 1626 in Washington, and the officer was authorized to draw the book by a circular of the Chief of Engineers, and he applied for the book, and it was given to him. I deem it official; you might not.

Q. You deem this official, and yet you do not deem a retained voucher official?

A. Because the voucher is made in duplicate for the officer's own protection.

Q. This, of course, is copied in Washington?

A. Yes, sir.

Q. You found among those private papers all of Capt. Carter's retained vouchers, did you not?

A. I did not; I didn't see them.

Q. The retained copies?

A. Of his vouchers?

Q. Yes?

A. I didn't see a single voucher; didn't see any at all except what was exhibited to me.

Q. Who produced them?

A. You mean the vouchers in reference to the expenditures of Capt. Carter?

Q. Yes?

A. Whenever we wanted any particular voucher, we called on the office files for it.

Q. But the retained vouchers of Capt Carter, where are they?

A. I don't know.

Q. You never saw them?

A. I never saw them.

Q. Not among these papers?

A. No, sir.

Q. Were they not in the Engineer's office, to your knowledge?

A. I suppose they were.

Q. His retained copies?

A. Yes, sir; but I never called for anything except when it was necessary for us to examine a particular account, 1627 and they were never transferred to us.

Q. Do I understand you to say that you never, in this investigation, looked into the retained vouchers of Capt. Carter?

A. Except when we wanted to investigate a special account.

Q. From whom did you get them?

A. From charge of the office; either from Capt. Gillette or Mr. Sterly.

Q. And you say you don't know where they are now?

A. I do not.

Q. Don't you remember that, when the Board left here to go to New York, Capt. Carter preferred a request to you that he should have the retained copies of his vouchers turned back to him?

A. I don't know that he did.

Q. And that you denied it?

A. I do not know that he did.

Q. Have you not been advised that Capt. Carter has been unable to make his official settlement with the Government, because of the fact that he is not in possession of the retained copies of his vouchers?

A. I have no knowledge of that at all.

Re-direct Examination by the Judge-Advocate.

Q. If the letter transmitting a book to an engineer officer at his station and the letter acknowledging its return are both on file there, the record is complete as a public record?

A. Yes, sir.

Q. There was a confusion yesterday in relation to "B. D. G." standing for "Benjamin D. Greene", and you thought you had seen it in this file of letters received. That was in a letter press book. You were asked in regard to the official matter found in these books; what do you find there in the book I hand you?

A. That is a letter to "Mr. C. P. E. Burgwyn, Richmond, Va. Sir: In compliance with your request of the 17th 1628 inst., I hand you herewith a set of specifications, in triplicate, Improving Cumberland, Ga."

Judge-Advocate: This is letter book No. 7, January 6th, 1893, to November 25th, 1895, page 291. These are in the handwriting of the accused; that is so acknowledged?

Mr. Blair: Yes, sir.

Judge-Advocate: I offer in evidence, and read from the following page:

“United States Engineer Office,

“Savannah, Ga., Sep. 19, 1894.

“Mr. C. I. McDonald,”

(Some place in W. Va.)

“Sir:

“In compliance with your request of the 18th inst., just received, I send you herewith one copy of specifications for Improving Cumberland Sound, Ga. If after consideration of this, you intend to bid on the work, two more copies will be sent to you on application.

“Very truly yours,

O. M. CARTER,

Capt. Corps of Engineers, U. S. A.”

On the succeeding page it is very much blotted out, but is I think, to Friday, Charleston, S. C. It is dated Sep. 19, 1894.

“Sir:

“In compliance with your request of the 17th inst., I send you copy of specifications for Improving Cumberland Sound, Ga. If after consideration of this, you intend to bid on the work, two more copies will be sent to you”, and it is blurred.

On the succeeding page:

“United States Engineer Office,

“Savannah, Ga., Sep. 19, 1894

To some one in Atlanta, Ga.

“Sir:

In compliance with your request of the 17th inst., I 1629 send you one copy of specifications for improving Cumberland Sound, Ga. If after consideration of this, you intend to bid on the work, two more copies will be sent to you on application.

Very truly yours,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A.”

On the succeeding page:

“United States Engineer Office,

Savannah, Ga., Sep. 20, 1894.

F. W. Grantham,
Savannah, Ga.

Sir:

In compliance with your request of this date, I send you a copy of specifications for improving Cumberland Sound, Ga.

If after consideration of this, you intend to bid on the work, two more copies will be sent to you on application.

Yours truly,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A."

On the succeeding page:

"United States Engineer Office,
Savannah, Ga., Sep. 21, 1894.

Mr. J. B. Brown,
Gainesville, Fla.

Sir:

In compliance with your request, I transmit herewith a copy of the specifications for improving Cumberland Sound, Ga. If after consideration of this, you intend to bid on the work, two more copies will be sent you on application.

Yours truly,

O. M. CARTER,
Capt., Corps of Engrs., U. S. A."

1630 Q. (handing witness book) In your cross examination, Counsel showed you letter book B; do you recognize that?

A. Yes, sir.

Q. That is the book in regard to which Sterly was brought in, is it not?

A. Yes, sir; to identify this (indicating page).

Q. In relation to that writing; you don't recall whether that was on there or not when you first saw it?

A. I don't know, sir; I don't remember anything about it.

Q. Was Mr. Sterly called in anyway to identify that and give character to the book?

A. He was.

Q. What is that?

A. It is a letter press copy of a code.

Judge-Advocate: I offer in evidence a code or cipher found recorded on page 11 of letter book marked B between two communications dated Sept. 26, 1894 and Oct. 5, 1894.

Mr. Blair: If the Court please, we object to the introduction of the writing in question because; first, it has apparently nothing on earth to do with this case; next, it has not been identified by anybody as anything.

Judge-Advocate: It is found in Capt. Carter's letter press book. It is found in telegrams, addressed to him as well, in this same book.

Mr. Blair: Is that in evidence?

Judge-Advocate: It is in the book, and the book is in evidence.

Mr. Rose: Not yet.

Judge-Advocate: I think very much in evidence.

Mr. Rose: Has it been identified and put in evidence?

Judge-Advocate: If a code is adopted by an officer of the army for his use—

Mr. Blair: There is no proof of that; I submit that you are not on the witness stand.

1631 Judge-Advocate: I offer this code as found in his book for explanation to be made by the same book.

Mr. Blair: If the Court please, we object to the introduction of this, and we object to the consideration by this Court of anything else in that book until the other things are formally offered by the Judge-Advocate. There is nothing before this Court now as a question of admissibility of evidence save only the writing on page 11 of book B.

Judge-Advocate: (Addressing witness) Colonel, I will excuse you a moment. Mr. Sterly, will you take the stand.

JOHN W. O. STERLY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. What is that impression on page 11 of that book?

A. That is an impression of a code that was Capt. Carter's.

Q. Capt. Carter's code?

A. Yes, sir.

Q. Who prepared it?

A. Some words by Capt. Carter; I may have added some words.

Q. Between you, it was a code that was adopted?

A. Yes, sir.

Q. For what purpose?

A. For the purpose of shortening the length of telegrams, and when Capt. Carter was away without any authority, to communicate with him so that nobody else could understand.

Q. That was the purpose of the adoption of that code?

A. Yes, sir.

Q. Did you write it out as it is there? Is that your writing?

A. Yes, sir.

Q. Was the impression placed in that book by you?

A. Yes, sir.

Q. By whose direction?

A. By Capt. Carter's.

1632 Q. What is the letter next following?

A. On page 12,—it is a telegram to Capt. Carter, to New York.

Q. Is use made of the code in that?

A. Yes, sir.

Q. The code was used for official and personal business?

A. Yes, sir.

Judge-Advocate: Does Counsel withdraw his objection?

Mr. Blair: No, sir; we object to the introduction of the code as having nothing to do with this case.

The Court: The Court will retire.

The members of the court then, at 12.35 p. m., withdrew to an adjoining room, and the Court was closed; after which, at 12.45 p. m., the members of the Court resuming their seats, the Court was opened, and the President, in the presence of the accused, his counsel, the Judge-Advocate and the Reporter, announced:

The Court decides not to sustain the objection.

Judge-Advocate: This code is found on page 11 of letter book marked B, and is as follows:

Reported your departure today,

"Graecus"

Reported your return today,

"Hamburg"

Report my departure to day on a days

leave of absence,

"Organ"

Report my return to station,

"Berli-n"

Accounts inspected today,

"Fabius"

Where will mail reach you?

"Urgent"

Important mail forwarded to,

"Oscar"

Everything allright in district,

"Condor"

Wire me at if everything is all right

in district,

"Brand"

Send by express to by the

"Express"

Tell Newmins to meet me at depot,

"Nemens"

Judge-Advocate: To show that this code was used for official purposes—

Mr. Blair: Under what specification does that come,—
1633 this telegram?

Judge-Advocate: To fasten the use of this code, and a "deposit" of a "thousand today". It may have some

relation to the general charge of conspiracy. (Reading telegram)

“October 5th, 4.

“Capt. O. M. Carter,
University Club,
Madison Avenue & 26th Street,
New York City.

Repairs to Fernandina disapproved. Deposit thousand to-day. Condor.

STERLY”

“Off. Bus. Gov’t. Rate. Paid.”

Judge-Advocate: I offer telegram of October 5th on page 13.

Mr. Blair: If the Court please, we object to the introduction of this telegram, which being interpreted means: Reported your departure today. Everything all right in your district; dated Oct. 5, 1894. We object because it is not relevant under any specification in this case.

Judge-Advocate: If an officer is absent from his station in a distant city, and a telegram is sent to him from here, addressed to him in that city, indicating that he should be here, or just leaving here, and the other parties named in the conspiracy charged against him are some of them in New York, it does not require a very keen vision to see the relevancy of this evidence, and I ask the ruling of the Court.

Mr. Blair: And when the same letter book shows that this accused had authority from the Chief of Engineers so to report himself, not in that special instance, but in other and similar instances, though in that instance, there was oral authority for that. It seems to me that the Judge-Advocate fails—

Judge-Advocate: Authority from the Chief of Engineers 1634 needs to make a false report! I cannot conceive it.

Mr. Blair: The explanation of this matter, I think, will be very plain to the Court, and that the language of the Judge-Advocate in that behalf is not justified will be equally plain. We expect to prove that wherever this defendant was absent from his post, it was by the authority of the Chief of Engineers; that the fact that he telegraphed from some where else down here to report his departure as of a certain date was to make the record that, upon that date his leave of absence began; that prior to that date, he was absent either on duty or under authority of the Chief of Engineers. That we expect to prove partly in writing and partly orally.

Judge-Advocate: I do not think even in the Century Dictionary, as perfect as it is, it can be found that "departure" means "presence".

The Court: The Court will retire.

The members of the Court then, at 12.55 o'clock p. m., withdrew to an adjoining room, and the Court was closed. After which, at 1.14 o'clock p. m., the members of the Court resuming their seats, the Court was opened, and the President, in the presence of the accused, his counsel, the Judge-Advocate and the reporter, announced:

The Court has decided not to sustain the objection.

Judge-Advocate: I read from page 13 of letter book marked B:

"October 5th, 4.

"Capt. O. M. Carter,
University Club,
Madison Avenue and 26th Street,
New York City.
Graecus. Condor.

STERLY."

"Off. Bus. Gov't Rate. Paid."

The witness, J. W. O. Sterly, excused.

1635 GEORGE L. GILLESPIE, a witness for the prosecution, resumed the stand, and testified as follows:

Direct Examination by the Judge-Advocate.

Q. You informed me that you desired to make a correction in your response to one of Mr. Blair's questions?

A. Mr. Blair asked me if I had allowed the records to go into the hands of any persons. I remember now that I permitted the Assistant Treasurer of the United States in New York to examine the stubs of the check book as an expert.

Cross-Examination by Mr. Blair.

Q. Any other person now that you recall?

A. I don't think so.

Q. As to any part of the papers?

A. I don't remember. The stubs of the check book and bank statements which were checked by him as an expert.

Q. And was there anything else you allowed the Assistant Treasurer to examine besides the stubs of the books and the bank statements?

A. No, sir.

Witness excused.

* * * * *

1640 JOHN W. O. STERLY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Judge-Advocate: I call the Court's attention to Specification 3rd of the 3rd Charge. It is to be found on page 12 of the printed Specifications.

Q. (Handing witness letter book) I hand you letter book No. 4, page 283; that is from the public records of the office?

A. Yes, sir; Savannah Harbor No. 4.

Judge-Advocate: I offer in evidence and read letter to be found on page 283 of the book just indicated.

"Subject: Continuing Contract Works.

"United States Engineer Office,
Savannah, Ga., Dec. 18, 1896.

"Brig. Gen. Wm. P. Craighill,
Chief of Engineers, U. S. Army,
Washington, D. C.

"General:

"In compliance with instructions dated December 15, 1896. (18,475) I have the honor to submit a comparative statement showing the estimate of cost of the improvement of Savannah Harbor, Georgia, under the appropriation of June 3rd, 1896, and the probable cost of the same works under the contracts which have recently been made.

"Very respectfully,

"Your obedient servant,

"O. M. CARTER,

"Capt., Corps of Engrs., U. S. A."

(One enclosure)"

The enclosure referred to is on the succeeding page:

“Savannah Harbor, Georgia.

(Including Steamboat Channel,—Savannah to Beaufort.)

1641 Estimated Cost of Improvement.

(Provided all work be completed by July 1,

1897), \$1,148,950

Probable Cost under Present Contracts.

(Provided all works be completed by July 1, 1897), \$1,137,000”

Q. (Handing witness book) On page 290 there appears endorsements; what are they?

A. The first endorsement is from the office of the Chief of Engineers and the second endorsement from Capt. Carter to the Chief of Engineers of December 31, 1896.

Q. Won't you read those endorsements.

A. (Witness reading) “1st endorsement, Office Chief of Engineers, U. S. Army, December 24, 1896. Respectfully returned to Capt. Carter attention being invited to endorsement of this date on his similar letter of December 18 in regard to Cumberland Sound. (13475) E. D.

3

By command of Brig. Gen. Craighill:

A. MACKENZIE,

Lt. Col., Corps of Engineers.

18475

1

Inclo, 2 accompg.

1 inclosure.

2d indorsement, United States Engineer Office, Savannah, Ga., December 31, 1896. Respectfully returned to the Chief of Engineers, U. S. A., Washington, D. C., inviting attention to additional inclosure.

O. M. CARTER,

Capt., Corps of Engineers, U. S. A.

S. H. 95/96.

(1 additional inclosure)

1 inclosure ret'd.)”

Q. Have you that additional inclosure?

A. Yes, sir; The inclosure is copied on pages 291 and 292.

(Witness continued to read as on following page)

1642

“(Savannah Harbor, Georgia.)
(Including steamboat channel, Savannah, Georgia, to
Beaufort, South Carolina.)

Estimate.

(Provided all works be completed by July 1, 1897.)

10,500 lineal feet training wall at \$90.00	\$945,000.00
Engineering and contingencies	47,250.00
Maintenance to July 1, 1897,	50,000.00
185,000 cubic yards dredging at \$0.20,	37,000.00
30,000 square yards brush mattresses at \$1.00,	30,000.00
10,000 cubic yards stone at \$3.00,	30,000.00
Engineering and contingencies,	9,700.00
	<hr/>

\$1,148,950.00

Contract.

(Provided all works be completed by July 1, 1897)

300,000* square yards brush mattresses at \$0.95,	285,000.00
25,000 tons first class stone at \$3.90	97,500.00
25,000 tons second class stone at \$3.90,	97,500.00
50,000 cubic yards third class stone at \$3.50,	175,000.00
100,000 cubic yards fourth class stone at \$2.75,	295,000.00
1,435,000 cubic yards dredging at \$0.13,	186,550.00
	<hr/>

1,136,550.00***

(Witness) There are two stars against this total and one star marked against the 300,000 square yards of brush mattresses. Then there is a star against the following remarks:

“*In the specifications only 200,000 square yards of mattresses are given, but as new soundings show that 300,000 square yards will be required, this estimate has been changed as provided in par. 44 of the specifications.”

Witness: Then comes a remark with two stars :

“***Should work be completed by July 1, 1897, the balance on hand would pay for engineering and superintendence, hence provision for that is not made.”

1643 Q. Now find indorsement of December 24, 1896, in a similar letter in regard to Cumberland Sound.

A. That is in another book.

Q. What book is that in?

A. Cumberland Sound book number two.

Q. Do you find the first indorsement there of December 24, 1896?

A. Yes, sir.

Judge-Advocate: That is the indorsement referred to in indorsement read by Mr. Sterly under date of December 24, 1896.

Q. Please read that indorsement.

A. (Witness reading) "1st indorsement, Office Chief of Engineers, U. S. Army, December 24, 1896.

"Respectfully returned to Capt. Carter to make a comparison between estimate and probable cost under the contracts already made for Cumberland Sound, and to permit this office to furnish information called for, a more detailed statement than that given by Capt. Carter is necessary. As indicated by the within slip, an attempt at such detailed comparison has been made here, but as quantities in estimate and contract do not agree, the comparison is not a proper one; but it would indicate the character of comparison desired.

By command of Brig. Gen. Craighill:

A. MACKENZIE,

Lt. Col., Corps of Engineers."

18475

3

1 inclo. 4 accompg.

2d indorsement, U. S. Engineer Office, Savannah, Ga.,—

Judge Advocate: You needn't read that.

Q. (Handing witness book). What is that?

A. On page 115 estimate, Cumberland Sound, Georgia, and cost of contract for Cumberland Sound, Georgia.

Judge Advocate: This is all offered in evidence, and I will read it.—

1644 (Reading):

"Cumberland Sound, Georgia.

—
"Estimate.

425,000 square yards brush mattresses at \$1.00	\$425,000.00
300,000 cubic yards second class stone at \$3.25,	975,000.00
125,000 cubic yards first class stone at \$6.00,	750,000.00
Engineering and contingencies,	200,000.00
	<hr/>
	\$2,350,000.00

Contract.

200,000 square yards brush mattresses at \$1.10	220,000.00
50,000 tons first class stone at \$5.25,	262,500.00
75,000 tons second class stone at \$5.25	393,750.00
100,000 cubic yards third class stone at \$3.90,	390,000.00
250,000 cubic yards fourth class stone at \$3.50,	875,000.00
Engineering and contingencies,	108,112.00
	<hr/>
	\$2,249,362.00''

Mr. Blair: We understand that that is offered under the specification just referred to, the third specifications?

Judge-Advocate: No; but that it is admissible. All the specifications go to the conspiracy, I would say to counsel.

Mr. Blair: If it is offered specially under the third specification which the Judge-Advocate read, we object. If offered generally under the conspiracy charge, we have no objection.

Judge-Advocate: It is offered generally under the conspiracy charge, and incidentally in connection with this, having a meaning and connection with it through correspondence, and showing that 400,000 square yards estimated for the mattresses, and only 200,000 square yards put in the contract, and the evidence will show what became subsequently of that contract, and that only first and second class stone were referred to in the estimate, and 250,000 cubic yards of stone at \$3.50 appear in the contract, 25c a cubic yard more than the second class stone appearing in the estimate.

Q. (Judge-Advocate continuing) What is that paper?

1645 A. That is a letter from the Chief of Engineers to Capt. Carter in regard to, "continuing contract works."

Judge-Advocate: That letter should have gone in first.

(Reading)—

"Subject: Continuing-contract works.

Office of the Chief of Engineers,
United States Army,
Washington, D. C., December 15, 1896.

"Capt. O. M. Carter,
Corps of Engineers,
Savannah, Ga.

Captain:

Please submit a comparative statement, showing the estimate of cost of the improvement of Savannah Harbor, Georgia, under the appropriation of June 3, 1896, and the

probable cost of the same work under the contracts which have recently been made. Also a similar statement for the work on Cumberland Sound.

By command of Brig. Gen. Craighill:

Very respectfully,

Your obedient servant,

A. MACKENZIE,

Lt. Col., Corps of Engineers."

Witness excused.

1646 JULIUS H. GRUNDEL, a witness for the prosecution, previously sworn, re-called, testified as follows:

Direct Examination by the Judge-Advocate.

Q. You testified that— When you were on the witness stand before, you testified that you were a draftsman in the Engineer office here?

A. Yes, sir.

Q. And in Capt. Carter's office for some years; were you there from 1894 to 1897?

A. Yes, sir.

Q. When surveys and examinations were made, who made the drawings of them?

A. I did.

Q. Who has charge of the official drawings on file in the office?

A. I do; I have.

Q. Do the records show that between the period, May 1st, 1896, and Jan. 1st., 1897, any survey or examination was made at the proposed locations of brush work called for by the contract of 1896 for Savannah Harbor?

A. Will you please repeat that question.

Q. Do the records shows that during the period between May 1st, 1896, and January 1st, 1897, any survey or examination was made at the proposed locations of brush work called for by the contract of 1896 for Savannah Harbor?

A. No, sir.

Q. The records do not show that any was made?

A. No, sir.

Q. What was the last map of the site of the Tybee break-water, made previous to June 6, 1896.

A. There was one made by Mr. Cooper February 3, 1897.

Q. Previous, not afterwards?

A. Previous; one made by Mr. Twiggs in October or November, 1894.

Q. Have you that with you?

A. Yes, sir.

1647 Q. Please produce it.

A. (Witness produces map.)

Q. That is what?

A. That is a map of the entrance to Savannah Harbor, October and November, 1894, showing direction of ebb currents, and modified plan of improvement. "U. S. Engineer Office, Savannah, Ga., December 7, 1894, to accompany reports of date. O. M. Carter, Captain, Corps of Engineers, U. S. A."

Q. When was the next survey made after this survey?

A. February 3rd, 1897.

Q. Is there any evidence of any other survey or partial survey between these periods?

A. No, sir, not on the breakwater.

Q. Not on the official records?

A. No, sir.

Q. Was the breakwater actually built as shown on the map of 1894?

A. No, sir; it was moved farther south.

Q. Have you the map of February 3rd, 1897?

A. Yes, sir (reading from map) "Proposed location of Breakwater; Soundings on site of Breakwater, Tybee Roads, done by A. S. Cooper, February 3, 1897. U. S. Engineer Office, April 13, 1897. Office Copy."

Q. Official copy?

A. Yes, sir; "O. M. Carter, Captain Corps of Engineers."

Judge-Advocate: This is offered in evidence, and blue print of it will accompany the records, marked Exhibit 280.

Q. Was the work begun as shown on map of February 3, 1897, as you have it?

A. Yes, sir, the exact location.

Q. What was the average depth of water on projected site as shown by drawing of 1894?

A. 10.1 feet.

1648 Q. What was the average depth of water on site of breakwater as built?

A. Eight and seven-tenths feet.

Q. How much deeper, then, was the water on the site as projected than on the site as built?

A. One and four-tenths feet.

Cross-Examination by Mr. Blair.

Q. Do you know of your own knowledge that this survey was taken on February 3rd, 1897?

A. Yes, sir.

Q. How do you know it?

A. Because Mr. Cooper platted it,—made the survey, and the books show the dates, and Mr. Cooper platted the original soundings, and I traced them.

Q. You were not out on the work February 3rd, 1897?

A. No, sir.

Q. And did not see Mr. Cooper, or anybody else, out on the Detached Extension of the Breakwater?

A. No, sir; his books would show the date.

Q. Did you see Mr. Cooper, or anybody else, out on the Detached Extension of the Breakwater February 3rd, 1897?

A. No, sir.

Q. And you did not see any soundings taken on that day, did you?

A. No, sir.

Q. Do you know whether any soundings were taken or not on any portion of this Detached Extension between the 6th day of June, and the 31st of December, 1896?

A. Do I know?

Q. Yes.

A. Well, I did not see anybody take the soundings, and the records do not show it in the office.

1649 Q. Then you do not know whether anybody went out there and took soundings or not, do you?

A. No, sir.

Q. Between those dates, June 6th and December 31st, 1896?

A. No, sir.

Q. You testified the other day as to the charts of the Cockspur Island training wall?

A. Yes, sir.

Q. And the Oyster Bed training wall.

A. Yes, sir.

Q. And today of this Breakwater chart?

A. Yes, sir.

Q. And the other day of the Breakwater chart?

A. Yes, sir.

Q. And profile and cross-section?

- A. Yes, sir.
Q. Did you draw all of these?
A. Yes, sir.
Q. Were they each and all of them accurately constructed from the data given you?
A. Yes, sir.
Q. From whom did you get your data?
A. Mr. Cooper.
Q. Anybody else?
A. And from notes in the office.
Q. What notes?
A. Construction profiles.
Q. Whose were they?
A. Mr. Coopers.
Q. Drawn by him?
A. Yes, sir.
Q. From what other data?
A. From data that he gave me on his survey made in October.
1650 Q. Made by whom?
A. By Mr. Cooper.
Q. Now, about the map of Cumberland Sound, concerning which you testified a few days ago, did you draw that?
A. Yes sir.
Q. And from data given you by whom?
A. That was in the office; notes in the office,—the construction notes.
Q. Whose notes?
A. Mr. Twiggs' notes.
Q. Anybody else?
A. Mr. Gieseler's notes; from his survey in October and November, 1897.
Q. Did Mr. Cooper give you any notes on that work?
A. No sir; the only thing that Mr. Cooper did was to go through the reports and look up the amount of stone and price of it.
Q. Now from the data which you received from these various sources relating to Cumberland Sound, I understand you constructed the chart,—you drew it?
A. Yes sir.
Q. Is it accurate from the data?
A. Yes sir.

Re-direct Examination by the Judge-Advocate.

Q. I understood you to say that, between June 1st and December 31st, 1896, there was no record here in the office of any new soundings in answer to a question of counsel?

A. In what particular work?

Q. Tybee Breakwater, or any work mentioned in the contract of 1896, Savannah Harbor.

A. Mr. Cooper made a survey in October, 1896, I think, and Mr. Brown made a survey in April and May, 1897; that is, simply an examination of the harbor,—did not go out 1651 on the Breakwater, or outside of the channel.

Q. Was there any survey or sounding made of localities to be covered by mattresses under the contract of 1896 between those dates?

A. No sir.

Re-cross Examination by Mr. Blair.

Q. You testify to that and you testified in your direct examination, not from your own observation?

A. No sir.

Q. Did you observe them in making the soundings?

A. No sir, I did not see them in making the soundings. It is not to be supposed that I have to be out on the ground.

Q. I simply want to know if you saw the soundings taken.

A. No sir.

Re-direct Examination by the Judge-Advocate.

Q. You do office work?

A. Yes sir.

Q. And there is no record of any soundings or any notes of soundings in the office?

A. No sir.

Witness excused.

Judge-Advocate: The Tybee Breakwater and the Detached Extension of the Oyster Bed training wall, Savannah Harbor, is the same work, sometimes referred to under different names.

(At this point in the proceedings of the day, reporter W. O. Tarver was relieved by reporter George T. Cann.)

1652 JOHN W. O. STERLY, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:—

Direct Examination.

Questions by the Judge-Advocate.

Q. Do you know, Mr. Sterly, if the records of the office here show when the order of the Secretary of War to the authorities of Savannah to remove certain obstructions at the Quarantine Station was revoked?

A. It was never revoked.

Q. Are you sure about that?

Mr. Rose: There ought to be a record; let him produce the record.

Witness: (To the Judge-Advocate) Am I right, that I was asked the question whether the order of the Secretary of War to the city of Savannah to remove the obstructions, to remove the structures at the Quarantine Station, has ever been revoked?

Q. Yes.

A. No, sir, it has not been revoked.

Q. That is still in force?

A. No, sir, it is not in force. There was another Board, and the Harbor line has been changed there.

Mr. Blair: Now, we object to any further statements of that sort from this witness, because a day or two ago the Judge-Advocate offered to introduce the report of the Board, relating to this harbor line; we objected, and the Court sustained the objection. Moreover, the record, if there be such record, is the best evidence, and not the memory of this witness, which, it is apparent to the Court, is limited on this point.

Witness: I am positive there has been none.

Q. There has been no expressed revocation of that order from the Secretary of War to the city of Savannah, and in December, 1896 and throughout the whole month, that order was in force?

1653 A. Yes, sir.

Q. And had been since it was originally given?

A. Yes, sir, December, '94.

Q. Do you know of your own knowledge that the harbor line at the Quarantine Station has been abandoned?

Mr. Blair: I object to that, if the Court please; if there has been an abandonment of it, there is an official record.

Judge-Advocate: There is an official record.

1654 Judge-Advocate: And it is that which I wish to go into the record, that the time did come when the harbor lines were abandoned, and with it the orders to the city of Savannah to remove the obstructions, and it is not necessary to submit the report of the Board. It is the brief that is submitted. That "January 6th, Secretary of War approved the recommendation of the Board on Harbor lines, Savannah, in the report November 19, 1897, that the harbor line at Quarantine be abandoned".

Mr. Blair: O, I presume it might as well go in after reading it. I withdraw the objection, if the Court please.

Judge-Advocate: Well, I'm satisfied.

Judge-Advocate: The Court will understand that I am disappointed in two instances this morning; one witness abandoned me, and the other failed to prove very responsive, and that exhausts the preparation that was made for today's business. I will endeavor to have some work for tomorrow's session.

The President: Will you be ready at ten o'clock?

1655 Judge-Advocate: Eleven o'clock. I cannot be ready at ten o'clock, General.

The President: If there are no objections, the Court will adjourn until that hour.

Here the Court, at 2.30 o'clock, P. M., adjourned until tomorrow, February 17th, 1898, at 11 o'clock A. M.

THOMAS F. BARR

Col. & Asst. Judge Adv. Genl
Judge Advocate.

1656 United States Court Room,
Savannah, Georgia, February 17, 1898.

Court met pursuant to adjournment at 11 o'clock, A. M. to-day.

Present.

All the members of the Court, and the Judge-Advocate.

The accused, his counsel, and the reporter, G. T. Cann, were also present.

Judge-Advocate: May it please the Court, I offer this morning in evidence some additional reports of operations

made by the accused for the different months, from November 1896 to July, 1897. There are here reports of operations for improving Cumberland Sound, Georgia, made by the accused, for November and December, 1896, for January, February, March, April, May, June and July, 1897.

Judge-Advocate: (Reading) Report of Operations for the month of October, 1896, for Improving Cumberland Sound, Ga.; present project adopted June 3, 1896. The project adopted June 3, 1896, contemplates the establishment of a navigable channel across the bar, nineteen feet at mean low water. This is to be accomplished by the construction of two jetties of stone, with a mattress hearting wherever admissible, resting upon a foundation mattress of brush, starting from the shores on opposite sides of the entrance, and extending seaward upon converging lines, so directed that the ends will be parallel to each other, and about 3,900 feet apart. The scour between the jetties is to be aided by dredging, if necessary; the cost of the improvement is estimated at 1657 \$2,350,000.00. Each report, so far as the printed portion is concerned, which I have read, contains the same language and the attention of the Court is directed to the fact that a mattress hearting, wherever admissible, appears in each of them which, when it appeared in the letter of the accused, was so felicitously explained by the counsel, as an inadvertence. The report of operations shows that "Property has been cared for and necessary office work done". "Probable operations for next month: To begin work on jetty construction". I don't think it is necessary to read these, as copies of them will be attached to the Exhibits, and I call the attention of the reporter to the fact that there are pencil memoranda upon some of these, which will not be copied.

Mr. Blair: Let me see the July one; I think you got them wrong in the months.

Judge-Advocate: I have given the dates.

Mr. Blair: The report is the Report of Operations for the month of June, '97.

Judge-Advocate: I gave the dates as they appear on the back and which is the date of signature, or the date on which the report is made.

Mr. Blair: We think the Judge-Advocate is under a misapprehension; my recollection is that he said, "They are the reports of the accused for the months of October, 1896 to and including, July 1897". Now, they are the reports of September, October and November, 1896, January, February, March,

April, May and June, 1897. There is no report for July by the accused, because he was relieved in July, and could not have made a report.

Judge-Advocate: I conceive that is immaterial, so far as the identification of the paper is concerned.

Mr. Blair: So do I.

1658 Judge Advocate: I gave the date which appeared on the back of each report. Copies of these will be attached to the record, marked, Exhibit 281, 282, 283, 284, 285, 286, 287, 288, and 289.

The President: The Court will take a recess of fifteen minutes.

Here the Court at 12.45 o'clock P. M., took a recess
1693 and the Court met pursuant to recess, at 1 o'clock P. M., and the Court was opened.

Present.

All the members of the Court and the Judge-Advocate;
The accused, his counsel, and the reporter, G. T.
Cann, were also present.

JOHN K. GARNETT, a witness for the prosecution, being duly sworn, testified as follows.

Direct Examination.

Questions by the Judge-Advocate.

Judge-Advocate: Counsel will understand this is the witness who was absent yesterday, and I promised to examine him at once that he could get away.

Q. Please state your full name and residence?

A. John King Garnett, Garnett, Hampton Co., S. C.

Q. Do you know anything about the Hunting Island Company?

A. Yes, sir.

Q. Who are the owners?

A. The Hunting Island Company.

Q. Who are the stockholders?

A. At the time it was purchased, there were five,—C. H. Shearson, of Savannah, Pat. Calhoun of New York, DeWitt Bruse of Pittsville, Mass., Capt. Carter and myself.

Q. Capt. Carter, the officer here present?

A. Yes, sir.

Q. Do you know of any wood and brush being cut from the property of that company by the Atlantic Contracting Company?

A. Mr. Gaynor spoke to me several times about buying some brush, there, I think he subsequently cut some of it. I am quite sure I expressed a willingness to give him the brush if he would not cut any trees, so far as I was individually concerned; I went away and left it in the hands of Mr. Shearson, who was in Savannah. I understood some was cut after that time.

Q. Do you know what was paid for it?

A. I do not.

Q. Can you approximate the amount?

A. No, sir, Mr. Mackall was Secretary and Treasurer and looked after all that work; I was absent all summer.

Q. What Mackall is that?

A. W. W. Mackall, of Charlton, Mackall & Anderson. Mr. Mackall the lawyer, W. W. Mackall.

Q. Of the firm of Charlton, Mackall & Anderson?

A. Yes, sir.

Q. You have a map have you not, of the property of that company?

A. Yes, sir.

Q. Have you it with you?

A. I have not, I could point it out on the chart in the office in Savannah.

Q. You have a map of it, have you not?

A. Yes, sir.

Q. That is not in the city?

A. Yes, sir, Capt. Gillette saw it yesterday; I gave it to him yesterday; he asked me about it.

Q. Where is it now?

A. It is here, it can be produced very easily.

Q. I would like to see it.

(Witness to Mr. Charlton) Will you go over and get it? Mr. Charlton: I have nothing to do with it.

Here the witness goes for the map and returns with it.

1695

Direct Examination Continued.

Questions by the Judge-Advocate.

Q. Point out, please, the holdings of the company?

A. All this within the yellow line.

Q. Where is Colleton?

A. That is Colleton River right there.

Q. Now, at what point was brush cut there, if you know?

A. Some along this river (indicating) I think some on the other side, May River, Bluffton.

Q. That is around here? (Indicating)

A. Yes, sir.

Q. What is that map which I just showed you?

A. What is it?

Q. Yes, I want it put upon the record.

A. It is a map, I don't know what else it could be, of that property.

Q. Of what?

A. Of those lands that the Hunting Island Company own.

Q. And there are other lands there too?

A. Not belonging to this company

Q. But there are lands, that is sufficient for the purpose of identification. Will you allow me to make a copy?

A. I have no authority, that plat belongs to the Company. I don't feel I can do so individually.

Q. Who pays the taxes on that property?

A. The company.

Q. Through whom, do you know?

A. Yes, sir, Mr. Mackall.

Q. Have you received dividends from it since the company was organized?

A. No, sir.

1696 Q. Have any deductions been allowed you on assessments or payments?

A. Payments*in what way do you mean?

Q. If there have been any payments, have there been any deductions allowed you, any credits?

A. No, sir.

Q. Are there any assessments for expenses?

A. No, I think that the income from it has paid the taxes, and that has been the only expense, and a good portion of that land is cleared and under cultivation.

Q. And rented?

A. Yes, sir.

Q. And you cannot recall what payments, if any, have been made, for the wood and brush that have been cut on there?

A. I don't know that.

Q. But you know it has been cut from these two points that you indicate?

A. Yes, sir.

Q. And by whom was that cut?

A. By Mr. Gaynor, I suppose; he was the party who spoke to me about it.

Q. Did Mr. Gaynor have a contract near there?

A. I don't know of any contract, except this here, that he had at the river.

Q. The river contract?

A. I presume that is what he wanted it for, I don't know/.

Q. When was it?

A. Some time in the early part of 1896, it seems to me.

Judge-Advocate: Some time in 1896?

Mr. Rose: He said the early part.

1697 Q. Some time in the early part of 1896?

A. I think so, it seemed to me it was in the early part of 1896.

Q. Did the same parties continue in ownership?

A. Yes, sir, so far as I know they did. I have not looked over the books, there has been nothing done with the property, if it has been transferred, I don't know.

Q. Have there been any statements issued to the stockholders?

A. No, sir.

Q. Have there been any statements issued to the stockholders of expenses and receipts?

A. None that I have seen.

Q. Do you know if the title to the property is a matter of record?

A. It is.

Q. It is in Beaufort? The record is in Beaufort, is it?

A. Yes, sir.

Cross-Examination.

Questions by Mr. Charlton.

Q. Was this land bought for the purpose of cultivating live brush?

A. Not to my knowledge.

Q. You were very anxious to get rid of the brush?

A. I individually offered to give it away if he didn't cut the trees.

Q. If you didn't give it away and some one didn't come along and buy it, you would have cleared it?

A. That was my suggestion, that we clear it at our expense and sell the property.

Q. You found some one willing to rent it?

A. Not willing to rent it, but to cut the brush.

Q. But afterwards you say you got enough rental to pay the taxes?

A. Yes, sir.

1698 Q. The rental exceeds the taxes?

A. I think so.

Q. The rental amounts to how much?

A. Something over \$300.00

Q. And the taxes?

A. Twenty-five or thirty.

Q. How long have you held this valuable land?

A. We have had it some time since 1895. We bought it in the spring or summer of 1895.

Q. Do you propose to hold it forever, or would you be glad to get rid of it?

A. I suppose if anybody wanted it, it could be bought.

Q. Did you buy it for the purpose of having a fort there?

A. We thought so.

Q. And also to build a city?

A. We thought such a thing might happen.

Q. There have been other dreams about that locality before?

A. Yes, sir, we read of some.

Q. In other words, it was a speculation, was not it?

A. That is what we bought it for, with the idea that it was cheap and we could make money out of it, and we thought Mr. Sparks intended to go there with the railroad, he failed and we bought it.

Q. Still a speculation?

A. I judge so.

Q. And still no nearer than you were in the beginning?

A. We have no definite plans in view, as far as I know.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. Mr. Gaynor did not agree to your suggestion,—
1699 that he would take the brush and let the trees alone?

A. He told me he didn't want to cut the trees, only the smaller ones.

Q. He said nothing about small wood?

A. Nothing but brush and small trees.

Q. You would let him cut the small trees for nothing?

A. In places, in some parts, it is quite grown up, quite a jungle, and we supposed if it was cleared away, it would improve the place largely; I thought so.

Judge-Advocate: Would the Court like to look at the map, with what it shows?

The President: There seems to be no desire to look at it.

Mr. Blair: If the Court please, I am authorized to say that Mr. Makall, who is the secretary and treasurer of this company, and knows all about its affairs, is ready and willing if the Judge-Advocate sees fit to serve him with a subpoena, to come before you and say everything he knows in respect to it, and to allow the Judge-Advocate to make a copy of that map.

ARTHUR S. COOPER, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows.

Direct Examination.

Questions by the Judge-Advocate.

Q. You were on duty from May 1894, to July 1895, as assistant engineer?

A. Yes, sir.

Q. How many cubic yards of stone were placed in the works of Savannah harbor during that time?

A. I didn't bring the memorandum with me, Colonel; I think it is somewhere in the neighborhood of 63,000; the 1700 record, however, will show that.

Q. Where is your memorandum?

A. I have it at my room.

Q. Can that be sent for while you are being examined,—can I get that from the office?

A. I don't think anybody else would know where to find it, that is my personal memorandum; nobody would know where to find it except myself.

Q. You will approximate it and put in the statement.

A. I will put in the exact amount afterwards. It is 63,000, the odd figures I don't remember.

Q. You can't tell that.

A. Not until I examine my memorandum.

Q. You can't tell what it is? How much of this was ballast rock obtained in Savannah?

A. That I don't remember. No, that was exclusive of ballast. There was ballast besides that, that was the Florida rock.

Q. How much ballast rock was obtained in Savannah?

A. During that period?

Q. Yes.

A. That also is on that memorandum, and I have forgotten.

Q. Forgotten to bring it with you?

A. Yes, sir, I can assert that amount the same as I did the other.

Q. Who had the contract to supply this stone?

A. The Florida stone was to be supplied by Mr. Brown, the Atlantic Contracting Company, and Mr. Brown was the sub-contractor under it.

Q. Have you examined the inspector's reports, the reports and vouchers in the office here, for deductions made on this stone?

A. I have examined the field books of the inspectors, and my own field books, and the reports, and the only deduction during that period was a small deduction on some ballast rock; none being deducted on the Florida rock.

Q. There was no deduction from the Florida rock during that period which I have mentioned?

A. There was not.

Q. How much of that rock did you see go in place yourself?

A. I suppose probably three fourths of it.

Q. That dirt and small stone deducted, as you testify, was that on more than one occasion?

A. Counsel for the Accused: He said there was none deducted.

Judge-Advocate: He said small stone and ballast.

Mr. Rose: On ballast and not on Florida rock.

Judge-Advocate: I was bringing him down to that, Mr. Rose.

Q. There was a deduction for more than one barge?

A. There was only one barge of ballast rock.

Q. That was the only instance of deduction from ballast rock, or any deduction whatever, do I understand you?

A. That is correct.

Q. And the stone furnished by Mr. Brown, under the sub-contract, was all Florida rock?

A. All Florida rock.

Q. Did it all go into the work, do you know?

A. I don't know that I could swear absolutely to that. All that came down the river on lighters went into the work.

Q. That's what I want, all that came down the river on the lighters went into the work?

A. Yes, sir.

Q. And was credited to the contractors?

A. Yes, sir.

Q. And reported for payment?

A. Yes, sir.

1702 Q. The barges were measured, I suppose, when they arrived at the place where the work was to be done

A. They were measured invariably before going into the works, immediately before.

Q. Was any of it below the weight required by the specifications?

A. Yes, sir, there was a small percentage of it below the weight.

Q. What percentage?

A. Somewhere between five and six, I should judge.

Q. Below 25 pounds in weight?

A. Below 25 pounds, yes, sir.

Q. And that was reported for payment also as meeting the requirements?

A. Yes, sir, no mention in the reports was made of small stone, it was simply reported as so many yards of stone.

Q. Did you have a conversation with Capt. Carter in regard to that matter?

A. Yes, sir, I did.

Q. What was it?

A. As near as I can remember, Capt. Carter told me that the small stone would only be mainly in the voids between the large stone, and he did not consider, that they would not really therefore, take up much space on the lighter, and that also in the works, when thrown on the dam, that they would make a tighter dam than if they were all large rock; that is about all that he said about it that I remember.

Q. Did he give you any instructions in regard to it?

A. No, sir, he didn't give me any instructions in regard to it; he simply made that statement. I received no instructions as what to do with small stone.

Q. Did he say it was to go in the work, or was he there to see it go in?

1703 A. I don't think I told him it was going in. He saw the lighters unloaded in many instances.

Q. Did you ever have any instructions that two tons of dirt and small rock would not be paid for?

A. I don't remember of any instructions of that kind.

Q. Had your assistant engineers had instructions to allow the contractors to dump all small rock that would sink on the work?

A. Not that I know of.

Q. Do you know of any instructions to permit the contractors to throw rock outside the works?

A. Well, there has been bricks and things of that sort dumped on the training walls, which were not paid for, by different parties here in Savannah.

Q. I refer now to the contractors on that work. If any part of the Florida rock that was taken down on the lighters of the Atlantic Contracting Company, if they were allowed to throw any part of the rock outside the work?

A. I don't think any instructions were ever given in regard to the throwing of the small rock down. In the Florida rock I don't think I received any instructions at all about that, except as I stated, and that was really not an instruction, it was only an argument in favor of the small rock.

Q. In favor of using it?

A. Yes, but no instructions.

Q. As an engineering fact, would rock weighing 25 pounds, on a lighter of rock, add to the cubic yards in the measurement?

A. That is up to five per cent?

Q. Any per cent.

A. Well, if there was five per cent of rock and 25 pounds or less on the lighter, of Florida rock, as the Florida rock usually came, I think it would add slightly to the measurement of the barge, but not to the full extent of the five per cent, because it would to a certain extent occupy the voids of the big rock, but not entirely so.

Q. To what extent would it add to the percentage?

A. Well, I could give my opinion; it would probably add about half of that.

Q. About two and a half per cent?

A. Two or two and a half per cent.

Q. Was all the rock that went into the work reported for payment?

A. It was.

Q. No deduction made on account of any small rock that was put in?

A. With the exception that I stated.

Q. And that was—?

A. That was ballast rock.

Q. I speak of the Florida stone that was being put in.

A. Yes, sir, it was all reported.

Cross-Examination.

Questions by Mr. Blair:

Q. Mr. Cooper, did you ever make any experiment as to how much of the void would be filled by rock under 25 pounds in a barge load of this stone?

A. No, sir, I simply stated my opinion; that is based on nothing except my judgment.

Q. Nothing but your eye?

A. That is all.

Q. Would that vary with the size of the large rock?

A. Decidedly, if the rock was very much larger, it might really be between the voids.

Q. All of it?

A. Yes, sir.

1705 Q. Now, when you come down to the correct figures of this estimate of yours, and say that of the five per cent in the average barge load or rock under 25 pounds in weight, only two and a half would go into the voids, the two and a half would then be measured and paid for; you base that simply upon your judgment?

A. Purely upon my knowledge of the rock, as having seen it all.

Q. Did you ever make any similar estimate of that kind any where else?

A. Not that I know of.

Q. That is the first and only estimate of that kind that you ever made?

A. I don't remember ever being asked that question before.

Q. You were not asked to examine the rock when it was going into the works, with that idea in view particularly, were you?

A. Not that I remember, sir.

Q. Are you sure of that two and a half percentage as you are of the meaning of S in the formula we discussed the other day?

A. No, I don't know that that has any relation; I don't see any parallel.

Q. Well, there is no parallel in them. Are you as sure of that two and a half per cent being left out of the measure in the average run in the lighters of rock on this work during the time you have spoken of, are you as sure of that as you are that this rock ran in specific gravity, from one and three tenths or one and six tenths, to two and six tenths?

A. No, because that specific gravity was actually measured, that is the result of experiment.

Q. That is a scientific fact which you have established?

A. I don't know as I would say I established that; that is the result of experiment. That don't prove that it is exact, but that is the result, there may be some errors.

1706 Q. That is the result of scientific experiment?

A. Yes, sir.

Q. And they are scientific experiments?

A. I suppose they might be classed so.

Q. You testified the first time you were examined in this court room, that you had received a small red book,, with flexible covers, entitled, "Regulations for the government of employes of the United States Engineer Department, in the District of Savannah, Ga.?"

A. Yes, sir.

Q. You did receive such a copy.?

A. Yes, sir.

Q. You testified further that you had read it and were familiar with it?

A. Yes, sir. I will say, of course, I may not remember all that is in there.

Q. I am not going to try to catch you on any rule; I will read paragraph 105, and then hand it to you and ask you if you recognize the paragraph on page 18 of this book.

(Reading) "In case of minor defects in mattresses, loss of logs in sinking vacant places between mattresses, variations in alignment, piles of dirt in barge loads of stone or shell, stone of inferior quality or under size, etc, the inspector will make a fair estimate, and report the amount in each case, which is not up to the requirements of the contract, and submit his recommendations as to reductions or allowances to be made."

Now, was that paragraph in the copy of the book furnished you by Capt. Carter?

A. I suppose it must have been; I cannot say I remember all of it, but I presume I must have read it at the time.

1707 Q. Why didn't you report those things, the under sized stone, according to the terms of that paragraph?

A. Simply because I didn't think Capt. Carter wanted me to.

Q. Why didn't you think he wanted you?

A. Because he had made an argument in favor of that small stone, leading me to believe that he preferred that stone to be passed, although I had no definite instructions to pass it.

Q. Did you make that argument to the other inspectors there, on that work at the time?

A. Possibly I might; I don't remember it though.

Q. When you made it, if you did, did you tell them that Capt. Carter did not want that stone measured and paid for?

A. I don't remember that; I presume I must have told them in substance what he told me; I may have told it as coming direct from myself; I don't remember whether I did or not.

Q. Do you have any distinct recollection of making any such statement, or giving any such instructions to any particular one of the inspectors, under you in that work?

A. No, I don't remember any specific case; I presume, as you say, it is likely that I did give some instructions about the stone, but I could not remember what it is.

Q. Then you do not make the point on this paragraph that you made heretofore to the paragraph which relates to the mattresses, that you were not told in this paragraph to follow the specifications, but told to follow the contract,—you remember that distinction, don't you?

A. No, not quite, I think you have mis-stated it? I did make the statement that I was not told to follow the specifications in regard to the mats.

Q. Do you remember any such question as this having been propounded to you,—Page 249 of the record,

“Q. Let me read you this, 102, ‘Mattresses and stone will be measured immediately before they are placed in the work—mattresses will first be carefully examined, and the inspector must satisfy himself they are constructed in accordance with the contract before he accepts them for measure-

ment'. You remember that provision do you?" Do you say that question was asked you?

A. I remember it, yes, sir.

Q. And to that, did you make the reply, 'Yes, sir.'

A. Yes, sir.

Q. "Did you deliberately disobey the instructions contained in this book, to satisfy yourself that they were constructed in accordance with the specifications." Do you remember that question?

A. Yes, sir.

Q. (Reading) "A. I don't think I did; that does not say that they are to be carried out in accordance with the specifications." Do you remember that answer?

A. Yes, sir.

Q. And did you make that answer?

A. I think I did.

Q. (Reading) "Q. Did you see that they were carried out in accordance with the contract?" Do you remember that question?

A. I do.

Q. Was that question asked you?

A. It was.

Q. (Reading) "A. I have not seen the contract, and didn't know what it was." Did you make that answer?

A. I did.

Q. Now, I understand that while paragraph 102, having reference to mattresses, requires that you should follow the contract, you did not follow, and you disobeyed that instruction, or rather, you did not follow paragraph 102, because, as you have said, with respect to the specifications, that paragraph did not require you to follow the specifications?

A. Yes, sir.

Q. While paragraph 105, having the same language, required you to see that the contractors carried out;—you do not make that point, that it does not relate to the specifications?

A. No, sir, I do not; I simply say I did not carry out the order in that paragraph 105, for the reason stated.

Q. Without any further instructions than what you have said here?

A. Yes, sir.

Q. Now, where did Capt. Carter make that statement to you?

A. I don't know.

Q. And when?

A. I don't know.

Q. And in whose presence?

A. I don't know whether it was in anybody's else presence or not.

Q. Alone, like he made the statement to you which you testified to on your direct examination, that he showed you a sample mat and told you to follow that?

A. The sample mat was shown me in the presence of other people, but I do not remember when and where he told me about this stone, I could not say.

Q. In whose presence were his instructions given you to follow the sample mat?

A. I don't know that he made that remark in anybody's hearing; it was on the lighter where the mattress was.

Q. He told you this about filling the voids with small rock, out of the hearing of any other human ear?

1710 A. He may, have, I would not say whether he did or not.

Q. Just as he told you to follow the sample mattress, out of anybody's hearing,—is that right?

A. It may be.

Q. Well, is it?

A. I don't remember whether anybody was within hearing or not; I think probably they were not.

Q. And yet you did not even follow the sample mat, did you?

A. Well, when the work fell below the standard that I was given, I simply reported the fact that they were not as good as the sample given me.

Q. Did you report the hole in the sample mat that you said you saw?

A. I reported it to Capt. Carter in person.

Q. Where?

A. In the private office, over the Southern Bank Building

Q. When?

A. About a week after I saw the mat.

Q. Who heard that?

A. Nobody but Capt. Carter.

Q. Did you think under paragraph 105, which I first read you this morning, the instructions that you shall report defects in stone, etc., not up to the requirements of the con-

tract, do you think that includes the specifications to the contract?

A. I suppose that meant the specifications.

Q. You think so?

A. Yes, sir.

Q. But, under paragraph 102, with respect to mattresses, which says, "Mattresses will first be carefully examined, and the inspector must satisfy himself they are constructed in accordance with contract before he accepts them for measurement," that does not mean that they must be constructed in accordance with the specifications of that contract?

A. It might mean that, yes, sir.

Q. Well does it mean that?

A. Well, I suppose it might be construed to mean that.

Q. Don't it mean that and nothing else?

A. It might mean that; I say it might be construed to mean that; it does not say that.

Q. Don't you know that in the contracts in this district, there are no specifications in the body of the contract, describing mattresses and stone?

A. I told you I had never had anything to do with the contracts, never saw them made up, and never saw them until this investigation was started.

Q. Never in all your experience have you seen a contract until Capt. Gillette came here?

A. Well, I have seen one; I have not had anything to do with the contracts; I was given the specifications; I might possibly have seen one, but never read them.

Re-direct Examination.

Questions by the Judge-Advocate:

Q. When you reported to Capt. Carter at any time, he had an office room to himself, didn't he?

A. Yes, sir.

Q. Did you ever call in a witness to see what you were talking about.

A. When he called me in to see me by myself, he was always alone; if there was any one there, I waited.

1712 Q. Any official statement you made was necessarily made between yourselves?

A. All of them were between Capt. Carter and myself.

Re-Cross Examination.

Questions by Mr. Blair.

Q. Did you make a memorandum in your note book, your official note book, of the hole in that mat, which you say you reported to Capt. Carter?

A. No, sir, I don't think I ever did.

2nd Re-direct Examination.

Questions by the Judge-Advocate:

Q. Did Capt. Carter ever discuss the points of that book with you?

A. No, sir, not to my knowledge.

Q. Did you ever hear him mention the book?

A. I think I have heard him mention the book at different times.

Q. In what way?

A. It is so seldom he mentioned it, I don't believe I can remember exactly how; he very seldom spoke of the book.

Q. Did he ever call your attention in any way to a paragraph relating to your duties?

A. Not specifically as I remember it.

Q. Did he ever seek to impress upon your memory the close scrutiny which should be given to mattresses and stone delivered under contracts?

A. No, sir, he did not; it was simply as I stated before he wished the work to go on in the same manner that I found it going on, when I came in 1893.

Q. Was it to your interest to pass by mattresses and 1713 stone that in your judgment did not fill the requirements of the specifications?

A. Well, I realized that if I did not do as my superior officer wished me to do, why he would get somebody that would.

Q. It was an entirely selfish interest, then, for the retention of your position that actuated you?

A. Yes, sir.

Q. If it was desirable to fill the interstices between the large rocks with small ones, would it not have been desirable also to have provided for it in the specifications?

A. Yes, sir; I did not think it was necessary to carry out those specifications with any such rigidity. Stones of that

size of 25 pounds and under, in my judgment, were not injurious to the work.

Q. But still, there was no mention of that in the specifications?

A. Not in that manner, no, sir.

Q. The specifications were 25 pounds and over, not 25 pounds and less?

A. Twenty-five pounds and over; that is in the contract of 1892; in the contract of 1896, it was fifteen pounds.

Q. Which would be the most expensive to the bidder,—the ten pounds and upwards, or 25 pounds and upward?

A. Well, there would be some difference, I imagine, in the 25 pounds; I don't think the difference would be very great.

Q. It would be more expensive?

A. It would be more expensive if he was held down to the 25 pound limit.

Q. You spoke of rock weighing 15 pounds and over; is that provided for in some of the specifications?

A. That was provided for in the contract of 1896; in the contract of 1892, it was twenty-five.

1714 Q. What is the average size of rock over 25 pounds that was delivered, the Florida rock?

A. You mean of what it ran as actually delivered?

Q. Yes.

A. I could only give a rough estimate about that; I presume it would average 150 pounds, possible; some of that; possibly, not over 100. Some of them were as heavy as 250 or 300 pounds; not many as heavy as that.

Q. Did it require any derrick for removing the rock that was used from the cars to the lighters?

A. No, sir; it was all thrown off by hand; also from the lighters to the work by hand.

Q. How was it conveyed from the car to the lighter?

A. By hand, thrown off by negro labor.

Q. The rails were laid close to the end?

A. The cars ran close to the end of the dock, and the lighter was run up close to the dock, and to prevent it from falling overboard, and the rock was thrown from the car to the lighter.

Q. By one man?

A. One man took up one stone, and threw it over; it was very rare it required two men to get hold of one stone.

Q. And there was some distance to the further side of the lighter, was not it?

A. The lighters were all 26 feet wide.

Q. One man could throw a stone to the further side of the lighter?

A. Some of the smaller ones; not the majority of the stones. The majority of stone he could not.

Q. Were the men in the lighter adjusting the weights and spreading it around?

A. They kept a man or two on the lighter and built 1715 a wall around to prevent the smaller rock from going overboard, and also to square it up for measurement; pile it up so as to be measured.

Q. In the unloading, which class of stone was taken out first?

A. I don't think any distinction was made. I think they picked the stone out, just as it came, at random.

Q. They used the large stones for building a wall around the lighter?

A. They picked it up as it came on the lighter. Sometimes the lighter would be half-loaded before they built the wall.

Q. That wall, when it was built, was built of large stones, to remain in place?

A. Yes, sir.

Q. Was that wall taken off first, and put on the work?

A. Yes, sir. No, sir.

Q. They used it all on the work?

A. No, sir.

Q. All around the lighter?

A. No, sir. The side from which they started to unload.

Q. The wall nearest the lighter would be first removed?

A. Yes, sir, and when they removed that, that would tip the lighter over, and they would turn the lighter around.

Q. They removed the wall, before they removed the rock from the centre part of the lighter?

A. Yes, sir.

Q. All around?

A. All around.

Q. On each occasion?

A. Yes, sir.

Q. Your experiment about which the counsel spoke to you in relation to the specific gravity of a rock, was to determine for engineering uses in which the specifications provided that the specific gravity was to be not less than

A. Yes, sir, I received orders from Capt. Gillette to determine as near as I could, the average specific gravity of a lighter, and the method of doing that was specified to me that I was to select a certain number of samples from each lighter which in my judgment would represent the average weight of the lighter.

Q. The specific gravity was to determine its sinking power to hold down the brush, was it not?

A. Yes, sir.

Q. Not the determination of the mineralogical nature of the stone itself?

A. No, sir; that was not in question; it was simply to determine what proportion was up to the specifications, and also to determine what was the actual price that was to be paid if it was not up to the specification.

Q. The specific gravity was of the substance to be used for engineering purposes, was it not?

A. The specific gravity is—

Q. That is mentioned in the specifications as 2.4?

A. That was the specific gravity specified in order to get a stone that was a good, heavy stone.

Q. That would sink and stay in place?

A. Yes, sir.

Q. You treated the contractors pretty easy?

A. I did as I thought I was desired to.

Re-Cross Examination.

Questions by Mr. Blair.

Q. How many kinds of specific gravity are there?

1717 A. Only one.

Q. Only one,—that's right.

A. Specific gravity means—

Q. Never mind the definition; we all know that, you gave it to us the other day. There is only one kind of specific gravity, is not that true?

A. Yes, sir.

Q. Whether it be an engineering contract or in a book on chemistry?

A. Excuse me,—in a book on chemistry, there is something similar to that, but it is not called specific gravity, it is called the atomic weight.

Q. There is only one kind of specific gravity in the world?

A. That is all.

Q. Whether in chemistry or an engineering contract, or anywhere else, that's true, is not it?

A. I think so.

Q. When this little red book of regulations was given you, were you told not to follow it by Capt. Carter?

A. I was not.

Q. You were not ordered not to fail to follow it?

A. Yes, in one sense of the word, I was.

Q. How?

A. When I was told to carry out the work in the same manner I found it being carried out, that was in direct violation of the regulations that I received from Capt. Carter.

Q. Was that before or after you got this book?

A. It was before I got this book.

Q. When you got this book, and it was handed to you, did Capt. Carter tell you, Mr. Cooper, "Don't follow this book?"

A. In some instances.

Q. Did he when he handed you the book?

1718 A. No.

Q. Did he tell you not to follow the instructions?

A. In the book?

Q. Yes.

A. No.

Q. What did he say to you?

A. He did not give me the book personally; the book was not given me by Capt. Carter; it was handed to me by Mr. Sterly. Capt. Carter very seldom mentioned that book to me; he very seldom told me to follow the instructions.

Q. You receipted for it?

A. I did.

Q. You can read the English language?

A. I don't think its necessary to answer that question.

Q. And this book is written in English, is it not so?

A. Yes, sir.

Q. Now, you spoke of the method of unloading those lighters on to the works, by whose direction was the particular method which you have described, followed?

A. The contractor used his own method in unloading the stone.

Q. It was under your superintendence, was not it, as assistant engineer?

A. Yes.

Q. If you had desired the contractor for engineering reasons to unload that stone differently, you were in a situation to have compelled him to do so?

A. I could have dictated the method; in many instances I did.

Q. And possibly the beneficial results of this work in some respects come from your orders in that regard?

A. Yes.

Q. You so stated before?

1719 A. I think I had a great deal to do with the method of unloading those lighters.

Q. And your method of unloading those lighters contributed to the success of the work as an engineering project?

A. Yes, sir.

Q. Did you report the method of unloading those lighters to Capt. Carter?

A. I did not.

Q. Anywhere in this district, where you have been engaged as an inspector or assistant engineer, when there was small rock and dirt left in a barge, did you receive any instructions as to the disposition of it, ever at any time?

A. I can't remember that I did; I won't say I did not, I say I can't remember that I did.

Q. What did you do with it?

A. It was invariably thrown on the work, the very smallest was shovelled off and thrown on the work.

Q. Measured and paid for?

A. Yes; the barge was measured regardless of the size of the stone. If enough was of sufficient size to materially increase the measurement, in that case they were paid for.

Q. By whose orders were two and a half tons deducted of ballast rock that you spoke of in your direct examination? You said there was a deduction on this work.

A. I don't remember whether I deducted that or whether one of the inspectors deducted it; I could not tell you.

Q. Why did you deduct it from the ballast rock and not from the Florida rock?

A. Well, in this case it was quite a large amount; there was twenty yards on one lighter that was dirt and stuff
1720 that would have no beneficial effect whatever by being placed anywhere, and consequently, deducted.

Q. Was that paid for?

A. That deduction was not paid for.

Q. What was done with it?

A. Thrown on the lighter and unloaded.

Q. By what authority?

A. I don't see I needed any authority to do that; the lighter was there.

Q. You felt that you had authority to dump stone that did not come up to the specifications, and which was not paid for, on the work?

A. I don't see any authority was needed for doing that.

Q. It was beneficial to the work?

A. Not in that case, it was very largely dirt.

Q. If it was small rock?

A. If it was small rock, it would be some benefit.

Q. Even this dirt was of some benefit?

A. It would not do any harm, the water would wash it away.

Judge-Advocate: I offer in evidence and read the personal report of Capt. Carter, having reference to the second specification, charge 3, on page 17.

“United States Engineer Office,
Savannah, Ga., March 31, 1897.

“Brig. Gen. John M. Wilson,
Chief of Engineers, Washington, D. C.

“Sir:

The following is my personal report for the month of March, 1897, _____

“O. M. CARTER,
Capt. Corps of Engrs.”

1721 Judge-Advocate: The part at the lower part is that which bears on the specifications, where the absence during the month was to be accounted for or stated. This has been identified by Mr. McCarthy, the clerk from the Chief of Engineers' office in Washington. A copy will be attached to the record, marked Exhibit No. 295.

JOHN W. Q. STERLY, recalled as a witness for the prosecution, having been previously duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. Where was Capt. Carter, if you know, or your books will show, from the 2d, to the 9th, of March, 1897?

A. Capt. Carter left Savannah on the 2d of March and returned on the 9th, of March.

Q. Do you know where he was?

A. There is a telegram in Capt. Carter's book, which I sent to New York, and I received a telegram from him.

Q. Did you receive that telegram from him? (Handing witness telegram)

A. Yes, sir.

Judge-Advocate: This telegram which has been identified by the witness, as one received by him, is as follows:

"New York, 6 Mch. 1897. Sterly, 324 Duffy St. West. Philadelphia tomorrow. Here Monday, Savannah Tuesday afternoon Southern railway Grant Paulsen request. O. W. C." The "O. W. C." is a typographical error, undoubtedly.

Q. You have identified that telegram as one received by you?

A. Yes, sir.

Q. Did you make a reply to it?

1722 A. This is the reply telegram which I sent to Capt. Carter, and which is copied in a book which I had for Capt. Carter; you have got the book. (Here the book is handed to the witness) Yes, sir, that's the book.

Q. Well, find the telegram.

A. Here is one telegram, March 5, and one on March 6.

Judge-Advocate: The impression of a telegram found on page 208 of book B,—one of the books identified by Col. Gillespie. (Reading) "March 5, '7. Capt. O. M. Carter, University Club, Madison Square, New York. Frank Thompson wires that he will be glad to have you spend Sunday with him in Florida. Sterly."

Q. Is that a reply which you sent to his telegram from New York?

A. Yes, sir.

Judge-Advocate: (Reading) "March 6, Capt. O. M. Car-

ter, University Club, Madison Square, New York. Paulsen asks permission to substitute a larger cable from shore on Tybee to building of his telephone station instead of smaller wire now in use. Sterly."

Judge-Advocate: I offer the monthly report of the accused for the month of May, 1897. The body of this report is practically the same as for the previous month. I will only read its date, June 1, 1897. It is addressed to Brig. Gen. John M. Wilson, Chief of Engineers, Washington, D. C. "The following is my report for the month of May, 1897." The material part is the report as applying to this specification:—"If absent during the month,—date of leaving station, May 1, May 8, May 20, date of return to station, May 2, May 12, May 24. On leave or on duty, 8 to 10, duty 11 to 12 leave; 20 on leave; 21 to 24 duty. Very respectfully, Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs.

1723 Judge-Advocate: A copy of this will be attached to the record, marked Exhibit 296.

Q. Is that a copy of the telegram sent by you, Mr. Sterly?

A. That is the original telegram.

Q. Where did you procure it?

A. From the Postal Telegraph and Cable Company furnished it.

Judge-Advocate: I offer in evidence telegram, dated May 25, 1897, to "Capt. O. M. Carter, University Club, Madison Square, New York." Secretary Alger wires that Ambassador Haye says your detail entirely acceptable, you may therefore, prepare to go to London. Sterly. Official business, Gov. Rate, Paid."

The place from which it was sent does not appear.

Q. Why did you send that telegram, Mr. Sterly, the one just read by me?

A. I sent that because Capt. Carter was not in town, and I thought he was anxious to know it.

Q. Well, what was the basis of it?

A. Here is the original telegram from Washington, from the Secretary of War to Capt. Carter.

Q. Received?

A. Office Chief of Engineers, War Department, November 13.

Q. Any date there on which it was received?

A. May 25, 1897, from Washington to Capt. Carter.

Judge-Advocate: (Reading) "Washington, D. C. Capt. O. M. Carter, U. S. Army, Savannah, Ga. Ambassador Haye says your detail is entirely acceptable, therefore, you can prepare to go to London. R. A. Alger, Secty of War."

Q. You opened the telegram which contained the original of which this is the impression?

A. Yes, sir.

1724 Q. Under authority from the accused to open his telegrams?

A. Yes sir.

Q. Did you receive an answer to that telegram?

A. Yes sir.

Q. Where is it?

A. I destroyed it.

Q. What was it to the best of your recollection?

A. It was a telegram from Captain Carter to wire to the Secretary of War and to the Chief of Engineers and to Colonel Ludlow.

Q. To wire what?

A. I had to wire the contents of those telegrams, I dont remember the contents.

Q. You did send telegrams to those three parties?

A. Yes sir.

Q. Are those the telegrams (handing witness papers)?

A. Yes sir.

Q. Where was Captain Carter or where was his telegram dated from?

A. Captain Carter's telegram was dated from New York.

Q. Those are in your hand-writing?

A. Yes sir.

Q. Signed "O. M. Carter", each of them in your hand-writing?

A. Yes sir.

Judge Advocate:—(reading), "May 25th., 1897."
"To General R. A. Alger

Secretary of War, Washington, D. C.

Your telegram referring to my detail to Washington is received. Please accept my most sincere thanks.

"Paid"

O. M. CARTER."

Q. That was sent from Savannah?

A. From Savannah, yes.

1725 Judge Advocate: (reading)

"May 25th., 1897".

"To General John M. Wilson,
Chief of Engineers, U. S. Army,
Washington, D. C.

Secretary wires I shall go to London. Please accept my sincere thanks.

O. M. CARTER."

"Paid."

"May 25th., 1897."

"To Colonel William Ludlow
Army Building, New York

Have been detailed to London. Many thanks for your courtesy. Bon voyage.

O. M. CARTER."

"Paid."

Q. These were all written by you and sent by you from Savannah on the date written therein?

A. Yes, sir.

Q. Was that your own language used in those telegrams?

A. No sir, it was verbatim as I was told to telegraph.

Q. At the time?

A. Yes sir, it was a repetition of the telegram.

Q. A repetition of the telegram sent to you by Captain Carter?

A. Yes, sir.

Q. You have a list of the contractors, when does that list begin, at what date?

A. It begins at the fourth of September, 1880, and ends October sixth, 1896.

1726 Mr. Blair: (To the Judge Advocate) You will furnish us with a copy of that?

Judge Advocate:—Yes.

Q. When was this compiled?

A. It was compiled a few days ago.

Q. By yourself?

A. Yes sir.

Q. From the office records?

A. Yes sir.

Q. When did Captain Carter report here for duty, do you remember?

A. I dont remember the date but it was in the fall of 1884.

Q. When were contracts first let in Captain Carter's own name?

A. In the fall or winter of 1888, September, 1888, I think it was right after that, I think it was October or November, 1888.

Q. Did you underline with red ink certain contractors, what contractors are those?

A. Those are the contracts for dredging.

Q. And the others are all jetty work?

A. The others are jetty work.

Judge Advocate:—I offer this compilation in evidence as bringing in juxtaposition the name of the different contractors, since September 4th., 1880 up to the date of the last contract, and with other information which the Court will perceive as I read. This goes back to the first contract under Gen Gilmore which was mentioned by the counsel for the defense in reading from records and papers in relation to the advertising and the furnishing of prospective bidders with blanks and specifications.

Here the Judge Advocate reads the compilation above referred to to the Court).

Judge Advocate:—October there should be September.

Judge Advocate:—A copy of this will be attached to the record and marked Exhibit 297.

1727 The President: If there are no objections, the Court will stand adjourned until tomorrow morning at eleven o'clock.

(Here the Court at 2.55 o'clock P. M. adjourned until tomorrow morning, February 18th, 1898, at eleven o'clock A. M.)

THOMAS F. BARR
Col. & Asst. Judge Adv. Genl.
Judge Advocate.

1728

United States Court Room,
Savannah, Georgia, February 18, 1898.

Court met pursuant to its adjournment of yesterday at eleven o'clock a. m.

Present:

All members of the Court and the Judge-Advocate.

The accused, his counsel and the Reporter, W. O. Tarver, were also present.

The President: Court will come to order.

JOHN W. O. STERLY, a witness for the prosecution previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. (Handing witness book) What is that book?

A. New Fort at Tybee Island Letter Book.

Judge-Advocate: I offer in evidence and read:

"Subject: Construction of Wharf, Tybee Island, Georgia.

"United States Engineer Office,

"Savannah, Ga., November 24, 1896.

"Brig. Gen. Wm. P. Craighill,

"Chief of Engineers, U. S. Army,

Washington, D. C.

(Through Col. Peter C. Hains,

"Corps of Engineers, U. S. A.,

Div. Engineer, Southeastern Division,

Baltimore, Md.)

"General:

"The Venable Construction Company, to whom the contract for building a battery on Tybee Island has been awarded, desire to begin work at once. The delays have been so great that an advertisement of thirty days and the construction of a wharf of the character contemplated in my specifications of the 30th ultimo will retard work on the battery.

"I respectfully suggest therefore, that I be authorized to call for proposals for construction of wharf and railway by circular letter and ten days notice, and to modify the wharf so as to omit all bracing, the general character of the structure to be shown as on the tracing herewith.

"To save time and expense, it is proposed further to ex-

tend the wharf only to a depth of fifteen feet at mean low water.

"Please wire authority herein requested.

"Very Respectfully

Your obedient servant,

O. M. CARTER,

Capt., Corps of Engineers, U. S. A."

Q. Have you anything to show what amount was credited to Capt. Carter in the Sub-treasury in New York on March 30, 1893?

A. With the Assistant Treasurer, \$37,030.49.

Q. What amount was credited to him in the Merchants Nat'l Bank of Savannah on that same date?

A. \$1,005.62.

Q. What balance was on hand on March 31st, the same year?

A. At the end of that day, there was no funds on hand.

Q. What became of the money, do you know, or the credits?

A. Two checks were drawn for that amount in payment of voucher in favor of the Atlantic Contracting Co. or of E. H. Gaynor.

Q. (Handing witness paper) Is that the voucher for those payments?

A. Yes, sir; part payment.

Judge-Advocate: I offer in evidence and read: (The Judge-Advocate then read Voucher No. 8, Month of March, 1893, in favor of the Atlantic Contracting Co., John F. Gaynor, President, for \$38,076.11, copy of which is attached to the record marked Exhibit No. 298.)

Q. Where was Capt. Carter on the 31st of March in that year?

A. Capt. Carter was in Brunswick on duty.

Q. Do you know when that voucher was signed?

1730 A. The voucher was signed in blank by the contractor.

Q. Before the account was made up?

A. Yes, sir; invariably all vouchers for the contractor were signed in blank; I always kept them in the office.

Q. Do you know when that account was made up, when the amounts were filled in?

A. They were filled in after the monthly account was figured in.

Q. Do you remember when the monthly account was received?

A. The monthly account must have been received in the morning not later than the 1st of April; the work closed on the 30th,—31st.

Q. Then, on the 31st, the amount could not have been ascertained?

A. No, sir; unless the 31st might have been a Sunday, but the check would not have been drawn on Sunday.

Q. The check would not have been drawn on Sunday, had it been Sunday, would it?

A. No, sir.

Q. The Inspectors reports for the month's work are usually due and received when?

A. They are mailed by the Inspectors after the close of the work.

Q. On the last day of the month?

A. On the last day of the month, reaching the office on the 1st day of the month.

Q. When did Capt. Carter return to Savannah?

A. Capt. Carter returned on the 2nd of April.

Q. Look on page 86, Miscellaneous N. 18?

A. On page 86 is Capt. Carter's personal report.

Judge-Advocate: I offer in evidence and read from Capt. Carter's personal report to the Chief of Engineers for the month of March, dated April 3rd, 1893:

"Date of Leaving Station: 13) 25 27 30

"Date of Return to Station: 19) 26 28 April 2.

"On leave or on duty: Leave. Duty.

"Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps Engrs."

1731 Q. On that date, when everything was checked out from the sub-treasury in New York and from the Merchants Nat'l Bank in Savannah, was there any money standing to the official credit of Capt. Carter in any other bank?

A. No, sir; not at that date.

Q. At that time was there any money due either the contractors or other persons?

A. Yes, sir.

Q. Do you know to what extent?

A. At that time there was money due for the dredging

contractor, and there was money due for the balance of the payrolls which had not come to the office yet at the end of the month and there was a minus balance on Savannah Harbor at that time; we drew it out against the total balance on hand.

Q. (Handing witness paper) What is that paper?

A. That is the office computation for work done at Savannah Harbor during February, 1895.

Q. I notice under the head of "Pile Work", encircled by a blue pencil mark, "Barge and Hose"; after "100 linear feet, Estimate for Barge and Hose",—in whose handwriting is that "Barge and Hose?"

A. Capt. Carter's handwriting.

Q. Can you explain its meaning?

A. It means that the payment;—that 100 linear feet of work was estimate for the hire of the barge and for a certain number of hose.

Q. Hire of a barge by whom?

A. By Capt. Carter from the Atlantic Contracting Co.

Q. And the purchase of hose from The Atlantic Contracting Co.?

A. Yes, sir.

Judge-Advocate: A blue print of that computation will be attached to the record marked Exhibit 299.

1732 Q. (Handing witness paper) What is that paper?

A. That is Mr. Geisler's monthly estimate of work done in Savannah Harbor, February, 1895.

Q. Covering what period?

A. Covering the month of February, 1895.

Judge-Advocate: I offer this report in evidence, reading, however, only one item. A copy of the whole report will be attached to the record marked Exhibit No. 300.

(Reading) "200.0 linear feet, Pile Work, at \$1.60, \$320.00", with the annotation: "100 lin. feet of this are an equivalent for rubber hose and rent of barge."

Q. (Handing witness paper) What is this?

A. "Voucher No. 10, March, 1895, Paid to the Atlantic Contracting Company for Jetty Work" for work done during the month of February, 1895.

Judge-Advocate: I offer this voucher in evidence, and a copy will be attached to the record marked Exhibit 301. (This Voucher No. 10, just referred to, read by the Judge-Advocate.)

Q. (Handing witness paper) What is that paper?

A. Capt. Carter's Report of Operations, for Savannah Harbor, to the Chief of Engineers, for February, 1895.

Judge-Advocate: I offer in evidence Report of Capt. Carter dated March 9th, 1895, of Operations for the month of February, 1895, copy of which will be attached to the record marked Exhibit No. 302. (The Judge-Advocate then read the paper.)

I read from the Annual Report of Capt. Carter, being Appendix M of the Annual Report of the Chief of Engineers for 1895, page 1455:

"One hundred more linear feet of pile work were used at various places, making a total of 2,296 linear feet of pile work appearing in the monthly reports and estimates of the fiscal year."

Q. Look at Savannah Harbor Book, page 409; that is an official record?

A. Yes, sir.

1733 Judge-Advocate: I offer in evidence and read:
(Reading)

"Subject: Appropriation for Savannah Harbor, Ga.

"United States Engineer Office,
Savannah, Ga., July 12, 1897.

"Mr. Edward H. Gaynor,

Treasurer The Atlantic Contracting Company,
Savannah, Georgia.

"Dear Sir:

Replying to your inquiry of this date, I have to inform you that \$75,000.00 have been reserved to pay for work under your contract done in this harbor after June 30th, 1897. "You will be paid on August 2d, for all work done during the present month; and as early in the month of August as it shall have been earned, you will be paid the balance of the \$75,000.00. "After that date, no payments can be made until another appropriation is made; but certificates, which you may be able to negotiate, will be given you for any work done before funds become available again.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A."

I read from the same book, page 410: (Reading)

“Subject: Spurs and Training Walls, Savannah Harbor, Ga.

“United States Engineer Office,
Savannah, Ga. July 12, 1897.

“The Atlantic Contracting Company,
Savannah, Georgia.

Dear Sirs:

It is desired that the crests of the Spurs connecting the Training Walls with the river banks in Savannah harbor be lowered to mean low water. No funds are available for this purpose. It has occurred to me that you might make use of enough of the material removed to pay you for the necessary labor in connection therewith, thus entailing no expense on the United States for this much needed work. Please consider this matter and inform me whether you care to remove any rock and logs under those conditions.

Very respectfully,

Your obedient servant,

Capt. Corps of Engrs., U. S. A.”

Q. (Handing witness paper) Do you identify that paper?

A. That is an answer to that letter just read, to The Atlantic Contracting Company.

Judge-Advocate: I offer in evidence and read the following:

“The Atlantic Contracting Company,
John F. Gaynor, President.
Savannah, Ga., July 17, 1897.

“Capt. O. M. Carter,
Corps Engineers, U. S. A.,
Savannah, Ga.

“Sir:

In reply to your letter of 12th inst., regarding the removal of crest off spurs connecting training walls with river banks in Savannah river. We are willing to undertake the work and carry it forward as long as we can do so without loss to ourselves.

Yours very respectfully,

E. H. GAYNOR.”

Q. Do the records of the office show any authority from the Chief of Engineers modifying the contract, or authorizing the cutting off of the spurs connecting the training walls?

1735 A. Not that I know of.

Q. You would know it if such authority existed?

A. Yes, sir.

Q. Or cutting them off done?

A. Yes, sir.

Q. That there was authority or was not?

A. No, sir; there is no authority.

Q. Look at C. S. book, No. 2, page 230.

A. (Witness handed the Judge-Advocate the book and page referred to)

Judge-Advocate: I offer in evidence: (Reading)

“Subject, Appropriation for Cumberland Sound.

“United States Engineer Office,
Savannah, Ga., July 17, 1897.

“Mr. Wm. T. Gaynor,

Secretary of The Atlantic Contracting Company,
Fernandina, Florida.

Sir:

Replying to your inquiry, I have to inform you that should the pending bill appropriating \$50,000.00 for Fernandina, become a law, a check for \$3,000 more on account of work done by you, will be drawn to your order, not later than August 2, 1897.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs., U. S. A.”

Q. When did Capt. Carter leave Savannah?

A. Capt. Carter left Savannah on the 17th of July, 1897.

Q. Look at copy book, Miscellaneous No. 7, page 177.

A. Yes, sir. (Witness handed the Judge-Advocate the book)

Judge-Advocate: I offer in evidence and read:

“United States Engineer Office,

“Savannah, Ga., August 3, 1889.

1736 “Mr. Wm. T. Gaynor,

Fayetteville, N. Y.

“Sir:

Your contract for work upon Savannah Harbor and River, Ga., expired on July 20th last. You are informed that unless this contract is extended at your request, payments cannot be made. An application for such an extension should bear a date previous to that on which the contract expired.

Very respectfully,

Your obedient servant,

O. M. CARTER,

1st Lieut. Corps of Engrs., U. S. A.”

Q. Look at page 268, same book. What is that?

A. It is the first indorsement on an application from W. T. Gaynor.

Judge-Advocate: I offer in evidence and read: (Reading)
Fayetteville, N. Y., July 15, 1889. Gaynor, Wm. T. Forwarded by Lieut. O. M. Carter. On contract for jetty work in Savannah Harbor, Ga., expiring on July 20, 1889, requests an extension of sixty days. Delays caused by heavy rains. First Indorsement. U. S. Engineer Office,

Savannah, Ga., August 12, 1889.

Respectfully transmitted to
Chief of Engineers, U. S. A.,
Washington, D. C.

The delay in the completion of the contract has not been the fault of the contractor, and I respectfully recommend that the extension asked for be granted.

O. M. CARTER,

"S. H. 27, 1889." 1st Lieut. Corps of Engrs., U. S. A."

Q. Do you know if there is a copy of that communication from Mr. Gaynor in the office?

1737 A. Yes, sir; there is a copy in the office, and an official copy of the indorsement from the Chief of Engineers, filed with it.

Q. (Handing witness a paper) Is that a copy of the letter from Mr. Gaynor, referred to in the indorsement just read?

A. Yes, sir.

Q. In whose handwriting is it?

A. Mr. Connolly's.

Q. Which Connolly?

A. M. A. Connolly.

Judge-Advocate: I read the letter which is a copy of the original on which that indorsement was placed: (Reading)

"Fayetteville, N. Y.,

July 15, 1889.

"Lieut. O. M. Carter,
Corps of Engineers, U. S. A.,
Savannah, Ga.

Lieut.:

I beg leave to ask for an extension of sixty days on my contract for construction of jetties in the Savannah River, on account of delays unavoidably caused in the delivery of stone

by reason of the heavy rain during the past month. Had it not been for this I should have been through with the work.

Very respectfully your,

WM. T. GAYNOR."

The first indorsement I have just read.

"Second Indorsement.

Office of Chief of Engineers, U. S. A.,
Washington, D. C.

Application granted."

1738 3rd Indorsement. U. S. Engineer Office,
New York, N. Y., August 23, 1889.

Record Made.

"Subject, Contract Savannah Harbor, Ga.

Office of the Chief of Engineers, U. S. Army,
Washington, D. C., Oct. 9, 1890.

"Lieut O. M. Carter,
Corps of Engrs.,
Savannah, Ga.

Sir:

Referring to your letter of October 6, 1890, requesting copy of second indorsement on Wm. T. Gaynor's letter, of July 15, 1889, in which an extension of sixty days on his contract for construction of jetties in harbor at Savannah, Ga., was asked: the following is a copy of the indorsement referred to."

This is an official copy of the indorsement.

2nd indorsement. Office Chief of Engineers, U. S. Army,
August 16, 1889.

"Respectfully returned to Lieut. O. M. Carter, Corps of Engineers, who is authorized to extend contract as recommended. When such record as may be necessary, has been made, this paper will be returned to this office.

"By order of Major H. M. Adams, Corps of Engineers, in charge:

"THOMAS TURTLE,
"Capt. Corps of Engineers.

"3042—C—1889."

By command of Brig. Gen. Casey:

Very respectfully,
Your obedient servant,

THOMAS TURTLE,
Captain Corps of Engineers."

"A true copy:

THOS. H. REES,
1st Lieut. Corps of Engineers, U. S. A."

1739 Q. You say that letter is in Mr. Connolly's handwriting?

A. Yes, sir.

Q. It is dated, Fayetteville, N. Y.; do you know if Mr. Connolly was in Fayetteville, at that time?

A. No, sir.

Mr. Rose: That is an office copy; he says the original is in Washington.

Mr. Blair: I think it might go in the record, if you please, that it is indorsed: "U. S. Engineer Office, Savannah, Ga., received August 11, 1889."

Q. (Handing witness paper) What is that paper?

A. A letter from Capt. Carter to the Chief of Engineers, about dredging at entrance to Cumberland Sound, Ga.

Q. Is it a letter or a copy of a letter?

A. It is a copy of a letter. (Exhibit 303 attached to record)

Q. From the official records?

A. Yes, sir.

Q. (Handing witness papers) What are these five papers?

A. Supplemental Articles of Agreement between Capt. Carter and The Atlantic Contracting Company, dated 17th of March, 1897. (Exhibits 304, 305, 306, 307 and 308)

Mr. Rose: They are the inclosures to that last letter, are they not?

Judge-Advocate: Yes, sir.

Q. (Handing witness papers) Are those three papers from the official files of the Department? (Exhibits 309, 310, and 311)

A. Yes, sir.

Q. All of them?

A. Yes, sir.

Q. Do you know where Mr. Bangs lived at that time, March 17th, and 18th?

A. March 17th, his address was Fayetteville, N. Y.

1740 Q. Do you know what Mr. Hughes' address was?

A. His address is New York.

Q. Do you know either of those witnesses, James C. Bogart, or Henry Smith?

A. No, sir.

Q. Did you ever see those names on any papers at the Engineer Office, this district?

A. No, sir.

Judge-Advocate: It appears that these papers have been to the office of the Chief of Engineers and the War Department. Received in the office of the Chief of Engineers, March 18, 1897, and in the Record Division of the War Department March 23, 1897. I submit these papers that I have read; they will be attached to the record, marked Exhibits 303, 304, 305, 306, 307, 308, 309, 310 and 311. I ask the Court to examine these papers calling attention to the signatures to the guarantors' bonds.

Q. I hand you Cumberland Sound letter book, No. 2; that is the book you have before identified?

A. Yes, sir.

Q. Judge-Advocate: I offer in evidence and read letter found on page 210:

"Subject, Cumberland Sound, Georgia.

United States Engineer Office,
Savannah, Ga., June 15, 1897.

"Brig. Gen. John M. Wilson,
Chief of Engineers, U. S. Army,
Washington, D. C.

"General:

In compliance with your instructions of the 11th instant (19861) and in accordance with the provision of a concurrent

23

resolution of Congress—

1741 "That the Secretary of War be requested to furnish the Congress with such information as he may have in his possession with reference to the present condition of the harbor at Cumberland Sound, and to inform the Congress whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina,

"I have the honor to submit the following report:

"The project for Improving the entrance to Cumberland Sound, which was submitted by the late General Q. A. Gillmore, Corps of Engineers, in 1879, and which was revised in 1891 and again in 1895, aims at securing a navigable depth across the bar of 19 feet at mean low water. The mean rise and fall of tide is 5.9 feet.

"Operations under that project were begun in 1880, but on account of the lack of any system in supplying funds, which have been provided at long intervals and in totally inadequate amounts, it has been impossible to push forward the

works with proper energy, hence they have not obtained at any time the desired controlling influence on the most important hydrographic feature,—the channel location,—and the navigable bar channel has deserted the desired route entirely, the present channel crossing the south jetty about 7,000 feet seaward of its initial point. From the jetty crossing the sailing range runs about S 78 deg. 50 Ms. E, reaching deep water at a distance of somewhat more than a mile, and at a point nearly half a mile south of the outer end of the south jetty. The shoalest point on this line is found near its outer end, where the inner and the outer 15-foot curves are separated by a belt from 300 to 600 feet wide, with the least mean-low-water depths of somewhat less than 13 feet.

1742 “A comparison of the various surveys made since 1888 shows as might be expected under the circumstances, a gradual shifting of the channel to the south. Moreover, the period of increased depths upon which the channel entered in 1893 and which lasted until quite recently, is ended, the shoaling seriously threatening the commerce of the port of Fernandina.

“The discharge finds so much resistance in the long, shallow south channel that a new, short, northern route is opening, its location being nearly parallel to the north jetty and about 1,000 feet from it, thus forming an almost direct continuation of the deep water of Amelia Basin. The erosion of this new channel began in 1895, following the extension of the north jetty, and has advanced so rapidly that the channel now extends more than 3,000 feet into the shoal, with a least width of more than 400 feet between the 12-foot curves. Depths of more than three fathoms are now found where a sand shoal, bare at low water, existed a few years ago. Between the extreme easterly end of this 12-foot pocket and the 12-foot curve outside the bar there is still a stretch of about half a mile of lesser depth. This barrier is daily decreasing and there is reason to believe that sooner or later it will break down altogether and an uninterrupted new, north channel be established, when the closing of the gap in the south jetty can be commenced.

“The River and Harbor Act of June 3, 1896, appropriated \$5,000.00 for Improving Cumberland Sound and providing—

“That contracts may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project, to be paid for as appropriations may from time to time be made by law, not to exceed in the

aggregate two million three hundred and forty five thousand dollars, exclusive of amount herein and heretofore appropriated.

"Under the provisions of that Act a contract was entered into on October 8, 1896, with The Atlantic Contracting Company of New York for all of the material and labor necessary to complete the work. Operations have been carried on with such vigor by that Company that the funds provided by the Sundry Civil Bill of June 4, 1897, will not suffice to pay for what has been done already. Presumably, however, there is a limit to the readiness and the ability of the company to continue work without payment, and that limit may be reached during this critical period when the new, north channel is in process of formation, when an opportunity is afforded to close the sailing gap in the south jetty, to confine the channel between the jetties and increase the scour there,—all without interfering with navigation,—and when a failure to do this immediately means the loss of an opportunity for quick success which may not be presented again, and the probable closing of the port of Fernandina against much of its usual commerce.

"In view of the urgency of the situation and of the manifest advantages to the United States of aiding artificially in opening the new channel now, I am of opinion that the sum of \$500,000.00 should be made available immediately, \$50,000.00 of which should be used for sluicing and dredging, and the balance for raising the north and south jetties under the existing contract, without which work dredging will give no satisfactory or permanent relief.

"Two charts accompany this report.

Respectfully submitted,

O. M. CARTER,

Captain Corps of Engrs., U. S. A."

(2 charts herewith)"

Q. Yesterday you were testifying with reference to Capt. Carter's absence from the city; you recall that, do you?

A. Yes, sir.

Q. Has Capt. Carter, when going away on leave of absence, reported in writing to the Chief of Engineers his destination, and stated that his postoffice and telegraph address would remain at Savannah?

A. In these cases—

Q. No, no; has that ever been done to your knowledge?
Answer yes or no.

A. Let me think a moment please. In writing, notifying the Chief in Washington?

Q. Yes; his postoffice and telegraphic address would remain at Savannah?

A. Yes, sir.

Q. You have written such letters for him?

A. Yes, sir; that is—

Q. Just answer my question.

A. When he went away on duty.

Q. On leave of absence, I asked you.

A. On leave of absence, under authority, yes, sir.

Q. He reported where he was going, but stated that his postoffice and telegraphic address would be at Savannah?

A. When Capt. Carter went away—

Q. Can you answer my question, yes or no?

A. I cannot answer that Yes or No.

Q. Let me ask you again; has Capt. Carter when going away on leave of absence reported in writing to the Chief of Engineers his destination, but stating that his postoffice and telegraphic address would be at Savannah,—would 1745 remain at Savannah?

A. When he reported—

Q. Can't you state yes or no?

A. At times, yes.

Q. Did The Atlantic Contracting Company ever actually cut off the crest of the training walls referred to in the evidence produced here this morning?

A. I never go down the river.

Q. Did you ever know from the records that they actually did that work?

A. I would know.

Q. Is there anything in the records that show that they cut off the crest after the date of this letter?

A. No, sir.

Q. Letter dated in June 1897; there is nothing in the records to show that they did that work at all?

A. I don't know; I would have to look that up.

Q. Do you know whether there is anything in the records showing that Capt. Carter accepted the proposition of the Atlantic Contracting Company to do the work, as contained in that letter?

A. There is no letter on file, after the Atlantic Contracting Company accepted Capt. Carter's proposition.

Q. Did Capt. Carter make a proposition to them?

A. He asked them if they were willing to do it.

Q. Whether they were willing to do it?

A. Yes, sir.

Q. And they replied to that?

A. Yes, sir.

Q. After that there is no correspondence between them?

A. No, sir; but Mr. Ed. Gaynor was here, and he came always to the office.

1746 Q. I show you Exhibit No. 298; in whose handwriting is the written part, beginning underneath the heavy line where the word "Date" is down to the end of the ruling?

A. In Mr. J. B. Connolly's.

Q. And in whose handwriting is the receipt?

A. In my handwriting.

Q. Except the signatures?

A. Yes, sir; which is frequently done.

Q. I didn't ask you that, did I? You are there to answer questions, and not to volunteer anything, please. Will you tell me after the payment of the \$38,076.11, if there was any balance due the Atlantic Contracting Company?

A. Yes, sir.

Q. How much?

A. There was a balance due of \$20,584.51.

Q. That was 90 per cent, wasn't it?

A. Yes, sir.

Q. That was after deducting the ten per cent?

A. Yes, sir.

Q. On the first of April or 31st, of March,—the payrolls hadn't come in, had they?

A. Some; yes sir.

Q. Were they all complete?

A. Not all.

Q. Can you tell me when these payrolls were paid?

A. The other payrolls?

Q. The payrolls for March.

A. The payrolls for the month of March were paid at the end of March and the beginning of April, when funds were deposited.

Q. Can you tell me the date when funds were deposited to pay these payrolls in April, 1893?

1747 A. It was either the second or third of April that the deposit was made.

Q. On the second or third of April a deposit was made sufficient to pay the payroll?

A. To pay the balance.

Q. And pay the balance due under this contract?

A. Yes, sir.

Q. And also to pay the dredge?

A. To pay the dredge.

Q. Are you sure of that?

A. Yes, sir.

Q. And to pay the bills that were outstanding?

A. The bills were paid gradually as the vouchers were made out.

Q. There was sufficient money deposited to pay the bills?

A. Yes, sir.

Q. On the second or third?

A. Second or third; it may have been the fourth,—I am not sure,—it was the beginning of the month.

Q. Now, the second of April was on a Sunday that year?

A. Then it was not made out that way.

Q. It was on the third, then?

A. Must have been on the third; that is, if the office got the notification of a deposit.

Q. It may have been made before that time?

A. Yes, sir; but you could not draw on it because you would not know it.

Q. But as a matter of fact, you think you got the notification on the third?

A. The notification, to the best of my knowledge and belief, came about the third.

Q. How much was owing to the dredging men on 1748 the first of April or the 31st, of March?

A. I haven't got the figures in my head.

Q. Can you give me your best estimate of it in 1893?

A. In 1893—I may be way off in my estimate—there were usually five dredges at work during the period.

Q. You have testified that there was money due the dredgers?

A. Yes, sir.

Q. How much?

A. It may vary from \$15,000 to \$35,000.; I cannot tell without looking.

Q. Will you look and let us know at a subsequent time?

A. Yes, sir.

Q. In June 1897, there was paid to the Contracting Com-

pany,—in July, \$345,000.00, on account of Cumberland Sound, was there not?

A. On the 6th, of July.

Q. In July, there was paid \$345,000.00, was there not?

A. Yes, sir.

Q. The appropriation available was \$350,000.00?

A. Yes, sir.

Q. That left \$5,000.00?

A. Left \$5,000.00.

Q. And it was out of that \$5,000, that the \$3,000, spoken of, in the letter at page 230, in Cumberland Sound book, was to be paid, as you understood it?

A. Yes, sir; but it never left any funds.

Q. There was \$5,000 left applicable to Cumberland Sound.

A. Out of this \$5,000 some contingencies were paid which were due.

Q. How much, according to the reports of the inspectors and computations in the office, was there due the Contracting Company, after payment of the \$345,000.00 on Cumberland Sound in July 1897?

A. I can look at Cumberland Sound book in a moment and tell you. (After looking at book.) There was a balance due on the first of July, to the Atlantic Contracting Company for work done at Cumberland Sound, \$58,923.12.

Q. That is on the first of July, 1897?

A. First of July, 1897.

Q. How much had been deducted for the ten per cent?

A. We had deducted for the ten per cent, \$44,873.90.

Q. And the \$58,000 that was owing was in excess over and above the ten per cent deducted?

A. Yes, sir; we owed him just net that.

Q. The \$58,000 was net after the payment of the \$345,000, and after deducting the \$44,000 for the ten per cent?

A. Yes, sir.

Q. In the letter to W. T. Gaynor, dated July 15, 1889, it speaks of delay in getting the stone; do you know where the stone was got then?

A. I think I heard them say the stone came from the north; I don't know.

Q. You do not know anything about it?

A. I heard the inspectors mention that they could not get the stone from the north; that is a matter of memory.

Judge-Advocate: It will be necessary for this witness to get a book that I want, and he will also get the figures that

counsel want, and I would suggest that we take a recess while he gets them.

The Court then took a recess from 1.15 to 1.37 o'clock.

The Court reassembled at 1.37 o'clock, pursuant to recess. Present:

All the members of the Court and the Judge-Advocate:
The accused, his counsel and the Reporter, W. O. Tarver, were also present.

1750 Q. Have you the information that I asked for before the recess of Court, as to how much was due the dredgers for work done up to the 1st of April, 1893?

A. There was due them net, \$5,816.86.

Q. There was due the dredgers five thousand eight hundred and sixteen dollars and eighty-six cents, and there was due the Contracting Co. fifty eight thousand and odd dollars, and there was thirty-eight thousand and seventy six dollars paid, and twenty odd thousand dollars left?

A. Yes, sir.

Q. Can you tell when that dredging was paid for?

A. Yes, sir; it was paid right after the deposit on the 3rd.

Q. The 3rd of April?

A. The third of April; the deposit was made on the 3rd of April.

Re-direct Examination by the Judge-Advocate.

Q. You were asked by Counsel, in the cross-examination, if Capt. Carter, in reporting his departure or his absence informed the Chief of Engineers that his address would be Savannah, Ga., during his absence, and you said that that had been; can you point out a specific instance?

A. That he has reported—

Q. That he, in a communication to the Chief of Engineers, reported that his address would be Savannah, Ga.?

A. Yes, sir.

Q. Let me see it

A. (Witness hands an open letter book to the Judge-Advocate.)

Q. That is on page 216 of what book?

A. My book; official,—semi-official and official matters.

Q. Book in which you put telegrams and letters of what nature?

A. Anything relating to official business, and some private matter,—some personal, private matter.

Q. Is that letter on page 216 in your handwriting?

A. Yes, sir.

1751 Q. It bears no signature; that is, there is no signature legible?

A. It had a signature, but the ink did not copy; that letter was written over Capt. Carter's signature.

Q. Over Capt. Carter's signature?

A. Yes, sir.

Q. You mean over a blank signature?

A. Yes, sir.

Q. You remember that identical letter having been written over a blank signature?

A. Yes, sir.

Q. You say that was a signature signed there in blank?

A. Yes, sir; and I have seen the original letter here lately.

Q. You have seen the original letter here lately?

A. If I am not mistaken.

Judge-Advocate: I read and offer this in evidence: (Reading)

"Leave of Absence.

August 16, 1894.

"Brig. Gen. Thomas L. Casey,
Chief of Engineers, U. S. A.,

"Washington, D. C.

"General:

"I have the honor to report my departure on a seven days' leave of absence, taken by myself in accordance with par. 45 A. R. 1889 My address will be Savannah, Ga.

"Very respectfully, your obedient servant,

"Capt., Corps of Engrs., U. S. A."

There is no legible signature, but a faint trace of an impression, as the Court can see.

Q. Where was Capt. Carter at that time,—on that day?

A. Capt. Carter was out West at that date.

Q. Did you address him on that date, or about that time?

A. Yes, sir.

Q. Addressed to where?

A. Upper Basin, Wyoming.

1752 Mr. Blair: We object, if the Court please, to the introduction of the letter-press copy offered, on the ground that it is dated in August, 1894. It has nothing to do with any of the specifications relating to absences which have not been stricken out, and nothing, so far as we can perceive, to do with any other specifications still standing in the case.

1753 Judge-Advocate: I submit it to show the value of his statements.

Mr. Blair: If the Court please, let the Court take this telegram and read it, but we do not desire it spread upon the record, as has heretofore been done, until the Court passes upon it.

The President: The Court will retire.

The members of the Court then withdrew to an adjoining room, and the Court was closed; after which, the members of the Court resuming their seats, the Court was opened, and the President, in the presence of the accused, his counsel, the Judge Advocate and the Reporter, announced:

The Court sustains the objection of the accused.

Witness Excused.

1754 CASSIUS E. GILLETTE, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. Have you made any contracts for dredging Cumberland Sound while you have been in charge of that work?

A. No, sir.

Q. Was an appropriation available for such dredging?

A. Yes, sir.

Q. How much was it?

A. Fifty thousand dollars.

Q. When did it become available?

A. In July or August, 1897.

Q. Was that for dredging between the jetties?

A. Yes, sir.

Q. Did you have any offer from dredge men to do such dredging?

A. Yes, sir.

Q. At how much per cubic yard?

A. Ten cents.

Q. Was that for the same kind of dredging provided for in the supplemental contract proposed by Capt. Carter and read here a short time ago?

A. Yes, sir.

Q. In the same place?

A. Yes, sir.

Q. How about the relative amounts?

A. There was about one-tenth as much available at that appropriation as the two million cubic yards would have cost in the supplemental contract referred to; 2,000,000 cubic yards at 25c a cubic yard would have been \$500,000.00, which was ten times the amount of the appropriation.

Q. How much could you have excavated for \$50,000.00?

A. 500,000 cubic yards.

1755

Cross-Examination by Mr. Blair.

Q. Was that in the shape of a formal bid?

A. A verbal offer.

Q. From whom?

A. Rittenhouse Moore.

Witness excused.

Judge-Advocate: The Counsel recognize these books as the books identified heretofore?

Mr. Blair: Yes, sir.

Judge-Advocate: I propose to read a series of letters from the books of Capt. Carter.

I offer the letter addressed to Mr. John F. Gaynor, Fayetteville, N. Y., dated Nov. 2, 1885, on page 248 of Book No. 1.

1756 Judge-Advocate: (Reading)

"November 2, 1885."

"Mr. Jno. F. Gaynor,

"Fayetteville, N. Y.

"Dear Sir:

"If you know of any lumber men who want to buy pine lands in Ga., I think I can put you into something paying. A few days ago, when out on the R. R., I came across a man who has 9,000 acres of first class yellow pine, has never been tapped, and is 8 mi. from R. R. The country is high and rolling. It can be bought at 75c per acre. 5,000 more acres can be bought there.

"I can get a tract of 60,000 acres of virgin yellow pine on Altamaha River for \$1.75. This is probably one of the finest tracts in the State, as it is so near market. I expect to go out soon to examine into these lands & will find out all about them, title, kind of timber &c. In the meantime if you know of any one to whom you can sell, or if you are too busy and will send me the names of big firms who might want to buy, I will attend to the matter myself.

"It is not yet cold enough to go to work on our project, so I am looking up find lands & whooping up the Convention.

"Let me hear from you at your earliest convenience.

"Yours &c,

"O. M. CARTER.

"P. S. I have two or three other tracts of from 15,000 to 75,000 acres in view, but of course I must investigate thoroughly before doing anything.

"Unless there are firms that want to buy, however, there is no use in investigating.

C."

1757 Page 8, Book No. 2. (Reading)

"October 1st, 1886.

"The Chief of Engineers,

U. S. Army,

Washington, D. C.

"General:

"I have the honor to transmit herewith my Engineer Property for the U. S. Engineer's Office at Savannah, Ga., for the 3rd quarter, 1886.

"Very respectfully,

"Your obedient servant,

"O. M. CARTER,

"1st Lt., Corps of Engineers, U. S. A."

"1 Enclosure."

I offer the statement of an account on page 333 of book No. 2.

Mr. Blair: (Addressing the Judge-Advocate) Admitted that it is to Capt. Greene.

1758 Judge-Advocate: The accounts reads:

"Apr. 15, 1886, \$1600.		Int. at 6% on \$1600, Apr. 15 to Jul. 7,		\$21.86
Paid	July 7, 1886, \$200.	" " " "	1400, Jul. 7, " Aug. 5,	5.83

\$1600

Total Int.,

\$99.50

"Dear Captain:

"I send you today Exchange on N. Y. for \$299.50, which is, I think, the amount due you. With many thanks for your kindness,

"Very faithfully yours,

"O. M. CARTER."

I offer in evidence communication found on page 415 of Book 2: (Reading)

"May 24, 1888.

"Dear Captain:

"The old Gas Company here (using coal gas) made gas at cost to Company of 95c per M ft. The annual consumption was 60,000,000 cu. ft. The present Co. makes water gas. It costs 40c per M ft. and the annual consumption is 75,000,000 cu. ft. The cost to the Co. includes interest on investment, depreciation of plant, salaries, &c.

1759 "Be careful about the air jack and not let any inventor steal our ideas & leave us out. Hydraulic jack will not work as the cotton gets wet. I cannot find out the pressure applied in stowing cotton, but it is the maximum used by the old screw jack, which you have seen. I was just on the track of Minis, who agreed to go halves with me. I think we can arrange to give him 1/4 & you, John and I take 1/4 each if it comes to anything. Keep a record of the expenses & will share that anyway, but above all things don't let some one steal our thunder, as I believe there is something in it.

"I have just been offered a chance in a marble quarry which looks well. It is magnificent marble in appearance & the chances are that it will prove good all through. Do you know where is the best place to have it tested & its marketable value obtained? I'll send you a piece tomorrow. There are only about 5 men in it, & they are the best in Savannah. If it proves what we expect with an investment of \$10,000, the yield annually, net, ought to be \$120,000, with larger yield by increased plant. If it amounts to anything, of course I want you to go in with me, but say nothing to John as this is an extraneous matter. I hear nothing further about the R. R.

"I leave for Florida in a day or so & will be in the field for about 10 days. I think it will do me good.

"Truly,

"O. M. C."

It is addressed: "Dear Captain," and is on page 415. In the index "415" is "B. D. Greene."

Mr. Rose: That is the one where the "518" appears?

Judge-Advocate: Yes, sir; #415 is in the same figures as those made by whoever made the index.

Mr. Rose: "415" is in ink.

Judge-Advocate: I offer in evidence this letter, found 1760 on page 434 of the same book, No. 2: (reading)

"June 11, 1888.

"Dear Captain:

"What could you afford to pay for rock delivered to you on the cars at Savannah or at Brunswick (to be used at Fernandina)? I expect to go to some quarries on the line of the S. F. & W. in about 10 days & they say they will put rock in at Sav'h or Brunswick at whatever rates I say. Of course, I have not seen the quarries yet, but if the rock is good it will be worth looking into & I want to know what you think good rock, equal to N. Y. stone, would be worth delivered as stated. I have not yet seen Olmstead as he is at Rome.

"I go to Augusta tomorrow & get back in a few days.

"Truly,

"O. M. CARTER."

That is indexed B. D. Greene.

I read the official indorsement found on page 25 of Book No. 3: (Reading)

"2nd indorsement.

U. S. Engineer Office,
Savannah, Ga., October 5, 1888.

"Respectfully referred to the Chief of Engineers, U. S. A.,
"The connections indicated have been made. I will not individually report myself in charge of the Oconee and Ocmulgee Rivers until Oct. 24th, because I did not receive charge of them until that date. I did not receive charge on Aug. 20, but have changed the date to that as directed, so as to agree with Capt. Hoxie's report. The letters of Aug. 22nd and 28th from the Chief of Engrs. were filed by error with my September letters, and the error arose from that fact.

"I returned from leave of absence on Aug. 19, 1888. The 20th given was a clerical error.

"O. M. CARTER,

"1st Lt., Corps of Engineers, U. S. A."

That book No. 3 is marked "Lt. O. M. C., private."

1761 I offer in evidence letter found on page 71 of the same book, No. 3: (Reading)

"Nov. 22, 1888.

"Dear Captain:

"Mr. Clay has been here and has seen the whole cotton-stowage process, from the flooring to the completion of the

work, and expresses himself as perfectly satisfied that his pneumatic jack will be a success. I gave him all the ideas necessary for him to complete the work, i. e., all that I had not already given him last June the 6th. I also gave him my ideas about the new patent, which will, so far as cotton goes, knock the other out. My idea is to get the jack introduced and then get the method of tying cotton to prevent expansion after being compressed introduced later, after we have gotten out the first in the cotton ports. My scheme is (the later one) an improved method of tying cotton. I explained it all to Mr. Clay, and he says he feels sure that he can perfect the details and make it a perfect success. Now about the pneumatic jack, I think its use in stowing cotton will be only a small part of what it is really worth. I think we can develop it into a motor which for such things as street cars &c., will entirely supplant horse, steam or electricity. You see all the bearings. I spoke to Mr. Clay, and he admits it feasible, and he agrees to let the jack with all its possible developments and with reference especially to its use as a motor go to us. I gave him \$100.75 for his traveling expenses, and have his receipt. I did not talk much of the business part with him, as I told him that I preferred that all of that should be conducted through you, you being nearer him. He says that he wishes to draw up an agreement and sign it at once so that we can understand each other and know what we are doing. I told him that I wished him, Gaynor, Minis, and myself with him in the jack, but only you, Gaynor, himself and myself in the cotton tying business. He says he is perfectly willing to enter into any agreement we wish, and I told him I would write you my ideas on the subject, and then he could
1762 draw up an agreement with you, which would be perfectly satisfactory to me. I also look to the pneumatic jack to replace all hydraulic presses for compressing cotton, for forging gun steel, &c., as well as to use as motors on cars &c. In any agreement be sure to distinctly specify that the jack in all of its proper developments, all new patents, &c., relating to it, its use as a press, as a motor, in short all possible developments may belong to us, and that we shall own and control jointly all such patents and developments.

I see no reason why it should not be as valuable as the Westinghouse brake. The cotton tying apparatus, so that it shall not expend but remain dead weight, will bring a royalty of not less than \$200,000.00 a year, but I don't think it ought to be put on the market until we introduce the jack,—to gain

on both ends. Whatever you do I shall be satisfied with, but my suggestion is that you, Gaynor, Minis, Clay and I shall each have $\frac{1}{5}$ interest in the jack (in the other you, Gaynor, Clay and I have $\frac{1}{4}$ each) Clay's share to be paid for by his work, but that if the jack is not successful because of defects in the apparatus, that we five shall bear equally the expense of the work, Clay paying equally with the rest. That we shall control and own all improvements and developments as I have stated &c.

I think we have a thing which is worth millions—the best thing since the air brake. Do not neglect the contract with Clay and be sure to make it full and complete. He seems honest and fair and I have confidence in him yet it is better for all to have a clear written agreement. Whatever the Chili business comes to, this appears to be certain, and if Clay can only do his share, there is no doubt of great financial success.

"I do not see much of Minis, he did not seem as interested as he ought, but he was worried with business which accounts for it. He (Minis) will doubtless want more than $\frac{1}{5}$ —will perhaps not want Gaynor in. But I can arrange all that. 1763 I have advanced all of the money, done most of the work &c. So he cannot justly claim more than I have said. I told him that the patents &c. were all in hand, which I meant to indicate that you would look after them. Whether or not the patents are taken out in our names jointly or in Clay's alone you must determine but be sure they are safe. Minis just this moment came in and he is perfectly willing to make the disposition I assume, i. e. $\frac{1}{5}$ each—but thinks he ought to have $\frac{1}{4}$, and that you and Gaynor ought not to want each as much as he. But I explained Gaynor's value in labor troubles &c and he acquiesced in my opinion. Write me as soon as you can. I go to Atlanta again tonight. I fear I shall lose my hearing, as I have acute catarrh of the inner ear, which is difficult to treat and I suffer so much that I find it hard to do my work. In haste.

"Truly,

"To Capt. B. D. Greene."

"O. M. CARTER."

I read from page 260 of the same book: (Reading)

"Savannah, May 26, 1889.

"Dear Captain:

"Yours of the 24th, received. I saw Shappard and gave him the specimens I collected. From his partial tests he was very enthusiastic, saying I had the most valuable thing

in the country, that it would make all connected with it rich, &c., &c. Of course, I do not feel very sanguine, so many things have "gone to pot" but I cannot but feel that it may come to something.

"S. is to be here tomorrow night with complete analysis &c., and we shall know what to do. He advises no delay, says Scott and others are looking everywhere, and that if we find it valuable, it should be taken up at once least the secret gets out. I saw Gordon yesterday and told him I wished the same parties as before, viz—you, John, Comer, himself 1764 and myself in it. He objected. Said he wished to share equally with me but didn't wish to admit others &c. Said this was a new deal &c. It was much as I had anticipated, but of course you, John and I go in on my share, which may amount to something. Gordon and I drew up articles of agreement and we each put in \$500.00 to get options and bonds for titles, agreeing to put up \$2,000.00 more each to complete purchases if all is satisfactory. It was thought best that I should go to Fla. on Tuesday morning, if Shepard's report is favorable and buy at once. Gordon left and will not be here for a week. Shall you be here within a week? If not, can you manage to let me have \$2,000.00, if I should need it? I do not want that we should be frozen out of a good thing. I'll write you again tomorrow night after I see Shepard and before going to Fla. Gaynor is not here and I have not seen him in some days. Very truly,

"O. M. CARTER."

That is not addressed to any one, and there is no index to this letter book. The Court will have to judge of its value or nature from its contents.

The Court: If there are no objections, the Court will stand adjourned until tomorrow morning at 11 o'clock A. M. (Court adjourned at 2.55 o'clock P. M.)

THOMAS F. BARR,
Col. & Asst. Judge Adv. Genl., Judge Adv. Genl.

1765

United States Court Room,
Savannah, Georgia, February 19, 1898.

The Court met pursuant to adjournment of yesterday, this morning at 11 o'clock.

Present: All the members of the Court, and the Judge-Advocate.

The accused, his counsel, and the reporter, G. T. Cann, were also present.

CASSIUS E. GILLETTE, a witness for the prosecution, having been previously duly sworn, testified as follows:

Cross-Examination, Continued.

Questions by Mr. Blair.

Q. You said yesterday that Rittenhouse Moore offered to do dredging in the same place contemplated by the letter of Capt. Carter, at Cumberland Sound, for ten cents a cubic yard, which Mr. Moore was that,—the young man or his father?

A. His father.

Q. And did you talk with him much about it?

A. The conversation I think must have lasted ten or fifteen minutes. It was shortly after I came here; I was unfamiliar with the location or the conditions, and an appropriation of \$50,000.00 had recently been made for dredging and sluicing out Cumberland Sound, evidently to enable the work contemplated in that supplemental contract, which was disapproved, to be done.

Q. Well, now, lets get at the conversation with Mr. Moore,—did you talk with him as to what kind of dredge he proposed to use?

1766 A. Yes, sir.

Q. What did he say?

A. He had a sand-sucker which he used at Pensacola, where he got the same price per cubic yard.

Q. That was a barge, was it not?

A. I believe so; It had to be towed with a tug.

Q. It was not a self propeller?

A. It was not a self propeller, no sir.

Q. Did he make this offer of ten cents per cubic yard in the barge or in place?

A. I don't think that was specified; the expectation was

I was to do about \$50,000.00 worth of dredging there, and he wanted to do it at ten cents per cubic yard; it would have to be measured in the scow, you could not measure dredging out there on an ocean bar in place.

Q. You say that as an engineer?

A. Yes, sir.

Q. It could not be measured on the bar?

A. It would not be a practicable plan to do it that way.

Q. Therefore, without his expressly saying so, you understood that offer to be ten cents in the bin or in the barge?

A. Oh, yes, sir, certainly.

Q. And what depth of water was that dredging proposed to be done in?

A. Well, that was not a part of the proposition; it was understood it would be very shallow to begin on and would increase as the work progressed. The first part of the work would be quite difficult.

Q. Do you know the location down there?

A. Yes, sir.

1767 Q. And do you know the depth of the water across that bar, proposed to be dredged?

A. There is only a certain part where dredging would have been done, had it been done, between the jetties; it would be quite shoal part of the water.

Q. Well, how deep was the water?

A. I don't remember exactly; six or seven feet, something like that.

Q. What is the range of tide there?

A. Six or seven feet; seven feet, I believe.

Q. Five feet, nine, is it not?

A. It may be five feet nine, or six feet, nine; I don't remember positively.

Q. This is a chart of the entrance to Cumberland Sound, May and June, 1897, under the direction of Capt. O. M. Carter; is that a blue print, do you know, from the records of your office?

A. I believe it is; yes, sir.

Q. This represents the north jetty, and this the south jetty? (Indicating)

A. Yes, sir.

Q. Now, the proposed dredging was to be between those two jetties, I understood you to say?

A. Yes, sir.

Q. And about how far out from the land?

A. I think about three miles.

Q. And that is an open ocean bar, is it not?

A. It is less than three miles from the land.

Q. This is a scale of 500 feet to the inch?

A. It is more than that; two miles would be the average distance from Amelia Island.

Q. Had you given any consideration, or have you given any consideration, as to the line of that proposed dredging?

1768 A. The line proposed in the contract that has been referred to, the supplemental contract, was about parallel to the north jetty, and about one-third the distance from the north and south jetty, through this place.

Q. Examine the soundings there, please, and give the minimum depth that you observe.

A. At one place it is six feet out there, that would nearly be there (indicating) seven; yes, I see it is a little more shoal over there. (indicating)

Q. Here is a six feet curve, is it not?

A. Yes, sir.

Q. Inside the curve it varies from four feet, six, to six feet?

A. From four feet, six, to six feet.

Q. Five feet?

A. There is a narrow place here of six feet; the curves don't meet; there is a place through there (indicating) which is over six feet. Dredging could be begun through that gap. (indicating)

Q. And make your channel a curved channel?

A. To begin on, yes, sir; that would be probably to the advantage of the contractor, as the beginning of the work would be somewhat tedious; otherwise to make a straight channel he would have to take a machine on a shoal and then start forward, lifting the diggers, which would be rather slow; but taking advantage of that depth there, he could make better progress.

Q. And ultimately make the channel straight?

A. Yes, sir; moderately straight, cutting off that ridge there. (Indicating)

Q. Those depths which you have indicated, are mean-low-water depths, are they not?

A. Yes, sir.

Q. And the range of the tides, you say is six or seven feet?

1769 A. I think it is seven feet at that point.

Q. Now, that is an open ocean bar, is it not?

A. Yes, sir; there is something of a ridge on the ground where that north jetty is represented, but otherwise, it is open. The mean rise and fall of the tide is five feet and nine tenths.

Q. Have you observed the water in that vicinity, between the two jetties, as to whether it is rough or smooth water?

A. Well, for an ocean bar, I consider it quite smooth.

Q. Your experience having been largely on the Pacific coast?

A. Yes, sir.

Q. Do you know anything about the bar at Pensacola, or at Charleston?

A. No, sir; I think there is no particular difference, though, in all these bars on the South Atlantic coast.

Q. Have you even made any estimate as to the number of days during which a dredge could dredge in moderately shoal water, between those jetties, in a year?

A. No, I have not.

Q. Would you say that it could dredge more than half the working days of the year?

A. From the records of the office, the days on which the contractors have sunk mats at Cumberland Sound, I should think a contractor could dredge three-fourths of the days in a year, possibly, at the very beginning, he might not work so many; he would have to work only at high tide, if it happened to be rough; there usually I understand, it is rather smoother at high tide than at low tide.

Q. That is a suction dredge which was proposed to be used there?

A. Yes, sir.

Q. Did you understand from Mr. Moore the draft of that barge?

1770 A. I did at the time; in fact, I got the draft from his son; I have forgotten what it was; it was not very great.

Q. And what draft of tug would it take to hold a barge, such as Rittenhouse Moore described, over an open ocean bar?

A. The barge or the barge-dredge, was not thoroughly described to me.

Q. From your experience as an engineer, about what draft of tug boat would be necessary to take this barge, which you say is not a self propeller, and hold it over an open ocean bar?

A. That is a point about which I have not had personal experience; but a moderate sized tug. The average tug that brings in ships from out at sea to the Savannah harbor, ought certainly, to be able to do it; but that is a question, however, I would have to express an expert opinion on, never having seen the dredge at all.

Q. What is the average draft of the average tug you have mentioned?

A. That I do not know.

Q. You do not know whether it would take a seven foot or a 12 foot draft, to take and hold that barge out there on that bar?

A. I would not like to state an opinion as an expert on that point.

Q. If it should take a tug with a draft of 12 feet to hold this Moore barge out there, and the depth of the water at mean-low-water is less than six feet, when would be the only practicable time to work that dredge?

Q. You could only work a short time at high water, to begin on. The difficult thing about this contract, the difficult part, is the first part; but when you take two million cubic yards, it gets enormously cheaper, because in a machine like this, the expensive part is the constant turning, and you lose time in turning round. A tug has to take it down and turn and the amount of turning when the water is shallow, is very great, and of course, the number of hours they can work is small.

Q. As a matter of fact, with a suction dredge, the pipes follow the vessel, don't they? They are aft?

A. Not necessarily; there are in the Cape Fear, they are nearer the stern than the bow. I don't think they follow clear behind; I don't know how Mr. Moore's barge was arranged.

Q. But they necessarily follow after, that is to say, they don't project forward?

A. O, no.

Q. They trail?

A. They trail, yes, sir.

Q. Even if thrown out amid-ships, the suction portion, then

the further extremity of the pipe on either side would be in the rear or aft of the vessel, would not it?

A. I think not; the only suction dredge of that kind I have ever examined, and that only casually, was the Cape Fear, which did the work at Fernandina, and as I remember it, the suction when lowered, would be a little aft of amidships, in a moderate depth of water.

Q. How did this suction dredge operate, by storing?

A. She propelled herself forward, and there are teeth or rakes just at the mouth of the suction pipe, which cuts up the sand and the suction pipes draw the water and sand up into the barge.

Q. Then it passes over a grating and the sand is deposited and the water runs out?

A. Yes, sir.

Q. The sand is thus stored in a bin?

A. In the hold of the vessel.

Q. Do you know anything as to the cost to the Government of dredging at Pensacola harbor?

A. Only what Mr. Moore told me. He said he had 1772 dredged there a very large quantity, at ten cents a yard, and made money at it; but the next time, when the conditions were not quite so favorable, he wanted, I think 12, perhaps 15 cents, as an open market contract, and Major Mahan would not let him have it; he wanted to hold him down to the same old ten cents.

Q. You don't know that he got 64 cents?

A. He told me when the work first began, he got enormous prices; but the next time, he volunteered to do it at ten cents.

Q. Do you know what depth of water he dredged for ten cents?

A. I do not.

Q. Do you know the amount of dredging?

A. I do not.

Q. It would be much easier and cheaper, would it not, to dredge in 16 or 18 feet of water, than in six feet of water?

A. Certainly, because you can work a greater number of hours per day; but the dredging of this two million yards proposed at Cumberland Sound, the part Mr. Moore proposed to take, was the difficult part, and I suppose he knew what he was doing; that was his business.

Q. He proposed to do it at ten cents?

A. Yes, sir.

Q. Do you know whether any self propelling barge could cut that bar between the jetties, at the depths indicated?

A. I don't know; we made an experiment there. The dredge, Cape Fear, came down from Wilmington, at my request; we paid all expenses from the time she came until she returned; she dredged a small amount on the outer bar, 28,000 cubic yards, and the total cost of that was nine cents a yard. She tried through a mistake, not my intention, but by telegraphing, she tried to work between the jetties, and it was smooth mud that would not stay in the hold, but ooze 1773 out, and I believe with that kind of material it is senseless to dredge. When the jetties are built it would wash them out there and they are no good at all, and I was opposed to that kind of dredging.

Q. You say you dredged sand on the south jetty with the Cape Fear at nine cents?

A. Nine cents, and paid all her expenses from Wilmington down and back.

Q. That was the Government price,—you did that by hired labor?

A. Yes, sir, hired labor; I paid all the expenses of the dredge, crew and everything, including restoration of her stores and repairs, and everything; I put her in the same shape as she was before.

Q. And the insurance of that vessel?

A. No, sir.

Q. None of the "amortization"?

A. All except the "amortization".

Q. You also did some dredging across the south jetty, didn't you?

A. Hardly dredging; I removed or deepened the crossing of the south jetty.

Q. Out of this \$50,000.00 appropriation?

A. No, sir; that came out of a little balance left from a preceding appropriation; it may have run over it a little bit; but my impression is it was from another appropriation entirely.

Q. You say you got 28,000 cubic yards?

A. That is as I remember it; my assistant engineer figured that out yesterday; 28,000 cubic yards at about nine cents per cubic yard.

Q. Do you know whether it would be practicable to deposit your material in this six feet of water, between the 1774 jetties at Fernandina in scows alongside?

A. Would it be practicable?

Q. Yes.

A. Well, it would be a little difficult; do you mean with a clam shell dredge?

Q. No, with a suction dredge and put the material in the scows alongside.

A. It would be a little inconvenient, but I know of no reason to prevent its being done.

Q. Roughness of the water would not be any objection?

A. That would be what would make trouble, but it ought not to prevent the work.

Q. This offer of Mr. Moore was not accepted by you?

A. No, sir; because I did not want to do dredging in that place; I thought it was a waste of money.

Q. It was a mere verbal proposition, which came to naught?

A. Certainly. He came,—it was only a few days after I took charge of the office, he came in and made this proposition, and he said he understood the appropriation had been made for this purpose, and that he wanted the job, that he knew they were in a hurry, that the people of Fernandina were clamoring for a greater depth of water; he supposed it would be an open market offer and he offered to do it for ten cents a yard.

Q. Has Mr. Moore got any contract at Pensacola now, that you know of?

A. I don't know; he is practically, as I understand it, the contractor for the Savannah Harbor; he owns the dredge, but the contract is in the name of his son.

Q. That is all inside work?

A. Yes, sir.

1775 Q. As to Pensacola, do you know?

A. I don't know about that.

Q. Do you know anything about the cost to the Government at Charleston, for dredging on the ocean bar?

A. I do not.

Q. Or at Pensacola?

A. I do not.

Q. Or at Galveston?

A. I do not.

Q. I omitted to ask you; you intended to state, that price offered to you by Mr. Moore, ten cents, to the Court here, as showing that that was a reasonable sum for dredging between the jetties in the place indicated?

A. I thought it was a reasonable sum; yes, sir.

Q. And thinking so, you stated it to the Court?

A. I stated it; yes, sir; I thought Mr. Moore understood his business; he certainly made the offer in good faith, because he wanted the contract and came to my office for that purpose.

Q. As I understand your testimony you have had personally no practical experience in dredging on an ocean bar?

A. No, sir; the only dredging on an ocean bar I have ever had charge of was this little work done by the Cape Fear.

Q. You never have seen a suction dredge but one in operation?

A. Never to notice her structure; that is the only one.

Q. You never have figured upon the cost of dredging, except as you got it from the work of the Cape Fear, dredging on an ocean bar?

A. I had my assistant engineer also figure out the cost to the contractor, of the "Gedney", when she worked on Tybee Knoll, which is somewhat analogous; that was 1776 something between five and six cents a cubic yard; it is not certain, however, that we had all the items of the expenses.

Q. Have you examined the figures made as to the cost by the "Gedney"?

A. No, sir; Mr. Cooper figured that out for me, and he was not sure he had everything; he said between five and six cents.

Q. I understood you to say Mr. Gieseler?

A. No, sir; it was my assistant engineer, Mr. Cooper. There are two of them.

Q. He did not figure in that the cost, in that of the Gedney?

A. No, sir; he figured the expense to the contractor. P. Sanford Ross had the contract, and he could not do it with his machine, so reported; it was difficult for him to do it, so the Government took his contract off his hands, that part, at least, and the Gedney came down at the request of the officer in charge, and did the work, and he was to pay the contract price, and pay the expenses of the boat, including rental and insurance, but I think the insurance was left out, whatever that may have been, and the cost to the contractor was between 5 and 6 cents.

Q. You yourself, did not revise those figures?

A. No, sir; I did not check those figures at all; I understood the only item left out by Mr. Cooper was the insurance.

Q. Of course, you are not willing, not having checked the figuring, you are not willing to give it as your expert opinion that that was the true cost?

A. No, sir; I could not swear to it at all; I would say that the dredging at Fernandina, being of an exceedingly soft, easy moving sand, should be much cheaper than at Tybee Knoll, where the sand is hard; that is, it is reported, 1777 hard; I have not examined the sand at Tybee Knoll.

Q. You give that as an expert opinion?

A. The softness of the sand at Fernandina is in all reports in the office. I give that as an expert opinion; it is a very light, easy moving quicksand.

Q. You understand that quicksand on an ocea bar is soft sand?

A. Quicksand on any bar is soft sand, easily washed.

Q. Perhaps hard sand might be easily washed?

A. Easily dug by a sand-sucking machine.

Q. Do you mean soft, in that the material is easily moved by the currents?

A. Easily stirred up by the water or any process.

Q. Do you understand quicksand in a river, for instance—to be a sand in which if you step, a sand not covered by water, in which if you step, you sink with more or less rapidity, and you are not able to extricate yourself?

A. Well, that kind of sand I think, is invariably thoroughly well water soaked.

Q. I mean there is oftentimes no water to it, no depth of water to it.

A. There might not necessarily be; but I never heard of a man sinking in a quicksand without there were a few inches of water on it.

Q. But water more or less, still?

A. O, yes.

Q. You understand the same thing to be the meaning of a quicksand on an ocean bar?

A. I think the word "quicksand" means the same any where.

Q. Just like specific gravity?

A. Specific gravity is a constant thing; the substance which is examined has a variety of meanings, whether it is in 1778 mineralogy or engineering, the specific gravity is the same thing everywhere; but it is the substance, rock, and a variety of things, which makes it mean different things.

Q. That is true, you will find that out too later on; but

coming back to quicksand,—did you ever use a sounding pole on a quicksand, on an ocean bar?

A. I never did.

Q. You don't know how it feels when you strike it with a pole?

A. I do not.

Q. You don't know how it feels when you strike it with the sounding lead?

A. I do not. Mr. Marion Twiggs got into a quicksand at Cumberland Sound, and had a job to get himself out, as I understand, and so it is the same quicksand that may be in a river.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. The Cape Fear, I understood you, dredged 28,000 cubic yards?

A. Roughly, yes, sir.

Q. How long was she engaged in that work?

A. I think something over a month; she had a good deal of bad weather, and could not work.

Q. And in estimating the cost to the Government of that dredging at nine cents, you included the cost of her movements from the time she left her port until she returned to it?

A. Yes, sir.

Q. Where was her port?

A. Wilmington, North Carolina.

Q. Had the excavation continued and involved a 1779 larger quantity it would have materially reduced the cost of the dredging?

A. Yes, sir; undoubtedly very much, because the run was so very short, she could only go a few hundred yards, then turn round; a few hundred feet.

Q. After getting the work, started, she could have excavated much more every day?

A. Undoubtedly.

Q. And had she continued in service two months, the cost to the Government would have been very materially decreased?

A. With the same condition of weather it would, yes, sir.

Q. What is your estimate of the cost of the Cape Fear,—what could such a boat be purchased for?

A. I don't remember positively, but I think the Cape Fear cost one hundred thousand dollars.

Q. Then, having \$500,000.00 appropriation for the excavation of two million yards, she could have much more than paid for herself?

A. O, unquestionably, much more than paid for herself, and paid numerous dividends on the work of dredging too.

Q. She did some dredging at another point, I understood you to say?

A. Not that I know of.

Q. I understood you to answer Mr. Blair that she had done dredging at another point.

A. I gave the figures of the Gedney; but the only dredging was that work at the mouth of the Savannah river.

Q. What port does the Gedney belong to?

A. United States.

Q. At what port?

A. New York.

Q. That is her home port?

A. Yes, sir.

1780 Q. Under Col. Gillespie, I suppose?

A. She was at that time; I think she is now under Col. Ludlow, I am not positive about that.

Q. She was brought from New York here, and kept how long, do you remember?

A. I don't know; it was part of two years, 1894 and 1895; I don't know anything about the figures about that; Mr. Cooper was here at the time, and gave me the figures; I have just given, but he he did not know the cost of the insurance which had to be paid by the contractors.

Q. Everything else,—the cost of the labor, the salaries of the officers, the wages of the crew, their subsistence, and all other expenses were included?

A. All included and a large daily rental was also paid by the contractors.

Q. The estimate was from 5 to 6 cents a yard—excluding what the insurance cost?

A. Yes, sir; it is possible Mr. Cooper may have figured that out hastily and not accurately.

Q. What was P. Sanford Ross' figure on the contract?

A. Sixteen cents, I think.

Re-cross Examination.

Questions by Mr. Blair.

Q. You give it as an expert opinion in dredging, as an engineer, that under the contract as proposed, the supplemental contract, \$500,000.00 for two million yards, that would enable the contractors to buy a large dredge and declare enormous dividends?

A. Yes, sir.

Q. And pay for the dredge before they got through at 25 cents?

1781 A. Yes, sir; undoubtedly that is my opinion.

Q. At that point?

A. At that point.

Q. Between the breakwater?

A. Between the jetties at Cumberland Sound.

Q. And your experience in that behalf is such as you have detailed?

A. It is limited to what I have stated: I base my opinion more on Mr. Moore's offer than I do on my own experience.

A. Although that was a mere offer that bound nobody?

A. Well, it was a business offer; Mr. Moore came to my office, wanting that contract.

Q. It had not been reduced to writing?

A. O, no, sir.

Q. There was nothing to bind him?

A. Nothing whatever.

Q. He could have backed out the next minute?

A. I suppose he could; I don't know what he came there for, if he was going to make an offer and back out. He wanted the contract, and thought I was going to let it right away, as the people were in a hurry for the dredging to be done.

Q. Do you know the capacity of his dredge?

A. I do not.

Q. At what depth did the Gedney dredge down here?

A. I don't know; something between 20 and 25 feet; I suppose she got 26 feet of water at high water, or 20 feet.

Q. What is the minimum depth at which she dredged?

A. Somewhere I suppose between 15 and 20 feet; she deepened it to 20 feet at mean-low-water.

1782

2nd—Re-direct Examination.

Questions by the Judge-Advocate.

Q. After Mr. Moore made his offer, you found as a matter of fact you could do it for less than ten cents?

A. I found as a matter of fact; I did not want to do that amount of dredging which the bill provided for; I thought it was an absurdity.

Q. That much you did do, you found you could do for less than ten cents?

A. I did not figure it that way. There was a small amount of dredging to be done I found, and Mr. Moore's dredge was at Pensacola, and it would have taken three weeks to get it around there, and only that small amount of dredging. I don't know he wanted to do it at all. I found it better to get the Cape Fear, which was more convenient.

Q. You gave the people more water, as they desired?

A. Yes, sir.

3rd—Cross-Examination.

Questions by Mr. Blair.

Q. And none of that was done at the point specified in the jetties?

A. No, sir, it was outside of the jetties.

3rd—Re-direct Examination.

Questions by the Judge-Advocate.

Q. That you did not consider necessary at all?

A. No, sir; not that within the jetty; I thought that was a waste of money.

1783 Judge-Advocate: I offer in evidence and read from page 275, of letter book 3, the same book from which I was reading yesterday, when the session closed. (Reading)

"Paid. Night Telegram.

Savannah, Ga., June 6, 1889.

Capt. B. D. Greene,

No. 2, East 15th, St., New York City.

General Alexander desires me to ask you to telegraph to the Morning News at once the following statement over your signature; "The affidavit of Mr. Curtis, so far as it alleges

an attempt upon my part to bribe him and so far as it relates to statements said to have been made by me, reflecting in any manner whatever upon Lieut. Carter, is false in every particular. An affidavit to the effect will follow in due time."

O. M. CARTER,
C.

Telegram at night rate.

Judge-Advocate: I also offer and read from page 276 from the same book: (Reading.)

"Paid. Night Telegram.

Savannah, Ga., June 6, 1889.

"Capt. B. D. Greene,

No. 2, East 15th. St., New York, N. Y.

"The affidavit of Curtis to which my telegram refers is as follows: "In February B. D. Greene renewed the above proposition of Gaynor, stating that he would add to my salary \$500 per month, and would get Lieut. Carter to increase said salary, he said it was in his power to secure my appointment, and that he had also the power to have Lieut. Carter remove any obnoxious inspector, instancing Inspector G. W. Brown, who was removed to Fernandina in (1886) eighteen eighty six, and stating that Brown's successor was worth to him 1784 \$60 per day. O. M. Carter,

C."

"Telegram at night rate."

Judge-Advocate: I also offer and read from page 277 of the same book: (Reading)

"June 6, 1889.

"Dear Greene:

It is absolutely necessary that you send affidavit as I requested. I had a long talk with Alexander and other of my friends and they all agreed that the first thing to be done was for you and Gaynor to assert under the sanction of an oath (as Curtis has stated his story) that so far as it relates to you, it is unqualifiedly false. Things have been worked up to such an extent that a letter asking for a suspension of judgment will hurt us both immediately. Alexander and Mackall suggest the following affidavit: "Before me &c., personally appeared B. D. G. who &c. deposes and says, 'Certain sworn and other statements of a Mr. W. R. Curtis, reflecting

upon me, have been brought to my attention, and I desire to solemnly assert that I never approached Mr. W. R. Curtis with a bribe or other inducement to do any wrong; that I did not state that I had power to secure his appointment as inspector, that I did not state that I had power to have Lieut. Carter remove obnoxious inspectors, or that I had Mr. G. W. Brown sent to Fernandina in 1886, or that Mr. Brown's successor was worth to me \$60 per day. The sworn statement of Mr. W. R. Curtis dated May 31, 1899 is so far as it relates to me, or to statements attributed to me, that reflect in any manner whatever upon Lieut. Carter, is false in every particular. Sworn and subscribed to, &c.'

"You may not think this necessary just now, but it is 1785 true and due me and I am here and know the situation and you must do it at once. Don't fail to insert in the affidavit each and every statement that I have made. I ask John to telegraph you to come here. Every one thinks the affidavit ought to be published at once, other things can follow later. John's affidavit, so far as it relates to him, will be ready. I copy this sheet as I wish to remember the form of affidavit Gen. A. prepared it.

Truly,

O. M. C."

Judge-Advocate: I desire to state to counsel I did as I promised, I looked for copies of those letters read yesterday, and there are no copies in the public records for this date; I did not find them.

Judge-Advocate: I offer in evidence and read from page 10, book 4: letters. On the side of the book Lieut. O. M. Carter, Private; January 16, 1890, to March 16, 1891. (Reading)

"Subject, Surveys of Oconee and Ocmulkee Rivers.

"United States Engineer Office,
Savannah, Ga., Jan. 16, 1890.

"The Chief of Engineers,
U. S. A., Washington, D. C.

"General:

Referring to your letter of the 13th, instant, relating to the reports upon the surveys of the Oconee and Ocmulgee Rivers, I have the honor to state that the assistants have been busy, not only all day but even until ten and eleven o'clock at night, upon this work. Every effort is being made to hasten the

completion of the maps. Until this is done I cannot make such a study of the rivers as will enable me to submit a 1786 creditable report. I hope, however, to have the report upon the Oconee river, ready by the 28th, insts. Those upon the Ocmulgee and Upper Savannah will follow a few days later.

Very respectfully,
Your obedient servant,
O. M. CARTER,
1st-Lieut. Corps of Engrs. U. S. A.

Judge-Advocate: I offer in evidence and read from page 13, of the same book. (Reading)
Subject, Work done on Jetty at Tybee Roads, U
United States Engineer Office,
Savannah, Ga., Jan. 22, 1890.

"Capt. B. D. Greene,
C. E. & Contractor,
New York City.

"Sir:

The firm represented by you built at Tybee Roads a training wall over ten thousand feet long, from 40 to 60 feet in width, and of an average height of about five feet between January 28, and August 19, 1889. The bulk of the work, however, having been done in about four and a half months. In this work there were placed 108,552.28 square yards of log and brush mattresses; 11,561.71 cubic yards of stone, and 586.87 cubic yards of shells.

"It affords me pleasure to state that all work done by your firm has been executed with ability and dispatch and to the entire satisfaction of the United States.

W

"Very respectfully,
Your obedient servant,
O. M. CARTER,
1st-Lieut. Corps of Engrs., U. S. A."

1787 Judge-Advocate: I offer to put in the fact, it is as evidence, that on page 119, there is a communication addressed to Brig. Gen. Thomas L. Casey, Chief of Engineers, U. S. A. (Through Col. W. P. Craighill, Chief of Engrs. U. S. A. Division Engineer, S. E. Div.) Washington, D. C., and then there is a long report by Capt. Carter.

Mr. Blair: Which is a professional study.

Judge Advocate: I will read enough to tell its character; it is signed officially. (Reading)

"General:

With the view of securing data to assist in determining the proper width between the training walls, proposed for the improvement of the Savannah river I addressed, a little more than a year ago, a circular letter (copy inclosed) to those officers of the Corps of Engineers having charge of the improvement of tidal streams."

Judge-Advocate: And on page 205 I read a communication.

(Reading)

"Subject, Report of Survey of Altamaha River.

"United States Engineer Office,
Savannah, Ga., July 8, 1891.

"Brig. Gen. T. L. Casey,
Chief of Engineers, U. S. A.
Washington, D. C.

"General:

Replying to your letter of the 6th, inst. concerning my report of the survey of the Altamaha river, I have the honor to state that the reason why I concluded that it might not be possible to get the copies I asked for was that I was told

1788 in Augusta that they could get no more copies of the Savh river report, the addition being exhausted, and hearing that the Altamaha River report had been printed, and not having received it, I feared that the edition had been so limited that none had been furnished to the Engr. Dept., and being in the habit at the close of each fiscal year of binding for my private library one copy of each report of mine printed during that year, and hoping to obtain a copy for that purpose, I made application therefor on July 1.

"If the whole number asked for could not be sent, of course, '90, 80, 75 or 50', as you suggest, would have been very acceptable, and I was not aware my letter had been so worded as to be differently understood until the receipt of your letter of the 6th. I inclose a corrected copy of my request.

Your obedient servant,

Capt. Corps of Engrs.

(1 inclosure)

Judge-Advocate: I read a letter to which the counsel informs me he will object. It is addressed, I offer it is evi-

dence; it is addressed to Dr. W. S. Webb, President Wagner Palace Car Company, opposite Grand Central Depot, New York City. Referring to a business proposition.

1790 The President: The objection of the accused is not sustained.

1791 Judge-Advocate: (Reading)

“Subject, Adirondack R. R.

“United States Engineer Office,
Savannah, Ga, April 6, 1891.

“Dr. W. S. Webb,

Pres. Wagner Palace Car Co.

Opposite Grand Central Depot,
New York City.

“Dear Sir:

Referring to our conversation of the 27th, ult.. I beg to state that if any extension of your Adirondack R. R. to Tupper Lake, or elsewhere is contemplated I should be glad to have an opportunity of submitting a proposition for the construction of the same. My associates and myself are in a position to begin work at once; to take a contract for any amount of work and to carry the same forward to your entire satisfaction.

Very sincerely yours,

O. M. CARTER.”

Judge-Advocate: I also read from page 156 of the same book; (Reading)

“Subject, Capt. B. D. Greene.

“United States Engineer Office,
Savannah Ga., June 8, 1891.

“Mr. Wyllis Benedict,

Secy. &c. 160 Broadway, New York.

“Dear Sir:

Replying to your favor of the 5th, inst. concerning Capt. Greene, I beg to state that I have known him for a number of years and have found him scrupulously honest and trustworthy.

“He was formerly an officer of the Corps of Engr. U. S. A., but resigned some ten years ago to engage in more
1792 lucrative civil work. He was some years since connected with a firm doing contract work for me. He is a man of first-rate professional and business ability, and has excellent financial standing.

Very truly,

O. M. CARTER.”

Judge-Advocate: I read from page 330 of the book marked, "6, Capt. O. M. Carter, Personal" on the side.

"Subject, temporary absence from Station.

"United States Engineer Office,
Savannah, Ga., June 18, 1892.

"Brig. Gen. Thomas L. Casey,
Chief of Engineers, U. S. A.
Washington, D. C.

"General:

I have the honor to request authority to be absent from my station at Savannah, Ga., for a total period of five weeks, at such time or times between July 1 and Oct. 1, 1892, as will not interfere with any of my duties, retaining, during such temporary absence from Savannah, control of all the works under my charge and performing all of my duties as if I were at my station.

Very respectfully,

Your obedient servant,

O. M. CARTER,
Capt. Corps of Engrs. U. S. A."

Judge-Advocate: I offer in evidence and read from page 56 of the same book.

Mr. Blair, Colonel, I presume the same promise on your part to connect Mr. Rossiter?

Judge-Advocate: Not Mr. Rossiter, Mr. Hegeman.

Mr. Blair: Mr. Hegeman.

1793 Judge-Advocate: (Reading.)

"New York, Feb. 8, 1892.

"Mr dear Mr. Rossiter:

This will introduce to you Mr. W. W. Hegeman, whom I have associated with me and of whom I spoke to you to-day.

"It is possible that some work of construction may come up on some of the roads under Dr. Webb's control, in which case—remembering the letter you gave me to Dr. Webb nearly a year ago—I beg that you will kindly give Mr. Hegeman a letter to Dr. Webb, which will explain who he is, and secure for him an audience. Thanking you in advance for the courtesy, I am,

Very sincerely your,

O. M. CARTER."

Judge-Advocate: I call the attention of the Court to page 1552 of the record of the Court's proceedings, in which I say reading from the stock book of the Empire Construction Company, found among the papers and documents of the accused, and testified to by Col. Gillespie; I say, reading from the stock book, "Stock Ledger, Folio 21, Original No. 1, do 1, No. 10, Number of shares 100, to whom issued, W. W. Hegeman, dated September 10, 1891; from whom transferred, Capt. B. D. Greene, this certifies that W. W. Hegeman is the owner of 100 shares of the capital stock of The Empire Construction Company, transferrable, etc, City of New York, this 10th, day of September 1891. James E. Chandler, Secretary." The name of the president does not appear and across the face of it 'Cancelled, B. D. Greene, President'—"

Mr. Blair: And it appears, Colonel, does it not?—that that stock was never issued?

Judge-Advocate: The certificate is still in the book and across the face of it 'Cancelled.'

1794 Mr. Blair: And therefore, the certificate never was delivered.

Judge-Advocate: The certificate was found undelivered, and the value destroyed by having been cancelled; the name appears, and the interest appears; as I promised, I would make it appear to this Court.

Judge-Advocate: (Handing counsel for the accused papers) I need not prove that they came from my custody.

Mr. Rose: State it.

Mr. Blair: No.

Judge-Advocate: I state these are from the papers sent me by the War Department as among the effects of the accused.

Judge-Advocate: A telegram received from New York; (Reading) "To Capt. O. M. Carter, Savannah. Wire what hour you will be at St. James Hotel; will wait for you; important. Captain wants Fernandina check. W. W. Hegeman."

Judge-Advocate: That is dated the 9th, of the 10th, month, 1891.

Judge-Advocate: And these letters (Reading)

“The Empire Construction, 50 Broadway,
New York, Jan. 20, 1892.

“Capt. O. M. Carter,
Corps Engrs. Savannah, Ga.

“Dear Captain:

In answer of yours of the 18th, inst., beg to say that the latest advices are that Buell & Co. have secured a loan of \$1,000,000.00 at 6% for one year, and intend to proceed with the construction of the line to Pt opposite Huntington. He notified me to shut off all negotiations here, and I conclude has made a trade with parties in Columbus, identified indirectly with the C P. R. R. who offered some time ago to 1795 go into the deal and divide profits on construction and coal lands equally with them.

“A short time ago Mr. Ramsey, Gen. Manager of the “Big Four” wrote me that his company was ready to enter into a proper traffic contract with the L & H road, and requested that I should submit brief of the points we desired covered; and on the 11th inst. I mailed him such information but have not yet heard from him in reply.

“I have Mr. Buell’s promise to give me fuller information shortly. Until then the matter is in such tangled condition that I am at a loss to know whether it would be possible to regain control, or a substantial interest in the project again. Will advise you fully of any further development: there have been so many flashes in the pan out there that this last may be another one of them.

“It is reported that the Chicago and NorthWestern is going to extend its line from the Black Hills to the Pacific Coast. Such a line would involve the construction of very heavy and good paying work.

Truly yours,

W. W. HEGEMAN.”

Judge-Advocate: I offer also this communication: (Reading)

“The Empire Construction Company, 50 Broadway,
New York, Jan. 22d, 1892.

“Dear Captain:—

I am just in receipt of a letter from Mr. Buell, who says, in relation to the loan he has arranged,—“Our loan is a straight loan of \$1,000,000.00 for 12 months, on our notes,

with the bonds as collateral: no entanglements with any 1796 road; perfectly independent as a line &c.'

"He is to receive first payment on account Feby. 4th. It seems as if we might still be able to control the project by making some definite financial arrangement prior to that date.

"I do not know what conditions Buell has agreed to, covering commissions &c., to the parties who are to discount the notes.

"I will get all the information possible, so that in case you could come to New York within the next ten days, and there is still a chance to get the road, another effort can be made.

Very truly yours,

W. W. HEGEMAN.

"Capt. O. M. Carter,
Savannah, Ga."

Judge-Advocate: I offer in evidence and read: (Reading)

"B. D. Greene,
Consulting Engineer,
Room 107, No. 50 Broadway,

New York, Jan. 22, 1891.

"Dear Carter:

Yours at hand. I have seen Mr. Richardson, and he will see Mr. Depew soon and find out what he can. He says he knows they are going to build soon. He promises to let me know when time comes to make a proposal. Would it not be well for Mr. W. to write a line to C. V. and ask him about it, saying that he had a group of friends who wished to make a proposal when the time came. This would make it doubly sure. I can't find any book on bridges that is any good. Saxton don't know of any.

"Let me know if anything is done as I suggest above. 1797 When Mr. Bolles returns I will find out from him.—if he knows a good book.

B. D. GREENE.

"I shall be back here on Feb. 20, and we can see if anything can then be done about the Utica business; meanwhile I think my suggestion a good one."

JAMES L. GALLAGER, a witness for the prosecution, being duly sworn, testified as follows:

Direct Examination.

Questions by the Judge-Advocate.

Q. What is your full name, Mr. Gallager?

A. James L.

Q. William J.?

A. James L.

Q. Where is your residence?

A. Savannah, Georgia.

Q. Have you worked for the Atlantic Contracting Company of recent years?

A. Yes, sir.

Q. During what period?

A. From 1892 to 1895, and from 1896 to 1897.

Q. How late in 1897 did you work for them?

A. September.

Q. In what capacity?

A. As clerk and paymaster.

Q. You kept their books and accounts?

A. Yes, sir.

Q. During the year 1893, were you ever sent out to pay off the laborers and foremen?

1798 A. Yes, sir.

Q. Who sent you?

A. E. H. Gaynor, or John F. Gaynor.

Q. Where did you go?

A. To Augusta, Georgia.

Q. What work was going on there?

A. There was work going on at the river, above Augusta.

Q. Above Augusta?

A. Yes, sir.

Q. Who had the contract?

A. I could not tell you.

Q. Who was in charge there?

A. Mr. Wheeler.

Q. Do you know William Walsh or Welsh?

A. Yes, sir.

Q. Was he there?

A. No, sir.

Q. Do you know where he was at that time?

A. I could not well say; he was on some island around here, cutting brush.

Q. What was his business?

A. He was superintendent of a brush camp, or mat camp.

Q. A mattress camp?

A. Yes, sir.

Q. Who was inspector above Augusta on the river, when you went there?

A. Mr. Austin, Mr. W. G. Austin.

Q. Did you take any funds with you?

A. Yes, sir.

Q. How much?

A. Five hundred dollars.

1799 Q. For what purpose?

A. For paying off laborers and any other bills that would be against the company.

Q. Did you pay off?

A. Yes, sir.

Q. Paid off that amount?

A. Yes, sir.

Q. Had any payments been made that were not by you?—for the people for whom you were working?

A. I used to pay off every Saturday.

Q. But above Augusta, at this same point?

A. No, sir, I never paid off anything up there.

Q. Was there any other money called for for that work above Augusta?

A. None, except the labor and some of the accounts paid in Augusta after I paid.

Q. Subsequently?

A. Yes, sir.

Q. How much?

A. I could not exactly say. The \$500 was pretty well taken up for the sole business of labor and accounts in Augusta.

Q. Was the money so required to make final payment up there, and settlement of all accounts?

A. I could not tell you.

Q. What date was that, do you remember?

A. The 19th, of June.

Q. What year?

A. 1893.

Q. You were employed by the Atlantic Contracting Com-

pany up to the time that work was suspended under the existing contract, were you?

1800 A. Yes, sir.

Q. You left here on the 19th, for Augusta?

A. Yes, sir.

Q. You paid up to what date?

A. Well, I paid to the 19th; I made a memorandum here in my book when I went up there; I paid all bills up to the 21st, or the 22d. I went there two or three times; they were not ready the first time, and I had to go up again.

Q. During the present contract, when money was wanted, to whom was application made?

A. Well, to Capt. B. D. Greene.

Q. And from whom were funds received?

A. Well, I used to see some checks from Capt. B. D. Greene; I never have seen all of them; I have seen checks from Capt. Greene.

Q. What was done with them?

A. I could not tell.

Q. Do you know where they were deposited for collection?

A. I do not.

Q. Where was the account of the Atlantic Contracting Company kept here in Savannah?

A. The Southern Bank of the State of Georgia.

Q. Who signed the checks upon that bank?

A. E. H. Gaynor, Treasurer.

Q. Was there but one account?

A. One account; that was all.

Q. Was the signature of the president of the Atlantic Contracting Company also required on the check?

A. No, sir.

Q. Who filled out those checks?

A. I did, sir.

1801 Q. You were employed by them during what is called the big contract, were you not?

A. Yes, sir.

Q. Who furnished the funds for paying the expenses here at that time?

A. John F. Gaynor furnished funds for the first part of the contract; I don't know who furnished them afterwards.

Q. All funds received for outside, were from John F. Gaynor?

A. Yes, sir; up to the time E. H. Gaynor came to Savannah.

Q. That was for the payment of expenses down here?

A. Yes, sir.

Q. And you filled out the checks yourself at that time?

A. Yes, sir.

Q. And during the present contract, the checks for expenses down here were drawn out by you?

A. Yes, sir.

Q. About how much did you draw out during the present contract?

A. Some eighty odd thousand dollars.

Q. Were they used to pay anything except expenses for Savannah Harbor?

A. Yes, sir; some of that went into the Fernandina account.

Q. To what extent?

A. I could not exactly tell the amount of money; about four or five thousand dollars, I guess it was.

Q. Do you know what it was used for, what purpose, did you look at the vouchers?

A. There was some stuff, such as lathe yards and stock.

Q. You mean live stock?

A. Yes, sir.

Q. Up to what date was that eighty thousand dollars furnished?

1802 A. Up to the first of September; the 15th, of August or the first of September.

Q. Did you notify any person of the estimates of the amount of money due the contractor each month?

A. I used to send telegrams and sometimes write letters to Capt. Greene.

Q. What was the form of notification?

A. I used to say to him in the telegram or letter, that the estimate was fifty this month.

Q. Or whatever the amount might be?

A. Fifty or forty or thirty five or whatever the amount was.

Q. Do you know what that meant?

A. I do not.

Q. You were present at the trial of the case of James B. Brown against the Atlantic Contracting Company?

A. Yes, sir.

- Q. Were you then bookkeeper for the company?
A. Yes, sir.
Q. What was the suit for?
A. The suit for 60 cents a car deducted by Col. Gaynor from Col. Brown for small rock.
Q. Which had been deducted, he sued for the reduction?
A. Yes, sir.
Q. Did you hear Capt. Carter testify on that trial?
A. Yes, sir.
Q. Can you remember what his testimony was?
A. My memory of the testimony of Capt. Carter was that the rock that the specifications called for,—I don't know whether it was 25 or 15 pounds,—if it was under the specifications the rock went down the river, but was not paid for by the Government; the Government did not pay for rock that was under the specifications.
- 1803 Q. Where was your office here, the office of the Atlantic Contracting Company?
A. The first contract it was at the foot of Abercorn street.
Q. How many room did they have.
A. There were two rooms there.
Q. How were they furnished?
A. Just office furniture.
Q. They had a safe?
A. Yes, sir.
Q. And type-writer?
A. No sir.
Q. They did not have a type-writer?
A. No sir.
Q. Do you remember the price of stone paid Brown under that contract by the Atlantic Contracting Company?
A. I think it was sixty cents a ton; some was seventy cents, and then it was sixty cents, afterwards it was reduced.
Q. Under that contract from May, 1894, to July 31st., 1895, what was the price paid?
A. Sixty cents.
Q. That was the stone in relation to which the suit had been instituted?
A. Yes sir, sixty cents.
Q. Did they at any time have a type-writer in their office?
A. Never, sir, to my knowledge.
Q. Who attended to the stocking of their office with stationery in the beginning of the contract in 1892?

A. Mr. Connolly.

Q. What Connolly is that?

A. M. A. Connolly.

Q. That is the Connolly who was employed in the engineer's office here?

1804 A. Yes sir.

Q. And was in the employ of the Government at that time?

A. Yes sir.

Cross-Examination.

Questions by Mr. Charlton.

Q. Mr. Gallager, you were clerk and book-keeper of the Atlantic Contracting Company?

A. Yes sir.

Q. What was your salary?

A. My salary when I first started was seventy five dollars a month.

Q. And afterwards?

A. It was increased twenty five dollars more and that made it one hundred dollars a month.

Q. Were you largely in the confidence of that corporation?

A. I dont think so.

Q. Do you mean to suggest to the Court that \$500.00 was all that was paid for the Augusta work?

A. That is all I paid.

Q. I want to know if your idea in connection with that testimony was that was all that work cost this Company? As far as you know that was all it cost it?

A. As far as I know that is all it cost it.

Q. As far as you know, all the work in the Savannah River and Cumberland Sound cost \$80,000.00?

A. \$80,000.00 from the contract of 1896 and 1897 for Cumberland Sound and Savannah Harbor.

Q. Savannah Harbor and Cumberland Sound?

A. Some of that money went to Fernandina.

Q. That was only \$5,000.00?

A. \$5,000.00 something like that.

1805 Q. Your idea is that is all it cost?

A. Yes, sir.

Q. And Savannah Harbor?

- A. Part of the \$80,000.00 went to Fernandina.
Q. That was \$5,000.00; that is Cumberland Sound?
A. About \$5,000.00
Q. Fernandina is Cumberland Sound?
A. Yes sir.
Q. \$75,000.00 for Savannah Harbor and \$5,000.00 for Cumberland Sound?
A. I didnt say the exact amount, I said Eighty odd thousand dollars, and part of that went to Fernandina.
Q. The question of one or two thousand dollars either way: that is your idea, that is your knowledge of what it cost?
A. That is all I know it cost.
Q. That is all you do know it cost?
A. That is all I know it cost.
Q. When did you leave the employment of the Atlantic Contracting Company?
A. The first of September, 1897.
Q. Did you leave of your own volition or were you discharged?
A. I was discharged.
Q. You are now suing them?
A. Yes sir.
Q. What is your present employment?
A. The Rourke & Mitchell Sewerage Company.
Q. When did that start?
A. The first of December something like that.
Q. You were discharged in September and got employment in December?
A. Yes sir.
Q. What were you doing in the interval?
1806 A. From the 14th., of September to the 16th., of November I was quarantine inspector at Rincon.
Q. And from the 16th. of November?
A. I was not doing anything until I went to John Rourke.
Q. Literally nothing?
A. No, sir.
Q. You have not been doing work for the prosecution in this case?
A. No, sir.
Q. Who went for the witness Parker and brought him up?
A. I met him.
Q. Is that all you did?
A. That is all.
Q. You just met him?

A. Yes sir.

Q. What did you do with him?

A. I asked him about rock.

Q. Why should you be asking him about rock? What did you have to do with it?

A. There was a question about small rock.

Q. Who made the question?

A. Mr. Brown in the first place made the question about the small rock.

Q. That case has been tried by a jury, has not it?

A. Yes, sir.

Q. Who introduced you to the question?

A. Capt. Gillette asked me if I knew who discharged the rock.

Q. How did you come to go to Capt. Gillette?

A. He sent for me.

Q. He had a talk with you?

A. Yes, sir.

Q. Did he ask if you could see Mr. Parker?

1807 A. Yes, sir.

Q. You did see Mr. Parker?

A. Yes, sir.

Q. And talked with him about the rock?

A. Yes, sir.

Q. Carried him up to see Capt. Gillette?

A. He came up to see Capt. Gillette.

Q. Did you carry him up?

A. No, sir.

Q. Did he go there at your instance?

A. I told him Capt. Gillette wanted to see him.

Q. Do you spend your time watching the office of the attorneys of the accused?—to see who went up there?

A. No, sir, but a great many of those are watching me; I mean some of the defendant's witnesses are watching me going up to Capt. Gillette's office.

Q. Why should they watch you?

A. I don't know.

Q. They had a pretty shrewd idea you were watching them?

A. No, sir.

Q. As a matter of fact, you spend a good deal of your time out here on that corner?

A. I had a right to be there, if I wanted to.

Q. It is a sunny spot?

A. It is a sunny spot, yes, sir.

Q. Did you stay in the court house during the whole trial of the Brown case?

A. Yes, sir.

Q. Your idea is that Capt. Carter testified that rock that came below the sizes of the specifications, did not go into the work?

1808 A. Yes, sir.

Q. Tell us what he said.

A. Capt. Carter said, according to my memory, that rock that was below weight, according to the specifications, was put in the work, but never paid for by the Government.

Q. Do you remember how many times Capt. Carter said he had been down there?

A. No, sir.

Q. Did he testify about that at all?

A. I think he said he was down there several times.

Q. Did he say how many times?

A. No, sir.

Q. Did he say whom he went with?

A. He went down one Sunday with Col. Brown, down to the rock wharf.

Q. Now, Mr. Gallager, didn't Capt. Carter state this, that if that rock was below size, that of course, the Government would not pay for it, if it was rejected?

A. No, sir.

Q. Then you and Mr. Colding differ.

A. Well, I don't understand it that way.

Q. Your relations with Mr. Connolly are very pleasant, are they not?

A. Yes, sir.

Q. Entirely so?

A. Since he came back from Nicaragua he is not as friendly as he has been.

Q. Then you are not as friendly?

A. Not since he came back from Nicaragua.

Q. Since he came back from Nicaragua he is putting on airs?

A. Put on airs, yes, sir.

Q. You are still suing the Atlantic Contracting Company?

1809 A. Yes, sir.

Q. Bringing a new case every month?

A. I have brought one case, but I don't know whether my lawyer has brought any more.

Q. Is it your idea to bring one every month?

A. Yes, sir.

Q. And make it lively for them?

A. Yes, sir.

Re-direct Examination.

Questions by the Judge-Advocate.

Q. That \$500 you took to Augusta was for the spring work?

A. I went there in June 1893; I don't know what it was for.

Q. It was for work done the previous fall?

A. The men were working when I went there.

Q. I refer now to the fall of the previous year.

A. I don't know, sir.

Q. You don't know anything about it?

A. I don't know anything about that; I know I got \$500 and went up there and paid the bills.

Q. Any payments made the previous fall for work there, you know nothing about?

A. No, sir.

Q. Mr. Wheeler was superintendent?

A. Yes, sir.

Q. Who was Mr. Wheeler?

A. I don't know anything, except he is Mr. Wheeler; he has been superintendent ever since I have been employed by the Atlantic Contracting Company; Myron J. Wheeler.

Q. Whom did you get that \$500 from?

1810 A. Edward H. Gaynor; I got the check from him; I got the money from the Southern Bank.

Q. You got the check cashed yourself?

A. Yes, sir.

Q. When did you first speak with me in relation to this case?

A. Well, about a week after you came down here—no I never spoke to you until here, the other day; I met you about a week after you came down here.

Q. When did you speak to me first in relation to this case?

A. Two or three days ago, I think, sir.

Q. Have you been employed by any one to seek out testimony, or witnesses to be used in the prosecution of this case?

A. No, sir, I have not.

Q. Have you been approached by parties on the other side?

A. Yes, sir; Mr. Gaynor approached me and wanted to know if I would tell him what Capt. Gillette said to me, and asked me what I was going to tell Capt. Gillette; I told him I would tell him neither one or the other.

Q. You told him you would not tell whom, Mr. Gaynor?

A. I would not tell Mr. Gaynor—yes, sir.

Second Cross-Examination.

Questions by Mr. Charlton.

Q. You would tell Capt. Gillette, but would not tell Mr. Gaynor?

A. I never told Capt. Gillette; he never asked me; Ed Gaynor heard I was going to see Capt. Gillette, and he wanted to know if I would tell him what Capt. Gillette told me; I told him I would not, and he said that little difficulty between the company and I would be all right; he meant the suit I had against him.

Here the Court at 1-5 o'clock P. M. takes a recess until 1.20 o'clock P. M., and Reporter, G. T. Cann was relieved by Mr. Tarver.

1811 At 1.20 o'clock, P. M. the Court reassembled, pursuant to recess.

Present:

All the members of the Court and the Judge-Advocate; The accused, his counsel, and the Reporter, W. O. Tarver, were also present.

Judge-Advocate: I now offer in evidence the statement testified to by Mr. Harris, who was the assistant superintendent of the Plant System of Railroads on the docks here, the other day, and the Court will remember he failed to testify as to the receipts of cars of stone on Mr. Brown's account during the month of July, 1895. The counsel for the defense kindly consented that without returning to the stand, he should furnish it, and he has so furnished it. I now offer it in evidence, and it will be attached to the record, marked Exhibit 312.

ARTHUR S. COOPER, a witness for the prosecution, previously duly sworn, testified as follows:

Direct Examination by the Judge Advocate.

Q. In testifying on the last occasion, you testified, you approximated, said from your memory, as nearly as you could, the number of cubic yards of stone that were placed in the works in regard to which you were testifying, but that you would get the figures, did you get them?

A. Yes; I gave you a memorandum the other day.

Q. (Exhibiting paper) This is the memorandum?

A. That is a memorandum of the total number of cubic yards placed in the work between May, 1894 and July, 1895, both inclusive, which was 66,067.18 cubic yards, and of this 2,990.13 cubic yards was ballast rock, leaving 63,077.05 cubic yards of Florida rock.

1812 Q. I hand the witness the exhibit 312, which I have just submitted in evidence, and ask him if he added up those columns of weights of stone?

A. Yes, sir, I in connection with one of the clerks in the office; we computed the total weights furnished by the railroad company between those dates.

Q. The statement of weights on those separate sheets?

A. Yes, sir; we added up each page, and each page by itself.

Q. What did you make the grand total?

A. 118,186,190 pounds.

Q. How many tons?

A. 59,093.05 tons.

Q. Short tons or long tons?

A. Short tons.

Q. Tons of 2,000 pounds?

A. Tons of 2,000 pounds.

Q. And you testified that there was 63,077.05 cubic yards of Florida stone?

A. Yes, sir.

Q. That was stone received from the Brown contract?

A. From the Atlantic Contracting Company, furnished by Brown.

Q. From the Atlantic Contracting Company; Florida stone?

A. From the Atlantic Contracting Company; yes, sir.

Q. Furnished by Brown, as you understood?

A. Yes, sir.

Q. How much would it require to make a cubic yard in weight of that Florida stone?

A. Taking the total number of yards and the total pounds furnished by the railroad company, it gives a trifle less 1813 than 1,900 pounds per cubic yard; leaving out some fractions, it would be 1,900 pounds.

Q. And what weight would a cubic yard of stone be of the specific gravity of 2.4?

A. Between 2,350 and 2,410.

Q. Making between 400 and 500 lbs. difference as between the rock delivered and that which would have been delivered had the stone been 2.4 specific gravity?

A. Yes, sir.

Cross-Examination by Mr. Blair.

Q. How did you figure out those two weights; the 1,900 lbs. per cubic yard and the 2,400 lbs. per yard?

A. I took the total weight furnished by the railroad company; that I have assumed as being their actual weight as weighed on the scales, and I have taken my measurements during that same period, which was actually placed in the work, and I have divided the number of yards into the number of pounds, which gave the number of pounds per yard

Q. Now, how do you get the other one?

A. The other one I arrived at in two ways; that is the reason I put in two figures. The larger figure there is determined from an experiment which I made at Fernandina some years ago. That was by displacement of a barge of stone. I measured very carefully in probably a dozen or fifteen places on the lighter while the stone was on the lighter; that is down to the water's edge, and then I very carefully measured the stone, and after it was discharged I re-measured that barge, getting the height all around the lighter, and by computing the weight of water displaced, it would give me the actual weight of the stone on the lighter, and dividing that by the number of cubic yards on the lighter, by my measurement 1814 it would give me the number of pounds of stone per yard, which, in that case, was 2,650 lbs. That was granite. Granite has a specific gravity of 2.65. The Judge-Advocate asked me of 2.4, and I reduced that by that propor-

tion, which would make 2,410. The other figure I gave you was purely theoretical—one which I determined by the specifications—,150 lbs. to the foot; multiply that by the number of feet and it would give 4,050 lbs., and the percentage of voids is 42, I assumed, and subtracting the percentage of voids, leaves me the figure I give, 2,350.

Q. If you should subtract 5 per cent. for voids, what would you get?

A. Five per cent?

Q. Yes.

A. Would not get very much more.

Q. You would get 4,000 lbs. to the cubic yard, wouldn't you?

A. Yes, about that; a little more than that.

Q. Which is true, 42 per cent. of voids, or 5 per cent. of voids?

A. 42 per cent. is also the result of some experiments which I made—

Q. We will not go into that now. Which is true, the 42 per cent. of voids, or the 5 per cent. of voids?

A. The 42 per cent. I believe to be as near the truth as can be obtained

Q. How did you get 150 lbs. to the cubic foot?

A. That is the specifications; 2.4 specific gravity makes 150 lbs. of solid stone; 62 1-2 lbs. for water makes 150 lbs. to the solid foot.

Q. That is, figuring no holes in the stone?

A. That is solid stone; then I allow for voids at 42 per cent.

Q. What would you call voids; do you mean the porosities in the stone?

A. No, I mean the interstices between the stone.

Q. And not the porosities between the particles or lumps of stone?

1815 A. No, I did not take that into consideration at all; that was taken into consideration in the specific gravity.

Q. How is that last?

A. The porosity would come in in the actual weight of the solid foot.

Q. In order to get the weight, then, per cubic foot of this substance, you multiplied it by its specific gravity, 2.4, or rather you multiplied it by the weight of a cubic foot of water?

A. This last figure was purely theoretical; I assumed the specifications, and figured on the specifications.

Q. Then, according to that answer, I suppose you would get the weight of a cubic foot of any substance by multiplying the specific gravity of that substance by the weight of a cubic foot of water; is that right?

A. Yes, sir.

Q. And you think that gives the correct result, do you?

A. That is what specific gravity is for.

Q. Now is that right; say yes or no; is it right?

A. I think it is

Q. About these voids, did you say 42 or 44 per cent. of voids?

A. I said 42.

Q. Did you ever report it as 44 in Florida rock?

A. Possibly so.

Q. Which would be right?

A. The voids, of course, is an uncertain thing; it is something that may vary; one barge load might be 42 per cent. and another be 46; that is an uncertain quantity.

Q. You testified the other day that the fragments of rock weighing 25 lbs. and under would not fill in more than 5 per cent. of the voids?

A. No; I did not say that.

1816 Q. How did you put it?

A. I said that I thought that if the small rock of 25 lbs. and under was placed in among the other rock, that it would probably swell the measurement of the other rock about 2 1-2 per cent., provided there was 5 per cent. of the small rock.

Q. That is it; that only 2 1-2 per cent. of the fragments weighing 25 lbs. and under, that is the way you stated it, would go into the voids, and the other 2 1-2 per cent. would not?

A. You asked me to make an estimate, and that was the estimate I made.

Q. The other 2 1-2 per cent. would not go in?

A. Two and one-half per cent. would be in the voids, and the other 2 1-2 per cent. would actually swell the measurement by that amount.

Q. You said in your testimony fragments weighing 25 lbs. and under in the average load of this Florida stone; would your answer be any different if the question were asked

you as to the fragments under 25 lbs. in the average load?

A. That is, considerably under, you mean?

Q. No, not that are considerably under 25 lbs.,—all that under 25 lbs?

A. That is exactly what my statement was based on. If the 5 per cent. of stone was placed in the work, it would swell the measurement 2 1-2 per cent.

Q. You said 25 lbs. and under?

A. Yes, sir; 25 lbs. and under.

Q. The specifications allow fragments of 25 lbs. to go in?

A. I see what you mean. I did not mean to say 25 lbs. I meant to say any stone that fell below 25 lbs.

Q. That would go into the 2 1-2 per cent?

A. Yes, sir; I did not mean to include the stone weighing 25 lbs.

Q. In the average load of this Florida stone what be-
1817 comes of the other 39 1-2 per cent. of void space?

A. What do you mean?

Q. You say there are 42 per cent. of voids in this stone on the barge?

A. That would leave 58 per cent., would it not, as occupied by the stone?

Q. What becomes of that other space between the 2 1-2 and the 42 per cent. that you testified existed?

A. You have that pretty badly mixed up.

Q. Maybe you can enlighten me.

A. I think I can. If the voids was 42 per cent. and the balance of that space taken up by small stone, that would leave 22 per cent. of the voids not filled up.

Q. Do I understand you to say these fragments would fill half of that void space?

A. That is the estimate I made. It would fill half of it,—the actual occupied space,—that would have been occupied by the large stone if the small stone had not been on the barge; that is what I mean.

Q. It seems to me, then, we have got some percentages lost?

A. How?

Q. The fragments weighing less than 25 lbs. in the average barge load you say constituted 5 per cent. of the entire load; that is true?

A. Yes, sir.

Q. You say that in the piling of that stone upon the jetty, 2 1-2 per cent. would go into the voids?

A. Yes, sir.

Q. Two and one-half per cent. of that would go into the voids?

A. Two and one-half per cent. of it, leaving 2 1-2 per cent. of the space that is actually on the lighter as being occupied by small stone.

Q. And the 2 1-2 per cent., then, of the whole lighter 1818 load would be measured and paid for?

A. It is just the same as 2 1-2 per cent.

Q. Two and one-half per cent. of the lighter load would be measured and paid for?

A. Yes, sir.

Q. You say that on that entire lighter load of Florida rock the void spaces aggregated 42 per cent. of the entire volume; is that right?

A. I see what you are driving at now. My estimate of voids—

Q. Is that true?

A. No.

Q. Then what did you mean by your testimony just now?

A. I mean that the voids actually in that lighter load, as it was actually delivered, the small and large combined, I estimated it at 42 per cent. regardless of the small stone being in there. If it was all large stone, probably the per cent. might be larger. In other words, that reduction which you have assumed was made by putting the small stone in there, I do not admit in my percentage.

Q. If there are 42 per cent. of voids,; that is, if in that entire volume 42 per cent. is occupied by air,—that is what you mean by void spaces?

A. That is what I mean.

Q. If you could fill in these air spaces accurately, the measurement would not be increased, would it?

A. No, sir; but the weight would be increased.

Q. I am not talking about the weight; I am talking about the measurements. The measurements would not be increased?

A. No, sir.

1819 Judge-Advocate: I call the attention of the Court to page 15 of the printed specifications,—Specification XI. The Court will remember that the accounts current of the accused are before the Court, showing that no return has ever

been made by the accused of the amount referred to in the specifications as having been "received from one Alfred Hirt, for the United States, on or about December, 1896, the sum of one hundred and thirty-two dollars and ten cents.

JOHN W. O. STERLY, a witness for the prosecution, previously sworn, recalled, testified as follows:

Direct Examination by the Judge-Advocate.

Q. (Handing witness paper) Do you recognize that telegram?

A. Yes, sir.

Judge-Advocate: I offer in evidence and read telegram dated, "Washington, D. C., April 25th, 1896. To Capt. Carter, Southern Bank Building. Authority is granted to use Toccoa in raising steamer Santee, provided there is no private wrecking plant available for such work. A. MacKenzie, Engrs."

Q. Have you the telegram to which this is a response?

A. Yes, sir.

Judge-Advocate: The request for the authority granted, is indicated, is found on page 386 of the letter book, "Improving Ocmulgee River, Ga.," and is as follows:

"U. S. Engineer Office,
"Savannah, Ga., April 25, 1896.

General Craighill,

Chief of Engineers, Washington, D. C.

Steamer Santee is sunk in channel of Ocmulgee River. Owner wishes her raised by snag-boat Toccoa, and agrees to pay all expenses. Please wire authority for use of boat.

"Gov't Rate."

CARTER,
Engrs."

Q. (Handing witness book) What is that book?

A. Miscellaneous No. 25.

1820 Q. Look at page 273?

A. (Witness handed Judge-Advocate book at page indicated)

Judge-Advocate: I offer in evidence and read from page 273: (Reading:)

“Subject: Diving outfit.

“U. S. Engineer Office.

“Savannah, Ga., May 25th, 1896.

“Mr. Alfred Hirt,
“Steamer Santee,
Savannah, Ga.

“Dear Sir:

“The diving outfit which you were required to have here
“on Monday the 25th inst., has not yet been received. I have
“to inform you that the total expenses of the boat and crew
“from May 25th until the diving outfit is received from you
“will be charged to you. I regret that you have not been
“appreciative enough of the favors shown you to make an
“attempt to comply with repeated requests from this office
“to return the diving outfit which was loaned to you.

“Very respectfully yours,

“O. M. CARTER,

“Capt. Corps Engineers U. S. A.”

Q. (Handing witness paper) Is that from the files of the office?

A. Yes, sir.

Q. Received when?

A. On June 3, 1896.

Judge-Advocate: I offer and read in evidence: (Reading:)

“Savannah and Ocmulgee Line Steamers

“Savannah and Hawkinsville, Ga.

“Savannah, Ga., June 1st, 1896.

1821 “Capt. O. M. Carter,
“Savannah, Ga.

“Dear Sir:

“Your letter of May 29th to hand. In reply, I indeed appreciate your favors shown in raising the Santee, and favors I will never forget, for I needed them.

“As to the diving outfit, I will write to my son, Simpson A. Hirt, at Abbeville, Ga., to forward same as quick as possible. The fact is, when Capt. Burnett came a second time, May 21st. I left the whole matter in his hands and that of my son, S. A. Hirt.

“Business called me home, and I surely thought the two made arrangements to send the outfit to Savannah again. I

will take the matter in hand at once, and make the haste, as quick as possible.

“Yours very truly,

“ALFRED HIRT.”

Q. Look at page 303, Miscellaneous?

A. (Witness hands Judge-Advocate book at page indicated.)

Judge-Advocate: I offer in evidence and read from the same book: (Reading:)

“Subject: “Diving outfit, expenses, etc.

“U. S. Engineer Office.

“Savannah, Ga., June 6, 1896.

“Mr. Alfred Hirt,

“Greencastle, Indiana.

“Dear Sir:

“It became necessary to send a messenger for the diving outfit, your promise to return it when called for not having been observed. The expenditures on your account have been \$132.10. A sight draft for that amount on you, at the 1822 First National Bank, Greencastle, Indiana, has this day been drawn, which I trust you will immediately honor.

“Very truly yours,

“O. M. CARTER,

“*Capt. Corps of Engrs. U. S. A.*”

Then on page 318: (Reading)

“Subject: Remittances.

“U. S. Engineer Office.

“Savannah, Ga., June 16, 1896.

“Mr. J. F. Hirt,

“Baldwin, Miss.

“Dear Sir:

“On the 6th inst., the following letter was sent to your father at Greencastle, Indiana. The draft referred to therein was drawn by J. W. O. Sterly, Chief Clerk, to whom your check should be made payable. ‘It became necessary to send a messenger for the diving outfit, your promise to return it when called for not having been observed. The expenditures on your account have been \$132.10. A sight draft for that amount on you, at the First National Bank, Greencastle, Indiana, has this day been drawn, which I trust you will immediately honor.’

“The draft in question has been returned with the information that your father sailed for Europe the Saturday preced-

ing its receipt, and that you were his partner. As this money has been paid out on your father's account I hope you will send immediately a check for the amount, made out as requested.

"Very respectfully yours,

O. M. CARTER,

"Capt. Corps Engineers U. S. A.

"J. W. O. S.

1823 Q. (Handing witness paper) That is a letter found in the files of the department?

A. Yes, sir.

Judge-Advocate: I offer in evidence: (Reading)

"Mobile and Ohio Railroad Co.

Baldwin, Miss, Station,

"June 20th, 1896.

"Capt. O. M. Carter,

"Savannah, Georgia.

"Dear Sir:

"Yours of the 16th inst. to hand; contents noted, and in reply: Father is now in Europe, and as I am only attending to his business while he is abroad, and not his partner,—I am not familiar enough with the nature of your claim to settle it now. But would advise you to wait until his return for a settlement, or send me an itemized account of expenses properly signed and sworn to.

"I think \$132.10 is rather a heavy bill of expenses, and not knowing much about this case, will kindly ask you to enlighten me on this subject all you can, as I must be responsible to my father for every act.

"Yours very truly,

"J. F. HIRT."

Q. Look at Miscellaneous Book No. 26: Turn to page 198.

A. (Witness handed the Judge-Advocate the book at page indicated.)

Judge-Advocate: I read in evidence from page 198 Miscellaneous Book No. 26: (Reading)

"Subject: Sunken Steamer Santee, and money due on same.

“U. S. Engineer Office.

“Savannah, Ga. Oct. 20, 1896.

1824 “Mr. Alfred Hirt,
Greencastle, Indiana.

“Sir:

“In the Spring of this year, the Steamer Santee owned by you struck a snag and sunk in the Ocmulgee river below Abbeville. Permission was granted you to use the U. S. snag-boat Satilla to try to raise her, provided you would bear the expenses connected with the work. In addition to the boat you were allowed the use of a complete diving outfit owned by the United States. Before the work was completed, you left without paying for it, the balance due by you being \$132.10. This amount is made up of wages of the crew and expenses connected with the return of the diving outfit to Savannah, etc. The money was paid out on your account at your urgent request, and although various efforts have been made to secure reimbursement of this amount, such reimbursement has not yet been made.

“You came to me represented to be an honest and an honorable man; if such be true, you will immediately pay the amount due by you, and thus avoid any further action in the matter.

“Very respectfully yours,

“O. M. CARTER,

“Capt., Corps Engineers, U. S. A.”

“Copy sent to Mr. J. F. Hirt, Baldwin, Miss.”

Q. (Handing witness paper) This is from the original files?

A. Yes, sir.

Judge-Advocate: (Reading)

“Savannah and Ocmulgee Line Steamers

“Savannah and Hawkinsville, Ga.

“Greencastle, Indiana, November 6th, 1896.

“Capt. O. M. Carter,

1825 “Corps of Engineers, Savannah, Ga.

“Dear Sir:

“Your letter of October 20th is before me. Also letters of June 16th and 23rd to my son, J. F. Hirt. Contents are carefully noted. In reply: I indeed appreciate the favor you granted me in let me have the Government snag-boat last Spring; and I have certainly come up to my promise, as I made a check to Mr. J. W. O. Sterly of \$300.00 (or over) as

I have it not with me now. According as you directed me before the boat left Savannah, Ga. And after the boat had returned a week or two, I came to your office in Savannah and settled according to your orders with Mr. J. W. O. Sterly, and made him a check in full to my home bank for \$246.29, and can produce both checks when I come to Savannah.

"Yes, I represent myself to be a honest and honorable man, and my dealing in the South and elsewhere will give me credit as such as much so as the writer of the letter to me of October 20th.

"Now, in conclusion I ask you to send me a statement of the expenses that have occurred from the time you let me have the Government snag-boat till it returned to Savannah May 10th. I will know and must know. As a honest and an honorable man as you term it in your letter.

"Very respectfully yours,

"ALFRED HIRT."

Judge-Advocate: I read from page 302 of Miscellaneous No. 26, the book identified by the witness: (Reading)

"Subject: Expenses of raising Santee.

"U. S. Engineer Office.

"Savannah, Ga., November 17, 1896.

1826 "Mr. Alfred Hirt,

"Greencastle, Indiana.

"Dear Sir:

"Replying to your letter of the 6th inst., I have to inform you that there were received from you two drafts, one for \$300 and one for \$246.29, (on which there was a discount of 62 cents) making the total net sum of \$545.67. Vouchers for this sum, with the exception of \$12.38 were shown to you, —the balance, namely, \$12.38 in cash, is still held to pay a wood bill which is due but has not yet been presented.

"The diving outfit upon which the value of the boat depended was not returned by you as agreed, and you were informed that the expenses of the boat must be charged to you until the outfit was returned. It being almost impossible to receive any reply from you, I was obliged to send a man to the Ocmulgee River and get the diving outfit and pay his expenses and the transportation of the outfit back to Savannah. These expenses, justly and properly chargeable to you, amount to \$132.10, and, as stated above, the money was paid out on your account and at your urgent request and upon the representa-

tion at this office that you were trustworthy and could be relied upon to pay the expenses incurred by you.

"Yours truly,

"O. M. CARTER,

"Capt., Corps Engineers, U. S. A."

Q. (Handing witness paper) That also is a letter from the public files,—an original letter?

A. Yes, sir.

Judge-Advocate: I offer and read: (Reading)

1827 "Savannah and Ocmulgee Line Steamers

"Savannah and Hawkinsville, Ga.

"Greencastle, Ind., Dec. 5th, 1896.

"Capt. O. M. Carter,

"Savannah, Ga.

"Dear Sir:

"Your letter of Nov. 17th came to its destination in due time. Have been absent from home, hence my delay. In reply:—It is a fact that I have made a settlement for the Government snag-boat according to your orders, with Mr. J. W. O. Sterly, May 20th, giving my check for \$246.29, in full of all claims to that date. Now in regard to the diving outfit, Capt. Burnett, when going down the river with snag-boat, left part of it at Lumber City, Ga., for me, which I received several days afterwards. The large wheel of the diving pump he took along down the river as far as Darien, and sent same to Abbeville by express, where same was held in express office for several days, probably a week, before I had notice of same. I made about same statement to you, when at your office May 20th, and you promised to let me have the outfit till I was through, and in a very few days afterwards you sent a man after the pump to Abbeville and took the pump from the steamer Santee, where it was sunk. And now you come and charge me \$132.10, as per your letter, which I deem imposing on me. Will you kindly look into the matter, what the fare will be to Abbeville and returning to Savannah, also the number of days it will take to make the trip, also the freight and expenses to bring the pump to Savannah, also the gentleman's wages for making the trip, which is all there could be in the case, from the way you present it. As to the Government snag-boat, I had nothing to do whatever when same was returned to you by Capt. Burnett. Let me hear from you
1828 as I do not think you want to impose any such bill as you present in your letter of November 17th.

"Yours truly,

"ALFRED HIRT."

Judge-Advocate: I offer and read from page 401 of Miscellaneous Book No. 26: (Reading)

"Subject: Expenses of raising Santee.

"U. S. Engineer Office.

"Savannah, Ga., Dec. 8, 1896.

"Mr. Alfred Hirt,

"Greencastle, Ind.

"Dear Sir:

"Replying to your letter of 5th inst., I have to state that the snag-boat could not be used until the receipt of the diving outfit from you, and the expenses not only of sending after the outfit which you failed to return when requested, but the expenses of the boat during the time you had that outfit, should be paid by you. You intimate that the outfit was not desired by you, but was sent back without authority by Mr. Burnett. If this is true the expenses should, of course, be borne by Mr. Burnett; but if it is not true, and you requested the outfit to be sent to you, as I believe you did, you should of course be responsible for the expenses.

"This has been explained in detail to you, and I have no time to carry this correspondence further. Steps must be taken immediately to collect the amount due from you.

"Yours truly,

"O. M. CARTER,

"Capt., Corps Engineers, U. S. A."

Q. (Handing witness paper) This is from the files of the department?

1829 A. Yes, sir.

Q. An original letter.

Judge-Advocate: (Reading)

"Savannah and Ocmulgee Line Steamers

"Savannah and Hawkinsville, Ga.

"Greencastle, Ind., December 9th, 1896.

"Mr. O. M. Carter,

"Savannah, Ga.

"Dear Sir:

"I received a letter from Mr. W. T. Gibson, of your city, today, telling me that he had a talk with you in regard to the diving outfit for the terms expressed by you.

"Please wait with the matter till I come to Savannah, which will be a short time, say from five to ten days. Will come to see you, and see if we cannot settle the matter. I am perfectly willing to pay what is just.

"Yours truly,

"ALFRED HIRT."

Q. (Handing witness paper) Is that also from the files of the office?

A. Yes, sir.

Q. The original received there?

A. Yes, sir.

Judge-Advocate: (Reading)

“Savannah and Ocmulgee Line Steamers

“Savannah and Hawkinsville, Ga.

“Greencastle, Ind., December 10th, 1896.

“Mr. O. M. Carter,

“Savannah, Ga.

“Your letter of the 8th received, and carefully noted.
1830 In reply: I never intimated that Capt. Burnett left diving outfit on his own accord at Lumber City. The conclusion in your letter is yours and not mine. The fact is, I did ask Capt. Burnette to leave the diving outfit at Lumber City for me. But he only left a part of it, and that part did me no good; and it was a week or ten days before I received the balance of outfit, expressed from Darien, Ga., to Abbeville for me. But I see plainly explaining the matter will do no good, although I made the statement to you at your office May 20th and you agreed to let me have the outfit till done, and more than that you demand \$132.10 of me for that outfit so loaned to me as stated. And while you have the power to take the advantage of me; so I will send you my check for \$132.10 in full of all your demands,—me or steamboat Santee.

“Yours,

“ALFRED HIRT.”

Q. Was that check received with that letter?

A. Yes, sir.

Q. In whose favor was it made out?

A. I think it was made out in my favor.

Q. What was done with it?

A. I cashed the check.

Q. What was done with the money?

A. The money was used as a slush fund.

Q. Was the letter read by Capt. Carter when received?

A. No, sir; Capt. Carter—

Q. No; the letter enclosing that check,—that was addressed to Capt. Carter?

A. Yes, sir.

Q. Was the letter opened by him?

1831 Yes, sir.

Q. And the check handed you by him?

A. Yes, sir.

Q. And the letter turned over to you?

A. Yes, sir.

Q. Now, you may state what you did with the money.

A. I advised Capt. Carter to write to Capt. Goethals; I didn't think we could take the money,—that it could not be deposited,—that it was better he should write. Capt. Carter told me he had written to Capt. Goethals, and Capt. Goethals replied that the Auditor was very busy and he wanted to hear from the Auditor about it first; however, Capt. Carter told me I should use the money as a slush fund like we had used the slush fund before.

Q. Was there any letter to Capt. Goethals recorded on the books of the office?

A. No, sir.

Q. The previous amounts referred to in the correspondence which has been read while you were here, of the sum of \$500 or more, was expended by you?

A. Yes, sir.

Q. (Handing witness papers) Explain those expenditures.

A. There were received \$300 and a check for \$246.29, on which there was a discount of 62 cents, leaving \$245.67, giving a total of \$545.67. There is still in the safe \$13.38 for outstanding bills which have never come in, giving a total of \$532.29. There is a receipt, No. 1, one telegram to Washington, 40 cents; one telegram from Washington 31 cents,—71 cents. No. 2 is the payroll for \$391.66; attached to it is a receipt from Mr. Burnett to me, that I had given the money to him—two receipts, one for \$299.29, and one for \$92.37.

1832 Q. That pay-roll was made out as received from whom—from you?

A. Received of Alfred Hirt: "We, the subscribers, hereby acknowledge to have received of Alfred Hirt the sums herein specified opposite our respective names, being in full for our services at steamer Santee during the month of April-May, 1896, having signed duplicate receipts." That is, from the 26th of April to the 16th of May.

Q. You paid this amount in currency?

A. I paid it to Mr. Burnett. I have never seen the men.

Q. You gave the amount in gross to Mr. Burnett, or Capt. Burnett?

A. Mr. Burnett.

Q. And there are vouchers for that entire amount except

that small sum which you have named as being in the safe,—\$13.00?

A. Yes, sir; \$13.00 which is in the safe, and I have written to Mr. Johnson lately, who is on the Ocmulgee River, to find out about any outstanding bills.

Q. Mr. Hirt was shown these vouchers of expenditures?

A. Yes, sir; Mr. Hirt was in the office and I showed these to him.

Q. How was the amount of \$132.10 ascertained, or arrived at, in making this charge against Mr. Hirt?

A. I could not tell. I have tried to find out and could not. I know in getting at the amount, Capt. Carter asked me how much it would be, and I didn't know, and Mr. Burnett got it. He took the pay-roll and figured it out, as he was in charge of the boat; he knew what men had been on the pay of the Government during the time they figured.

Q. And there is no statement or report on the files of the office as to how that \$132.10 was arrived at?

A. No, sir; except that which there has accrued from the 25th of May to the 31st,—for the time that the boat was 1833 actually delayed here owing to the fact that the diving outfit had not arrived.

Q. As a matter of fact, was the boat delayed waiting for the diving bell?

A. I was told so.

Q. This \$132.10 was to pay the expenses of the boat while so delayed?

A. Yes, sir; the men had been paid by the government, and this was to refund the Government for the time, for the expenses of the men.

Q. Having been paid for that time, their names could not be taken from the roll and put on the roll in the name of Mr. Hirt?

A. No; the idea was to reimburse the appropriation.

Q. Because it had been paid on the roll?

A. Yes, sir.

Q. The other roll was paid with money received from Mr. Hirt?

A. Yes, sir.

Q. But, having been paid out, it became a Government claim?

A. Yes, sir; I should state in the \$132.10 is not only included the hire of the men, but includes the subsistence of the men during that time.

Q. What expenditures did you make out of that \$132.10?

A. Out of that there were sundry expenditures; there was during that time,—in the Spring there was a storehouse that was fitted up, the property was rearranged, and property return blanks were printed and various other things which I cannot remember.

Q. Tell as many as you can?

A. I remember that there was a little repairs that were made for lamps—tubing for lamps, and got some bottles for testing,—No, boxes for putting samples of sand in, and a large jar was bought, and if I remember rightly, we made some experiments with the nigrosine process. Most of it was expended right in connection with overhauling the 1834 property.

Q. Did you reimburse any one for payments made by them?

A. Yes, sir.

Q. Who, and to what amount?

A. I reimbursed myself for \$8.00 for subscription to the New York Sun for the office, which was taken out.

Q. Did you reimburse Capt. Carter in any amount?

A. Yes, sir.

Q. What amount?

A. If my memory serves me right, it was \$12.45 or thereabout, for actual expenses which he paid the men whom he sent after the diving outfit. Capt. Carter paid that bill and this was a reimbursement for that bill.

Q. Did you pay him in money or in check?

A. I paid him a check.

Q. Have you got the check?

A. I don't know where it is now. I had it, but I don't know where it is now.

Q. How is it you haven't it?

A. I had it a few months ago.

Q. Were there any expenditures on the Angler out of that fund?

A. There were some minor expenditures, but I don't remember.

Q. Did you take vouchers for these expenditures?

A. I had receipts.

Q. From all?

A. From each party,—or a memorandum.

Q. Until the fund was exhausted?

A. Until the funds were exhausted.

Q. What have you done with the receipts?

1835 A. I have destroyed the receipts when Capt. Carter was relieved.

Q. You held them until he was relieved, or until after he left the City?

A. No, sir; before he left the City, when the things were packed up. I could not tell to the date whether it was after Capt. Carter left or before. There were a good many papers I destroyed them.

Q. About the time he was leaving here?

A. Yes, sir.

Cross-Examination by Mr. Rose:

Q. There was a boat by the name of the Santee that was sunk in the river?

A. Yes, sir.

Q. And the owners of that boat asked for the use of a Government boat to assist in raising it?

A. Yes, sir.

Q. When was that?

A. I forget.

Q. What year?

A. It was in 1886.

Q. 1896 you mean?

A. 1896.

Q. Capt. Carter sent a message to Washington asking authority to lend the boat to them?

A. Yes, sir.

Q. Before the boat was loaned, was a deposit made with anybody for the use of the boat?

A. Yes, sir.

Q. How much?

A. \$300.00.

1836 Q. Who got the money?

A. I did.

Q. You personally?

A. Yes, sir.

Q. The men on the boat were taken off the Government pay-rolls and put on Mr. Hirt's pay-rolls for some time, were they not?

A. Not all.

Q. Some of them?

A. Mr. Burnett was not taken off?

Q. Mr. Burnett was not?

A. No.

Q. The others were?

A. The others were taken off. Mr. Burnett was carried on the regular Government pay-roll.

Q. Did Mr. Burnett have leave of absence at that time?

A. There is nothing on the record to show that he had leave of absence.

Q. At any rate some of the men on the Santee were paid out of that \$300.00 until the \$300.00 were used up?

A. I don't know whether the \$300.00 were used up at that time. I know another deposit was made.

Q. The \$300.00 was used up in that work by payment of the men?

A. Yes, sir.

Q. And then another deposit was made?

A. Yes, sir.

Q. Was that deposit made before or after the boat was returned? Was that payment of \$246. in settlement when they got through with the boat, being the amount of the bills and pay-rolls?

A. It could not be.

Q. Could not?

A. No.

1837 Q. Then it was not, was it?

A. Yes, it was in a measure a settlement; in a measure, yes.

Q. Now, they sent the boat back?

A. They sent the boat back.

Q. When they took the boat was there a diving outfit with it?

A. I suppose so; I never saw it.

Q. You understood there was?

A. I understood it.

Q. You understood when the boat came back the complete outfit was not returned?

A. I understood so.

Q. For some days after the boat came back without the outfit, it was claimed by Capt. Carter that Mr. Hirt should pay for the use of the boat because the boat could not continue its work by reason of the lack of the complete outfit?

A. Yes, sir; that is right.

Q. Capt. Carter had some correspondence with Mr. Hirt in reference to getting the outfit back?

A. Yes, sir.

Q. The outfit was not sent back by Mr. Hirt?

A. Yes, sir.

Q. Capt. Carter sent somebody to get it?

A. Yes, sir.

Q. Paying the money for that out of his own pocket?

A. Yes, sir.

Q. And that \$13.90 advanced by him was included in this \$132.10?

A. Yes, sir.

Q. And the balance of it was the amount he claimed should be paid because they were unable to use the boat 1838 by reason of the lack of the outfit?

A. Yes, sir.

Q. That would make \$118.20,—the difference between the \$13.90 and the \$132.10. You remember the receipt of this letter of December, enclosing this check for \$132.10?

A. Do I remember that? The receipt of the letter?

Q. You heard me, didn't you.

A. Yes, I acknowledged receipt of the letter.

Q. You remember the receipt of it?

A. Yes, sir.

Q. You remember that there was a check in it?

A. Yes, sir.

Q. Who opened the letter?

A. Capt. Carter.

Q. And handed it to you?

A. The letter?

Q. Yes.

A. I don't know whether I got the letter right off, or not.

Q. Did you get the check?

A. I got the check.

Q. To whom was the letter addressed?

A. To Capt. Carter.

Q. To whose order was the check made?

A. I don't remember; it was endorsed to me because I cashed it; the check may have been made out to my order.

Q. Why made to your order?

A. For the reason that Capt. Carter had the other checks made to my order.

Q. You handled all the money in connection with this matter?

1839 A. Yes, sir.

Q. What did you do with the money after you cashed the check?

- A. Put it in the safe.
Q. What part of the safe.
A. The cash-drawer.
Q. All of it—all of the money?
A. I don't remember that now.
Q. All of the \$132.10; that is what I mean now?
A. I had more money in the safe at that time.
Q. When you got that check cashed, you got \$132.10, didn't you?
A. Yes, sir.
Q. I asked you what you did with it, and you said you put it in the safe. Did you put it all in the safe?
A. Yes.
Q. Every cent of it?
A. Yes.
Q. What day was that?
A. I don't remember.
Q. What was the month?
A. It must have been November or December,—the date of the check—No, I deposited the money.
Q. Where did you deposit it?
A. I deposited the money and afterwards put the money back in the safe.
Q. Where did you deposit the money?
A. I don't remember.
Q. To whose credit did you deposit it?
A. To my credit.
Q. Where did you keep your bank account then?
A. Merchants National Bank.
1840 Q. Did you ever have any other bank account than that?
A. Yes, sir.
Q. Whereabouts?
A. I said in the Merchants National Bank.
Q. Did you have a bank account at any other bank than the Merchants National Bank?
A. Yes, sir; in the Southern Bank, savings department.
Q. At that same time?
A. Yes, sir.
Q. Did you have any other?
A. No, sir.
Q. Which bank did you deposit it in?
A. The Merchants National Bank.
Q. Why did you tell me a minute ago that you didn't know where you deposited it?

A. If I said that, I certainly misunderstood you then.

Q. You deposited it there to your credit?

A. Yes, sir.

Q. And you drew on it the \$13.90 check and gave that to Capt. Carter?

A. Yes, sir.

Q. When did you draw the next out?

A. The next time when I got my pay, I put the money in the drawer.

Q. You never drew a check on that deposit in the bank itself?

A. Not exactly; not that I can say that I paid out everything by check.

Q. Did you ever draw out the \$118.20 that was left after payment to Capt. Carter of the \$13.90, and put that in the safe?

A. I had the cash money in the safe.

Q. Did you draw a check for the \$118.20?

A. No, sir.

1841 Q. And get that check cashed and put that money in the safe?

A. No, sir.

Q. How did you get the money you say you put in the safe, amounting to \$118.20?

A. From my salary; I had money.

Q. When was that?

A. On the first of January; I had often money there.

Q. Just answer my questions, and we will get along all right. Can you tell how many days after the date of this letter that it was that you received the check, this letter being dated December 10th, 1896?

A. I don't remember.

Q. Within two or three days?

A. Two or three days.

Q. And how soon did you make a deposit to your own credit in this bank after you received the check?

A. That I don't remember.

Q. The same day?

A. I doubt it.

Q. The next day?

A. Probably.

Q. That would make the deposit, then, not later than the 15th?

A. Probably, yes.

Q. This being December 10th?

A. I would like to state here that often there were men that I advanced money on the pay-roll to, and when they paid me the money back the cash was put in the drawer, and I cannot go by that at all.

Q. Confine yourself to this, now.

A. I am sworn to tell the truth.

Q. You are sworn to answer my questions first. You 1842 put this check in bank not later than the 15th of December, then, five days after the date of this letter?

A. Yes, sir.

Q. Can you tell me the date you gave the check to Capt. Carter?

A. I don't remember.

Q. Have you any way of finding that out?

A. Yes, sir.

Q. When did you last see that check you gave to him?

A. It was several months ago when I saw that check.

Q. Last September during the investigation by the Board here?

A. I think it was.

Q. In whose hands was it then?

A. Capt. Gillette's hands.

Q. How did he get it?

A. I gave it to him.

Q. You gave it to him; have you ever seen it since?

A. I think I have.

Q. When did you see it last?

A. I don't remember.

Q. You say you put the money in the safe?

Q. Yes, sir.

Q. When you got your January pay,—your December pay, on the first of January?

A. I might and might not: I think I did.

Q. You think you did?

A. Yes, sir.

Q. How soon after the first of January were you paid?

A. The first of January, I suppose.

Q. On the first?

A. Maybe on the 31st of December.

1843 Q. You were paid, then, sometimes in advance?

A. That is not in advance.

Q. On the last day of the month?

A. Yes, sir.

Q. How were you paid—in what way,—by check or in cash?

A. Check or cash? Cash.

Q. Take the year 1896, in December how were you paid your December payment?

A. In cash.

Q. Who gave you the cash?

A. I cashed the check.

Q. Then you got a check first?

A. Check due for the pay-rolls.

Q. And you cashed the check and paid yourself?

A. Yes, sir.

Q. And then you put the money, on the 1st or 2nd of January, into the safe?

A. Yes, sir.

Q. At that time, did you call Capt. Carter's attention to it?

A. Yes, sir.

Q. And tell him it was there?

A. Yes, sir.

Q. Did you tell him why you hadn't put it in there before? You had had the money about 16 days then.

A. Yes, sir; Capt. Carter had written to Washington to Capt. Goethal's whether he could take the money.

Q. And because he had written to Capt. Goethals was the reason you did not put it in the safe, but left it to your own account?

A. No, sir; Capt. Carter told me,—told me to keep it 1844 in my account like the other amounts—

Q. He told you to keep that in your own account in the bank? Answer me yes or no.

A. I cannot.

Q. Did he tell you to keep that money in your own account in the bank after you put it there on the 15th of December?

A. He say "Here is a check, Mr. Sterly," the exact wording I cannot remember.

Q. Did you tell him you had put it to your own account in the bank?

A. I don't remember even that, but I remember this; that I had the money in the safe in cash, and Capt. Carter says you had better leave it there then.

Q. That was after the first of January?

A. It was after the first of January,—and until he would find out—I told him he should write to Capt. Goethals.

- Q. You directed him to write to Capt. Goethals?
A. I asked him—Did not direct—suggested.
Q. You suggested to him to write to Capt. Goethals?
A. Yes, sir.
Q. Had you been carrying on this correspondence with Mr. Hirt before this time?
A. No, sir.
Q. You had written none of these letters to Mr. Hirt?
A. No, sir.
Q. None at all?
A. None; I signed a letter "O. M. Carter" and signed it "J. W. O. S.", but that letter was dictated by Capt. Carter.
Q. And you signed it because he was not there?
A. Yes, sir.
- 1845 What was your salary then?
A. \$200.00.
Q. And had that been greatly increased from the time you came here?
A. Yes, sir.
Q. What was it when you first came?
A. \$40.00 a month.
Q. And before that what was your salary—at Willett's Point?
A. I was land-sergeant and got extra duty pay.
Q. What was your pay per month?
A. My salary was \$17.00 per month, and 50 cents extra duty pay per day.
Q. Making about \$30.00 odd a month. You have heretofore testified that you went up with Capt. Carter in the year 1896 to New York?
A. Yes, sir.
Q. You remember testifying to that?
A. Yes, sir.
Q. How did you go?
A. By steamer.
Q. Direct from here to New York?
A. From here to New York.
Q. And how long were you in New York?
A. In New York,—stayed there one day.
Q. And how long was it before you came back—I mean how long were you in New York and vicinity?
A. Oh, I got there on the 4th of August, and left there on the 26th of September.
Q. And you went up on a pass?
A. I went up on a pass.

Q. Had you ever been up before on a pass?

A. Yes, sir.

1846 Q. When?

A. Nearly every time I went.

Q. Do you remember going up— Do you remember the name of the ship you went up in that time?

A. I don't remember; Capt. Carter may remember; he was in the same boat.

Q. Do you remember going up in 1895—the year before?

A. Yes, sir.

Q. On the Nacoochee,—that was the steamer?

A. I suppose it was on the Nacoochee.

Q. And what time of year was that,—in September?

A. Yes, sir; I think it was on the first of September.

Q. The first of September was Sunday?

A. Yes, sir.

Q. You went then on a pass?

A. Yes, sir.

Q. And you came back on a pass?

A. Yes, sir.

Q. Was Capt. Carter in this Country at that time?

A. No, sir.

Q. He had gone where?

A. He had gone to Europe.

Q. And do you know when he went?

A. When he went?

Q. Yes. How long before the first of September?

A. He left here on the 2nd of July, and sailed from New York on the 10th of July, and came back on the first of October.

Q. Came here on the 1st of October?

A. Yes, sir.

Q. You didn't see him then on that trip to New York?

1847 A. No, sir.

Q. Who relieved him, or was acting as disbursing agent, while he was away during those two or three months?

A. Capt. Goethals.

Q. What was the occasion of your visit North to see Capt. Goethals?

A. To go on duty.

Q. You at that time had charge of the pay-rolls and bills in the same way that you had had before and after, under Capt. Carter?

A. Yes, sir.
